

General Catalog

UNIVERSITY OF CALIFORNIA, RIVERSIDE

2014-2015

An invitation to academic exploration

We invite you to think of this catalog as your guide to a year of adventure and exploration at the University of California, Riverside, part of the world's most prestigious public research university.

In these pages you will find information that will help you plot the course of your academic journey at UCR, where you will meet and work with outstanding faculty, dedicated staff and engaging students.

Many of the scientific and artistic accomplishments that are making news today are built on the research and creative endeavors of University of California faculty and students, past and present. UCR faculty are conducting research that holds promise for improving human eyesight, developing stronger industrial and military materials and halting the spread of deadly diseases. And California's Poet Laureate for 2012-2014, Juan Felipe Herrera, is also a UCR faculty member. His students take his classes, learn how to elevate their own writing and even contribute to his poetry projects.

The achievements of these UCR faculty members and the recognition they receive reflects on the quality of the degree you will earn at our campus. Our history of providing a quality education to our diverse student body helps ensure that you will succeed during the time you spend with us.

Your education is important to you. It is to us, too. Even as our campus has grown in recent years, our faculty has remained highly accessible. UCR faculty involve you in their work, allowing you to contribute to advances in research and innovative forms of expression.

UCR offers opportunities to help you reach your own academic aspirations, whether those involve undergraduate research, specialized study or mentorships.

Our standards are high, as are our expectations. We hope that during your time here, you will grow intellectually, socially and personally, becoming well-rounded citizens of the world.

With your help, UCR will also continue to build its relationships with the off-campus community, both down the street and across the globe. UCR students have long been recognized for their contributions to community service. You can be part of that, too.

So, please join us on this journey of adventure and exploration. We look forward to seeing the contributions each of you will make to UCR, and to the greater good.

A handwritten signature in black ink, which reads "Kim A. Wilcox". The signature is fluid and cursive, written in a professional style.

Kim A. Wilcox

How to Obtain the Catalog

Copies of the 2014-2015 University of California, Riverside General Catalog are available on iBooks and Kindle for \$4.99. A PDF version for desktops is also available. For more information, please visit catalog.ucr.edu.

Note Prices are subject to change without notice.

Please note

Every effort has been made to ensure the accuracy of the information presented in the *University of California, Riverside General Catalog*. However, all courses, course descriptions, instructor designations, curricular degree requirements, and fees described herein are subject to change or elimination without notice. Students should consult the appropriate department, school, college, or graduate division for current information, as well as for any special rules or requirements imposed by the department, school, college, or graduate division.

The *2014-2015 University of California, Riverside General Catalog* and prior issues are available online at catalog.ucr.edu. Other campus Web sites providing similar information may not reflect current approved curricula or course information.

¹ Administrative Studies, and Law and Society are only offered as a major combined with other programs.

² New student registration in this program is not open at present.

³ Students who, in truly exceptional cases, matriculate into the Thomas Haider Program without a UCR baccalaureate degree are eligible to receive a B.S. degree in Biomedical Sciences upon satisfactory completion of the first year of the curriculum leading to the M.D. degree.

⁴ Applications are not accepted from students wishing to work toward the master's degree only.

⁵ A combined B.S.+M.S. program is offered in this discipline (designed to lead to a B.S. degree as well as an M.S. degree in five years).

⁶ See Graduate School of Education section for credential program information.

⁷ The Bourns College of Engineering offers an online Master of Science (M.S.) degree in Engineering. See Engineering section for more details.

Introducing UC Riverside

School Colors:	Blue and Gold
Classes Began:	1954
Campus Mascot:	Highlanders/Scotty the Bear
Location:	Southern California, conveniently located near mountains, desert, and beaches
2013 Enrollment:	18,621 undergraduate; 2,676 graduate
Campus Tours:	TOUR@ucr.edu; visit.ucr.edu
UCR on the Web:	ucr.edu

UC Riverside is a major research university and one of the 10 University of California campuses. A national center for the humanities, it offers students a supportive, collegial learning environment with nationally and internationally recognized faculty dedicated to the highest standards in research, teaching, and public service.

Located on nearly 1,200 acres near the Box Springs Mountains in Southern California, the park-like campus provides convenient access to the vibrant and growing Inland region and to local mountains — home to some of the best skiing and snowboarding in the region — beautiful beaches, amusement parks, golf courses, and outstanding shopping and entertainment.

The university is in the city of **Riverside**, a community of approximately 300,000 people. Located east of Los Angeles and north of San Diego, the area enjoys a year-round temperate climate and an exceptional quality of life with its architectural beauty, cultural art museums, quality housing, and wide variety of recreational opportunities. UCR is an integral part of the Riverside community through its partnership programs and the involvement of both employees and students in community activities and programs.

The nearby Ontario International Airport has daily flights to most of the nation's major cities and connecting commuter flights to the Los Angeles International Airport. Metrolink train service is available to Los Angeles.

History The roots of the campus date back to 1907, when the California State Legislature established the Citrus Experiment Station to conduct research on the agricultural problems of Southern California. In 1948, the University of California Regents approved the establishment of the College of Letters and Science, and the college opened for classes in February 1954. The university's Graduate Division was established in 1960.

Since then, the university's growth has mirrored the growth of Southern California. Once a small university in a small town, UC Riverside is now the premier research and educational institution in thriving Inland Southern California.

The UCR Palm Desert campus provides educational programs, research, and outreach to meet the higher education needs of the greater Coachella Valley region.

Academic Distinctions

College of Humanities, Arts, and Social Sciences Home to the Gluck Fellows program, which sends talented student musicians, dancers, and actors into the community for arts outreach. The program is one of three arts outreach programs funded by the Gluck Foundation; the other two are at Julliard and UCLA. The college has the only UC undergraduate major in Creative Writing and a unique Critical Dance Studies graduate program. Visit chass.ucr.edu.

College of Natural and Agricultural Sciences is a leader in the biological, physical, and agricultural sciences. The UCR Institute for Integrative Genome Biology, one of the leading institutes of genomics research in the world, brings together faculty from a variety of academic units to participate in genomics-based discovery, providing researchers and students with access to state-of-the-art tools for advanced studies in genomics, gene expression, proteomics, microscopy, and bioinformatics. Visit cnas.ucr.edu.

The Marlan and Rosemary Bourns College of Engineering Researchers excel in study of alternative-fueled engines and vehicles, conversion of biomass to vehicle fuel, and air pollution. Majors include bioengineering; business informatics; computer science; chemical, computer, electrical, environmental, and mechanical engineering; as well as materials science and engineering. Visit engr.ucr.edu.

The School of Business Administration offers the UC's oldest and most comprehensive undergraduate Business Administration major in Southern California. The School of Business Administration houses The A. Gary Anderson Graduate School of Management, which offers the Master of Business Administration program, the Master of Professional Accountancy (M.P.Ac.) program, the Master of Finance (M.Fin.) program, and the Ph.D. program in Business Administration. SoBA is accredited by AACSB International – The Association to Advance Collegiate Schools of Business. Visit soba.ucr.edu.

The School of Medicine builds on UCR's long-standing medical education partnership with the UCLA medical school. The Thomas Haider Program at the UCR School of Medicine continues the tradition of providing a unique pathway into medical school for UCR students, with up to 24 of the available medical school seats filled by students who attend UCR for at least six consecutive quarters and complete their bachelor's degree at UCR. The School also offers a Ph.D. degree in Biomedical Sciences. Visit medschool.ucr.edu.

Graduate School of Education The breadth and depth of the programs offered at the GSOE is extraordinary, reflecting faculty expertise and research in such areas as autism; culture and language; higher education; issues of diversity; intervention for children with reading difficulties; policy; and qualitative and quantitative methods. Both research and professional degrees are offered. Visit education.ucr.edu.

School of Public Policy The mission of the School of Public Policy (SPP) is to translate the world-class research being done at UCR to solve the most pressing challenges facing communities in inland Southern California and around the world. The school will bring fresh thinking to such complex challenges as air pollution, water and energy security, food safety, sustainable suburban development, poverty, and health disparities, among many others. The mainstay of the school is the Master of Public Policy (MPP) program, which will equip students with the analytical and management tools needed for formulating, implementing and evaluating public policies. Applications for the MPP will open in Fall 2014, with the inaugural cohort starting class in Fall 2015. Visit spp.ucr.edu.

Principles of Community

The University of California, Riverside is committed to equitable treatment of all students, faculty, and staff. UCR's faculty, staff, and students are committed to creating an environment in which each person has the opportunity to grow and develop, and is recognized for his or her contribution.

There are three objectives that our campus must strive toward to achieve these goals.

First, we must ensure that we have an environment that nurtures the intellectual and personal growth of our students, faculty, and staff.

Second, we must ensure that our campus sets an example of respect for all people.

Third, we must ensure that our campus is a safe and welcoming environment for everyone.

We take pride in the diversity of the campus community and in ourselves by using the campus environment as a place, committed to academic integrity, where all members are encouraged to use their unique talents to enrich the daily life of the community in which they live, work, teach, and learn. Respect for differences and civil discourse must become the hallmark of how we live and work together to build our community of learners at UCR.

We as members of the University of California, Riverside affirm our responsibility and commitment to creating and fostering a respectful, cooperative, professional and courteous campus environment. Implicit in this mutual respect is the right of each of us to live, study, teach, and work free from harassment or denigration on the basis of race/ethnicity, age, religious or political preference, gender, transgender, sexual orientation, nation of origin, or physical abilities. Any violation of this right by verbal or written abuse, threats, harassment, intimidation, or violence against person or property will be considered a violation of the principles of community that are an integral part of the University of California's focus, goals, and mission (and subject to sanction according to University policies and procedures).

We recognize that we will all need to continually work together to make our campus community a place where reason and mutual respect among individuals and groups prevail in all forms of expression and interaction.

Accreditations

UCR is a member of the Western Association of Schools and Colleges (WASC). The campus is fully accredited by the Senior Commission of WASC. This accreditation requires periodic review in accord with WASC policies and standards. WASC is located at 985 Atlantic Avenue, Alameda, CA 94501, (510) 748-9001.

- The B.S. degree (or equivalent program) in Chemistry is certified by the American Chemical Society as meeting its standards.
- The credential programs of the Office of Teacher Education Services are approved by the Commission on Teacher Credentialing.
- The Graduate School of Education School Psychology program is approved by the National Association of School Psychologists and the American Psychological Association.
- The B.S. degree programs in Chemical Engineering, Computer Engineering, Electrical Engineering, Environmental, Engineering, and Mechanical Engineering are accredited by the Engineering Accreditation Commission of ABET, abet.org.
- The B.S. degree program in Computer Science is accredited by the Computing Accreditation Commission of ABET, abet.org.
- The School of Business Administration and The A. Gary Anderson Graduate School of Management are accredited by AACSB International – The Association to Advance Collegiate Schools of Business.

Resources for Learning

ARTSblock

Executive Director: Jonathan Green
Administrative Director: Emily Papavero

Barbara and Art Culver Center of the Arts

3834 Main Street
Riverside, CA 92501
(951) 827-3755; artsblock.ucr.edu

The Barbara and Art Culver Center of the Arts is an interactive art facility housed in the renovated Rouse Building, a magnificent 1895 department store. The Culver Center extends the vitality and community interactivity of UCR/California Museum of Photography and Sweeney Art Gallery by providing new exhibition space; a new home for the Sweeney; an 80-seat Art-house Cinema specializing in weekly independent, foreign-language and alternative films, an atrium gallery for installation, music, and performance under a magnificent 35 foot high naturally illuminated clerestory monitor; a public café; a new seismically protected home for the UCR/CMP's world-treasure Keystone-Mast glass plate stereo collection, supported by a Federal Government Save America's Treasures grant; and an advanced faculty and student laboratory for advanced research in the arts.

Sweeney Art Gallery

Director: Tyler Stallings
3834 Main Street
Riverside, CA 92501
(951) 827-3755; artsblock.ucr.edu

The Sweeney Art Gallery is an artistic laboratory that engages diverse audiences with exhibitions and programs that are committed to experimentation, innovation, and the exploration of art in our time. The Sweeney places a special emphasis on inspiring projects that explore new ideas and materials and re-envision the relationship between art and life. Established on the UCR campus in 1963, the Sweeney moved to UCR ARTSblock in 2006 and plays a special role in contributing to the artistic spirit of the campus and the community at large. At the center of the gallery's mission is an appreciation for the role of artists developing the intellectual and cultural life of society.

UCR/California Museum of Photography

3824 Main Street
Riverside, CA 92501
(951) 827-4787; artsblock.ucr.edu

Founded in 1973 and located since 1990 in Riverside's downtown arts and entertainment district in an award-winning renovated dime store, UCR/CMP has grown into a major photography exhibition and study center for the West Coast. One of the most frequently visited art museum Web sites in the world, it receives more than one million "hits" each month. The Digital Studio provides a community workshop for computer-based creative expression through hands-on access to new imaging technologies. UCR/CMP is one of the facilities of the new UCR ARTSblock, an integrated arts complex consisting of three premier art institutions—the California Museum of Photography, the Sweeney Art Gallery, and the Culver Center of the Arts—located on a single city block in downtown Riverside.

Computing and Communications

Associate Vice Chancellor: Charles Rowley, M.B.A.
Computing and Communications Building
(951) 827-4741; cnc.ucr.edu

Computing and Communications provides technology services and support to faculty, staff, and students.

Application and Multimedia Development (AMD), (951) 827-6424; amd.ucr.edu AMD provides custom web application development that will help departments improve their business processes. AMD applications are secure, robust, and take advantage of campus infrastructure. Applications can be accessed online via most browsers using UCR's Central Authentication System. AMD also brings cutting-edge graphic

design, concept development and visualization services to the academic and administrative community through various multimedia distribution channels (e.g. 3D animations, videos, illustrations, print posters & brochures.) AMD also produces custom graphics and illustrations for grant proposals, and research publications.

Communications Services (951) 827-4624; dial@ucr.edu This division provides data and voice communication needs for the campus.

Computer Support Group (CSG), helpdesk (951) 827-3555; helpdesk@ucr.edu This division provides desktop computing support to faculty and staff, including installations, troubleshooting, consulting, and assistance with acquiring and using stand-alone or networked desktop and laptop computers.

Technology Group (951) 827-3555; helpdesk@ucr.edu This unit is responsible for the iLearn Learning Management System (Blackboard) and provides training via workshops and support to faculty and instructors in its use. Departmental and individual consultation is available to faculty in curricular redesign and the pedagogical use of instructional technology in the classroom.

Multimedia and Classroom Technology (951) 827-3041; multimedia.ucr.edu This division provides support in distance learning, classroom technology and multimedia systems to support faculty, staff, and students with their academic and nonacademic events.

Student Technology Support (951) 827-6495; helpdesk@student.ucr.edu; scs.ucr.edu Supports campus computer labs, student e-mail, iLearn, wireless network, and VPN. Computers are available in Watkins Hall, Sproul Hall, Olmsted Hall, and the Arts Building. Webprinting and Bear Help student technology support available at the HUB Information Desk.

University Libraries

University Librarian: Steven Mandeville-Gamble, M.L.I.S.
(951) 827-3221; stevenmg@ucr.edu
Access electronic resources and hours at library.ucr.edu

The University Libraries serves as an Information Commons and intellectual center for the campus and is the focal point for research and study at UCR. The collections include 3,718,510 print volumes, 435,413 e-books, 143,080 electronic and paper serial subscriptions, 2,323,921 microforms. The Libraries provides access to more than 608 databases; state-of-the-art information technology, including SCOTTY, the online catalog of UCR library collections; the Next Generation MELVYL pilot, the online union catalog to the collections of the UC libraries; full Web/Internet access via more than 350 PCs, and over 20 laptops for checkout; INFOMINE, an innovative Web index and search engine; and the California Digital Library (CDL), which provides systemwide support for access to a variety of electronic resources. These resources are made accessible through four facilities: the Tomás Rivera Library, the Raymond L. Orbach Science Library, the Multimedia Library, and the Music Library. Wireless network access is provided throughout the library. The UCR Libraries ranks among the 120 largest research libraries in the U.S. and Canada and is a member of the prestigious Association of Research Libraries, the Center for Research Libraries and the Western Region OCLC.

Tomás Rivera Library

(951) 827-3220, rivref@ucr.edu

The Rivera Library serves as the main library of the campus providing access to materials in the humanities, social sciences, and arts. Housing over 2,067,710 volumes, 2,247,929 microforms, and providing access to more than 143,080 print and electronic serials, the Rivera Library also provides access to 48 study rooms, 24 graduate carrels, 225 public-use computers/scholar's workstations, and 10 laptops.

Raymond L. Orbach Science Library

(951) 827-2821, sciref@ucr.edu

A total of 618,864 volumes and numerous serial subscriptions support the life and physical sciences, including engineering, agriculture, and medicine. The Orbach Science Library has a seating capacity of 1,360 and provides access to 104 public-use computers/scholar's workstations, 10 laptops, and 25 group study rooms. The Map Room, with 103,422 maps and atlases, is on the ground floor. The Map Room also provides access to

GIS systems and data. The Library is also the home of the U.S. Patent and Trademark Depository library and the newly acquired Water Resources Collection and Archive, a world-class collection transferred from UC Berkeley to UC Riverside in 2010.

Multimedia Library

2117 CHASS Interdisciplinary Building
(951) 827-5606, multimedia@library.ucr.edu

A walk-in multimedia center with audiovisual equipment, media collections, and computer workstations.

Music Library

054 Arts Building
(951) 827-3137, musref@library.ucr.edu

Contains more than 52,337 scores, 12,384 sound recordings and 8,926 compact discs, as well as music journals, reference books, listening facilities, and computer workstations.

General User Services

The UCR Libraries provide a variety of user services designed to enhance the academic experience. The libraries have many comfortable spaces for study, intellectual exploration and relaxation, including study carrels, tables, and comfortable chairs and couches. The Rivera and Orbach Science Libraries have 73 group study rooms, some of which can be reserved online. The Rivera and Orbach Science Libraries lend laptops, netbooks, Nooks, headphones, and other items. In addition to public computers available in all four libraries, users will find public printing and copying facilities, as well as scanners. Many of the libraries are open until late in the evening Sunday through Thursday, and one of the libraries is open 24 hours during Finals Week. For off campus users, the Libraries provide capabilities for off campus access to electronic resources and mobile services, including a **mobile website optimized for a variety of mobile operating systems (m.library.ucr.edu/)**.

Research and Instructional Services

Rivera Library Reference Desk (951) 827-4392
Orbach Science Library Reference Desk (951) 827-3316
Music Library (951) 827-3137
Multimedia Library (951) 827-5606
Ask A Librarian chat (available 24/7)
library.ucr.edu/?view=help/ask_a_librarian.html

Reference librarians assist in identifying and locating information and provide advisory services, including instruction in research strategies. Questions may also be sent via e-mail to the Rivera Library (rivref@library.ucr.edu), the Orbach Science Library (sciref@library.ucr.edu), the Music Library (musref@ucr.edu), or the Multimedia Library (multimedia@library.ucr.edu).

Interlibrary Loan Services (ILL)/Document Delivery Services

Rivera Library ILL (951) 827-3234
Orbach Science Library ILS (951) 827-6387

Students and faculty may use ILL to order materials from other libraries not owned by the UCR Libraries. Materials through ILL include books, periodical articles, newspapers, microforms, CDs, and videos. Articles requested are supplied via email or as a photocopy. ILL is usually free. Fee card holders, students of other academic institutions, UC alumni, Extension students, ESL students and Friends of the Library are not eligible for Interlibrary Loan services. Document Delivery Services (paging of books and journal articles located at the UCR Libraries) are provided for UCR faculty, graduate students, and staff, as well as undergraduates with disabilities. Instructions for Interlibrary Loan and Document Delivery may be found on the following webpage: <http://library.ucr.edu/?view=services/ill>

Unique Collections

Curriculum Resources and Juvenile Literature Collection

Second floor, Tomás Rivera Library

A circulating collection of K-12 curriculum materials in a variety of formats, textbooks used in local schools, and award-winning children's literature

to support the work of students in the Graduate School of Education's Teacher Education programs. Contact Christina Cicchetti, (951) 827-5138 or cicchett@ucr.edu.

Government Publications

Main floor, Rivera Library
(951) 827-4392

UCR Libraries serve as a selective depository for U.S. and California state government publications, with collections of government documents being held at the Rivera Library and Orbach Science Library. The government information collection contains print and digital documents from local and foreign governments and international organizations, as well as extensive law resources, census and other statistics, records of legislative bodies and judicial courts, social and economic studies, and scientific investigations. Contact Ken Furuta, (951) 827-2552, or kfuruta@ucr.edu.

Patent & Trademark Resource Center

Main floor, Raymond L. Orbach Science Library
(951) 827-3316

In 2007 the UCR Libraries was designated a U.S. Patent and Trademark Library. This Center contains the entire backfile of U.S. utility and design patents on DVD and offers online assistance in searching the USPTO patent and trademark databases to both the general public and the UC Riverside community via the web. Contact Julie Mason, (951) 827-2817 or jmason@ucr.edu.

Special Collections & Archives

Fourth floor, Rivera Library
(951) 827-3233

Contains an extensive collection of rare books, manuscripts, archives, and other unique or fragile materials. Contains the Eaton Collection of Science Fiction and Fantasy, the world's largest publicly accessible collection of science fiction, fantasy, horror, and utopian literature comprising over 100,000 volumes dating from the sixteenth century to the present, and approximately 100,000 fanzines. It also houses other rare and archival collections in subject areas comprising agricultural, botanical, and natural sciences; ethnic studies; history of the arts; history of California and Riverside; and literary and cultural studies. Other notable collections include the Citrus Experiment Station records, the Costo Library of the American Indian, the Sadakichi Hartmann Papers, the Oswald Jonas archive, the Tomás Rivera Archive Memorial Collection, the B. Traven Collections, the Tuskegee Airmen Archive and a collection of antique working printing presses. Contact Melissa Conway, Ph.D., (951) 827-3233, melissa.conway@ucr.edu

Eaton Collection of Science Fiction and Fantasy

Special Collections & Archives, Fourth floor, Tomás Rivera Library
(951) 827-3233

The world's largest collection of science fiction and fantasy (SF), with over 100,000 hardback and paperback books; full runs of most pulp magazines; approximately 100,000 fanzines; film and visual material including 500 shooting scripts from science fiction films; almost 100,000 comic books, anime and manga; writers' archives including Robert Forward, David Brin and Anne McCaffrey; collectibles, ephemera, and realia.

Tuskegee Airmen Archive

Special Collections & Archives, Fourth floor, Tomás Rivera Library
(951) 827-3233

Part of a national effort to collect and preserve the history of the first African Americans to serve as pilots in the U.S. Army Air Force in World War II, this unique archive contains personal letters; diaries; photographs; memorabilia; posters; oral history interviews; documentation of careers before, during, and after military service; books by and about the Tuskegee Airmen and African American military history. Contact University Archivist Bergis Jules, (951) 827-3233, bergis.jules@ucr.edu.

Rupert Costo Library of the American Indian

Special Collections & Archives, Fourth floor, Tomás Rivera Library
(951) 827-3233

Contains about 7,000 volumes and more than 9,000 documents,

10 / Introducing UC Riverside

pamphlets, tape recordings, slides, and artwork relating to Native Americans in the United States and the world.

Water Resources Collections and Archives (WRCA)

Circulating Collection, 1st Floor, Raymond L. Orbach Science Library
(951) 827-2934

This internationally renowned archive and monographic collection is the premier collection devoted to water resources in California and the West. The WRCA is comprised of over 200 archival collections, 180,000 reports, 6,000 archival maps, and 45,000 historic photographs pertaining to water development from the 1900's to the present. Contact Jessica Greene, (951) 827-2802, jessica.greene@ucr.edu.

Educational Opportunities

California Teach-Science/Mathematics Initiative (CaTEACH-SMI)

Leslie Bushong, Director
Resource Center, 1315 Pierce Hall
(951)827-4970; smi.ucr.edu
[facebook.com/ScienceMathInitiativeAtUcr](https://www.facebook.com/ScienceMathInitiativeAtUcr)

California Teach-Science Mathematics Initiative (CaTEACH-SMI) has a goal of addressing the critical need of highly qualified K-12 science and mathematics teachers in California. With an economy increasingly reliant on science, technology, engineering, and mathematics (STEM) and the anticipated large scale retirement of qualified teachers, this is an essential time to explore and prepare for a career in teaching science or mathematics.

CaTEACH-SMI at UCR offers undergraduate students paid/unpaid opportunities to explore STEM teaching as a career option. Through CaTEACH-SMI, students receive advising and mentoring to prepare for entrance into an intern teaching credential program while diligently coordinating with academic advisors to ensure completion of STEM degree requirements. The CaTEACH-SMI Resource Center provides future STEM teachers with material and financial resources to promote planning and professional development towards a science/mathematics education career.

Education Abroad Program

Off Campus Academic Experiences
Olmsted Hall, Room 2322
(951) 827-2508; eapoap.ucr.edu

Search for programs by specific areas at eap.ucop.edu

The Education Abroad Program is UC's official study abroad program, offering a high quality curriculum tailored to meet the specific needs of UC students. EAP operates in cooperation with nearly 115 host institutions in 42 countries worldwide, and sends approximately 4,700 UC students overseas annually. Available at each class level, students in any major will want to identify an EAP experience for their degree and career plans. Options vary by duration (short term to academic year) and by academic focus. EAP details are described in the Programs and Courses section of this catalog under Education Abroad Program.

Honorary Societies

To learn more about these organizations:
honors.ucr.edu/opportunities/honors_societies.html or studentlife.ucr.edu

Alpha Lambda Delta is a national society that honors academic excellence during a student's first year in college. It encourages superior academic achievement among students in their first year, promotes intelligent living and a continued high standard of learning, and assists women and men in recognizing and developing meaningful goals for their roles in society. First year students with a first-year minimum 3.50 GPA are invited to join.

Delta Epsilon Iota Our mission at the University of California, Riverside is to build a bridge between students and the Career Center, in which members are empowered to become ambassadors for the Career Center and help to spread opportunities to fellow students. Our mission is also to promote

the ideals of dedication, enthusiasm, and initiative at the University of California, Riverside through student leadership, special programs coordinated with the career center, campus and community service projects, and regular networking opportunities for members

Our Goals are Threefold:

- 1) To embody the ideals of the Delta Epsilon Iota Academic Honor Society at the local level
- 2) To be an effective, contributing organization within the university community
- 3) To provide its membership with "education beyond the classroom".

Gamma Beta Phi is a national collegiate honorary and service society that recognizes and encourages educational excellence, develops leadership and character in its members, and fosters, disseminates, and improves education through appropriate service projects. It recognizes students ranking in the top 20 percent of their class.

Golden Key International Honour Society The top 15 percent of undergraduate sophomores, juniors and seniors (part-time and full-time) as well as all graduate students from all academic disciplines are invited to join Golden Key. The one-time membership fee is for life. Each year, Golden Key headquarters awards both chapter and national scholarships. For more information, contact University Honors at 2316 Olmsted, (951) 827-5323.

Mu Sigma Rho is a national statistics honor society seeking to promote and encourage scholarly activity in statistics as well as recognizing outstanding achievements among students and faculty. Students must have a 3.25 GPA and have a certain amount of statistics courses and class standing to be eligible.

National Residence Hall Honorary aids the development and maintenance of a strong, diverse and academically successful residential community within the UCR Residence Halls. Students must be in the top one percent of the residence hall population.

National Society of Collegiate Scholars recognizes and celebrates high achievement among first and second year students in all academic disciplines. NSCS students rank among the top 20 percent of their freshman or sophomore class.

Omicron Delta Kappa, the National Leadership Honor Society, was founded to recognize leadership of exceptional quality and versatility in college, including representatives in all phases of college life; that those representatives should cooperate in a worthwhile endeavor; and that outstanding students, faculty, and administrators should meet on a basis of mutual interest, understanding and helpfulness. ODK students rank in the top 35 percent of their class.

Order of Omega is a national honor society to recognize junior and senior members of social Greek letter organizations with a minimum 3.0 cumulative GPA for their service to the Greek system and the university. It honors the top 3 percent of the university Greek population for excellence in academics, leadership and campus or community service.

Phi Beta Kappa, founded in 1776, is the oldest and most distinguished academic honor society in the United States. Approximately 10 percent of seniors majoring in liberal subject areas of the arts and sciences are eligible for membership. UCR's IOTA chapter reviews the records of eligible students and elects members on the basis of scholarly achievement, character, and broad cultural interests. All prospective members must have the equivalent of level four (intermediate skill level) of a foreign language and some significant evidence of breadth through courses beyond those required for the major or by the student's college or other demonstration of academic excellence across a diversity of fields. Students are nominated for induction each spring quarter.

Pi Sigma Alpha is the only National Political Science Honor Society for college students of political science and government in the United States. In order to be eligible, students must be a junior, senior or graduate student and be ranked in the top 1/3 of their entire class.

Psi Chi National Honor Society in Psychology was founded in 1929 for the purposes of encouraging, stimulating, and maintaining excellence in scholarship and advancing the science of psychology. Society members must rank in the top 35 percent of their class with a minimum 3.0 cumulative GPA.

Sigma Alpha Lambda promotes, recognizes, and rewards academic achievement and provides members with opportunities for community service, personal development, and lifelong professional fulfillment. Sigma Alpha Lambda is open to sophomore students (and above) with a minimum 3.0 GPA.

Tau Beta Pi (National Engineering Honor Society) marks those who have conferred honor upon their alma mater by distinguished scholarship and exemplary character as students, or by their attainments as alumni. Students rank in the top 1/8 of the junior class or top 1/5 of the senior class.

Tau Sigma National Honor Society recognizes the academic achievement of students transferring to an institution of higher learning from another academic institution, and encourages and promotes the students' involvement in the institution to which they have transferred. Tau Sigma students rank in the top 20 percent of their class with a 3.5 GPA.

Theta Tau the oldest and largest professional engineering fraternity. They focus on promoting social and professional development of its members during and after their college years. Membership is open to all years. Contact organization directly for other membership requirements.

International Education Programs

International Education Programs

UCR Extension Center

1200 University Avenue; Riverside, CA; 92507-4596

(951) 827-4346; fax (951) 827-1074

ucriep@ucx.ucr.edu; iep.ucr.edu

Offers a wide variety of English language, Certificate and Diploma programs for international students and professionals on a year-round basis. Also offers academic pathways for students wishing to study at UCR and other U.S. colleges and universities, and opportunities for visiting international students to take UCR credit courses, on a space available basis. Provides support services such as program orientation, housing assistance, immigration advising, social activities, and college counseling.

Offers the following programs:

- Intensive English
- Improving Oral Fluency
- Conversation and American Culture
- English for International Business
- English for Academic Purposes
- University Credit Program
- UCR Admission Preparation Program
- UCR International Transfer Track Program
- Teaching English to Speakers of Other Languages (TESOL)
- Several intensive professional programs including postgraduate diplomas in management, hospitality, engineering, entertainment & media, and sports management.

Reserve Officer's Training Corps

Students may with the permission of the dean of their college enroll in ROTC courses at another institution while completing their degree programs at UCR. Students interested in Air Force ROTC should contact the Office of Undergraduate Admissions at (951) 827-3411 regarding concurrent enrollment procedures. Those interested in Army ROTC should contact the Office of the Registrar at (951) 827-3409 for information on cross-registration. Descriptive pamphlets summarizing the programs are available at the UCR Career Center.

Air Force Reserve Officer Training Corps (AFROTC) prepares young men and women to become second lieutenants in the United States Air Force while completing their college degree. The program offers scholarships, internships, and a rewarding career after graduation. Classes are offered at California State University, San Bernardino; however, UCR students may enroll using our cross-town agreement. For more information, please contact (909) 537-5440 or visit afrotc.csusb.edu.

Army ROTC Through arrangements with Claremont McKenna College and the Department of Military Science at California State University, San Bernardino, two- and four-year Army ROTC (AROTC) programs are available. Academic units earned in the program may be counted as elective units toward fulfillment of UCR graduation requirements.

Successful completion of the AROTC program leads to a commission as a Second Lieutenant with subsequent service on active duty or assignment to an Army Reserve or National Guard unit. For more information call Claremont McKenna College, (909) 537-5533 or 537-5534 or visit cmcarmyrotc.com.

Summer Sessions and Special Programs

Director of Administration Leonard Taylor

361 Surge Building

(951) 827-3044; summer.ucr.edu

Summer Sessions offers over 600 regular UCR courses in multiple, abbreviated summer sessions, giving students the opportunity to expedite time to graduation, take hard-to-get classes, improve their GPA, get back on academic track, perform research with faculty, and seek professional development or enrichment courses. On campus housing options are available during the summer for both UCR and visiting students, and UCR students are eligible for Financial Aid. Please talk to your Financial Aid counselor for more information.

Who May Attend? Summer term is open to all UC and non-UC students with a high school degree, or who are at least 18 years of age. Students do not have to be admitted to the university to attend Summer Sessions, nor does admission to Summer Sessions constitute admission as a regular student of the university. See the website for more information and an application form for non-UCR students: summer.ucr.edu.

Special Programs, such as the Summer Academy for Advanced High School Students, take advantage of the compressed session format to open the UCR campus to eligible high school students. The program gives high school students an opportunity to get a head start on their undergraduate degree by earning lower division course credit on an official UC transcript: (summeracademy.ucr.edu).

Credits, Grades, and Units All UCR courses are normally transferable to other institutions and applicable degree programs. For UCR students, credits and grades are automatically placed on their official transcript of record without any necessity to transfer them. UCR continuing students wishing to take courses in excess of 10 units per session must have the approval of their advisor or their college's Associate Dean; all other students must have the permission of the Summer Sessions Director of Administration. UCR students in dismissed status must seek approval from their advisor or the Associate Dean's signature from the college they wish to readmit to before registering for Summer Sessions.

University of California Center Sacramento Scholar Intern Program

Associate Director and Public Affairs Journalism Director: AG Block

1130 K Street, Suite LL22

Sacramento, CA 95814

(916) 445-5100 or (951) 827-2634

uacs.ucdavis.edu

The UCCS program provides students with an opportunity to gain first-hand knowledge of California's public policy challenges and processes. The program includes coursework as well as professional experience while living, interning, and attending classes in Sacramento. Participants will

- Work as an intern supporting the policy making process in a legislator's office, an executive branch agency, or another setting in the Sacramento policy community. (10 credit hours)
- Learn about the state's political processes, institutions, and policy challenges in the California Policy Seminar taught by members of the UC Davis faculty and featuring guest lectures given by a wide array of participants in and observers of California politics and government. (4 credit hours)
- Take courses on the UC Davis campus as appropriate to individual needs and interests. (optional)

Housing is available for students 10 minutes from the Capitol building and internships range from 24 to 33 hours per week. Application requirements include a 3.0 recommended GPA and junior, senior, or graduate standing during the participating quarter. Financial aid is available for the quarter in Sacramento.

UC Riverside Extension

Dean: Sharon A. Duffy, Ph.D
1200 University Avenue; Riverside, CA; 92507-4596
(951) 827-4105; fax (951) 827-7273
register@ucx.ucr.edu; extension.ucr.edu

UCR Extension is the continuing education branch of the university. Extension programs are open to anyone seeking higher education. University Extension offers degree credit; postgraduate continuing education credit; and noncredit programs for pursuit of intellectual and cultural interests, professional and career advancement, and examination of topical thinking on public affairs and urban problems. Current and former undergraduate students can enhance their degrees through one of the specialized Professional Certificate Programs. Many courses are offered weekends and evenings for students' convenience.

UCR Extension provides a range of educational opportunities and formats, including concurrent enrollment in UCR campus courses, weekend and one-day conferences, intensive and online Certificate Programs. Intensive English and other programs for non-matriculated international students and international groups are available throughout the year. Students do not need to be admitted to a degree program at UCR to enroll in Extension's courses or programs.

Degree Credit Credit earned in certain Extension courses may be applicable to degree requirements at the time of admission to the university. (See University of California Extension Courses in the Programs and Courses section.) Students should check with the Office of Undergraduate Admissions about the applicability of such credit. Resident students in the university wishing to apply Extension credit to degree requirements must have advance approval from the dean of their college or division before enrolling in Extension courses.

UC Riverside Palm Desert Center

Executive Director: Tamara Hedges
75-080 Frank Sinatra Drive
Palm Desert, CA 92211
(760)834-0800; fax (760) 834-0796
tamara.hedges@ucr.edu; palmdesert.ucr.edu

The UCR Palm Desert Center expands the reach of University of California, Riverside into one of the fastest growing regions of California. Established as a teaching and research center in 2005, the UCR Palm Desert Center is a catalyst for diversification of the inland desert region by providing relevant regional research, offering innovative programs that attract and retain world class talent to the region, convening and creating partnerships that advance the public good, and impacting the cultural life of the community.

UC Riverside Washington Academic Internship Program (UCDC)

UCR Coordinator: Chantal Quintero (Washington, D.C.)
Off Campus Academic Experiences
2322 Olmsted Hall
951-827-2508
ucdc.ucr.edu

This program provides undergraduate students with a multi-dimensional education experience in Washington, DC. Students undertake academic pursuits as well as cultural and social activities. The program combines course work with field research and internship experience. Students also have the opportunity to tour local sites and dialogue with distinguished professionals in the Speaker Series.

Students from all majors can benefit from the program. Visit ucdc.ucr.edu for information about internships and links to other job search sites. The UC Washington Center is located in downtown Washington, DC, six blocks from the White House. The UC Washington Center is an innovative teaching and research facility shared by all of the UC campuses that has classrooms, faculty and staff offices, a modern computer lab, and a student lounge, as well as living facilities for all participants in the program.

Academic Program Students may enroll in 12 to 16 units of course credit for the quarter.

Internship (4-8 units) The focal point of the academic program is the internship, which is based on the students' interests and major, and is arranged before the student leaves for Washington, D.C. May be letter graded or S/NC depending on discipline. Visit ucdc.ucr.edu for sample internships.

Seminar in Washington D.C. (4 units) UCR students meet once per week with a faculty member in residence at the UCDC Center. Academic assignments focus on understanding the city of Washington, D.C., its history, politics and culture. Offered for a letter grade.

Interdisciplinary Elective (4 units) Serves as a weekly forum for students to share and enhance their knowledge of living and working in Washington, D.C. Students will read about, experience and analyze key sites in a multi-disciplinary context. May be letter graded or S/NC.

Academic Planning/How to Apply Interested students should consult well in advance with their academic advisors and the UCDC program staff to determine how participation in the program will affect their degree progress. Consult ucdc.ucr.edu for application deadlines and information on how to apply.

Eligibility and Selection Minimum requirements are a 3.0 cumulative GPA and junior or senior standing during the participating quarter. In addition to academic criteria, the selection committee considers the student's seriousness of purpose, maturity and the capacity to adapt to a study-quarter away.

Financial Matters Program participants pay the same UC and campus fees as a quarter at UCR and are responsible for room and board, books, and personal expenses. The only additional cost directly related to the program is round-trip transportation.

Many forms of financial assistance are available to participants. Students who receive state and federal financial aid may use their scholarships, grants and loans to finance their quarter at UCDC. Students who receive financial aid may also be eligible for funds from the President's Washington Scholarship. Other support may also be available; students should consult with the UCDC program staff or the financial aid office for more information.

University Honors Program

2316 Olmsted Hall
(951) 827-5323; fax (951) 827-5320
honors@ucr.edu; honors.ucr.edu

Excellent students in all undergraduate programs can participate in University Honors. Students benefit from close interaction with Honors faculty in small class settings, and with professional staff who provide developmental advising to help them optimize their educational experience at UCR. High impact, experiential learning opportunities available to Honors students include: undergraduate research, scholarly and creative work, internships, service learning, and faculty-led co-curricular activities. In addition, Honors students are supported by a strong peer support system, faculty mentorship, Honors scholarship opportunities, and preparation for prestigious scholarships and awards. These experiences are designed to prepare students for participation in a senior thesis project that advances knowledge in their discipline, culminating in an Honors Thesis.

- Freshmen are admitted to University Honors on the basis of high school academic and extracurricular records.
- Sophomores can apply for admission to the second year of University Honors if their cumulative GPA is 3.50 or above.
- Juniors, seniors and transfer students with an interest in undergraduate research or creative activity, and GPAs of 3.50 or above may apply in their third or fourth year.

University Honors offers a variety of extracurricular enhancements, including a meeting space, lounge, and a computer lab. Participant benefits include priority registration and transcript notation. Honors students are high achieving, self-directed individuals who seek challenges and consistently strive to achieve excellence. Come join our learning community!

Research Opportunities

Students at UC Riverside have a distinct advantage in the multitude of opportunities available for participating in faculty research programs. Independent participation in such research helps students develop technical skills, explore areas of modern research, and learn how the world of research operates. In addition, working with faculty members gives students the opportunity to interact closely with professors, who, in turn, get to know the students.

To participate in undergraduate research opportunities on campus, students can

- Check out the college and multicampus research opportunities listed below and visit ucr.edu/research.html for other opportunities
- Examine the online research opportunities for the College of Natural and Agricultural Sciences at cnassstudent.ucr.edu/ and the Bourns College of Engineering at engr.ucr.edu/urop
- Examine research-specific Web sites posted by colleges and departments
- Contact departmental advisors directly
- See the Internship Program under Career Center in the Services for Students section in this catalog

College of Humanities, Arts, and Social Sciences

California Center for Native Nations

Co-Directors: Michelle Raheja, Ph.D. and Clifford Trafzer, Ph.D.
2006 Humanities and Social Sciences Building
(951) 827-1799
michelle.raheja@ucr.edu; ccnn.ucr.edu

Provides opportunities for research collaborations with California's native peoples and other Indian tribes that benefit tribal communities and expand scholarly knowledge. As UCR is a neighbor to more than 30 tribes in the surrounding area, the center particularly supports interdisciplinary and culturally sensitive research in collaboration with these communities.

Center for Bibliographical Studies and Research

Director: Brian Geiger, Ph.D., MLS
INTN M1006
(951) 827-5841; fax (951) 827-4120
cbsr.ucr.edu

Supports research and publication in bibliography and the history of the book. It manages five internationally renowned programs.

- The English Short Title Catalog (ESTC) records every item published in Great Britain and any British governed territories from the beginning of printing (1473) through the end of the eighteenth century. The catalog is searchable free of cost via the British Library at estc.bl.uk.
- The California Newspaper Project (CNP) records surviving issues of all newspapers published in California, freely available for searching at the cnp.ucr.edu.
- The California Newspaper Microfilm Archive (CNMA) preserves and stores approximately 100,000 reels of California newspaper microfilm from 1846 to the present. Accessible at cnma.ucr.edu.
- The California Digital Newspaper Collection (CDNC) is a text-searchable collection of more than 550,000 pages of digitized California newspapers from 1848 to the present. Accessible at cdnc.ucr.edu.
- *Un Catálogo Colectivo de Impresos Latinoamericanos hasta 1900* (CCILA) is a comprehensive union catalog of Latin American imprints through 1900. Searchable at ccila.ucr.edu.

Center for Family Studies

Director: Nancy Guerra, Ph.D.
Olmsted Hall, Third Floor
951 827-6421;
Nancy.guerra@ucr.edu; chass.ucr.edu/centers/cfs

Focuses on significant advances in family theory, research, and application requiring an interdisciplinary perspective and intra- and cross-cultural approaches to family issues. Represents anthropology, education, history, sociology, and psychology.

Center for Ideas and Society

Director: Georgia Warnke, Ph.D., Distinguished Professor of Political Science
Associate Director: Laura Lozon
2026 INTN North
(951) 827-1555; fax (951) 827-6377;
ideasandsociety.ucr.edu, laura.lozon@ucr.edu

The Center for Ideas and Society is an interdisciplinary research center dedicated to advancing humanistic studies and creativity at UC Riverside. The Center's fellowships, research workshops, and public events strengthen the intellectual and creative life of the university. We are also committed to disseminating the results of our programs to the Riverside community and beyond.

In 2009, the new UC Humanities Network was developed and funded by a 5-year grant from the UC Office of Research and Graduate Studies, incorporating and expanding the original UC Humanities Initiative launched by UC President David Gardner in 1986. This new initiative of the UC Office of the President is designed to support, stimulate, and facilitate excellence in humanities research across the University of California.

Institute for Research on World-Systems

Director: Christopher Chase-Dunn, Ph.D.
2009 Interdisciplinary Building North
(951) 827-2062;
chriscd@ucr.edu; irows.ucr.edu

Organizes collaborative research among social, biological, and physical scientists on long-term, large-scale social change and its ecological, geographical and climatological causes and effects. Research foci include globalization; global inequalities; transnational social movements; urbanization and settlement systems; biotechnology and hegemony; the rise and fall of cities, states, and empires; and climate change.

College of Natural and Agricultural Sciences

Botanic Gardens

Director: J. Giles Waines, Ph.D.
(951) 784-6962; (951) 827-4650;
gardens.ucr.edu

Consists of more than 40 acres of gardens along the eastern boundary of the campus. The landscaped areas around campus buildings demonstrate the use of a wide assortment of plants that grow well in the inland area of Southern California. Established for teaching purposes, the Botanic Gardens provide plant materials for anthropology, art, biology, botany, conservation, ecology, entomology, morphology, ornamental horticulture, plant pathology, photography, and taxonomy. They also provide plant materials for research projects and for the testing and exhibition of plant species introduced from all parts of the world.

Center for Conservation Biology

Director: Michael Allen, Ph.D.
michael.allen@ucr.edu; ccb.ucr.edu

Supports the conservation and restoration of species and ecosystems by facilitating the collection, evaluation, and dissemination of scientific information. The center identifies new and existing research priorities in conservation biology and inaugurates new research programs. Many

activities of the center are regional, centered on the diverse species and habitats that form the natural heritage of Southern California.

Center of Nano-Scale Electronics, Phenomena, and Technology

Director: Chun Ning (Jeanie) Lau, Ph.D.
jeanie.lau@ucr.edu

The Center of Nano-Scale Electronics, Phenomena, and Technology (CONSEPT) focuses on exploring novel electronic, optical, thermal, and mechanical phenomena that emerge in nanoscale systems, and exploiting these phenomena for next-generation devices and systems. Researchers explore novel materials such as materials as graphene, carbon nanotubes, magnetic systems, and topological insulators as well as nanomechanical systems and chemical and biological sensing.

Center for Invasive Species Research

Director: Mark Hoddle, Ph.D.
(951) 827-4714;
mark.hoddle@ucr.edu; civr.ucr.edu

Entomologists, botanists, biologists, nematologists, and plant pathologists from UCR head collaborative efforts with other UC scientists as well as with state and federal government researchers to define and implement critical research on pests introduced into California that present risks to public health, urban environmental quality, natural resources, managed and unmanaged ecosystems, and economically important plants.

Institute for Integrative Genome Biology

Director: Natasha Raikhel, Ph.D.
Genomics Building
genomics.ucr.edu

Supports faculty in diverse disciplines participating in genomics-related research, which has enormous potential for applications to improve human health, agricultural sustainability, and the environment. Contains advanced technology in DNA sequencing, microarray construction and analysis, visual microscopy, bioinformatics, and proteomics. Encompasses the following two centers.

Center for Disease Vector Research

Director: Peter Atkinson, Ph.D.
peter.atkinson@ucr.edu; cdvr.ucr.edu

The center includes scientists studying vector-pathogen systems at the molecular, genetic, and ecological levels, with work applicable to human health, as well as the well-being of domestic animals and the protection of crop plants. The center adopts a comprehensive approach to the problem of vector-transmitted pathogens at both basic and applied research levels.

Center for Integrative Biological Collections

Interim Director: John Heraty, Ph.D.
cibc.ucr.edu

The mission of the Center for Integrative Biological Collections is to advance research and teaching in biodiversity and to provide support for the management of natural resources by fostering an interdepartmental alliance among UCR's world-class natural history collections. This is accomplished through integrated and transformative approaches across UCR collections that leverage novel systems in communication, relational databases, data mining, geo-referencing, outreach, and advocacy.

Center for Plant Cell Biology

Director: Julia Bailey-Serres, Ph.D.
cepceb.ucr.edu

An interdisciplinary research center uniting plant cell and molecular biologists with computational scientists, engineers, bioengineers, chemists, and nanoscientists in plant systems-based research, using computational biology, engineering, and chemical genomics approaches to understand processes regulated at the molecular and cellular level in the context of the whole organism. The research has applications for agriculture and human biology.

Statistical Consulting Collaboratory

Director: Daniel Jeske, Ph.D.
1337 Olmsted Hall
(951) 827-3014;
collaboratory.ucr.edu, daniel.jeske@ucr.edu

Provides statistical consulting services in areas including bioinformatics, agricultural field trials, ecological studies, entomological studies, sociological studies, marketing studies, industrial experiments, quality and reliability studies, and product and process development studies. Clients include the campus research community and off-campus agencies from all disciplines who use statistics. The collaboratory develops collaborative research relationships as well as research publications. It also provides financial support and consulting experiences to UCR undergraduate and graduate students.

Stem Cell Center

Director: Prudence Talbot, Ph.D.
(951) 827-5689;
stemcells@ucr.edu; stemcells.ucr.edu

Focuses on understanding the basic mechanisms that control stem cell function and deciphering how the tremendous potential of stem cells can be used to improve human health. Researchers at the center have expertise in many different fields including developmental biology, cancer biology, endocrinology, aging, nanotechnology, neuroscience, and bioengineering.

USDA-ARS U.S. Salinity Laboratory

Director: Donald Suarez, Ph.D.
450 West Big Springs Road
Riverside, CA 92507
(951) 369-4814;
ars.usda.gov/main/site_main.htm?modecode=53102000

The only research facility in the nation devoted to the study and amelioration of salinity-related agricultural and environmental problems.

Water Science and Policy Center

Director: Ariel Dinar, Ph.D.
(951) 827-2875;
ariel.dinar@ucr.edu; wspc.ucr.edu

Increasing water scarcity in the face of competing demands by urban, industrial, agricultural, and environmental sectors will necessitate innovative scientific, technological, and institutional solutions. The Water Science and Policy Center works on focused water-science research and teaching programs that expand our knowledge base while simultaneously helping stakeholders to solve critical water management problems.

The Marlan and Rosemary Bourns College of Engineering

Center for Bioengineering Research

Director: Jerome S. Schultz, Ph.D.
A220 Bourns Hall
(951) 827-2111; fax (951) 827-6416;
enr.ucr.edu/CBR.html

The Center for Bioengineering Research partners the Department of Bioengineering faculty with other UC Riverside engineering and science departments. Focal areas include cellular control and regulation, biophotonics and medical laser applications, *in-silico* biosystems and biomolecular modeling, bio-nanotechnology, microfluidics for bioanalyses, rational drug design and high throughput screening.

College of Engineering—Center for Environmental Research and Technology (CE-CERT)

Director: Matthew Barth, Ph.D.
1084 Columbia Avenue
Riverside, CA 92507

(951) 781-5791; fax (951) 781-5790
info@cert.ucr.edu; cert.ucr.edu

A model for partnerships among industry, government, and the academic community, CE-CERT is one of California's premier facilities for research into air quality, transportation, and energy efficiency. The research mission includes transportation systems, emissions and fuels, renewable energy, environmental modeling and policy, and atmospheric processes.

Center for Nanoscale Science and Engineering (CNSE)

Director: Robert C. Haddon, Ph.D.
robert.haddon@ucr.edu; cnse.ucr.edu

Engineers, physicists, computer scientists, neuroscientists, biologists, chemists, and biomedical scientists explore nanoscale materials, such as organic compounds, carbon nanotubes, and magnetic materials, for use in nanoelectronics, spintronics, sensors, and biomedical devices to develop new or improved technologies. The center is jointly funded and administered by the Bourns College of Engineering and the College of Natural and Agricultural Sciences.

Center for Research in Intelligent Systems (CRIS)

Director: Bir Bhanu, Ph.D.
 Engineering II, Room 216
 (951) 827-3954; fax (951) 827-2425;
cris.ucr.edu

Promotes interdisciplinary research for developing computer systems that are flexible, adaptive, and intelligent. Involves an interdisciplinary team of faculty from Electrical and Computer Engineering, Computer Science, Psychology, Economics, Statistics, Mathematics, and Management. The goal is the research and development of autonomous/semiautonomous systems with sensing capabilities that can communicate and interact with other intelligent (biological and artificial) systems.

Winston Chung Global Energy Center

Co-Director: Nosang Myung, Ph.D.
 Co-Director: Sadrul Ula, Ph.D.
 Main Campus: Materials Science & Engineering Building, Room 204
 Off Campus: 1084 Columbia Ave, Riverside, CA 92507
 (951) 781-5676

The Winston Chung Global Energy Center (WCGEC) will advance solutions for today's energy storage demands, while developing far-sighted energy storage research and energy-use strategies for tomorrow's applications. Bridging the gap between industry and academia, the center will contribute to the economic, social and environmental health of communities around the world. This innovative center will:

- Foster a premier academic environment of research and discovery in sustainable energy, with a focus on storage issues;
- Educate a diverse and distinguished engineering workforce that is dedicated to addressing global energy needs;
- Offer tools and training that will increase the capacity of public and private planners, architects, engineers, utilities and developers to design and build energy-efficient community projects;
- Reach out to global organizations and businesses as a partner in fostering clean energy storage solutions; and
- Inspire leadership and community action to address energy storage issues in California and the world.

School of Medicine

Center for Glial-Neuronal Interactions: Innovative Collaborations Applied to Problems of Brain Health and Disease

Director: Monica J. Carson, Ph.D.
 Associate Director: Iryna M. Ethell, Ph.D.
 1274 Webber Hall
 (951) 827-2584; fax (951) 827-3699
monica.carson@ucr.edu; cgni.ucr.edu

The Center for Glial-Neuronal Interactions (CGNI) in UCR's School of Medicine is dedicated to facilitating innovative collaborations between neuro- and glial-centric researchers as well as with researchers from outside the field of neuroscience. The ultimate goal is to understand central nervous system function at a molecular level with the goal of identifying risk factors and therapeutic targets of intervention for cognitive, neurodevelopmental and neurodegenerative central nervous system diseases. Ongoing research includes programs on Alzheimer's disease, autism spectrum disorders, cognitive disorders, epilepsy, glioblastoma, infections of the brain, multiple sclerosis, neuroinflammatory disorders, phantom limb syndrome, substance abuse and traumatic brain injury.

School of Public Policy

Center for Sustainable Suburban Development

Director: Ronald Loveridge, Ph.D.
 (951) 827-7830; (951) 827-4103
cssd.ucr.edu

Explores the social, economic, political and ecological questions posed by population growth and movement, using neighboring communities as a laboratory while recognizing these are global issues. Involves interdisciplinary collaborations in the community and among faculty and researchers.

One Health Center

Director: Mary Gauvain, Ph.D.
 (951) 827-7830;
ucghi.universityofcalifornia.edu/coes/one-health

Focuses on reducing the rate of disease and death resulting from malnutrition, unsafe water, and animal-and vector-borne diseases. In partnership with UC Davis, UCR established the center as part of the University of California Global Health Institute (UCGHI), a groundbreaking, multi-campus program for global health education, research and partnerships.

Robert Presley Center of Crime and Justice Studies

Director: Steven Clark, Ph.D.
 (951) 827-4604;
presleycenter.ucr.edu

Generates knowledge to form and implement effective crime prevention and control policies. The center encourages and facilitates research in the social sciences on basic and policy-related questions regarding justice, legal concepts and processes, social deviance and control, and research strategies for addressing such questions.

Multicampus Research

Agricultural Experiment Station - Citrus Research Center

cnas.ucr.edu/anr/aes.html

A branch of the University of California's statewide Agricultural Experiment Station, the nation's largest land-grant experiment station and the research arm of the University of California's Division of Agricultural and Natural Resources headquartered in Oakland. Conducts research in plants, pests and disease, and natural resource sciences; through Cooperative Extension, provides leadership in the dissemination and application of research-based knowledge in agricultural and environmental science to the people of California. Through educational programs and research opportunities, prepares tomorrow's leaders in agricultural and environmental science.

Center for Ubiquitous Communication by Light (UC-Light)

Director: Albert Wang, Ph.D.
 UC Riverside, Winston Chung Hall, Room 417

The Center for Ubiquitous Communication by Light (UC-Light) is an University of California system wide research center established under the

University of California Multi-campus Research Program and Initiatives (MRPI). UC-Light program brings together faculty researchers from five University of California campus (Riverside, Berkeley, Davis, Santa Barbara and Merced) and the Lawrence Berkeley National Lab, as well as affiliated researchers from Technion in Israel and Hong Kong University of Science and Technology, to conduct interdisciplinary research to develop LED-based visible light communications (VLC) and positioning (VLP) technologies for next-generation ultra-high-throughput wireless streaming and indoor/outdoor visible light navigation. UC-Light Center maintains active research collaboration with the industry.

Cooperative Extension

cnas.ucr.edu/faculty/cooperative_extension.html

Cooperative Extension specialists headquartered at UCR oversee research programs that provide technologies and scientific information to aid the region's residents and help coordinate the activities of farm, family and consumer services advisors based in more than 50 county offices. Programs include sustainable agriculture, pest management, consumer sciences and marketing, irrigation, water quality, urban horticulture, and natural resources management.

Natural Reserve System

Director: Kimberly Hammond, Ph.D.
kimberly.hammond@ucr.edu; biology.ucr.edu/about_us/nrs.html

The University of California Natural Reserve System maintains for teaching and research a system of reserves encompassing the diversity of California's natural terrain. Any qualified individual or institution may use the reserves under the direction and with the approval of the university. UCR administers 8 of the approximately 35 reserves systemwide.

Philip L. Boyd Deep Canyon Desert Research Center encompasses 6,122 acres of desert habitat around Deep Canyon, near Palm Desert. An air-conditioned field station with living quarters and laboratories is located near the mouth of Deep Canyon. A primitive campground and 2-square-mile teaching area is available for class use.

James San Jacinto Mountains Reserve near Idyllwild is approximately 30 acres, surrounded on all sides by relatively undisturbed national forest land. Nearby there are 60 miles of hiking trails with access to thousands of acres of mid- and high-elevation wilderness, from nearby Lake Fulmor to the summit of Black Mountain, at 7,800 feet. The reserve is equipped for field classes of up to 30 students and has indoor housing for small groups.

Oasis de los Osos Reserve is located near Snow Creek at the northern base of Mount San Jacinto. This property consists of 160 acres of rocky desert slopes and a dry alluvial fan. It also contains a perennial stream (Lamb Creek) with some waterfalls. A riparian woodland grows along this stream. A semi-desert scrub plant community occurs on the dry slopes and alluvial fan and along the washes. No facilities are available at this site.

Box Springs Reserve consists of 160 acres near the top of Box Springs Mountains. The property includes both coastal sage scrub and chaparral habitats. No laboratory facilities are present on the property, because of the proximity of such facilities on the UCR campus. This reserve has been used for field class laboratories and student research projects, but other research projects can be conducted at this site.

Sacramento Mountains Reserve contains approximately 590 acres of desert habitat in the Mojave Desert. It is located about 18 miles west of Needles along Interstate Highway 40. This property contains at least seven species of cacti, including one of the best displays of Bigelow Cholla (*Opuntia bigelovii*) in California. No laboratory facilities or living quarters are on this site, but a campsite is available for anyone wishing to use the reserve overnight for teaching or research.

Motte Rimrock Reserve consists of approximately 715 acres at the northwestern corner of Perris, about 15 miles from campus. The vegetation is principally coastal sage scrub and grassland with riparian corridors in the canyons. This land is of particular biological interest for this region because it contains several species of conservation interest. Indian pictographs and a former Indian village site also are on this reserve. A headquarters building contains sleeping facilities and a small laboratory for reserve users.

Emerson Oaks Reserve is located 5 miles east of Temecula and 1 mile

south of Highway 79. This 255-acre site contains coastal sage scrub on the lower hills, chaparral on the upper slopes, and oak woodland (primarily coast live oak) in the valley portion. More than 20 acres of oaks also occur on one of the hillsides. Several permanent springs are on the property. Vegetation at the site is currently recovering from a wildfire in 2004. A newly renovated laboratory facility is available.

Jack and Marilyn Sweeney Granite Mountains Desert Research Center

contains approximately 9,000 acres embedded in the 1.6 million-acre Mojave Desert National Preserve in eastern San Bernardino County. This rugged and scenic site offers exceptional local and regional biotic diversity, ranging from low Mojave Desert flora and fauna to remnant Colorado Plateau biota on the highest peaks. A campground and a small building at Norris Camp are available for class use, and the Allanson complex includes a state-of-the-art research laboratory, conference room, and lodging for up to 15 researchers.

UC Institute for Mexico and the United States (UC MEXUS)

Director: Exequiel Ezcurra, Ph.D.
3324 Olmsted Hall
(951) 827-3519; fax (951) 827-3856;
ucmexus@ucr.edu; ucmexus.ucr.edu

Identifies UC system resources related to research, education, creative activity, and public service involving Mexico and people of Mexican origin. Develops a coordinated, systemwide approach to Mexico-related studies.

Services for Students

Academic Resource Center

Director: Sara Weertz, M.Ed.
Surge Building, First Floor
(951) 827-3283; arc.ucr.edu

The Academic Resource Center (ARC) provides academic support to all enrolled undergraduate and graduate students at UCR with the goal to help students succeed and excel academically. Programs and services are free unless otherwise noted. See the ARC website for hours of operation and service locations.

In addition to the programs and services listed below, the ARC offers student employment and leadership development opportunities for undergraduate students as peer educators: SI leaders, ARC 35 lab leaders, tutors, peer counselors, math advisory exam proctors, administrative support assistants, and computer lab monitors. Summer Bridge also offers TA positions for graduate students. ARC programs and services include the following:

Academic Year Bridge Offers academic and personal support to Summer Bridge students, helping them adjust and transition to university life and academic rigor while building a community with their fellow summer bridge peers at UCR. The program provides high-impact practices such as peer mentoring and out-of-class initiatives to promote transferable skills and time on task in addition to assimilation and socialization to campus culture and academic support services. The goal of the program is to improve student learning while increasing the retention rates of first to second-year students.

Assistance, Counseling & Encouragement (ACE) Provides individualized support to students who are encountering academic difficulty, helping them to meet satisfactory academic progress requirements. The ACE counseling team is made up of full-time professional staff and peer counselors who are trained and experienced at sorting out the factors that can adversely affect academic performance.

Commuter Connect Program (CPP) Provides a virtual community for UCR commuter students. Through trained peer educators, CCP helps commuter students build connections to campus resources and academic support. CCP is designed to strategically create a support network with a focus on achieving academic success, navigating the University, and transitioning to university life through online tutoring, virtual study skill workshops, and a peer assistance chat room.

Computer Lab Open to all enrolled UCR students, offering 27 state-of-

the-art computers for academic purposes and ideal for online research, accessing UCR's iLearn portal, and typing papers.

Early Assist For certain targeted challenging classes, this program assists struggling students, as identified by low scores on an early class assignment or test. Throughout the quarter, students meet with trained peer educators to improve their academic and personal success at UCR.

Graduate and Professional Exam Preparation Seminars Each quarter, the ARC offers low-cost, 8-week seminars to aid student preparation for exams required by graduate and professional degree programs: GMAT (Graduate Management Admission Test for graduate-level business programs), GRE (General Record Examination for Master's and PhD programs), and LSAT (Law School Admission Test for law schools). Summer seminars are also offered. In addition, the ARC offers a 2-quarter prep seminar for the MCAT (Medical College Admission Test for medical schools), which spans Winter and Spring quarters, and focuses on critical reading and test-taking skills. Online registration only. Priority is given to full-time UCR students. The fee includes study materials. Seminars may be canceled due to low enrollment.

Intermediate Algebra Workshop—ARC 35 Developed in collaboration with the Math Department, ARC 35 offers a refresher math workshop for admitted UCR students who have placed into Community College Math but nevertheless need to qualify to take more advanced math classes to complete their academic degree objectives. ARC 35 helps students develop better grounding in the fundamentals needed to be successful in university-level math courses. There is a fee associated with this workshop.

Placement and Advisory Examinations Used by UCR to assess student readiness for University-level coursework and to determine the appropriate course placement in English, Mathematics, Chemistry, and Foreign Languages. UCR students must satisfy placement requirements before registering for these subjects. Exam results are used for advising and placement purposes only; unit credit cannot be earned with these exams. There are four placement and advisory exams:

Analytical Writing Placement Exam (AWPE) Used to satisfy the University of California Entry Level Writing Requirement (ELWR) and to place first-year students into an appropriate English composition course.

