

Things to know....

Tdap requirement:

Tdap is required to be given **after age 7**.

Tetanus, Diphtheria and Pertussis (Tdap) **1 dose after age 7** (Td, DTP & Dtap do not fulfill this requirement and Tdap must be evidenced on your supporting documentation)

Varicella requirement:

Varicella (chickenpox) 2 doses are required **first dose on or after 1st birthday**.

(Having the disease does not exempt you from this requirement. Only a titer showing immunity will be accepted in place of 2 doses)

MMR requirement

MMR (Measles, Mumps & Rubella) 2 doses are required. The first dose is required to have been given **on or after 1 year of age**.

A MMR blood titer would determine if you have immunity or need an additional dose of the vaccine.

The MMRV immunization date can be entered for MMR & Varicella for the date given.

Meningococcal conjugate-- (Serogroups A, C, Y, & W-135) [Students 21 years or younger at the time of enrollment](#)

Meningococcal conjugate 1 dose is required. The dose must have been given **on or after age 16**

*For all students age 21 years or younger

MenB does not meet this requirement.

TB compliance

The need for TB testing is determined by completing the TB screening form. **No exceptions** will be made for non-compliance with TB screening. Please read each question carefully to ensure you are answering them correctly.

TB Testing **Non-Compliant (Unmet Requirement)** is the system notation that results from the TB screening form indicating TB testing is necessary.

If a TB test is needed, the TB test result must be uploaded and <12 month old at the time of your starting quarter.

IGRA- QuantiFERON®-TB Gold In-Tube test (QFT-GIT) or T-SPOT®.TB test

Chest x-ray **Non-Compliant (Unmet Requirement)** is the system notation that results from the TB screening form indicating chest x-ray is necessary.

If a chest x-ray is needed, the x-ray report must be uploaded and must be < 12 months old at the time of your starting quarter.
