EDUCATION: **S.N.D.T. WOMEN'S UNIVERSITY**

## Why I Chose UC Riverside

I was drawn by the excitement of the diverse and beautiful UCR campus. But I soon realized that – with the best of engineering principles and cutting-edge technologies – UCR would provide the best foundation for my future aspirations. And it has indeed.

## A Diverse Scientific Community

I have been fortunate to perform cutting-edge research in cross-disciplinary fields ranging from vascular hemodynamics, to engineering and materials science. The results of these research topics have culminated in high-impact publications. I am proud to be part of such a diverse scientific community.

## Invaluable Mentorship

I express my deepest admiration and gratitude to my advisor, Dr. Victor G. J. Rodgers. Dr. Rodgers' deep insight to solve biological problems from an engineering perspective provided me the foundation to rationally design solutions. His patience, guidance and invaluable mentorship, from the start to the end of my Ph.D. program, fostered my success as I juggled research, work and community service.

## Beyond Academics

In my first year at UCR, I was a part of the U.S. Department of Labor's initiative, WIRED (Workforce Innovation in Regional Economic Development). I went to many famous companies and firms in Southern California and interviewed the top officials to understand how science, technology and business can work hand-in-hand.

## STUDY IN SUNNY SOUTHERN CALIFORNIA

*I chose UCR because of the Department of Bioengineering and the interdisciplinary research opportunity here. Of course, college rankings are something international students first refer to, but I also liked that the university is in Southern California – with perfect weather throughout the year!*

## STUDENT TO FACULTY RATIO

Work closely with an award-winning faculty!

UCR faculty includes 48 Fulbright Fellows, 19 recipients of Guggenheim Fellowships and 49 National Endowment for the Humanities Fellows.

## UC RIVERSIDE SUPPORTS STUDENT SUCCESS

*Professors do not just teach class and leave, here they share all of their knowledge with their students. You can visit them during office hours to discuss lectures or anything that will help you succeed in class. I have also used the Academic Resource Center to help me with my other academic needs.*

**Yash Singhania**  
**Major: Business**  
**From: Raipur, India**

## Why I Chose UC Riverside

I wanted to major in electrical engineering. The Marlan and Rosemary Bourns College of Engineering (BCOE) is considered to be a hub for engineers, so I felt that UCR was a good choice for me academically. Now that I have completed my first quarter, I am used to the educational patterns and have adjusted to life in Southern California. It was challenging at first, but I really feel like a Highlander now!

## Many Opportunities

There are many opportunities available at UCR. You can participate in an internship as a first-year student, join a variety of clubs and student organizations, volunteer, or participate in work-study and earn money while learning.

## A New Way To Learn

In my home country, I was used to learning by taking tests. However, UCR professors use a variety of teaching methods: application-oriented, project and group assignments, and test-taking. Professors are friendly and care about their students, so I am not afraid to ask them anything.

## Making New Friends

I didn't know anyone when I came to UCR. I was invited by the International Peer Assistants (IPAs) to go on a trip to Santa Monica with other students. This enabled me to meet fellow classmates, learn about their culture and make new friends. I also met some students from my major!