Mathematics Advisory Exam (MAE) Used to place first-year students into an appropriate Mathematics course.

California Chemistry Diagnostic Test (CCDT) Optional placement exam that may be used for placement into the Freshman Chemistry series.

Foreign Language Placement Exams Used to determine the appropriate level of Foreign Language entry.

Satisfactory Academic Progress (SAP) UCR students who are receiving any type of financial aid are required to show satisfactory academic progress toward their degree objective to continue receiving financial aid. Professional staff counselors work with students who are referred to the ARC through the SAP appeal process, providing individual counseling and general information on university and financial aid regulations, as well as referrals to other campus resources and academic support.

Study Skills Workshops Aimed at enhancing study skills to improve academic success. Popular workshop topics include Time management, Goal Setting, Critical Reading, Note-Taking, Marking your Textbooks, Exam Preparation, and Test-Taking Strategies as well as a variety of other topics. Trained professional staff offer one-hour workshops at scheduled times throughout the quarter; workshops are also available by request for courses, campus departments, and/or student organizations.

Summer Bridge Provides incoming freshman with an opportunity to complete Math 4, 5, 8A, or English 4 during the summer before their freshman year, so they may begin Calculus or English 1A in the Fall. The goal of this program is to support incoming freshman during the transition from high school to university, linking them to campus resources for academic and personal success, and helping to build a community with fellow summer bridge peers.

Supplemental Instruction (SI) Peer-led group study to help students succeed in targeted high-priority courses. SI consists of regularly scheduled study sessions, giving students an opportunity to practice and develop academic skills necessary for success. Marketed as "guaranteed study time," SI helps students develop study strategies specific to the

course. The goal of SI is to improve academic performance in traditionally difficult courses offered in both lower and upper divisions.

Tutorial Assistance Program (TAP) Tutors provide broad-based study skill strategies and techniques to promote critical thinking and time management. Our trained tutors are multi-talented and multi-disciplined students who come to the ARC recommended by academic departments across campus, and offer tutoring services on a first-come, first-served basis (walk-in and group sessions) as well as individual appointments for a variety of subjects and disciplines. Students should view the online tutor schedule prior to visiting the ARC for subject availability.

Writing Support Program (WSP) Fosters and cultivates student writing at UCR by embedding writing specialists in writing-intensive courses and programs. Specialists lead workshops and small-group tutorials on writing in the context of a course or program. WSP represents a unique partnership between the ARC and the University Writing Program (UWP), aimed at serving the needs of writers across campus.

Associated Students (ASUCR) (Undergraduate Student Government)

202 Highlander Union Building (HUB)
(951) 827-3621; asucr.ucr.edu

ASUCR is the undergraduate student government consisting of 16 elected senators representing all three colleges: Engineering, 2; Natural and Agricultural Sciences, 4; and Humanities, Arts, and Social Sciences, 10. Also elected by the undergraduate students are a President, an Executive Vice President, a Vice President of External Affairs, and a Vice President of Campus Internal Affairs. Additionally, there are 4 director positions elected: a Personnel Director, an Outreach Director, an Elections Director and a Marketing and Promotions Director. The Vice President of Finance is appointed by the President. Together, these 9 officers make up the cabinet, which is the decision-making body when senate is not in session.

ASUCR is supported by the ASUCR fee, \$12.50 per quarter: \$2.00 funds clubs and organizations; and \$10.50 funds student programs and advocacy efforts, and the operating costs of ASUCR. ASUCR is a member of the UC Student Association (UCSA) for system-wide and statewide representation and of the United States Student Association (USSA) for national representation. It appoints undergraduates to several important committees that play a role in campus governance, including the Highlander Union Board of Governors, the Recreation Facility Board of Governors, the Registration Fee Advisory Committee, Student Conduct, and the Parking Committee.

Associated Students Program Board

111 Highlander Union Building (HUB)
(951) 827-ASPB (2772); fax (951) 827-2144
aspb.ucr.edu; aspb@ucr.edu

The Associate Student Programming Board is student-run and plays a critical role in providing student programming and entertainment for UCR's campus community. From annual events such as Highlander Welcome, Block Party, the Wednesday Nooner Series, Homecoming, and Spring Splash, to special programs such as comedy shows, spoken word, concerts, and the latest movie releases.

Assistant Vice Chancellor Student Affairs

Assistant Vice Chancellor (AVC): Susan Allen Ortega, Ed.D.
Hinderaker 2119
(951) 827-3341/ 4641

The AVC Student Affairs provides advocacy and support for students, serves as a point person for communication with parents and plays a central role in responding to student crises and emergencies. Additionally the AVC works with faculty and administration to create a climate that promotes personal and intellectual development, strong and active wellness, enables all enrolled students to flourish and encourages the full participation of all students and community among students

Athletics and Recreation

Recreation Programs/Student Recreation Center

Director: Lindy Fenex, Ph.D.
Student Recreation Center
Linden Street (northwest side of campus)
(951) 827-5738; recreation.ucr.edu

All UCR students are automatically members of the Student Recreation Center (SRC), an 80,000 square foot state-of-the-art facility for exercise, sports activities, and general recreational use. In the fall of 2012, the SRC began construction of a new, expanded facility that will feature a large swimming pool and spa, tennis courts, an indoor running track, a new gym with multiple courts, training kitchen, triple the cardio and weight space, an indoor climbing and bouldering wall, and more. Anticipated completion will be Fall 2014. The current facility will remain open during construction.

Activity Classes/Open Recreation include a weight room, cardio area, basketball, racquetball, volleyball, badminton, squash courts, and 30 kinds of classes, including martial arts, dance and self-defense. The UCR Karate Program is one of the finest in the nation, with seven team national championships to its credit. Recreation also sponsors Market Day, an arts and crafts fair held in December and May, featuring more than 75 vendors selling their wares on campus.

Competitive Sports include Intramural Sports consisting of men's, women's and coed intramural leagues in basketball, volleyball, softball, flag football, soccer, tennis, and racquetball. Also, the Club Sports program offers men's and women's rugby, soccer, volleyball, and dance sport competition clubs.

Fitness and Wellness offers numerous group exercise classes such as Zumba, yoga, cardio kickboxing, and more. These classes are offered at no additional cost to students. Personal training is also available for a fee, where workouts are tailored to specific goals, with expert advice on nutrition, flexibility and weight lifting.

Outdoor Excursions (OE) offers hiking, backpacking, rock climbing, kayaking, and many other activities. The OE rental shop offers tents, sleeping bags, snowboards and so much more for a fee. A Team Excursions Challenge Course and Teambuilding Program are available for all ages and is located behind the Student Recreation Center. The outdoor climbing wall is open every Tuesday and Thursday night and some of the programs are at no additional cost.

Aquatics offers a large swimming pool, where there will be lap/recreational swimming, lessons, workouts, scuba training, and events such as movies in the pool.

Intercollegiate Athletics

Director: Jim Woolridge, M.E.
120 Physical Education Building
(951) 827-2671; gohighlanders.com

A member of the National Collegiate Athletics Association (NCAA) Division I and the Big West Conference, UCR competes in 17 sports: eight for men — baseball, basketball, cross country, golf, soccer, tennis, and indoor and outdoor track and field — and nine for women — basketball, cross country, golf, soccer, softball, tennis, indoor and outdoor track and field, and volleyball. Athletics programs are supported by student fees, general funds, and private gifts.

Student Health Services

Director: Cindy Wong
Veitch Student Center
(951) 827-3031

Health insurance, including waivers:
(951) 827-5683; fax (951) 827-7171
campushealth.ucr.edu/

The Student Health Services provides high quality, confidential medical care to students, with a focus on convenient, affordable, and accessible services. All registered students are eligible to use the center, which contains a comprehensive primary care clinic, supported by an in-house medical laboratory, pharmacy, and x-ray services. Specialty clinics include the Walk-in Clinic for urgent illness or injury that cannot wait for an appointment, Women's Health Clinic, Travel Clinic, Dental

Clinic, and psychiatric services. In addition, the Preventive Care Clinic, through individual consultation and assessment, offers students the opportunity to explore a wide array of healthy lifestyle topics including weight management, optimal fitness, nutrition, smoking cessation, disease management, and stress reduction.

Insurance Student health insurance is a nonacademic condition of enrollment. All students are automatically enrolled in a health plan. The premium is billed on the student account. The Student Health Services is the primary care facility for students in the mandatory insurance plans. Students who can demonstrate comparable insurance coverage from another source may apply to be waived from automatic enrollment in the mandatory plan. Visit the above Web site for deadlines to file a waiver request.

Campus Media

The Highlander (Student Newspaper)

101 Highlander Union Building (HUB)
Newsroom (951) 827-3617; Business/Advertising (951) 827-5039
highlandernews.org

The Highlander provides quality reporting and insightful editorials on campus-related issues, Riverside community-based issues, and coverage of UCR cultural and sports events. The paper is published every Tuesday during the academic year. It receives funding from advertising and a student fee. Students with a desire to write and a passion for journalism or graphic design as well as advertising can work for *The Highlander*. All students are welcome to attend weekly meetings every Monday at 5:15 p.m.

KUCR (88.3 FM in the Riverside area, kucr.org online)

Director: Louis Vandenberg
691 Linden Street
(951) 827-3737
kucr.org (info, show schedules, and live on-line web-streaming)

KUCR, the student radio station of UCR, has been a vital and active element of the campus life since 1965. KUCR is real college radio in the classic mode, licensed by the FCC and broadcasting to the campus and Riverside community on air and on-line. KUCR programs are deep and diverse, presenting a wide variety of genres, from the most current indie rock and hip-hop, to world, classical music, and jazz. The station also features an excellent award-winning set of public affairs, news, and sports programs. KUCR also presents live concerts, public affairs lectures, debates, and panel discussions. In addition, the station does numerous in-person dj events on campus and in the community throughout the year. KUCR has a small core professional staff, with faculty participation, but features students at all levels, in management, programming, on-air dj's, sportscasters, producers, staffers and more. KUCR embodies the university's respect for diverse points of view, ethnic backgrounds, political beliefs, attitudes, and sexual orientations. KUCR doesn't duplicate the mainstream, but provides "alternative" programming not normally heard on commercial radio. The station broadcasts 24 hours a day, 365 days a year, on the air, via web-streaming, and via iPhone and Android apps for mobile devices.

Career Center

Director: Sean H. Gil, M.P.A.
Veitch Student Center (Northwest wing)
(951) 827-3631; careers.ucr.edu

The Career Center has twenty professional and administrative staff members available to assist students with their career planning, major choice, internship search, graduate and professional school preparation, and the job search process. Open year-round, the center offers a career resource library, special events and workshops, individual counseling, career assessments and a comprehensive interactive website available 24 hours a day.

Student Employment. The Career Center provides thousands of full-time, part-time, temporary, and summer jobs posted on our online job board, SCOTLink, at careers.ucr.edu. These include both on-campus and off-campus jobs.

Job Search Assistance. Students can use in-person and web-based

resources to practice interviews and get assistance with resume writing and job search strategies. Companies visiting campus in 2013-2014 for recruitment and engagement efforts have included: AT & T; Booz Allen Hamilton; City Year; ESPN; Enterprise Holdings; Esri; Facebook; Gallup; GEICO; Google; Kohl's Department Stores; Microsoft; Pricewaterhouse Coopers; Peace Corps; PepsiCo; Raytheon and Target Corp. Other companies that have engaged UCR students via telepresence recruiting efforts include: Hulu; LinkedIn, NetApp; Tesla Motors; U.S. Foods; and more.

Internship Program. Internships may be part-time volunteer experiences or may offer a salary or stipend. Academic credit for an internship is available if approved by their academic unit. Coursework will be assigned that runs parallel with the internship in order to provide an effective learning outcome.

Events. The Career Center hosts a number of annual job fairs: Meet The Firms: Accounting & Finance Job Fair; STEM Fair; Career Expo; The Diversity Job Fair; Graduate & Professional School Information Day; Law School Information Day; Engineering and Technology Fair; Government, Internship & Non-Profit Job Fair; Education & Teacher Job Fair; Health Professions School Fair; Spring Job Fair: Career Night and the Last Chance Fair. The Career Center also offers various skill building workshops, job discovery panels, information sessions, and on-campus interviews for career positions and internships.

Child Development Center

3333 Watkins Drive
Riverside, CA 92507
(951) 827-7455; housinginfo@ucr.edu

Early care and education services are available on campus for infants, toddlers, preschool and kindergarten children (from two months through 5 years.) The center is open to children of students, faculty and staff of UCR, and is nationally accredited. We provide an exciting and engaging learning environment, opportunities for individual creativity and development, cooperative social interactions, and affirmation of one's culture and experiences. The needs of each child are met in a supportive and nurturing way. Tuition assistance is available when income limits are met.

Cultural Events

Director: Todd Wingate, M.A.
353 Highlander Union Building (HUB)
(951) 827-4629
culturalevents.ucr.edu

Cultural Events is a cultural, intellectual, and educational resource for the university and the surrounding communities. Artists who have performed on the Performing Arts Series include Philip Glass, Twyla Tharp, Laurie Anderson, Joe Goode, 33 Fainting Spells, Rennie Harris, Daniel Bernard Roumain, the Eroica Trio, The Vienna Choir Boys, Anoushka Shankar, Dianne Reeves, The American Brass Quintet, Altan, Margaret Cho, Danny Hoch, and Culture Clash.

Counseling Center

Director: Laura Hammond, Ph.D.
Veitch Student Center North Wing
(951) 827-5531; counseling.ucr.edu

The Counseling Center offers a wide range of confidential services aimed at helping UCR students with psychological difficulties that might interfere with their academic study or personal well-being. All registered UCR students are eligible to be seen, free of charge.

Clinical Services

The UCR Counseling Center strives to be warm and welcoming. We provide a range of programs to promote mental health, emotional resilience, and wellness throughout the campus community. Our clinical services include **individual counseling**, **couples counseling**, and **group therapy**, as well as **psychiatric services**. All of our clinical services are provided by a diverse and multiculturally competent professional staff.

The Counseling Center provides walk-in crisis services (weekdays from 8:30 am-4:30 pm), that includes consultation with students, staff, faculty, and parents. The Counseling Center is open Monday-Friday, 8 am - 5 pm.

Counselors are also available 24 hours by phone at 951-UCR-TALK or (951) 827-5531.

Stress Management

Our stress management programs include a six-session **Biofeedback** training program, **StressBusters Peer Educators** programming, and a library of **meditation and relaxation exercises** for streaming and downloading from our website, counseling.ucr.edu. Programs are aimed at assisting students in managing various stressors associated with university life, relationships, and work-life balance.

Outreach

Our professional clinicians offer **outreach and consultation** to faculty, staff and students across campus. We provide training and education on a variety of mental health and wellness topics, specifically focusing our efforts on working with **distressed, suicidal, and disruptive students** on campus.

Our clinicians work with students, parents, staff and faculty during orientation programs, in classes, at health and wellness fairs, in residence halls, at fraternities and sororities, in crisis situations, and, as a collaborative member of the **Student Wellness Partners**.

Cultural Student Programs

African Student Programs

Director: Kenneth Simons, B.A.
133 Costo Hall
(951) 827-4576; asp.ucr.edu

African Student Programs (ASP) was established in 1972 to enhance the academic, cultural, and social development of and to retain students of African descent. Our purpose is to promote academic excellence by providing opportunities for students in their development as role models, leaders, professionals, and scholars.

Asian Pacific Student Programs

Interim Director: William Caganap, M.A.
244 Costo Hall
(951) 827-7272; apsp.ucr.edu

Asian Pacific Student Programs (APSP) coordinates projects and services to meet the needs of students of Asian Pacific Islander descent. APSP promotes a diverse learning environment, providing UCR with opportunities to learn from and about the Asian and Pacific Islander student population. Various social and cultural activities such as the Asian Pacific Islander

Heritage Month, the Peer Mentor Program, leadership training, and API Women's Conference are designed to assist students in their personal, academic, cultural, and social development.

Chicano Student Programs

Director: Estella Acuña, B.A.
145 Costo Hall; (951) 827-3821
FAX: (951) 827-2189, csp.ucr.edu

Established in 1972, Chicano Student Programs (CSP) offers projects and services responding to the needs of Chicano/Latino students on campus. Support services include advising, individual counseling, referral information, and the coordination of special programs and activities such as the Raza Graduation Banquet, Semana de la Mujer, Día de los Muertos, Poesía Peligrosa, leadership training, new student/ parent orientation, speaker series, community projects, and advisement of clubs and organizations.

Middle Eastern Student Center

Director: Marcela Ramirez, M.S.
Highlander Union Building (HUB) 361
(951) 827-7233, mesc.ucr.edu

The first of its kind in the UC system, the MESC is a central place of community, cultural expression, and celebration of Middle Eastern culture. The MESC fosters relationships to build inclusion, acceptance, and earnest communication with an emphasis on cultural diversity. We

20 / Introducing UC Riverside

support intellectual exchange, encourage the study of Middle Eastern culture and history, while promoting the advancement of higher education. Collectively we pursue civic engagement and civil discourse as a means to promote mutual understanding. The MESC builds alliances and engages meaningful conversations to meet the needs of the Middle Eastern student population at UCR.

Native American Student Programs

Director: Joshua Gonzales, M.B.A.
229 Costo Hall; (951) 827-4143, (951) 827-3850
FAX: (951) 827-4342, nasp.ucr.edu

Provides educational, cultural, and social support for Native American students and all students on the UCR campus and surrounding communities through Native American events such as the American Indian speaker/film series, the annual Spirit of the Tribes 5K Run/Walk, the annual Medicine Ways Conference, the annual UCR Pow Wow, "Indian Time" radio program on KUCR (88.3 FM or kucr.org), community outreach, cultural workshops, and much more.

Graduate Student Association

Highlander Union Building (HUB)
(951) 827-3740
gsaucr@ucr.edu; gsa.ucr.edu

GSA represents all campus graduate students, including credential and medical students. Governed by the Graduate Student Council, which comprises representatives from each of UCR's graduate programs. Officers, elected at large, are the president, executive vice president, vice president of academic affairs, health insurance chair, and public relations officer.

It is supported by a \$24 per quarter fee for services such as the migrant program that provides travel grants to graduate students who attend or present research at professional conferences, Grad Bash parties, and beverage mixers.

A member of the UC Student Association, which represents all UC students and has a lobby program in Sacramento, GSA is heavily involved in campus governance and appoints students to serve on various committees.

Health Professions Advising Center

Associate Director: Gwen Hill, M.A.
1114 Pierce Hall
(951) 827-6233; hpac.ucr.edu or healthprofessions.ucr.edu

The Health Professions Advising Center provides information, advising and support for students planning to pursue a graduate degree in the health professions. Services include individualized advising, peer mentors, speakers, workshops, special events and other activities for students who wish to enhance their academic and extracurricular preparation for medical and other health professions schools/programs.

Housing, Dining & Residential Services

Assistant Vice Chancellor: Andy Plumley, M.A.
3595 Canyon Crest Drive
Riverside, CA 92507
(951) 827-6350; housinginfo@ucr.edu
housing.ucr.edu

UCR student housing provides a variety of on-campus living environments designed to encourage both academic achievement and personal growth. Our 10 varied housing communities are designed to fit the needs of students at all levels, from anxious first-year admits, to those approaching their degrees, to students with families of their own.

Living on campus — as opposed to commuting or living in off-campus apartment complexes — ensures that students are truly part of the college community, with access to valuable resources and opportunities to participate in activities that complement the classroom educational experience.

Studies have shown that living on-campus, especially during the critical first year, increases student engagement and satisfaction, and the likelihood of an incoming student receiving their degree.

Three **Residence Halls** are home to more than 3,000 students living in double- and triple-occupancy rooms on co-educational halls. All Residence Hall rooms are furnished and air-conditioned, with high speed data connectivity, telephone, and cable television service included.

Some halls are intentionally arranged for students who share a common academic or social interest. These include:

CHASS First-year students in the College of Humanities, Arts, and Social Sciences

Enginuity First-year students in the Bourns College of Engineering

Honors Hall Students admitted to University Honors at UCR

Pre-Business Students in the College of Humanities, Arts, and Social Sciences Pre-Business Program

PATH Pan-African Theme Hall

Unete a Mundo Latino/chicano cultural-interest hall

Gender-Inclusive Housing Students with diverse gender identities, expressions, and orientations

Stonewall Hall Students of diverse gender identities and sexual orientations, and gender-diversity allies

Professional and student staff work together to plan activities and programs that develop a sense of community and encourage social interaction.

Educational support consists of academic study groups, tutorial assistance programs, seminars, computer labs, study rooms and scheduled study hours. Social activities include weekly hall competitions, off-campus trips, theme dances, special dinners, mock game shows, cultural events and intramural sports. Residence Halls also feature television lounges, pool and ping-pong tables, video games, fitness rooms, piano rooms and social lounges. On-site convenience stores provide snacks, school supplies and toiletries. Residential restaurants provide access to a high-quality, all-you-care-to-eat culinary program.

UCR Campus Apartments offer more than 2500 continuing and graduate students the enhanced privacy of traditional apartment-style communities while retaining the advantages of living on campus. Apartments range from economical, fully-furnished suites to furnished and unfurnished multi-bedroom, multi-bath apartment homes. All UCR Campus Apartments include refrigerators, carpeting, window coverings, heating, air-conditioning and cable television service. Most include full kitchens and private baths. Communities may also feature a swimming pool and spa, picnic areas with barbecue grills, recreational and study rooms, computer lab, television lounge, vending machines, bike storage, secure laundry rooms and a sport court/recreational space.

In addition to planning social and educational events and activities, on-site staff are also trained and available to assist residents with questions, concerns, or advice regarding personal and maintenance needs and peer conflicts, 24 hours a day.

Family Student Housing is available to all students with families. The community is comprised of moderately-priced, unfurnished two- and three-bedroom duplex homes on 55 park-like acres at the edge of campus. Community amenities include a park with playground and picnic area, secure laundry facilities, and a community center with a computer lab. Homes include refrigerators, stove/oven units, tile floors and washer/dryer hook-ups. Also provided are equipment check-out, grounds maintenance, repair services, water service, trash removal, and an extensive family-oriented activities calendar. The Family Student Housing Eligibility & Assignment Policy can be viewed on the Housing website.

Finally, the **Community Living Program** is a web-based service designed to help students find housing opportunities in the community surrounding UCR. It also allows students to advertise themselves as potential roommates or search for other students who are looking for a roommate.

UCR Dining Services prepares diverse, healthy cuisine and friendly service to the UCR campus community. Residential Restaurants are located at both **Aberdeen-Inverness** and **Lothian** Residence Halls. Entrees, grilled specialties, homemade pizza, international cuisine, salad, fruit, and desserts are served in an "all-you-care-to-eat" format.

Citrus Grove Catering is the official catering service for the campus. Catering can provide creative theme meals, banquets, picnics, barbecues, formal dinners, international menus, elegant lunches, and refreshment

breaks to complement campus meetings and events.

The Highlander Union Building (HUB) offers a food court with a diverse range of culinary choices, including Italian cuisine at **La Fiamma**; healthy Mexican at **Habanero's**; and Asian dishes at **Panda Express** and **Sushi by Panda Express**. Also in The HUB complex are **The Grill at Latitude 55**; **Scotty's**, the campus' own brand of convenience stores, and such familiar favorites as **Subway** and **Coffee Bean & Tea Leaf**.

Other campus retail dining options include: **The Barn**, UCR's legendary social hub offering salads, burgers, pizza and grilled sandwiches, plus top-name musical artists at night; our coffee and beverage outlet **Ivan's@Hinderaker**; **Bytes** café and the **Culinary Chameleon** food truck, which can be found at various locations around campus and at most major special events.

Highlander Union Building (HUB)

Director: Todd Wingate, M.A.
Highlander Union, HUB 353
(951) 827-3610; hub.ucr.edu

The Highlander Union Building (HUB) is a gathering place where students, faculty, and staff meet, eat, relax, and study. Featuring dining and retail facilities, meeting areas, lounges, and event spaces, the HUB also provides offices for student government, cultural programs, and student affairs departments.

The Highlander Union offers:

- Assistance in reserving meeting space and event planning in any of the HUB conference rooms or surrounding outdoor locations through Highlander Event Scheduling.
- An information and technology support center located on the first floor. The Highlander Union's Welcome Desk associates are prepared to provide students and guests with directions and information about campus and local community services. Specialized BearHelp associates are ready to answer any technology related questions, and offer students free printing. Current students can also check out laptops for a two hour loan period.
- A wide range of food fare from burgers, sushi, and tacos to Asian and Italian inspired cuisine. For those on the go, the Scotty's convenience store is a quick stop to pick up a snack.
- Latitude Fifty-Five is equipped with pool tables, TVs, and Xbox units. Hosting many events presented by the Highlander Union Programs team, Latitude 55 is one of the few campus locations open late nights and some weekend hours. "The Grill at Latitude 55" offers a tasty menu of burgers, chicken strips, sandwiches, snacks, drinks and monthly specials.
- Multiple lounge areas throughout the building provide comfortable places to relax and study. The outdoor Highlander Plaza and upper mall also provide shady and suitable sitting areas.

International Student Resource Center

Director: Karen McComb, M.S.
University Village Suite 204
(951) 827-4113; internationalcenter@ucr.edu
internationalcenter.ucr.edu

UC Riverside has a vibrant international student community representing over 60 countries worldwide. At the International Student Resource Center (ISRC) international students can get answers, find support, and connect to community seamlessly with our key programs and services. ISRC staff conduct pre-arrival and orientation sessions; offer cultural and adjustment advising; organize community building and support programs; coordinate workshops about employment and benefits; facilitate referrals to appropriate campus and community resources; and provide advice and guidance on all immigration issues related to student status. We are dedicated to the success and wellness of our international students, and to creating a welcoming and safe environment that respects people from all backgrounds.

All UCR students can benefit from the ISRC's wide range of international programs and activities designed to develop intercultural skills and global awareness. Students can request to be paired for weekly conversation

and cultural exchange through our quarterly Global Connections Partner program, and can develop their leadership and intercultural skills by becoming an International Peer Advisor. During International Education Week in November, students are encouraged to learn and experience traditions from around the world through planned activities and events.

Lesbian Gay Bisexual Transgender Resource Center

Director: Nancy Jean Tubbs, M.S.
245 Costo Hall
(951) 827-2267; out@ucr.edu; out.ucr.edu

The LGBT Resource Center provides support, education, and advocacy regarding sexual orientation and gender identity for the UCR campus community. The center is open until 8pm most evenings and offers a David Bohnett CyberCenter; a Resource Library of books, films and magazines; "drop-in" staff and peer support; and referrals to on- and off-campus resources.

Programs include the Allies Safe Zone network, Peer Connections online mentoring program, Community OUTreach Educators (CORE) peer education program, Tuesday Talks and other discussion groups, Q-Camp Orientation, Trans Remembrance Display, T*Camp, Lambda Celebration, and student-initiated campus traditions such as Dragalicious Drag Ball, The Coming Out Monologues, and Pride Prom.

The LGBT Resource Center works closely with student organizations, the LGBT Studies Minor, Stonewall Hall & Gender Inclusive Housing, the Chancellor's Advisory Committee on the Status of LGBTs, and members of the Common Ground Collective to make UCR a Top 10 Transgender-Friendly Campus and a Top 25 LGBT-Friendly Campus in the nation.

Office of the Ombuds

University Ombuds: Andrew Larratt-Smith, JD, MDR
388-390 Surge Building
(951) 827-3213
ombuds@ucr.edu; ombuds.ucr.edu

The values of the Office of the Ombuds are:

- Independence
- Impartiality
- Confidentiality
- Respect & Voice
- Fairness & Equity
- Renewal & Progress
- Success of the UCR Community

Anyone who has a university-related problem, or is in conflict with someone on campus, or thinks they have been treated unfairly may consult the Ombuds. The Ombuds will discuss a situation with the visitor privately, explain what policies may apply, and generate options and strategies for resolving the issue(s). He may also help in gaining a better understanding of personal conflict approaches and styles, or may serve as an impartial facilitator or mediator to resolve disputes and conflict situations.

Some topics that have been brought to the Ombuds are:

- Academic, pedagogic or research issues;
- Workplace conflicts such as supervisor-staff issues;
- Unfair treatment, harassment, bullying, or discrimination;
- Clarification on university policies or procedures;
- Ethics issues or violations of policy

In all cases, the Ombuds is confidential, independent, impartial and informal. The Ombuds does not create files or maintain records on cases and people. The Ombuds will not take sides or provide legal advice, but does advocate for fairness and equity. The Ombuds is an informal resource for the UCR campus community, and does not participate in formal processes. If appropriate, however, the Ombuds can aid in identifying formal options and other resources that may be available.

22 / Introducing UC Riverside

The Office of the Ombuds does not provide legal advice.

Please remember that email is not a secure method for relaying personal or confidential information to the Ombuds. Phone and in-person contact are encouraged.

The exception to confidentiality exists when the Ombuds perceives there may be an imminent threat of serious physical harm to self or others."

Police and Safety

Chief of Police: Michael Lane, B.A.
3500 Canyon Crest Drive
9-1-1 for reporting emergencies
(951) 827-5222; police.ucr.edu

The UC Police Department (UCPD) operates 24 hours per day, 365 days a year. UCR Police officers have full police powers and are responsible for all law enforcement activities and criminal investigations on the UCR campus. Police officers work in uniform or plain clothes patrolling the campus in marked and unmarked vehicles, on bicycles, and by foot.

Incident Reporting The university strongly encourages victims to report all criminal incidents, regardless of their nature, to the police immediately to ensure that appropriate action can be taken. Emergencies are best reported using the 9-1-1 system and nonemergencies using routine channels.

Emergencies Any police, fire, or medical emergency on campus can be reported by the 9-1-1 emergency reporting system, campus Emergency Call Boxes, campus emergency phones located in all campus building elevators and various campus buildings, or by walk-in reporting to the Police Department. Call boxes are located in or adjacent to most campus parking lots and are indicated on campus maps.

Publication of Incidents To increase awareness of campus safety at UCR, incidents of criminal activity within the campus community are publicized via the UCPD Annual Report and Crime Statistics online; an ongoing "press log" of Community Crime Alert Bulletins (posters); the above Web site; "Crime Watch" columns in campus housing newsletters; regular police activity reports to campus housing administrators; Crime Alert e-mails to the campus community in compliance with the "Timely Notice" provisions of the federal Jeanne Clery Disclosure of Campus Security and Campus Crime Statistics Act of 1998; and crime prevention programs. Details can be found at police.ucr.edu.

The **Campus Safety Escort Service** is free to students, staff, faculty, and anyone else who needs an escort.

- Pick up any red phone on campus that says Campus Safety Escort Service, which will automatically connect to the Dispatcher Desk
- Walk up to the Dispatcher Desk located inside Rivera Library and ask for an escort
- Call the Dispatcher Desk at (951) 827-3772 and ask for an escort
- Wave to an escort on campus to be walked to a destination

Student Alumni Association

Alumni and Visitor's Center
(951) 827-2586; sa.ucr.edu

Affiliated with the UCR Alumni Association, a network of over 98,000 alumni, the Student Alumni Association prepares students for life after college through mentorships with successful alumni in the working world; nationally recognized career conferences in medicine, engineering, and business; dinners with alumni; the UCR Dance Marathon, and other leadership-building activities. More information is available at the above website.

Student Conduct and Academic Integrity Programs

Director: Laura Riley, M.Ed.
Interim Deputy Director: Tasha Yules, M.S.
104 Costo Hall
(951) 827-4208; conduct.ucr.edu

Works to articulate to students the standards of behavior expected within the university community, educate students within the context of

these standards, and ensure a safe and healthy environment conducive to learning and personal development. Any member of the university community wishing to bring alleged violations of standards to the attention of the university should contact this office.

Student Life

Director: Ellen Whitehead, M.Ed.
229 Highlander Union Building (HUB)
studentlife.ucr.edu

Students can contact the office or go to the website to find ways to get involved on campus and find resources available to support student organizations and fraternity and sorority life. Student Life coordinates programs to assist students with their personal and academic success through Highlander Orientation, the First Year Programs, leadership resources and commuter programs. Student Life provides a variety of campus activities and events throughout the year. Visit the Student Life website for more information about services and resources provided by the office.

Student Org Network provides comprehensive support and assistance to student organizations, including assistance with university recognition, recruitment, program and event planning, major event management, accessing university resources, understanding and negotiating university policies and procedures, organizational development and enhancement, fundraising, promotion and marketing, and communication.

Fraternity and Sorority Involvement Center is a resource center for students involved in fraternity and sorority life, as well as for students who want to learn more about what fraternity and sorority life has to offer. The FSIC provides assistance with recruitment, event planning, scholarship, philanthropy, and community service for fraternity and sorority life on campus.

Campus Activities provides a variety of campus entertainment, activities, and opportunities for students, staff, and faculty to show their Highlander pride and spirit.

Highlander Orientation helps new first year students get to know the university and become acclimated to UCR. Highlander Orientation provides opportunities to meet other first year students, receive academic advising, enroll in classes, and learn about campus resources to help students be successful.

First-Year Programs assist new students in starting off on the right track in their college experiences through a number of programs, workshops, and leadership opportunities.

Commuter Programs provides resources and activities for commuter students to stay connected to UCR.

Student Life Case Manager

Jeremiah Dieujuste, MFT
Highlander Union Building 381
(951) 827-9354
After Hours contact through UC Police Dispatch (951) 827-5222.

The Student Affairs Case Manager is available to students in navigating issues that interfere with their academic and personal success and to provide support to students directly and through referrals, linkage, advocacy, problem-solving, and campus and community resources.

Student Special Services

Interim Director: Laura Riley, M.Ed.
125 Costo Hall
(951) 827-3861
specserv@ucr.edu; specialservices.ucr.edu

Services for Students with Disabilities (SSD):
(951) 827-4538

Services for Students with Disabilities Services for Students with Disabilities offers information to prospective students about available services, financial aid, housing, mobility, or other concerns related to attending UCR. Prospective students are invited to contact the office early in their planning to attend UCR. For specific information about admission requirements, contact the Office of Undergraduate Admissions or the Graduate Division.

Services available to regularly enrolled UCR students may include information on and referral to on- and off-campus services, mobility assistance, and academic support services. Students wishing to receive disability accommodations should contact SSD to request services. Accommodations are individually designed to meet the documented disability-related needs of each student.

Veterans Services Student Special Services is the certifying official and liaison with the U.S. Department of Veterans Affairs (VA) for students who are eligible for VA educational benefits as a result of their own military service or that of a parent or spouse. Students who receive such educational benefits may also be eligible for special VA-sponsored work-study and tutorial benefits. Students should be aware of the standards for satisfactory progress at UCR; the pertinent information is detailed under Scholarship Regulations in the Policies and Regulations section of this catalog. Also, it is the student's responsibility to report to Student Special Services any change in status that may affect benefits.

Children and spouses or registered domestic partners of veterans whose death or disability (at any percentage) was service connected may also be eligible for exemption from most university fees under provisions of the California Educational Code. Application may be made to any California county veterans services office. Claims for fee exemptions should be presented to the university during the academic year for which the claim applies. Retroactive approval can be granted only in situations in which students applied for the exemption in a timely manner but approval was delayed by the VA's processing of an original or reopened service-connected disability compensation or Dependency and Indemnity Compensation claim; a copy of the initial denial letter from the California Department of Veterans Affairs or county veterans services office is required to document such circumstances.

Transportation and Parking Services

Interim Director: Greg Artman
683 Linden Street
Riverside, CA 92507
(951) 827-TAPS (8277); parking.ucr.edu

All vehicles parking on the UCR campus must display a valid student, faculty/staff or visitor UCR parking permit at all times. Visitor parking is available at the Pay-By-Space dispensers, located in the following lots: Lots 6, 10, 14. Additional Hourly and Daily permit dispensers are located in lots 6, 23, 26 and 30, and after 4:00 p.m. in lots 4 and 24. See the above web site for other services.

UCR Campus Store

Northeast of the Highlander Union Building (HUB)
(951) 827-BOOK (2665)
uccampusstore.com

The UCRiverside Campus Store provides textbooks and supplies for the courses offered. General supplies, clothing and gift items are also available. Students are urged to use their class schedules when buying textbooks. All textbook information is now available online at uccampusstore.com.

RENT Your Textbooks At the UCR Campus Store, you can rent a large number textbooks needed for the quarter, then return them at the end of the term. Renting textbooks can save you approximately 50% less than the cost of purchasing a new, printed textbook, but not all textbooks are available for rent. All rented textbooks must be returned to the bookstore, in good condition, by the Rental Return Due Date. Please refer to our website for more information on rentals and FAQ's uccampusstore.com.

Textbook Refund Policy A full refund will be given the first week of class with receipt and books in original condition. After the first week of class, a full refund will be given with receipt, proof of schedule change, and books in original condition during the first 30 days of class. Refunds for summer and special course sections will be accepted for one week only after the start of class.

General Return Policy All merchandise other than textbooks may be refunded any time with a valid receipt. Without a receipt, a merchandise credit will be issued at the current selling price. Exceptions: Custom course materials, outlines, study guides, magazines, prepaid phone cards, and software.

Book Buy-Back The UCR Campus Store buys students' used books back every day. This is called "buy back." The best time to sell your used books is during finals week. The bookstore will pay 50 percent of the book's selling price if it is requested by a professor for required use next term and the bookstore is not overstocked. If the book does not meet this criteria, the price paid is based on the current national demand.

Please remember: For the protection of the students on campus, the bookstore always requires students selling books to show current student identification.

Bear Logic

Northeast of the Highlander Union Building (HUB)
(951) 827-4426
bearlogic.ucr.edu

Your campus computer store. BearLogic offers a wide variety of Apple computers, tablets, accessories, and adapters. Students, staff, and faculty can take advantage of our convenient location on main campus for education discounts and great products.

UCR Card Office

Highlander Union Building (HUB), Suite 249.
Cost for a new R'Card: \$25
Cost for a replacement R'Card: \$20
(951) UCR-CARD (827-2273); uccard.ucr.edu

You're about to embark on a life-changing journey and your UCR ID card can be a passport for exploring your campus environment. As the official campus ID, you'll use it to provide verification for class attendance, gain access to UCR home games and student performances, and attend campus-wide social events like HEAT, Block Party, and Spring Splash. The UCR ID Card is a multi-functional campus ID card so your card will travel with you as you check out books from the library, work out at the Student Recreation Center, gain access to labs and residence-hall living spaces, and if you have a Dining Plan, rely on the card swipes for all your meals. Money can be also added to the card's Bear Bucks account to use for copying and printing in the libraries, in some vending machines, and in laundry facilities at most campus housing locations. Bear Bucks may also be used at all Dining Services locations, the UCR Campus Store, at all campus convenience stores, and at participating merchants off-campus. You can even use your UCR ID to explore your community because ridership on the RTA is free with a show of the card.

University Advancement

Vice-Chancellor for University Advancement: Peter Hayashida, M.S.
4128 Hinderaker Hall
(951) UCR-NEWS (827-6397); ucr.edu

Headed by the Vice Chancellor for University Advancement, this division has primary responsibility for generating external support for the campus, through fund-raising, strategic media relations, marketing, campus publications such as the campus magazine, video production services, the UCR home page, event planning, and alumni services, including a Student Alumni Association.

Vocational Rehabilitation Services

State Department of Rehabilitation
3130 Chicago Avenue
Riverside, CA 92507
(951) 782-6650 (Voice) or (951) 682-0143 (TTY); rehab.cahwnet.gov

Students who have a disability that handicaps them vocationally may be eligible for services from a state department of rehabilitation office, including vocational counseling and guidance, training (with payment of costs such as books, fees, and tuition), and job placement.

Voter Registration

Voters who need to register for the first time, or reregister because they have moved or switched their party affiliation, can obtain forms from the Student Special Services Office in 125 Costo Hall or visit **specialservices.ucr.edu/vote**. Voters may also request a form by calling 1-800-345-VOTE, or complete an online form at the Secretary of State's Web site at sos.ca.gov.

The Well

(Well-being, Empowerment, Life, Learning)

Director: Stacey Grady, M.S.
Highlander Union Building 248
(951) 827-WELL; well.ucr.edu

UCR offers a variety of wellness-related programs designed to support holistic student health and well-being. The WELL is a coordinated center for UCR's student wellness initiatives. The WELL serves to create a safe, supportive, and connected campus environment through the promotion of healthy minds, bodies and communities. The WELL provides accessible, robust resources and support for students in the areas of physical, social, emotional, cultural and spiritual wellness through a network of peer educators, mentors and professionals. The WELL is the office that collaboratively coordinates the UCR Student Wellness Initiative. The UCR Student Wellness Initiative (part of the UC system-wide Mental Health/Healthier Campus Climate Initiative) aims to highlight the programs and services of the Student Health Center, Counseling Center, Dean of Students Office Mental Health Outreach Team, Housing, Dining, and Residential Services, International Student Resource Center, Student Recreation Center, as well as the Well-Community Service Initiatives, Graduate Initiatives, Health Education, and Peer Initiatives.

Women's Resource Center

Director: Adrienne Sims, Ed.D.
260 Costo Hall
(951) 827-3337; wrc.ucr.edu

The Women's Resource Center (WRC) provides advocacy, educational programs, informal counseling, enrichment activities, support groups, and referrals for the entire UCR student community. Its goals are equity, access, outreach, retention, knowledge and skill development, safety, and a general sense of well-being. Core services include the Campus Safety Escort Service, SAVE Peers, self-defense classes, The Leadership Community for Women and other groups, initiatives, events, drop-in hours, and volunteer opportunities throughout the year.

The **Campus Safety Escort Service** provides safety escorts that will walk or drive you to and from your car or a nearby destination. This service, comprised of trained student volunteers, is available **Sunday - Thursday from dusk to 11:30pm** by calling **(951) 827-3772**, using the red direct dial telephone located on the first floor of most campus buildings, or by dropping by the HUB or Rivera Library lobbies. Please consider volunteering- just complete an application online at wrc.ucr.edu/escort-services or stop by the Women's Resource Center, 260 Costo Hall.

Prospective Undergraduates

Campus Tours

Campus Tours Office
1137 Student Services Building
(951) 827-TOUR (8687)
TOUR@ucr.edu; visit.ucr.edu;
visit.ucr.edu/virtualtours

Visitors can learn more about UCR's history, academic programs, research and other interesting facts from a current undergraduate student. One-hour long campus, residence hall, and engineering lab tours are offered weekdays and selected Saturdays. Prospective students and guests can also participate in an information session led by an admissions counselor. Reserve a tour online, at **visit.ucr.edu**.

Early Academic Outreach Program (EAOP)

1228 Student Services Building
(951) 827-4695; fax (951) 827-4762
eaop.ucr.edu; facebook.com/UCREAOP

The mission of EAOP is to increase the number of students who have the opportunity to achieve a postsecondary education. Services include: College Knowledge, Academic Enrichment, Advising, Campus Tours, and information on college entrance exams.

Gaining Early Awareness and Readiness for Undergraduate Programs (GEAR UP)

1460 E.Holt Avenue, Suite 114
Pomona, CA 91767
(909) 397-4711 ext. 6021, Fax (909) 629-5484
gearup.ucr.edu

GEAR UP provides students with a clear path to college. GEAR UP is a six-year federal program designed to increase the number of low-income and first generation students who are prepared to enroll in and succeed in college. The program works with a cohort of students in the seventh grade and serves the same cohort until they graduate from high school and enroll in college. During these years, GEAR UP offers services to students, families, and teachers. Our services include: academic support and advising, tutoring, financial aid counseling, mentoring, outreach, cultural and educational field trips, college tours, professional development workshops, summer residential programs and other supportive services

Services for Students with Disabilities

Student Special Services
125 Costo Hall
(951) 827-4538
specserv@ucr.edu; specialservices.ucr.edu

Offers information to prospective students about available services, financial aid, housing, mobility, or other concerns related to attending UCR. Prospective students are invited to contact the office early in their planning to attend UCR. Services may include information and referral to on- and off-campus services, mobility assistance, and academic support services.

TRiO Programs

1228 Student Services Building
(951) 827-4685, fax (951) 827-4762
trio.ucr.edu

TRiO Programs (Educational Talent Search, Upward Bound Program Classic, Upward Bound Program Oasis) help high school students from Riverside and San Bernardino counties who have disadvantaged backgrounds complete high school and enroll in college. They provide academic advising, information about college, mentoring, summer residential programs, and cultural and educational field trips.

University Eastside Community Collaborative (UECC)

1228 Student Services Building
(951) 827-2514
uecc.ucr.edu

The UECC provides an opportunity for UCR students to become engaged in their community through tutoring and mentoring in local schools and community centers. UECC members partner with local schools to provide tutoring to lower performing students in literacy and mathematics while working with the City of Riverside to develop and participate in meaningful projects that leave a lasting impact on Riverside's Eastside neighborhood.

Visit **My.UCR.edu**

Undergraduate Admission

Application for Admission

Serving high school and community college students, their parents, and counselors, Undergraduate Admissions provides information about college preparation and admission of new undergraduate freshman and transfer students. Counselors visit high schools and community colleges to provide individual preadmission advising to students. Staff members are also available by appointment and on a walk-in basis for preadmission advising. The office hosts various events throughout the year which give prospective students and their families the opportunity to visit the campus; meet faculty, staff, and students; and learn more about UCR and its programs and opportunities for undergraduates. The office is also responsible for the posting of transfer units to the UCR records of continuing and readmitted students. Inquiries may be addressed to:

Undergraduate Admissions
3106 Student Services Building
University of California, Riverside
Riverside, CA 92521
(951) 827-3411

Prospective freshman students may email: admissions@ucr.edu
Prospective transfer students may email: transfer@ucr.edu
Prospective international students may email: internationalinfo@ucr.edu

When to Apply

UCR accepts applications for admission to all undergraduate majors for Fall 2015 during the priority filing period, November 1-30, 2014.

How to Apply

Prospective applicants may apply online: universityofcalifornia.edu/apply.

Freshman Student Admission

UCR seeks to recruit and retain an academically strong student body that has demonstrated the rigorous preparation needed for admission to a major research institution and reflects the diversity of our state and region.

This section describes the two-phase undergraduate admission and selection process at UCR:

1. Satisfying the University of California minimum admission requirements
2. Selection by UCR according to the principles of Comprehensive Review, as determined by the UCR faculty

Meeting UC minimum admission requirements will not guarantee admission to UCR. Applicants who seek to increase their likelihood for admission should strive for achievement well beyond UC minimum requirements.

Final determination of admission will be made within the context of campus enrollment goals.

UC Admission Requirements

Freshmen Students interested in entering the University as freshmen need to satisfy the following requirements:

1. Complete a minimum of 15 college-preparatory courses (a-g courses) with at least 11 finished prior to the senior year. The a-g course requirements are shown in the box on this page. More information about the a-g course requirements can be found at universityofcalifornia.edu/admissions/freshman/requirements/a-g-requirements/index.html. The university will accept only those "a-g" courses that appear on the official UC-Certified Course List for the California high school the student attended. The UC-Certified course list is available at doorways.ucop.edu/list.

2. Earn a grade point average (GPA) of 3.0 or better (3.4 for non-residents) in these courses with no grade lower than a C.

- a. **Honors Courses** The university assigns extra points for up to four year-long university-certified honors level, Advanced Placement, and/or UC-designated International Baccalaureate courses taken in grades 10, 11, and 12: A=5 points, B=4 points, C=3 points. College-level courses in the a-g college preparatory courses that are transferable to the university are also assigned honors grade points. A maximum of two yearlong courses taken in grade 10 are assigned honors points. Grades of D are not assigned extra honors points. (Extra points will be awarded to 10th graders only when they take honors courses that have been certified by the university as honors-level courses.) Acceptable honors-level courses include Advanced Placement courses, specific Standard Level and all Higher Level International Baccalaureate courses, and college courses that are transferable to the university.

"a-g" Subject Requirement

- a. **History/Social Science** (2 years required)
Two years of history/social science, including one year of U.S. history or one-half year of U.S. history and one-half year of civics or American government; and one year of world history, cultures, and geography.
- b. **English** (4 years required)
Four years of college preparatory English that include frequent and regular writing, and reading of classic and modern literature. Not more than two semesters of ninth-grade English or no more than one year of approved ESL-type courses can be used to meet this requirement.
- c. **Mathematics** (3 years required, 4 years recommended)
Three years of college preparatory mathematics that include the topics covered in elementary and advanced algebra and two- and three-dimensional geometry. Approved integrated math courses may be used to fulfill part or this entire requirement, as may math courses taken in the seventh and eighth grades that the student's high school accepts as equivalent to its own math courses.
- d. **Laboratory Science** (2 years required, 3 recommended)
Two years of laboratory science providing fundamental knowledge in two of these three core disciplines: biology (which includes anatomy, physiology, marine biology, aquatic biology, etc.), chemistry, and physics. The final two years of an approved three-year integrated science program may be used to fulfill this requirement.
- e. **Language Other Than English** (2 years required, 3 years recommended)
Two years of the same language other than English. Courses should emphasize speaking and understanding, and include instruction in grammar, vocabulary, reading, composition, and culture. Courses in language other than English taken in the seventh and eighth grade may be used to fulfill part of this requirement if the student's high school accepts them as equivalent to its own courses.
- f. **Visual and Performing Arts** (1 year required)
A single yearlong approved arts course from a single visual and performing arts discipline: dance, drama or theater, music, or visual art.
- g. **College Preparatory Electives** (1 year required)
One year (two semesters) in addition to those required in "a-f" above, chosen from visual and performing arts (nonintroductory-level courses), history, social science, English, advanced mathematics, laboratory science, and language other than English (a third year in the language used in the "e" requirement or two years of another language).

3. Meet the examination requirement by taking the ACT with Writing or the SAT Reasoning Test by December of your senior year. SAT Subject Tests are not required. However, you may want to take them if you want to:

- Demonstrate mastery of a particular subject
 - Satisfy an “a-g” requirement
 - Apply for a competitive major that strongly recommends them (e.g., Bourns College of Engineering and the College of Natural and Agricultural Sciences recommend Math Level 2 and either Chemistry or Physics).
- a. **ACT Assessment Test plus Writing** To register, obtain a registration packet from a high school counselor or register at act.org.
- b. **SAT Tests** To register, obtain a registration packet from a high school counselor or register at collegeboard.com.

Graduation Rates

The following information is provided in compliance with the Federal Student Right-To-Know Act. It reflects four-, five-, and six-year cumulative graduation rates of the 3,594 incoming first-time freshmen for Fall 2007 and does not include graduation of students who transferred to other colleges and universities. All students enrolled in a degree program are included.

Graduated in four years	40.8%
Graduated in six years	66.1%

Paths to Admission for California Residents

For the highest-achieving California applicants, we have two paths to admission. If you are in one of the following groups and you are not admitted to any of the UC campuses you apply to, you may be offered a spot at another campus if space permits.

1. **Statewide Path** Students who rank in the top 9 percent of California high school students according to the UC admissions index, which can be found at universityofcalifornia.edu/admissions/freshman/california-residents/admissions-index/index.html, or
2. **Local Path (ELC)** Students who rank in the top 9 percent of their graduating class at a participating high school. Students whose high schools participate in the ELC program – which most California high schools do – will be identified to be in the top 9 percent on the basis

of GPA in UC-approved coursework completed in the 10th and 11th grades. To be considered for ELC, students must have a minimum GPA of 3.0 and complete the following a-g courses prior to their senior year:

a. History/Social Science	1 year
b. English	2 Years
c. Mathematics	2 Years
d. Laboratory science	1 Year
e. Language other than English	1 Year
f. College-preparatory elective (chosen from the subjects listed above or another course approved by the university)	4 Years

After students enter their coursework and grades in their applications, the University of California will compare their GPAs to the historic top GPA for their school. Students who meet or exceed that GPA, will be identified as ELC and a note will be added to their application. For more information on this process, go to universityofcalifornia.edu/admissions/freshman/california-residents/local-path/index.html.

Admission by Examination

Students who do not meet UC’s minimum requirements, may be considered for admission to UC if they earn high scores on the ACT with Writing or SAT Reasoning Test and two SAT Subject Tests. To qualify by examination, students must achieve a minimum UC Score total of 410 (425 for nonresidents), calculated according to instructions that can be found at universityofcalifornia.edu/admissions/freshman/requirements/examination/index.html. Additionally, students must earn a minimum UC Score of 63 on each component of the ACT Assessment plus Writing or SAT Reasoning Test and on each SAT Subject Test.

Students may not use a SAT Subject Test to meet Admission by Examination if they completed a transferable college course in that subject with a grade of C or better.

High School Proficiency Examination If a student does not have a high school diploma, the university will accept the Certificate of Proficiency awarded by the State Board of Education upon successful completion of the California High School Proficiency Examination. The university also will accept proficiency examinations from other states, or the General Education Development (GED) Certificate, in place of a diploma. However, a student must still meet the UC admission requirements and campus selection requirements.

UCR Comprehensive Review

Comprehensive Review is the process by which UCR evaluates freshman applicants, who meet minimum UC requirements, using multiple measures of achievement and promise, while considering the context in which each student has demonstrated accomplishment. UCR will calculate an Academic Index Score (AIS) for all UC-eligible freshman applicants. The faculty of UCR have designated the measures described below to be used to calculate the AIS. Admission to UCR will be determined within the context of campus enrollment goals. Although no particular AIS will guarantee admission to UCR, prospective students who strive for the highest possible AIS increase their likelihood for admission.

High School GPA The strength of an applicant’s high school GPA is the strongest indicator that a student will be successful within an academically challenging UC environment. The capped GPA is calculated on the basis of all completed “a-g” courses with extra points added for UC-approved honors courses taken in grades 10 and 11, capped at 8 semesters. A capped GPA considers the extra points earned for honors-level courses and may exceed 4.0 for some students.

ACT Assessment Plus Writing or SAT Reasoning Test Provide another effective measure for determining the potential for success of a UCR applicant.

Advanced Placement (AP) or International Baccalaureate (IB) courses - AP and IB courses prepare students for college-level coursework. Therefore, students who take and do well in these courses tend to have a high probability for success within the UC environment.

Low Family Income Students who demonstrate high academic achievement, despite low socioeconomic status, are likely to exhibit persistence, maturity, and insight. Low family income is determined based on total family members and household income.

First-Generation University Attendance UC-eligible applicants who are the first in their immediate family to attend college are apt to have personal strengths that will contribute to their academic success. Students whose parents have not graduated from a four-year college or university are qualified for first-generation university attendance.

Applicants to College of Natural and Agricultural Sciences are strongly encouraged to take the SAT Math Subject Exam, and either the Physics or Chemistry SAT Subject Exam. Applicants are also strongly encouraged to take the ACT Science Reasoning Test and an Calculus Exam.

Applicants to Bourns College of Engineering should ensure strong preparation in Physics, Chemistry, and Mathematics. Their mastery of Mathematics should cover at least Pre-Calculus, but an Advanced Placement course in Calculus is recommended. Applicants are also strongly encouraged to provide evidence of adequate preparation by taking the SAT Math Subject Exam, and either the Physics or Chemistry SAT Subject Exam, or the ACT Science Reasoning Test.

Nonresidents of California

Two paths to UC eligibility exist for nonresidents at the freshman level. The first is the same as described under UC Admission Requirements and the second is the same as described under Admission by Examination, with the following exception: Non-resident students must have a minimum GPA of 3.4.

Nontraditional Student Admission

UC Riverside has developed an admission program for homeschooled or other nontraditionally educated students in recognition of the benefits of the education these students have received, including the depth of learning, socialization, maturity, creativity, and vision. These qualities provide excellent foundations for pursuing an education at UC Riverside.

Visit my.ucr.edu/admissions/paths.aspx for more information about how UCR defines a homeschooled or other nontraditional education and specific admission requirements.

International Admission

Complete information on how to apply to UC Riverside as an international student can be found at international.ucr.edu. The credentials of an international applicant — a student who holds or expects to hold a student, exchange, visitor, diplomatic, or any other visa and who wishes to attend school in the United States as an undergraduate — are evaluated in accordance with the general regulations governing admission. UCR uses the Student Exchange and Visitor Information System (SEVIS) for all nonimmigrant F- and J-status students.

Students may apply electronically during the priority filing periods at universityofcalifornia.edu/apply. Early in the application filing period, students should submit the following to Undergraduate Admissions: official certificates and detailed transcripts of record, including hours and marks, accompanied by English translations; course syllabi; results of the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) examination. An applicant from another country whose native language is not English must achieve a score of 550 (paper-based), or 80 (Internet-based) on the TOEFL or a score of 7 on the IELTS.

Students may receive more information about the TOEFL at toefl.org. Students may receive more information about the IELTS at ielts.org.

Results of the test should be forwarded to Undergraduate Admissions. Applicants living locally should contact Undergraduate Admissions (see address below) for further information concerning other test options or completion of an acceptable English composition course to clear the English as a Second Language requirement.

Generally, financial assistance from the university is not available to nonimmigrant visa students. International students must provide proof that they possess sufficient funds to meet their educational commitments while studying in the United States. International students are considered nonresidents of California and are assessed the nonresident tuition in addition to the fees paid by legal residents of California.

For inquiries about the admission of international undergraduate students:

International Specialist
Undergraduate Admissions
3106 Student Services Building
University of California, Riverside
Riverside, CA 92521, U.S.A.; internationalinfo@ucr.edu

Transfer Student Admission

The university considers a transfer applicant a student who has graduated from high school and enrolled in a regular session at a college or university immediately following the summer after high school graduation. (Students cannot disregard their college record and apply as freshmen.)

California Residents must complete the following to meet minimum admission requirements:

1. Complete 60 semester (90 quarter) units of transferable college credit with at least a 2.4 GPA (2.8 for nonresidents). No more than 14 semester (21 quarter) units may be taken Pass/Not Pass.

2. Complete the following seven transferable college courses, earning a grade of C or better in each course:

- a) Two courses in English (1 course in English Composition, 1 course in Critical Thinking);
- b) One course in mathematical concepts and quantitative reasoning;
- c) Four courses chosen from at least two of the following subject areas: arts and humanities, social and behavioral sciences, and physical and biological sciences.

Each course must be worth at least 3 semester (4–5 quarter) units.

Students who satisfy the Intersegmental General Education Transfer Curriculum (IGETC) prior to transferring to UC, may satisfy the seven-course pattern outlined above, depending on the courses taken. For more information, visit assist.org.

Students who were eligible for admission to the university when they graduated from high school — meaning that they satisfied the subject, examination, and scholarship requirements, in addition to campus selection — may be eligible for transfer to non-selecting majors in the College of Humanities, Arts, and Social Sciences if they have a 2.0 GPA (2.8 GPA for non-residents) in all transferable course work.

Nonresidents of California The minimum admission requirements for nonresidents are very similar to those for residents. Students who are not California residents should consult with Undergraduate Admissions for details. However, nonresidents must have a GPA of 2.8 or higher in all transferable college course work.

College-Level Examination Program

The UC does not grant credit for scores earned on the College-Level Examination Program (CLEP).

UC Intercampus Transfer

A regular undergraduate student who is registered at any campus of the UC may apply for transfer to another campus of the UC by filing the *UC Undergraduate Application for Admission and Scholarships*. Fees and procedures are the same for all undergraduates, and there is no special procedure for intercampus transfer.

An undergraduate student in good standing, currently registered at UCR, may apply for intercampus visitor status at another UC campus for one term. Forms and instructions are available at the Office of the Registrar, 2249 Student Services Building.

Student Conduct

Disciplinary suspension or dismissal from a previously attended educational institution is considered in the admission decision.

Credits, Transcripts, and Test Scores

Credit for English-as-a-Second-Language Course Work Students whose first language is not English may receive up to 12 quarter units of credit for English-as-a-second-language course work. Students may receive workload credit (for financial aid purposes) for courses taken beyond this 12-unit limit but will not receive additional unit credit applicable to the bachelor's degree.

Credit for Native Language Students whose first language is not English may receive credit for course work in their native language and literature, provided such courses were completed at the college level in the country of the first language or at the upper-division or graduate level at UCR or another accredited English-speaking institution.

Unit Credit for Courses Taken Elsewhere The University grants unit credit only for courses consistent with its curriculum that have been completed at other accredited colleges and universities. To be accepted for credit, the courses must be comparable to those offered at the university.

Undergraduate Admissions determines the acceptability of courses taken at an institution other than the university. The faculty of the particular

school or college in which the student plans to enroll determines the applicability of such course work in satisfaction of degree requirements.

As an integral part of the system of public education of California, the university accepts approved transfer courses at full unit value that have been completed with satisfactory grades in the community colleges of the state of California.

Limitations on Transfer Credits Students will be granted up to 70 semester/105 quarter units of credit for lower-division coursework completed at any institution or any combination of institutions. For units beyond the maximum, subject credit for appropriate coursework taken in excess of this unit limitation will be granted and may be used to satisfy requirements.

- Units earned through: AP, IB, and/or A-Level examinations are not included in the limitation and do not put applicants at risk of being denied admission.
- Units earned at any UC campus (Extension, summer, cross/current and regular academic year enrollment) are not included in the limitation but are added to the maximum transfer credit allowed and may put applicants at risk of being denied admission due to excessive units.

Transcripts and Test Scores Undergraduate Admissions requires complete, accurate, and up-to-date information about a student's academic program and work in progress in order to process and respond to the application in a timely manner. The transcript and other documents submitted as part of the application become the property of the university; they cannot be returned or forwarded in any form to another college or university.

Freshman Applicants Applicants are notified if a preliminary high school transcript is required. Applicants are responsible for requesting that testing agencies report examination scores for (1) either the ACT Assessment plus Writing or SAT Reasoning Test and, although not required but recommended for certain majors, (2) two SAT Subject Tests to UCR Undergraduate Admissions.

Admitted students must forward an official final high school transcript that shows the date of graduation, final transcript(s) for college work attempted, and official passing scores from Advanced Placement or International Baccalaureate specific Standard Level and all Higher Level examinations. Transcripts are due to the Office of Undergraduate Admission on or before July 1st. All other required information is due on or before July 15th.

Transfer Applicants Applicants are notified if the university requires a preliminary transcript(s). Applicants must request a final transcript from each college they attended. A transcript from the last high school they attended may also be required. Attendance at any other school or college after an application has been filed is considered to be part of the student's record and must be reported to Undergraduate Admissions. Transcripts are due to the Office of Undergraduate Admission on or before July 1st. All other required information is due on or before July 15th.

Selection Criteria — Transfer Applicants

UCR attempts to accommodate as many qualified students from other universities and colleges as possible, particularly as juniors and seniors. In addition to meeting minimum UC eligibility requirements, transfer students will be selected on the basis of academic preparation as assessed by their GPA in all transferrable coursework and completion of required major preparatory coursework where applicable. Applicants with 120 quarter units or more are also subject to screening beyond the minimum requirements for transfer students.

School of Business Administration Admission is selective based on the GPA in all transferrable coursework with a minimum GPA of 2.7. Applicants must complete all breadth requirements (or the IGETC), the five published major prerequisites, and two lower-division business prerequisites (with a minimum GPA of 2.5). Further information may be obtained from The School of Business Administration, 2340 Olmsted Hall, at (951) 827-4551.

Bourns College of Engineering Students are selected on the basis of academic preparation. Admission is selective based on the GPA in all transferrable coursework with a minimum GPA of 2.8, and completion of required major preparatory course work. See Admission to Majors under the Marlan and Rosemary Bourns College of Engineering section of this catalog or go to assist.org. For further information call Student Academic Affairs at (951) 827-ENGR (3647).

College of Natural and Agricultural Sciences Students are selected primarily on the basis of academic preparation, as assessed by their GPA in academic coursework and strength of preparation for the intended major. Admission is selective based on the GPA in all transferable coursework with a minimum GPA of 2.7 and completion of required major preparatory coursework. Students should visit assist.org for updated and comprehensive major preparation requirements.

College of Humanities, Arts and Social Sciences. Admission is selective based on GPA in all transferrable coursework with a minimum GPA of 2.4. Neuroscience, and Psychology applicants must have a minimum GPA of 2.7 in all transferable college coursework. For further information call Student Academic Affairs at (951) 827-3683.

120 Quarter Units or More Applications from UC-eligible applicants with 120 quarter units or more of transfer credit are reviewed by the Dean of the College for completion of a specified pattern of courses that provides continuity with upper-division courses within the major.

Admission to Special Categories

Applications for admission to special categories must be filed during the application filing periods. The personal statement should include a statement of goals. Contact Undergraduate Admissions for further details. Students with no specific degree plans or goals are encouraged to enroll in courses through University Extension.

Limited Status A person who holds a bachelor's degree or has completed a substantial amount of college work and who, because of special circumstances, requires specific courses toward a definite objective and for a limited period may apply for admission in Limited Status. Undergraduate Admissions determines eligibility for admission, and the status requires the approval of the dean of the appropriate college. Admission is for a specified period of time, and the student must maintain a prescribed scholastic average. Units earned are not transferable to an advanced degree.

Second Baccalaureate Occasionally, a student whose educational objective has changed substantially after receiving the bachelor's degree may be considered for admission to a program for a second degree. The second baccalaureate requires senior residency and is subject to the university requirements for graduation, as well as the requirements of the college in which the second degree is to be taken, including all breadth, distribution, and major requirements. Undergraduate Admissions determines eligibility for admission, and the status requires the approval of the dean of the appropriate college. Applicants must be fully eligible for admission to the university, and their records must indicate strong probability of success in the new area. Students should check the UCOP website for UCR's college specific policies for Limited Status/ Second Baccalaureate admission.

Notification of Admission

Each application is considered individually; therefore, the length of time before notification may vary depending upon the circumstances of each applicant. Most fall quarter freshman applicants are notified of their status by March 31; most transfer applicants are notified by May 1. In some cases, complete transcripts of course work are required before a final decision can be made.

Applicants should monitor the status of their application at **My.UCR.edu**. The Web site contains valuable information about admission procedures, course enrollment, housing, financial aid, and upcoming events. When offered admission by the university, students are asked to sign and return a Statement of Intent to Register (SIR) accompanied by a nonrefundable deposit of \$100. This amount will be applied toward payment of university fees, provided the students register in the quarter to which they are admitted.

Concurrent Enrollment

Taking courses at another college or university, including UCR Extension, while in residence at UCR is called concurrent enrollment. See Finances and Registration for the policy regarding concurrent enrollment for continuing students.

Reapplication

Application for admission is for a specific term. If the student is not eligible for admission, or is admitted and does not register, the university requires a new application and an application fee if the student wants to be admitted to another term. The new application will be considered in light of the admission requirements in effect and the space available on campus at the time of application.

International Baccalaureate

The university grants 8 quarter units credit for each International Baccalaureate (IB) higher level examination on which a student scores 5 or higher. Higher level examinations are considered honors courses. The university does not grant credit for subsidiary level examinations. Some higher level examinations may be considered equivalent to freshman level courses in the subject and may be used to satisfy general education or breadth requirements. The units granted for IB examinations are not

counted toward the maximum number of credits required for formal declaration of an undergraduate major or the maximum number of units one may accumulate prior to graduation from the university. Students who enter the university with IB credit do not have to declare a major earlier than other students nor are they required to graduate earlier.

International Baccalaureate Examination Credit

IB Examination	IB Score	Unit Credit	Bourns College of Engineering	College of Humanities, Arts and Social Sciences/School of Business Administration	College of Natural and Agricultural Sciences

Note Certain credit limits apply to Advanced Placement and International Baccalaureate tests offered in similar subject areas.

See "Programs and Courses" for subject abbreviations

Advanced Placement

The university grants credit for all College Board Advanced Placement Tests for which a student scores 3 or higher. The credit may be subject credit, graduation credit, or credit toward general education or breadth requirements, as determined by each college office.

The units granted for AP tests are not counted toward the maximum number of credits required for formal declaration of an undergraduate major or the maximum number of units a student may accumulate prior to graduation from the university. Students who enter the university with AP credit do not have to declare a major earlier than other students, nor are they required to graduate earlier.

College courses taken prior to or after enrolling at the university may duplicate the content of AP examinations. In these cases, the university may not award credit for both the course and the AP exam. The university grants credit for Advanced Placement tests as described below.

Finances and Registration

Fees and Expenses

Student expenses depend upon a great many factors that should be considered carefully before planning a budget. Financial help needed — beyond funds that students or their families are able to provide — should be determined well in advance of the entering quarter. Use the charts in this section as guides to planning and visit finaid.ucr.edu for detailed information on costs to attend UCR.

Residence Classification

Students pay nonresident supplemental tuition if they have not been living in California for more than one year immediately prior to the residence determination date for the term in which they propose to register at UCR. Along with the criterion physical presence, the other criteria are intent to become a California resident and financial independence. Information on these three criteria is provided at registrar.ucr.edu and below, under Residence for Tuition Purposes.

Residence classification of new, readmitted, and continuing students is made for each term and at each campus of the UC. Classifications are based on evidence presented in and supporting each student's Statement of Legal Residence. Students sign all Statement of Legal Residence forms under oath, and further information required may need to be provided under oath, by declaration or affidavit.

The residence determination date is the day instruction begins at the last of the UC campuses to open for the quarter and, for schools on the semester system, the day instruction begins for the semester. Students classified as nonresidents retain that status until they apply for, and receive, a new classification. Students planning to file for residence status after their first year should talk with the residence affairs officer well before the appropriate residence determination date, preferably during their first few weeks in California. Students may apply for classification as California residents as soon as they meet all three criteria for residence and, if successful in changing their status, would not pay nonresident supplemental tuition for subsequent quarters if they continued to meet the criteria.

Residence Determination All questions concerning residency are referred to the residence affairs officer in the Office of the Registrar. No other campus personnel are authorized to supply information regarding residence requirements for tuition purposes. Students wishing to appeal a final decision on residence classification by the residence affairs officer are assisted and referred to the appropriate member of the General Counsel's Office.

Late Fees

Late fees are assessed to students who fail to make payments or file forms by published deadlines. Late enrollment and late registration fees may be waived only for the following reasons: student health problems verified by a physician; death in the family; or a verified administrative error on the part of the university.

Fee Exemptions

Dependents of Veterans The California Education Code provides for exemption from certain fees at state-owned colleges, universities, and other schools for eligible students who are dependents or spouses of veterans whose death or disability was service connected. Qualifying UCR students are eligible for exemption from the Student Services Fee, tuition, and Professional Degree Supplemental Tuition. Claims for fee exemptions must be presented to the university during the academic year for which the claim applies. Retroactive approval can be granted only in situations in which students applied for the exemption in a timely manner but approval was delayed by the U.S. Department of Veterans Affairs processing of an original or reopened service-connected disability compensation or Dependency and Indemnity Compensation claim. Contact Student Special Services, 125 Costo Hall, (951) 827-3861, for information.

Required Student Tuition and Fees Fall Quarter 2014

For detailed information on fees, visit classes.ucr.edu/fees

Undergraduate Students	Resident	Nonresident
Student Services Fee	\$ 324.00	\$ 324.00
Tuition	3,740.00	3,740.00

Total—Nonresidents		\$12,559.08
Graduate Students	Resident	Nonresident
Student Services Fee	\$ 324.00	\$ 324.00
Tuition	3,740.00	3,740.00
Graduate and Professional Student		
Health Insurance Premium	987.00	987.00
Recreation Center Fee	59.00	59.00
Recreation Expansion Fee	149.00	149.00
Student Center Fee	110.00	110.00
Graduate Student Association Fee	13.13	13.13
Graduate Student Association		
Conference Travel	10.00	10.00
Graduate Student Association		
(GASUCR) Fee Fellowship	1.05	1.05
UCR Student Services Fee	6.00	6.00
Total—California Residents	\$5,399.18	
Nonresident supplemental tuition		<u>5,034.00</u>
Total—Nonresidents		\$10,433.18

Note Students in the M.B.A. program pay Professional Degree Supplemental Tuition. Additional mandatory fees such as the Professional Degree Supplemental Tuition and the Medical School Disability Insurance Fee are assessed to all medical school students. Visit registrar.ucr.edu for more information.

Totals do not include the Technology Course Materials Fee of \$2.00 per unit for graduate students and \$4.00 per unit for undergraduate students.

The amounts shown in this document represent fees as currently approved. However, all University fees are subject to change, and the fee amounts billed for this period may be adjusted at a future date.

Exemption from Nonresident Supplemental Tuition Some students may be eligible for exemption from nonresident supplemental tuition.

Visit registrar.ucr.edu for information.

Fee Reductions

Employees A regular status employee who meets the admission requirements of the university is eligible for a two-thirds reduction of both the Student Services Fee and tuition for up to 9 units or three regular-session university courses per quarter or semester, whichever is greater. An employee so registered is ineligible for the services and facilities of the counseling center, gymnasiums, or the student health services, other than those to which the employee may be otherwise entitled.

Doctoral Students Advanced to Candidacy Students who are considered nonresidents for tuition purposes and are advanced to candidacy for the Ph.D. as of the first day of Fall 2006 receive a reduction of 100% of the nonresident supplemental tuition. Students are eligible for a maximum of three calendar years. Time spent not registered (withdrawn, on leave, or on filing fee status) counts toward the three-year total unless the graduate dean grants an exception. Students must be advanced by the first day of the academic term to qualify for that term. Students who are currently advanced will qualify for the reduction if they have not been advanced for more than three years. For example, if a student advanced prior to the first day of the Fall 2008 term, the student will be qualified for the reduction for 2008-09, 2009-2010, and 2010-2011. If not finished by Spring 2011, the student will be required to pay full fees beginning Fall 2011.

Deferred Payment Plan

The Deferred Payment Plan (DPP) offers students an opportunity to pay their quarterly fees and tuition in three monthly installments. For each quarter of participation, a new application must be submitted on Growl, at rweb.ucr.edu, with a processing fee of \$25. Visit sbs.ucr.edu/students/deferred_payment_plan.html for more information.

Refunds

Schedule of Refunds

Days	New Students Receiving Federal Financial Aid	All Other Students
	Percentage Refunded	
Before first day of instruction	100	100
1st day of instruction	100	100
2-7	90	90
8-14	80	50
15-18	70	50
19-21	70	25
22-28	60	25
29-35	50	25
36-42	40	0
43 or more	0	0

Students who withdraw from all courses before the end of a quarter may be eligible to receive refunds for some fees. A withdrawal petition must be obtained from myforms.ucr.edu or from the Graduate Division. In accordance with federal regulations, refunds to financial aid recipients are first applied to repayment of aid disbursed.

The effective date for determining a refund of fees is the date the student files an official notice of withdrawal with the university. It is presumed that no university services will be provided to the student after that date.

Beginning the second day of instruction, the Student Services Fee, tuition, UCR campus fees, Professional Degree Supplemental Tuition, and nonresident supplemental tuition are refunded on a prorated basis.

Refunds for health insurance vary. Consult the Student Health Services, Veitch Student Center, (951) 827-5683.

The Medical School Disability Insurance Fee is not refunded unless the student requests a prorated refund when withdrawing from UCR. Consult the School of Medicine at (951) 827-4333 for information about the refund of insurance benefits after withdrawal.

For details concerning fees and fee refunds, consult Fees and Enrollment at ucop.edu/operating-budget/.

Refunds for New Students Receiving Federal Financial Aid

Fee refunds for new students receiving Title IV federal financial aid are as follows:

Prior To and Including Day 1 Prior to and including the first day of instruction, the Student Services Fee is refunded except for the \$100

Statement of Intent to Register deposit paid by undergraduates. Other eligible fees paid are refunded in full.

Day 2 and After Beginning the second day of instruction, the Student Services Fee is refunded on a prorated basis except for the \$100 Statement of Intent to Register deposit. Refunds of other eligible fees are prorated as shown in the Schedule of Refunds table in this section.

New students receiving Title IV federal financial aid who withdraw during their first quarter at UCR receive a prorated refund if they withdraw by the end of the sixth week of the quarter.

Refunds for All Other Students

Refunds for all continuing and readmitted students are as follows:

Prior To and Including Day 1 Prior to and including the first day of instruction, eligible fees paid are refunded in full.

Day 2 and After Beginning the second day of instruction, a prorated refund is given for eligible fees paid.

If students withdraw during a quarter, federal regulations require UCR to calculate the amount of federal financial aid that has been "earned" for the period they attended. If they withdraw before completing 60 percent of the quarter, a *pro rata* portion of the aid must be returned to the federal government. Any portion of unearned aid that must be returned to federal aid programs by UCR will be deducted from the amount of the tuition and fee and/or housing refund. If the amount UCR must return to federal aid programs exceeds the amount of the student's institutional refund, the student's account may be billed. More information regarding the return of Title IV federal aid requirements is available at finaid.ucr.edu.

Distribution Formula for Institutional Refunds

If a Housing or Registration refund is due to a student under UCR's refund policy and the student received financial aid under any aid program other than Federal Work-Study, the refund shall be returned to student assistance programs in the following order: outstanding balances on Federal Direct Unsubsidized Stafford Loan, Federal Direct Stafford Loan, Federal Perkins Loan, Federal Direct PLUS Loan, Federal Pell Grant, Federal Supplemental Educational Opportunity Grant, Cal Grant A or B, UC Student Loan, Grant-in-Aid State, other institutional grants or scholarships. The portion of a refund allocated to a program may not exceed the amount a student received from that program.

Financial Support

Financial Aid Office
2106 Student Services Building
(951) 827-3878; finaid@ucr.edu; finaid.ucr.edu

The Financial Aid Office assists students with meeting educational expenses that cannot be met from personal resources. To obtain financial aid students must file the *Free Application for Federal Student Aid (FAFSA)* with the Financial Aid Office yearly. FAFSAs are available online beginning January 1 for the upcoming academic year at fafsa.ed.gov. Undocumented students who meet the California high school attendance and graduation requirements of state law AB540 who are ineligible to file the FAFSA should complete the *California Dream Application* available online at dream.csac.ca.gov. See chart for deadlines for financial aid.

Students applying for other grants, loans, and work-study should apply as early as possible. Applications are accepted year-round, with awards to late applicants based on fund availability. Funding cannot be guaranteed to students whose FAFSA or *Dream Applications* are submitted after March 2.

An analysis of the FAFSA or *Dream Application* is required to determine the amount that a student's parents, the student, and/or the student's spouse can be expected to contribute toward the cost of the student's education. The university expects the student and parent (if the student is dependent), or spouse (if the student is married), to contribute toward the educational costs to every extent possible. In addition to filing the FAFSA or *Dream Application*, applicants for financial aid may also be required to submit supporting materials (such as income tax transcripts) that the Financial Aid Office uses to determine each student's financial need.

Financial Aid Deadlines

Students submit <i>FAFSA</i> or <i>Dream Application</i> for the upcoming year	March 2
New Cal Grant applicants submit <i>GPA Verification Form</i> to California Aid Commission	March 2
Scholarships Continuing undergraduates submit <i>UCR Continuing Student Undergraduate Scholarship Application</i>	March 1
Entering students apply with the <i>Application for Undergraduate Admission and Scholarships</i>	November 30

All undergraduate financial aid applicants must also apply for California State Grants (Cal Grant A and/or B) by completing the *FAFSA* or *Dream Application*, and *GPA Verification Form* and submitting them by the March 2 filing deadline. If the California Student Aid Commission determines that a student is ineligible for a Cal Grant A or B award, the grant may be replaced with a Federal Direct Stafford Loan in the financial aid package from UCR.

International students are expected to have the necessary funds to cover their entire period of study. The Financial Aid Office does not have funds available to offer assistance to international students. Assistance is not available to students on "limited" status or to those enrolled in UCR Extension. An exception is made for students admitted on "limited" status who must take required prerequisite course work for full admission into the Graduate Division. Students who fall into this category must submit documentation from the Graduate Admissions Office confirming that they are taking prerequisite course work for graduate admission.

For information on graduate student support, see Financial Support under Graduate Studies in this catalog.

Grants, Loans, Employment, and Scholarships

Students who receive financial aid may receive funds from one or more of the following sources: grants, loans, employment, and scholarships. These sources are described briefly in the following sections; more detailed information regarding eligibility criteria, fund disbursement rules, and enrollment requirements can be obtained from the Financial Aid Office and on the financial aid website at finaid.ucr.edu.

Grants

The **Federal Pell Grant** program is federally funded and may provide awards up to a maximum of \$5,730 for the academic year. To be eligible, an applicant must be a U.S. citizen or eligible noncitizen, must be enrolled as an undergraduate, and must not have previously received a bachelor's degree. An exception is available for eligible students enrolled in the teaching credential program in the Graduate School of Education. Students apply for the Pell Grant on the *FAFSA* or *Dream Application*.

Federal Supplemental Education Opportunity Grants are federally funded, need-based grants available only to U.S. citizens and eligible noncitizen undergraduate students who have not previously received a bachelor's degree. The grants range from \$100 to \$4,000 per year.

The State of California—Cal Grant A and B Program The Cal Grant A program provides awards ranging from \$100 to \$12,192 for the academic year. To be eligible, new applicants must be California residents. Awards are based on academic achievement and financial need. The Cal Grant B program provides awards ranging from \$100 to \$13,665. To be eligible, applicants must be California residents and must demonstrate financial need. The awards are for students from disadvantaged families.

UCR Grant awards are offered to undergraduates with the greatest financial need whenever guidelines and funding levels permit.

Loans

Normally, one or more types of loans are included in each combination of aid offered to a student. Borrowers must be aware of their repayment obligations.

Federal Direct Stafford Loans are available to both undergraduate and graduate students who are U.S. citizens or eligible noncitizens. The maximum amount that may be borrowed under this program is \$3500 per year for students in their first year of undergraduate study (0–44 quarter units), \$4,500 per year for the second year of undergraduate study (45–89 quarter units), and \$5,500 per year after reaching junior status (90 or more quarter units), up to an aggregate undergraduate maximum of \$23,000. Teaching credential students are limited to the \$5,500 annual maximum for fifth year undergraduate students according to federal regulations. Graduate students are not eligible for subsidized stafford loans.

In addition to these amounts, under the **Federal Direct Unsubsidized Stafford Loan Program** dependent students may borrow up to \$2,000 per year, and independent students may borrow \$6,000 for the first or second year of undergraduate study (0–89 quarter units), or \$7,000 for the third or fourth year of undergraduate study (90 or more quarter units), or \$7000 for teaching credential study, and \$20,500 for graduate study. Interest on a Federal Direct Unsubsidized Stafford Loan accrues immediately and must be paid while in school or added back to the principal amount borrowed.

Dependent undergraduate students may borrow an aggregate of \$31,000 in combined Federal Direct Subsidized and Unsubsidized Stafford Loans, of which no more than \$23,000 can be from Subsidized Stafford Loans. Independent undergraduate and teaching credential students may borrow an aggregate of \$57,500 in combined Federal Direct Subsidized and Unsubsidized Stafford loans of which no more than \$23,000 can be from Subsidized Stafford Loans, and graduate students may borrow a combined aggregate maximum of \$13,500, including amounts borrowed as undergraduates.

An origination fee of 1.051% percent is deducted from the amount of the loan prior to disbursement. The interest rate for new loans disbursed on or after July 1, 2014 is 4.66% for undergraduate Subsidized and Unsubsidized Stafford loans, and 6.21% for graduate Unsubsidized Stafford loans. Interest rates will be set annually for new loans and are subject to change. Minimum monthly repayment of \$50 per month begins 6 months after students cease to be enrolled at least half-time. Borrowers can choose a repayment plan based on their financial circumstances with repayment periods ranging from up to 10 years for standard fixed monthly repayment, to up to a period of 12 to 30 years under alternate repayment options. Information on repayment plans is available at ed.gov/offices/OSFAP/DirectLoan/RepayCalc/dlindex2.html.

Graduate students may borrow **Federal Grad PLUS Loans** for up to the annual cost of education minus any estimated financial aid received. A FAFSA application must be submitted for this loan. This loan carries a fixed interest rate of 7.21%, for new loans disbursed on or after July 1, 2014, which begins accrual immediately upon disbursement. The terms, including the six-month grace period, are otherwise the same as for Unsubsidized Stafford Loans.

Parents may borrow up to the annual cost of education minus any estimated financial aid received by the student from **Federal Direct PLUS Loans (Parent Loans)**, regardless of financial need. A FAFSA application must be submitted for this loan. New parent borrowers awarded the PLUS loan will be instructed to complete a PLUS Loan Request form online, then a separate online loan promissory note. The application approval process includes a standard credit check for all parent borrowers. This loan has a fixed interest rate of 7.21%, for new loans disbursed on or after July 1, 2014. Interest begins accruing on the PLUS loan after the first disbursement. The first payment of principal and interest is due approximately 60 days after the final loan disbursement for the year is made, but may be deferred while the student is enrolled.

Federal Perkins Loans are available to undergraduate students. These loans are awarded to students who are U.S. citizens or eligible noncitizens. The amount a student may borrow is determined by

financial need but may not exceed \$4,000 per year and \$20,000 for undergraduates. Repayment may be extended over a 10-year period.

Interest is 5 percent on the unpaid balance, beginning 6 months after students cease to be enrolled at least half-time.

University Loans A limited number of University Loans are available to undergraduate students for up to \$5,500. Awards are made subject to the availability of funds. The amount a student may borrow is determined by financial need. Interest is 5 percent on the unpaid balance; repayment may be made over a period of not more than 10 years, beginning 6 months after the date on which the borrower ceases to be enrolled at least half-time. Co-signatures are required.

Emergency Student Loan Fund In addition to the long-term loans from financial aid programs mentioned above, UCR has an emergency student loan fund. This loan, which does not bear interest, is of a short-term nature to cover emergency needs of up to \$500. Students may borrow up to three times a year.

Employment

Federal Work-Study is awarded to students with demonstrated financial need. Work-study awards enable students to reduce the amount of loan indebtedness they may incur while attending the university.

Various work opportunities are available through the UCR Career Center, online at careers.ucr.edu, in either on-campus or off-campus jobs at nonprofit and community services agencies.

Scholarships

Scholarship awards are based on a student's academic achievements and, except for honorary scholarships, on need. Scholarships are considered gift assistance.

Most scholarships available through the Financial Aid Office are based on financial need. Other undergraduate scholarships are offered to entering and continuing undergraduates who show evidence of high scholastic attainment. Applicants must meet all priority deadlines for consideration. Non-need based scholarship awards, including Alumni Scholarships, are available to undergraduate students. Financial need is not required. Awards range from \$100 to \$5,000.

Regents Scholarship, one of the highest honors conferred upon UC students, is awarded on the basis of academic excellence and exceptional promise, without reference to financial need. Students are eligible upon graduation from high school. The appointments run for four years for students entering from high school. Regents Scholars receive an honorarium each year of appointment.

Chancellor's Scholarship, an award offered to incoming freshmen with a distinguished high school academic record. The scholarship provides an honorarium applied toward student fees. More information regarding the terms of the scholarship award and the amount of the honorarium are available on the Chancellor's Scholarship Terms that the recipient accepts on MyUCR when offered this award.

Highlander Excellence Scholarship, an award offered to incoming freshmen with a distinguished high school academic record. The scholarship provides an honorarium toward college expenses. More information regarding the terms of the scholarship award and the amount of the honorarium are available on the Highlander Excellence Scholarship Terms that the recipient accepts on MyUCR when offered this award.

Chancellor's Transfer Scholarship, a non-renewable award offered to incoming transfer students with a transfer GPA of 3.00 or above who have financial need.

Chancellor's Performance Awards Information on Chancellor's Performance Awards may be obtained from the departments of Art; Creative Writing; Dance; Music; and Theatre, Film and Digital Production.

Engineering Scholarships Information on scholarships in Engineering may be obtained from the Bourns College of Engineering Student Affairs Office.

Natural and Agricultural Scholarships Information on scholarships in the natural and agricultural sciences may be obtained from the College of Natural and Agricultural Sciences Student Affairs Office.

Departmental Scholarships Some scholarships are available through academic departments. For more information, students should contact their department.

Graduate Fellowships and Assistantships For information on graduate fellowships and assistantships refer to the Graduate Studies section of this catalog or contact the Graduate Division.

Undergraduate Research Grants As a research university UCR encourages the tradition of student and faculty engagement in research. UCR provides grant support for students to deepen their knowledge and skills in cutting edge research, field work, and other creative activities under the close guidance of a faculty mentor. Student travel for the purpose of presenting research work at a scholarly conference is also supported through these funds. Grants are available on a quarterly basis. All awards support the costs of conducting a project and cannot be used as a student salary or scholarship aid. Student grant proposals may be initiated directly by students after approaching a faculty member for sponsorship or by faculty suggesting projects to undergraduates. For details on grant opportunities visit the Office of Instructional Development Web site, at oid.ucr.edu.

More information regarding scholarship opportunities available to UCR students is available at scholarships.ucr.edu/.

Registration and Enrollment

Official registration consists of two steps.

1. Enrollment in classes
2. Payment of fees

Except where noted, the following information applies to both undergraduate and graduate students. Additional information concerning enrollment and academic policies applying only to graduate students is in the Graduate Studies section of this catalog. The Web site registrar.ucr.edu provides detailed information on registration and enrollment, including details about the following:

- Academic Calendar
- Classes, class hours and locations, and instructors
- Changing your class schedule
- Fees and paying fees
- Final exams
- Grades
- Graduation

Most enrollment and payment functions can be performed at rweb.ucr.edu.

See also information on Expected Progress.

Part-Time Study

Undergraduates Part-time study (less than 12 units) is available to undergraduate students who find it difficult to enroll full time because of health problems, family and home responsibilities, or occupational and financial need. Students undertaking an approved course load of 10 units or fewer in any quarter shall pay the full Student Services Fee, one-half tuition and one-half nonresident supplemental tuition (if applicable) for that quarter. Students considering part-time study should discuss their plans with the associate dean of their college, whose approval is required.

Graduates In some programs, half-time study is possible for graduate students who for reasons of occupation (i.e., full-time employment), unusual family responsibilities, or health reasons are not able to attend full time. A half-time student may not enroll for more than 6 units at any level. Graduate students who are approved for this program receive a refund of one-half of the tuition, one-half of the nonresident supplemental tuition (if applicable), and one-half of the Professional Degree Supplemental Tuition (if applicable). For further details and an application, contact the Graduate Division.

Concurrent Enrollment Program

UCR credit for any course taken at another college institution (including UCR Extension) while the student is in residence at UCR is called credit from concurrent enrollment. Credit is normally awarded only under unusual circumstances or through the Cross Registration Program described below during the regular academic year and only with prior approval of the associate dean of the UCR college in which the student is enrolled.

UCR Extension students taking regular-session UCR courses through concurrent enrollment may receive grade points as well as unit credit (effective Spring 1999) should they continue in or be subsequently admitted or readmitted to regular UCR student status. A transcript of the work must be submitted to the Office of Undergraduate Admissions.

Courses taken elsewhere during the summer by a UCR student do not require that the student be under extraordinary circumstances, but they do require prior approval to receive UCR credit even if the student is not in residence at UCR during that summer.

Regular Summer Sessions courses taken at UCR are credited automatically to the UCR academic record of any student enrolled in the regular academic year.

Cross Enrollment

Senate Bill 1914 (Killea) The California Education Code Sections 66750 through 66756, commonly referred to as Senate Bill 1914 (Killea), permits undergraduate students enrolled in any campus of the California Community Colleges, the California State University, or the UC to enroll without formal admission in a maximum of one course per academic term at a campus of either of the other systems on a space-available basis at the discretion of the appropriate campus authorities on both campuses. At UC campuses, the beginning of the third week of instruction has been designated as the date by which an instructor can determine when space is available to accommodate a student seeking to enroll on this basis. (Normally, instructors in all segments permit students to attend classes until their final course registration has been certified.) Killea does not allow enrollment at another campus within the same system. Students who seek to cross enroll under this program must have met all of the following requirements:

1. Completed at least one term at their home campus as a matriculated student
2. Enrolled for a minimum of six units at their home campus for the current term
3. Earned a cumulative grade point average of 2.00
4. Paid appropriate fees and any applicable tuition at their home campus for the current term
5. Completed appropriate academic preparation for the desired course, as determined by the host campus, consistent with the standards applied to regularly enrolled students
6. Have been classified as a California resident by their home campus

Both schools must be participating in this program before a student can take a course at another institution for the \$24 per unit cross enrollment fee. Additional information and cross enrollment application forms are available at the Office of the Registrar.

CSUSB Cross Registration Program The Cross Registration Program allows a full-time UCR undergraduate student who has officially declared a major and who is in good academic standing to enroll simultaneously at California State University, San Bernardino for no more than one course per quarter. The program is designed for students to take classes not available at UCR. (This program is not available during Summer Session.) Approvals are required from the student's academic advisor, college dean, and the Registrar. Application forms and deadline information may be obtained from the Office of the Registrar.

Simultaneous Enrollment and Cross-Campus Enrollment Simultaneous Enrollment is similar to the Intercampus Visitor Program, but participants are enrolled in at least six units at UCR while simultaneously taking additional classes at another UC campus. Cross-Campus Enrollment allows participants to simultaneously take online courses offered by

another UC campus. Participants of either program don't have to be formally admitted nor pay additional tuition/fees; however other fees may apply depending on the course. For additional information and application for Simultaneous Enrollment, please go to the Highlander One Stop Shop (HOSS), on the first floor of the Student Services Building. For additional information and to initiate enrollment for Cross-Campus Enrollment course opportunities please go to crossenroll.universityofcalifornia.edu.

Eligibility requirements for both programs include:

- Has completed a minimum of 12 units as a matriculated student at UCR (home campus).
- Is enrolled for a minimum of 6 units for the current term at UCR (home campus)
- Is in good standing.
- Has the appropriate academic preparation as determined by the host campus.
- Must have fees paid by Fee Payment deadline

Intercampus Visitor Program

The Intercampus Visitor Program enables qualified undergraduates at the UC to take advantage of educational opportunities at other UC campuses. Under this program, students may take courses that are not available on their home campus, participate in special programs, or study with a distinguished faculty member at another campus. Participants may enroll at another campus for only one term. Additional information on requirements and application forms can be obtained at the Office of the Registrar. Intercampus visitors must apply for financial aid at their host campus and must be making satisfactory academic progress on their home campus to be eligible to be awarded.

Withdrawals and Leaves of Absence

Undergraduate students who wish to terminate work in the university during a current quarter, officially and without scholarship penalty, must initiate an application for withdrawal through myforms.ucr.edu. The student must settle all accounts and return any university property such as books, keys, laboratory equipment, and uniforms. After the first few weeks of the quarter, such petitions are granted only under exceptional circumstances.

Students who withdraw are no longer considered continuing students. Students wishing to return to the university must apply for readmission at least six weeks before the beginning of the quarter to be sure of registration without late fees. Visit registrar.ucr.edu for deadline information.

Students who withdraw from the university without authorization may receive grades of "F" in all courses in which they are enrolled. Further, the Special Services Office is required to notify the Department of Veterans Affairs when any student fails, receives no credit, or withdraws from all subjects undertaken.

The Planned Educational Leave Program (PELP) is for undergraduate students who want to interrupt their regular education for one year or less while clarifying educational goals, gaining practical experience away from campus, or enhancing the prospect of successful completion of an academic program. Students must have completed at least one quarter of course work at UCR and be in good academic standing to qualify. Students holding F-1 visas cannot participate in this program. Information on PELP is available from the dean of the student's college, the Counseling Center, and the Office of the Registrar.

The Planned University Leave Program (PULP) is designed for undergraduate students who plan to interrupt their education at the UC to study at another academic institution. A student planning to attend a postsecondary institution in the United States should consult the dean's office of the student's college.

Graduate students who wish to withdraw or apply for a leave of absence should contact the Graduate Division.

Planned Opportunities Abroad Agreement (POAA) permits UCR students to study abroad on a non-UC program and return to UCR without having to file for readmission. POAA advising and applications are available at the Off Campus Academic Experiences, Olmsted Hall, Room 2322. eapoap.ucr.edu.

Readmission

Undergraduate students who wish to return to UCR must file an application for readmission with their college Student Academic Affairs office at least six weeks prior to the quarter of proposed registration. Visit registrar.ucr.edu for deadline information. A nonrefundable application fee of \$70 is charged. Approval of the dean of the student's college or division is required for readmission. Students dismissed or not in good standing may be required to meet with the appropriate dean. Readmission of students disqualified for disciplinary purposes is subject to approval of the Dean of Students.

Transcripts from other institutions (including University Extension) attended during a student's absence must be filed with the Undergraduate Admissions Office at least six weeks prior to the quarter of readmission. Students who were not registered during the fall, winter, or spring quarter immediately prior to their expected graduation must file an application for readmission with their college Student Academic Affairs office.

Graduate students desiring readmission or termination of leaves of absence should contact the Graduate Division.

Student Records and Transcripts

The Office of the Registrar prepares and permanently retains records of students' academic work at UCR for regular sessions and summer sessions. It maintains separate academic records for undergraduate, professional, and graduate careers. The academic record chronologically lists courses, units, grades, cumulative GPA, transfer credits, and total units.

Students may order copies of their transcript at Growl (accessible through rweb.ucr.edu). Otherwise, the transcript of a student's UCR academic record is released only upon receipt of a signed request by the student authorizing its release. Application may be made in person at the Office of the Registrar, or by mail; telephone requests cannot be honored. Students can order transcripts for regular (\$10 fee for each official transcript) or rush service. Application should be made two weeks in advance of the time the transcript is needed. Rush service for the transcript is available within 24 hours of receipt of the application; the fee is \$10 per transcript plus a \$10 service fee.

Express mail service is available for an additional fee based on current USPS rates. Fax service is available at \$2 per page plus the aforementioned charges as appropriate. Payment is due in advance for all transcript service. A check or money order payable to Regents UC should be submitted with the application for transcript. All outstanding debts to the university (with the exception of long-term financial aid loans not yet due and payable) must be paid in full before a transcript will be released.

Students are strongly advised to check their academic records carefully and to bring any discrepancies to the attention of the Office of the Registrar immediately. Supporting enrollment documents are retained for no more than one year. After one year, it is assumed that students accept the accuracy of their academic records. Once a degree has been posted, changes to a student's academic record are allowed only to correct an administrative error.

Disclosure of Student Records

In accordance with the federal Family Educational Rights and Privacy Act (FERPA) of 1974 as amended, and campus procedures that implement the University of California Policies Applying to the Disclosure of Information from Student Records, the following information is published.

Students' academic records are maintained in their academic department and appropriate college or school or the Graduate Division; the maintenance of these records is the responsibility of the department chair or dean. Students who believe that their records contain incorrect or misleading information and who seek review of these records with a view toward altering or expunging a portion of them should make initial inquiry and petition through the appropriate department chair or academic dean, who institutes an informal investigation and, if necessary, refers the matter for hearing.

Office of the Registrar Student records maintained by this office include the official UCR academic record (transcript), academically-related information, and the residence classification information. The maintenance

of these records is the responsibility of the Registrar. These records are available only to officials and employees of the University of California who need access to them for the performance of their official duties or to bona fide agents of the university for the collection of overdue debts to the university (but only as may be necessary to ensure collection of the overdue debt). Students who believe that their records contain incorrect or misleading information and who seek review of those records with a view toward altering or expunging a portion of them should make initial inquiry and petition through the Registrar, who institutes an informal investigation and, if necessary, refers the matter for hearing. Students may inspect records, maintained by the campus, of disclosures of personally identifiable information from their student records.

Office of Undergraduate Admissions Records are maintained by this office for every undergraduate student who attended UCR with the exception of students enrolled exclusively in University Extension or Summer Sessions. These files containing the original admission application, transcripts from institutions previously attended, and other documents related to applications for admission are held for five years after the last date of attendance or until graduation (whichever occurs earlier) at which time they are purged. Maintenance of these records is the responsibility of the Director of Undergraduate Admissions.

Office of Financial Aid Records maintained by this office are relevant to financial aid awards, work-study employment, and academic information as it pertains to satisfactory academic progress standards. These records include, but are not limited to, the *Free Application for Federal Student Aid (FAFSA)*, Federal Income Tax Forms (1040, 1040A, 1040EZ), other verification forms, and student employment forms. Maintenance of these records is the responsibility of the Director of Financial Aid.

Students who have records in various student service offices such as Career Services, Counseling Center, Health Service, Housing, International Student Resource Center, Learning Center, Student Special Services (for disabled and veterans' services), and Women's Resource Center should contact those offices for information. Student discipline records are kept in the office of Student Conduct & Academic Integrity Programs.

The University of California, Riverside considers the following to be public information with respect to individual students: name; addresses (local, permanent, e-mail); telephone numbers; date and place of birth; major field of study; dates of attendance; degrees and honors received; the name of the most recent previous educational institution attended; participation in officially recognized university activities, including intercollegiate athletics; and the name, weight, and height of participants on intercollegiate university athletic teams.

Students have a right to refuse to permit any or all of the above categories of personally identifiable information to be designated as public information with respect to themselves. Students who do not want their information to be published in the campus directory must check the appropriate privacy restriction on Growl (accessible through rweb.ucr.edu). Students who wish to have any or all of the items defined as public information to be restricted from release outside the university must check each item to be restricted on Growl.

Students who choose to restrict personally identifiable information about themselves that has been defined as public information are advised of some potential implications. The campus may not then disclose to anyone (including prospective employers, hometown newspapers, and others outside the university) information from a restricted category, such as the award of a Regents Scholarship, election to Phi Beta Kappa, degree(s) granted and the date(s) conferred, and dates of attendance.

Copies of the University of California and UCR Policies Applying to Disclosure of Information from Student Records are available in the following offices on the UCR campus: Office of the Executive Vice Chancellor and Provost; Office of the Registrar; Office of the Vice Chancellor, Student Affairs; and Office of the Ombuds. These offices also have copies of the federal Family Educational Rights and Privacy Act of 1974, as amended, for review.

Students have a right to file complaints with the Family Policy Compliance Office, U.S. Department of Education regarding alleged violations of the rights accorded them by the Family Educational Rights and Privacy Act of 1974, as amended. Students may also consult confidentially with the UCR Ombuds regarding any problems or possible violations of rights associated with the Act.

Residence for Tuition Purposes

Students who have not been living in California with the intent to make it their permanent home for more than one year immediately before the residence determination date for each term in which they propose to attend the university must pay nonresident supplemental tuition as well as all assessed fees. The residence determination date is the day instruction begins at the last of the University of California campuses to open for the quarter. For schools on the semester system, the residence determination date is the day instruction begins for the semester.

Law Governing Residence The rules regarding residence for tuition purposes at the University of California are governed by the California Education Code and implemented by Standing Orders of the Regents of the University of California.

Who is a Resident? If you are an adult student (at least 18 years of age), you may establish residence for tuition purposes in California if you are a U.S. citizen, or a permanent resident or other immigrant, or if you are a nonimmigrant who is not precluded from establishing a domicile in the United States. Check with the Residence Affairs Officer in the Office of the Registrar for the latest information on qualifying nonimmigrant visas.

To establish residence, you must be physically present in California for more than one year prior to the residence determination date, and you must have come here with the intent to make California your home as opposed to coming to California to go to school.

Physical presence in the state solely for educational purposes does not constitute the establishment of California residence, regardless of the length of your stay.

You must demonstrate your intention to make California your home by severing your residential ties with your former state of residence and by establishing those ties with California. If these steps are delayed, the one-year physical presence requirement will be extended until you have demonstrated both presence and intent for one full year.

If your parents are not residents of California, you will be required to be financially independent to qualify as a resident for tuition purposes.

Requirements for Financial Independence You are considered “financially independent” if one or more of the following apply: (1) you are at least 24 years of age by December 31 of the calendar year for which you are requesting residence classification; (2) you are a veteran of the U.S. Armed Forces; (3) you are a ward of the court or both parents are deceased; (4) you have legal dependents other than a spouse; (5) you are married or a registered domestic partner, or are a graduate or professional student, and you were not claimed as an income tax deduction by your parents or any other individual for the tax year immediately preceding the term for which you are requesting resident classification; or (6) you are a single undergraduate student and were not claimed as an income tax deduction by your parents or any other individual for the two tax years immediately preceding the term for which you are requesting resident classification and you can demonstrate self-sufficiency for those two years. (Note that financial independence is not a factor in residence status for graduate student instructors, graduate student teaching assistants, research assistants, junior specialists, postgraduate researchers, graduate student researchers, and teaching associates who are employed 49 percent or more of full-time in the term for which classification is sought.)

Establishing Intent to Become a California Resident Indications of your intent to make California your permanent residence can include the following: registering to vote and voting in California elections; designating California as your permanent address on all school and employment records, including military records if you are in the military service; obtaining a California driver’s license or, if you do not drive, a California identification card; obtaining California vehicle registration; paying California income taxes as a resident, including taxes on income earned outside California from the date you establish residence; establishing a California residence in which you keep your personal belongings; and licensing for professional practice in California. The absence of these indicia in other states during any period for which you claim residence can also serve as an indication of your intent. Documentary evidence is required, and all relevant indications will be considered in determining your classification. Your intent will be questioned if you return to your prior state of residence when the university is not in session.

General Rules Applying to Minors If you are an unmarried minor (under age 18), your residence is considered to be the residence of the parent with whom you live. If you have a parent living, you cannot change your residence by your own act, by the appointment of a legal guardian, or by the relinquishment of your parent’s right of control. If you live with neither parent, your residence is that of the parent with whom you last lived. Unless you are a minor alien present in the United States under the terms of a nonimmigrant visa that precludes you from establishing domicile in the United States, you may establish your own residence when both your parents are deceased and a legal guardian has not been appointed. If you derive California residence from a parent, that parent must satisfy the one-year durational residence requirement.

Specific Rules Applying to Minors

Divorced or Separated Parents You may be able to derive California resident status from a California resident parent if you move to California to live with that parent on or before your 18th birthday.

Parent of Minor Moves from California You may be entitled to resident status if you are a minor U.S. citizen or eligible alien whose parent(s) was a resident of California who left the state within one year of the residence determination date if

- (a) you remained in California after the departure of your parent(s);
- (b) you enroll in a California public postsecondary institution within one year of the departure of your parent(s); and
- (c) once enrolled, you maintain continuous attendance in that institution. Financial independence is not required in this case.

Two-Year Care and Control You may be entitled to resident status if you are a U.S. citizen or eligible alien and you have lived continuously with an adult who is not your parent for at least two years prior to the residence determination date. The adult with whom you are living must have been responsible for your care and control for the entire two-year period and must have been living in California during the one year immediately preceding the residence determination date.

Students Who May Be Exempt from Nonresident Supplemental Tuition Visit ucop.edu/general-counsel for information on exemptions.

Temporary Absences If you are a nonresident student who is in the process of establishing a residence for tuition purposes and you return to your former state during noninstructional periods, your presence in California will be presumed to be solely for educational purposes, and only convincing evidence to the contrary will rebut this presumption. Students who are in the state solely for educational purposes will not be classified as residents for tuition purposes regardless of the length of their stay.

If you are a student who has been classified as a resident for tuition purposes and you leave the state temporarily, your absence could result in the loss of your California residence. The burden will be on you (or your parents if you are a minor) to verify that you did nothing inconsistent with your claim of a continuing California residence during your absence. Steps that you (or your parents) should take to retain a California residence include

1. Continuing to use a California permanent address in all records.
2. Continuing to satisfy California tax obligations. If you are claiming California residence, you are liable for payment of income taxes on your total income from the date you establish your residence in California, including income earned in another state or country.
3. Retaining your California voter’s registration and vote by absentee ballot.
4. Maintaining a California driver’s license and vehicle registration. If it is necessary to change your driver’s license or vehicle registration, you must change them back within the time prescribed by law.

Petition for Resident Classification You must petition in person at the Office of the Registrar, 2249 Student Services Building, for a change of classification from nonresident to resident status. All changes of status MUST be initiated before the first day of classes for the term for which you intend to be classified as a resident.

Time Limit on Providing Documentation If additional documentation is required for residence classification but is not readily accessible, you will

42 / Finances and Registration

be given until the end of the applicable term to provide it. Nonresident supplemental tuition must be paid pending the outcome of the decision.

Incorrect Classification If you were classified as a resident incorrectly, you are subject to a nonresident classification and to the payment of all nonresident supplemental tuition not paid. If you concealed information or furnished false information and were classified incorrectly as a result, you may be subject to university discipline. Resident students who become nonresidents must immediately notify the campus residence affairs officer.

Inquiries and Appeals Inquiries regarding residence requirements, residence determinations and/or recognized exceptions should be directed to the Residence Affairs Officer, Office of the Registrar, 2249 Student Services Building, University of California, Riverside, CA 92521-0118. You may also go to ucop.edu/general-counsel/files/ed-affairs/uc-residency-instructions-appeal-form.pdf. No other university personnel are authorized to supply information relative to residence requirements for tuition purposes.

Students do not have an automatic right to appeal every nonresident determination. University of California Residence Policy permits you to appeal your classification as a non-resident ONLY if:

1. The decision to classify you as a nonresident for purposes of tuition and fees was based on – a significant error of fact, a significant procedural error, or an incorrect application of policy which, if corrected, would require that you be reclassified as a resident.
2. Significant new information became available after the date of the campus decision classifying you as a nonresident; despite the exercise of reasonable diligence (care and attention) the information was not previously known or available to you, and, based on the new information your classification as a nonresident is incorrect.

No appeals based solely upon disagreement with the campus decision will be accepted. For further information or to obtain the Application to Appeal form please go to ucop.edu/ogc/documents/student-information-sheet-pdf please scroll to the bottom of the page and click on Application for Appeal. You would print the Application to Appeal form, attach a copy of your campus residence determination, and submit it to the Office of the General Counsel (OGC) at one of the addresses indicated on the form. Do not submit any other documents. Your appeal must be received at OGC within thirty (30) days following the date of the campus decision classifying you as a nonresident. An OGC Residency analyst will determine whether you have stated appropriate grounds for an appeal. If your appeal is accepted for review, the Residency Analyst will obtain your residence file from the campus and may request documentation from you at that time. The decision on your appeal is final. You may not file any further appeals of nonresident classification for the term for which you have been declared a non-resident. Only staff members in the OGC are authorized to explain or provide information regarding UC Residence Policy pertaining to appeals.

You are advised that the foregoing is a summary of the law regarding residence. Regulations adopted by the Regents are available for inspection in the Office of the Registrar. Note that changes may be made in the residence requirements between the publication of this statement and the relevant residence determination date.

Privacy Notice All information requested on the Statement of Legal Residence form is required by the authority of Standing Order 110.2 (a)-(d) of the Regents of the University of California for determining whether you are a legal resident for tuition purposes. The residence affairs officer in the Office of the Registrar maintains the requested information. You have the right to inspect university records containing the residence information requested on the form.

For information on other policies applicable to students, visit deanofstudents.ucr.edu.

Policies and Regulations

Academic Policies

Catalog Rights Policy for Undergraduate Degrees

Students who enter UCR as freshmen normally follow the catalog in effect in their first year of studies. Transfer students who have completed appropriate transfer programs have prior catalog rights. Check with the college dean's office for more information.

Academic Senate Regulation R6.12 states as follows: To be awarded the bachelor's degree, a student must either (a) meet graduation requirements in the UCR catalog in effect in the year of his/her graduation from the Riverside campus; or (b) fulfill graduation requirements in one UCR catalog applicable during any of the previous four years in which the student successfully completed at least one quarter or one semester of full-time college-level work, regardless of where matriculated. Upon applying for candidacy, the student must specify the applicable catalog.

At UCR, courses are assigned a unit value determined by the number of hours of work per week required of the student. Specifically, Academic Senate regulations require three hours of work per week for each unit of credit. For example, in a 4-unit course scheduled to meet four hours per week, a student is expected to spend eight hours of preparation outside of class.

Grades in courses are assigned as follows:

Passing "A" (distinction), "B" (high pass), "C" (pass), "D" (marginal pass). Grade point values per unit are as follows: "A"=4, "B"=3, "C"=2, "D"=1. The grades "A," "B," "C," and "D" may be modified by plus (+) or minus (-) suffixes. Minus grades carry three-tenths grade point less per unit, and plus grades (excluding "A+") carry three-tenths grade point more per unit than unsuffixed grades.

Not passing "F" (failure). No grade point value.

Grade Delay "GD." Assigned temporarily when grade posting is delayed for administrative reasons. Students who see "GD" on their grade report or transcript should contact their instructor for clarification.

Incomplete "I." Units are not charged and grade points are not assigned.

Withdrawal "W." Course dropped after the second week of classes. Units are not charged and grade points are not assigned.

The grade point average (GPA) is determined by multiplying each grade point value by the number of units assigned to the course, adding up these grade point units, and dividing the total grade point units by the total number of units for which letter grades are received.

Satisfactory/No Credit Grades

A student in good standing may undertake courses on a Satisfactory/No Credit (S/NC) basis subject to the following limitations: the grade "S" is awarded for work satisfactory for unit credit in meeting degree requirements. For undergraduates, the requirement is a "C" average (2.00); for graduate students, it is a "B" average (3.00). Units are assigned for courses graded "S," but "S" has no grade point equivalent and does not enter the GPA. Neither units nor grade points are assigned for an "NC" grade; the grade is recorded on the transcript but does not enter the GPA.

Some graduate and undergraduate courses may, in accordance with regulations, be designated for grading on an S/NC basis only. Graduate courses are letter graded unless the course description specifies otherwise. In certain preidentified graduate courses, the department may allow a third (residual) category in which a graduate student may elect to take a course on an S/NC basis, provided that the graduate advisor consents. (Graduate students must petition to take undergraduate courses outside their major on an S/NC basis, and they may not take undergraduate courses in their major on an S/NC basis.) Students should consult the Graduate School

of Education before electing courses on an S/NC basis to be used for a teaching credential.

Students enrolled in an undergraduate degree program may receive credit for courses undertaken and graded "S" on the UCR campus to a limit of one-third of the total units undertaken and passed on the Riverside campus at the time the degree is awarded. Units completed on another campus of the university by a Riverside undergraduate student enrolled as an intercampus visitor are considered Riverside work for the purposes of this regulation.

Courses required in or prerequisite to the undergraduate student's major subject may be taken on an S/NC basis only on approval of the chair of the student's department (or other primary instructional unit) in each individual case. A student on "limited" status may take courses on an S/NC basis at the discretion of the dean of the school or college in which the student is enrolled. Courses in the X or XR300, X400, or 300 series are not subject to the one-third limitation on courses graded "S." For additional limitations on 300 and 400 series courses, see individual college sections in the Undergraduate Studies section of this catalog.

A student may elect "S/NC" or delete "S/NC" from a course by filing an Enrollment Adjustment Form through myforms.ucr.edu. The deadline is the end of the eighth week of instruction and is listed each quarter at registrar.ucr.edu (click on Academic Calendar).

Incomplete Grades

The grade "I" (incomplete) is a provisional grade which denotes that a student's work was of passing quality but incomplete for good cause. Units attempted are not charged for courses graded "I." The grade of "I" may be replaced if the work is completed as specified by the instructor prior to the end of the following quarter. When a course graded "I" has not been successfully completed after one additional quarter or by the time the student is ready to graduate (whichever is less), it will be replaced by a grade of "F" or by "NC" (if the course were taken on an S/NC basis). The appropriate dean may extend the time for successful completion when he or she considers that circumstances warrant it, provided the request is received before the grade "I" is changed to "F" or "NC."

In Progress Grades

For certain courses extending over more than one term, where, by consent of the Academic Senate, evaluation of the student's performance may be deferred until the end of the final term, provisional grades of "IP" (in progress) are assigned in the intervening terms.

Neither units nor grade points are assigned for "IP" grades. The provisional grades are replaced by the final grade if the student completes the full sequence. In the event that the full sequence is not completed, the grade "IP" is replaced by the grade "I," and further changes in the student's record are subject to regulations governing the grade "I."

Workload Credit

Workload credit is given for UCR classes preparatory to regular university work. Workload credit does not carry units for graduation but does count as part of a student's academic course load and enrollment status.

Repetition of Courses

Repetition of courses not authorized to be taken more than once for credit is subject to the following conditions: generally, a student may repeat only courses in which a grade of "D," "F," or "NC" was received.

In some circumstances, students may repeat a "C-" to satisfy an academic requirement.

For example, in courses taken to meet the Entry Level Writing Requirement, such as ENGL 004 and ENGL 005, students must earn a grade of "C" or higher to satisfy the requirement, so students who receive

44 / Policies and Regulations

a grade of "C-" may repeat the course.

Degree credit for a course will be given only once, but the grade assigned at each enrollment shall be permanently recorded. In computing GPA of an undergraduate who repeats courses in which the student received a "D" or an "F," only the most recently earned grades and grade points shall be used for the first 16 units repeated. In the case of further repetitions, the GPA shall be based on all grades assigned and the total units attempted. Courses in which a grade of "D" or "F" has been earned may not be repeated on an S/NC basis. Repetition of a course more than once requires approval by the appropriate dean in all instances.

Students should be aware that some professional and graduate schools count the grades for all courses, including those repeated, in calculating a student's GPA. The GPA used by such schools could differ significantly from that shown on a student's UCR transcript.

The Department of Veterans Affairs will not consider toward full time those units which are a repeat of courses in which a grade of "D-" has been received, unless a higher grade in the course is specifically required for graduation. Contact Student Special Services, (951) 827-3861, for additional details.

Change of Grade

All grades except "I" and "IP" become final when they are assigned. No term grade may be revised by reexamination. No change of grade may be made on the basis of reassessment of the quality of a student's work. However, at the discretion of the instructor in charge of a course, reexamination and reassessment of work may be allowable under the terms of the Sanctioning Guidelines of the UCR Academic Integrity Policy. See Academic Integrity later in this section. An instructor may approve and report to the Registrar a correction of a recorded course grade at any time if clerical or procedural error has been made in assigning, transmitting, or recording the original grade.

Procedures for the Appeal of Grades

The Regulations of the Riverside Division of the Academic Senate state that if a student believes that nonacademic criteria have been used in determining a grade, the student shall attempt to resolve the grievance with the instructor of the course through written appeal to the instructor via the chair of the department. If the grievance is not resolved to the student's satisfaction at the departmental level, the student may file a complaint with the dean of the college or school having jurisdiction over the course or with the dean of the Graduate Division if the student is in graduate status. The complaint should be filed immediately after the alleged use of nonacademic criteria but no later than six weeks after the beginning of the subsequent quarter. Nonacademic criteria are criteria not directly reflective of class performance, such as discrimination on political grounds or for reasons of race, religion, sex, or ethnic origin or for other arbitrary or personal reasons.

Expected Progress for Undergraduate Students

Expected Progress A full-time undergraduate student is considered to be making Expected Progress toward a baccalaureate degree if he or she:

1. passes at least 45 units each academic year,
2. declares a major by the time the student earns 90 units, and
3. follows a program of study consistent with the requirements of the student's declared major or undeclared student's College or School.

Continued Registration A full-time undergraduate student is considered ineligible for Continued Registration if he or she:

1. does not pass at least 37 units in each academic year, or
2. does not complete the Expected Progress requirements as stated above.

Failure to Meet Criteria for Continued Registration Registration of a full-time undergraduate student who is ineligible for Continued Registration under any of the criteria described above shall be at the discretion of the faculty in the student's College or School or Associate Dean for Student Academic Affairs in each College or School.

Units Passed For purposes of determining eligibility for Continued Registration, in addition to units earned by passing regularly enrolled courses, the following defines what shall be counted as units passed.

1. Workload only, non-credit courses with passing grades shall be counted as units passed.
2. If a student receives a grade of "D" in a course and then repeats and passes the course, the units from each enrollment shall be counted as units passed during the quarter the course was taken, provided the student has not accumulated more than a total of 16 repeated units.
3. Units earned during a summer session, either at UCR or another accredited school and transferred to UCR, shall be counted as units passed during the academic year immediately preceding the summer session.
4. Units passed by examination shall be counted as units passed during the quarter in which the examination was taken.
5. Units graded IP (In Progress) shall be counted as units passed.
6. Units graded I (Incomplete) are not counted as units passed. When the grade of I is replaced by a passing grade, the units shall be counted toward Expected Progress for the quarter in which the I grade was awarded.

Units of Courses Taken at Other Institutions A student is prohibited from obtaining transfer units for courses taken at a non-University of California campus in a quarter during which the student is enrolled as a full-time student at UCR. Summer session course work is exempt from this restriction.

1. To request an exception, a petition must be submitted to and approved by the appropriate College or School committee or administrative officer prior to the quarter of concurrent enrollment.
2. In those instances where approval has been granted, units earned from courses taken at a non-University of California campus shall be counted toward the Expected Progress in the quarter(s) in which the concurrent enrollment occurred.

Posthumous Awards

The University of California, Riverside seeks to extend sympathy and compassion to the families of students who pass away near the completion of their degrees and to recognize the academic achievement of students who would have fulfilled the requirements of the degree. These actions must also be balanced with attention to academic and institutional integrity. For more information on identifying and considering candidates for the award of posthumous undergraduate degree, please contact the Office of Student Affairs in the appropriate college.

Final Examinations

The instructor in charge of an undergraduate course shall be responsible for assigning the final grade in the course. The final grade shall reflect the student's achievement in the course and shall be based upon adequate evaluation of that achievement. The instructor's methods of evaluation must be clearly announced during the progress of the course. Evaluation methods must be of reasonable duration and difficulty and in accord with applicable departmental policies. The methods may include a final written examination, a term paper, a final oral examination, a take-home examination, or other evaluation device. If a final written examination is given, it shall not exceed three hours in duration and shall be given only at the time and place announced at registrar.ucr.edu. No student shall be excused from assigned final examinations.

Backdating Units

Undergraduate students who have no more than two courses or 8 units of course work remaining to be completed in their program for the bachelor's degree at UCR and who have been approved for admission to graduate status may begin the course work for an advanced degree at the beginning of their final quarter of undergraduate study. The student must inform the college office prior to enrollment in course work. When students are registered in graduate status, they then petition for credit for the courses completed beyond those required for a bachelor's degree. The petition must be signed by the dean of the school or college, attesting to the fact

that the student's deficiency was as stated, and the petition is subject to approval by the department and the dean of the Graduate Division.

Credit by Examination

Credit by examination may be earned in accordance with regulations established by each college. The student should consult the Undergraduate Studies section of this catalog for specific regulations.

A UCR student in residence may take examinations for degree credit in courses offered on the campus without formally enrolling in them. The results of the examinations are entered upon the student's record. There is a \$5 service charge for each petition.

Undergraduate Credit for Graduate Courses

Students interested in obtaining undergraduate credit for graduate courses should contact the office of the dean of their college for further information.

Class Standing

Classification	Completed Units
Undergraduate	
Freshman	0–44.9
Sophomore	45–89.9
Junior	90–134.9
Senior	135 or more
Limited	
Second Baccalaureate	
Professional	
Credential Programs	
Medical Program	
Graduate	
Master's	
Doctoral 1 (not advanced to candidacy)	
Doctoral 2 (advanced to candidacy)	
Postdoctoral	

Undergraduate classification is determined by the number of quarter units earned. Postbaccalaureate and graduate classifications are based on the student's academic objective and whether or not the student is advanced to candidacy for a doctorate.

Scholarship Regulations

Academic Standing To remain in good academic standing, a student must maintain a GPA of at least 2.00 and make progress toward the degree at a satisfactory rate.

Academic Probation Students are placed on academic probation if, at the end of any term, their GPA for the term is less than 2.00 or their cumulative GPA, computed on the total of all courses undertaken in the university, is less than 2.00 ("C" average).

Academic Disqualification Students are subject to disqualification from further registration in the university a) if, at the end of any term, their GPA for that term is less than 1.50 or b) if, after two terms on academic probation, their cumulative GPA, computed on the total of all courses undertaken in the university, is less than 2.00 ("C" average).

Students who are subject to the provisions of this regulation are also subject to such supervision as the faculty of their college may determine. The faculty may disqualify a student under its supervision from further registration in the university or, by suspending the provisions of this regulation, may permit a student subject to disqualification to remain in the university.

Undergraduate students who are disqualified are excluded from the university, and their connection with the university is presumed to be ended by such exclusion. Under certain circumstances, disqualified students may be readmitted upon their petition to the college and interview with the dean. Ordinarily, students are not readmitted until after the lapse of a year and unless their deficiencies are reparable within a reasonable period of time. During the period of disqualification, a student must give evidence of conduct which indicates that improved academic performance

can be expected upon readmission. If readmitted, students must remove their deficiencies through above-average work undertaken in the university. It is usually required that all deficiencies be removed during the first year after readmission.

To transfer from one campus of the university to another, or from one college to another on the same campus, students who have been disqualified or who are on probation must obtain the approval of the appropriate dean to whose jurisdiction transfer is sought. Upon completion of the transfer, the students are subject to such supervision as the faculty of their college may determine.

Graduate students must maintain an average of at least three grade points per unit in all upper-division and graduate courses taken for letter grade during residence at the UC. Only courses in which the student is assigned grades "A," "B," or "C," or equivalent, may be counted in completion of the requirements for the master's degree. Graduate students who acquire scholarship deficiencies are subject to action by the dean of the Graduate Division.

Programs for Outstanding Students

Departments of the colleges offer and administer various courses and honors programs for specially prepared, outstanding students. In some departments, equivalent special studies and seminar programs have been designed for students with special aptitudes. Interested students should consult their faculty advisors early for details of the program in their major department.

Honors

Chancellor's Honor List Students who are placed on the dean's honor list for all three quarters in a single academic year (fall, winter, and spring) are placed on the Chancellor's Honor List for that academic year.

Dean's Honor List Any student who in any quarter completes a minimum of 12 units with letter grades, with no grade in any course below a "B" and no grade of "W", "NC" or "I," and who has a GPA of 3.50 or better for all work undertaken in the university for that quarter, is placed on the Dean's Honor List.

Graduation with Honors The Academic Senate has established the following standards for award of honors at graduation: No more than the top 2 percent (by GPA) in the June graduating class shall receive highest honors. No more than the next 4 percent of graduating students shall receive high honors, and no more than the next 10 percent shall receive honors. To be eligible for honors at graduation, a student must have completed 60 or more quarter units of graded courses at the UC. The GPAs used to determine class rank shall be based on courses taken at the UC.

Students may obtain a statement of the specific requirements for graduation with honors from the office of the dean of their college.

University Honors Program For a description of the University Honors Program, see Educational Opportunities in the front of this catalog. For a listing of requirements and courses, refer to University Honors Program in the Programs and Courses section of this catalog.

Academic Integrity

Academic Integrity for Students at the University of California, Riverside.

Policy

University Of California Policies Applying to Campus Activities, Organizations, and Students, section 100.00 Policy on Student Conduct and Discipline states that "Chancellors may impose discipline for the commission or attempted commission (including aiding or abetting in the commission or attempted commission) of the following types of violations by students:

102.1 All forms of academic misconduct including but not limited to cheating, fabrication, plagiarism, or facilitating academic dishonesty.

102.2 Other forms of dishonesty including but not limited to fabricating information, furnishing false information, or reporting a false emergency to the University."

Principles of Academic Integrity

At the University of California, Riverside (UCR) honesty and integrity are fundamental values that guide and inform us as individuals and as a community. The culture of academia requires that each student take responsibility for learning and for products that reflect their intellectual potential, curiosity, and capability. Students must represent themselves truthfully, claim only work that is their own, acknowledge their use of others' words, research results, and ideas, using the methods accepted by the appropriate academic disciplines and engage honestly in all academic assignments. Anything less than total commitment to honesty circumvents the contract for intellectual enrichment that students have with the University to become an educated person, undermines the efforts of the entire academic community, and diminishes the value of an education for everyone, especially for the person who cheats. Both students and faculty are responsible for ensuring the academic integrity of the University.

These guidelines establish definitions for academic misconduct and procedures for the adjudication of academic integrity cases by the Office of Student Conduct and Academic Integrity Programs (SCAIP) for undergraduate students and Graduate Division for graduate student cases.

Misunderstanding of appropriate academic conduct will not be accepted as an excuse for academic misconduct. If a student is in doubt about appropriate academic conduct in a particular situation, he or she should consult with the instructor in the course to avoid the serious charge of academic misconduct.

Types of Academic Misconduct

The following provides definitions of academic misconduct to assist students in developing an understanding of the University's expectations, recognizing that no set of written guidelines can anticipate all types and degrees of violations of academic integrity. To the extent that these definitions are not exhaustive, duly appointed representatives of the University will judge each case according to its merits.

Academic misconduct is any act that does or could improperly distort student grades or other student academic records.

Cheating Fraud, deceit, or dishonesty in an academic assignment, or using or attempting to use materials, or assisting others in using materials that are prohibited or inappropriate in the context of the academic assignment in question.

Fabrication Making up data or results and recording or reporting them, including laboratory or field research results. In the context of student academic integrity, this also includes falsifying academic or university documents and providing false information or testimony in connection with any investigation or hearing under this policy.

Plagiarism The appropriation of another person's ideas, processes, results, or words without giving appropriate credit. This includes the copying of language, structure, or ideas of another and attributing (explicitly or implicitly) the work to one's own efforts. Plagiarism means using another's work without giving credit.

Facilitating academic dishonesty Assisting another in violating the policy of Academic Integrity, such as taking an exam for another student or providing coursework for another student to turn in as his or her own effort.

Unauthorized collaboration Working with others without the specific permission of the instructor on assignments that will be submitted for a grade. This applies to in-class or take-home tests, papers, labs, or homework assignments. Students may not collaborate without faculty authorization.

Interference or sabotage Damaging, removing, or otherwise harming another student's work or University materials and systems to affect the academic performance of others.

Failure to comply with research regulations such as those applying to human subjects, laboratory animals, and standards of safety.

Retaliation of any kind against a person who reported or provided information about suspected or alleged misconduct and who has not acted in bad faith.

UNDERGRADUATE STUDENTS

Requirements and Expectations

Research To foster intellectual honesty with regard to undergraduate research, all academic units at UCR are encouraged to develop statements that fit the distinctive research climate and needs of their individual disciplines. These guidelines may cover responsibilities of research supervisors, assignment of credit for publications, training of research apprentices, requirements for record keeping of experimental procedures and data storage.

Policies relevant to research and agencies funding research are posted on the UCR Office of Research website.

Courses Faculty members, teaching assistants, and other instructional personnel are encouraged to include statements addressing academic integrity as part of the syllabus for every course and to educate students about expectations and standards in the context of the course in order that students may not, through ignorance, subject themselves to the charge of academic misconduct. Instructors are further encouraged to inform students of campus resources available for dealing with academic difficulty.

Undergraduate Procedures

Throughout the process of reviewing allegations of academic misconduct, this policy articulates deadlines for action based on calendar days. If the day of a deadline falls on a weekend, holiday, or day the University is otherwise closed, that deadline will be moved to the next day the University is open.

I. Faculty Actions

Research In cases of alleged academic integrity violations in undergraduate research, faculty members, teaching assistants, and other instructional personnel should report suspicion of fraudulent or unethical research practice by students, including but not limited to undergraduate student researcher employees, immediately to the Chair of the department, Dean of the school or Director of the organized research unit. The report must then be forwarded to the Vice Chancellor for Research who will be responsible for coordinating further actions.

Courses If a faculty member, teaching assistant, or other instructional personnel suspects that an act of academic misconduct has occurred in a course, she or he must promptly communicate with the student regarding the alleged act of misconduct and the information upon which the allegation is based within 30 calendar days of discovery of the alleged act. Under special circumstances, the instructor may make a request for an extension of time through the Vice Provost for Administrative Resolution. If the discovery is made by a teaching assistant, reader, grader, or tutor, he or she should immediately communicate to the Faculty member in charge of the course, so that the Faculty member in charge can proceed with the investigation.

Whenever possible, the communication should take place through an in-person consultation and should be conducted in a manner that respects each student's privacy and maintains an environment that supports teaching and learning. When a meeting is not possible or practical, an instructor may communicate with the student in writing. Written communication will be sent to the student's University e-mail address. When multiple students are involved, faculty members are encouraged to communicate with each student separately.

The Faculty member or the student may request the assistance of the Ombudsperson at the conference to assist in a fair and focused discussion about what may have occurred.

The student must be given the opportunity to respond to the allegation of misconduct. When communication is made in writing, students will be given 14 calendar days to respond.

After conferring with the student and/or considering the student's written response, the faculty member may determine there has been no misconduct, in which case she or he may dismiss the allegation and take no further action.

If the faculty member determines that it is more likely than not that the student committed an act of academic misconduct, regardless of the

student's intent to engage in misconduct, the instructor may then pursue one of the following actions:

- A. In cases where the student does not dispute the facts upon which the charges are based, the instructor may impose an appropriate academic sanction, taking into account the clarity of course expectations, the level of the student's experience or knowledge of principles of academic integrity, the nature of the assignment, and the degree of intentionality and pre-meditation of the misconduct. These admissions of guilt and the sanction the instructor imposes are final.

Actions taken must be documented through the Academic Misconduct Referral form, or a referral memo to SCAIP, the central location where all records of incidents of academic dishonesty are kept on file. It is essential that the form or referral memo include the student's name and student identification number, the name of the class in which the act took place, the date or time period in which the act occurred, a description of the academic misconduct, a summary of actions taken, all original documentation supporting the charge, and the academic sanctions assigned.

- B. In cases where the student disputes the facts upon which the charges are based, the instructor will refer the case to SCAIP. The Academic Misconduct Referral form, available at conduct.ucr.edu, or memo must include the student's name and student identification number, the name of the class in which the act took place, the date or time period in which the act occurred, a description of the academic misconduct, a summary of actions taken by the instructor, all original documentation supporting the charge (except where prohibited by law), and the academic sanctions recommended. Faculty members are encouraged to forward a copy of the course syllabus and other written communication that addresses academic integrity standards and expectations for the course. Faculty are further encouraged to evaluate the assignment or examination on its merits and to make note of the grade to be assigned in the event that the student is not found responsible for violation of the University's policies or where insufficient evidence exists to hold the student responsible.

Faculty members who will not be available to participate fully in resolving allegations (e.g., Individuals holding part-time or temporary appointments, those on sabbatical or other leave, or those leaving University employment) must provide a copy of all documentation to the immediate supervising administrator: department chair, program director, center director, or dean of school, who will serve as a proxy for the Faculty member to conclude the case.

If grades are awarded while the case is in progress, the Faculty member is expected to assign a temporary grade placeholder of Grade Delay "GD" pending the outcome of the review process.

The Faculty member is encouraged to evaluate the disputed assignment or examination on its merits and to note the grade to be assigned in the event that the student is not found responsible for violation of the University of California Policy on Student Conduct and Discipline or where insufficient evidence exists to hold the student responsible.

- C. Violations that the instructor believes to be particularly egregious shall be referred directly to the School or College Academic Integrity Committee in the instructor's School or College for review.

The student may not avoid the imposition of a sanction by withdrawing from a course. If the student is found not responsible for academic misconduct, the student will be permitted to request a withdrawal from the course with a grade of "W" using Undergraduate Enrollment Adjustment Procedures.

II. Administrative Actions

Research The Vice Chancellor for Research, in consultation with the original recipient of the report, will review the description of the academic misconduct and documentation supporting the charge and determine if unethical conduct may have occurred, and if so, may undertake a preliminary inquiry or formal investigation following the guidelines outlined in UCR Policy on Integrity in Research, posted on the Office of Research Affairs website at <http://www.ora.ucr.edu/ori.aspx> In the event that the preliminary inquiry or formal investigation finds probable cause to warrant

disciplinary proceedings, charges of misconduct will be processed in accordance with existing procedures for adjudicating alleged academic misconduct in courses.

Courses

The table below shows the steps in the investigation and review process.

Action	Responsible Body: Undergraduate Students
Initiation of Cases • Faculty member's suspicion of misconduct in a course, communication with student, and determination of outcome • Faculty member documents actions via Academic Misconduct Referral Form for Review Stage 1	Faculty Member
Review Stage 1 • Administrative Review	Student Conduct and Academic Integrity Programs [SCAIP]
Review Stage 2 • Hearings for cases that are complex, egregious, and/or repeated cases of misconduct • Appeals of decisions made at Review Stage 1	Academic Integrity Committees of each college/school [AICs] Hearing panels constituted from the AICs
Review Stage 3 • Annual assessments of cases addressed at Review Stages 1 & 2 • Appeals of primary decisions made at Review Stage 2	Campus Academic Integrity Executive Committee

- A. In cases where the student does not dispute the facts upon which the charges are based, SCAIP, upon receipt of the Academic Misconduct Referral form, will follow up with the student in writing to formally advise the student of the academic sanctions assigned by the instructor as well as appropriate disciplinary sanctions assigned by the University.

The decision shall be forwarded in writing to the student within 20 calendar days of the review; and communicated to the instructor, school or college and/or division in accordance with legitimate educational interest criteria as articulated by the Family Education Rights and Privacy Act.

Students with a record of previous academic misconduct will be referred to the Academic Integrity Committee in their School or College for a formal hearing (Review Stage 2), with a recommendation that suspension or dismissal be considered

- B. In cases where the student disputes the facts upon which the charges are based, upon receipt of the Academic Misconduct Referral Form, SCAIP will notify the student of their alleged violation of the University of California Policy on Student Conduct and Discipline, the factual basis for the charges, and the plan to conduct a Review Stage 1 Administrative Review of the case. The student will be advised that the Administrative Review is intended as a thorough exposition of all related facts and written materials associated with the alleged misconduct, and that it is not intended as an adversarial criminal or civil legal proceeding. It is not modeled on these adversarial systems; nor does it serve the same functions; rather, it is an academic process unique to the community of scholars that comprise a University. The student will also be informed of his or her right to be assisted by an advisor of his or her choice. Such written notification will occur within 20 calendar days of the receipt of the referral by SCAIP and will be sent to the student's University e-mail address.

1. Review Stage 1, Administrative Review, process:

The Administrative Review conducted by SCAIP involves meetings with the student, the Faculty member, and others who may have relevant information. The student will have the opportunity to discuss any

48 / Policies and Regulations

extenuating circumstances, causes, and motivations that may have contributed to the alleged misconduct. If SCAIP deems it necessary, the Administrative Review will be scheduled such that both the faculty member and the student can attend. The purpose of an Administrative Review is to explore and investigate the incident giving rise to the appearance of academic dishonesty, and to reach an informed conclusion as to whether or not academic dishonesty occurred. In keeping with the ultimate premise and justification of academic life, the duty of all persons at a Review is to assist in a thorough and honest exposition of all related facts. A Review is not in the character of a criminal or civil legal proceeding. It is not modeled on these adversarial systems; nor does it serve the same functions; rather, it is an academic process unique to the community of scholars that comprise a University.

The review will:

- explain fully the alleged violation of the Standards of Conduct
- review written materials associated with the alleged misconduct
- give the student and the instructor the opportunity to present their accounts of the incident and present any witnesses or other individuals who may have relevant information about the incident
- address how the student's alleged conduct was judged, why the behavior is unacceptable, the impact of conduct on others in the community, causes and motives of the conduct, and alternatives for balancing personal circumstances with needs and expectations of the community

2. Outcome of the Administrative Review:

If SCAIP determines it is more likely than not that the student is responsible for academic misconduct, the academic sanctions recommended by the faculty member as well as appropriate disciplinary sanctions will be assigned taking into account the clarity of course expectations, the level of the student's experience or knowledge of principles of academic integrity, the nature of the assignment, and the degree of intentionality and premeditation of the misconduct.

The decision shall be forwarded in writing to the student within 20 calendar days of the review and communicated to the instructor, school or college and/or division in accordance with legitimate educational interest criteria as articulated by the Family Education Rights and Privacy Act. In cases where the instructor has held a grade in abeyance pending the outcome of an Administrative Review, she or he shall submit a final grade with the Registrar that is consistent with the decision of SCAIP as to the question of misconduct.

3. Appeals of Decisions by Faculty Members and/or from Review Stage 1:

Academic Integrity Committees, described in Section C function as the appellate bodies for decisions made at Review Stage 1. Section E below more fully explains appeal procedures.

C. Cases involving a student with a record of previous academic misconduct or cases that are sufficiently complex to require additional consultation shall be referred directly by SCAIP for a Stage 2 review by the Academic Integrity Committee in the relevant college/school for a formal hearing.

III. Academic Integrity Committees

1. Review Stage 2, College/School Academic Integrity Committees for Cases Involving Undergraduate Students

An Academic Integrity Committee will be established in each School or College¹ to:

- hear cases referred by SCAIP that are sufficiently complex to require additional review
- hear serious and repeated violations of academic misconduct upon referral from an instructor or SCAIP
- consider appeals of decisions and/or sanctions imposed by SCAIP

The Academic Senate's Committee on Committees will appoint four faculty members from each of BCOE, CNAS, and SOBA, and six from CHASS to the undergraduate Academic Integrity Committees for each college/school to serve one-year terms, effective September 1-August 31. Each committee should include faculty who are available to participate in hearings during the summer months.

In addition, SCAIP will solicit and review applications from interested undergraduate and graduate students and make recommendations to the Associated Students of UCR and Graduate Student Association regarding students to be appointed to serve on each college/school committee for one-year terms, effective September 1-August 31. The final endorsement of student members will rest with the Committee on Committees. Students are not eligible to serve if they have been suspended or are on academic or disciplinary probation, have been evicted from University Housing for reasons related to conduct, or have a case pending before SCAIP. (Am 20 February 07)

In all cases an effort will be made to appoint members who represent the disciplinary diversity within each college/school, whenever possible. Staff support to the committees will be provided by the office of the Vice Provost for Administrative Resolution, the office of the AVC/Dean of Students, and SCAIP.

2. Hearing Panels

SCAIP will schedule a hearing panel of three to five members, from the relevant AIC for each case. A quorum of the committee consists of three persons, with at least one faculty member and one student for School or College Committees. In the absence of a quorum, the hearing will be rescheduled. Staff support to the Committee will be provided by the Vice Provost for Administrative Resolution or his/her designee.

The purpose of an Academic Integrity Committee Hearing is to explore and investigate the incident giving rise to the appearance of academic dishonesty, and to reach an informed conclusion as to whether or not academic dishonesty occurred. In keeping with the ultimate premise and justification of academic life, the duty of all persons at a hearing is to assist in a thorough and honest exposition of all related facts. A hearing is not in the character of a criminal or civil legal proceeding. It is not modeled on these adversarial systems; nor does it serve the same functions; rather, it is an academic process unique to the community of scholars that comprise a University.

The Vice Provost for Administrative Resolution or his/her designee will serve as a non-voting administrative chair to facilitate the hearing. The administrative chair shall rule on all questions of procedure and evidence, including but not limited to: the order of presentation of evidence, admissibility of evidence, applicability of regulations to a particular case, and relevance of testimony.

3. Hearing Procedures

Preparation: Prior to the hearing, panel members will receive and review a copy of the notification of charges and documentary evidence provided by the instructor, the University, and the student.

Introductory comments: At the beginning of the hearing, the administrative chair will ask all present at the hearing to introduce themselves for the record. The administrative chair will ask any panel members to disqualify themselves from participation if they believe for any reason that they cannot render a just and fair decision and will permit the student to request that a member be disqualified if the student believes for an appropriate reason that a panel member cannot render a just and fair decision. If a student or faculty member of the hearing panel is disqualified, another member will be appointed to fill the same role, if needed for a quorum. The chair will read aloud the charges of academic misconduct and the student will be asked to respond to the charges by (a) accepting responsibility, (b) accepting responsibility and noting that there are mitigating circumstances, or (c) denying responsibility for the alleged violation of the University of California Policy on Student Conduct and Discipline.

Presentation of accounts: The faculty member and the student will be given the opportunity to present their accounts of the incident and present any witnesses or other individuals who may have relevant information about the alleged academic misconduct. Hearing panel members will be given an opportunity to ask questions of the faculty member, the student, and witnesses. Each party will then be asked if there is additional information needed, or if any discrepancies or questions need to be presented or addressed.

Deliberation: The hearing panel will deliberate in private to decide, by a majority vote, if a preponderance of the evidence indicates that the student is responsible or not responsible for alleged violation of University of California Policy on Student Conduct and Discipline.

If the student is found to be responsible for violations of the Policy, the Committee shall be informed of the student's prior record to determine whether the student has been found responsible for previous academic misconduct. Based on this information, the Committee will determine the sanction(s) to be assigned.

Notification of decision: Once the hearing panel has reached a decision, the parties involved will reassemble, and the results of the deliberation will be presented. Within 20 calendar days, the Vice Provost for Administrative Resolution or his/her designee will send written notification to the student, the faculty member, and the dean or his/her designated associate dean for student academic affairs of the college/school detailing the decision and the sanctions imposed by the hearing panel. The notification will also outline the appeal process.

Records: An audio recording of the hearing, but not the deliberations, shall be made and retained in SCAIP as part of the record for as long as the disciplinary record is retained, or for seven years from the date of decision, whichever is shorter (see Section F below). The student may obtain a copy of the recording upon paying the expense of making such copy. Either the student with conduct under investigation or the faculty member may arrange for a stenographer to make a full transcript of the proceedings at his/her own expense. If one party has the proceedings transcribed, arrangements shall be made before the hearing as to how to apportion the cost if both parties want copies. Other than for the purpose of the official record as provided above, mechanical or electronic devices for recording or broadcasting shall be excluded from the hearing.

4. Students may appeal the decision of Stage 2 review by the Academic Integrity Committees in writing to the Campus Academic Integrity Executive Committee

College Academic Integrity Executive Committee The Vice Provost for Administrative Resolution or his designee shall select one faculty member and one student from each Academic Integrity Committee to serve as the Campus Academic Integrity Executive Committee for undergraduates. The Campus Academic Integrity Executive Committee also serves as the appellate body for primary decisions made at Review Stage 2 for undergraduate students. The Executive Committee will also review, on an annual basis, cases addressed by SCAIP and Academic Integrity Committee actions to provide oversight and direction and to ensure that policies and procedures are appropriate and properly applied.

IV. Appeals

1. Channels for Appeals

Stage 1 Review decisions made by SCAIP may be appealed through the School or College Academic Integrity Committee in the faculty member's School or College. Appellate decisions of a School or College Academic Integrity Committee are final.

Stage 2 Review decisions made by a School or College Academic Integrity Committee may be appealed to the Campus Academic Integrity Executive Committee. Appellate decisions of the Campus Academic Integrity Executive Committee are final.

2. Criteria for Appeals

- New evidence not reasonably available at the time of the original hearing, the absence of which can be shown to have had a detrimental impact on the outcome of the hearing
- Procedural error that can be shown to have had a detrimental impact on the outcome of the hearing
- Errors in the interpretation of University policy so substantial as to deny one of the parties a fair hearing
- Grossly inappropriate sanction having no reasonable relationship to the charges

3. Appeal Procedures

- The Faculty member or the student may appeal a decision in writing to the appropriate body for appeal, as described above. The appeal must be made within 14 calendar days after the written decision is made available.
- Appeals must be authored and signed by the submitting party. Appeals produced by advisors or other non-parties will not be considered.

- The filing of a timely appeal suspends the imposition of sanctions until the appeal is decided. Grades or degrees will be withheld pending conclusion of the appeal.
- When an appeal has been filed, the relevant parties may be requested to respond in writing to the matters in question before a decision about the appeal is made. The non-appealing party, whether student or Faculty member, will be notified of the appeal as soon it has been received by the appropriate appellate body and will be given an opportunity to submit a written statement for consideration during the appeal process.
- The appellate body will determine whether the grounds for appeal have been satisfied and whether further process is necessary to resolve the appeal. Findings of fact will be accepted as determined by the original adjudicating body, unless the appellate body determines that the original adjudicating body acted in an arbitrary, capricious, or unfair manner.
- The appellate body will make a decision based on the written submissions within 20 calendar days, or indicate in writing what further process is necessary for final resolution.
- The appellate body may approve, reject, or modify the decision and sanction in question. The action taken shall be communicated in writing to the student, the faculty member, SCAIP, and/or the original adjudicating body within 20 calendar days after receipt of the appeal and related documents. The decision of the appellate body is final.

V. Maintenance Of Records

SCAIP shall serve as the central location where all written, audio, and electronic records of incidents of academic misconduct are kept on file. The records will be readily available for review by the Deans and Associate Deans of each College or School, the Dean of the Graduate Division, the Executive Vice Chancellor and Provost and the Vice Provost for Administrative Resolution, in accordance with legitimate educational interest criteria as articulated by the Family Educational Rights and Privacy Act.

The file of a student found in violation of campus regulations (including the transcripts or recordings of the hearing) will be maintained by the SCAIP for a period of at least seven years from the date of the letter providing notice of final disciplinary action, unless otherwise determined by the Vice Provost for Conflict Resolution. When a student is suspended as a result of a violation of the University of California Policy on Student Conduct and Discipline, the fact that suspension was imposed must be posted on the academic transcript for the duration of the suspension. When a student is dismissed as a result of a violation of this policy, the fact that dismissal was imposed must be posted on the academic transcript permanently.

VI. Scheduling for Hearings and Appeals

In general, Academic Integrity Committees will conduct hearing panels September through June, the main academic year. In special circumstances, including hearings involving graduating seniors and those involving course sequences and prerequisites, SCAIP and the Academic Integrity Committees will work to expedite the process and endeavor to hold summer hearings on a limited basis.

Regulations Specifically for Graduate Students

1. Requirements and Expectations in Research

To foster intellectual honesty with regard to graduate student research, all academic units at UCR are encouraged to develop statements that fit the distinctive research climate and needs of their individual disciplines. These guidelines may cover responsibilities of research supervisors, assignment of authorship or credit for publications, training of research apprentices, requirements for record keeping of experimental procedures and data storage.

It is the responsibility of each individual engaged in research at UCR to be informed of University policies relating to research and of the policies and procedures of the agencies funding research. Relevant policies are posted on the UCR Office of Research website.

2. Allegations of Misconduct in Research

All allegations of research misconduct by graduate students should be immediately reported to the Associate Dean for Graduate Academic Affairs in the Graduate Division. The Associate Dean will then inform the Vice Chancellor for Research who serves as the UCR Research Integrity Officer and who, in furtherance of the University's obligations and responsibilities, has been delegated the administrative authority by the Chancellor with respect to the oversight, implementation, maintenance and updating of the Policy and Procedures for Responding to Allegations of Research Misconduct at the University Of California, Riverside. All complainants should consult the Policy and Procedures for Responding to Allegations of Research Misconduct at the University Of California, Riverside prior to bringing an allegation of research misconduct to the Associate Dean.

The Vice Chancellor for Research or his/her designee will review the description of the research misconduct and all documentation supporting the charge. He/she will determine, together with the Associate Dean for Graduate Academic Affairs, if misconduct may have occurred, and if so, may undertake a preliminary inquiry or formal investigation, following the guidelines outlined in the UCR Policy on Integrity in Research, posted on the UCR Office of Research website. In the event that the preliminary inquiry or formal investigation finds probable cause with respect to research misconduct to warrant disciplinary proceedings, charges of misconduct will be processed in accordance with procedures for adjudicating alleged academic misconduct in courses, as outlined below, beginning with Review Stage 1.

3. Requirements and Expectations in Courses

Instructional personnel responsible for courses (herein referred to as Faculty) are encouraged to include statements addressing academic integrity as part of the syllabus for every course and to educate students about expectations and standards of the course in order that students may not, through ignorance, subject themselves to the charge of academic misconduct. Faculty are further encouraged to inform students of campus resources available for dealing with academic difficulty.

4. Allegations of Misconduct in Courses

The table below shows the steps in the investigation and review process.

Action	Responsible Body: Undergraduate Students
Initiation of Cases • Communication with the student regarding suspected misconduct and documentation of actions via the Graduate Academic Misconduct Referral Form	• Faculty Member
Review Stage 1 • Initial [Administrative] Review	• Associate Dean for Graduate Academic Affairs
Review Stage 2 • Hearings for cases that are complex, egregious, and/or repeated cases of misconduct • Appeals of decisions made at Review Stage 1	• Graduate Academic Integrity Committee [GAIC]
Review Stage 3 • Annual assessments of cases addressed at Review Stages 1 & 2 • Appeals of primary decisions made at Review Stage 2	• Graduate Council

4.1. Initiation of Cases

If a Faculty member suspects that an act of academic misconduct has occurred in a course, he or she must promptly communicate with the student regarding the alleged misconduct and the information upon which the allegation is based; the notification process must occur within 30

calendar days from the discovery of the alleged act. The Faculty member may make a request for an extension of time through the Associate Dean for Graduate Academic Affairs. If the discovery is made by a student, teaching assistant, reader, grader or tutor he or she should immediately communicate to the Faculty member in charge of the course, so that the Faculty member in charge can proceed with the investigation.

Whenever possible, communication with the student should take place through an in-person consultation and should be conducted in a manner that respects the student's privacy and maintains an environment that supports teaching and learning. When multiple students are involved, Faculty are encouraged to communicate with each student separately. The Faculty member or the student may request the presence at the consultation meeting of the Ombudsperson.

When an in-person meeting is not possible, the Faculty member may communicate with the student in writing. Written communication should be sent to the student's University e-mail address.

The student must be given the opportunity to respond to the allegation of misconduct. When communication is made in writing, students will be given 10 calendar days to respond.

After conferring with the student and/or considering the student's written response, the Faculty member may determine that there has been no misconduct, in which case the Faculty member may dismiss the allegation and take no further action.

If the Faculty member determines that it is more likely than not that the student committed an act of academic misconduct, regardless of the student's intent to engage in misconduct, the case moves to Stage 1 in the review process.

Faculty members who will not be available to participate fully in resolving allegations (e.g., Individuals holding part-time or temporary appointments, those on sabbatical or other leave, or those leaving University employment) must provide a copy of all documentation to the immediate supervising administrator: department chair, program director, center director, or dean of school, who will serve as a proxy for the Faculty member to conclude the case.

If grades are awarded while the case is in progress, the Faculty member should assign a temporary grade placeholder of Grade Delay "GD" pending the outcome of the review process.

4.1.1. Student Admits Responsibility

If the student admits responsibility for the alleged misconduct, the Faculty member may immediately impose an appropriate academic sanction. The faculty member must document the case and the sanction on the Graduate Academic Misconduct Referral form and send the form to the Associate Dean for Graduate Academic Affairs. Faculty members are advised to consult with the Graduate Advisor for the student's program and with the Associate Dean for Graduate Academic Affairs prior to imposing the academic sanction.

4.1.2. Student Admits Responsibility

If the student does not admit responsibility but the Faculty member makes a determination of misconduct, the Faculty member will refer the case to the Associate Dean for Graduate Academic Affairs using the Graduate Academic Misconduct Referral Form. The referral form must include the student's name and student identification number, the name of the class in which the act took place, the date or time period in which the act occurred, a description of the academic misconduct, a summary of actions taken, all original documentation supporting the charge (including a copy of the course syllabus and other written communication that addresses academic integrity standards and expectations for the course) and the academic actions and disciplinary sanctions recommended by the Faculty member. Faculty members are advised to consult with the Graduate Advisor for the student's program and with the Associate Dean for Graduate Academic Affairs prior to recommending sanctions.

The Faculty member also will evaluate the disputed assignment or examination on its merits and note the grade to be assigned in the event that the student is not found responsible for violation of the University of California Policy on Student Conduct and Discipline or where insufficient evidence exists to hold the student responsible.

Upon receipt of the Academic Misconduct Referral Form, the Associate Dean for Graduate Academic Affairs will notify the student of the University

of California Policy on Student Conduct and Discipline that was allegedly violated, the factual basis for the charges, and the plan to conduct an Initial [Administrative] Review of the case. The student will be advised that the Initial [Administrative] Review is intended as a thorough exposition of all related facts and written materials associated with the alleged misconduct, and that it is not intended as an adversarial criminal or civil legal proceeding. The student will also be informed of his or her right to be assisted by an advisor of his or her choice. Such written notification will occur within 20 calendar days of the receipt of the referral by the Associate Dean and will be sent to the student's University e-mail address.

A student may not avoid the imposition of a sanction by withdrawing from a course. A student officially notified of alleged academic misconduct may not withdraw from the course until the determination of responsibility is made and any sanctions are imposed. A sanction for a violation of academic integrity that affects the course grade will be applied. If the student is found not responsible for academic misconduct, the student will be permitted to withdraw from the course in accordance with campus regulations.

4.2. Review Stage 1: Initial [Administrative] Review

The Initial [Administrative] Review, conducted by the Associate Dean for Graduate Academic Affairs, involves meetings with the student, the Faculty member, and others who may have relevant information. The student will have the opportunity to discuss any extenuating circumstances, causes, and motivations that may have contributed to the alleged misconduct. If the Associate Dean deems it necessary, a joint meeting will be scheduled at a time when both the Faculty member and the student can attend. If the Faculty member is unavailable for a timely Initial [Administrative] Review, the immediate supervising administrator will be asked to serve in place of the Faculty member.

4.2.1. Outcome of the Initial [Administrative] Review

If the Associate Dean for Graduate Academic Affairs determines that it is more likely than not that the student is responsible for academic misconduct, the academic actions recommended by the Faculty member, as well as any disciplinary sanctions imposed by the University, will be assigned.

The determination shall be forwarded by the Associate Dean for Graduate Academic Affairs in writing to the student within 20 calendar days of the Initial [Administrative] Review; notice will be sent to the student's University e-mail address and communicated to the Faculty member and to the dean of the college/school in accordance with legitimate educational interest criteria as articulated by the Family Education Rights and Privacy Act. In cases where the Faculty member has held a grade in abeyance pending the outcome of an Initial [Administrative] Review, he or she shall submit a final grade to the Registrar that is consistent with the determination by the Associate Dean for Graduate Academic Affairs as to the question of misconduct. Either the student or faculty member can appeal the decision of the Associate Dean for Graduate Academic Affairs.

Cases involving a student with a record of previous academic misconduct or cases that are sufficiently complex to require additional consultation shall be referred directly by the Associate Dean for Graduate Academic Affairs for a Stage 2 review by the Graduate Academic Integrity Committee for a formal hearing.

4.3. Review Stage 2: Complex Cases and Appeals from Stage 1

Review Stage 2 is reserved for cases involving a student with a record of previous academic misconduct or cases that are sufficiently complex or egregious to require additional consultation by the Graduate Academic Integrity Committee [GAIC] for a formal hearing. Review Stage 2 also serves as the stage for appeals of decisions made at Review Stage 1. Appellate decisions at Review Stage 2 are final.

The Academic Senate's Committee on Committees will appoint faculty to the Graduate Academic Integrity Committee to serve one-year terms, effective September 1-August 31, and will appoint one faculty member from the GAIC to serve as chair. The GAIC will consist of at least one member from each school and at least two members from each college and should include faculty who are available to participate in hearing during the summer months.

In addition, the Graduate Division will solicit and review applications from interested graduate students and make recommendations to the Graduate

Student Association of UCR regarding students to be appointed to serve on the GAIC for one-year terms, effective September 1-August 31. The final endorsement of student members will rest with the Committee on Committees. Students are not eligible to serve if they have been suspended or are on academic or disciplinary probation, have been evicted from University Housing for reasons related to conduct, or have a case pending before the Graduate Division, GAIC, or Graduate Council.

Faculty and student members should represent the disciplinary diversity within each college/school, whenever possible. Staff support to the committee will be provided by the Graduate Division.

4.3.1. Hearing Panels

For each Stage 2 case, the chair of the GAIC will schedule a hearing panel of three to five GAIC members. A quorum is required for a hearing to proceed and consists of three persons, including at least one faculty member and one student.

The Associate Dean for Graduate Academic Affairs or designee will serve as a non-voting member of the hearing panel. The chair of the hearing panel shall rule on all questions of procedure and evidence, including but not limited to: the order of presentation of evidence, admissibility of evidence, applicability of regulations to a particular case, and relevance of testimony.

4.3.2. Hearing Panels

1. Preparation: Prior to the hearing, panel members will receive and review a copy of the notification of charges and documentary evidence provided by the Faculty member, the University, and the student.

2. Introductory comments: At the beginning of the hearing, the chair will ask any panel members to disqualify themselves from participation if they believe that they cannot render a just and fair decision, and will permit the student to request that a member be disqualified if the student believes for an appropriate reason that a panel member cannot render a just and fair decision. If a student or Faculty member of the hearing panel is disqualified, another member will be appointed to fill the same role, if needed for a quorum. The chair will read aloud the charges of academic misconduct, and the student will be asked to respond to the charges by (a) accepting responsibility, (b) accepting responsibility and noting that there are mitigating circumstances, or (c) denying responsibility for the alleged violation of the University of California Policy on Student Conduct and Discipline.

3. Presentation of accounts: The Faculty member and the student will be given the opportunity to present their accounts of the incident and to present any witnesses or other individuals who may have relevant information about the alleged academic misconduct. Hearing panel members will be given an opportunity to ask questions of the Faculty member, the student, and witnesses. Each party will then be asked if there is additional information needed, or if any discrepancies or questions need to be presented or addressed.

4. Deliberation: The hearing panel will deliberate in private to decide, by a majority vote, if a preponderance of the evidence indicates that the student is responsible or not responsible for alleged violation of University of California Policy on Student Conduct and Discipline.

5. Determination of sanctions: If the student is found to be responsible for violations of policies, the hearing panel shall be informed of the student's prior record of academic misconduct. Based on this information and the recommendation of the faculty member, the committee will determine the disciplinary sanctions to be assigned, how and for how long the record of the sanctions will be maintained on the student's permanent record, and the conditions that must be met for the record to be removed, if any.

6. Notification of decision: Once the hearing panel has reached a decision, the parties will reassemble, and the results of the deliberation will be presented. Within 20 calendar days, the Associate Dean for Graduate Academic Affairs will send written notification to the student, the Faculty member, and the dean or his/her designated associate dean for student academic affairs of the college/school detailing the decision and the sanctions imposed by the hearing panel. The notification will also outline the appeal process.

7. Records: An audio recording of the hearing, but not the deliberations of the hearing panel, shall be made and retained by the Graduate Division as part of the record for as long as the disciplinary record is retained, or for

52 / Policies and Regulations

seven years from the date of decision, whichever is shorter (see Section 6 below). The student may obtain a copy of the recording upon paying the expense of making such copy. Either party may arrange for a stenographer to make a full transcript of the proceedings at his/her own expense. If one party has the proceedings transcribed, arrangements shall be made before the hearing as to how to apportion the cost if both parties want copies. Other than for the purpose of the official record as provided above, mechanical or electronic devices for recording or broadcasting shall be excluded from the hearing.

4.4. Review Stage 3: Appeals from Stage 2 and Annual Assessment of Cases

Review Stage 3 is reserved for appeals of primary decisions made at Review Stage 2, and for annual assessment of cases adjudicated at Review Stages 1 and 2. For each Stage 3 case, the Chair of the Graduate Council or designee shall select a 3-5 member subcommittee of the Graduate Council to serve as an appeal panel. Each Stage 3 hearing will be conducted according to the Hearing Procedures described above in Section 4.3.2.

The Graduate Council additionally conducts annual assessments of cases adjudicated at Review Stages 1 and 2 for the purpose of providing oversight and ensuring that policies and procedures are appropriately and consistently applied.

5. Appeals

Decisions of the Associate Dean for Graduate Academic Affairs may be appealed to the GAIC. Appellate decisions by the GAIC are final. Primary decisions of the GAIC may be appealed to the Graduate Council. Appellate decisions by the Graduate Council are final. In any decision that includes a sanction of dismissal of a graduate student, the Dean of the Graduate Division will be the final arbiter.

5.1. Criteria for Appeals

Appeals must be based on one or more of the following:

- New evidence not reasonably available at the time of the original hearing, the absence of which can be shown to have had a detrimental impact on the outcome of the hearing
- Procedural error that can be shown to have had a detrimental impact on the outcome of the hearing
- Errors in the interpretation of University policy so substantial as to deny one of the parties a fair hearing
- Grossly inappropriate sanction having no reasonable relationship to the charges

5.2. Appeal Procedures

Appeals must be based on one or more of the following:

- New evidence not reasonably available at the time of the original hearing, the absence of which can be shown to have had a detrimental impact on the outcome of the hearing
- Procedural error that can be shown to have had a detrimental impact on the outcome of the hearing
- Errors in the interpretation of University policy so substantial as to deny one of the parties a fair hearing
- Grossly inappropriate sanction having no reasonable relationship to the charges

1. The Faculty member or the student may appeal a decision in writing to the appropriate body for appeal, as described above. The appeal must be made within 10 calendar days after the written decision is made available.
2. Appeals must be authored and signed by the submitting party. Appeals produced by advisors or other non-parties will not be considered.
3. The filing of a timely appeal suspends the imposition of sanctions until the appeal is decided. Grades or degrees will be withheld pending conclusion of the appeal.
4. When an appeal has been filed, the relevant parties may be requested to respond in writing to the matters in question before a decision about the appeal is made. The non-appealing party, whether student or Faculty member, will be notified of the appeal within 10 calendar

days and will be given an opportunity to submit a written statement for consideration within 20 calendar days.

5. The appellate body will determine whether the grounds for appeal have been satisfied and whether further process is necessary to resolve the appeal. Findings of fact will be accepted as determined by the original adjudicating body, unless the appellate body determines that the original adjudicating body acted in an arbitrary, capricious, or unfair manner.
6. The appellate body will make a decision based on the written submissions within 20 calendar days, or indicate in writing what further process is necessary for final resolution.
7. The appellate body may approve, reject, or modify the decision and sanction in question. The action taken shall be communicated in writing to the student, the Faculty member, and the original adjudicating body within 20 calendar days after receipt of the appeal and related documents. The decision of the appellate body is final.

6. Maintenance of Records

Graduate Division shall serve as the central location where all written, audio, and electronic records of incidents of academic misconduct are kept on file. The records will be readily available for review by the Deans and Associate Deans of each College or School, the Dean of the Graduate Division, the Executive Vice Chancellor and Provost, and the Vice Provost for Conflict Resolution, in accordance with legitimate educational interest criteria as articulated by the Family Educational Rights and Privacy Act.

The file of a student found in violation of campus regulations (including the transcripts or recordings of the hearing) will be maintained for a period of at least seven years from the date of the letter providing notice of final disciplinary action, unless otherwise determined by the Associate Dean for Graduate Academic Affairs. When a student is suspended as a result of a violation of the University of California Policy on Student Conduct and Discipline, the fact that suspension was imposed must be posted on the academic transcript for the duration of the suspension. When a student is dismissed, the fact that dismissal was imposed must be posted on the academic transcript permanently.

Campus Policies and Regulations

Disabled Access Grievance Procedure

UCR remains committed to its historical excellence in the area of accessibility for the disabled. UCR, in compliance with federal laws, state laws, and university regulations, does not discriminate on the basis of race, color, national origin, sex, disability, or age in any its programs, activities, services, or practices.

This nondiscrimination policy covers admission and access to, and treatment and employment in, university programs and activities. As well, individuals may complain of any action which they believe discriminates on the grounds of race, color, national origin, sex, disability, or age.

The Vice Chancellor of Business and Administrative Services, is designated as the employee responsible for coordinating the university's efforts to comply with Section 504 of the Rehabilitation Act of 1973 and with the Americans with Disabilities Act of 1990. The following procedure has been established. Problems and complaints should be brought to the following offices or to the Vice Chancellor of Business and Administrative Services, who will refer them to the appropriate office for resolution.

Vice Chancellor of Business and Administrative Services, 4118A Hinderaker Hall: staff employment issues, facility accessibility, renovation of current facilities and planning of new ones, campus transportation

Executive Vice Chancellor and Provost, 4148 Hinderaker Hall: faculty employment issues, accessibility of computers, faculty accommodation of students

Student Special Services, 125 Costo Hall: student support (adaptive equipment, note takers, interpreters, learning disability, classroom inaccessibility). Concerns that are not resolved by this office should be brought to the Vice Chancellor, Student Affairs, 2108 Hinderaker Hall.

A written, signed request for accommodation, together with documentation such as a physician's certification, is necessary when making a request.

Campus Policies and Regulations Applying to Students

E-mail and Computer Expectation Policy

The primary mode of campus communication is e-mail, and it is therefore mandatory for students to utilize their UCR Webmail accounts to review academic and administrative electronic correspondence. UCR strongly recommends that all students have a computer with Internet access. UCR faculty will assume students have such access, and academic work may require it. The UCR administration will also assume that students have Internet access, and many administrative tasks may require students to use the Internet. For information concerning computer acquisition, student network access, student computing laboratories, and student computer support, visit UCR's Student Computing Services Web, iguide.ucr.edu.

Student Conduct and Responsibility

Students enrolling in the university assume an obligation to conduct themselves in a manner compatible with the university's function as an educational institution. Students shall refrain from conduct which interferes with university teaching, research, administration, or the university's subsidiary responsibilities, or which endangers the health or safety of members of the university community or of visitors to the campus, and from disorderly conduct on university premises or at university-related events.

In cases of student misconduct, the student's College Executive Committee may defer or withhold his or her degree for a specified period of time. The Dean of Students may recommend such an action to the College Executive Committee.

By authority of the Board of Regents, the Chancellor is entrusted with full power to act in the administration of student discipline. Rules concerning student conduct, student organizations, use of university facilities and related matters are set forth in both university policies and campus regulations, copies of which are available upon request at the Vice Chancellor, Student Affairs office, Student Conduct and Academic Integrity Programs, or at conduct.ucr.edu. Particular attention is called to the *University of California Policies Applying to Campus Activities, Organizations, and Students* and to the campus regulations implementing them. The UCR Student Discipline Procedures are also available in the Vice Chancellor, Student Affairs office.

Anti-Hazing

Hazing is strictly prohibited by both California law and University of California policy. California Penal Code, Section 245.6 (b) defines "hazing" as any method of initiation or preinitiation into a student organization or student body, whether or not the organization or body is officially recognized by an educational institution, which is likely to cause serious bodily injury to any former, current, or prospective student of any school, community college, college, university, or educational institution of this state. The term "hazing" does not include customary athletic events or school-sanctioned events. University of California policy further defines "hazing" as participation in hazing or any method of initiation or preinitiation that causes, or is likely to cause, physical injury or personal degradation or disgrace resulting in psychological harm to any student or other person. Incidents of hazing may be addressed through student disciplinary action, criminal charges, and/or civil action.

More information about hazing and how to report hazing is available in the Vice Chancellor, Student Affairs office or Student Conduct and Academic Integrity Programs office.

Fees

Students are expected to pay all fees and charges which they incur. Those with outstanding obligations to the university are not allowed to register; obtain a diploma, transcript of official record, or verification of student status; or participate in certain university services.

University of California Nondiscrimination and Affirmative Action Policy Regarding Academic and Staff Employment

It is the policy of the university not to engage in discrimination against or harassment of any person employed or seeking employment with the University of California on the basis of race, color, national origin, religion, sex, gender, gender expression, gender identity, pregnancy, physical or mental disability, medical condition (cancer-related or genetic characteristics), genetic information (including family medical history), ancestry, marital status, age, sexual orientation, citizenship, or service in the uniformed services.

This policy applies to all employment practices, including recruitment, selection, promotion, transfer, merit increase, salary, training and development, demotion, and separation. This policy is intended to be consistent with the provisions of applicable state and federal laws and university policies.

University policy also prohibits retaliation against any employee or person seeking employment for bringing a complaint of discrimination or harassment pursuant to this policy. This policy also prohibits retaliation against a person who assists someone with a complaint of discrimination or harassment, or participates in any manner in an investigation or resolution of a complaint of discrimination or harassment. Retaliation includes threats, intimidation, reprisals, and/or adverse actions related to employment.

In addition, it is the policy of the university to undertake affirmative action, consistent with its obligations as a federal contractor, for minorities and women, for persons with disabilities, and for covered veterans. The University commits itself to apply every good faith effort to achieve prompt and full utilization of minorities and women in all segments of its workforce where deficiencies exist. These efforts conform to all current legal and regulatory requirements, and are consistent with University standards of quality and excellence.

In conformance with federal regulations, written affirmative action plans shall be prepared and maintained by each campus of the university, by the Lawrence Berkeley National Laboratory, by the Office of the President, and by the Division of Agriculture and Natural Resources. Such plans shall be reviewed and approved by the Office of the President and the Office of General Counsel before they are officially promulgated.

This policy supersedes the University of California Nondiscrimination and Affirmative Action Policy Regarding Academic and Staff Employment, dated July 1, 2008. The University of California, Riverside is an affirmative action/equal opportunity employer. Inquiries regarding the University's equal opportunity policies should be directed to the Assistant Vice Chancellor, Diversity, Excellence and Equity/ Director of Faculty and Staff Affirmative Action (951) 827-5604.

Sexual Harassment and Sexual Violence

UCR Riverside (UCR) is committed to fostering an environment where all UCR students can work and learn in an atmosphere that is inclusive, safe, rewarding, and free of all forms of harassment, exploitation, or intimidation. Under the University of California's Policy on Sexual Harassment and Sexual Violence, sexual harassment, sexual offenses or acts of sexual violence including, sexual assault, domestic violence, dating violence and stalking are strictly prohibited. All students affiliated with UCR have a responsibility in preventing sexual harassment, sexual offenses or acts of sexual violence. The University will respond promptly to all reports of sexual harassment and sexual violence involving UCR students, and will take appropriate action to prevent, to correct, and discipline behavior that violates the campus' policy.

You are strongly encouraged to review and become familiar with UCR's Policies and Procedures for Responding to Reports of Sexual Harassment and Sexual Violence which are available through the Title IX/Sexual Harassment Office at titleix.ucr.edu.

The policy includes a definition of sexual harassment, sexual violence, dating violence, domestic violence, sexual assault, consent, incapacitation, and stalking. In addition, the policy provides clarification of the University's obligation for responding to reports of sexual harassment and sexual

54 / Policies and Regulations

violence. To learn more about the University's obligations go to titleix.ucr.edu, click on Violence Against Women Reauthorization Act (VAWA).

For information, assistance, to explore options for addressing sexual harassment and sexual violence, or to make a report contact:

Title IX/Sexual Harassment Office

Debbie Artis, Director/Title IX Compliance Officer

349 Surge Building

(951) 827-7070

Office Hours: 8:00 a.m. to 5:00 p.m.

For immediate assistance contact law enforcement:

UC Riverside Police Department 911 or (951) 827-5222

Additional resources on campus for information, assistance, or to make a report contact:

- Campus Health Center (951) 827-3031
- Harassment/Sexual Assault Resource Services Specialist (951) 827-6225
- Office of the Ombudsperson (951) 827-3213*
- Residence Life, Judicial (951) 827-5472
- Student Affairs Case Manager (951) 827-9354
- Student Conduct & Academic Integrity Programs (951) 827-4208
- Student Counseling Center (951) 827-5531
- Lesbian, Gay, Bisexual & Transgender Resource Center (951) 827-2267
- Women's Resource Center (951) 827-3337

*The Office of the Ombudsperson is an independent office and not affiliated with any department unit on campus.

Consistent with UCR's Principles of Community, sexual harassment and sexual violence education prevention presentations and workshops are available to all students, including but not limited to, new incoming students, transfer students, Student Organizations and Clubs, and Student Athletes, to educate about prohibited conduct, the problems associated with harassment and sexual violence, and how to address and report complaints. For information about education prevention programs, contact the Title IX/Sexual Harassment Office at (951) 827-7070.

Speech and Assembly

Campus policies and procedures governing use of "free speech" on campus and conduct at "speakers and other public events" are available in the Vice Chancellor, Student Affairs office.

Student Grievances

The Non-academic Student Grievance Procedures are available in the Vice Chancellor, Student Affairs office.

Substance Abuse

UCR is committed to achieving and maintaining a campus community that fosters personal and institutional excellence and strives to provide conditions under which the work of the university can go forward freely, with the highest standards of quality and institutional integrity. In keeping with this commitment, each student should help to create a campus community that is free from the problems of substance abuse and dependency.

The Official Notice to Students Regarding Substance Abuse in University Campus Communities is issued pursuant to the requirements of Subpart B, Section 86.100 of the federal Drug-Free Schools and Communities Act of 1989. Students found to be in violation may be disciplined. Discipline can vary in severity from warning to expulsion from the University of California.

The text of the Official Notice along with Legal Sanctions Pertaining to the Use of Alcohol and Controlled Substances (a list of applicable federal and state laws) can be obtained from the Vice Chancellor, Student Affairs office.

Undergraduate Studies

Goals of an Undergraduate Education

The faculty of UCR hereby declare the following set of general educational goals to be pursued through our individual and collective efforts in teaching and guiding the undergraduates of this campus.

A university education must help students realize their potential as individuals and contributing participants in society. This involves the acquisition of knowledge and skills, as well as preparation for future responsibilities.

A general education provides a framework that enables one to appreciate and critically examine the significant aspects of civilization. This framework is derived from the study of world history; political and economic systems; the ethnic, cultural, and religious diversity of the peoples of the Earth; the arts and letters of all cultures; the social and natural sciences; and technology. Such a broad education is the foundation for concentrated studies that enable students to prepare for careers and to strive for an understanding of the world in which they live and about which they must make decisions.

A university education nurtures the critical skills of oral and written communication, including the exercise of these skills in a language other than one's own. It must teach students to become verbally and quantitatively literate, to analyze and synthesize, and to regard the acquisition of knowledge as a lifetime activity. A university education must promote tolerance of the opinions of others and an understanding of the mutual dependence of human beings on each other and on their natural environment. The student's university years also provide an opportunity to develop integrity, self-esteem, self-discipline, style, humanness, commitment to the general welfare, sensitivity to the interplay of environment and technology, and confidence that the human drama is worthy of a lengthy future.

UCR has three undergraduate colleges and one undergraduate school that offer bachelor's degrees: Humanities, Arts, and Social Sciences; Natural and Agricultural Sciences; Engineering, and Business Administration.

Requirements for the Bachelor's Degree

Requirements for the bachelor's degree vary according to the college and major selected. There are three kinds of requirements: general university, college, and major.

1. General University requirements

- Entry-Level Writing
- American History and Institutions Unit
- Scholarship
- Residence

2. College breadth requirements

- English Composition
- Humanities
- Social Sciences
- Ethnicity
- Foreign Language
- Natural Sciences and Mathematics
- Additional Courses

3. Major requirements

- Lower-Division or Core Courses
- Upper-Division Courses

Students should plan a program of study carefully and consult an academic advisor. Students are responsible for meeting all requirements for graduation.

General University Requirements

General university requirements are university-wide requirements that all undergraduates must satisfy. The following regulations and requirements are applicable to all undergraduate students on the Riverside campus.

University of California Entry-Level Writing Requirement

All university faculty assume that students are proficient in reading and writing English, and that they understand how to compose an essay on an academic topic. For this reason, students are asked to provide proof of their writing ability on entering the university.

Completion of the UC Entry Level Writing Requirement is a prerequisite to ENGL 001A. The UC Entry Level Writing Requirement may be completed after enrollment in the university by passing an Entry Level Writing Requirement course as directed by the University Writing Program (see below). It may be completed before enrollment in any one of the following ways:

1. Receiving a score of 680 or above on the SAT II: Writing Subject Test of the College Board.
2. Achieving a score of 30 on the ACT Combined English/Writing test or a score of 680 or higher on the SAT Reasoning test (Writing section).
3. Receiving a score of 3, 4, or 5 on the College Board Advanced Placement Test in English (Language and Composition or English Literature and Composition). In addition to fulfilling the UC Entry-Level Writing Requirement, a score of 3 satisfies the ENGL 001A requirement; a score of 4 or 5 satisfies the ENGL 001A and ENGL 001B requirements.
4. Receiving a score of 5, 6, or 7 on the International Baccalaureate Higher Level Examination in English (Language A only).
5. Completion with a grade of "C" or better of a 4 quarter unit or 3 semester unit college-level course in English composition, taken at another institution before the student enters the university and judged acceptable by the Office of Undergraduate Admissions.
6. Receiving a passing grade on the UC Analytical Writing Placement Exam administered by the UC System.

All freshmen from California high schools who have not met the UC Entry Level Writing Requirement and who are entering in the fall quarter must take the UC Analytical Writing Placement Exam to be administered throughout the state. The examination is normally given the second Saturday in May.

Early in April, students who have not passed the Entry Level Writing Requirement will receive an email or letter directing them to the test center at which they must take the AWPE.

Out-of-state students and students admitted after the test notification date will take the examination on campus. For more information, see ucop.edu/elwr.

Students also have an opportunity to pass the requirement in UCR's summer sessions by passing ENGL 004 or ENGL 005 before they become full-time students in the fall. They can also take a pre-ENGL 001A class during the summer at a local college or university before they become full-time students at UCR. Students taking summer courses not at UCR can then retake the UC Analytical Writing Placement Exam at UCR at the end of the summer.

Students who have not met the requirement upon entrance to UCR are placed into one of the following UCR courses of instruction. Placement in these courses is determined by the Director of the University Writing Program and is based on the student's performance on the UC Analytical Writing Placement Exam.

1. BSWT 003 (an ESL course preparatory to ENGL 004)
2. ENGL 004
3. ENGL 005
4. A qualifier course plus ENGL 006D

To pass the Entry-Level Writing Requirement (once enrolled as full-time students), students must earn a course grade of “C” (2.0) or better in ENGL 004, ENGL 005, ENGL 01PA, or earn a course grade of “C” (2.0) or better in a qualifier course approved by the University Writing Program and the Academic Senate.

According to systemwide regulations, any student who has not satisfied the Entry-Level Writing Requirement after three quarters of university residence (three quarters of enrollment during the regular academic year) is not normally eligible to enroll for a fourth quarter at the University of California. (For students placed in BSWT 003, this three-quarter residence rule begins after satisfactory completion of BSWT 003 or at the start of their fourth quarter of regular enrollment at UCR, whichever comes first.) Students are encouraged to complete the requirement as soon as possible in their freshman year.

American History and Institutions

Candidates for a bachelor’s degree must satisfy the requirement in American History and Institutions by demonstrating a knowledge of American history and of American political institutions and ideals. The requirement may be satisfied by satisfactory completion of any one of the following:

1. One (1) high school unit in American History, or 1/2 high school unit in American History and 1/2 high school unit in civics or American Government
2. The requirement in a junior college or other accredited institution
3. One college course in the field of American History or one college course in the field of American Government. UCR courses that fulfill this requirement are HIST 017A or 017B, POSC 010, POSC 100, and POSC 113

Students applying for one of the teacher credential programs should check with the Graduate School of Education concerning limitations on ways of meeting this requirement.

Further information regarding the requirement and how to meet it by examination may be obtained from the chair of the Committee on Preparatory Education.

Unit Requirement

A minimum of 180 units of academic work with a grade point average of 2.00 in all courses undertaken in the UC is required for graduation.

Not more than 6 units of physical education activities courses, no 400 series course, and not more than three courses in the 300 series may be counted toward the 180 unit requirement.

Scholarship Requirement

To receive a bachelor’s degree, students must obtain twice as many grade points as units (2.00 grade point) for all courses attempted in the university. An exception to this rule is made for those students undertaking certain honors courses.

Residence Requirement

The minimum residence at the UC required for a degree is three quarters. One of the three quarters may be completed in a UCR summer session in which the student carries 12 units, unless a reduced load is approved in advance by the dean of the student’s college.

Courses completed in UC Extension are not considered work in residence, even if taken through concurrent enrollment.

Thirty-five (35) of the final 45 units must be earned in residence in the student’s college (this does not preclude the student from taking courses in other colleges on campus). For students who are enrolled in the Education Abroad Program, UC Washington, D.C. program, or UC Sacramento Program, 35 of the final 90 units, including the final 12

units, must be earned in residence. Eighteen (18) of the 35 units may be completed in summer session courses on the Riverside campus.

With the approval of the dean of a student’s college or school, a candidate for the bachelor’s degree who was in active service in the armed forces of the United States in the year preceding the awarding of the degree may be recommended for the degree after only one quarter of university residence in which the candidate completes at least 16 units or passes a comprehensive examination in the major or field of concentration.

College Breadth Requirements

Each college has established additional requirements for a degree. The requirements of the colleges at Riverside are designed to stimulate an interest in areas of knowledge not necessarily related to a student’s major field. Students should note that they consist of a certain number of units and courses covering a variety of fields. Although these requirements determine a large and important part of the four-year curriculum, there are opportunities for students in all departments to do special, independent work.

The main objective of the colleges on the Riverside campus is to provide a setting within which students may develop those qualities of mind and character necessary to intellectual advancement and to useful membership in society. The major areas of human knowledge form the substance of the colleges on the Riverside campus: the College of Humanities, Arts, and Social Sciences; the College of Natural and Agricultural Sciences; The Marlan and Rosemary Bourns College of Engineering; and The School of Business Administration. The breadth requirements for the colleges are similar; however, refer to each college’s section for a detailed discussion of its requirements.

An alternative system of General Education Concentrations is available to most UCR undergraduates. Should a student choose to follow a concentration, he or she will follow a series of courses, at both the lower and upper division, chosen by faculty to represent an interdisciplinary approach to a specific topic. The concentrations are structured to give students, in addition to basic reasoning, writing, and computation skills, working knowledge of a field, analogous to an academic minor, which will complement their work in their major field. Pilot concentrations include “California” and “Climate Change/Sustainability.” Details about these concentrations can be found under the College Breadth Requirements for the College of Humanities, Arts, and Social Sciences and The School of Business Administration.

Courses taken in a student’s major discipline (including courses cross-listed with the major discipline) may not be applied toward satisfaction of the Humanities, Social Sciences, Ethnicity, or the Natural Sciences and Mathematics requirements except for Biology majors in connection with the Biological Sciences requirement, English majors in connection with the English Composition requirement, History majors in connection with the World History requirement, Ethnic Studies majors in connection with the Ethnicity requirement, Foreign Language majors in connection with language requirements, and students permitted by their college to take a Senate-approved alternative to English 1C in order to satisfy the third-quarter writing requirement. However, courses outside the major discipline, but required for the major, may be applied toward satisfaction of these requirements. Students are urged to make sure that they understand which courses are permitted to satisfy more than one requirement. Information on specific degree requirements and courses is available in the academic advising office in each college.

Placement exams may be required before a student takes courses in certain subjects, such as mathematics and foreign languages. The placement exam may be taken only once in each subject during a student’s UCR career. For foreign languages, a sufficiently high score on the UCR placement exam can fulfill the Foreign Language requirement.

For details about the UC policy on intercampus reciprocity of breadth requirements and the UC policy on the Intersegmental General Education Transfer Curriculum, see below.

Intercampus Reciprocity Policy Regarding Breadth/General Education Requirements

Students who transfer from one UC campus to another and who have completed the Breadth/General Education (B/GE) requirements of the

campus from which they have transferred (except for upper-division B/GE requirements) will be considered to have met the B/GE requirements of the campus to which they transfer.

Courses taken for B/GE requirements at the campus from which they transfer will be accepted toward the appropriate B/GE requirements of the campus to which they transfer.

Intersegmental General Education Transfer Curriculum (IGETC) Policy

The Intersegmental General Education Transfer Curriculum (IGETC) is a series of courses offered in the California community colleges that transfer students may complete as a way to satisfy the lower-division breadth/general education requirements at the UC or the California State University. The IGETC program is administered through the California community college system. Completion of the IGETC must be certified by a community college counselor and submitted to UCR with the student's final transcript before the first term of enrollment.

The IGETC is accepted for students pursuing majors in the College of Humanities, Arts, and Social Sciences and The School of Business Administration, as extensive major preparation is not required at the lower-division level. All students should ensure that the CHASS Student Academic Affairs office or the Undergraduate Business Programs Office have received the certified IGETC during their first quarter of UCR attendance.

The College of Natural and Agricultural Sciences does not accept IGETC, although courses taken to satisfy IGETC may be applied toward the college's breadth pattern. Although the Bourns College of Engineering (BCOE) accepts completion of IGETC as satisfying the majority of the college's breadth requirements for transfer students, some additional breadth coursework may be required after enrollment at Bourns. For more information on BCOE breadth requirements, go to student.engr.ucr.edu/policies/requirements/breadth.html. Prospective applicants are strongly encouraged to focus on preparatory course work for their desired major, such as mathematics, science, and other technical preparatory course work, rather than on IGETC completion. (Strong technical preparation is essential for success in the admissions process, and subsequently, in all coursework at Bourns.) For more information, go to engr.ucr.edu/undergrads/transferring.

Major Requirements

A major is a coordinated group of upper-division courses giving depth to a student's work in a chosen area. A list of degrees offered and possibilities for establishing individual majors are described in each college section below. Degrees are also listed in the front of the catalog. A student should choose a major not later than the beginning of the junior year. However, a choice of major before that time facilitates program planning in most academic fields.

The departmental major represents advanced and relatively specialized work in one of the academic disciplines in the college. The interdepartmental or nondepartmental major is broader in scope and usually based upon two or more disciplines. The individual major is designed for the student who has an unusual but definite academic interest for which no suitable major is offered.

Major requirements are described in detail in the Programs and Courses section of this catalog under the department or program offering the major.

The responsibility for fulfillment of all degree requirements — general university, college, and major — rests with the student. Students are urged, however, to seek program counseling with appropriate advisors.

Assignment to a major or to the undeclared category (open to freshman and sophomore students) is based on the student's choice indicated on the Application for Admission. The student should enroll in accordance with this choice; changes may be made following course enrollment.

Change of Major

Students may transfer from one major to another, elect a double major within their college, or add a second major in another college by filing a declaration with the dean of the colleges concerned.

Graduate Studies

Graduate students at UCR are an essential part of the university's distinguished research teams and full partners in the undergraduate teaching mission of the faculty. Founded as a research institution in 1907, Riverside is the oldest of the UC's southern campuses. UCR combines the intellectual and material resources of the UC system with a uniquely intimate research environment, fostering a type of frequent and high-powered faculty-student contact unavailable at other universities.

Graduate degrees at UCR are research degrees, certifying that students are trained in the techniques of independent inquiry and have demonstrated the capacity to make unique contributions to their fields. Occupying a distinctive niche in disciplines ranging from chemistry to dance history, nematology to economics, UCR offers graduate programs leading to the degrees of doctor of philosophy, master of arts, master of education, master of fine arts, master of science, and master of business administration.

Administration

Campus policies concerning graduate education are set by the Graduate Council, a committee of the Academic Senate, and carried out by the Graduate Division staff under the direction of the Graduate Dean.

In addition, each program has a graduate advisor appointed by the Graduate Dean. Advisors assist students in program planning and completing degree requirements and write a yearly evaluation of each student's progress toward the degree. Students should make an effort to confer regularly with their graduate advisor.

Graduate Student Association

All graduate students are members of the Graduate Student Association (GSA), which seeks to represent their views and promote their interests with the faculty and administration, both at the campus level and universitywide. For a more detailed description of GSA activities and services, call (951) 827-3740. Further information can also be found under Graduate Student Association in the Services for Students section of this catalog, or e-mail gsaucr@ucr.edu.

Application and Admission

The admission process has as its prime objective the selection of those students most likely to complete their chosen graduate programs with distinction. After consultation between the program and the Graduate Division, the final authority to admit rests with the Graduate Dean.

Applicants are initially reviewed and rated based on their undergraduate and, where appropriate, postbaccalaureate GPAs. The minimum requirement for admission to graduate status is the bachelor's degree or its academic equivalent from an accredited institution. However, the evaluation process is intended to be flexible, and programs take a variety of other factors into consideration when making their admissions recommendations, including GRE or other test scores, GPA in the major subject, letters of recommendation, and the reputation of the degree-granting program or institution.

Soon after the program forwards its recommendation to the Graduate Division, the applicant is notified in writing of the dean's decision. If admission is offered with work still in progress, official transcripts reflecting the satisfactory completion of this work and the awarding of the degree (where appropriate) must be submitted as soon as possible. An offer of admission is valid for a specific quarter only. Accepted students who wish to be admitted for a subsequent quarter must reapply and, if additional course work has been completed, submit updated transcripts.

Applicants should apply at graduate.ucr.edu.

Campus-wide application deadlines for domestic students are September 1 for the fall quarter, November 15 for the winter quarter, and March 1 for the spring quarter.

¹ Applications are not accepted from students wishing to work toward the master's degree only.

² A combined B.S. + M.S. program is offered in this discipline (designed to lead to a B.S. degree as well as an M.S. degree in five years.)

The deadline for students seeking fellowship awards, teaching or research assistantships, and other merit-based forms of support is January 5. These deadlines may vary somewhat by program, so applicants should not hesitate to contact programs directly for additional information. Please refer to *International Student Admissions* for information about international student deadlines.

A nonrefundable application fee must be submitted at the time of application:

Domestic application fee (US citizens and US permanent residents):

\$80 all programs (except M.B.A., M.Fin. & M.P.Ac.)

\$100 M.B.A., Flex M.B.A., M.Fin. & M.P.Ac.

International application fee (non-immigrant):

\$100 all programs (except M.B.A., M.Fin. & M.P.Ac.)

\$125 M.B.A., Flex M.B.A., M.Fin. & M.P.Ac.

The following must also be submitted:

1. Official transcripts from each college or university attended since high school
2. Three letters of recommendation
3. Graduate Record Examination (GRE) general test score is required by most programs

Some programs also require the appropriate GRE subject test. GRE scores are not required for the teacher education credential programs or the MFA programs in Creative Writing & Writing for the Performing Arts, Experimental Choreography, and Visual Art. The M.B.A., M.Fin., M.P.Ac. & Ph.D. in management programs accept either the Graduate Management Admission Test (GMAT) or the GRE. Test scores should not be older than five years.

Domestic applicants whose first language is not English and who have not earned an advanced degree at an institution where English is the exclusive language of instruction must provide proof of English proficiency. Please see complete information below under *International Student Admission*.

International Student Admissions

International students follow the same procedures and are governed by the same regulations as domestic applicants with the following exceptions.

Applicants whose first language is not English and who have not earned an advanced degree at an institution where English is the exclusive language of instruction must submit scores from the *Test of English as a Foreign Language (TOEFL)*. This exam is administered by the Educational Testing Service and offered in nearly every country abroad. The minimum acceptable scores are: 550 for the written exam; 213 for the computer-based exam, and 80 for the internet-based exam (iBT). Applicants should arrange to take the examination in their home country by contacting the following:

Educational Testing Service
P.O. Box 6151
Princeton, NJ 08540-6151
ets.org

The TOEFL must be taken no more than two years prior to the intended quarter of enrollment.

Applicants may submit scores from the Academic Module of the *International English Language Testing System (IELTS)*. This exam also must be taken no more than two years prior to the intended quarter of enrollment at UCR. The minimum acceptable score is an overall bandscore of 7 with no score less than 6 on any individual component. Please request an official Test Report Form (TRF) from the test center where the test was taken.

International students must also complete a financial statement (provided on the application). The university will be unable to issue a Certificate of Eligibility (I-20 or DS2019) without evidence of the applicant's ability to pay all fees and expenses for the duration of the program of study.

Application deadlines for international students are May 1 (January 5 for admission with fellowship support) for the fall quarter, July 1 for the winter quarter, and October 1 for the spring quarter. These deadlines may vary somewhat by program, so applicants should not hesitate to contact programs directly.

The International Student Resource Center specializes in providing information and a broad range of services to international students and can be contacted at (951) 827-4113.

Reapplication

Students who have not maintained continuous enrollment or been approved for a leave of absence will lose their student status and will have to reapply to the University to continue in their degree programs. They should follow the same process as new students to apply for readmission. The Graduate Division will retain a student's file for five years. Students applying for readmission within that five year period will not have to provide the University with new transcripts if they have not enrolled elsewhere but may need to provide a new statement of purpose and letters of recommendation. Students who have been gone over five years must order transcripts from all former institutions attended.

Students will be held to the new catalog requirements at the time of readmission and will lose their candidacy when they fail to maintain continuous enrollment unless the Graduate Dean approves an exception. Students may return on filing fee status to graduate if they have not used it before and the Dean approves an exception and allows them to reenter under their original catalog requirements and approves their continued advancement to candidacy.

Teaching Credential Programs

Prospective applicants to teaching credential programs should contact the Graduate School of Education, (951) 827-5225 for admission information and application materials or see Graduate School of Education later in this catalog.

Degrees and Programs

The minimum requirements for master's and doctor of philosophy degrees are outlined below. Individual program requirements are described in the Programs and Courses section of this catalog.

Foreign Language Requirement

Each program determines what, if any, knowledge of a foreign language or languages should be required of students pursuing graduate degrees. Proficiency in a foreign language may be demonstrated by (1) passing a written examination administered by the department or program or (2) successfully completing a course or courses specified by the program. With the support of the program and the approval of the graduate dean, students may receive credit for foreign language examinations or course work completed not more than four years before being admitted to graduate study at UCR.

Professional Development Requirement

Professional development training is a requirement of all M.A., M.S., M.F.A., and Ph.D. programs. Training typically includes elements of research and professional ethics, grant and professional writing, strategies for success in graduate school and the profession, pedagogy, public speaking, career and job market guidance, and other relevant topics to help students become successful professionals. Each program determines the format, content, and extent of its training in order to make it specific to, and appropriate for, the discipline. A program may provide all of its training independently, or it may partner with other programs, or utilize services provided by other campus units or professional organizations.

Training must be for unit credit and may be delivered as a single course or as portions of multiple courses.

Standards of Scholarship

Only courses in which grades of "A," "B," "C," or "S" are received may be counted toward satisfying graduate degree requirements. To continue in good standing and obtain an advanced degree, students must maintain a minimum GPA of 3.00 in all upper division and graduate level courses related to the degree. In addition, students must demonstrate acceptable progress toward their degree objectives. This entails the acceptable completion of all course work and other degree requirements in a timely fashion. Students are considered to be making unacceptable progress and become subject to dismissal when

- they have 12 or more units of “I” grades outstanding;
- the overall GPA falls below 3.00;
- the quarterly GPA falls below 3.00 for two consecutive quarters;
- they fail to fulfill program requirements such as exams or research in a timely and satisfactory manner;
- they have not completed their programs within one year after reaching the normative time; or
- they fail to pass comprehensive or qualifying examinations in two attempts;
- they fail to make progress in research for two consecutive quarters

Satisfactory/No Credit (S/NC) Grading

Graduate students may take course work on an S/NC basis only when the course description indicates that this is an option. Students who wish to enroll in undergraduate courses on an S/NC basis may petition the Dean. The Graduate Advisor must certify that these courses are not in the student’s major or program of study and these course work cannot be used for graduation. A grade of S is equivalent to a grade of B (3.0) or better but does not count towards the student’s grade point average. No credit is given for a course in which a grade of NC is assigned.

Repeating Courses

A graduate student may repeat only those courses in which a grade of D, F or NC was received. Repetition of a course more than once requires the Dean’s approval. Only the most recently earned grade is used in computing the student’s grade point average.

Incomplete Grades

Most commonly, professors will grant an Incomplete if students were unable to take the final examination or finish a paper at the required time due to illness or other unavoidable problems that can be verified, providing the student’s work in the course was of passing quality. In order to remove the “I”, students must complete the work required during the next academic quarter (whether in attendance or not)—professors will then report the grade to the Registrar on a Grade Change Form. Incompletes cannot be removed by enrolling in the course during the following quarter. Make arrangements with your instructor on how to replace the “I” for a grade. The “I” will automatically revert to an “F” (or NC) after one quarter. PhD students cannot graduate with an “I” grade on their record. Master’s students can only graduate with an “I” if they do not need the course for the degree and are continuing in the PhD program.

Changing Grades

Grades are final at the end of each quarter. If you discover a clerical or procedural error was made in the posting of your grade, contact the instructor immediately and request a revision. This type of revision can be made only if: 1) the basis for the change is found in work which you submitted as part of the regular assignments during the quarter; 2) the change is not the result of re-examination (unless your initial grade was Incomplete); 3) the change does not involve a change in the grading basis (from S/NC to letter grade or the reverse). Only the instructor can change a grade.

Appeal of Grades

The Regulations of the Riverside Division of the Academic Senate state that if a student believes that non-academic criteria have been used in determining a grade, the student shall attempt to resolve the grievance with the instructor of the course through written appeal to the instructor via the chair of the department. If the grievance is not resolved to the student’s satisfaction at the departmental level, the student may file a complaint with the Dean of the Graduate Division. The complaint should be filed immediately after the alleged use of non-academic criteria but no later than six weeks after the beginning of the subsequent quarter. Non-academic criteria are criteria not directly reflective of class performance, such as discrimination on political grounds or for reasons of race, religion, sex, or ethnic origin or for other arbitrary or personal reasons.

Other Appeals

The procedures for appealing adverse outcomes on qualifying exams, dismissal from graduate standing, placement on probationary status, denial of readmission to the same program (if the student was previously in good standing), disputes over joint authorship of research in accordance with joint authorship policies of campus departments or units, revocation of campus fellowships, and other administrative or academic decisions that terminate or otherwise impede progress toward academic or professional degree goals can be found at graduate.ucr.edu/academic_affairs.html

Exams

Only two attempts at major exams are allowed unless the program has special approval from the Graduate Council for additional attempts.

Minimum Degree Requirements

Master’s Degree

The minimum required period of residence in the University is one academic year (3 quarters) of which two quarters must normally be spent at the University of California, Riverside. A candidate for a higher degree is regarded as a student in residence in a regular term only if he/she is actually enrolled in at least four units of upper division and/or graduate work; or, in a ten-week summer session at least four units.

The master’s degree can generally be earned in one of two ways: by writing a thesis or by passing a comprehensive examination. Some programs offer only one of these options.

Both plans require a minimum of 36 quarter units of graduate (200 level) or upper-division (100 level) undergraduate work in the major subject or some other subject deemed relevant by the program faculty. Many programs have additional requirements. Courses at the 300 and 400 level do not count towards this minimum requirement.

Unless otherwise stated in the program description, the normative time required to complete the master’s degree is two years.

Plan I (Thesis) requires that at least 24 units be in graduate (200) level courses taken at a University of California campus (see residency requirements). Of these, only 12 may be in graduate research for the thesis and, in most cases, none may be in courses numbered 291 (exam preparation). Students are guided by a committee of three faculty who must be approved by the Graduate Dean. In addition to requiring an acceptable thesis, the department may require any examination that it feels necessary to confirm that the student has an appropriate knowledge of the discipline. Once completed the thesis must adhere to University standards and be filed in the Graduate Division electronically.

Plan II (Comprehensive Examination) requires that at least 18 units be in graduate (200) level courses taken at a University of California campus (see residency requirements). None of these may be in graduate research for the thesis or, in most cases, in courses numbered 291 (exam preparation). Students must take a comprehensive examination, the content of which is determined by the department or program. No more than two attempts to pass the exam are allowed.

Master’s students in residence and in good standing may earn course credit by examination. Consult the departmental graduate advisor for further details.

Advancement to Candidacy in Master’s Program

Students must file for advancement to candidacy no later than the first week of the quarter in which they expect to receive their degree. Some degree requirements may be in progress at that time. The forms for advancement to candidacy are obtained from graduate.ucr.edu/advancement.html and filed in the Graduate Division after obtaining the graduate advisor’s approval. In the event of some unexpected delay, students have up to one year from the completion date of all course requirements to complete their remaining academic requirements. Students must complete all requirements for the degree by the last day of the quarter in which they intend to graduate. Students cannot graduate

with an Incomplete grade unless they are continuing in a PhD program. Students may not graduate with a GD grade outstanding. Students must be enrolled or on filing fee status to complete degree requirements. If they were enrolled (or on filing fee status) every quarter of the previous academic year then they may complete during the summer without paying fees.

Duplication of Degree

Permission to work for a second master's degree may be approved when there is little relation in content between the two degrees. Duplication of a master's degree in a single field is allowable only with permission of the Graduate Dean.

Pursuit of a second doctorate is not permitted for currently enrolled graduate students. It is rarely permitted for students when they first apply to the University. For the Graduate Dean to consider such an exception it must be in a fundamentally unrelated area and there will be no duplication or waiving of coursework if approved.

Continuing from the Master's to the Doctorate

Students who are enrolled in a master's program may petition to pursue the doctorate in their field of study. To do so, they should file a Change in Degree Objective Form with the Graduate Division while they are enrolled. Approval by the department is not automatic; the department determines whether or not each student has the academic potential to succeed in its Ph.D. program. This requirement for evaluating each student's potential and academic fitness to proceed toward the Ph.D. is enforced regardless of the student's initial degree objective at matriculation.

Doctoral Degree

The minimum academic residence for the Ph.D. is six quarters at the University of California, three of which must be spent in continuous residence at UCR. The normative time required for the Ph.D. varies considerably and is given at the end of each program's description in the Programs and Courses section of this catalog. For the doctoral degree, normative time is defined as the period of full-time registration required to earn the degree. For most UCR programs, this is between five and seven years.

The doctorate, the highest degree the university can bestow, is a research degree, conferred on the recommendation of a doctoral committee, which is nominated in consultation with the student by the program faculty and confirmed by the Graduate Dean.

Because the Ph.D. is a research degree, the university gives programs considerable latitude in establishing degree requirements. The individual student's program of study is planned in consultation with the graduate advisor, who supervises the student's progress prior to the appointment of the doctoral committee.

A doctoral program generally involves two stages. The first stage is spent fulfilling the requirements established by the program or department and the Graduate Council, typically a series of courses culminating in written and oral qualifying examinations. When these are passed, the student is advanced to candidacy for the Ph.D.

The second, or in-candidacy stage, is devoted primarily to independent study and research and to the preparation of the dissertation. The doctoral dissertation must be an original work of research in the candidate's chosen field of specialization. The doctoral committee determines the acceptability of the dissertation and may require that the student defend its contents in a final oral examination.

Candidate in Philosophy

A Ph.D. student who is advanced to candidacy and has to leave UCR without a degree may apply for the Candidate in Philosophy. This is awarded only to students leaving UCR without a master's or doctoral degree.

Designated Emphases

All graduate students admitted to a Ph.D. program may participate in a Designated Emphasis (D.E.), a specialization that might include a new method of inquiry or an important field of application related to two or more existing Ph.D. programs. The Designated Emphasis is awarded in conjunction with the Ph.D. degree and is signified by a transcript designation. Graduate students who have completed a Designated Emphasis may be

more competitive candidates for positions in their primary disciplines. We have Designated Emphases in Book, Archive, and Manuscript Studies; Latin American and Latino Studies; Middle East and Islamic Studies; and Science Fiction and Technoculture Studies.

Special Programs

Teaching Assistant Development Program

UCR has a long history as a distinguished teaching campus and regards teaching assistant (TA) training as a crucial part of graduate instruction. The Teaching Assistant Development Program (TADP) sponsors activities designed to help TAs develop their teaching skills and prepare them to be successful professors. Activities include a fall orientation program, end-of-term student evaluations, annual awards for outstanding TAs, International TA support and a mentor program, in which TAs of proven ability have the opportunity to mentor their less experienced colleagues. The University Teaching Certificate (UTC), a certificate program in advanced university-level pedagogy, is also housed in TADP.

GradSuccess

GradSuccess (graduate.ucr.edu/success) provides a variety of services to meet the needs of UCR's diverse graduate student population. Housed in Graduate Division, GradSuccess offers programs, workshops, seminars, and consultations by appointment and drop-in. GradSuccess supports graduate students at every stage of their study and is concerned with helping students become successful professionals. GradSuccess is comprised of the Graduate Student Resource Center (gsrc.ucr.edu); the Teaching Assistant Development Program (tadp.ucr.edu); the University Teaching Certificate Program (utc.ucr.edu); the International TA support program (eldp.ucr.edu); the Graduate Student Mentorship Program (gradmentors.ucr.edu); and the Graduate Writing Center (gwrc.ucr.edu).

Intercampus Exchange

The Intercampus Exchange Program (ICE) allows students to study for up to three quarters at another UC campus. To be eligible, students must be in good standing with at least one quarter in residence at UCR and demonstrate at least one of the following: the need to take a course or courses not offered at UCR, the need to study with a particular individual, or the need for continuous access to library holdings or other facilities not available at UCR.

Education Abroad

The Education Abroad Program (EAP) provides students with the opportunity to study abroad at one of several study centers. To be eligible, students should have completed one year of graduate study, be making acceptable progress toward the degree, and know the language of the host country. Applications and information can be obtained from the International Student Resource Center (ISRC). Additional information can also be found in the Education Abroad Program sections of this catalog.

Fees and Financial Support

See Fees and Expenses under the Finances and Registration section of this catalog for a list of estimated expenses and a schedule of mandatory quarterly fees. Deadlines for paying fees are published quarterly at registrar.ucr.edu.

Graduate students serving as teaching assistants or graduate student researchers (GSRs) who are appointed at 25 percent time (10 hours per week) or more qualify for a remission of the student services fee and tuition. Nonresident supplemental tuition is paid for nonresident GSRs who are appointed 45 percent time or more for an academic term, are not receiving any other form of support which pays the nonresident tuition, and who meet the eligibility requirements for the GSR title. Students should check with their departments for further information on these fee remissions.

All students who are considered nonresidents for tuition purposes and are advanced to candidacy for the Ph.D. on or before the first day of instruction will receive a reduction of 100 percent of the nonresident supplemental tuition. Each student is eligible for this reduced nonresident supplemental tuition rate a maximum of three calendar years. Time spent

not registered (withdrawn, on leave, or filing fee status) will count toward the three-year total unless the Graduate Dean grants an exception. A student must be advanced by the first day of instruction to qualify for that term.

All graduate students are assessed a quarterly fee for a health insurance policy providing year-round and worldwide coverage (Graduate Student Health Insurance Plan–GSHIP). This insurance is designed to supplement outpatient care available to students through the Student Health Services. This premium is paid for all teaching assistants, graduate student researchers, and readers/tutors employed 25 percent time or more. Students who can demonstrate to the Student Health Services that they have comparable insurance from another source may obtain an exemption from the GSHIP premium. Students awarded the exemption have the GSHIP fee removed from their bill but do not receive any monetary compensation. Deadlines for applying for the exemption are firm.

Information regarding GSHIP benefits, claims, comparable coverage exemptions, and optional dependent coverage can be obtained from the Health Insurance Coordinator, Student Health Services (951) 827-5683. More information about GSHIP remissions for teaching assistants and graduate student researchers is available from the Graduate Division, or a student's academic program.

Students who have not established legal residency in California must pay nonresident supplemental tuition. Regulations governing the determination of California residency are outlined in the Finances and Registration section of this catalog. All students will be assessed this fee until they are declared a resident by the Registrar's Office. Even those who were undergraduates at UCR must complete these forms.

The **Deferred Payment Plan** offers students an opportunity to pay their fees in three monthly installments. An application and fee must be submitted by the deadline set by the Student Business Services office. Students must apply each quarter and may apply through their GROWL accounts.

Career Employees (Reduced Fee Program)

A student who is a career employee of the University may be eligible for a two-thirds reduction in fees through the Employee Reduced Fee Program. Contact the Benefits Office for more information (hr.ucr.edu/education/benefits.html). Because employees already have health insurance they should contact the Student Health Services about obtaining an exemption from GSHIP.

Fellowships

Fellowships are awarded on the basis of scholarly achievement and promise. Students apply to their prospective programs, which then nominate the most qualified applicants. Recipients must complete a full-time program of study or research each quarter, maintain a GPA of 3.00 or better, have no more than 7 units of "Incomplete" grades, be advanced to candidacy for the Ph.D. within 12 quarters after entry (unless the award letter specifies a different date), and be making acceptable progress toward their degrees. Fellowships are offered only to full-time students pursuing degrees. Full-time UCR employees, credential and non-degree objective students are not eligible for fellowships. Full-time UCR employees may apply for reduced fees (see above).

Fellowship holders may supplement their awards with employment, with the prior approval of the Graduate Dean. Supplementation levels vary with the type and amount of fellowship award.

Teaching and Research Assistantships

Graduate students may be employed by the university on a part-time basis (not to exceed 50 percent time, or 20 hours per week) during the academic year. Students who hold assistantships must register for and complete a full program of study or research and remain in good standing for the duration of their employment. Students are responsible for reviewing their course enrollment to ensure that they are enrolled in at least 12 units. They may not have more than 7 units of "Incomplete" grades and must be advanced to candidacy within 12 quarters after entry to the Ph.D. program. TAs are appointed through their departments and must maintain a GPA of 3.00 or better and be making acceptable progress toward their degree. Any student whose native language is not English must pass a test of spoken English (TOEFL-iBt or SPEAK test) before performing TA duties. No one may serve in teaching title codes (TA, Fellow, Associate In) for more than 18 quarters.

Graduate student researchers, GSRs, are appointed through their departments and can be paid on a full-time basis for up to three months during the summer. To be appointed to and retained as a GSR, students must maintain a GPA of 3.00 or better and be making acceptable progress toward the degree. GSR appointments are made through the department or program.

Loan Programs

Federal Direct Stafford Loans and Federal Direct Unsubsidized Stafford Loans are available to graduate students through the Financial Aid Office. Students should contact the Financial Aid Office or check financial.ucr.edu for a FAFSA if they want to be considered for these federal loan funds.

Research Grants

Dissertation Research Grants provide funds to doctoral candidates for research-related expenses associated with the dissertation. Applicants must be advanced to candidacy and plan to be registered during the period of the award. Proposals may be funded up to a maximum of \$1,000. Applications are available at graduate.ucr.edu/list_finaid.html.

The Master's Thesis Research Grant is for students enrolled in the Creative Writing and Writing for the Performing Arts, Experimental Choreography, Southeast Asian Studies, and Visual Art for the purposes of expenses directly related to thesis research. Applications are available at graduate.ucr.edu/list_finaid.html.

Graduate Student Association Conference Travel Grants help to meet the financial needs of students who have been invited to present scholarly papers or posters at regional and national professional conferences. The program, administered by the UCR Graduate Student Association, funds both conference attendees and presenters, with attendees reimbursed at one half the rate of presenters. The percentage of reimbursement is set monthly and is based on the volume of applications received.

Registration, Enrollment and Transfer of Credit

Continuous Registration

Unless a leave of absence has been granted, students must register for every academic quarter once their graduate studies begin. Students must either be registered or on filing fee status in the quarter in which the degree is awarded. If a student was enrolled or on filing fee status every quarter of the previous academic year, then they may complete their degree during the summer without paying fees.

Filing Fee Status

Students who have completed all degree requirements except for filing their dissertations/theses or sitting for their master's comprehensive examinations are eligible for filing fee status during the final quarter of residence. For students writing dissertations or theses, the student's committee must have read and approved a draft of the manuscript, with only minor revisions remaining.

Students on filing fee status pay only one-half of the student services fee. Because filing fee status is tied to that fee, it can vary from quarter to quarter. See registrar.ucr.edu for information on fees. Only one quarter on filing fee status is allowed, unless a student fails the master's comprehensive exam. Then a retake of the exam on filing fee status is allowed. Students who fail to complete their degree programs by the appropriate deadline while on filing fees status must register and pay full fees for the following quarter.

Leave of Absence

A leave of absence is intended to allow the temporary interruption of the student's academic program. Leaves are granted for the following reasons:

1. Serious illness or other temporary disability
2. The need to concentrate on a job or occupation not directly related to the degree program
3. Family responsibilities

To be eligible for a leave of absence, students must have the approval of their graduate advisors, be in good standing, and have been enrolled for at least one quarter. Leaves are not normally granted for more than one year.

Since students on leave do not pay fees, they may not use university facilities or make demands on faculty time. Students on leave are ineligible for fellowships, research grants, and financial aid. Appointment as a graduate student researcher or teaching assistant, or any other appointment requiring full-time enrollment, is not possible. Nor can students on leave take qualifying examinations or receive credit for academic work done during the leave period.

***In Absentia* Registration**

Students pursuing graduate study or research outside the state of California for an entire quarter may register *in absentia* and receive an 85 percent reduction in the student services fee and tuition. Refer to the Finances and Registration section of this catalog for a schedule of fees. *In absentia* registrants are normally advanced to candidacy for the doctorate; master's candidate are normally in the stage of researching the master's thesis.

Withdrawal

Students who withdraw during the first five weeks of a quarter are entitled to a partial refund of fees. The amount of the refund is determined by the number of calendar days elapsed between the first day of instruction and the date on which a withdrawal form is filed with the Graduate Division. See the Schedule of Refunds in the Finances and Registration section of this catalog. Students who have applied for the Deferred Payment Plan are considered registered students and are held to the same refund schedule.

Students who are unable to file the necessary paperwork due to illness or emergency should call the Graduate Division at (951) 827-3315.

Lapse of Candidacy

Candidacy for the degree may lapse after withdrawing or failing to register at the end of a leave of absence.

Enrollment

Each quarter, graduate students must pay their fees and enroll by the date indicated at registrar.ucr.edu. Course schedules require the prior approval of the departmental graduate advisor.

All graduate students are expected to carry a full academic course load unless good reasons exist for not doing so. Graduate students are

considered to be full time if they are carrying 12 graduate units. When a course program contains both graduate and undergraduate courses, the table on this page is used to calculate the appropriate course load.

Part-Time Study and Reduced Fees

The regulations regarding a reduction in fees for attending part-time is set by the Office of the President. It is only approved for students who cannot attend full-time for reasons of occupation (full-time employment outside the university), unusual family responsibilities, or poor health. Students may not be advanced to candidacy for the PhD and can only enroll in 6 units or less. Employees may not apply for this reduction in fees unless they do not meet the requirements of the Employee Reduced Fee Program. International students should be aware that federal regulations governing student visa status require full-time attendance. University financial aid is not available for students taking less than six units of course work. Eligibility for deferment of student loan repayment obligations may be in jeopardy as well. Students should consult the Student Business Office of the University where they incurred their debt for specific information.

The application must be submitted to the Graduate Division two weeks before fees are due unless students want to pay their full fees first. If full fees are paid first, a refund will be processed. In no event may the student turn in a petition after the third week of the quarter

12	+	0	=	Fulltime

Transfer of Credit

A maximum of 8 quarter units from institutions outside the University of California may be counted towards the master's degree at UCR. All transfer work must have been completed in graduate standing with a minimum grade of "B." Units cannot be transferred if the student earned a degree. These units may not be used to reduce the minimum number of graduate level units required (24 units required for the thesis plan and 18 units required for the comprehensive exam plan).

Department and Graduate Division approval must be obtained before these units can be accepted for credit. Units are transferred as "Satisfactory" (S) with no grade point value.

Since doctoral students do not have a strict unit requirement they do not need to transfer in units.

UCR undergraduates who have no more than two courses or 8 units of course work remaining in their bachelor's programs and who have been admitted to graduate status may begin course work for their advanced degrees at the beginning of the final quarter of undergraduate study. Transferring units from undergraduate status is called backdating and it requires that students inform their college offices before beginning course work and that they petition the Graduate Division for credit once they are enrolled as graduate students.

Students may apply summer sessions course work from any UC campus toward their graduate degree requirements if they have the prior approval of their departments and of the Graduate Dean.

Units from another UC campus may be used to satisfy one of the three quarters of the residence requirement and may be counted for up to one-half of the total units required for the UCR master's degree. Department and Graduate Division approval must be obtained before such units can be accepted for credit. Units cannot be transferred if the student has earned a degree from that campus.

In addition, students may transfer up to 8 units of concurrent enrollment credit. Concurrent enrollment means that a student took regularly scheduled UCR classes but was not an admitted student and paid for the class through UCR Extension. Students must have taken these units before their enrollment as graduate students. Matriculated graduate students (including students on leave of absence) may not enroll in course work through Extension without the Graduate Dean's approval. Graduate students who withdraw before completing their program objectives, then take courses through Extension are required to wait one year before applying courses to their degrees. Grades from UCR Extension courses will be recorded on student transcripts.

Waiving Course Work

All substitutions or waivers of degree requirements must be reviewed by the Graduate Adviser and approved by the Graduate Dean. Waiver of course work will not reduce the minimum number of units required for a master's degree.

Colleges and Academic Programs

College of Humanities, Arts, and Social Sciences

Student Academic Affairs
3400 Humanities and Social Sciences
University of California, Riverside
Riverside, CA 92521
(951) 827-3683; fax (951) 827-5836
chass.ucr.edu

The degree programs in the College of Humanities, Arts, and Social Sciences are designed to introduce students to both the breadth and depth of the university's curriculum. This is accomplished by combining a wide distribution of courses with the opportunity to concentrate on course work in depth in a selected field. To achieve the first goal, students are required to take a wide range of lower-division courses that explore the diversity of human knowledge. In the upper-division curriculum, students are relatively free to concentrate in depth in their major field of interest.

The Gateway to CHASS

Professor John Fischer, Philosophy, will lead 130 CHASS freshmen through the complexities of the CHASS Annual theme, Immortality, while introducing students to university life. Potential questions to ask are: What is death? Is death a bad thing for the individual who dies? Is there a soul, and is it immortal? Would it be desirable to live forever? How can we live in the face of our own death? Is suicide ever justified? This class will address such questions by introducing and explore diverse ways of defining and pursuing immortality in the world.

Students will enroll in Freshman Composition courses which will be linked to the CHASS theme. Together, the Gateway Lecture and the Composition classes will encourage students to explore a range of ideas through reading, writing and discussions while fulfilling college breadth requirements. Students will also have the opportunity to work with Peer Mentors who will help them negotiate the transition from high school to the university.

Majors

A major is a coordinated group of upper-division courses (courses numbered 100-199) in a field of specialization. The major may be a program of upper-division courses within a single department (departmental major), a group of related courses involving a number of departments (interdisciplinary major), or a group of courses chosen to meet a special interest (Humanities, Arts, and Social Sciences individual major).

Before enrolling in certain upper-division courses, students may be required to gain appropriate knowledge by completing specific prerequisite courses. With the assistance of a departmental advisor, students are expected to select lower-division courses that prepare them for the advanced studies they propose to follow.

Choosing a Major, Undeclared Majors

While freshmen may choose an academic major on entering UCR, those who are unsure about specific academic goals may request to be admitted to the college as undeclared. These students often take introductory courses in the natural sciences, social sciences, humanities, and fine arts while searching for an area that most excites their interest. Undeclared majors are encouraged to meet with an advisor in the Student Academic Affairs Office about their selection of courses.

Students with 90 or more units toward a degree must declare a major. To declare a major, students must obtain approval from the department offering the major and from the Student Academic Affairs office. Students who do not declare a major by 90 or more units may have a hold placed

on their registration.

If undeclared majors feel that their interests lie primarily in the areas of the natural sciences, mathematics, and statistics, or the agricultural sciences, advising can be obtained in the College of Natural and Agricultural Sciences, (951) 827-7294. Those interested in engineering or computer science can be advised in the Bourns College of Engineering (951) 827-ENGR (3647). The college does not allow students to work toward admission into the College of Natural and Agricultural Sciences or the Bourns College of Engineering. They should make progress toward a CHASS major, unless they are pursuing double majors or baccalaureates.

Double Majors

Students can declare a second major within the College of Humanities, Arts, and Social Sciences or a second major in a department or program of another college. Changes are not permitted while on academic probation or during the final senior year (135 units or more). Both majors must be completed within the maximum limit of 216 units, and approval must be obtained from advisors in both departments or programs. In such cases, all course requirements must be completed for each of the two majors chosen. One of the two majors must be designated as the primary major for the purpose of satisfying breadth or general education requirements. No more than 8 upper-division units may count for both majors simultaneously.

A declaration of two majors in different colleges must be signed by the deans of the colleges concerned and filed by the student with the college of the principal major. If the two majors lead to different degrees (B.S. and B.A.), that fact will be noted on the transcript, but only one diploma indicating both degree designations will be issued upon successful completion of such a program. Furthermore, if the double major is a mixed B.S./B.A., the college requirements for both majors must be met.

Students wishing to declare a second major must present an outline to the Student Academic Affairs Office, indicating which major will be used to satisfy breadth requirements and any overlap courses between the two majors.

Interdisciplinary, Individual Majors

Humanities, Arts, and Social Sciences Interdisciplinary Major offers courses of broad interest, and students with interests not readily satisfied through existing departments and programs may develop individual majors under the direction of special faculty sponsors. The consent of the Humanities, Arts, and Social Sciences Interdisciplinary Program Committee and the associate dean are required. The title of the major will be entered on the official degree list and on the official transcript. Diplomas will read "Humanities, Arts, and Social Sciences Interdisciplinary" with the individual field of concentration specified.

Liberal Studies Major Students planning to become elementary school teachers should consider declaring the Liberal Studies Major. The lower-division core of courses prepares students with subject matter preparation in the required subjects of the California Department of Education K-6 Frameworks. The upper-division requirements introduce students to academic areas that provide them with better preparation in meeting No Child Left Behind criteria.

This major achieves the goal of a rigorous major while providing prospective teachers with the broad undergraduate education required for elementary school teaching. See information on these programs in the Programs and Courses section of this catalog. Several of the college's regular major programs have an interdisciplinary emphasis that allows examination of a particular problem, theme, or area from a variety of perspectives.

College of Humanities, Arts, and Social Sciences Undergraduate Majors and Options

Administrative Studies ¹ (major with Art History, B.A.; Economics, B.A.; History, B.A.; Political Science, B.A.; and Sociology, B.A., B.S.)	B.A.		Languages and Literatures/Russian Studies	B.A.
African American Studies	B.A.		Latin American Studies	B.A.
Anthropology (also major with Law and Society, B.A.)	B.A.	B.S.	Law and Society ¹ (major with Anthropology, B.A.; Economics, B.A.; History, B.A.; Philosophy, B.A.; Political Science, B.A.; Psychology, B.A.; and Sociology, B.A., B.S.)	B.A.
Art (Studio)	B.A.		Liberal Studies	B.A.
Art History (also major with Administrative Studies, B.A.; and Religious Studies, B.A.)	B.A.		Linguistics	B.A.

¹ Only offered as a major combined with other programs.

² New student registration in this program is not open at present.

Disciplinary Minors

African American Studies ³	Italian Studies
Anthropology	Japanese
Art History	Korean
Asian American Studies ³	Russian Studies
Chicano Studies ³	Southeast Asian
Creative Writing	Music
Dance	Native American Studies ³
Economics	Neuroscience
English	Philosophy
Ethnic Studies	Political Science
History	Psychology
Languages and Literatures/ Arabic	Religious Studies
Chinese	Sociology
Classical Studies	Spanish
French	Theatre
Germanic Studies	Women's Studies

Interdisciplinary Minors

Asian Studies	Southeast Asian Studies
Chicano Bilingual-Bicultural Studies	Urban Studies
Global Studies	Western American Studies
International Relations	
Journalism	
Labor Studies	
Latin American Studies	
Law and Society	
Lesbian, Gay, Bisexual, Intersex, and Transgender Studies	
Marxist Studies	
Media and Cultural Studies	
Middle East and Islamic Studies	
Peace and Conflict Studies	
Public Policy	
Science Fiction and Technoculture Studies	

The disciplinary and interdisciplinary minor requirements of Asian Studies and Latin American Studies are described in the Programs and Courses section under the appropriate department or program. For a description of the other interdisciplinary minors, see individual listings in the Programs and Courses section.

³ See Ethnic Studies for descriptions of these minors.

Internships, Independent Projects and Student Research

The Humanities, Arts, and Social Sciences student can often practice the subject, as well as read about it. Many undergraduates have the opportunity to work with a faculty member on a research project, and many departments offer field work and internship courses. In these courses, students combine several hours per week of experience in an agency or firm with study of related academic materials and participation

in a seminar, where formal knowledge and practical experience are related to one another. Internship experiences are regularly available in settings such as public and business administration, politics, environmental protection, social welfare, criminal justice, clinical and other psychology programs, museums and archival installations, newspapers, and art galleries.

Normally, each local internship does not count for more than 4 or 5 units in a single term, larger numbers of units being reserved for quarter-away internships. Petitions for credit beyond 5 units in a single quarter for a

local internship must have the sponsoring agency's approval and a written justification by the student's faculty sponsor. All such requests require the associate dean's approval.

A maximum of 16 units of credit toward the bachelor's degree may be obtained through internship courses, with a maximum of 12 units of internship scheduled in a single quarter for quarter-away situations. Students who are on academic probation may not enroll in internship courses.

Transfer of Majors, Changing Majors

Students in good academic standing can petition to transfer from another college to the College of Humanities, Arts, and Social Sciences or from one major to another within the college, with the following restrictions: only students with 75 or fewer units can enter undeclared or pre-business; students with more than 75 units must declare a major upon admission to the college. The petition must be approved by the Student Academic Affairs Office before the change can be processed by the Office of the Registrar. Changes are not permitted while on probation or during the final senior year (135 units or more).

Students who fail to attain a GPA of 2.00 ("C") in preparation for the major or courses required for the major may be denied the privilege of entering or continuing in that major.

Minors

The College of Humanities, Arts, and Social Sciences offers minor programs; however, no student is required to take a minor. Minors are not degree-granting majors; they are sequences of supplemental courses designed to enhance work in certain areas. Any minor may be taken jointly with any departmental or interdepartmental major. Minors in the college shall consist of not fewer than 16 nor more than 28 units of organized upper-division course work. No overlap may occur among courses used to satisfy upper-division course requirements for a major and a minor. A GPA of at least 2.00 is required in upper-division courses in the field of the minor.

A minor is a set of courses focused on a single discipline or an interdisciplinary thematic area. There can be no substitution for the courses listed as constituting a minor without approval of the governing department or committee. There is no limit on the number of minors a student can declare. Students must declare the minor(s) before their final degree check before graduation by completing a petition with the Student Affairs Office in the College of Humanities, Arts, and Social Sciences, the College of Natural and Agricultural Sciences, or the Bourns College of Engineering, depending on their major. Prior approval by the department or committee offering the minor is required. The minor is noted on the transcript at the time the degree is conferred.

University Honors Program

For a description of the University Honors Program, see Educational Opportunities in the front of this catalog. For a listing of requirements and courses, refer to University Honors Program in the Programs and Courses section.

Undergraduate Pre-Business Program

Pre-Business is a two-year program that prepares students to apply to the Business Administration major. Students who elect Pre-Business are advised in the College of Humanities, Arts, and Social Sciences during their freshman and sophomore years. Students who elect Pre-Business must gain admission to Business Administration by the time they have earned 90 units.

Degree Requirements

Students in the College of Humanities, Arts, and Social Sciences must meet three levels of requirements for the Bachelor of Arts or Bachelor of Science degree: general university requirements, college requirements, and major requirements.

General University Requirements

General university requirements are listed at the beginning of the Undergraduate Studies section. In addition, the College of Humanities, Arts, and Social Sciences has the following requirements and limitations.

Unit Requirements

Students must satisfactorily complete for credit a minimum of 180 units for the bachelor's degree. A maximum of 216 units is allowed. After having credit for 216 units, students are not permitted to continue except in cases approved by the associate dean in which specific academic or professional reasons are involved.

Credit Limitations

Transfer students with credit from other institutions (advanced standing credit), receive a transfer profile from the Office of Undergraduate Admissions. The Student Academic Affairs Office evaluates the course work, indicating how the transferable credits are applied toward the degree. However, the following credit limitations may reduce the total number of units which apply toward the degree in the College of Humanities, Arts, and Social Sciences. Students should meet with an academic advisor in their major for questions regarding transfer credits.

The following credit limitations apply for all students enrolled in the college:

1. After completing 105 quarter units at a community college, students are not allowed further units for courses completed at a community college.
2. No more than 6 units in physical education activity courses may be applied toward the 180-unit requirement for the bachelor's degree.
3. No 400 series courses and not more than three courses in the 300 series of courses may be counted toward the 180 unit requirement for the bachelor's degree.
4. No more than 5 units of credit may be taken per quarter in special studies courses. See specific restrictions under each departmental listing regarding credit toward the major in special studies courses.

College of Humanities, Arts, and Social Sciences

Breadth Requirement Unit Summary

For the B.A.

English Composition	Varies
Humanities	20
Social Sciences	16
Ethnicity (4 units) ¹	–
Foreign Language (level 4)	16
Natural Sciences and Mathematics	20

Total Units	72 plus English Composition
-------------	--------------------------------

For the B.S.

English Composition	Varies
Humanities	20
Social Sciences	16
Ethnicity (4 units) ¹	–
Foreign Language (level 3)	12
Natural Sciences and Mathematics	20

Total Units	68 plus English Composition
-------------	--------------------------------

¹ The 4-unit ethnicity requirement can be applied to either the Humanities or Social Sciences requirement, depending on content.

College Breadth Requirements

The Student Academic Affairs Office, in consultation with the Executive Committee of the College of Humanities, Arts, and Social Sciences, determines which courses apply to the following requirements. It is the student's responsibility to verify those courses that fulfill these subject requirements. To search for courses that meet specific breadth requirements, visit registrar.ucr.edu.

Courses taken in the department or program of a student's major (including courses cross-listed with the major) may not be applied toward the breadth requirements except for History majors in connection with the World History requirement, English majors in connection with the English Composition requirement, Ethnic Studies majors in connection with the Ethnicity requirement, and foreign language majors in connection with the Foreign Language requirement. However, courses outside the major discipline, but required for the major, may be applied toward satisfaction of these requirements.

Students who elect a double major may apply courses in one of the majors toward satisfaction of the breadth requirements.

For the following requirements, a course is defined as a block of instruction which carries credit of 4 or more units.

No course may be applied to more than one breadth requirement, with the exception of the course taken to meet the Ethnicity requirement. Internship and independent studies courses may not be used to satisfy breadth requirements.

Courses offered by or cross-listed with Business Administration, Education, and Physical Education may not be used to satisfy breadth requirements.

English Composition

Students must demonstrate adequate proficiency in English Composition by completing a one-year sequence of college level instruction in English Composition with no grade lower than "C." Courses that the Academic Senate designates as alternatives to English 1C may be applied toward satisfaction of the third quarter of the writing requirement if students earn a "C" or higher.

Students should enroll in an English composition course each quarter they are registered at UCR until the sequence of preliminary Entry Level Writing courses, if needed, and ENGL 001A, ENGL 001B, ENGL 001C (or an alternative designated by the Academic Senate) is completed with satisfactory GPA.

Transfer students who have credit for one semester of English Composition from another institution are required to take two additional quarters, i.e., ENGL 001B and ENGL 001C.

Students have the option of using a score of 3 on the College Board Advanced Placement Test in English to satisfy ENGL 001A; they must complete ENGL 001B and ENGL 001C.

Students with a score of 4 or 5 on the College Board Advanced Placement Test in English have satisfied ENGL 001A and ENGL 001B; they must complete ENGL 001C.

Humanities: 20 units

For the B.A. degree

1. One course in World History (At UCR, courses that satisfy this requirement are HIST 010 or HIST 015 or HIST 020.)
2. One course in the Fine Arts (Art, Art History, Dance, Media and Cultural Studies, Music, Theatre, or Creative Writing courses in poetry, fiction, or playwriting)
3. Two courses from among the following:
 - a) Literature (offered by the departments of English, Comparative Literature and Foreign Languages, Hispanic Studies)
 - b) Philosophy
 - c) Religious Studies
4. One additional course from the following:
 - a) History, the Fine Arts, Literature, Philosophy, Religious Studies
 - b) A foreign language at level 3 or higher (Courses used in fulfillment of the foreign language requirement may not be used to meet this requirement.)
 - c) A humanities course offered by Ethnic Studies; Creative Writing (courses in journalism); Humanities, Arts, and Social Sciences Interdisciplinary; Latin American Studies; Linguistics; or Women's Studies

For the B.S. degree

1. One course in World History (At UCR, courses that satisfy this requirement are HIST 010, HIST 015, or HIST 020.)
2. One course from the following:
 - a) Fine arts (Art, Art History, Dance, Media and Cultural Studies, Music, Theatre, Creative Writing courses in poetry, fiction, or playwriting)
 - b) Literature (taken in the departments of English, Comparative Literature and Foreign Languages, or Hispanic Studies)
 - c) Philosophy
 - d) Religious Studies
3. Three additional courses from the following:
 - a) History, the Fine Arts, Literature, Philosophy, Religious Studies
 - b) A foreign language at level 3 or above (Courses used in fulfillment of the foreign language requirement may not be used to meet this requirement.)
 - c) Humanities courses offered by Ethnic Studies; Creative Writing (courses in journalism); Humanities, Arts, and Social Sciences Interdisciplinary; Latin American Studies; Linguistics; or Women's Studies

Social Sciences: 16 units

1. One course in Economics or Political Science
2. One course in Anthropology, Psychology, or Sociology
3. Two additional social science-related courses from Comparative Ancient Civilizations, Ethnic Studies; Environmental Sciences; Geography (cultural geography courses); Human Development; Humanities, Arts, and Social Sciences Interdisciplinary; Women's Studies; or one of the disciplines in 1. or 2. above

Ethnicity: 4 units

One course focusing on the general concepts and issues in the study of race and ethnicity in California and the United States. Courses that satisfy this requirement must concentrate on one or more of four principal minority groups (African American, Asian American, Chicano/Latino, and Native American). These courses must be comparative in nature, analyzing the minority group experience within the present and historical context of other racial and ethnic groups, such as European-American minorities. The courses are to be offered by or cross-listed with the Department of Ethnic Studies.

Refer to the Programs and Courses section for the courses that fulfill the Ethnicity requirement.

Foreign Language

Courses in American Sign Language may be used to meet this requirement.

For the B.A. degree: course level 4 or equivalent

This requirement may be satisfied by students (except for foreign language majors who satisfy the spirit of the language requirement by majoring in one or more languages) by completing the fourth-quarter level or its equivalent in one language at UCR (or at another college or university) with a minimum grade of "C" or by demonstrating proficiency at the fourth-quarter level on a foreign language placement exam offered by one of the foreign language departments at UCR. This test does not yield unit credit; it only determines whether the Foreign Language requirement has been met, or in which course of the language sequence a student should enroll. The placement exam may be taken only once in each subject during a student's UCR career. Students continuing with the same foreign language they completed in high school must take a placement exam (visit placementtest.ucr.edu for dates and locations). Credit will be allowed only at the course level for which they qualify according to the placement exam.

For the B.S. degree: course level 3 or equivalent

This requirement may be satisfied by students (except for foreign language majors who satisfy the spirit of the language requirement by majoring

68 / Colleges and Academic Programs

in one or more languages) by completing the third-quarter level or its equivalent in one language at UCR (or at another college or university) with a minimum grade of "C" or by demonstrating proficiency at the third-quarter level on a foreign language placement exam offered by one of the foreign language departments at UCR. This test does not yield unit credit; it only determines whether the Foreign Language requirement has been met, or in which course of the language sequence a student should enroll. The placement exam may be taken only once in each subject during a student's UCR career. Students continuing with the same foreign language they completed in high school must take a placement exam (visit placementtest.ucr.edu for dates and locations). Credit will be allowed only at the course level for which they qualify according to the placement exam.

Natural Sciences and Mathematics: 20 units

1. One course in Mathematics, Statistics, or Computer Science
2. One course in Biological Sciences (Biochemistry, Biology, Botany and Plant Sciences, Entomology, Nematology, or Plant Pathology)
3. One course in Physical Sciences (Chemistry, Physics, Earth Sciences, excluding cultural Geography courses)
4. Two additional courses from the areas listed above or in physical and/or biological science courses offered in the Department of Environmental Sciences

New General Education Concentration Options

Students who choose to satisfy Breadth with the new General Education Concentration Option may choose either the California Concentration, the Climate Change/Sustainability Concentration, or the Ecology/Biodiversity Concentration listed below. One of these concentrations satisfies campus breadth requirements.

English Composition

Students must demonstrate adequate proficiency in English Composition by completing a one-year sequence of college level instruction in English Composition with no grade lower than "C." Courses that the Academic Senate designates as alternatives to English 1C may be applied toward satisfaction of the third quarter of the writing requirement if students earn a "C" or higher.

Students should enroll in an English composition course each quarter they are registered at UCR until the sequence of preliminary Entry Level Writing courses, if needed, and ENGL 001A, ENGL 001B, ENGL 001C (or an alternative designated by the Academic Senate) is completed with satisfactory GPA.

Transfer students who have credit for one semester of English Composition from another institution are required to take two additional quarters, i.e., ENGL 001B and ENGL 001C.

Students have the option of using a score of 3 on the College Board Advanced Placement Test in English to satisfy ENGL 001A; they must complete ENGL 001B and ENGL 001C.

Students with a score of 4 or 5 on the College Board Advanced Placement Test in English have satisfied ENGL 001A and ENGL 001B; they must complete ENGL 001C.

General Education Options

A. California Concentration (Total units: 36-37)

1. ENGL 012B; AHS 021; STAT 040, MATH 004 or MATH 005 (12-13 units)
2. Two of: Bpsc 021, Bpsc 031, GEO 004 (8)
3. ETST 135 or ETST 154 (4)
4. HIST 138 or HIST 140 (4)
5. POSC 198-I (4)
6. HASS 190 (4)

B. Climate Change/Sustainability Concentration (Total units: 40-41)

1. GEO 011 (4 units)
2. Two of: ENSC 002, BIOL 003, GEO 002, PHYS 018 (8)
3. Two of: ENGL 012B, AHS 021, CPLT 025 (8)
4. STAT 040, MATH 004 OR MATH 005 (4-5)
5. Two of: PHIL 117, ANTH 132 or ANTH 137, GEO 160 (8)
6. GEO 198-I (4)
7. GEO 190 (4)

C. Ecology/Biodiversity Concentration (Total units: 44-48)

1. Introductory Courses: ENSC 001 or CHFY 001E (4-5)
2. Two of: ENTM 010, BIOL 010/GEO 003, BIOL 003, Bpsc 021
3. Two of: ANTH 020, ENGL 012B, CHFY 001-I, AHS 021, SOC 001 and MATH 004/MATH 005/STAT 040 (or any other MATH/STAT course)
4. One of: PHIL 117*, CRWT 146H*, ENGL 141 (E-Z), HIST 105, HIST 107
5. One of: ANTH 132, SOC 125*, SOC 184*
6. One of: BIOL 152/GEO 152*, GEO 153*, GEO 167*, GEO 169*
7. Internship: GEO 198-I or HASS 198-I (or equivalent course as approved by advisor)
8. Capstone Course: HASS 190/193 (or equivalent course as approved by advisor)

*Prerequisites: In each case, there are no more than one. Upper-division courses not starred require upper-division standing or consent of instructor.

Ethnicity: 4 units

Unless otherwise noted, students taking a new General Education Concentration Option will still have to satisfy the campus Ethnic Studies requirement.

Foreign Language

Courses in American Sign Language may be used to meet this requirement.

For the B.A. degree: course level 4 or equivalent

This requirement may be satisfied by students (except for foreign language majors who satisfy the spirit of the language requirement by majoring in one or more languages) by completing the fourth-quarter level or its equivalent in one language at UCR (or at another college or university) with a minimum grade of "C" or by demonstrating proficiency at the fourth-quarter level on a foreign language placement exam offered by one of the foreign language departments at UCR. This test does not yield unit credit; it only determines whether the Foreign Language requirement has been met, or in which course of the language sequence a student should enroll. The placement exam may be taken only once in each subject during a student's UCR career. Students continuing with the same foreign language they completed in high school must take a placement exam (visit placementtest.ucr.edu for dates and locations). Credit will be allowed only at the course level for which they qualify according to the placement exam.

For the B.S. degree: course level 3 or equivalent

This requirement may be satisfied by students (except for foreign language majors who satisfy the spirit of the language requirement by majoring in one or more languages) by completing the third-quarter level or its equivalent in one language at UCR (or at another college or university) with a minimum grade of "C" or by demonstrating proficiency at the third-quarter level on a foreign language placement exam offered by one of the foreign language departments at UCR. This test does not yield unit credit; it only determines whether the Foreign Language requirement has been met, or in which course of the language sequence a student should enroll. The placement exam may be taken only once in each subject during a student's UCR career. Students continuing with the same foreign language they completed in high school must take a placement exam (visit placementtest.ucr.edu

for dates and locations). Credit will be allowed only at the course level for which they qualify according to the placement exam.

Note, in order to be enrolled in one of the concentrations, students must first see their academic advisor and then receive written approval from Professor George Haggerty, chair of the General Education Advisory Committee.

Major Requirements

Detailed requirements for each major can be found under the department or program listing in the Programs and Courses section of this catalog.

A major in the College of Humanities, Arts, and Social Sciences shall consist of not fewer than 36 upper-division units. All courses applied toward the major and preparation for the major must be taken for a letter grade unless otherwise approved by the department chair. A 2.00 GPA in upper-division courses in the major is required for graduation. Once enrolled on this campus, students must complete all courses designated for a major in regular or summer sessions at UCR; exceptions to this policy must be approved by the department chair and by the associate dean.

Candidates for the B.A. degree may not receive more than 80 units of credit toward the degree for work taken in the major discipline (i.e., students must take at least 100 units outside the major discipline). Music and Dance majors may count a maximum of 102 units of music course work toward the B.A. degree (i.e., students must take at least 78 units outside the Music or Dance major).

Candidates for the B.S. degree may not receive more than 108 units of credit toward the degree for work taken in the major discipline (i.e., students must take at least 72 units outside the major discipline).

To receive the bachelor's degree, transfer students must complete a minimum of 16 upper-division units in the major on the Riverside campus.

Students who have been away from the university for several terms should consult with their major departmental advisor about the requirements under which they may graduate. See the Catalog Rights Policy for Undergraduate Degrees in the Policies and Regulations section of this catalog.

College Policies and Procedures

For more information on UCR policies and regulations see the Policies and Regulations section of this catalog.

College Regulations

Refer to the Student Academic Affairs Web site at chassstudentaffairs.ucr.edu for more information on college policies and procedures.

Student Responsibility

Students are responsible for meeting deadline dates regarding enrollment, add/drop/withdrawal, change of grading basis, credit by examination, declaration of candidacy, and other actions. The dates are online at registrar.ucr.edu and must be observed. Advising can be obtained in the student's major department or in the college's Student Academic Affairs Office, 3400 Humanities and Social Sciences Building.

Academic Advising

It is the student's responsibility to meet all graduation requirements: general university, college, and major.

Students with declared majors receive academic advising through their major department. Major advisors are available within each department or program (see a list of departmental staff for academic affairs at chassstudentaffairs.ucr.edu). All departments assign an academic advisor to each major and may require an advisor's approval before enrolling, submitting an academic petition, or making a change in the class schedule. Entering students who have not yet selected a major field of study should contact the Student Academic Affairs Office.

Undeclared and Pre-Business students are advised through the Student Academic Affairs Office. A staff of academic advisors is readily available to assist with questions pertaining to academic regulations and procedures, selection of courses which satisfy breadth requirements, major options,

and alternatives. Students who need to confer with an advisor about overall degree requirements, academic difficulty, program planning, or assistance in selecting a major need to schedule an appointment with their advisor.

Course Enrollment

Students are required to register and enroll by the date set by the campus (visit registrar.ucr.edu for details).

The recommended study load for undergraduate students is 15 to 16 units per quarter. This is the average quarterly load to ensure steady progress for graduation in four years. The minimal program for an undergraduate student to be considered full time is three courses (12 units) per quarter. The normal progress for an undergraduate student is four courses (16 units) per quarter.

A class schedule of fewer than 12 units must be approved by the associate dean (visit registrar.ucr.edu for details). The college has established enrollment limits beyond which students require academic advisor approval. The limits are as follows: students in good academic standing, 20 units; students on academic probation, 17 units; students on subject-to-dismissal status, 15 units. Students on probation may not take courses on an "S/NC" basis.

After the second week of instruction, students may request changes by petition during a specified period. Petitions must usually be approved by the advisor and also, in the case of adds, by the instructor concerned. Changes to grading basis need advisor approval after the second week of classes. The associate dean must approve any changes in the class schedule requested after the regular petition period.

Courses (including Special Studies courses) can be added through the third week of instruction. Courses dropped after the second week of instruction will appear on the record with a "W" notation, signifying withdrawal. Students can withdraw from courses through the sixth week of instruction. The grading basis for a course can be changed through the eighth week of instruction. After the third week of instruction, a fee is required to file the petition to change the class schedule.

Enrollment on Satisfactory/No Credit Basis

Undergraduate students in good academic standing may receive credit for courses undertaken and graded "S" up to a limit of one-third of the total units undertaken and passed on the Riverside campus at the time the degree is awarded. Normally, this means no more than 4 units of "S/NC" per quarter. The total also includes courses graded only "S/NC." Courses that are required in, or prerequisite to, a major may not be taken on a "S/NC" basis unless approved by the chair of the major department. Students on special status or limited status may take courses on a "S/NC" basis only with the approval of the associate dean.

A student may elect "S/NC" or delete "S/NC" from a course by filing a petition (enrollment adjustment form) with the Registrar. The deadline is the end of the eighth week of instruction and is listed each quarter at registrar.ucr.edu. This deadline is strictly enforced.

Regulations governing the "S/NC" option are described under Credit and Grades in the Policies and Regulations section of this catalog.

Repetition of Courses

See Repetition of Courses in the Policies and Regulations section.

Part-time Study

For details, see Part-Time Study under the Finances and Registration.

Petitions

A petition is a form representing a student's need or desire to be exempted from any standard rule or regulation in the university. It is the only way to obtain formal approval from the department, the college or school, the Registrar, or whomever has authority over a particular request. Some petitions carry a small fee; others are free.

An approved petition for a waiver or substitution in degree requirements represents an agreement between the student, the college or school, and in some cases, the department chair, granting the student an exception from the existing regulations.

70 / Colleges and Academic Programs

Petitions are also used at UCR to change college or major, enroll in fewer units than regulations permit, make late changes to a class schedule, obtain credit by examination, concurrent enrollment, or withdraw from the university. Petitions for most of these exceptions are available in the Student Academic Affairs Office. Please note that petitions for retroactive actions more than one year old will not be approved.

Credit by Examination

To earn credit for a course by examination without formal enrollment in that course, students must be in residence and in good academic standing.

Before the examination may be given, arrangements and approval for examination for degree credit must be made with the instructor appointed to give the examination, a faculty advisor (if the major department requires it), and the associate dean. Petitions must be filed with the Office of the Registrar no later than the third week of instruction. Credit by examination is not allowed for English Composition courses.

The results of all examinations for degree credit are entered on students' records as though they had actually taken the courses of instruction. There is a \$5 service charge for each petition. The credit by examination procedure may not be used as a means of improving a previous grade.

Undergraduate Credit for Graduate Courses

Students who have a GPA of at least 3.00 in all courses taken in the university or have shown exceptional ability in a special field may take a graduate course for undergraduate credit with the permission of the instructor concerned. Students must have completed at least 18 upper-division quarter units basic to the subject matter of the course.

Expected Progress for Undergraduate Students

At the close of each quarter, the courses, units, grades, and grade points earned are added to the student's cumulative university record. This record summarizes progress toward a degree. Lack of adequate progress may jeopardize continued registration. Students can access their advisory degree check on Growl (accessible through rweb.ucr.edu).

Applying for Graduation

To graduate from UCR, undergraduate students must file an application for graduation as specified by their college. The online Application for Graduation is available at the CHASS Student Academic Affairs Web site, at chassstudentaffairs.ucr.edu and must be submitted by 4 p.m. of the deadline date listed at registrar.ucr.edu. Applications are not accepted after the deadline established for the quarter.

Students should review their remaining requirements on Growl (accessible through rweb.ucr.edu) each quarter. They should also contact their academic advisor in their major department or program two quarters before expected graduation to confirm remaining requirements. Completion of the degree depends upon completion of any work in progress. During the graduation quarter, any changes made to a student's schedule after the third week of instruction should be immediately reported to the academic advisor.

If for any reason a student does not meet the requirements for graduation after filing the application, another application must be filed for the appropriate quarter. Students graduating *in absentia* after an absence of one or more quarters must apply for readmission to the university and file an application for graduation.

All course work, whether taken at UCR or elsewhere, must be completed by the last day of UCR's finals week during the quarter of graduation (no GDs or Incomplete grades). Incomplete, IE, IP or GD grades on the transcript will stop the processing of the degree.

Once the application for graduation is filed, the student's name will be entered on the appropriate degree list. Students who need to amend the prospective quarter of graduation and who have submitted an application for graduation petition must notify the Student Academic Affairs Office, in writing, as soon as possible.

Withdrawals

Students may withdraw from the university prior to the end of instruction, for serious personal reasons, with the approval of the associate dean. Students can initiate the withdrawal process online by going to myforms.ucr.edu.

Preparing for the Professions

The wide variety of majors and programs available in the College of Humanities, Arts, and Social Sciences provides an excellent background and preparation for immediate entry into the job market or for graduate and professional schools. Some of these are listed below; however, students are urged to see their faculty advisor or a counselor in the Career Center for further information.

The Arts Undergraduate majors in the arts at UCR are designed to provide a solid liberal arts education at the same time as they provide essential training in the practical techniques of the specific art field involved. This means that arts majors provide a broad educational background, on a par with the other majors in the college, which prepares each student for effective participation in any job market where educational breadth is important.

Through the thorough practical training in each art field, an increasing number of UCR students are finding attractive career opportunities in the visual arts, writing, dance, music, and theater arts. Not that it has become any easier to practice as an artist or performer; these remain options best followed by the most talented and determined. However, the opportunities in many arts-related fields are increasing as the role of the arts continues to expand. Such opportunities include positions in teaching, music and dance therapy, graphics, theater management, costume design, performing arts management, fine arts publication, the recording industry, the arts, and criticism. Moreover, new professions, which will open yet wider vistas in coming years, are evolving for those trained in the arts.

UCR students who graduate with a major in one of the arts have consistently gained admission to graduate schools at outstanding universities, conservatories, and professional schools throughout the country.

At UCR, students may major in Art, Art History, Creative Writing, Dance, Media and Cultural Studies, Music, or Theatre. At the graduate level, the M.A. degree is offered in Art History and in Music. M.F.A. degrees include Experimental Choreography, Visual Art, and Creative Writing and Writing for the Performing Arts. A Ph.D. is offered in Critical Dance Studies.

The Chancellor provides performance awards for excellence in the arts for students who have already achieved high proficiency upon entry into the university and who will continue to practice their art forms while students at UCR. For further information, contact the departments of Art; Dance; Music; Theatre, Film and Digital Production; and Creative Writing.

The Gluck Fellows Program of the Arts at UCR provides Gluck Faculty, Graduate, and Undergraduate Fellows the opportunity to bring their respective art forms to elementary, middle, and high school students and nursing home residents who have little or no access to the arts. The departments of Art; Art History; Creative Writing; Dance; Music; and Theatre, Film and Digital Production as well as the Sweeney Art Gallery and UCR/California Museum of Photography participate in the Gluck Fellows Program of the Arts. Students interested in the Gluck Fellows Program of the Arts should check with individual departments.

Business While no specific major is required for admission to most graduate schools of administration or management, the undergraduate programs in Business Economics and the various majors offered in combination with Administrative Studies provide excellent preparation. At UCR, the curriculum in these majors stresses the principles of managerial decision making and methods of gathering and analyzing the diverse data on which decisions must be based.

It is also important to note that other majors in the liberal arts can serve as effective preparation for entry into the worlds of management and business. Any major curriculum that includes substantial emphasis on oral and written expression and analytic and critical thinking can serve this purpose, particularly if accompanied by a suitable cluster of courses in business and management topics. Internships, which are available in business and industry settings, can assist in clarifying educational and

personal goals, allowing exploration of alternative career options, and providing the opportunity to apply academic background to a practical, real world experience.

Students who wish to pursue a graduate degree in the Business Administration field may wish to consider UCR's School of Business Administration.

Law Most law schools require a baccalaureate degree. Law schools do not require a uniform prelaw course of study or a specific college major; backgrounds in the physical sciences are as acceptable as those in the social sciences and humanities. However, law schools in general do recommend that the prelaw student attempt to reach several goals during the undergraduate years: an understanding of the development of social, political, and economic institutions; an ability to communicate well, both orally and in writing; the capacity to think clearly, carefully, and independently; and a habit of disciplined study. Therefore, there is no specific, formal prelaw curriculum that a student must take.

Most law schools require applicants to take the Law School Admission Test, administered regionally by the Educational Testing Service. The test is administered at UCR on three occasions during the year. Applications for and information about this test may be obtained in the Department of Political Science.

Students who are considering applying to law schools are strongly urged to consult with the prelaw advisor in the Department of Political Science, 2224 Watkins Hall.

Librarianships All library schools accredited by the American Library Association require a baccalaureate degree for admission and usually a reading knowledge of one or two languages other than English. A broad general background, supported by the ability to read rapidly and intelligently, is helpful. The knowledge, in depth, of the literature of some subject area is especially advantageous. All subject fields, including the biological and natural sciences, the humanities, and the social sciences may prepare a student for graduate study in librarianship.

In addition to career opportunities in public, school, and academic libraries, special librarians may work in government agencies, and in commercial and industrial firms, such as pharmaceutical companies, banks, and advertising agencies.

Museums, Archives, and Historic Preservation The American Association of Museums and The Society of American Archivists have designated the master's degree as the professional degree level for careers in museums and archives. The Public History Program M.A. (Department of History) provides professional education and training for these careers, as well as for careers in general historic preservation and public history.

The UCR/California Museum of Photography is of significant value to those interested in photographic history and museum practices, as well as to those with creative interests in photography.

Public Administration Government agencies offer many administrative career options including jobs in personnel, budget administration, labor relations, program analysis and public information. These types of positions may require a bachelor's or a master's degree or a combination of degrees plus experience. Students interested in a career in public information are encouraged to acquire a broad liberal arts education at the undergraduate level. An undergraduate major in any of the social sciences provides appropriate preparation for graduate work in public administration. Special attention is called to the majors in Political Science/Administrative Studies, Political Science/International Affairs, and Political Science/Public Service.

At UCR, students may gain valuable experience in government agencies through the Academic Internship Program. In addition to numerous local internship settings, there are quarter-away internships available in several Sacramento and Washington, D.C. offices. See the Career Center in the Services for Students section of this catalog.

UC Center at Sacramento offers student internship opportunities. Students live in UC housing, near the state Capitol, and intern from 24 to 33 hours per week with members of the state legislature, government offices, or nonprofit agencies. See UC Center at Sacramento in the Introducing UC Riverside section of this catalog.

The **UCR Washington Academic Program** provides undergraduate students with a multidimensional educational experience in Washington, D.C. Students undertake academic pursuits as well as cultural and social activities. The program combines course work with field research and internship experience. See UCR Washington Academic Program in the Introducing UC Riverside section of this catalog.

Social Welfare Full professional training usually consists of two years of graduate training leading to the degree of Master of Social Work.

Students planning to seek employment in social welfare after completing the baccalaureate degree should prepare in the fields of psychology (particularly child and adolescent psychology and the study of personality), sociology (with emphasis on society and personality, social thought and social organization), economics, political science, anthropology, and statistical and research methods in the social sciences. Students who plan to enter a professional school of social work following undergraduate training should consult with an advisor at UCR for the best selection of classes.

Career opportunities for students with the B.A. or B.S. degree include positions as deputy probation officer, social worker, group counselor, corrections officer, substance abuse counselor, and community relations worker. Internships provide useful experience as part of the undergraduate program in preparation for such careers.

Teaching Credential Programs Students planning a career as a teacher may wish to consider one of the majors that offers a subject-matter preparation program.

Specific details and counseling are available at individual department offices and the Graduate School of Education and at education.ucr.edu.

Students who are considering working toward any teaching credential should attend one of the credential information seminars offered by the Teacher Education Services Office (1124 Sproul) for advice in planning an academic program.

College of Natural and Agricultural Sciences

CNAS Undergraduate Academic Advising Center
1223 Pierce Hall
University of California, Riverside
Riverside, CA 92521
(951) 827-7294; fax (951) 827-2243
cnasstudent.ucr.edu

With strengths in the biological, physical, mathematical, and agricultural sciences, the college offers the Bachelor of Arts and the Bachelor of Science degrees. The B.A. degree, when offered, provides for both broad general education and major field specialization. The B.S. degree stresses advanced work in the major and associated fields. All degree programs provide students with an opportunity to develop an understanding and appreciation of our relationship to the world around us, in addition to preparing them for careers in their fields of specialization.

The variety of degree programs and the flexibility of each provide great freedom of choice to students. Cooperative efforts between departments in the college provide for interdepartmental (interdisciplinary) majors. Students may elect to take double majors within the college or between this college and another. See the college's Undergraduate Academic Advising Center for information on double majors. Individual majors may be planned for students who find that individual goals can be accommodated through the resources and interested faculty at UCR. Information and regulations on individual majors may be obtained from the college's Undergraduate Academic Advising Center.

For information on graduate degrees see the Graduate Studies section of this catalog.

Majors

A major is a coordinated group of upper-division courses (100-199 series) in a field of specialization. Early choice of a major is desirable. Students must declare a major by the time they have earned 90 units. The courses for any particular major are specified by the relevant department or departmental group, and they must provide at least 36 upper-division units of credit, normally taken on a letter grade basis. No more than 84 units in any one discipline may be applied to the degree.

Admission to Majors

Admission of Freshmen Applicants to majors in the College of Natural and Agricultural Sciences who excel in the academic criteria, with additional emphasis on advanced mathematics and laboratory science preparation, will be considered. It is strongly recommended that students have sufficient mathematics competency to qualify for college-level calculus at the time of enrollment.

Mathematics Advisory Examination All incoming CNAS freshmen who are not exempt must take the Mathematics Advisory Examination (MAE) prior to attending the summer Highlander Orientation. Certain MAE scores that indicate the need for additional work in intermediate algebra will place students in a college-level intermediate algebra course. This means that these students will need to complete an intermediate algebra course prior to enrolling in any Science and Math courses required for CNAS majors. Students will have the option to enroll in the Intermediate Algebra Workshop (ARC 035) college-level intermediate algebra course during the summer prior to their first Fall quarter at UC Riverside or, at the latest, during their first Fall quarter.

ARC 035 Intermediate Algebra Workshop is designed to give students the math proficiency to succeed in a rigorous, university level pre-calculus mathematics course. Based on a student's math performance in all ARC 035 coursework, the workshop has two outcomes for CNAS students: 1) placement in Math 008A; or 2) no placement.

Students must complete the IAW college-level intermediate algebra course on the UCR campus. For more information about the IAW program, students may visit arc.ucr.edu/Incr35.

College of Natural and Agricultural Sciences Undergraduate Majors and Options

Department/Program	Degree	
Biochemistry		
Biology emphasis	B.A.	B.S.
Chemistry emphasis	B.A.	B.S.
Medical Sciences emphasis	B.A.	B.S.
Biological Sciences ¹		B.S.

¹ New student registration in this program is not open at present.

Students who place in but do not plan to complete a college-level intermediate algebra course by the end of their first quarter of enrollment at UC Riverside, should file a Change of Major Petition to an appropriate, non-Calculus-requiring major in the College of Humanities, Arts, and Social Sciences (CHASS) or petition the Divisional Dean of CNAS Student Affairs to remain in CNAS under special circumstances. Students who pass the IAW college-level intermediate algebra course at a level deemed satisfactory for CNAS students, will be advised to enroll in Math 8A for the following quarter at UC Riverside.

Transfer Students Students are selected primarily on the basis of academic preparation, as assessed by their GPA in academic coursework and strength of preparation for the intended major. Admission is selective based on the GPA in all transferable coursework with a minimum GPA of 2.7 and completion of required major preparatory coursework. Students should visit assist.org for updated and comprehensive major preparation requirements.

The Intersegmental General Education Transfer Curriculum (IGETC) is not accepted for students planning to transfer to the College of Natural and Agricultural Sciences. Although courses taken to satisfy the IGETC may be applied to the college's breadth pattern, students should concentrate on completing transferable mathematics and science courses.

Choosing a Major, Undeclared Majors

Although freshmen may choose an academic major on entering UCR, those who are unsure about specific academic goals may request to be admitted to the college as an undeclared student, choosing one of three options in this category.

1. Undeclared — Life Sciences, for students interested in Biochemistry; Biology; Cell, Molecular and Developmental Biology; Entomology; Microbiology; Neuroscience; or Plant Biology.
2. Undeclared — Mathematic Sciences, for students interested in Mathematics or Statistics
3. Undeclared — Physical Sciences, for students interested in Chemistry, Earth Sciences, Environmental Sciences, or Physics

Students who follow the recommended program for any of the three undeclared options will be prepared to enter a wide variety of science majors. Even if their plans change several quarters later, they will have avoided academic difficulty by planning a sensible, basic preliminary strategy. Individuals entering as students in one of the three undeclared options are advised through the college's Undergraduate Academic Advising Center by both professional academic advisors and faculty mentors from diverse science departments. Actual admission into degree programs is predicated upon successful completion of courses with satisfactory grades. Transfer into another college requires performance judged to be satisfactory by that college.

All students with 90 or more units toward a degree are expected to declare a major. To declare a major, obtain approval from the college's Undergraduate Academic Advising Center by filing a Change of Major Petition. Students are expected to declare a major by the beginning of their junior year (completion of 90 units). Students who fail to declare a major by this time will not be permitted to register until an approved declaration of major has been submitted to the Divisional Dean of CNAS Student Affairs at the CNAS Undergraduate Academic Advising Center.

If students in one of the three undeclared options feel their interests lie primarily in the areas of humanities or social sciences, advising can be obtained in the College of Humanities, Arts, and Social Sciences, (951) 827-3683. Students interested in engineering or computer science can be advised in the Bourns College of Engineering, (951) 827-ENGR (3647).

Double Majors

A declaration of a second major must be filed at the college's Undergraduate Academic Advising Center at least two quarters before graduation and approved by both academic major advisors and the Divisional Dean of CNAS Student Affairs. At the time of filing, a student must have completed 120 units, with at least 18 upper-division units in the primary major and at least 8 upper-division units in the secondary major. Of the required upper-division units, a minimum of 24 (no more than 4 of which can be 190-199 courses) must be unique to each major. To declare a second major, a student must have a cumulative GPA of 2.7 or higher and an upper-division major GPA of 2.7 or higher in each major. A student

may elect a second major in a department or interdepartmental group of another college. A declaration of such a second major must be signed by the appropriate deans of both colleges and filed by the student with the primary college. A student must meet requirements of both primary and secondary majors and the college requirements of the primary major if they are both in the same baccalaureate class. If the two majors lead to different degrees (B.S. and B.A.), that fact is noted on the transcript, but only one diploma indicating both degree designations will be issued upon successful completion of such a program. Furthermore, if the double major is a mixed B.S./B.A., the college requirements for both majors must be met. Information on how to file for double majors may be obtained from the college's Undergraduate Academic Advising Center.

Changing Majors

Students may change majors if they are in good standing and not expected to exceed the unit limitation of 216 units toward the degree. Students can petition to change their major within the college or transfer from another college to the College of Natural and Agricultural Sciences. Students interested in transferring to the College of Natural and Agricultural Sciences should consult with an advisor in the CNAS Undergraduate Academic Advising Center regarding specific prerequisite courses. Students will be reviewed for course coverage and GPA for the new major. Major changes to CNAS or within CNAS are approved by the Divisional Dean of CNAS Student Affairs.

Students who fail to attain a GPA of 2.00 ("C") in preparation for the major or major courses may be denied the privilege of entering or continuing in that major.

Minors

Each minor in the College of Natural and Agricultural Sciences consists of not fewer than 20 nor more than 28 units of organized, upper-division courses. No more than 4 units of 190-199 courses may be used in fulfilling the upper-division unit requirement for a minor. Of the specified upper-division units, a minimum of 16 must be unique to the minor and may not be used to satisfy major requirements. The CNAS Undergraduate Academic Advising Center is responsible for student and administrative issues pertaining to the minors offered by CNAS. Minors offered by other colleges are administered by the department, program, or interdisciplinary program offering the minor. Students must file a declaration of a minor by filing a petition with the college's Undergraduate Academic Advising Center at least two quarters before graduation and must be in good academic standing at the time of filing. A minor requires the signature of the Academic Advisor that supervises the minor and the signature of the Divisional Dean of CNAS Student Affairs.

University Honors Program

For a description of the University Honors Program, see Educational Opportunities in the section Introducing UC Riverside. For a listing of requirements and courses, refer to University Honors Program in the Programs and Courses section.

Financial Assistance

The College of Natural and Agricultural Sciences maintains funds for undergraduate scholarships. Application materials and information are available in the college's Undergraduate Academic Advising Center. Visit cnasstudent.ucr.edu or e-mail cnasstudent@ucr.edu.

Freshman Advising Seminars

Freshman Advising Seminars are designed to introduce students to a wide variety of topics in the College of Natural and Agricultural Sciences, including major selection, curriculum planning, career options and goals in the sciences, opportunities for undergraduate research, development of learning and study skills, ethics in research and education, and an introduction to the faculty in the college. Each quarter's offerings are listed at registrar.ucr.edu under NASC 091 and NASC 093. Topics vary from quarter to quarter.

The seminars have no prerequisites, and freshmen are given enrollment priority. Each seminar is limited to 24 students to encourage discussion and carries 1 or 2 units of academic credit, although units are not applied toward major requirements. The seminars are graded on an "S/NC" basis.

Degree Requirements

Students in the College of Natural and Agricultural Sciences must meet three levels of requirements for the B.A. or B.S. degree: general university requirements, college requirements, and major requirements.

General University Requirements

General university requirements are listed at the beginning of the Undergraduate Studies section. For information on university regulations see the Policies and Regulations section of this catalog.

In addition to the above general university requirements, the College of Natural and Agricultural Sciences has the following unit requirement.

Unit Requirement

Students are not normally expected to take significantly more than 180 units to obtain the bachelor's degree. After earning credit for 216 units, a student will not be permitted to continue except by approval of the Divisional Dean of CNAS Student Affairs when specific academic or professional reasons are involved.

The following credit limitations apply for all students enrolled in the college:

1. After completing 105 quarter units at a community college, students are not allowed further units for courses completed at a community college.
2. No more than 6 units in physical education activity courses may be applied toward the bachelor's degree.
3. Enrollment in more than 8 units of graduate courses requires submission of a petition and approval by the Divisional Dean of CNAS Student Affairs. No more than three courses in the 300 series of courses may be applied toward the bachelor's degree. Credit is not granted for 400 series courses taken in UC Extension.

College Policy for the Intersegmental General Education Transfer Curriculum

The Intersegmental General Education Transfer Curriculum is not accepted for students planning to transfer to the College of Natural and Agricultural Sciences. It does not adequately cover the lower-division mathematics and science prerequisites required for majors in this college.

College of Natural and Agricultural Sciences Breadth Requirement Unit Summary

For the B.A.

English Composition	Varies
Humanities	20
Social Sciences	16
Ethnicity (4 units) ¹	—
Foreign Language	16
Natural Sciences and Mathematics	20
Total Units	72 plus English Composition

For the B.S.

English Composition	Varies
Humanities	12
Social Sciences	12
Ethnicity (4 units) ¹	—
Natural Sciences and Mathematics	20
Additional Courses	16
Total Units	60 plus English Composition

¹The 4-unit ethnicity requirement can be applied to either the Humanities or Social Sciences requirement, depending on content.

College Breadth Requirements

For the following requirements, a course is defined as a block of instruction that carries credit of 4 or more units. Courses taken in the department or program of a student's major (including courses cross-listed with the major) may not be applied toward the breadth requirements except for Biology majors in connection with the Biological Sciences requirement. However, courses outside the major discipline, but required for the major, may be applied toward satisfaction of these requirements.

Some majors in the college may have specific course requirements for meeting the following breadth requirements. Check under individual major requirements in the Programs and Courses section of this catalog.

Requirements are for both the B.A. and the B.S. degrees unless specified separately.

Humanities

For the B.A. degree: 20 units

1. One course in World History (At UCR, courses that satisfy this requirement are HIST 010, HIST 015, or HIST 020.)
2. One course in the fine arts (Art; Art History; Creative Writing courses in poetry, fiction, or playwriting; Dance; Media and Cultural Studies; Music; Theatre or from among courses within these disciplines as designated by the Executive Committee of the College of Humanities, Arts, and Social Sciences)
3. Two courses from among the following:
 - a) Literature taken in the departments or programs in Comparative Literature and Foreign Languages, English, Media and Cultural Studies, Hispanic Studies, or from among courses within these disciplines as designated by the Executive Committee of the College of Humanities, Arts, and Social Sciences.
 - b) Philosophy, taken in the Department of Philosophy, or from among courses within this discipline as designated by the Executive Committee of the College of Humanities, Arts, and Social Sciences
 - c) Religious Studies, taken in the Department of Religious Studies, or from among courses within this discipline as designated by the Executive Committee of the College of Humanities, Arts, and Social Sciences
4. One additional course from the following:
 - a) History, the Fine Arts, Literature, Philosophy, Religious Studies
 - b) A foreign language at level 4 or above
 - c) A humanities course offered by Ethnic Studies; Comparative Ancient Civilizations; Creative Writing (courses in journalism); Humanities, Arts, and Social Sciences; Latin American Studies; Linguistics; Media and Cultural Studies; or Women's Studies

No course used to satisfy the English Composition requirement will apply toward Humanities credit.

No more than two courses in performance may be counted toward the Humanities requirement.

English Composition

Students must demonstrate adequate proficiency in English Composition by completing a one-year sequence of college-level instruction in English Composition with no grade lower than "C." UCR's sequence is ENGL 001A, ENGL 001B, and ENGL 001C. ENGL 01HC or ENGL 01SC may be substituted for ENGL 001C, but only one of these courses can be taken for credit. Transfer students who have credit for one semester of English Composition from another institution must take two additional quarters (i.e., ENGL 001B and ENGL 001C).

Students can use a score of 3 on the College Board Advanced Placement Test in English to satisfy ENGL 001A; they must complete ENGL 001B and ENGL 001C. Students with a score of 4 or 5 on the College Board Advanced Placement Test in English have satisfied ENGL 001A and ENGL 001B; they must complete ENGL 001C.

Beginning with their initial matriculation, students should enroll in an English composition course each quarter they are registered at UCR until the sequence of preliminary Entry Level Writing courses, if needed, and ENGL 001A, ENGL 001B, and ENGL 001C is completed with satisfactory GPA. A student may not receive baccalaureate credit for any work in English composition taken prior to completing the Entry Level Writing Requirement.

For the B.S. degree: 12 units

1. One course in world history (At UCR, courses that satisfy this requirement are HIST 010, HIST 015, or HIST 020.)
2. One course from among the following:
 - a) Fine arts (Art; Art History; Creative Writing courses in poetry, fiction, or playwriting; Dance; Media and Cultural Studies; Music; Theatre or from among courses within these disciplines as designated by the Executive Committee of the College of Humanities, Arts, and Social Sciences)
 - b) Literature taken in the departments or programs in Comparative Literature and Foreign Languages, English, Hispanic Studies, Media and Cultural Studies or from among courses within these disciplines as designated by the Executive Committee of the College of Humanities, Arts, and Social Sciences
 - c) Philosophy, taken in the Department of Philosophy, or from among courses within this discipline as designated by the Executive Committee of the College of Humanities, Arts, and Social Sciences
 - d) Religious Studies, taken in the Department of Religious Studies, or from among courses within this discipline as designated by the Executive Committee of the College of Humanities, Arts, and Social Sciences
3. One additional course chosen from the following:
 - a) History, the Fine Arts, Literature, Philosophy, Religious Studies
 - b) A foreign language at level 3 or above
 - c) Humanities courses offered by Ethnic Studies; Comparative Ancient Civilizations; Creative Writing (courses in journalism); Humanities, Arts, and Social Sciences; Latin American Studies; Linguistics; Media and Cultural Studies; or Women's Studies

No course used to satisfy the English Composition requirement will apply toward Humanities credit.

No more than one course in performance may be counted toward the Humanities requirement.

Social Sciences

For the B.A. degree: 16 units

1. One course must be taken in the departments of Economics or Political Science or from among courses within these disciplines as designated by the Executive Committee of the College of Humanities, Arts, and Social Sciences
2. One course must be taken in the departments of Anthropology, Psychology, or Sociology, or from among courses within these disciplines as designated by the Executive Committee of the College of Humanities, Arts, and Social Sciences
3. Social science courses offered by Ethnic Studies; Environmental Sciences; Geography (cultural geography courses); Human Development; Humanities, Arts, and Social Sciences; Women's Studies, or one of the disciplines in 1. or 2. above

For the B.S. degree: 12 units

1. One course must be taken in the departments of Economics or Political Science or from among courses within these disciplines as designated by the Executive Committee of the College of Humanities, Arts, and Social Sciences
2. One course must be taken in the departments of Anthropology, Psychology, or Sociology, or from among courses within these disciplines as designated by the Executive Committee of the College of Humanities, Arts, and Social Sciences

3. Social science courses offered by Ethnic Studies; Environmental Sciences; Geography (cultural geography courses); Human Development; Humanities, Arts, and Social Sciences; Women's Studies; or one of the disciplines in 1. or 2. above

Course work that may be taken to be used in partial satisfaction of the Humanities and the Social Sciences requirements must be evaluated by the college's Undergraduate Academic Advising Center. The college's Undergraduate Academic Advising Center, in consultation with the college Executive Committee, determines which courses apply to these requirements. It will implement this policy.

It is the student's responsibility to verify those courses that fulfill either the Humanities or the Social Sciences requirement, particularly the series of courses in cultural geography.

Ethnicity: 4 units

One course dealing with general concepts and issues in the study of race and ethnicity in California and the United States. Courses that satisfy this requirement must concentrate on one or more of four principal minority groups (African American, Asian American, Chicano/Latino, and Native American). These courses must be comparative in nature, analyzing the minority group experience within the present and historical context of other racial and ethnic groups, such as European-American minorities. The courses are to be offered by or cross-listed with the Department of Ethnic Studies.

Regardless of the student's college and major, the course may be counted toward the Humanities or the Social Sciences graduation requirements, depending upon the course's content as evaluated by the College of Humanities, Arts, and Social Sciences Executive Committee. Check with the college's Undergraduate Academic Advising Center for the courses that fulfill the Ethnicity requirement.

Foreign Language

For the B.A. degree: 16 units

This requirement may be fulfilled in one language by completing course 4 with a minimum grade of "C" or demonstrating equivalent proficiency; or by completing course 2 with a minimum grade of "C" in each of the two languages; or by demonstrating equivalent proficiency (level 2) in each of two languages. American Sign Language may also be used to satisfy this requirement. Biology and Neuroscience majors must complete four quarters of one language. Students who are pursuing a B.A. degree and who have not completed a foreign language course may enroll in a level-1 foreign language course. However, students must take a placement exam if they plan to take a course in the same foreign language that they studied in high school. The placement exam may be taken only once in each subject during a student's UCR career. Transfer students who have taken a college-level foreign language course should consult with an advisor.

Natural Sciences and Mathematics: 20 units

1. One course in Mathematics, Statistics, or Computer Science
2. One course in Biological Sciences (Biochemistry, Biology, Entomology, Nematology, Plant Biology, or Plant Pathology); the course must include a laboratory
3. One course in Physical Sciences (Chemistry, Physics, Earth Sciences, excluding cultural geography courses)
4. Two additional courses from areas (2) or (3) above or in physical and/or biological science courses offered in the Department of Environmental Sciences

This requirement may automatically be satisfied by lower-division requirements for the major.

Additional Courses: 16 units

For the B.S. degree: An additional 16 units of substantive course work in the student's chosen major or fields related to the major is required. The additional course work is specified by the major department.

Major Requirements

Detailed requirements for each major are found under the department listings in the Programs and Courses section of this catalog.

A major in the College of Natural and Agricultural Sciences shall consist of not fewer than 36 nor more than 60 upper-division units. No more than 9 units of courses in the 190-199 series may be counted in fulfilling the upper-division units needed for the major.

By the beginning of the junior year, students must consult with their advisor and choose a major. A GPA of at least 2.00 (C) in the upper-division courses taken in the major field is required for graduation.

Life Sciences Core Curriculum

A lower-division core curriculum prepares students for a wide variety of majors, including Biochemistry; Biology; Cell, Molecular, and Developmental Biology; Entomology; Microbiology; Neuroscience; and Plant Biology. Students complete a uniform core curriculum prior to advancing to upper-division courses. The curriculum is Introductory Biology (1 year, including laboratory), General Chemistry including laboratory (1 year), Organic Chemistry (1 year), Calculus (2 quarters), Physics including laboratory (1 year), Statistics (1 quarter), and Introductory Biochemistry (1 quarter). No more than 12 units of upper-division life sciences courses not being used to satisfy the core may be taken prior to completion of the core.

College Policies and Procedures

For detailed information on UCR policies and regulations see the Policies and Regulations section of this catalog.

College Regulations

Detailed information and specifics with regard to the college regulations governing undergraduate student status as approved by the faculty and contained in the *Manual of the Riverside Division of the Academic Senate* may be obtained from a faculty advisor or the college's Undergraduate Academic Advising Center.

Student Responsibility

Students are responsible for meeting deadline dates regarding enrollment, add/drop, change of grading basis, credit by examination, withdrawal, applications for graduation, declaration of candidacy, and other actions. The deadline dates are listed at registrar.ucr.edu and must be observed. Academic advising can be obtained in the college's Undergraduate Academic Advising Center, 1223 Pierce Hall.

Faculty Mentors

All students who declare a major upon entrance to the College of Natural and Agricultural Sciences are assigned to a department or interdepartmental faculty oversight committee granting the degree for that major or area of specialization. For assignment of faculty mentors, new students should report to the Undergraduate Academic Advising Center. Students in one of three undeclared options in the college are also advised in the college's Undergraduate Academic Advising Center.

Professional Academic Advisors

Students should keep in touch with their professional academic advisor housed in the Undergraduate Academic Advising Center on all academic matters, including choice of courses, consideration of a major, and requirements for graduation. Before consulting the academic advisor, students should formulate a tentative program according to their interests and needs and should be familiar with general university, college, and major requirements.

It is important that each student keep in mind that the advisor serves to assist students but does not administer the student's program. Students must be responsible for ensuring that they meet all requirements for graduation.

Course Enrollment

Before each quarter, students advance enroll in all courses they plan to take. Every student's course schedule must be approved by the student's academic advisor. Students are expected to register and enroll by the date set by the campus (visit registrar.ucr.edu for details).

Since the college expects all students to make regular progress toward their degrees, class schedules of less than 12 units must be approved by the Divisional Dean of CNAS Student Affairs. Repeated courses are considered part of the total unit load.

Students on probation may not register for more than 15 units in a quarter without consent of the Divisional Dean of CNAS Student Affairs. No student may enroll in less than 8 units (two classes).

During the first two weeks of the quarter, students make course enrollment changes via the Growl registration system (accessible through rweb.ucr.edu), and approvals by academic advisors and instructors are generally not required. After the second week of instruction ends, students must file an enrollment adjustment form online at myforms.ucr.edu to make changes. With the approval of their academic advisor and the course instructor, students may add courses to their class schedule up to noon on the end of the third week of classes. With the approval of their academic advisor, students may withdraw from a course up to noon on the end of the sixth week or change the grading basis up to noon on the end of the eighth week. For courses dropped after the second week, a "W" appears on the transcript, indicating withdrawal. Students may withdraw from all their courses up until the end of the tenth week of instruction. Students exercising this option will receive "W's" in all their courses for that quarter.

Enrollment on a Satisfactory/No Credit Basis

Students in this college who are not on probation may take nonmajor courses on an "S/NC" basis and other courses graded only on an "S/NC" basis, provided they do not exceed one third of the total units undertaken and passed (graded "S") on the UCR campus at the time the degree is awarded.

Courses required for the major and lower-division mathematics or science courses that are prerequisites to major courses cannot be taken on an "S/NC" basis.

A student may elect "S/NC" or delete "S/NC" from a course during the Growl enrollment period or later in the quarter by filing an enrollment adjustment form online at myforms.ucr.edu. The deadline is noon on the end of the eighth week of instruction and is listed each quarter at registrar.ucr.edu.

Regulations governing the "S/NC" option are described under Credit and Grades in the Policies and Regulations section of this catalog.

Credit by Examination

A student may petition for the privilege of examination for degree credit without formal enrollment in a particular course but must be in residence and not on academic probation. Arrangements for examination for degree credit must be made with the student's faculty mentor. Approvals of the faculty mentor, the Divisional Dean of CNAS Student Affairs of the college, and the instructor who is agreeing to give the examination are necessary before the examination may be given. The results of all examinations for degree credit are entered on the student's record as though the student had actually taken the courses of instruction.

Undergraduate Credit for Graduate Courses

Upper-division students with a UCR cumulative GPA of 3.00 or above may take a graduate course for undergraduate credit with the permission of the faculty advisor and the instructor concerned. Enrollment in more than 8 units of graduate coursework requires Divisional Dean of CNAS Student Affairs approval. See the CNAS Undergraduate Advising Center for more information.

Expected Progress for Undergraduate Students

At the close of each quarter, the courses, units, grades, and grade points earned are added to the student's cumulative university record. This record summarizes progress toward a degree. UCR requires all undergraduate students to make Expected Progress each academic year. A full-time undergraduate student is considered to be making Expected Progress towards a baccalaureate degree if the student:

- Passes at least 45 units each academic year
- Declares a major by the time the student earns 90 units
- Follows a program of study consistent with the student's declared major

Students who have not earned a minimum of 37 units each academic year, have not declared a major by the time they earn 90 units, or are not following a program of study consistent with the student's declared major are not considered to be making Expected Progress towards a baccalaureate degree.

Students who fail to make Expected Progress may be ineligible for continued registration. Continued registration will be at the discretion of the Divisional Dean of CNAS Student Affairs.

Students can access their advisory degree check on Growl (accessible through web.ucr.edu).

Declaration of Candidacy

Applications for graduation are available online at cnasgradapp.ucr.edu and must be filed by the deadline established for the quarter in which graduation is expected. The deadline for filing applications for graduation is listed at registrar.ucr.edu each quarter. If it is necessary to amend the prospective date of graduation during the quarter in which graduation is expected, the student must notify the college's Undergraduate Academic Advising Center, in writing, as soon as possible.

Applications are not accepted after the deadline established for the quarter in which the student intends to graduate. If for any reason the student does not meet the requirements for graduation after announcing candidacy, or fails to meet the deadline for filing, a new application must be filed for the subsequent quarter.

Students graduating *in absentia* after an absence of one or more quarters must apply for readmission to the university and file an Application for Graduation with the college Undergraduate Academic Advising Center.

Preprofessional Academic Preparation

Undergraduate academic preparation for several professional careers can be acquired in the College of Natural and Agricultural Sciences. Brief explanations of preprofessional academic programs follow.

Forestry Freshmen at UCR who plan to transfer after their sophomore year to UC Berkeley's College of Natural Resources, forestry program, should enroll in UCR's Plant Biology major. Interested students should consult the UC Berkeley General Catalog and contact Berkeley's College of Natural Resources for advising. Assistance is also available from the College of Natural and Agricultural Science's Undergraduate Academic Advising Center.

Medical Technology Training for Clinical Laboratory Scientist Prospective licensed clinical laboratory scientists should obtain a bachelor's degree in either biochemistry; biology; cell, molecular and developmental biology; and microbiology and complete any other requirements necessary. Students must apply independently to any of the state-approved programs in clinical laboratory science offered at various universities and hospitals. Following successful completion of this training and testing by the state of California the student is eligible to become a licensed clinical laboratory scientist. Prerequisites for entry change periodically, so interested students should obtain current information from the Health Professions Advising Center at hpac.ucr.edu. The state Department of Health also provides information on careers in this field.

Medicine and Dentistry Although the specific requirements of all medical and dental schools cannot be listed here, the general requirements are discussed below to indicate the various preprofessional programs available at UCR.

More than 90 percent of the students admitted to medical schools in the United States have attained the B.A. or B.S. degree, and a large proportion of those admitted to dental schools have three or more years of undergraduate work.

Leaders in medical and dental education urge prospective students to arrange their programs to obtain a broad general education, since the subject matter of the humanities and social sciences is not offered by the professional schools. It is recommended that students preparing to seek admission to medical or dental school obtain a bachelor's degree, to which all of UCR's preprofessional programs lead.

A student may satisfy the requirements for admission to medical or dental school in one of the following ways:

1. Completing the Biology major
2. Completing the Biochemistry major with a Medical Sciences emphasis
3. Completing a Biological Sciences major with the Medical Biology track
4. Completing the major in Chemistry
5. Majoring in any department but fulfilling concurrently the specific course requirements of medical or dental schools

Most medical and dental schools recommend that the courses shown above be taken in a preprofessional degree program. These courses should include laboratories.

Course Work for Medicine and Dentistry	Years
General chemistry	1
Organic chemistry	1
Physics	1
General biology	1
Upper-division biochemistry	
Upper-division genetics	
Mathematics through integral calculus	
Statistics	
Psychology	

The Thomas Haider Program at the UCR School of Medicine Students in any major at UCR are eligible to complete admission requirements and apply for up to 24 positions reserved for UCR students in the UCR School of Medicine. Students eligible to apply to this unique pathway into the UCR medical school, called the Thomas Haider Program at the UCR School of Medicine, are those who attend UCR for at least six consecutive quarters and complete their bachelor's degree at UCR. Information on this program and general admission to the UCR medical school is provided at medschool.ucr.edu, in the school's section of this catalog, in the medical school Student Affairs Office (1682A School of Medicine Education Building, (951) 827-4334), and at orientation meetings held at UCR.

Other Health Professions In addition to those described above, UCR offers the preprofessional requirements for entrance to other health professional schools, including optometry, pharmacy, podiatry, nursing, physical therapy, and physician assistant, among others. Information about these can be obtained from the Health Professions Advising Center (HPAC), hpac.ucr.edu, or the Career Center (Veitch Student Center).

Teaching The California Commission on Teacher Credentialing has established guidelines and standards that prepare students for teaching credentials. For a description of how students can prepare for the multiple-subject (elementary) and single subject (secondary) credentials, refer to individual departments in the Programs and Courses section of this catalog.

78 / Colleges and Academic Programs

After earning the bachelor's degree, the prospective teacher registers for an additional year of training in education theory and practice needed to obtain a teaching credential. Anyone considering obtaining a teaching credential should attend one of the credential information seminars offered by the Teacher Education Services Office, 1124 Sproul Hall, and consult with an advisor early in the planning of an academic program.

California Teach-Science/Mathematics Initiative (CaTEACH-SMI) Students with a talent for science, math or engineering can translate that ability into preparing for a teaching career in California through the California Teach-Science/Mathematics Initiative (CaTEACH-SMI). Students who partner with CaTEACH-SMI at UCR can complete a science, engineering, or mathematics degree and become eligible for an intern teaching credential in just four years. Beginning with the freshman year, students intern in a local primary or secondary classroom with a mentor teacher. At UCR, they can meet other CaTEACH-SMI students and their UCR peer mentor at the program's Resource Center, where students can receive credential advising. The CaTEACH-SMI Resource Center also provides future STEM teachers with material and financial resources, such as the SMI & Alpha Center Apprentice Programs and the NSF Noyce Scholarship Program. For more information contact smi@ucr.edu, visit the Resource Center at 1315 Pierce Hall, smi.ucr.edu, or facebook.com/ScienceMathInitiativeAtUcr.

The **Prepare to Teach Program** is a preprofessional program open to undergraduates from all majors who are interested in teaching in California elementary schools. Through this program, prospective elementary school teachers gain early field experience in the schools and learn more about the profession. Advising includes information on state requirements that are best met before graduation. For more information, contact the Office of Interdisciplinary Programs; 3116 Interdisciplinary Building South; or call (951) 827-2743.

Veterinary Medicine The course work at UCR is designed to prepare students to meet the requirements for admission to California's veterinary programs, the School of Veterinary Medicine at UC Davis, and the Western University of Health Sciences in Pomona. Students should consult the Health Professions Advising Center (visit hpac.ucr.edu), the UC Davis General Catalog, or the Western University Web site westernu.edu/veterinary/home.xml for additional details.

The Marlan and Rosemary Bourns College of Engineering

Office of Student Academic Affairs
A159C Bourns Hall
University of California, Riverside
Riverside, CA 92521-0144
(951) 827-ENGR (3647); student.engr.ucr.edu/

The Marlan and Rosemary Bourns College of Engineering emphasizes fundamental disciplines of engineering and computer science, introducing students to the new technologies necessary for today's highly technical environments.

The vision of the Bourns College of Engineering is to become a nationally recognized leader in engineering research and education. Its mission is to

- Produce engineers with the educational foundation and the adaptive skills necessary to serve rapidly evolving technology industries
- Conduct nationally recognized engineering research focused on providing a technical edge for the United States
- Contribute to knowledge in both fundamental and applied areas of engineering
- Provide diverse curricula that will instill in our students the imagination, talents, creativity, and skills necessary for the varied and rapidly changing requirements of modern life and to enable them to serve in a wide variety of other fields that require leadership, teamwork, decision making, and problem-solving capabilities
- Be a catalyst for industrial growth in the Inland Empire region of Southern California

The majors offered by the college are based on the needs of the practicing professional and are founded on a solid core of mathematics and the sciences. Breadth in the educational experience is represented by requirements in arts, humanities, and social sciences and by emphasis on oral and written communication skills. The principles and practice of engineering and computer science are provided in lecture and related laboratory courses. All students must choose a set of technical electives, emphasizing synthesis and design, to complete their undergraduate programs.

Majors

A major is a coordinated group of upper-division courses (courses numbered 100–199) in a field of specialization. The major may be a group of upper-division courses within a single department or program, or a group of related courses from several departments or programs. Before enrolling in upper-division courses, students may be required to gain appropriate knowledge by completing specific prerequisite courses. With the assistance of a departmental advisor, students are expected to select lower-division courses which prepare them for the advanced studies they propose to follow.

Change of Major or Double Majors

A student in good standing may request to change from one major to another by filing a Major Change Petition with the Office of Student Academic Affairs.

A student in good standing may elect to take a second major within the college. The student must file a declaration of a second major with the Office of Student Affairs. A course used to satisfy the requirements for one major may be used to fulfill the requirements of a second major as well. However, of the required upper-division units, a minimum of 24 must be unique to each major, and both majors must be completed within the maximum unit cap of the primary Engineering major.

A student in good standing may elect to take a second major in another college. A declaration of such a second major must be signed by the deans of both colleges and filed by the student with the primary college.

Bourns College of Engineering Undergraduate Majors and Options

Major	Degrees
Bioengineering ¹	B.S.
Business Informatics	B.S.
Chemical Engineering ¹	B.S.
Biochemical Engineering	
Chemical Engineering	
Nanotechnology	
Computer Engineering ¹	B.S.
Computer Science ²	B.S.
Electrical Engineering ¹	B.S.
Environmental Engineering ¹	B.S.
Air Pollution Control Technology	
Water Pollution Control Technology	
Materials Science and Engineering	B.S.
Mechanical Engineering ¹	B.S.
Design and Manufacturing	
Energy and Environment	
General Mechanical Engineering	
Mechanics of Materials and Structures	

¹ A combined B.S.+M.S. program is offered in this discipline (designed to lead to a B.S. degree as well as an M.S. degree in five years).

A student will meet requirements of both primary and secondary majors and the college requirements of the primary major, if they are both in the same baccalaureate class. If the two majors lead to different degree designations (B.S. and B.A.), that fact will be noted on the transcript, but only one diploma indicating both degree designations will be issued upon successful completion of such a double major program. Furthermore, if the double major is a mixed B.S./B.A., the college requirements of both majors must be met. A course used to satisfy the requirements for one major may be used to fulfill the requirements for a second major as well. However, of the required upper-division units, a minimum of 24 must be unique to each major, and both majors must be completed within the maximum unit cap of the primary Engineering major. A student who has declared a double major may graduate in one major upon the completion of all requirements for that major but may not continue in the university for completion of the second major. For details, please contact the Office of Student Academic Affairs.

Minors

The Bourns College of Engineering currently has a minor in Computer Science. Minors in the college shall consist of not fewer than 20 nor more than 28 units of organized upper-division courses. No more than 4 units of 190–199 courses may be used in fulfilling the upper-division unit requirement for a minor. Overlap may occur between the upper-division course requirements of the major and the minor only to the extent permitted by the department, programs, or interdisciplinary committee offering the minor, or the college of the minor. Courses used, or prerequisite to those used, in fulfilling the minor may be taken on an "S/NC" basis only on approval of the dean. The department, program, or interdisciplinary committee offering the minor is responsible for student and administrative issues pertaining to the minor. Students must file a declaration of a minor at least two quarters before graduation and must be in good academic standing at the time of filing. A minor requires the signature of the department chair or chair of the faculty committee which supervises the minor and the signature of the dean of the college. A GPA of at least 2.00 in upper-division courses in the field of the minor is a graduation requirement. When all other requirements for graduation have been met, the student will be graduated without the minor if the minimum GPA in the minor field has not been met.

University Honors Program

For a description of the University Honors Program, see Educational Opportunities section in the section Introducing UC Riverside. For a listing of requirements and courses, refer to University Honors Program in the Programs and Courses section of this catalog.

Admission to Majors

Admission of Freshmen Prospective Bourns College of Engineering students must complete high school programs that meet UC requirements as described in the Undergraduate Admission section of this catalog.

Course Work	Years
Algebra	2
Plane Geometry	1
Trigonometry (often contained in Precalculus or Algebra II, strongly suggested)	1/2
Chemistry or Physics, with laboratory (preferably both)	1

In addition, appropriate high school mathematics and science course work should include the following:

A supplemental screening process for majors in the Bourns College of Engineering places emphasis on the GPA earned in college preparatory course work, especially mathematics and science, and on aptitude test scores. Qualification for first-year calculus is also expected. UC-eligible students not qualifying for the preferred major are considered for admission to their alternate major.

Application should be made during the priority filing period (November 1–30).

Transfer Students All transfer students must meet the UC requirements for admission as described in the Undergraduate Admission section of this catalog. The Bourns College of Engineering accepts completion of IGETC as satisfying the majority of the college's breadth requirements for transfer students. Some additional breadth coursework may be required after enrollment at Bourns. For more information on BCOE breadth requirements, please contact the Office of Student Academic Affairs.

However, prospective applicants are strongly encouraged to focus instead on preparatory course work for their desired major, such as mathematics, science, and other technical preparatory course work, rather than on IGETC completion. Strong technical preparation is essential for success in the admissions process, and subsequently, in all coursework at Bourns.

Students intending to transfer to engineering majors are expected to complete the equivalent of UCR course work required in the first two years of the programs and to apply for transfer starting with their junior year. Specific information on transfer requirements may be obtained from the Office of Student Academic Affairs, (951) 827-ENGR (3647).

Financial Assistance The Bourns College of Engineering awards several scholarships to its students each year from funds provided by corporate and private sponsors. Other scholarships are available. Further information may be obtained by calling the Office of Student Academic Affairs, (951) 827-ENGR (3647).

Special Facilities See Research Opportunities in the section About UC Riverside in this catalog for a detailed description of the following centers:

- Center for Bioengineering Research
- Center for Environmental Research and Technology
- Center for Nanoscale Science and Engineering
- Center for Research in Intelligent Systems (including the Visualization and Intelligent Systems Laboratory)
- Center for Ubiquitous Communication by Light
- So Cal Research Initiative for Solar Energy
- Winston Chung Global Energy Center

Degree Requirements

Students in the Bourns College of Engineering must meet three levels of requirements for the Bachelor of Science degree: general university requirements, college requirements, and major requirements.

General University Requirements

General university requirements are listed at the beginning of the Undergraduate Studies section. For other UCR regulations including repetition of courses, concurrent enrollment, scholarship regulations, and incomplete (I) grades, see the Policies and Regulations section of this catalog.

In addition to the above general university requirements, the Bourns College of Engineering has the following unit requirement.

Unit Requirement

Most of the majors in this college require more than the nominal university requirement of 180 units for graduation. No more than 6 units of physical education activity may be counted toward this requirement. However, after having credit for 216 units or 120 percent of the units required for the major, a student is not permitted to continue except by approval of the dean when specific academic or professional reasons are involved.

College Breadth Requirements

All undergraduate students in the Bourns College of Engineering are required to satisfy the Campus Graduation Requirements mandated by the Academic Senate under Regulation R6. Detailed requirements are available in the Office of Student Academic Affairs. Internships and independent study courses may not be used to satisfy breadth requirements.

Breadth Requirement Unit Summary

For the B.S.

English Composition	Varies
Humanities	12
Social Sciences	12
Ethnicity (4 units) ¹	-
Natural Sciences and Mathematics	20
Total Units	44 plus English Composition

¹ The 4-unit ethnicity requirement can be applied to the Humanities or Social Science requirement, depending on content.

For the following requirements, a course is defined as a block of instruction that carries credit of 4 or more units.

To provide depth in satisfying breadth in the humanities and social sciences, courses must meet the following criteria:

At least two of the humanities and/or social science courses must be upper division.

At least two courses must be from the same subject area (for example, two courses in History), with at least one of the two being an upper division course.

English Composition

Students must demonstrate adequate proficiency in English Composition by completing a one-year sequence of college-level instruction in English Composition with no grade lower than "C." UCR's sequence is ENGL 001A, ENGL 001B, and one of ENGL 001C or ENGL 01SC, or an approved alternative under Writing Across the Curriculum. Transfer students who have credit for one semester of English Composition from another institution must take two additional quarters (i.e., ENGL 001B and either ENGL 001C or ENGL 01SC).

Students have the option of using a score of 3 on the College Board Advanced Placement Test in English to satisfy ENGL 001A; they must complete ENGL 001B and either ENGL 001C or ENGL 01SC or an approved alternative under Writing Across the Curriculum. Students with a score of 4 or 5 on the College Board Advanced Placement Test in English have satisfied ENGL 001A and ENGL 001B; they must complete ENGL 001C or ENGL 01SC or an approved alternative under Writing Across the Curriculum.

Students should enroll in an English composition course each quarter they are registered at UCR until the sequence of preliminary Entry Level Writing courses, if needed, and ENGL 001A, ENGL 001B, and ENGL 001C or ENGL 01SC or an approved alternative under Writing Across the Curriculum is completed with a satisfactory GPA. A student may not receive baccalaureate credit for any work in English Composition taken prior to completing the Entry Level Writing requirement.

Humanities: 12 units

Courses used to fulfill the Humanities requirements must be selected from an approved list available in the Office of Student Academic Affairs.

1. One course in World History
2. One course in one of the areas of Fine Arts, Literature, Philosophy, or Religious Studies
3. One additional course chosen from
 - a) History, the Fine Arts, Literature, Philosophy, Religious Studies
 - b) A foreign language at level 3 or above
 - c) Humanities courses offered by Ethnic Studies, Creative Writing (courses in journalism), Humanities and Social Sciences, Latin American Studies, Linguistics, or Women's Studies

No course used to satisfy the English Composition requirement can be applied toward Humanities credit. A list of approved courses is available in the Office of Student Academic Affairs.

Social Sciences: 12 units

Courses used to fulfill the Social Sciences requirements must be selected from an approved list available in the Office of Student Academic Affairs.

1. One course from Economics or Political Science
2. One course from Anthropology, Psychology, or Sociology
3. One additional social science course offered by Ethnic Studies, Geography (cultural geography courses), Human Development, or Women's Studies, or one of the disciplines in 1. or 2. above.

At least two of the humanities and/or social science courses must be upper-division. The list of approved courses is available in the Office of Student Academic Affairs.

Ethnicity: 4 units

Courses used to fulfill the Ethnic Studies requirement must be selected from an approved list available in the Office of Student Academic Affairs.

One course dealing with general concepts and issues in the study of race and ethnicity in California and the United States. Courses that satisfy this requirement must concentrate on one or more of four principal minority groups (African American, Asian American, Chicano/Latino, and Native American). These courses must be comparative in nature, analyzing the minority group experience within the present and historical context of other racial and ethnic groups, such as European-American minorities. The courses are to be offered by or cross-listed with the Department of Ethnic Studies. The list of approved courses is available in the Office of Student Academic Affairs.

Natural Sciences and Mathematics: 20 units

Courses used to fulfill the Natural Sciences and Mathematics requirements must be selected from an approved list available in the Office of Student Academic Affairs.

1. One course in Biological Sciences
2. One course in Physical Sciences. No course in cultural geography may be used.

3. One course in Mathematics or Computer Science or Statistics

4. Two additional courses in the Biological or Physical Sciences

Check with the Office of Student Academic Affairs for the courses that fulfill the biological sciences, physical sciences, and additional sciences. In some cases, these are satisfied by requirements of the major. The mathematics/computer science/statistics requirement is always satisfied by a major requirement.

Major Requirements

Detailed requirements for each major are found under the department listings in the Programs and Courses section of this catalog, and are available from the Office of Student Academic Affairs, (951) 827-ENGR (3647). A GPA of at least 2.00 ("C") in upper-division courses taken in the major field is required for graduation. Not more than 9 units of courses in the 190-199 series may be counted in fulfilling the upper-division units needed for the major.

College Policies and Procedures

For detailed information on UCR policies and regulations see the Policies and Regulations section of this catalog.

College Regulations

Detailed information and specifics with regard to the college regulations governing undergraduate student status as approved by the faculty and contained in the *Manual of the Riverside Division of the Academic Senate* can be obtained from the Dean's Office.

Student Responsibility

Students are responsible for meeting deadline dates regarding enrollment, add/drop, change of grading basis, credit by examination, withdrawal, declaration of candidacy, and other procedures. The dates are at registrar.ucr.edu and must be observed. Students are responsible for ensuring that they meet all requirements for graduation and that they attend the undergraduate faculty advisor's annual forum. Students are also responsible for obtaining their grades, selecting an appropriate collection of courses, and confirming their enrollment by relevant deadlines. Academic advising can be obtained in the Office of Student Academic Affairs.

Faculty Advisors

All Bourns College of Engineering students are advised on a regular basis. In addition, each department designates a faculty undergraduate advisor who is the primary contact in the student's areas of academic interest. Faculty advisors assist students in their undergraduate careers, as appropriate, and are also mentors in the student's areas of interest.

Course Enrollment

Students should plan their program of study carefully, in consultation with an academic advisor. Class schedules of fewer than 12 units must have the approval of the Divisional dean of the college.

Students who have not met the Entry Level Writing Requirement must enroll in an Entry Level Writing or qualifier course, as determined by their placement, during their first quarter of residency.

Students must attend class meetings. Students who do not attend in accordance with any published requirement listed at registrar.ucr.edu or on a course syllabus may be dropped from the course.

Students may add or drop a course via Growl through the second week of instruction. Beginning the third week of instruction, students must file an Enrollment Adjustment Form to make changes and obtain required approvals. During the third week of classes, students may, with the consent of the instructor and the approval of their academic advisor, add a course. Students may drop a course until the end of the sixth week of instruction, but courses dropped after the second week of instruction require an academic advisor's signature and result in a "W" (for withdrawal) noted on the transcript. Changes in enrollment after deadlines published at registrar.ucr.edu require the approval of the associate dean of the college.

82 / Colleges and Academic Programs

A student on probation may enroll for more than 13 quarter units only with the consent of the associate dean of the college.

With the approval of the associate dean, students may withdraw from the university at any time prior to the end of instruction.

Any changes in a student's class schedule not covered by the above regulations must have the approval of the associate dean.

Enrollment on a Satisfactory/No Credit Basis

A student in good standing may enroll and receive credit for courses graded "S." However, the "S/NC" grading system cannot be used for any course that is used to fulfill major or breadth requirements, except for any required course which is restricted to "S/NC" grading and up to 8 units of courses in the humanities and social sciences. Exceptions to this policy may be granted, upon petition, by the student's advisor and the Executive Committee.

Students may change their grading basis in a course from letter grading to "S/NC" (or vice versa) up to the end of the eighth week of instruction.

Regulations governing the "S/NC" option are described under Credit and Grades in the Policies and Regulations section of this catalog.

Credit by Examination

A student may petition for the privilege of examination for degree credit without formal enrollment in a particular course, but must be in residence and not on academic probation. Arrangements for examination for degree credit must be made with the student's advisor. Approvals of the advisor, the dean of the college, and the instructor who is agreeing to give the examination are necessary before the examination may be given. The results of all examinations for degree credit are entered on the student's record as if the student had actually taken the courses of instruction.

Expected Progress for Undergraduate Students

At the close of each quarter, the courses, units, grades, and grade points earned are added to the student's cumulative university record. This record summarizes progress toward a degree. Lack of adequate progress may jeopardize continued registration. Students can access their advisory degree check on Growl (accessible through rweb.ucr.edu).

Declaration of Candidacy

Applications for graduation are available in the Office of Student Academic Affairs and must be filed by the deadline established for the quarter in which graduation is intended. The deadline for filing applications for graduation is listed at registrar.ucr.edu each quarter. Applications are not accepted after the deadline established for the quarter. If for any reason a student does not meet the requirements for graduation after announcing candidacy, or if a student fails to meet the deadline for filing, an application must be filed for a subsequent quarter.

California Teach Science/Mathematics Initiative (CaTEACH-SMI)

California Teach-Science Mathematics Initiative (CaTEACH-SMI) has a goal of addressing the critical need of highly qualified K-12 science and mathematics teachers in California. With an economy increasingly reliant on science, technology, engineering, and mathematics (STEM) and the anticipated large scale retirement of qualified teachers, this is an essential time to explore and prepare for a career in teaching science or mathematics.

CaTEACH-SMI at UCR offers undergraduate students paid/unpaid opportunities, such as the SMI & Alpha Center Apprentice Programs, to explore STEM teaching as a career option. Through CaTEACH-SMI, students receive advising and mentoring to prepare for entrance into an intern teaching credential program while diligently coordinating with academic advisors to ensure completion of STEM degree requirements. The CaTEACH-SMI Resource Center provides future STEM teachers with material and financial resources which includes the NSF Noyce Scholarship Program, to promote planning and professional development towards a science/mathematics education career.

For more information about the CaTEACH-SMI program, please visit smi.ucr.edu, the Resource Center at 1315 Pierce Hall, or on Facebook at facebook.com/ScienceMathInitiativeAtUcr.

The School of Business Administration

Student Affairs:

Mission Statement

The School of Business Administration is composed of The A. Gary Anderson Graduate School of Management and the Undergraduate Business Programs. The school is dedicated to the pursuit of excellence in substantive scholarly research enhancing the world's base of knowledge about organizations, their environments, and their management, and to the transmission of this knowledge through quality educational programs to students, alumni, business managers, and the public. SoBA is accredited by AACSB International - The Association to Advance Collegiate Schools of Business.

The School

The School of Business Administration (SoBA) emphasizes growing strengths in the areas of marketing, supply chain management, accounting, and finance. The school resides in a 30,000-square-foot home featuring state-of-the-art research and teaching facilities.

The SoBA Microcomputer Facility offers software packages in statistics, databases, spreadsheets, financial planning, management science, econometrics, graphics, word processing, and Internet connections. The facility is used for teaching, class demonstrations, theses, and research projects. Students learn computing skills in SoBA courses with special computing requirements, and in optional seminars.

The UCR Library, with more than 2 million bound volumes, 13,000 serials, and 1.6 million microforms, including extensive literature in the management field, provides substantial support for student and faculty research.

Student evaluations of courses are an important part of the evaluation of curriculum and faculty performance.

Undergraduate Program in Business Administration

The School of Business Administration offers an upper-division major in Business Administration intended for students who seek a professional education in the functional fields of private sector management. Students who are admitted into the Pre-Business program during their freshman and sophomore years receive advising through the College of Humanities, Arts, and Social Sciences (CHASS). After admission to the major, students are advised by the SoBA Undergraduate Business Programs Office. In addition to administering the program, SoBA also teaches courses in the functional areas of management such as finance, accounting, human resources management, marketing, operations and supply chain management, and management information systems. The B.S. degree in Business Administration is awarded by The School of Business Administration. SoBA policies, as detailed below, align with those of the College of Humanities, Arts, and Social Sciences.

Majors

A major is a coordinated group of upper-division courses (courses numbered 100-199) in a field of specialization. The major may be a program of upper-division courses within a single department (departmental major), a group of related courses involving a number of departments (interdisciplinary major), or a group of courses chosen to meet a special interest.

Before enrolling in certain upper-division courses, students may be required to gain appropriate knowledge by completing specific prerequisite courses. With the assistance of a departmental advisor, students are expected to select lower-division courses that prepare them for the advanced studies they propose to follow.

Choosing a Major, Undeclared Majors

While freshmen may choose an academic major on entering UCR, those who are unsure about specific academic goals may request to be admitted to CHASS as undeclared. These students often take introductory courses in the natural sciences, social sciences, humanities, and fine arts while searching for an area that most excites their interest. Undeclared majors are encouraged to meet with an advisor in the Student Academic Affairs Office in CHASS about their selection of courses.

Students with 90 or more units toward a degree must declare a major. To declare a major, students must obtain approval from the Student Academic Affairs Office by filing a Petition for Declaration of Major. Students who do not declare a major by 90 or more units may have a hold placed on their registration.

Double Majors

Students can declare a second major in a department or program of another college. Changes are not permitted while on academic probation or during the final senior year (135 units or more). Both majors must be completed within the maximum limit of 216 units, and approval must be obtained from advisors in both departments or programs. In such cases, all course requirements must be completed for each of the two majors chosen. One of the two majors must be designated as the primary major for the purpose of satisfying breadth or general education requirements. No more than 8 upper-division units may count for both majors simultaneously.

A declaration of two majors in different colleges must be signed by the deans of the colleges concerned and filed by the student with the college of the principal major. If the two majors lead to different degrees (B.S. and B.A.), that fact will be noted on the transcript, but only one diploma indicating both degree designations will be issued upon successful completion of such a program. Furthermore, if the double major is a mixed B.S./B.A., the college requirements for both majors must be met.

Students wishing to declare a second major must present an outline to the SoBA Undergraduate Business Programs Office, indicating which major will be used to satisfy breadth requirements and any overlap courses between the two majors.

Internships, Independent Projects and Student Research

The School of Business Administration student can often practice the subject, as well as read about it. Many undergraduates have the opportunity to work with a faculty member on a research project, and many departments offer field work and internship courses. In these courses, students combine several hours per week of experience in an agency or firm with study of related academic materials and participation in a seminar, where formal knowledge and practical experience are related to one another.

Normally, each local internship does not count for more than 4 or 5 units in a single term, larger numbers of units being reserved for quarter-away internships. Petitions for credit beyond 5 units in a single quarter for a local internship must have the sponsoring agency's approval and a written justification by the student's faculty sponsor. All such requests require the associate dean's approval.

A maximum of 16 units of credit toward the bachelor's degree may be obtained through internship courses, with a maximum of 12 units of internship scheduled in a single quarter for quarter-away situations. Students who are on academic probation may not enroll in internship courses.

Transfer of Majors, Changing Majors

Students in good academic standing can petition to transfer from another college to The School of Business Administration. The petition must be approved by the Undergraduate Business Programs Office before the

change can be processed by the Office of the Registrar. Changes are not permitted while on probation or during the final senior year (135 units or more).

Students who fail to attain a GPA of 2.00 ("C") in preparation for the major or courses required for the major may be denied the privilege of entering or continuing in that major.

Minor in Business Administration

The School of Business Administration offers a minor; however, no student is required to take a minor. Minors are not degree-granting majors; they are sequences of supplemental courses designed to enhance work in certain areas. Any minor may be taken jointly with any departmental or interdepartmental major. Minors in the college shall consist of not fewer than 16 nor more than 28 units of organized upper-division course work. No overlap may occur among courses used to satisfy upper-division course requirements for a major and a minor. A GPA of at least 2.00 is required in upper-division courses in the field of the minor.

A minor is a set of courses focused on a single discipline or an interdisciplinary thematic area. There can be no substitution for the courses listed as constituting a minor without approval of the governing department or committee. There is no limit on the number of minors a student can declare. Students must declare the minor(s) before their final degree check before graduation by completing a petition with the Student Affairs Office in the College of Humanities, Arts, and Social Sciences, the College of Natural and Agricultural Sciences, the Bourns College of Engineering, or the School of Business Administration, depending on their major. Prior approval by the department or committee offering the minor is required. The minor is noted on the transcript at the time the degree is conferred.

University Honors Program

For a description of the University Honors Program, see Educational Opportunities in the front of this catalog. For a listing of requirements and courses, refer to University Honors Program in the Programs and Courses section.

Undergraduate Pre-Business Program

Pre-Business is a two-year program that prepares students to apply to the Business Administration major. Students who elect Pre-Business are advised in the College of Humanities, Arts, and Social Sciences during their freshman and sophomore years. Students who elect Pre-Business must gain admission to Business Administration by the time they have earned 90 units.

Degree Requirements

Students in The School of Business Administration must meet three levels of requirements for the Bachelor of Science degree: general university requirements, college requirements, and major requirements.

General University Requirements

General university requirements are listed at the beginning of the Undergraduate Studies section. In addition, The School of Business Administration has the following requirements and limitations.

Unit Requirements

Students must satisfactorily complete for credit a minimum of 180 units for the bachelor's degree. A maximum of 216 units is allowed. After having credit for 216 units, students are not permitted to continue except in cases approved by the associate dean in which specific academic or professional reasons are involved.

Credit Limitations

Transfer students with credit from other institutions (advanced standing credit), receive a transfer profile from the Office of Undergraduate Admissions. The Undergraduate Business Programs Office evaluates the course work, indicating how the transferable credits are applied toward the degree. However, the following credit limitations may reduce the total number of units which apply toward the degree in The School of Business

Administration. Students should meet with an academic advisor in their major for questions regarding transfer credits.

The following credit limitations apply for all students enrolled in the college:

1. After completing 105 quarter units at a community college, students are not allowed further units for courses completed at a community college.
2. No more than 6 units in physical education activity courses may be applied toward the 180-unit requirement for the bachelor's degree.
3. No 400 series courses and not more than three courses in the 300 series of courses may be counted toward the 180 unit requirement for the bachelor's degree.
4. No more than 5 units of credit may be taken per quarter in special studies courses. See specific restrictions under each departmental listing regarding credit toward the major in special studies courses.

College Breadth Requirements

The Undergraduate Business Programs Office, in consultation with the Executive Committee of the School of Business Administration, determines which courses apply to the following requirements. It is the student's responsibility to verify those courses that fulfill these subject requirements. To search for courses that meet specific breadth requirements, visit registrar.ucr.edu.

Courses taken in the department or program of a student's major (including courses cross-listed with the major) may not be applied toward the breadth requirements. However, courses outside the major discipline, but required for the major, may be applied toward satisfaction of these requirements. Students who elect a double major may apply courses in one of the majors toward satisfaction of the breadth requirements.

For the following requirements, a course is defined as a block of instruction which carries credit of 4 or more units.

No course may be applied to more than one breadth requirement, with the exception of the course taken to meet the Ethnicity requirement. Internship and independent studies courses may not be used to satisfy breadth requirements.

The School of Business Administration Breadth Requirement Unit Summary

For the B.S.

English Composition	Varies
Humanities	20
Social Sciences	16
Ethnicity (4 units) ¹	—
Foreign Language (level 3)	12
Natural Sciences and Mathematics	20
Total Units	68 plus English Composition

¹ The 4-unit ethnicity requirement can be applied to either the Humanities or Social Sciences requirement, depending on content.

English Composition

Students must demonstrate adequate proficiency in English Composition by completing a one-year sequence of college level instruction in English Composition with no grade lower than "C." Students should enroll in an English composition course each quarter they are registered at UCR until the sequence of preliminary Entry Level Writing courses, if needed, and ENGL 001A, ENGL 001B, ENGL 001C is completed with satisfactory GPA.

Transfer students who have credit for one semester of English Composition from another institution are required to take two additional quarters, i.e., ENGL 001B and ENGL 001C.

Students have the option of using a score of 3 on the College Board Advanced Placement Test in English to satisfy ENGL 001A; they must complete ENGL 001B and ENGL 001C.

Students with a score of 4 or 5 on the College Board Advanced Placement Test in English have satisfied ENGL 001A and ENGL 001B; they must complete ENGL 001C.

In lieu of ENGL 001C, students can complete their last quarter of the English Composition requirement by earning a “C” or better in BUS 100W. (As a prerequisite to either course, students must earn a “C” or better in ENGL 001B.)

Humanities: 20 units

For the B.S. degree

1. One course in World History (At UCR, courses that satisfy this requirement are HIST 010, HIST 015, or HIST 020.)
2. One course from the following:
 - a) Fine arts (Art, Art History, Dance, Media and Cultural Studies, Music, Theatre, Creative Writing courses in poetry, fiction, or playwriting)
 - b) Literature (taken in the departments of English, Comparative Literature and Foreign Languages, or Hispanic Studies)
 - c) Philosophy
 - d) Religious Studies
3. Three additional courses from the following:
 - a) History, the Fine Arts, Literature, Philosophy, Religious Studies
 - b) A foreign language at level 3 or above (Courses used in fulfillment of the foreign language requirement may not be used to meet this requirement.)
 - c) Humanities courses offered by Ethnic Studies; Creative Writing (courses in journalism); Humanities, Arts, and Social Sciences Interdisciplinary; Latin American Studies; Linguistics; or Women's Studies

Social Sciences: 16 units

1. One course in Economics or Political Science
2. One course in Anthropology, Psychology, or Sociology
3. Two additional social science-related courses from Comparative Ancient Civilizations, Ethnic Studies; Environmental Sciences; Geography (cultural geography courses); Human Development; Humanities, Arts, and Social Sciences Interdisciplinary; Women's Studies; or one of the disciplines in 1. or 2. above.

Ethnicity: 4 units

One course focusing on the general concepts and issues in the study of race and ethnicity in California and the United States. Courses that satisfy this requirement must concentrate on one or more of four principal minority groups (African American, Asian American, Chicano/Latino, and Native American). These courses must be comparative in nature, analyzing the minority group experience within the present and historical context of other racial and ethnic groups, such as European-American minorities. The courses are to be offered by or cross-listed with the Department of Ethnic Studies.

Refer to the Programs and Courses section for the courses that fulfill the Ethnicity requirement.

Foreign Language

Courses in American Sign Language may be used to meet this requirement.

For the B.S. degree: course level 3 or equivalent

This requirement may be satisfied by students (except for foreign language majors who satisfy the spirit of the language requirement by majoring in one or more languages) by completing the third-quarter level or its equivalent in one language at UCR (or at another college or university) with a minimum grade of “C” or by demonstrating proficiency at the third-quarter level on a foreign language placement exam offered by one of the foreign language departments at UCR. This test does not yield unit credit; it only determines whether the Foreign Language requirement has been met, or in which course of the language sequence a student should

enroll. The placement exam may be taken only once in each subject during a student's UCR career. Students continuing with the same foreign language they completed in high school must take a placement exam (visit placementtest.ucr.edu for dates and locations). Credit will be allowed only at the course level for which they qualify according to the placement exam.

Natural Sciences and Mathematics: 20 units

1. One course in Mathematics, Statistics, or Computer Science
2. One course in Biological Sciences (Biochemistry, Biology, Botany and Plant Sciences, Entomology, Nematology, or Plant Pathology)
3. One course in Physical Sciences (Chemistry, Physics, Earth Sciences, excluding cultural Geography courses)
4. Two additional courses from the areas listed above or in physical and/or biological science courses offered in the Department of Environmental Sciences

New General Education Concentration Options

Students who choose to satisfy Breadth with the new General Education Concentration Option may choose either the California Concentration or the Climate Change/Sustainability Concentration listed below. One of these concentrations satisfies campus breadth requirements.

English Composition

Students must demonstrate adequate proficiency in English Composition by completing a one-year sequence of college level instruction in English Composition with no grade lower than “C.” Students should enroll in an English composition course each quarter they are registered at UCR until the sequence of preliminary Entry Level Writing courses, if needed, and ENGL 001A, ENGL 001B, ENGL 001C is completed with satisfactory GPA.

Transfer students who have credit for one semester of English Composition from another institution are required to take two additional quarters, i.e., ENGL 001B and ENGL 001C.

Students have the option of using a score of 3 on the College Board Advanced Placement Test in English to satisfy ENGL 001A; they must complete ENGL 001B and ENGL 001C.

Students with a score of 4 or 5 on the College Board Advanced Placement Test in English have satisfied ENGL 001A and ENGL 001B; they must complete ENGL 001C.

General Education Options

A. California Concentration (Total units: 36-37)

1. ENGL 012B; AHS 021; STAT 040, MATH 004 or MATH 005 (12-13 units)
2. Two of: BPSC 021, BPSC 031, GEO 004 (8)
3. ETST 135 or ETST 154 (4)
4. HIST 138 or HIST 140 (4)
5. POSC 198-I (4)
6. HASS 190 (4)

B. Climate Change/Sustainability Concentration (Total units: 40-41)

1. GEO 011 (4 units)
2. Two of: ENSC 002, BIO 003, GEO 002, PHYS 018 (8)
3. Two of: ENGL 012B, AHS 021, CPLT 025 (8)
4. STAT 040, MATH 004 OR MATH 005 (4-5)
5. Two of: PHIL 117, ANTH 132 or ANTH 137, GEO 160 (8)
6. GEO 198-I (4)
7. GEO 190 (4)

Ethnicity: 4 units

Unless otherwise noted, students taking a new General Education Concentration Option will still have to satisfy the campus Ethnic Studies requirement.

Foreign Language

Courses in American Sign Language may be used to meet this requirement.

For the B.S. degree: course level 3 or equivalent

This requirement may be satisfied by students (except for foreign language majors who satisfy the spirit of the language requirement by majoring in one or more languages) by completing the third-quarter level or its equivalent in one language at UCR (or at another college or university) with a minimum grade of "C" or by demonstrating proficiency at the third-quarter level on a foreign language placement exam offered by one of the foreign language departments at UCR. This test does not yield unit credit; it only determines whether the Foreign Language requirement has been met, or in which course of the language sequence a student should enroll. The placement exam may be taken only once in each subject during a student's UCR career. Students continuing with the same foreign language they completed in high school must take a placement exam (visit placementtest.ucr.edu for dates and locations). Credit will be allowed only at the course level for which they qualify according to the placement exam.

Note, in order to be enrolled in one of the concentrations, students must first see their academic advisor and then receive written approval from Professor George Haggerty, chair of the General Education Advisory Committee.

Major Requirements

Detailed requirements for the Business Administration major can be found under the department or program listing in the Programs and Courses section of this catalog.

A major in The School of Business Administration shall consist of not fewer than 36 upper-division units. All courses applied toward the major and preparation for the major must be taken for a letter grade unless otherwise approved by the department chair. A 2.00 GPA in upper-division courses in the major is required for graduation. Once enrolled on this campus, students must complete all courses designated for a major in regular or summer sessions at UCR; exceptions to this policy must be approved by the department chair and by the associate dean.

Candidates for the B.S. degree may not receive more than 108 units of credit toward the degree for work taken in the major discipline (i.e., students must take at least 72 units outside the major discipline).

To receive the bachelor's degree, transfer students must complete a minimum of 16 upper-division units in the major on the Riverside campus.

Students who have been away from the university for several terms should consult with their major departmental advisor about the requirements under which they may graduate. See the Catalog Rights Policy for Undergraduate Degrees in the Policies and Regulations section of this catalog.

College Policies and Procedures

For more information on UCR policies and regulations see the Policies and Regulations section of this catalog.

College Regulations

Refer to The School of Business Administration Web site at soba.ucr.edu for more information on college policies and procedures.

Student Responsibility

Students are responsible for meeting deadline dates regarding enrollment, add/drop/withdrawal, change of grading basis, credit by examination, declaration of candidacy, and other actions. The dates are online at registrar.ucr.edu and must be observed. Advising can be obtained in the Undergraduate Business Programs Office, 2340 Olmsted Hall.

Academic Advising

It is the student's responsibility to meet all graduation requirements: general university, college, and major. Pre-Business students are advised in CHASS Student Affairs (see a list of departmental staff for academic affairs at chassstudentaffairs.ucr.edu). As Pre-Business students are accepted in to the Business Administration program, they are advised by academic advisors in the Office of Undergraduate Business Programs (see a list of departmental staff for academic affairs at soba.ucr.edu).

Undeclared students are also advised through the Student Academic Affairs Office in CHASS. A staff of academic advisors is readily available to assist with questions pertaining to academic regulations and procedures, selection of courses which satisfy breadth requirements, major options, and alternatives. Students who need to confer with an advisor about overall degree requirements, academic difficulty, program planning, or assistance in selecting a major need to schedule an appointment with their advisor.

Course Enrollment

Students are required to register and enroll by the date set by the campus (visit registrar.ucr.edu for details).

The recommended study load for undergraduate students is 15 to 16 units per quarter. This is the average quarterly load to ensure steady progress for graduation in four years. The minimal program for an undergraduate student to be considered full time is three courses (12 units) per quarter. The normal progress for an undergraduate student is four courses (16 units) per quarter.

A class schedule of fewer than 12 units must be approved by the associate dean (visit registrar.ucr.edu for details). The college has established enrollment limits beyond which students require academic advisor approval. The limits are as follows: students in good academic standing, 20 units; students on academic probation, 17 units; students on subject-to-dismissal status, 15 units. Students on probation may not take courses on an "S/NC" basis.

After the second week of instruction, students may request changes by petition during a specified period. Petitions must usually be approved by the advisor and also, in the case of adds, by the instructor concerned. Changes to grading basis need advisor approval after the second week of classes. The associate dean must approve any changes in the class schedule requested after the regular petition period.

Courses (including Special Studies courses) can be added through the third week of instruction. Courses dropped after the second week of instruction will appear on the record with a "W" notation, signifying withdrawal. Students can withdraw from courses through the sixth week of instruction. The grading basis for a course can be changed through the eighth week of instruction. After the third week of instruction, a fee is required to file the petition to change the class schedule.

Enrollment on Satisfactory/No Credit Basis

Undergraduate students in good academic standing may receive credit for courses undertaken and graded "S" up to a limit of one-third of the total units undertaken and passed on the Riverside campus at the time the degree is awarded. Normally, this means no more than 4 units of "S/NC" per quarter. The total also includes courses graded only "S/NC." Courses that are required in, or prerequisite to, a major may not be taken on a "S/NC" basis unless approved by the chair of the major department. Students on special status or limited status may take courses on a "S/NC" basis only with the approval of the associate dean.

A student may elect "S/NC" or delete "S/NC" from a course by filing a petition (enrollment adjustment form) with the Registrar. The deadline is the end of the eighth week of instruction and is listed each quarter at registrar.ucr.edu. This deadline is strictly enforced.

Regulations governing the "S/NC" option are described under Credit and Grades in the Policies and Regulations section of this catalog.

Repetition of Courses

See Repetition of Courses in the Policies and Regulations section.

Part-time Study

For details, see Part-Time Study under the Finances and Registration.

Petitions

A petition is a form representing a student's need or desire to be excepted from any standard rule or regulation in the university. It is the only way to obtain formal approval from the department, the college or school, the Registrar, or whomever has authority over a particular request. Some petitions carry a small fee; others are free.

An approved petition for a waiver or substitution in degree requirements represents an agreement between the student, the college or school, and in some cases, the department chair, granting the student an exception from the existing regulations.

Petitions are also used at UCR to change college or major, enroll in fewer units than regulations permit, make late changes to a class schedule, obtain credit by examination, concurrent enrollment, or withdraw from the university. Petitions for most of these exceptions are available in the Office of Undergraduate Business Programs in Olmsted 2340, and Pre-Business and undeclared students can obtain these petitions in the Student Academic Affairs Office in CHASS. Please note that petitions for retroactive actions more than one year old will not be approved.

Credit by Examination

To earn credit for a course by examination without formal enrollment in that course, students must be in residence and in good academic standing.

Before the examination may be given, arrangements and approval for examination for degree credit must be made with the instructor appointed to give the examination, a faculty advisor (if the major department requires it), and the associate dean. Petitions must be filed with the Office of the Registrar no later than the third week of instruction. Credit by examination is not allowed for English Composition courses.

The results of all examinations for degree credit are entered on students' records as though they had actually taken the courses of instruction. There is a \$5 service charge for each petition. The credit by examination procedure may not be used as a means of improving a previous grade.

Undergraduate Credit for Graduate Courses

Students who have a GPA of at least 3.00 in all courses taken in the university or have shown exceptional ability in a special field may take a graduate course for undergraduate credit with the permission of the instructor concerned. Students must have completed at least 18 upper-division quarter units basic to the subject matter of the course.

Expected Progress for Undergraduate Students

At the close of each quarter, the courses, units, grades, and grade points earned are added to the student's cumulative university record. This record summarizes progress toward a degree. Lack of adequate progress may jeopardize continued registration. Students can access their advisory degree check on Growl (accessible through rweb.ucr.edu).

Applying for Graduation

To graduate from UCR, undergraduate students must file an application for graduation. The application must be submitted by 4 p.m. of the deadline date listed at registrar.ucr.edu. Applications are not accepted after the deadline established for the quarter.

Students should review their remaining requirements on Growl (accessible through rweb.ucr.edu) each quarter. They should also contact their academic advisor two quarters before expected graduation to confirm remaining requirements. Completion of the degree depends upon completion of any work in progress. During the graduation quarter, any changes made to a student's schedule after the third week of instruction should be immediately reported to the academic advisor.

If for any reason a student does not meet the requirements for graduation

after filing the application, another application must be filed for the appropriate quarter. Students graduating *in absentia* after an absence of one or more quarters must apply for readmission to the university and file an application for graduation.

All course work, whether taken at UCR or elsewhere, must be completed by the last day of UCR's finals week during the quarter of graduation (no GDs or Incomplete grades). Incomplete, IE, IP or GD grades on the transcript will stop the processing of the degree.

Once the application for graduation is filed, the student's name will be entered on the appropriate degree list. Students who need to amend the prospective quarter of graduation and who have submitted an application for graduation petition must notify the Undergraduate Business Programs Office, in writing, as soon as possible.

Withdrawals

Students may withdraw from the university prior to the end of instruction, for serious personal reasons, with the approval of the associate dean. Forms are available in the Undergraduate Business Programs Office.

The A. Gary Anderson Graduate School of Management

Master of Business Administration Program Through The A. Gary Anderson Graduate School of Management, the SoBA offers a professional graduate program leading to the Master of Business Administration (M.B.A.) degree.

The M.B.A. curriculum prepares students to excel in a competitive environment marked by unprecedented challenges and technological advances. Communication and computer skills are incorporated into a global approach to both the art and science of management. Most elective courses are seminar size and encourage participative learning. Computers and software are used extensively for teaching and effective management decision making. An internship program assists students in obtaining experience in their professional fields. The mixture of career professionals and recent baccalaureate graduates provides a stimulating and well-rounded classroom environment.

The **M.B.A. curriculum** balances the art and science of management, with a particular emphasis on managing through information, and recognizes the global context of management. The curriculum also emphasizes growing strengths in marketing, accounting, and finance. The first-year core courses of the two-year M.B.A. program provide a strong integrated foundation in the common body of knowledge for management. Thereafter, students take 28 to 36 units of electives offered in various fields, and complete a required internship, capstone course, and a thesis or case analysis.

The **FLEX M.B.A. program** provides an M.B.A. experience tailored according to one's schedule. It allows flexibility and convenience in attaining one of the most sought-after degrees. The FLEX M.B.A. is the program of choice for a broad swath of students. Among them might be full-time students who want to earn an M.B.A. on a fast track or who seek to take longer with their studies, international students looking for an M.B.A. at a top university, working professionals seeking a graduate degree without interrupting their careers, or individuals who need to accommodate responsibilities at home and with family as they pursue their academic goals.

The **M.Fin. program** addresses the substantial unmet demand for trained finance professionals. The program is best suited for students with a sufficient quantitative background to enable successful completion of the program. The program provides a comprehensive overview of the entire field of finance, with an emphasis on empirical methods and applications. The full-time, one-year program will enable graduates to gain the specialized expertise required for professional advancement, and prepare students who seek to pursue professional certifications in finance.

The **M.P.Ac. program** provides emerging professional accountants and auditors with advanced education in audit and assurance, taxation, accounting information systems and ethics. Accountants and auditors help to ensure that public, private and not for profit entities are run efficiently. Accountants and auditors analyze, verify and communicate financial information for various entities. They may also be involved with budget analysis, tax analysis, management consulting, financial and investment

88 / Colleges and Academic Programs

planning, information technology consulting as well as a broad array of assurance services. The M.P.Ac. degree is offered as a one year program (48 units) for graduates with a baccalaureate degree with a concentration or major in accounting. Other students without the equivalent of a baccalaureate degree with a concentration or major in accounting may be admitted to the program with the understanding that additional coursework may be required to earn the M.P.Ac. degree. Candidates will be admitted for the fall quarter only.

The **Interdepartmental Graduate Program in Management** offers both the Master of Arts (M.A.) degree and the Doctor of Philosophy Degree (Ph.D.). Concentrations are offered in two major field areas, Marketing and Strategic Management and Organizations. The Interdepartmental Graduate Program in Management trains doctoral students in the design and execution of original research in Management. While an M.A. degree may be earned en route to the Ph.D., admissions will only be to the Ph.D. program.

Distinctive features of the program include: a strong cross-disciplinary focus over and above the multi-discipline structure of SoBA; and the opportunity for Ph.D. students to focus on areas of strength in modeling, and decision making.

Admissions

Admission requirements for the programs are similar to requirements for the Graduate Division. In addition to transcripts, applicants should submit test scores from the Graduate Management Admissions Test (GMAT) or General Record Examination (GRE), and three letters of recommendation from persons knowledgeable about the applicant's academic ability and potential for success in the program.

Degrees and Credentials

The Graduate School of Education offers credential programs for students preparing for careers in elementary, middle school, and high school teaching; and teaching in classrooms for individuals with mild/moderate and moderate/severe disabilities. The programs prepare students to teach English learners and students from diverse backgrounds. The School offers a Master of Education (M.Ed.) degree with a General Education Teaching Emphasis. This is for qualified students earning a Multiple Subject or Single Subject credential and is generally completed in one academic year and a summer term. In addition, M.Ed. emphases in Autism, Higher Education Administration and Policy, Reading, Special Education, Diversity and Equity are also offered. A combined M.Ed. and credential in the areas of Reading, and Special Education are also available to qualified candidates. The school also offers M.A. and Ph.D. programs in Education, Society and Culture; Educational Psychology (with both General and Quantitative Methodology Specializations); Higher Education Administration and Policy (M.Ed. and Ph.D.); Special Education; and School Psychology. The M.A. in School Psychology may be awarded only to students matriculating in the School of Education Ph.D. programs. The Ph.D. in School Psychology is offered in combination with a Pupil Personnel Services Credential for School Psychology.

Graduate Study

Curricula are offered through the Graduate School of Education for the M.A., M.Ed. and Ph.D. degrees. These programs require broad training in education and in a cognate field of study. Further information can be found under Education Graduate and Credential Programs in the Programs and Courses section of this catalog or visit education.ucr.edu.

Teaching Credential Programs

Students planning to become teachers can pursue the following teaching credential programs in GSOE:

1. Multiple Subject (elementary school), in addition, students may add:
 - Bilingual emphasis in Spanish. Requires passage of the Spanish Proficiency Test and coursework in Latino American literature, Latin American culture and history, and bilingual/bicultural education. Students must also complete EDUC 176.
2. Single Subject (specified subject(s) at the middle school and high school level).
3. Education Specialist (special education) in the following specializations:
 - Mild/Moderate Disabilities: authorizes service for mild to moderate mental retardation; attention deficit and attention deficit hyperactivity disorders; serious emotional disturbance; and includes specific learning disabilities.
 - Moderate/Severe Disabilities: authorizes autism, deaf-blindness, moderate to severe mental retardation, multiple disabilities, and serious emotional disturbance.

Admission Admission to Teacher Education Programs is required in order to complete the professional and graduate level courses. The admission requirements vary depending on the credential specialization but at minimum students need a 3.0 GPA (calculated on the last two years of undergraduate studies), passage of the basic skills requirement, and subject matter competency. Students who want to be considered for an intern program or the M.Ed. General Education Teaching Emphasis have additional requirements. More information is available at progræducation.ucr.edu.

California Teach-Science/Mathematics Initiative (CaTEACH-SMI) California Teach-Science Mathematics Initiative (CaTEACH-SMI) has a goal of addressing the critical need for highly qualified K-12 science and mathematics teachers in California. With an economy increasingly reliant on science, technology, engineering, and mathematics (STEM) and the anticipated large scale retirement of qualified teachers, this is an essential time to explore and prepare for a career in teaching science or mathematics.

CaTEACH-SMI at UCR offers undergraduate students paid/unpaid opportunities, such as the SMI & Alpha Center Apprentice Programs, to explore STEM teaching as a career option. Through CaTEACH-SMI, students receive advising and mentoring to prepare for entrance into an intern teaching credential program while diligently coordinating with academic advisors to ensure completion of STEM degree requirements. The CaTEACH-SMI Resource Center provides future STEM teachers with material and financial resources which includes the National Science Foundation (NSF) Noyce Scholarship Program, to promote planning and professional development towards a science/mathematics education career.

For more information about the CaTEACH-SMI program, please visit smi.ucr.edu, the Resource Center at 1315 Pierce Hall, or on Facebook at [facebook.com/ScienceMathInitiativeAtUcr](https://www.facebook.com/ScienceMathInitiativeAtUcr).

The School of Medicine

Medical Student Affairs:
1682A School of Medicine Education Building
(951) 827-4333; fax: (951) 827-5504
medadmissions@ucr.edu; medschool.ucr.edu

Ph.D. Program in Biomedical Sciences
1140 Batchelor Hall
(951) 827-5621

Mission Statement

The mission of the UCR School of Medicine is to improve the health of the people of California and, especially, to serve inland Southern California by training a diverse workforce of physicians and by developing innovative research and health care delivery programs that will improve the health of the medically underserved in the region and become models to be emulated throughout the state and nation.

The School

The UCR School of Medicine, the first new public medical school to be developed in California in more than 40 years, is expressly designed to meet the physician workforce needs in inland Southern California and to improve the health of people living in the region. The school's community-based model provides medical students with clinical experiences in a variety of healthcare settings with diverse patient populations.

The M.D. curriculum offers a program that trains physicians who will be more attuned to the needs of increasingly diverse and underserved patient populations, with emphasis on culturally competent medical care. **The Thomas Haider Program** at the UCR School of Medicine will maintain a unique pathway into medical school for UCR students, with up to 24 seats filled by students who attend UCR for at least six consecutive quarters and complete their bachelor's degree at UCR. medschool.ucr.edu/admissions

Together with affiliated medical centers in the community, the school is building a range of residency training programs to provide the post-M.D. education required for physicians to become fully independent, licensed and board certified. New and developing residency training programs currently are in the specialties of general internal medicine, family medicine, general pediatrics, OB/GYN, psychiatry and general surgery. medschool.ucr.edu/gme

Graduate Study and Research

The long-standing Ph.D. Program in Biomedical Sciences, now embedded in the School of Medicine, provides a unique integration of systems and disease-based medical curriculum with experimental applications to biomedical research problems. The program aims to train independent research scientists to bridge the wide gulfs that currently exist between basic science research and clinical medicine. medschool.ucr.edu/graduate

Biomedical sciences faculty in the school have robust research programs in such areas as neurodevelopmental, neuroinflammatory and neurodegenerative disorders, traumatic brain injury, parasitic infections, intestinal bowl disease, metabolic and neuroendocrine control of fertility, tumor cell biology, vaccine development, age-associated changes in immune defense and immune responses to viral infections. This outstanding base is being expanded with additional faculty in the biomedical sciences and clinical sciences with the goals of establishing new translational/clinical research programs and building research expertise in population-based health outcomes, prevention and wellness, health services and health disparities.

The Center for Glial-Neuronal Interactions (CGNI) in UCR's School of Medicine brings together researchers with very diverse expertise to foster innovative and collaborative research on problems of brain and spinal cord health and disease. Together, faculty, fellows and students seek to define molecular mechanisms required for optimal brain and spinal cord function as well as for prevention and therapeutic intervention of neurodevelopmental, neurologic and neurodegenerative diseases. Ongoing research includes programs on Alzheimer's disease, autism spectrum disorders, cognitive disorders, epilepsy, glioblastoma, infections of the brain, multiple sclerosis, neuroinflammatory disorders, phantom limb syndrome, substance abuse and traumatic brain injury. cgni.ucr.edu

Student Pipeline Programs and Advising

Operated by the UCR School of Medicine, the **Health Professions Advising Center** is a resource available to all UCR undergraduate students and alumni interested in careers in the health professions, including medicine, dentistry, nursing, optometry, pharmacy, physical therapy, veterinary medicine and public health. Professional staff and peer mentors are available to guide students in planning pre-health professions coursework, gaining health-related experiences and completing service work. A variety of workshops on such topics as the application process and personal statement writing are also offered. hpac.ucr.edu

The School of Medicine has also recently expanded its student pipeline programs that together provide a continuum of student enrichment and academic support activities for students from the middle school level to postbaccalaureate level. Specific programs are Medical Leaders of Tomorrow, Future Physician Leaders, Health Sciences Partnership, Community College Outreach, FastStart, Medical Scholars Program, and the Premedical Postbaccalaureate Program. medschool.ucr.edu/pipeline_programs.html

Facilities

In addition to the new School of Medicine Research Building and newly renovated School of Medicine Education Building, the school's faculty, students and staff carry out their educational, research and administrative functions in Webber Hall, in Pierce Hall and in several clinical locations within Riverside and San Bernardino counties.

The School of Public Policy

4133 CHASS Interdisciplinary South
(951) 827-2310;
spp@ucr.edu; spp.ucr.edu

The School

The School of Public Policy (SPP) brings together faculty and students from a variety of disciplines to:

- train students in rigorous policy analysis skills, allowing them to pursue careers in government and the not-for-profit sector
- facilitate research by multidisciplinary teams at UCR on policy problems affecting the region, state, nation, and the world
- initiate and maintain a policy dialogue with regional, state, and national policy makers.

Mission Statement

The mission of the UCR School of Public Policy is to train a new generation of forward-thinking public policy leaders equipped to address the complex, interrelated challenges of poverty, disease, illiteracy, climate change, energy security, pollution and more. Their training will be informed by a diverse, interdisciplinary curriculum that emphasizes evidence-based policy research as well as cross-learning from both international and domestic problem-solving experiences, and a rich internship program that emphasizes experiential learning.

Distinctions

What makes the UCR School of Public Policy unique in comparison to other public policy schools are three cross-cutting themes:

Focus on the Environment The school treats environmental and social policies as part of an integrated ecological-socio-political system. Students will approach policy making with an understanding that environmental problems are both the cause and consequence of social processes like population growth, immigration, and inequality.

Emphasis on Local and Regional Policy Making The school focuses squarely on local and regional policy making, and emphasizes the importance of coordinating policies that cut across traditional jurisdictional boundaries such as cities, counties, states, and even nations.

Global-Local Connections The school promotes a “think globally, act locally” mindset and seeks to apply global policy lessons to solve local problems, and vice versa.

Internship Program

Under the leadership of former Riverside Mayor Ron Loveridge, the school has partnered with 15 local and regional public agencies to provide students with first-rate internship experiences. Unpaid internship positions are available to qualified undergraduate public policy majors for academic credit. Beginning in the summer of 2015, the school will offer paid summer internships for students of the MPP program.

Graduate Study

The flagship program of the School of Public Policy is the Master of Public Policy (MPP) program. The MPP requires a minimum of three four-unit courses per quarter for a total of 72 units of graduate courses. Find out more at spp.ucr.edu.

Programs and Courses

Numbering and Classification

The credit value of each course in quarter units is indicated for each term by a number in parentheses following the title. Departments may indicate the term in which they expect to offer the course by the use of: “F” (fall), “W” (winter), “S” (spring), “Summer.” The Schedule of Classes, at classes.ucr.edu, published several weeks before each term commences, lists the courses that will actually be offered for that term, along with their class hours and locations.

The class type, such as lecture or laboratory, and number of hours per week are listed in the first line of the description.

The letters “A,” “B,” “C,” and “D” are used with the course numbers to indicate sequential order; they do not necessarily indicate that an earlier quarter in the sequence is a prerequisite to the later quarters; the prerequisites (if any) of a given course are stated in the description of that course. The letter designation “E-Z” immediately following a course number — for example, HIST 191 (E-Z) — indicates different topics offered under a general title; no specific instance of such a course, for example, HIST 191E, HIST 191F, or HIST 191G, may be repeated for credit unless otherwise indicated in the course description. The letters “E” through “Z” have no sequential implications. The letters “H,” “L,” or “P” immediately following a course number usually have special designations: “H” for an honors course, “L” for a laboratory course (usually in the sciences), and “P” for a proseminar. A grade is assigned by the instructor at the end of each term, and credit is granted for each term, except as otherwise noted. Courses are numbered as follows:

- 1. Lower-division:** 001–099; generally recommended for freshmen and sophomores.
- 2. Upper-division:** 100–199; normally open only to students who have completed at least one lower-division course in the subject, or six quarters/four semesters of college work. Credit in special studies courses for undergraduates is limited to 5 units per quarter.
- 3. Graduate:** 200–299; normally open only to students who have completed at least 18 upper-division quarter units basic to the subject matter of the course.

The admission of undergraduates to graduate courses is limited to upper-division students who have an overall scholarship average not lower than “B”; these limits are imposed by the rules of the Graduate Division. However, graduate courses completed before attaining the baccalaureate will not be accepted in partial fulfillment of requirements

for the credential or minimum requirements in the 200 series for the master’s degree, except for undergraduate students who have received approval for backdating their graduate status to cover the session during which such courses were taken. See the Backdating Units section under Policies and Regulations.

4. Professional courses for teaching credential candidates: 300–399.

5. Other professional courses: 400–499.

Cross-listed Courses

Cross-listed courses share equivalent course content but are taught by two or more departments. Cross-listed courses generally share a course number, but each course is tied to a specific subject area and department. While prerequisites, unit coverage, and grading basis are identical for cross-listed courses, it may be preferable for students in certain degree programs to enroll under only one of the available subject areas. See an academic advisor to determine which subject area is most appropriate before enrolling in a cross-listed course.

To determine which courses are cross-listed, see individual course descriptions in this catalog or visit classes.ucr.edu.

UC Extension Courses

Students may earn credit toward bachelor’s and master’s degrees at the UC through University Extension. Acceptance of such credit is based on requirements of a particular college, division or department. Generally, preference is given to credits from courses numbered 001–099 and 100–199, prefixed by XR, XL, XI, XB, etc., indicating that such courses are intended to replicate regular offerings of a campus of the UC. Also, courses organized by University Extension, numbered 001–099 and 100–199, prefixed only with an X, are acceptable.

Extension credits are treated like transfer units from approved colleges. They apply toward unit requirements for a degree, but they do not count toward the requirements for residence. Resident students in the university must have advance approval from the appropriate dean for enrollment in UC Extension courses.

Credit earned in University Extension courses is not automatically applicable toward requirements for a master’s degree or university-recommended teaching credential and is permitted only in unusual circumstances. Students desiring such credit should consult with their graduate advisors and the Graduate Division before undertaking such courses.

 Paul Ryer, Ph.D.

Majors

Anthropologists study the way diverse groups of people understand and live in various settings ranging from urban environments to rural villages all over the world. They are interested in such questions as: What does it mean to be human? What activities define the social life of groups and how are they related? How do the members of groups communicate? What is the material evidence for their social and biological history? What are the historical, social, political, economic, and environmental forces that have helped to shape the experiences of particular groups of people, both in the past and in the contemporary world? And, how do human societies change and why? Anthropologists apply this knowledge for the benefit of the peoples whose communities they study.

Anthropology includes four broad subfields:

1. Sociocultural anthropology, the comparative study of communities in their local and global contexts
2. Archaeology, the investigation of past societies through their material and written remains
3. Biological anthropology, which focuses on the evolution of human beings as a species and the interaction of human biological variability with culture
4. Linguistic anthropology, which explores the interconnections of language, culture, thought, and social structure

Career Opportunities

Anthropology prepares students for dealing with the challenges of an increasingly international economy, transnationally connected communities, and multicultural citizenries. Besides helping students hone and refine analytical skills and critical thinking, anthropology helps them recognize the impact of cultural dynamics on interpersonal communication and on the social structures that affect everyone's daily lives. Anthropology majors interested in pursuing graduate studies are excellent candidates for programs in anthropology, business, law, journalism, medicine, social work, urban planning, and almost any other profession that calls for working with people from a variety of backgrounds and in a number of different settings.

The skills and knowledge learned as an undergraduate anthropology major help students understand the connections between people. Anthropology majors who are not planning to pursue graduate or professional studies immediately can forge careers as teachers at the primary and secondary levels; interviewers; recruiters in executive and specialized employment agencies; staff and managers in various local, state, and federal governmental agencies as well as in a variety of national and international non-governmental organizations and community development organizations; archaeological field or laboratory technicians; intercultural communications professionals in hospitals and other organizations; or union organizers.

University Requirements

See Undergraduate Studies section.

College Requirements

See College of Humanities, Arts, and Social Sciences, Colleges and Programs section.

Major Requirements

The Department of Anthropology offers the B.A. and B.S. degrees in Anthropology and the B.A. degree in Anthropology/Law and Society. The B.S. program is intended for those planning professional careers in anthropology or in the related fields mentioned above. The B.A. programs are intended for those desiring a broad liberal arts curriculum.

Anthropology Major

The major requirements for the B.A. and B.S. degrees in Anthropology are as follows:

1. Lower-division requirements (four courses [at least 16 units])
 - a) ANTH 001, ANTH 002, and either ANTH 003 or ANTH 005
 - b) LING 020
2. Upper-division requirements
 - a) Nine courses (at least 36 units) of upper-division Anthropology for the B.A.; 10 courses (at least 40 units) for the B.S.

- b) At least one upper-division course in each of the subdisciplines of anthropology:

- (1) Archaeology
- (2) Biological anthropology
- (3) Cultural and social anthropology
- (4) Linguistics

Note Students are strongly urged to take the lower-division requirements in the first two years of university study. Students intending to major in anthropology should work closely with a faculty advisor in planning their programs.

Anthropology/Law and Society Major

The Law and Society major is open to undergraduate students with junior standing who have completed LWSO 100 with a grade of "C" or higher. The major requirements for the B.A. degree in Anthropology/Law and Society are as follows:

1. Anthropology requirements

All requirements for the B.A. in Anthropology. See Anthropology Major above for specific requirements.

2. Law and Society requirements (36 units)

- a) PHIL 007 or PHIL 007H
- b) LWSO 100 (with a grade of "C" or better)
- c) One course chosen from ECON 111, POSC 114, PSYC 012, SOC 004 (or equivalent course in research methods)
- d) Three courses chosen from ANTH 127, ECON 119, HISE 153, PHIL 165, POSC 167, PSYC 175, SOC 159
- e) Two courses chosen from ENSC 174, HISA 120A, HISA 120B, HISE 123, LWSO 175 (E-Z), PHIL 164, POSC 111, POSC 166, POSC 168, POSC 186, SOC 147, SOC 149, SOC 180
- f) LWSO 193, Senior Seminar

Note For sections 2.d) and 2.e) combined, not more than two courses may be taken from the same department. In filling the dual requirements of the major, students may not count more than two courses toward both parts of their total requirements (Anthropology requirements and Law and Society requirements).

Minor

The Department of Anthropology offers a minor in Anthropology which consists of six upper-division courses (at least 24 units) and appropriate prerequisites as needed.

The courses are to be selected as follows:

1. Two upper-division courses in cultural anthropology from ANTH 102/AHS 102, ANTH 121, ANTH 122, ANTH 124, ANTH 125, ANTH 127, ANTH 131, ANTH 132, ANTH 134, ANTH 135, ANTH 137, ANTH 138, ANTH 139, ANTH 144, ANTH 149/WMST 149, ANTH 160, ANTH 162, ANTH 163, ANTH 173 (ANTH 001 is the normal lower-division prerequisite for these courses.)

2. Two upper-division courses from any one of the following subdisciplinary areas: (These courses normally entail an appropriate lower-division course in the given subdiscipline.)
 - a) Archaeology
 - (1) Prerequisite: ANTH 003 or ANTH 005
 - (2) Courses: ANTH 110, ANTH 111, ANTH 113, ANTH 117A, ANTH 117B, ANTH 118, ANTH 172, ANTH 178/WMST 178
 - b) Physical/Biological Anthropology
 - (1) Prerequisite: ANTH 002
 - (2) Courses: ANTH 107, ANTH 129, ANTH 146/PSYC 146, ANTH 150, ANTH 158, ANTH 159
 - c) Linguistic Anthropology
 - (1) Prerequisite: LING 020
 - (2) Courses: ANTH 120, ANTH 123, ANTH 167/LING 167
3. One area course from ANTH 115 (E-Z), ANTH 140 (E-Z), ANTH 161/LNST 161, ANTH 164/LNST 164/WMST 164, ANTH 168/ETST 148/LNST 168, ANTH 186/LNST 166
4. One methodological course from ANTH 112, ANTH 114A, ANTH 116, ANTH 155, ANTH 171, ANTH 180A, ANTH 183, ANTH 185

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Education Abroad Program

The EAP is an excellent opportunity to travel and learn more about another country and its culture while taking courses to earn units toward graduation. Students should plan study abroad well in advance to ensure that the courses taken fit with their overall program at UCR. Consult the departmental student affairs officer for assistance. For further details, visit UCR's Off Campus Academic Experiences at eapoap.ucr.edu or call (951) 827-2508.

See Education Abroad Program in the Educational Opportunities section of this catalog. A list of participating countries is found under Education Abroad Program in the Programs and Courses section. Search for programs by specific areas at eap.ucop.edu/ourprograms.

Graduate Program

The Department of Anthropology offers the M.A., M.S., and Ph.D. degrees in Anthropology.

Doctoral Degree

The graduate program transforms scholars into professional anthropologists who will variously engage in research, teaching, policy-related and/or administrative activities that benefit the people with whom they work. The program focuses on how people living in various settings participate in and adapt to processes of

change and transformation, both historically and in the contemporary world. The faculty is committed to an integrated, socially engaged concept of the discipline. The traditional subfields — sociocultural anthropology, biological anthropology, archaeology, and linguistics — are crosscut by a series of concentrations that constitute areas of strength. The most developed concentrations are (1) the applied anthropology of transnational processes (inequality, migration) and the border and binational communities associated with globalization and the internalization of capital; (2) the archaeology of Mesoamerica and Western North America; (3) cultural and political ecology; and (4) Latin America. The department has close working relationships with other programs on campus.

The department is dedicated to educating the next generation of professional anthropologists. The faculty consists of active research scholars with solid records of publication, conducting original research, obtaining extramural grants, and placing graduate students in regional, national, and international labor markets. Aware of the current structures of employment, faculty prepare students to pursue both academic and nonacademic careers.

Admission Applicants must supply GRE General Test scores, official transcripts from all institutions attended since high school, three letters of recommendation, a writing sample, and a personal statement specifying why they wish to undertake and complete graduate training at the UCR Department of Anthropology.

Course Requirements During their first year, students complete the year-long seminar sequence ANTH 200A, ANTH 200B, and ANTH 200C (Core Theory in Anthropology). Students must acquire a basic understanding of three of the four subfields (sociocultural anthropology, biological anthropology, archaeology, and linguistics). To fulfill the breadth requirement, students must take at least one graduate course in each of two subfields outside the student's major focus. All students must complete professional development training by the end of their 9th quarter. This is fulfilled by taking Anthro 210B before taking their Ph.D. Oral Exam.

Language Requirement Students must demonstrate at least a reading knowledge in one language other than English. In some cases, the student's advisor may require knowledge of a second language. The choice of language(s) and the method of demonstrating competence should be determined in consultation with the student's advisor. All students must file a Statement of Plan to Fulfill the Language Requirement by the end of the second quarter of their first year in residency. This includes students who are fully bilingual or whose primary language is not English. Competency may be demonstrated by the following:

1. Placing higher than level 3 in the Language Placement Examination,
2. Receiving a grade of at least "B" or "S" in a reading skills course or level 3 traditional language course, or

3. Alternative certification

In addition, students who plan to conduct fieldwork in a non-English setting must acquire conversational skills in the appropriate language before commencing fieldwork. Because language acquisition is a slow process, students are encouraged to begin language training early in their graduate program.

Methodological Skills Requirement Students must demonstrate competency in a qualitative or quantitative methodological skill such as GIS, lithic analysis, statistics, or hieroglyphic analysis. The choice of methodological skill should be determined in consultation with the student's advisor. All students must file a Statement of Plan to Fulfill the Methodological Skills Requirement by the end of the second quarter of their first year in residency.

Master's Examination Students take the master's examination during the week of spring-quarter examinations of their first year. The examination is based on the material covered in the ANTH 200A, ANTH 200B, and ANTH 200C sequence and is required of all students, including those holding a master's degree from another institution. Depending on the student's performance on the test, the faculty will recommend one of the following:

1. **Pass with Distinction or High Pass** Automatic continuation in the Ph.D. program and award of the master's degree under Graduate Division Plan II.
2. **Pass** Awarding of the master's degree under Graduate Division Plan II, but a successful retake (Pass with Distinction or High Pass) is required to continue in the Ph.D. program.
3. **Fail** Master's degree not awarded, but one retake within six months is allowed for potential awarding of the master's degree under Graduate Division Plan II.

The **Preliminary Research Statement** is designed to present the research orientation for an intended dissertation topic and to explain how the student intends to develop and pursue the area of research. The statement should present a comprehensive plan of study and a timeline covering the remainder of the student's graduate career, and outline intended areas, theories, and methods. It should be considered a precursor to the materials developed later in the research proposal and the written qualifying examination. Designating a dissertation committee is part of completing the statement.

The **Written Qualifying Examination** is a research paper written during a specified two-week period. The examination question is generated by the faculty advisor in consultation with the student and the dissertation committee, and must be approved by the department before the student can begin the examination.

The **Research Proposal** prepares students to undertake dissertation research and provides, in part, the basis for the oral qualifying examination. The length and format of the proposal should be similar to that of a proposal for a major funding agency.

Students must give a **Public Oral Presentation** to the department, at the James Young Colloquium, or at a national or international meeting. This presentation is intended to provide the student with experience in presenting research papers in a public context.

The **Oral Qualifying Examination** involves a demonstration of general competence in anthropology, combined with an extended discussion of the proposed dissertation research (preparation, methodology, significance, etc.).

Once students have satisfactorily fulfilled the courses requirement (including breadth requirement), language requirement, methodological skills requirement, master's examination, preliminary research statement, written qualifying examination, research proposal, public presentation, and oral qualifying examination, they are advanced to candidacy for the Ph.D. and formally begin research for the dissertation.

Dissertation and Final Oral Examination (Dissertation Defense) After advancement to candidacy, students complete a dissertation representing original research within their field of specialization. Dissertations generally require a year of field research followed by an additional year of data analysis and write-up. After completing the dissertation (or a substantial portion of it), students present an oral, public defense of the dissertation.

Professional Development Requirement

All students must complete professional development training by the end of their 9th quarter. This is fulfilled by taking ANTH 210B before taking their Ph.D. Oral Exam.

Master's Degree

The M.A. degree in Anthropology is normally awarded as part of the Ph.D. program, rather than as a separate degree objective.

Plan II (Comprehensive Examination) Candidates complete 36 units, of which at least 18 must be 200-series courses and must include the ANTH 200A, ANTH 200B, and ANTH 200C sequence, and pass a written comprehensive examination prepared by a departmental committee.

M.A. in Anthropology and Education

The M.A. is offered in cooperation with the Graduate School of Education; see the listing under Education or inquire at either office for further information.

M.S. Degree

Plan I (Thesis) Candidates must complete 56 units, of which at least 24 must be 200-series courses; courses for the area of specialization as specified by the department; and an acceptable thesis.

Lower-Division Courses

ANTH 001 Cultural Anthropology (4) Lecture, 3 hours; discussion, 1 hour. Explores the basic contributions of anthropology to the understanding of human behavior and culture and the explanation of similarities and differences among human societies. Addresses the

relevance of materials drawn from tribal and peasant culture to problems of the modern world. Stresses the application of anthropological methods to research problems. Credit is awarded for only one of ANTH 001 or ANTH 001H or ANTH 001W.

ANTH 001H Honors Cultural Anthropology (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): admission to the University Honors Program or consent of instructor. Honors course corresponding to ANTH 001. Explores the basic contributions of anthropology to the understanding of human behavior and culture and the explanation of similarities and differences among human societies. Addresses the relevance of materials drawn from tribal and peasant culture to problems of the modern world. Stresses the application of anthropological methods to research problems. Satisfactory (S) or No Credit (NC) grading is not available. Credit is awarded for only one of ANTH 001 or ANTH 001H or ANTH 001W.

ANTH 001W Cultural Anthropology (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ENGL 001B with a grade of "C" or better or consent of instructor. Explores the basic contributions of anthropology to the understanding of human behavior and culture and the explanation of similarities and differences among human societies. Addresses the relevance of materials drawn from tribal and peasant culture to problems of the modern world. Stresses the application of anthropological methods to research problems. Fulfills the third-quarter writing requirement for students who earn a grade of "C" or better for courses that the Academic Senate designates, and that the student's college permits as alternatives to English 001C. Credit is awarded for only one of ANTH 001 or ANTH 001H or ANTH 001W.

ANTH 002 Biological Anthropology (5) Lecture, 3 hours; discussion, 1 hour; individual study, 3 hours. A survey of past and contemporary human variation and evolution considered from the perspective of the fossil record, inferences from nonhuman primate biology and social behavior, and the forces of evolution.

ANTH 003 World Prehistory (4) Lecture, 3 hours; discussion, 1 hour. Examines the cultural history of humankind, from the beginning of tool-using behavior in the Old World to the rise of complex social and political systems (civilizations) in both the Old and New World.

ANTH 004 World Civilizations (4) Lecture, 3 hours; consultation, 1 hour. A survey of archaeological, anthropological, and historical perspectives relating to the study of the nature, origins, and development of civilizations in both the Old and New World. The history and culture of ancient Mesopotamia, Egypt, Mesoamerica (Mexico), and Peru will be emphasized.

ANTH 005 Introduction to Archaeology (5) Lecture, 3 hours; discussion, 1 hour; individual study, 3 hours. A general introduction to the aims and methods of archaeology, in the field and in the laboratory. Briefly surveys world prehistory as revealed by these methods.

ANTH 006 Introduction to World Music (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. A survey of people, identity, and music making. Includes listening to music from many cultural contexts. Also covers a variety of scholarly topics in world music. Cross-listed with MUS 006.

ANTH 010 Mysteries of the Ancient Maya (4) Lecture, 3 hours; outside research, 3 hours. An introduction to all aspects of the ancient Maya civilization of southern Mexico and Central America. The course will explore Maya origins, political organization, agriculture, art, religion, architecture, hieroglyphic writing, and the unexplained collapse of the civilization.

ANTH 012 Great Discoveries in Archaeology (4) Lecture, 3 hours; extra reading and written exercises, 3 hours. Introduces the methods and goals of archaeology through examples of "great discoveries" that have altered our understanding about the past.

Explores discoveries from around the world, including such well-known examples as King Tut's tomb, Pompeii, and the lost cities of the ancient Maya. Also covers lesser-known recent finds and the application of modern scientific technologies in archaeology.

ANTH 020 Culture, Health, and Healing (4) Lecture, 3 hours; consultation, 1 hour. Surveys health, disease, curing, and nutrition in a cross-cultural perspective. Covers how different cultural groups consider disease, health maintenance, and healing; how traditional beliefs about health and nutrition arise; and what we can and cannot learn from traditional health-seeking practices.

ANTH 027 Art of Pre-Columbian America (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): none. A survey course that provides a background to the ancient art of Mexico, Central America, and the Andean region of western South America. Discusses art of pre-Columbian America according to the three broad cultural regions of Mesoamerica, the lower part of central and northwestern South America, and the Andean area. Cross-listed with AHS 027 and LNST 027.

Upper-Division Courses

ANTH 100 History of Anthropological Theory (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or consent of instructor. A survey of the history of theory in anthropology and the development of the discipline. Focuses on useful ideas from these theories and methods anthropologists have developed to study other societies.

ANTH 101 Contemporary Anthropological Theory (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or consent of instructor. Explores the core ideas in modern anthropology about culture and society. Covers basic issues of contemporary theory since the 1980s. Explores the new methodologies and application of theory to ethnography.

ANTH 102 Anthropology of Art (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Anthropological approaches to the study of art in traditional non-Western societies. Through specific readings and case studies from four geographic regions (North America, Southeast Asia, Oceania, and West Africa), the dynamic role of art in traditional societies is illustrated. Cross-listed with AHS 102.

ANTH 103 Introduction to Visual Anthropology (4) Seminar, 3 hours; individual study, 3 hours; outside research and projects, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or consent of instructor. An introduction to the field of visual anthropology. Examines the similarities and differences between ethnographic film, critical studies, and written ethnographies. Explores the politics of representing other cultures visually. Cross-listed with MCS 103.

ANTH 104 Human Social Organization (4) Lecture, 3 hours; individual consultation as needed, 1 hour. An introduction to the study of families, clans, castes, classes, bureaucracies, factions, parties and other forms of human organization. Various aspects of recruitment, social control, communication, social ranking, exchange and conflict are discussed.

ANTH 105 Organizations as Cultural Systems (4) Lecture, 6 hours; extra reading and written exercises, 6 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines the role of culture in the formation and management of complex bureaucratic organizations. Covers types of organizations and organizational cultures, the impact of the cultural environment, and problems posed by rapid cultural change. Offered in summer only. Cross-listed with BUS 158.

ANTH 106 Gender and Genocide (4) Lecture, 3 hours; individual study, 2 hours; term paper, 1 hour. Prerequisite(s): WMST 001 or WMST 001H or consent of instructor. Examines gendered dimensions of contemporary and historical genocides. Analyzes the ways gender ideologies intersect racialization and ethnic marking. Explores how gender shapes selection, forced labor, torture, and murder. Considers gender ideologies in relation to collective, institutional, and individual responses to genocide and genocidal campaigns. Cross-listed with WMST 125. **Gailey**

ANTH 107 Evolution of the Capacity for Culture (4) Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or ANTH 002 or ANTH 003 or relevant preparation in psychology or biology or consent of instructor. An examination of the evolution of the biological and social capacities that have made culture the central attribute of the human species. Topics include the evolution of human diet, tool-making, the family and kinship, and language.

ANTH 108 Anthropology of Global Media (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines the global production, transmission, and consumption of mass media in diverse national and transnational contexts. Includes debates over the power of media; construction of knowledge of others; affective responses to images of violence; practices of self-representation; and the ways in which consumers accept, reject and negotiate media messages.

ANTH 109 Women, Politics, and Social Movements: Global Perspectives (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introduction to "Third World" women's politics. Covers women's politics from a global perspective. Although international in breadth, emphasis is placed on South Asia, sub-Saharan Africa, and the Caribbean. Cross-listed with WMST 109.

ANTH 110 Prehistoric Agriculture (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A cross-cultural perspective on prehistoric agriculture as resource management, economic system, and political tool. Archaeological methods and theory of reconstructing agricultural systems and their role in prehistoric societies.

ANTH 111 Peopling of the New World (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Consideration of the archaeological, biological, linguistic, and dating evidence documenting the nature and timing of the earliest occupation of the Western Hemisphere by human populations.

ANTH 112 Settlement Patterns and Locational Analysis (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): ANTH 003 or ANTH 005 or consent of instructor. An archaeological perspective on spatial behavior from architectural design to regional economic systems. Provides an introduction to a broad range of issues and analytical perspectives with an emphasis on theoretical approaches and case studies.

ANTH 113 Ancient Households and Communities (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W; ANTH 003 or ANTH 005; or consent of instructor. Explores archaeological perspectives on households and communities. Discusses their composition, function, and meaning. Illustrates with specific cases from diverse cultural contexts. Topics include everyday life in ancient households and communities, social and economic reproduction, and long-term stability and change.

ANTH 114A Lithic Technology I (4) Lecture, 3 hours; laboratory, 4 hours. Prerequisite(s): consent of instructor and either ANTH 003 or ANTH 005. Introduction to the technology of core-and-flake stone

tools. Principles of fracture, quarrying, reduction, heat treatment, core technology, and production and use of flaked stone tools in core-and-flake lithic assemblages. Assemblage formation processes and their interpretation.

ANTH 114B Lithic Technology II (4) Lecture, 3 hours; laboratory, 4 hours. Prerequisite(s): ANTH 114A and consent of instructor. The technology of core-and-blade industries, ground-stone industries, and millstone industries. Percussion- and pressure-blade reduction sequences and strategies, emphasizing quarrying, initial reduction, core production, blade production, and production and use of tools from blades. Technology and production of ground-stone tools, and the quarrying of raw material and production of millstones. Assemblage formation processes and their interpretation.

ANTH 114C Lithic Analysis (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): ANTH 114A, ANTH 114B; or consent of instructor. Characterization, analysis, and interpretation of stone tool assemblages, with emphasis on debitage.

ANTH 115 (E-Z) Archaeological Interpretations (4) for hours and prerequisites, see segment descriptions. Study of the prehistory of different regions of the world. Emphasis is on the method and theory underlying archaeological investigations of the nature of people and culture and the course of human development.

ANTH 115E North American Prehistory (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): ANTH 003 or ANTH 005 or consent of instructor. Interpretation of the archaeological record of North America from initial peopling of the continent to the historic period.

ANTH 115M Prehistory of California (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): ANTH 003 or ANTH 005 or consent of instructor. A survey of prehistoric cultures of California from the earliest settlement to the historic period.

ANTH 115Q Great Basin Culture History (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): ANTH 003 or ANTH 005 and either upper-division standing or consent of instructor. Prehistory and ethnography of the Great Basin. Topics include the earliest dated archaeological Lithic-stage manifestations, regional and temporal expressions of the Western Archaic, Formative Anasazi and Fremont developments, and the Numic peoples. Emphasis will be on technology and cultural ecology.

ANTH 115R Archaeology of Eastern Mesoamerica (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): ANTH 003 or ANTH 005 or consent of instructor. An introduction to Mayan archaeology intended to provide an overview of ancient Maya cultural history from the Formative period to the time of Spanish contact. During the course, particular Maya sites will be described in detail.

ANTH 115S Archaeology of Western Mesoamerica (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): ANTH 003 or ANTH 005 or consent of instructor. An introduction to the archaeology and culture history in the New World nuclear area of Western Mesoamerica from the occupation of this area before 10,000 years ago to the arrival of Spanish Europeans in A.D. 1519.

ANTH 115T Prehistory of the Southwest (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): ANTH 003 or ANTH 005 or consent of instructor. A survey of prehistoric cultures of the American Southwest from earliest settlement to the historic period.

ANTH 115U Andean Prehistory (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): ANTH 003 or ANTH 005 or consent of instructor. A description of Andean culture history, emphasizing Peru, from the earliest documentation of human occupation to the

Spanish conquest of the Inca. Topics include origins of food production, early ceremonial architecture, Paracas textiles, the Nasca lines, Moche iconography and ritual, and Inca architecture. Discussion of major sites and their architecture, ceramics, sculpture, and other archaeological remains.

ANTH 115X Ancient Oaxaca (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W; ANTH 003 or ANTH 005; or consent of instructor. Explores current understanding about ancient Zapotec, Mixtec, and neighboring cultures in Oaxaca, Mexico, the location of the earliest Mesoamerican state system and one of its earliest cities.

ANTH 116 Dating Methods in Archaeology and Paleoanthropology (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): ANTH 003 or ANTH 005 or consent of instructor. A descriptive introduction to Quaternary physical dating methods and their application in archaeology and paleoanthropology.

ANTH 117A History of Old World Archaeology (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): ANTH 003 or ANTH 005 or consent of instructor. A review of the intellectual, social, and historical background to the development of prehistoric and historic archaeology of the Old World (Africa and Eurasia), including the historical context to the rise of human paleontological and paleoanthropological studies. Particular attention is given to the evolution of ideas about prehistoric and historic chronology.

ANTH 117B History of New World Archaeology (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): ANTH 003 or ANTH 005 or consent of instructor. A review of the intellectual, social, and historical background to the development of prehistoric and historic archaeology of the colonial and industrial New World (Western Hemisphere and Oceania). Particular attention is given to the evolution of ideas about prehistoric and historic chronology.

ANTH 118 Origins of Cities (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or ANTH 003 or ANTH 005 or consent of instructor. Explores new forms of social, economic, and political organization that developed with the advent of cities. Examines case studies of the rise of urbanism in both the Old and New Worlds to investigate how and why cities emerged and consolidated.

ANTH 119 The Anthropology of Tourism (4) Lecture, 3 hours; extra reading, 1 hour; field, 1 hour; term paper, 1 hour. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or consent of instructor. Surveys the central problems and issues in the anthropological study of tourism. Main topics include the place of tourism in the global economy, the impact of tourism on cultural identity and culture change, environmental issues in tourism development, and tourism as a form of cross- and multicultural communication. Credit is awarded for only one of ANTH 119 or ANTH 280.

ANTH 120 Language and Culture (4) Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W, LING 020, upper-division standing; or consent of instructor. Covers the interrelations among language, culture, and habitual behavior; the classification of languages; and anthropological uses of linguistic evidence.

ANTH 121 Anthropological Theories of the Arts (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or consent of instructor. Covers anthropological theories of the arts emphasizing folk and traditional forms. Features oral and written literature and discusses theories of musical, visual, and other arts.

ANTH 122 Economic Anthropology (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W, ECON

001; or consent of instructor. An approach to the problem of economic development based on the perspectives furnished by anthropological investigations in the less industrialized societies.

ANTH 123 Linguistic Anthropology (4) Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): LING 020, or consent of the instructor. Course will cover the application of linguistics techniques to studies of other symbolic and social fields, the analysis of semantic systems, and the use of linguistic techniques for prehistory.

ANTH 124 Ritual and Religion (4) Lecture, 3 hours. The elements and forms of religious belief and behavior; functions of ritual in society. Cross-cultural comparisons.

ANTH 125 Kinship Organization (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or consent of instructor. An introduction to theories of social organization through consideration of relationships among kin.

ANTH 126 Southeast Asian Performance (4) Lecture, 3 hours; screening, 2 hours; extra reading, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Introduction to the roles and genres of expressive culture in Southeast Asia, including dance, music, theater, film, and digital culture. Performance is discussed both as a time-honored and as a contemporary medium for cultural production, from the courts to everyday experience. Material will be drawn from the Philippines, Malaysia, Indonesia, Thailand, Laos, Cambodia, Vietnam, Burma, Singapore, and the Southeast Asian diaspora. Cross-listed with AST 123, DNCE 123, and MUS 123.

ANTH 127 Political Anthropology (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or consent of instructor. Examines different overt and covert means by which power and social differentiation are produced, perpetuated, and challenged in societies across the world. Studies the politics of culture, ethnicity, nationalism, and gender.

ANTH 128 Performing Arts of Asia (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A survey of music, dance, theatre, and ritual in four major geocultural regions of Asia: Central, East, South, and Southeast. No western music training is required. Course is repeatable to a maximum of 8 units. Cross-listed with AST 128, DNCE 128, MUS 128, and THEA 176.

ANTH 129 Human Evolutionary Ecology (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or consent of instructor. Application of evolutionary ecological theory to the understanding of human social behavior and culture. Topics include foraging strategies and habitat use and cooperation and competition concerning resources in social groups.

ANTH 131 Applied Anthropology (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or consent of instructor. Applies anthropology to current issues such as community development, education, health, public administration, and conflict.

ANTH 132 Cultural Ecology (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introduces people's relationships to their total environment. Explores strategies for managing the environment and its resources, the effects of the environment on culture and society, the impact of human management on the ecosystem, and ways in which human groups view their surroundings.

ANTH 133 Anthropology and International Development (4) Lecture, 3 hours; outside research, 2 hours; written work, 1 hour. Prerequisite(s): ANTH 001 or

ANTH 001H or ANTH 001W or consent of instructor. Analyzes the concept of development by examining major theories and approaches in the anthropological study of international development. Focuses on the relationship between anthropology and the development industry. Topics include ethical issues in development anthropology, causes of failure and success in development interventions, and transformations in development theory and practice.

ANTH 134 Anthropology of Resource Management (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or consent of instructor. Anthropological approaches to the study of resource use and management in cross-cultural perspective. Issues include conservation, development, sustainability, and common property management. Focuses management of plant and animal resources in foraging, farming, and fishing societies.

ANTH 135 Nutritional Anthropology (4) Lecture, 3 hours; consultation, 1 hour. Food and nutrition in culture; world problems of malnutrition and nutritional improvement and how anthropology can contribute to their solution; explanations of cultural foodways; development and change of human eating patterns.

ANTH 136 Anthropological Perspectives on Gender in Southeast Asia (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines the intersections of gender, power, and sexuality in post-colonial Southeast Asia. Revisits early ethnographic claims of gender equality. Addresses current anthropological literature on the effects of colonialism, capitalism, and globalization on gender roles and relations within national and transnational contexts. Cross-listed with SEAS 136.

ANTH 137 Anthropology: The American Tradition (4) Lecture, 3 hours; outside research, 2 hours; extra reading, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Introduces the historical development of anthropological thought in the United States as a manifestation of class and state formation. Clarifies various intellectual currents in contemporary anthropology and their relationships to intellectual and social developments in the broader society.

ANTH 138 Class and State Formation (4) Lecture, 3 hours; outside research, 2 hours; extra reading, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. An examination of the dynamics of class and state formation. Explores the consolidation of class structures and state institutions and practices in the context of kin/civil conflict, the distortion and dissolution of nonexploitative social relations, and the constitution of gender, ethnic, and racial hierarchies. Considers ethnogenesis and the construction of state and mass cultures.

ANTH 139 Change and Development (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or ANTH 003 or ANTH 005; upper-division standing or consent of instructor. Examines alternative theories of society, change, and development, as well as the assumptions and premises on which they are based. Considers how they are used to explain capitalist development, imperialism, colonial encounters, nationalism, decolonization, socialist revolution, modernization, unequal exchange, uneven development, globalization, and postcolonialism.

ANTH 140 (E-Z) Ethnographic Interpretations (4) for hours and prerequisites, see segment descriptions. Study of peoples and cultures in particular areas of the world. Emphasis is placed on ethnological and theoretical problems as these are revealed in the examination of the history, coherent sociocultural patterns, and ecology of specific aboriginal populations and contemporary groups.

ANTH 140E Ethnology of the Greater Southwest (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to the many varied native cultures of the Greater Southwest. Major differences as well as similarities in the forms of language, social organization, religion, and material culture occurring in the Greater Southwest will be defined and described. The peoples of the Greater Southwest are considered, not only in terms of the ethnographic present, but also through a diachronic perspective, from the prehistoric past through the Spanish colonial era to the present.

ANTH 140F California Indian Peoples (4) Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. A survey of the life-ways of Indian peoples of California at the time of Euro-American contact, the history and effects of contact, and contemporary conditions.

ANTH 140G Anthropological Perspectives in Africa (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A number of African cultures are carefully examined in terms of three or four anthropological topics, such as: subsistence patterns, social organization, and religious systems. The treatment of these cultures follows a brief overview of the geography, history, and linguistic patterns of Africa.

ANTH 140-I Cultures of Southeast Asia (4) Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or equivalent. Anthropological interpretations of culture and society in southeast Asia including Indonesia. Topics include prehistory, ethnic groups, social organization and structure, human ecology, and folk and high culture.

ANTH 140J The Andes, Past and Present (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W, upper-division standing; or consent of instructor. Provides an overview of Andean society, past and present. Examines the colonial matrix in which Iberian and Andean social, political, and cultural forms came together. Uses ethnographies, indigenous narratives, and film about contemporary Andean society to address issues of class, ethnicity, gender, and the politics of representation.

ANTH 140-O An Anthropology of Mexicans of the Southwest United States (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Familiarizes students with the content and process of "U.S. Mexican Cultures." Stresses the manner in which Mexican populations have long survived the stresses and strains of transmigration, cultural "bumping," human adaptation, and creating viable cultural systems of survival and expression largely within the U.S. Southwest.

ANTH 140P Cultures of the Pacific (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or consent of instructor. Overview of the cultures and contemporary issues facing the people of Melanesia, Micronesia, and Polynesia. Examines the contribution of Oceanic studies to anthropological theories of kinship and exchange, gender, development studies, and indigenous knowledge systems. Emphasizes how Pacific Islanders draw on their cultural heritage in emerging from formal colonialism to establish new island nations.

ANTH 140S The Peoples of Mexico in Historical and Global Perspective (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Survey of the cultures and societies of Mexico in historical and global perspective. Emphasis on agrarian communities and the contributions of Mesoamerican ethnography to general anthropological theory.

ANTH 140T Agriculture and Rural Society in Mexico: Past and Present (4) Lecture, 3 hours; outside

research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. The evolution of rural Mexico: from origins of Mesoamerican agriculture to the rise of high civilizations; from the establishment of the colonial system to the demise of colonial agricultural institutions; from the revolution of 1910 to the enactment of land reform and development programs. The role of peasantry in the making of the modern state is emphasized.

ANTH 141 Database Design for Anthropology (4)

Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing in Anthropology; consent of instructor. A study of the skills necessary for design and development of databases for anthropological and archaeological data. Covers assessing requirements for, planning, designing, and constructing databases that are easily connected to and used by database management and geographic information systems software.

ANTH 142 Geographic Information Systems (GIS)

Software for Anthropology (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing in Anthropology; consent of instructor. Provides students with a focused background in geographic information systems (GIS) theory and practical software applications for anthropology. Addresses spatial ontological concepts and showcases how they have been applied to anthropological issues around the world. Includes hands-on experience in the use of GIS and related software.

ANTH 143 Gender, Race, and Medicine (4) Lecture, 3 hours; written work, 1 hour; extra reading, 1 hour; individual study, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Explores the relationship between Western medicine and women, racial minorities, and non-Western citizens. Investigates how gender ideology, racial inequity, and colonialism shape the medical representation of bodies, sexuality, and pathology. Examines how patients have renegotiated their relationships with medicine through health movements and alternative healing practices. Cross-listed with WMST 185.

ANTH 144 Hunters and Gatherers (4) Lecture, 3 hours; consultation, 1 hour. An overview of hunter-gatherer cultures including a survey of selected ethnographic cases with special emphasis on the relevance of the hunting-gathering way for anthropological theory. Topics will include: subsistence strategies, the organization of bands, and models for prehistoric populations.

ANTH 145 Sexualities and Culture (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): WMST 001 or consent of instructor. Examines the field of sexuality studies using a comparative, cross-cultural approach. Emphasizes the relation between culture, history, and political economy in the emergence of sexual practices and sexualized identities. Examines theories of sexuality and identity, with particular attention to violence, human rights, and political agency. Cross-listed with WMST 103.

ANTH 146 Primate Social Behavior (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): ANTH 002 or PSYC 002. Considers social organization and behavior in monkeys and apes, with emphasis on the adaptive aspects of social patterns and the relevance of primate studies to human evolution. Cross-listed with PSYC 146.

ANTH 147 Reproduction: Policies, Politics, and Practices (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing. Examines reproductive policies, politics, and practices from a cross-cultural and historical perspective. Discusses political and economic processes and sociocultural dynamics, population control, sex preference, infanticide and neonatal neglect, adoption and foster parenting, abortion, technologically assisted conception, and gestational surrogacy. Cross-listed with WMST 140.

ANTH 148 Gender and the State (4) Lecture, 3 hours; extra reading, 1 hour; outside research, 1 hour; written work, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Examines the various meanings of gender as it is articulated in, reproduced by, and shaped within the state. Discusses gender-state relations, the engendering of politics, state functions, policy, and politics in various historical, political, cultural, and social contexts. Cross-listed with WMST 150.

ANTH 149 Gender, Kinship, and Social Change (4)

Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): WMST 001. Examines theories of gender and kinship, the formulation of gender hierarchies and their uneven development, and the dynamics of "family" and gender in stratified social formations. Analyzes the relationship between family forms and political and economic processes. Cross-listed with WMST 149.

ANTH 150 Human Microevolution (4) Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): ANTH 002; relevant preparation in the life sciences; or consent of instructor. Covers methods of classical and population genetics applied to the understanding of evolution and variation in contemporary human populations.

ANTH 151 The Art of the Aztec Empire (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): AHS 027/ANTH 027/LNST 027 or upper-division standing or consent of instructor. An introduction to the art of the Aztec Empire. Studies architecture, sculpture, ceramics, painting, lapidary work, gold work, and feather work. Explores the relationship between art and ritual and art and the imperial state. Cross-listed with AHS 112 and LNST 112.

ANTH 152 Evolution of the First Hominids (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): ANTH 002 or consent of instructor. Explores human evolution in the first five million years; examines the fossil record and incorporates data from archaeology and genetics. Topics include hominoid evolution in the Miocene, origin models of the human lineage, and the first ancestral humans.

ANTH 153 Evolution of the Genus Homo (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): ANTH 002 or consent of instructor. Explores human evolution in the last two million years; examines the fossil record and incorporates data from archaeology and genetics. Topics include origins of genus *Homo*, world-wide dispersals, Neanderthals, and origins of modern humans.

ANTH 154 Research Methods in Biological Anthropology (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): ANTH 002 or consent of instructor. Introduces quantitative research methods in biological anthropology. Topics include the history of scientific approach in American anthropology, statistics, data resampling, evolution, and variation.

ANTH 155 Human Osteology (4) Lecture, 2 hours; discussion, 1 hour; outside research, 3 hours. Prerequisite(s): consent of instructor. An in-depth study of the human skeleton, including bone biology, functional morphology, fragment identification, reconstruction, forensic methods, and curation techniques. Useful for anthropologists and those intending careers in medicine, physical therapy, and forensics.

ANTH 156 Advanced Osteology (4) Lecture, 2 hours; discussion, 1 hour; outside research, 3 hours. Prerequisite(s): ANTH 155 or consent of instructor. Further study of the human skeleton, emphasizing applications in anthropological contexts and preparation for professional careers in archaeology, forensics, and paleontology.

ANTH 157 Visual Culture of the Incas (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to the art, architecture, and urban form of the Inca civilization. Examines how these elements

influenced state formation, conquest, and resistance. Includes studies of urban plans, buildings, paintings, textiles, prints, sculpture, metalwork, and ceramics. Cross-listed with AHS 117 and LNST 117.

ANTH 158 Biological Approaches to Medical Anthropology (4)

Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): ANTH 002 or consent of instructor. Introduces medical anthropology from the biological perspective. Explores topics on evolution, health, and medicine; human biological variation in relation to disease; bioarchaeology; and the history of health. Takes the integrative and multidisciplinary approach.

ANTH 159 Demographic Anthropology (4)

Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or ANTH 002 or ANTH 003 or ANTH 005 or consent of instructor. Applies demographic theory and methods to problems in cultural, archaeological, and biological anthropology.

ANTH 160 Political Economy of Health (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines critical medical anthropology. Focuses on the linkages between political economy, health, and healthcare systems in modern societies. Considers the effects of poverty, occupation, and environmental transformation in particular social contexts. Looks at four case studies: the political economy of HIV/AIDS, poverty, famine, and nuclear regulation.

ANTH 161 Indigenous People and the State in Latin America (4)

Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or consent of instructor. Reviews the historical processes and regional circumstances that have governed relations between indigenous peoples and Latin American states. Studies concepts of nationalism, ethnicity, and the state in the context of indigenous efforts to resist assimilation and to gain limited autonomy. Compares with the problems and prospects of multiethnic societies worldwide. Cross-listed with LNST 161.

ANTH 162 Culture and Medicine (4) Lecture, 3 hours; consultation, 1 hour. Interrelations of health, disease and culture; cross-cultural comparisons of "health," "disease" and "curing" concepts; effects of cultural behavior on health and illness. Special focus on traditional societies and their belief systems, and on the effects of cultural change (historical and modern) on illness and curing.

ANTH 163 Transnational and Global Communities (4)

Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A critical survey of recent anthropological and related research and theory concerning transnational and global sociocultural processes. Special emphasis on transnational, diasporan, and other unbounded communities; borderlands; and the impact of global media and communication and transnational migration on community and identity.

ANTH 164 Gender and Development in Latin America (4)

Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Discusses the role and contribution of Latin American and Caribbean women within their societies. The effects of national economic development policies upon their status and their participation in and integration into the policy-making process are emphasized. Cross-listed with LNST 164 and WMST 164.

ANTH 165 Cognitive Anthropology (4) Lecture, 3 hours; consultation, 1 hour. The structure of the knowledge of cultural domains; systems of knowledge in different cultures examined in the light of theories of how people learn them, store them, and use them.

ANTH 166 Cultural Perspectives of Cancer (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or consent of instructor. Examines how cancer has been per-

100 / Programs and Courses

ceived and described by biomedical and public health practitioners, anthropologists, and social scientists. Interdisciplinary approach focuses on the historical, political, and cultural dimensions that inform our understanding of cancer in particular and disease in general. Includes illness narratives, risk, epidemiology, and unequal disease distribution and treatment.

ANTH 167 Structural/Descriptive Linguistics (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): LING 020 or consent of instructor. An overview, from the original sources, of the contribution of major figures and schools in linguistics from Saussure through early Chomsky. Cross-listed with LING 167.

ANTH 168 Caribbean Culture and Society (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An overview of the Caribbean region from a historical, cultural, and political perspective. Emphasis on contemporary issues affecting the Caribbean, and the struggle of its people to maintain their identities. Cross-listed with ETST 148 and LNST 168.

ANTH 169 From the Maghreb to the Middle East (4) Lecture, 3 hours; written work, 1 hour; individual study, 1 hour; extra reading, 1 hour. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or GBST 001 or GBST 002 or consent of instructor. An introduction to the peoples and societies of North Africa and the Middle East. Follows the travels of Ibn Battutah, Ibn Khaldun, and Rafik al Tahtawi. Topics include religion, migration, gender, political organization, the global Middle East, Orientalism, and cultural production. Cross-listed with GBST 169.

ANTH 170 Ethnobotany (4) Lecture, 2 hours; seminar, 1 hour; discussion, 1 hour. Prerequisite(s): BIOL 104/BPSC 104, or consent of instructor. Introduces students to ethnobotanical research by reviewing selected ethnobotanical studies. Topics covered by lectures include fundamental principles of ethnobotany, the search for new medicines and other products made from plants, the role of humans in plant evolution, and the impact of plants on human cultures. Discussions focus on the past and present role of humans in plant conservation and the search for sustainable management practices in agriculture and forestry. Seminars by invited guests and enrolled students present selected topics in ethnobotany. Cross-listed with BPSC 170.

ANTH 171 Field Course in Maya Archaeology (4-12) Lecture, 2 hours; laboratory, 3-6 hours; field, 3-24 hours. Prerequisite(s): either ANTH 003 or ANTH 005 and consent of instructor. Archaeological surveying and excavation, including training in site mapping, use of satellite-based Global Positioning Systems, natural resources surveying, and field laboratory techniques.

ANTH 172 Archaeological Theory and Method (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): ANTH 003 or ANTH 005 or consent of instructor. A historical survey of conceptual and methodological approaches to understanding the archaeological record. Topics include a priori assumptions, unit concepts, goals, models, and research strategy.

ANTH 173 Social Meanings of Space (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines the range of meanings attached to spaces and places, from small-scale expressions such as houses to larger ones such as cities and landscapes. Explores how spaces can reflect and foster social conflict or social unity. Through a study of diverse cultural traditions, considers both the architecture and occupied but "unbuilt" spaces in ancient and current societies.

ANTH 174 Anthropology and Film (4) Lecture, 3 hours; extra reading, 30 hours per quarter. Prerequisite(s): upper-division standing or consent of instructor. Explores the history of anthropological representations of culture through film and the debates over the production of ethnographic knowledge. Examines

shifts in film from a product of ethnographic research to an object of anthropological inquiry. Studies include horror, war, ethnographic, and indigenous films in relation to race, class, gender, sexuality, and nationhood.

ANTH 175A Anthropological Research: Basic Techniques (4) Lecture, 3 hours; consultation, 1 hour. Includes basic data gathering procedures in anthropological field work such as censuses, maps, surveys and genealogies.

ANTH 175B Anthropological Research: Specialized Techniques (4) Lecture, 3 hours. Includes ethnographic field techniques such as the aggregation of open-ended data, frame elicitation, componential analysis, collection of quantitative data, behavioral observation, and social-cultural inferences from geographical and spatial distributions.

ANTH 176 Music Cultures of Southeast Asia (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A survey of music, dance, theatre, and ritual in the Philippines, Indonesia, Malaysia, Thailand, Myanmar (Burma), Laos, Cambodia, and Vietnam. Designed for the student interested in the performing arts and cultures of mainland and insular Southeast Asia. No Western music background is required. Cross-listed with AST 127, DNCE 127, ETST 172, and MUS 127.

ANTH 177 Gender, Sexuality, and Music in Cross-Cultural Perspectives (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An overview of gendered performance genres from a number of cultures. Seeks to familiarize the student with gender-specific music and notions of gender that are often constructed, maintained, transmitted, and transformed through music and performance. Designed for students interested in music, anthropology, and gender studies. Cross-listed with MUS 126 and WMST 126.

ANTH 178 Gender and Archaeology (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or ANTH 005 or WMST 001 or consent instructor. Considers gender roles in ancient and historically recent human societies, as well as how gender has shaped archaeological investigation. Cross-listed with WMST 178.

ANTH 179 Gender, War, and Militarism (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines politics of militarization in relation to gender, race, and sexuality in national and international contexts of war. Explores ideologies and representations of masculinity and femininity in discourses of militarism. Topics include war crimes; contestations over historical memory; effects of militarization on gender roles; cults of heroism; and peace activism.

ANTH 180A Introduction to Anthropological Methods and Techniques (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W; ANTH 003 or ANTH 005; a major or minor in Anthropology; or consent of instructor. Strongly recommended for anthropology majors and minors. Surveys methods and techniques utilized in archaeology, cultural anthropology, and physical anthropology. Explores the epistemology of scientific discourse; debates in ethnography, linguistics, and processual and poststructural archaeology; and techniques in physical anthropology emphasizing demographic, epidemiological, and genetic analysis.

ANTH 180B Research Methods and Techniques in Cultural Anthropology (4) Lecture, 3 hours; fieldwork, 30 hours per quarter. Prerequisite(s): ANTH 180A or consent of instructor. Strongly recommended for anthropology majors and minors. Develops the most important methods in cultural anthropology including research design, participant observation, informant selection, organization of field notes, household and community questionnaires, structured and unstruc-

tured interviews, oral and life histories, archival research and secondary data, and coding and analysis of qualitative data.

ANTH 180C Anthropological Field Research (4) Lecture, 2 hours; outside research, 6 hours. Prerequisite(s): ANTH 180A; ANTH 180B or ANTH 183 or ANTH 184 or ANTH 185; or consent of instructor. Introduces students to the process and problems of conducting field research in the local region. Topics include construction of research problems, research design, research implementation, preparation of human subject protocols, strategies of data collection and analysis, and report preparation.

ANTH 181 Political Economy of South Africa (4) Lecture, 3 hours; written work, 3 hours. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W or consent of instructor. Examines contemporary societies of southern Africa. Focuses on changes and continuities since the end of apartheid. Topics include transformations in ethnic and racial identity and classification; postapartheid class formation and neoliberalism; labor migration and immigration; HIV/AIDS; land reform, resettlement, and spatial transformation; tourism; and conservation.

ANTH 182 Anthropology of Human Rights (4) Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines debates in the study of human rights and social injustice. Uses case studies in Asia, Africa, and Latin America to explore legal, cultural, and political practices and representations of rights and reconciliation in postconflict settings. Includes globalization of rights; cultural relativism; indigenous rights movements; advocacy; and gender and health rights.

ANTH 183 Methods of Archaeological Analysis (4) Lecture, 2 hours; laboratory, 3 hours; extra reading, 3 hours. Prerequisite(s): ANTH 003 or ANTH 005 or consent of instructor. Description and classification of archaeological materials including laboratory work in cataloging and documentation, methods used in artifact typology and seriation, and the preparation of reports for publication.

ANTH 184 Field Course in Anthropology (4-16) field research, variable. Prerequisite(s): ANTH 175A or consent of the instructor. Study with a qualified professional at selected research sites with on-site supervision. Normally, 16 units will be assigned only when the student is engaged in full-time research at a site distant from UC Riverside. Course may be repeated for credit for up to three quarters with consent of the instructor and approval of a research plan by the department chair.

ANTH 185 Field Course in Archaeology: Survey and Documentation (4) Lecture, 1 hour; discussion, 1 hour; field, 6 hours. Prerequisite(s): ANTH 003 or ANTH 005; upper-division standing; consent of instructor. Trains students in field surveying and documenting historic and aboriginal archaeological sites. Covers satellite-assisted electronic location, cadastral survey location, Universal Transverse Mercator grid coordinates, field mapping, recording environmental parameters, characterizing assemblage, assessing significance, and using archaeological information centers.

ANTH 187 Anthropology of Risk (4) Lecture, 3 hours; extra reading, 1 hour; outside research, 1 hour; term paper, 10 hours per quarter. Prerequisite(s): ANTH 001 or ANTH 001H or ANTH 001W; upper-division standing; or consent of instructor. Examines theoretical and ethnographic works related to the perception of risk. Focuses on a range of arguments that view risk as an objective hazard, a symbolic construction, or as historically, politically, and socially contingent. Topics include law, health, pollution, and migration.

ANTH 188 Islam, Women, and the State (4) Lecture, 3 hours; individual study, 2 hours; extra reading, 1 hour. Prerequisite(s): upper-division standing. Examines

the links between women, Islamic practices, and the politics of state formation and nation building. Explores ways women constitute the terrain of struggle between the traditional and modern, colonialism and nationalism, and religion and politics. Cross-listed with WMST 151.

ANTH 189 Gender and Power in Muslim Societies (4) Lecture, 3 hours; extra reading, 1 hour; written work, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines the dynamics of gender relations within the context of the Muslim world. Analyzes processes of power which influence concepts of femininity, masculinity, and the body and sexuality. Explores heterogeneity of the Muslim world as well as its unifying cultural and social history. Cross-listed with WMST 168.

ANTH 190 Special Studies (1-5) Prerequisite(s): consent of instructor. Independent study and research by qualified undergraduate students under supervision of a particular faculty member. With consent of instructor, may be repeated without duplication of credit.

ANTH 191 Seminar in Anthropology (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines contemporary issues and topics in anthropology that are not part of the regular curricular offerings. Content of the course varies and is announced as the course is offered. Course is repeatable to a maximum of 16 units.

ANTH 195A Senior Thesis (4) Optional for anthropology majors; open to senior students having a "B" average in their major, with consent of instructor. Graded In Progress (IP) until ANTH 195A, ANTH 195B, and ANTH 195C are completed, at which time a final grade is assigned.

ANTH 195B Senior Thesis (4) Optional for anthropology majors; open to senior students having a "B" average in their major, with consent of instructor. Graded In Progress (IP) until ANTH 195A, ANTH 195B, and ANTH 195C are completed, at which time a final grade is assigned.

ANTH 195C Senior Thesis (4) Optional for anthropology majors; open to senior students having a "B" average in their major, with consent of instructor.

ANTH 198-I Internship in Anthropology (1-12) field research, 1-16 hours. Prerequisite(s): consent of instructor. Systematic participation by an individual in studies associated with future career(s) development within the context of an anthropological research project directed by a faculty member. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 16 units towards graduation.

ANTH 199H Senior Honors Research (1-5) research, variable. Independent work under the direction of members of the staff. With consent of instructor, may be repeated without duplication of credit.

Graduate Courses

ANTH 200A Core Theory in Anthropology (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing in Anthropology or consent of instructor. Examines the foundational theories of anthropology and how these inform current discussions about human origins, the origins of human society, the transformation of nature, work, and the built environment.

ANTH 200B Core Theory in Anthropology (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing, ANTH 200A; or consent of instructor. Examines the foundational theories of anthropology and how these inform current discussions about diversity; the origins of inequality; language; power; knowledge systems; and the politics of representation.

ANTH 200C Core Theory in Anthropology (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing, ANTH 200A, ANTH 200B; or consent of instructor. Examines the foundational theories of anthropology and how these inform current discussions about aesthetics, history, capitalism, imperialism, decolonization, globalization, transnationalism, cultural politics, violence, and human rights.

ANTH 203 Southeast Asian Cultures (4) Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Surveys ethnographic literature on Southeast Asian cultures, with an emphasis on contemporary research. Covers anthropological approaches to the study of text, ritual, and performance practices; intercultural dynamics; the impact of colonialism and nationalism on traditional cultures; and globalization. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with SEAS 203.

ANTH 209 Field Course in Maya Archaeology (4-12) Lecture, 2 hours; laboratory, 3-6 hours; outside research, 0-3 hours; field, 3-21 hours. Prerequisite(s): graduate standing and consent of instructor. Archaeological survey and excavation, including training in: site mapping; use of satellite-based Global Positioning Systems; natural resources surveying; and field laboratory techniques. Course is repeatable to a maximum of 36 units with consent of instructor and approval of a research plan by the department chair.

ANTH 210A Description and Inference in Anthropology (4) Seminar, 3 hours; outside research, 1 hour; individual study, 1 hour; extra reading, 1 hour. Prerequisite(s): graduate standing or consent of instructor. An examination of the modes of defining concepts and relations, developing and framing theories, and relating data to theory in anthropology; analysis of representative attempts to describe and explain behavior; and practice in carrying out simple analyses.

ANTH 210B Professionalism in Anthropology (4) Seminar, 3 hours; outside research, 1 hour; extra reading, 1 hour; proposal preparation, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Covers many aspects of professional career development in anthropology (including archaeology). Topics include the establishment of career goals, building a professional reputation, presenting papers at meetings, submitting manuscripts for publication, developing a research proposal, identifying sources of research funding, and the job search.

ANTH 218 Ancient Maya History and Religion (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Along with describing major historical figures and religious concepts of the ancient Maya, this course describes the analytic approaches used for the study of ancient Maya writing and art. The pioneering work of the nineteenth century as well as the most recent findings in the ongoing process of decipherment and iconographic interpretation will be discussed. Basic background needed to begin original research and interpretation will be provided.

ANTH 220 Theoretical Archaeology (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines the foundational theories of archaeology, the underlying networks of assumptions, and contemporary theoretical developments in the field.

ANTH 250A Seminar in History and Theory of Anthropology: Beginnings (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Systematic and historical treatment of the people, concepts, and research that have contributed to the development of anthropology. Covers the early history of anthropology, up to the rise of structural-functionalism.

ANTH 250B Seminar in History and Theory of Anthropology: 1920-1970 (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing

or consent of instructor. Systematic and historical treatment of the people, concepts, and research that have contributed to the development of anthropology. Covers the period in which much of anthropology was dominated by structural-functionalism, structuralism, and related approaches.

ANTH 250C Seminar in History and Theory of Anthropology: 1970 to Contemporary Times (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Systematic and historical treatment of the people, concepts, and research that have contributed to the development of anthropology. Surveys contemporary theories in anthropology, especially new ones that have arisen as antitheses to structural and processual models.

ANTH 251 Theory and Method in Mexican Ethnography (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Focuses on the basic issues of theory and method in Mexican ethnography. Major streams of thought framing the substance and approaches of rural and urban ethnographies of Mexico are examined.

ANTH 252 Seminar in Archaeology (4) Seminar, 3 hours; research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Studies in culture history and in the data and methods of archaeological research. Course is repeatable as topics change.

ANTH 253 Seminar in Physical Anthropology (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Selected topics in the analysis of human variation and evolution, the structure of human populations, and the biocultural environments of humans. Course is repeatable as topics change.

ANTH 255 Feminism, Gender, and Archaeology (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Considers feminist perspectives on past human societies, as well as how feminism and gender have shaped archaeological research design. Examines how gender relates to careers in archaeology.

ANTH 256 Seminar in Cultural Anthropology (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Provides focused coverage of concepts, theory, and methods central to various subfields in cultural anthropology. Course is repeatable as topics change.

ANTH 258 Space and Place in Archaeology (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines concepts of space and place in archaeology. Explores how spaces can reflect and foster social conflict or unity through studies of diverse cultural traditions. Considers both the architecture and occupied but unbuild spaces in ancient and current societies.

ANTH 259 Seminar in Anthropological Linguistics (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Studies in the concepts, methods, and data pertinent to anthropological linguistics.

ANTH 260 Ethnographic Field Methods (4) Seminar, 3 hours; field, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Introduces ethnographic field methodologies and research techniques through theoretical and practical application. Examines historical and contemporary models of fieldwork practices and ethics. Topics include fieldwork preparation; participant observation; ethnographic responsibilities; data collection techniques; interviews; gendered dynamics of field research; historical and visual methods; and violence in the field. Course is repeatable.

ANTH 261 Anthropology of the Body (4) Seminar, 3 hours; written work, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines cultural

102 / Programs and Courses

anthropology's treatment of the body as both a subject and object of social processes through recent and classic texts. Aims to ground theoretical inquiry in ethnographic and historical materials through the examination of bodies across time and space.

ANTH 262 Seminar in Medical Anthropology (4)

Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Surveys major topics in medical anthropology. Examines the theoretical and methodological underpinnings of medical anthropology, including the cultural construction of health and disease, the nature of the therapeutic process, and how social structures contribute to inequality and suffering.

ANTH 263 Seminar in Ecological Anthropology (4)

Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Selected topics in method and theory of ecological anthropology, including ethnobiology, food production and consumption, development issues, views of the environment, and questions about the relationship of humans to their environments.

ANTH 264 Codices of Ancient Mexico (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. The major manuscripts of the pre-Hispanic and contact periods of Mesoamerica will be reviewed. Special focus will be on the ancient codices of the Maya, Aztec, Mixtec, and the unprovenanced Borgia Group.

ANTH 265 Seminar on Anthropology of Visual Culture (4)

Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Presents a historical and ethnographic overview of the role of visual culture in the production and transmission of scientific and cultural knowledge. Focuses on the politics of representation and the ways in which images have maintained or challenged racial, gender, and global hierarchies and inequalities.

ANTH 266 Seminar on History and Memory (4)

Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Explores how societies remember, forget, and give meaning to the past through diverse forms of expression in national and transnational contexts. Examines contestations over historical representations and narrations, as well as the ways in which history and memory are shaped and contested by competing claims to power, legitimacy, and authenticity.

ANTH 267 Ethnographies of Postsocialism (4) Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Explores diverse sociocultural, economic and political experiences of socialist-capitalist transformations. Includes late and postsocialist nation states in Eastern Europe and postcolonial Asia, Latin America, and Africa. Examines the revival of socialist political and cultural projects as a response to capitalist globalization and escalating social and economic inequalities.

ANTH 277 Seminar in Political Ecology (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An advanced course focusing on the relationship between political economy and human ecology for the analysis of the interaction between people, natural resources, and the environment.

ANTH 278 Seminar in Representation and the Ethnographic Text (4)

Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Critically reviews and analyzes ethnographic texts, both traditional and experimental. Examining ethnographies as a form of writing, the seminar explores the larger intellectual, theoretical, and political context in which production of ethnographies occurs.

ANTH 279 Seminar in Political Anthropology (4)

Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor.

Reviewing different forms of stratification and power in society, this seminar critically reviews and analyzes a broad range of materials, debates, and contemporary trends within political anthropology.

ANTH 281 Anthropology of Humanitarianism (4)

Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines debates in anthropological study of humanitarianism and human rights. Uses case studies in Asia, Africa, and Latin America to explore legal, cultural, and political practices of rights and reconciliation in post-conflict settings. Topics include religious aid, philanthropy, ideas of humanity and personhood, state violence and citizenship, and peacekeeping missions.

ANTH 290 Directed Studies (1-6) Independent study by graduate students under supervision of a particular faculty member. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

ANTH 291 Individual Studies in Coordinated Areas (1-6) Prerequisite(s): graduate standing. A program of study designed to advise and assist candidates who are preparing for doctoral examination. The following rules apply: 1) a student may take up to 12 units for the Basic Requirements; 2) a student may take up to 8 units for the Comprehensive Requirements. Graded Satisfactory (S) or No Credit (NC).

ANTH 292 Concurrent Analytical Studies in Anthropology (1-4) Each ANTH 292 course will be taken concurrently with some 100-series course, but on an individual basis. It will be devoted to completion of a graduate paper based on research or criticism related to the 100-series course. Faculty guidance and evaluation will be provided throughout the quarter. Satisfactory (S) or No Credit (NC) grading is not available. May be repeated with different topic.

ANTH 297 Directed Research (1-6) Individual research by graduate students directed by a particular faculty member. Graded Satisfactory (S) or No Credit (NC).

ANTH 299 Research for Thesis or Dissertation (1-12)

Field training and directed research in preparation for and completion of doctoral dissertation. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Courses

ANTH 301 Directed Studies in the Teaching of Anthropology (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing; consent of instructor. Discusses bibliography and research and teaching techniques used in the instruction of anthropology. Covers how to lead discussion sections and relate student experience to anthropological problems. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

ANTH 302 Teaching Practicum (1-4) Prerequisite(s): limited to departmental teaching assistants; graduate standing, ANTH 301, or consent of instructor. Supervised teaching in upper- and lower-division Anthropology courses. Required of all teaching assistants. Fulfills teaching portion of Ph.D. teaching requirement. Graded Satisfactory (S) or No Credit (NC). May be repeated for credit.

Assistant Professor

Yunhee Min, M.A.

Major

The Department of Art offers a B.A. degree in an interdisciplinary program that emphasizes a critical approach to artistic production. Courses are offered in the following curricular areas: photography, digital art, video, two- and three-dimensional media (painting, drawing, sculpture, installation), and critical theory. The program is designed primarily for students preparing for graduate study and those who plan to continue professionally as artists. The Department of Art does not offer any course work in commercial art or in graphic design. The department does however welcome the participation of nonmajors and nondegree students.

Admission Incoming freshmen applicants may simply declare a major in Art upon the submission of their Undergraduate Admission application. However, current UCR non-majors and new incoming transfer students must submit a portfolio electronically, consisting of ten (10) images of your original work and/or three (3) clips of moving images or sound work. Guidelines for the portfolio and a link to the site for submission can be found on the Art Department website at art.ucr.edu/. Students whose portfolios are approved will be admitted to the major. Guidelines for submission are also available from Undergraduate Admissions and from the Department of Art.

University Requirements

See Undergraduate Studies section.

College Requirements

See College of Humanities, Arts, and Social Sciences, Colleges and Programs section.

Major Requirements

The major requirements for the B.A. in Art are as follows:

1. Lower-division requirements (28/30 units)
 - a) ART 006/MCS 006
 - b) Four additional lower-division Art courses: ART 001, ART 002, ART 003, ART 004/MCS 004, ART 005, ART 009, ART 065, ART 066/CS 066, or ART 067/CS 067.
 - c) Two of the following courses: AHS 008, AHS 017A, AHS 017B, AHS 017C, AHS 020/MCS 023, or AHS 021/URST 021, AHS 023, PHIL 001, or PHIL 007 (courses may be used to satisfy breadth requirements).
2. Upper-division requirements (40/41 units)

- a) ART 160
- b) One of the following Art History courses: AHS 115, AHS 135, AHS 136/MCS 137, AHS 175, AHS 176/MCS 176, AHS 178/URST 178, AHS 179, AHS 180, AHS 181, AHS 182, ART 183, AHS 184/URST 184, AHS 185/URST 185, AHS 186/MCS 186, AHS 187, AHS 188, AHS 189E-Z or any other upper-division Art History course that covers the period 1945 to present
- c) ART 180
- d) ART 132 Junior Art Workshop
- e) A minimum of 20 additional units of upper-division Art course work
- f) ART 133 Senior Art Workshop (must pass with C+ or better.)

Note A maximum of 12 upper-division transfer units of established equivalency in Art courses is accepted for credit. Equivalent transfer units in lower-division studio art course work and lower- and upper-division Art History course work is also accepted for credit toward the major in the respective lower- or upper-division category.

A minimum of 36 units of Art must be taken in residence (UCR Department of Art) to fulfill this major.

Education Abroad Program

The EAP is an excellent opportunity to travel and learn more about another country and its culture while taking courses to earn units toward graduation. Students should plan study abroad well in advance to ensure that the courses taken fit with their overall program at UCR. Consult the departmental student affairs officer for assistance. For further details, visit UCR's Off Campus Academic Experiences at eapoap.ucr.edu or call (951) 827-2508.

See Education Abroad Program in the Educational Opportunities section of this catalog. A list of participating countries is found under Education Abroad Program in the Programs and Courses section. Search for programs by specific areas at eap.ucop.edu/ourprograms.

Graduate Program

The Art Department offers the Master of Fine Arts (M.F.A.) degree in Visual Art.

Master of Fine Arts in Visual Art

The program's primary goal is to provide a context for research and production of contemporary art at the highest level. The M.F.A. in Visual Art is interdisciplinary, and students can draw on the resources of other departments on campus, including the UCR/California Museum of Photography.

The program emphasizes digital imaging, photography, and video, but students are free to work in any medium. The core of the program is independent creative work done in consultation with faculty. Creative work can be digital imaging, film or video works, installations, painting, performances, photography, sculpture, or any visual medium.

Admission Applicants must have a B.A. or B.F.A. degree. They must submit an application including all required support documents, a portfolio of their work, and three letters of recommendation. The GRE is not required. Students without any visual arts background may be required to complete courses in Studio Art and Art History subsequent to admission.

Plan I (Thesis) The M.F.A. is a Plan I (thesis) master's degree program, requiring 72 units in graduate or approved upper-division undergraduate courses that must be completed with at least a letter grade of "B" or "Satisfactory."

Required courses include 48 units in graduate courses in theory and criticism, as well as individual projects and tutorials:

1. Three courses of ART 285, Graduate Critique
2. ART 230, Contemporary Critical Issues
3. ART 240, Critical Theory
4. ART 299, Research for Thesis
5. Art History Graduate Seminar
6. Five courses of ART 290, Individual Tutorial

Of the remaining 24 units in elective courses, at least one additional course must be in Art History or Media and Cultural Studies, and at least two additional courses must be taken from a department other than art. These courses may be graduate or undergraduate courses.

MFA students receive a degree in Visual Art. The course of field study is not characterized by medium.

Students participate on yearly reviews during the Winter quarters of their first and second year.

The thesis requirement is met by the student's M.F.A. thesis exhibition, accompanied by a written thesis on the work exhibited. A graduate thesis committee reviews the thesis. The committee is composed of four faculty members, at least three from the Department of Art. The fourth faculty member may be from another department at any UC Campus. Persons who are not UC Senate members may be appointed only with the approval of the Graduate Dean. Nominations that require this approval should be forwarded to the Graduate Division by the end of the student's second year.

Foreign Language Requirement None

Teaching Requirement None; however, students are given opportunities to teach and are encouraged to do so.

Normative Time to Degree Nine quarters

Lower-Division Courses

ART 001 Beginning Drawing and Design (4) Lecture, 2 hours; studio, 4 hours. Introduction to the materials, techniques, structure and expressive properties of drawing and design. Includes lectures, studio exercises and outside assignments.

ART 002 Beginning Painting and Design (4) Lecture, 2 hours; studio, 4 hours. Introductory course in the media, techniques, structural and expressive properties of painting and design. Includes lectures, studio exercises and outside assignments.

ART 003 Introduction to Photographic Processes (5) Lecture, 3 hours; studio, 4 hours. Introduction to the basic principles of photography as fine art. Focuses on technological and conceptual evolution from analog to digital practice. Addresses a range of technological approaches to photography from traditional analog processes to digital image capture, organization/archiving, and printing. Explores historical and contemporary approaches to creating meaningful photographs.

ART 004 Introduction to Moving Images: Film, Video and New Media (5) Lecture, 3 hours; studio, 3 hours; screening, 3 hours. Prerequisite(s): none. Explores issues and skills of video/film/media art based in production, history, and theory of the moving image. Introduces basic production, editing concepts and techniques of live-action production, story boards, image editing, and final authoring. Examines the moving image through installation, documentary, experimental film, video art, sound art, and performance. Cross-listed with MCS 004.

ART 005 Beginning Sculpture and Three-Dimensional Design (4) Lecture, 3 hours; studio, 3 hours. Prerequisite(s): none. Introduction to the basic skills required to make three-dimensional and sculptural objects. Covers concept building, planning, design, brainstorming, materials, techniques, and basic contemporary sculpture history and theory. Lectures address work of contemporary artists and contemporary concepts of three-dimensional design. Studio assignments introduce new concepts and materials. Equipment is provided.

ART 006 Introduction to Contemporary Critical Issues in Art (4) Lecture, 3 hours; discussion, 1 hour. Examines basic principles and methodologies of theory as applied to the interpretation and creation of works of art. Includes screenings. Cross-listed with MCS 006.

ART 008 Current Topics in Contemporary Art (4) Lecture, 3 hours; activity, 3 hours. Examines visual arts as contemporary phenomenon. Includes study of recent exhibitions of contemporary art, the way art is culturally distributed, and the ideological and conceptual dialogue surrounding significant contemporary art. Encourages visits to nearby museums and major art galleries.

ART 009 Introductory Web-Based Art: Site Creation and Navigation (4) F Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): none. An introduction to the technology and critical issues of Web-based art. Covers Web-site creation software and conceptual and creative navigation. Emphasis is on contemporary issues of non-object, byte-based art practice. **Zaki**

ART 028 From Hamlet to Babylon 5: Introduction to Design in Film, Television, and Theatre (4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. An introduction to the design process for film, television, and theatre. Addresses the influence design has on the viewer, as well as how looks are achieved in different media. Cross-listed with THEA 038.

ART 065 Introduction to Digital Painting and Drawing: Painting Without a Trace (4) Lecture, 3 hours; laboratory, 4 hours; individual study, 2 hours. An introduction to digitally based painting and drawing. Focuses on use of digital software such as Adobe Photoshop and Illustrator to create paintings without the use of traditional paint. Explores the back and forth relationship this new medium and traditional painting, drawing, and photography in history and practice.

ART 066 Introduction to Three-Dimensional Digital Modeling (4) Lecture, 3 hours; laboratory, 3 hours; individual study, 2 hours. Covers basic skills necessary to create three-dimensional digital images and models. Emphasizes techniques for polygon and curved-surface modeling and photorealistic image creation through material shading, texturing, and lighting. Introduces basic scripting methods to create complex models and images with Autodesk Maya or

equivalent. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination. Cross-listed with CS 066.

ART 067 Three-Dimensional Digital Modeling and Animation (4) Lecture, 3 hours; laboratory, 3 hours; individual study, 2 hours. Prerequisite(s): ART 066/CS 066. Builds advanced skills for three-dimensional modeling. Introduces basic computer animation techniques within framework of existing software. Techniques include rigging skeletons for character models, keyframing, and special effects animation using Autodesk Maya software or equivalent. Teaches proficiency in analog scripting operations. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination. Course is repeatable to a maximum of 8 units. Cross-listed with CS 067.

ART 070 (E-Z) Digital Imaging Software for the Visual Arts (2) Lecture, 10 hours per quarter; laboratory, 30 hours per quarter; individual laboratory, 4 hours per quarter. Trains the student in basic digital image manipulation software skills in preparation for digital image applications across varied media. E. Introduction to Image Manipulation (PhotoShop); F. Introduction to Video Editing (Finalcut Pro, Avid, Media 100); G. Introduction to Web Authoring (Dreamweaver, QuickTime); I. Introduction to Graphic Design and Desktop Publishing (Quark). Each segment is repeatable as its topics change to a maximum of 8 units.

ART 071 (E-Z) Photographic Materials and Processes (2) Lecture, 15 hours per quarter; laboratory, 15 hours per quarter. Prerequisite(s): ART 003 or consent of instructor. In-depth instruction of conventional (i.e., nondigital) photographic processes. Instruction is primarily technical; involves some discussion of application to contemporary art. F. View Camera Workshop; K. Technical Issues of Basic Black and White Photography; M. Technical Issues of Color Photography; N. Intermediate Technical Aspects of Black and White Photography; O. Intermediate Technical Issues of Film-Based Digital Photography. Segments are repeatable.

ART 075 (E-Z) Sculpture Materials and Processes (2) Workshop, 10 hours per quarter; laboratory, 3 hours. Each topic focuses on a single art-making process. Provides in-depth understanding for the beginning sculpture student and a project-derived technique. E. Metal; F. Mold-Making; G. Plaster and Clay; J. Wood. Each segment is repeatable to a maximum of 8 units.

Upper-Division Courses

ART 102 Intermediate Drawing (4) Lecture, 2 hours; studio, 4 hours. Prerequisite(s): ART 001 and ART 002 or equivalent and consent of instructor. An intermediate course of study. Subject: primarily still life, landscape and non-figurative images; purpose: a fuller understanding of the technical and expressive aspects of drawing. Studio exercises and in-studio lectures. Course is repeatable to a maximum of 8 units with consent of instructor.

ART 103 Advanced Drawing (4) Lecture, 2 hours; studio, 4 hours. Prerequisite(s): ART 102: Intermediate Drawing, or equivalent and consent of instructor. An advanced course of study in drawing techniques and the employment of the drawing medium as a terminal means of artistic expression. Course is repeatable to a maximum of 12 units.

ART 104 Life Drawing (4) Lecture, 2 hours; studio, 4 hours. Prerequisite(s): ART 001 and ART 002 or equivalent and consent of instructor. Media to be pencil, charcoal, pen and ink; subject, primarily the figure; purpose, a fuller understanding of the figure and figure composition; method combines lectures with exercises in studio and outside assignments. Course is repeatable to a maximum of 12 units.

ART 110 Intermediate Painting (4) Lecture, 2 hours; studio, 4 hours. Prerequisite(s): ART 001 and ART 002 or equivalent and consent of instructor. Subject primarily still-life, landscape and figure; its purpose a fuller understanding of the technical aspects of painting; its method studio exercises, in-studio lectures and outside assignments. Course may be repeated for credit to a total of 12 units.

ART 111 Advanced Painting (4) Lecture, 2 hours; studio, 4 hours. Prerequisite(s): ART 110 and consent of instructor. Advanced problems in figurative and nonfigurative painting. Emphasis on the development of personal direction. Investigation of the individual student's relation to contemporary ideas in painting. In-studio lectures, studio exercises, and outside assignments. May be repeated for credit to a total of 12 units.

ART 112 (E-Z) Painting Materials and Processes (2) Workshop, 1 hour; studio, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. Focuses on selected special techniques or approaches to painting. E. Supports, Grounds, Underpainting, and Blending; F. Glazing, Varnishing, and Layering. G. Big Collaborative Painting; I. All Paint. Each segment is repeatable to a maximum of 12 units. **Giegerich in charge**

ART 115 Intermediate Sculpture (4) Lecture, 3 hours; studio, 3 hours. Prerequisite(s): ART 005. Develops the necessary critical and imaginative faculties for making sculpture. Through project assignments, students explore associations between materials, forms, and context to construct or deconstruct ideas. Audiovisual presentations, readings, and group critiques survey twentieth-century modern sculpture and more recent practices. Examines the artist's role in the cultural landscape of spectacle and entertainment. Course is repeatable to a maximum of 12 units.

ART 125 Sculpture Hybrid: Furniture, Architecture, Decoration (FAD) (4) Lecture, 3 hours; laboratory, 3 hours; consultation, .5-1.5 hours per quarter. Prerequisite(s): ART 005, ART 115; or consent of instructor. Introduces the sculptural object that exists as or in relationship to furniture, architecture, and interior decoration. Includes an overview of work that defies classification as art or design such as the Bauhaus movement, through utopian American mid-century design and architecture and Italian-based Memphis design, to contemporary art-making practices. Explores theoretical challenges inherent in this art-making strategy.

ART 131 Intermediate Photography and Digital Technology (4) F Lecture, 3 hours; laboratory, 4 hours. Prerequisite(s): ART 003 or consent of instructor. Covers the complete cycle of photographic production from scanning to output. Emphasizes developing skill in creating digital photographic imagery for creative and cultural expression. Software and some digital equipment are provided. A 35mm single lens reflex (SLR) or digital cameras and flash drives are required. Course is repeatable to a maximum of 8 units. Cross-listed with MCS 131.

ART 132 Junior Art Workshop (4) Lecture, 3 hours; studio, 3 hours. Prerequisite(s): ART 006/MCS 006, upper-division standing in Art, at least 12 units of lower division Art course work, and at least 4 units of upper division studio course work. Prepares junior Art majors for their senior course work. Emphasizes interdisciplinary work, independent projects, critical analysis in a group critique situation, exhibition preparation, and writing a preliminary artist statement. Letter Grade only.

ART 133 Senior Art Workshop (4) Lecture, 3 hours; studio, 3 hours. Prerequisite(s): upper-division standing in Art, 16 upper-division units in Art course work, or consent of instructor. Prepares senior Art majors for their thesis exhibition show. Emphasizes interdisciplinary work, independent projects, critical analysis in a group critique situation, exhibition preparation, and writing a final thesis statement. Letter Grade Only.

ART 134 Mixed Media (4) Lecture, 3 hours; studio, 3 hours. Prerequisite(s): ART 001 and ART 002. Exploration into experimental methods for creating an image; techniques of frottage, collage, photo transfer, modeling and mold making, assemblage.

ART 135 Intermedia: Art, Media, and Culture (4) Lecture, 2 hours; screening, 6 hours. Prerequisite(s): upper-division standing or consent of instructor. A study of performance, photography, video, film, television, installation, and other related "intermedias." Focuses on artworks within and without the mass media: how they are constructed, documented, analyzed, and viewed in the larger context of culture. Cross-listed with MCS 135.

ART 136 Installation and Site-Specific Art (4) Lecture, 3 hours; studio, 3 hours. Prerequisite(s): consent of instructor. Focuses on performance, photo installation, computer art, video/film, site-specific installation, sculpture, and/or other intermedia. Concentrates on production and analysis of site-specific art. Course is repeatable to a maximum of 8 units. Cross-listed with MCS 136.

ART 137 Advanced Sculpture (4) F, W, S Lecture, 3 hours; studio, 3 hours. Prerequisite(s): ART 115. Focuses on self-directed individual sculpture projects. Course is repeatable to a maximum of 12 units.

ART 139 Intermediate Web-Based Art: Animation, Audio, and Interactivity (4) W Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): ART 009 or consent of instructor. Explores the conceptual and creative possibilities of Web-based animation, audio, and interactive software at the intermediate level. Addresses the complex interconnections and unique quality of Internet-based art.

ART 140 Intermediate Analog Photography (4) Lecture, 3 hours; studio, 4 hours. Prerequisite(s): ART 003, ART 071K is recommended (may be taken concurrently); or consent of instructor. Focuses on developing individual creative approaches in analog photography and strengthening controls and techniques in black and white printing. Requires students to provide their own analog film cameras. Course is repeatable to a maximum of 12 units.

ART 143 Advanced Digital Imaging Technology (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): ART 003, ART 131/MCS 131. Covers advanced digital imaging technologies such as large-format scanning, printing, color correction, retouching, and color management. Emphasizes the development of technical skills. **Zaki**

ART 145 Advanced Photography Workshop (4) Lecture, 3 hours; studio, 4 hours. Prerequisite(s): ART 131/MCS 131, ART 140 or consent of instructor. A study of experimental advanced photographic techniques. Includes examination of critical and creative problems. Course is repeatable to a maximum of 12 units.

ART 146 (E-Z) Topics in Advanced Photography (4) Lecture, 2 hours; studio, 4 hours. Prerequisite(s): ART 131/MCS 131, ART 140 or consent of instructor. An advanced studio course designed to focus on selected special techniques or approaches to photography. Subject matter is determined by the instructor and may vary. K. Polaroid Photography; L. The Book and the Photograph; M. Dye Transfer; N. Current Art Practices; O. Photography and the Urban Edge; P. Fabricated to Be Photographed and the Directorial Mode; Q. Sycamore Canyon Photographic Project. ART 146Q is repeatable to a maximum of 12 units.

ART 150 Intermediate Moving Images: Film Video and New Media (5) Lecture, 3 hours; studio, 3 hours; screening, 3 hours. Prerequisite(s): ART 004/MCS 004. Examines the moving image through installation, documentary, experimental film, video art, sound art, and performance. Builds upon production and editing concepts introduced in ART 004/MCS 004. Explores issues and skills of video/film/media art based in production, history, and theory of the moving image.

Covers editing theory, lighting, and sound editing. Course is repeatable to a maximum of 10 units. Cross-listed with MCS 150.

ART 155 Advanced Moving Images: Film, Video and New Media (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): ART 150/MCS 150. Expands on skills introduced in ART 150/MCS 150. Explores issues and skills connected with video/film/media art based on the production, history, and theory of the moving image. Covers recording, editing theory, lighting, and sound mixing. Examines time-based media through installation, documentary, experimental film, video art, sound art, and performance. Course is repeatable to a maximum of 12 units.

ART 160 Intermediate Art Theory (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): ART 006/MCS 006. Addresses current critical and theoretical issues in modern and contemporary culture. Examines art production in light of contemporary and modernist art practice, theory, and history in relation to the interpretation and creation of art. Focuses on issues of race, gender, politics, aesthetics, class, and sexuality.

ART 161 Special Topics in Art Criticism and Theory (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ART 006/MCS 006 and ART 160 with grades of "C" or better or consent of instructor. Advanced topics in contemporary art theory and criticism. Examines the reception, analysis, and theoretical underpinning of works of art in relation to contemporary and historical issues in the visual arts. Course is repeatable to a maximum of 12 units. Cross-listed with MCS 163.

ART 162 Special Topics in New Genres of Art Practice (4) F, W, S Lecture, 2 hours; studio, 4 hours. Prerequisite(s): ART 006/MCS 006 and a beginning studio art course with grades of "C" or better or consent of instructor. Through group critiques, readings, and discussions, explores art making while introducing significant and recent practices in cultural production. Course is repeatable to a maximum of 12 units.

ART 165 Intermediate Digital Painting and Drawing: Intermediate Painting without a Trace (4) Lecture, 3 hours; laboratory, 4 hours; individual study, 2 hours. Prerequisite(s): ART 065. Continues the investigation of two-dimensional digitally based painting and drawing. Explores possibilities in combining traditional and digital painting techniques. Examines the relationship between this new medium and traditional painting, drawing, and photography. Course is repeatable to a maximum of 8 units.

ART 167 Intermediate Digital Media: Web Authoring (4) Lecture, 3 hours; laboratory, 4 hours. Prerequisite(s): ART 009 or consent of instructor. Examines the histories, myths, and technical particularities of the Web from the artist's perspective. Includes art projects that are site-specific to the Internet. Explores issues including access, interface design, activism, multiple narratives, programming, and code. Does not cover software training or commercial graphic design.

ART 168 Intermediate Digital Media: Interactive Technology (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): digital art course or consent of instructor. Create interactive digital artworks in both time-based and environmental forms; explore issues including interactivity, interface design, activism, and multiple narratives. Does not cover software training or commercial graphic design.

ART 169 (E-Z) Digital Imaging Software for the Visual Arts: Intermediate Software Skills (1) Lecture, 6 hours per quarter; laboratory, 12 hours per quarter. Prerequisite(s): ART 007/MCS 007 or consent of instructor. Covers digital imaging application across varied media. Includes Web design, digital video editing, video compositing and effects, Web authoring, digital photography, and desktop publishing. Targets specific software that aid in developing digital production skills that can be applied to a wide array of intermediate course work. E. Image Manipulation (Adobe Photo-

shop); F. Video Editing (FinalCut Pro, Avid, Media 100); G. Web Authoring (Dreamweaver, QuickTime); J. Graphic Design and Desktop Publishing (Quark). Each segment is repeatable to a maximum of 3 units.

ART 171 Intermediate and Advanced Sculpture and Digital Technology (4) Lecture, 2 hours; laboratory, 4 hours; individual study, 2 hours. Prerequisite(s): ART 005, ART 066/CS 066. Covers intermediate and advanced three-dimensional modeling and printing resulting in sculpture derived entirely from the computer. Emphasizes individual projects with the potential to create both computer-based models and material-based sculptures. Discusses new digitally based sculptural possibilities in relation to historical sculptural practice. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination. Course is repeatable to a maximum of 8 units.

ART 175 Advanced Digital Workshop (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): ART 131/MCS 131 or ART 139 or ART 150/MCS 150. Designed to encourage the development of individual projects utilizing digital technology. Areas of inquiry may include, but are not limited to, digital imaging, Web-based works, forms of digital publishing, digital video, and digital multimedia installation. Involves laboratory exercises, lectures, discussion of articles and exhibitions, and self-directed assignments. Course is repeatable to a maximum of 12 units.

ART 180 Contemporary Issues and Practice (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): any lower-division studio art course. A course structured around a sequence of three to six visiting artists, authors, and critics. Visitor presentations will be augmented by relevant articles and in-class presentations. Students generate written and oral responses to specific artists and topics. Artists and topics to be determined by the instructor. Course is repeatable to a maximum of 12 units.

ART 185 Senior Thesis Seminar (4) Seminar, 3 hours; preparatory work, 3-6 hours. Prerequisite(s): senior standing in Art; 32 units of upper-division studio art courses; review of preliminary portfolio two quarters before intended enrollment. Independent work and group seminars; completion of thesis statement and presentation of a finished body of work to faculty thesis committee. Satisfactory (S) or No Credit (NC) grading is not available. Credit is awarded for only one of ART 185 or ART 195.

ART 190 Special Studies (1-5) To be taken with the consent of the chair of the department as a means of meeting special curricular problems. Total credit may not exceed 8 units.

ART 195 Senior Thesis (4) independent work, 12 hours. Prerequisite(s): completion of 32 units of upper-division studio art courses, review of a preliminary portfolio two quarters prior to intended enrollment; or consent of faculty advisor. The student produces and presents a finished body of work to the faculty. Credit is awarded for only one of ART 185 or ART 195.

ART 198-I Individual Internship (1-12) field, 2 hours per unit. Prerequisite(s): consent of instructor and upper-division standing. Work with an appropriate professional individual or organization to gain experience and skills in the student's chosen art specialty. Letter grade or Satisfactory (S)/No Credit (NC). Repeatable to a total of 16 units; maximum of 4 units count toward major in Art.

Graduate Courses

ART 230 Contemporary Critical Issues (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing. Focused analysis of contemporary issues of art and media practice communications theory. Investigates painting, sculpture, photography, digital practice, film, video, fiction, feminism,

multicultural studies, and gay and lesbian studies. Involves readings, screenings, visiting artists or critics, and field trips. Course is repeatable to a maximum of 12 units.

ART 240 Current Topics in Critical Theory (4) Seminar, 3 hours; extra reading, 3 hours; outside research, 2-3 hours. Prerequisite(s): graduate standing; ART 006/MCS 006 and ART 160 or equivalents or consent of instructor. Selected theoretical systems as applied to modern, postmodern, and post-postmodern art. Course is repeatable as topics change to a maximum of 12 units.

ART 285 Peer Critique (4) F, W, S Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Provides a serious and sophisticated environment for peer critique of studio production. Involves readings, screenings, and field trips. Course is repeatable as content changes.

ART 290 Directed Studies (1-6) F, W, S Individual study, 3-18 hours; studio, 3-6 hours. Prerequisite(s): graduate standing; consent of instructor and graduate advisor. Individual study of selected topics directed by a faculty member. Course is repeatable as topics change.

ART 292 Concurrent Studies in Art (1-4) Outside research, 3-12 hours. Prerequisite(s): graduate standing; consent of instructor. Taken concurrently with a 100-series course but on an individual basis. Involves research, critique, studio production, or written work commensurate with the number of units elected. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

ART 299 Research for Thesis (1-4) Outside research, 1-6 hours; studio, 3-6 hours. Prerequisite(s): graduate standing; consent of instructor and graduate advisor; satisfactory completion of 28 graduate units in the Masters of Fine Arts program. Individual research with faculty advisor in preparation for comprehensive exhibition for the degree. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Course

ART 302 Teaching Practicum (1-4) Practicum, 2-8 hours; consultation, 1-4 hours. Prerequisite(s): graduate standing. Provides supervision of teaching in undergraduate Art courses. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Liz Kotz, Ph.D.
Jeanette Kohl, Ph.D.
Patricia A. Morton, Ph.D.
Kristoffer Neville, Ph.D.

Assistant Professors

Susan Laxton, Ph.D.
Aleca LeBlanc, Ph.D.
J.P. Park, Ph.D.
Jason Weems, Ph.D.

Major

The Art History major provides the framework for the critical study of a wide range of global visual culture from different periods of human history and in all media.

The department works closely at both the undergraduate and graduate levels with the UCR California Museum of Photography to give students an opportunity to work with archival and art photographs and with the Jack and Marilyn Sweeney Art Gallery to provide access to cutting-edge multimedia works of art and to give the possibility of gaining curatorial experience.

Education Abroad Program

The EAP is an excellent opportunity to travel and learn more about another country and its culture while taking courses to earn units toward graduation. Students should plan study abroad well in advance to ensure that the courses taken fit with their overall program at UCR. Consult the departmental student affairs officer for assistance. For further details, visit UCR's Off Campus Academic Experiences at eapoap.ucr.edu or call (951) 827-2508.

See Education Abroad Program in the Educational Opportunities section of this catalog. A list of participating countries is found under Education Abroad Program in the Programs and Courses section. Search for programs by specific areas at eap.ucop.edu/ourprograms.

University Requirements

See Undergraduate Studies section.

College Requirements

See College of Humanities, Arts, and Social Sciences, Undergraduate Studies section.

Major Requirements

Art History Major

The major requirements for the B.A. in Art History are as follows: (52 units)

1. Lower-division requirements (12 units): one lower-division course in each of the three major areas. Note: No course that appears in more than one area can be repeated
 - a) Pre-modern: AHS 015, AHS 017A, AHS 017B, AHS 027/ANTH 027/LNST 027
 - b) Early Modern: AHS 015, AHS 017B, AHS 017C, AHS 023, AHS 028/LNST 028
 - c) Modern/Contemporary: AHS 008, AHS 017C, AHS 020/MCS 023, AHS 021/URST 021, AHS 023, AHS 028/LNST 028
2. Upper-division requirements (40 units)
 - a) AHS 192
 - b) Two courses in each of the major areas (24 units). Note: No course that appears in more than one area can be repeated.
 - (1) Pre-modern: AHS 102/ANTH 102, AHS 112/ANTH 151/LNST 112, AHS 116/LNST 116, AHS 117/

ANTH 157/LNST 117, AHS 138/AST 138, AHS 139/AST 139, AHS 143/AST 143, AHS 144/AST 144, AHS 147, AHS 148, AHS 155, AHS 156, AHS 157, AHS 159

- (2) Early Modern: AHS 113, AHS 116/LNST 116, AHS 117/ANTH 157/LNST 117, AHS 134/HISE 134, AHS 138/AST 138, AHS 139/AST 139, AHS 143/AST 143, AHS 144/AST 144, AHS 146/AST 147, AHS 160, AHS 161, AHS 162, AHS 163, AHS 164, AHS 165/HISE 133/WMST 170, AHS 166/WMST 169, AHS 167, AHS 168, AHS 169, AHS 170, AHS 171, AHS 172, AHS 173, AHS 174, AHS 175, AHS 177, AHS 178/URST 178, AHS 179

- (3) Modern/Contemporary: AHS 115/LNST 115, AHS 116/LNST 116, AHS 120/EUR 110B/CPLT 110B/MCS 178/GER 110B, AHS 134/HISE 134, AHS 135, AHS 136/MCS 137, AHS 137/MCS 138, AHS 145/AST 146, AHS 146/AST 147, AHS 174, AHS 175, AHS 176/MCS 176, AHS 177, AHS 178/URST 178, AHS 179, AHS 180, AHS 181, AHS 182, AHS 183, AHS 184/URST 184, AHS 185/URST 185, AHS 186/MCS 186, AHS 187/MCS 187, AHS 188, AHS 189(E-Z), AHS 191

3. Twelve (12) elective units of upper-division course work in Art History chosen from the three major areas

Art History/Administrative Studies Major

The major between the departments of Art History and Business Administration provides students with training in management and the history of art. The major requirements for the B.A. degree in Art History/Administrative Studies are as follows:

Art History requirements (48 units)

1. Lower-division requirements (12 units): one lower-division course in each of the three major areas. Note: No course that appears in more than one area can be repeated
 - a) Pre-modern: AHS 015, AHS 017A, AHS 017B, AHS 018/AST 018, AHS 027/ANTH 027/LNST 027
 - b) Early Modern: AHS 015, AHS 017B, AHS 017C, AHS 018/AST 018, AHS 023, AHS 028/LNST 028
 - c) Modern/Contemporary: AHS 008, AHS 017C, AHS 020/MCS 023, AHS 021/URST 021, AHS 023, AHS 028/LNST 028
2. Upper-division requirements (36 units):
 - a) AHS 192, Junior and Senior Seminar (4 units)
 - b) Two courses (24 units total) in each of the major areas (Pre-modern, Early Modern, Modern/Contemporary) Note: No course that appears in more than one area can be repeated.

- c) Eight (8) elective units of upper-division course work in Art History chosen from the three major areas.

Administrative Studies requirements (37 units)

1. Lower-division requirements (17 units)
 - a) BUS 010, BUS 020
 - b) STAT 048 or equivalent (may be used to satisfy breadth requirements)
 - c) CS 008 (may be used to satisfy breadth requirements)
2. Upper-division requirements (20 units)
 - a) Two courses (8 units) from the list below:
 - (1) ECON 102 or ECON 104A or ECON 130 or ECON 162/BUS 162
 - (2) PSYC 140 or PSYC 142
 - (3) SOC 150 or SOC 151 or SOC 171
 - (4) POSC 181 or POSC 182 or POSC 183
 - (5) ANTH 127 or ANTH 131

These two courses must be outside the discipline of Art History and cannot be courses included as part of the three-course Business Administration track or their cross-listed equivalents.
 - b) A three-course track (12 units) in Business Administration courses from one of the following:
 - (1) Organizations (General): BUS 100, BUS 107, BUS 176/SOC 176, BUS 158/ANTH 105, SOC 150, SOC 151

- (2) Human Resources Management/Labor Relations: BUS 100, BUS 107, BUS 152/ECON 152, BUS 153/ECON 153, BUS 155, BUS 157, PSYC 142
- (3) Business and Society: BUS 100, BUS 102, BUS 107, PHIL 116, POSC 182, POSC 186
- (4) Marketing: BUS 103, and two from BUS 112, BUS 113, BUS 114, BUS 117
- (5) Managerial Accounting/Taxation: BUS 108, and two from BUS 166, BUS 168A, BUS 168B
- (6) Financial Accounting: BUS 108, BUS 165A, BUS 165B
- (7) Finance: BUS 106/ECON 134 and two from BUS 134, BUS 136, BUS 137, BUS 138, BUS 139
- (8) Management Information Systems: BUS 101, BUS 171, BUS 173
- (9) Production Management: BUS 104/STAT 104, and two from BUS 105, BUS 122, BUS 127/STAT 127

Note In filling the dual requirements of the major students may not count more than two courses toward both parts of their total requirements (Art History requirements and Administrative Studies requirements).

Art History/Religious Studies Major

The Art History/Religious Studies Major combines the disciplinary interest in the history of the visual arts with its related religious content and background.

Major Requirements

The major requirements for the B.A. degree in Art History/Religious Studies are as follows:

Asian Concentration (52 units)

1. Lower-division requirements (12 units)
AHS 015, AST 030/CHN 030, RLST 005
2. Upper-division requirements (40 units)
 - a) Art History (16 units): AHS 140/AST 140, AHS 141/AST 141, AHS 143/AST 143, CPLT 141
 - b) Religious Studies (24 units): choose from RLST 101, RLST 103, RLST 105, RLST 106, RLST 142/AST 142/CHN 142, RLST 144/CPLT 144
3. Optional 190-level work in either Art History or Religious Studies

Student-designed Comparative Concentration (52 units)

1. Lower-division requirements (12 units)
 - a) Art History, choose at least 4 units: AHS 015, AHS 017A, AHS 017B, AHS 017C, AST 030/CHN 030
 - b) Religious Studies, choose at least 4 units: RLST 005, RLST 007, RLST 010
2. Upper-division requirements (40 units)
 - a) Art History, choose at least 12 units: AHS 140, AHS 141, AHS 143, AHS 155, AHS 156, AHS 157, AHS 159, AHS 161, AHS 162, AHS 164, AHS 171, AHS 172, CPLT 141
 - b) Religious Studies, choose at least 12 units: RLST 100, RLST 101, RLST 103, RLST 105, RLST 106, RLST 111, RLST 121, RLST 128 (E-Z), RLST 130, RLST 131, RLST 135/HISE 130, RLST 136, RLST 142/AST 142/CHN 142, RLST 144/CPLT 144
3. Optional 190-level work in either Art History or Religious Studies

Western Concentration (At least 52 units)

1. Lower-division requirements (16 units)
 - a) Art History: AHS 017A, AHS 017B, AHS 017C
 - b) Religious Studies, choose at least 4 units: RLST 007, RLST 010
2. Upper-division requirements (36 units)
 - a) Art History (16 units): choose from AHS 155, AHS 156, AHS 157, AHS 159, AHS 161, AHS 162, AHS 164, AHS 171, AHS 172
 - b) Religious Studies (20 units): choose from RLST 100, RLST 111, RLST 121, RLST 128 (E-Z), RLST 130, RLST 131, RLST 135/HISE 130, RLST 136
3. Optional 190-level work in either Art History or Religious Studies

Minor

The minor upper-division requirements are designed to encourage study across art-historical areas, while providing the opportunity for some concentration in one specific area.

Requirements for the minor in Art History are as follows:

1. Lower-division requirements (8 units): One lower-division course from two of the three major areas. Note: No course that appears in more than one area can be repeated.
 - a) Pre-modern: AHS 015, AHS 017A, AHS 017B, AHS 018/AST 018, AHS 027/ANTH 027/LNST 027
 - b) Early Modern: AHS 015, AHS 017B, AHS 017C, AHS 018/AST 018, AHS 023, AHS 028/LNST 028
 - c) Modern/Contemporary: AHS 008, AHS 017C, AHS 020/MCS 023, AHS 021/URST 021, AHS 023, AHS 028/LNST 028
2. Upper-division requirements: Sixteen (16) upper-division units selected from the three areas listed under the major (No more than 6 units may be selected from any one area.)

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Graduate Program

The Department of History of Art offers the M.A. and Ph.D. in Art History

For graduate study, the department offers upper-division and graduate courses in the history of European, U.S., Central and Latin American, and Asian visual culture from ancient to contemporary times (including

the history of photography), emphasizing the interpretation of visual culture in its historical and cultural context.

Admission All applicants to these programs must have completed a bachelor's degree or its approved equivalent from an accredited institution and have attained an undergraduate record that satisfies the standards established by the Graduate Division and University Graduate Council. Applications are accepted in the Fall quarter only. All applicants must submit scores from the Graduate Record Exam, General Test (GRE). Applicants whose first language is not English are required to submit acceptable scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) unless they have a degree from an institution where English is the exclusive language of instruction. Additionally each applicant must submit a writing sample and three letters of recommendation, at least two of which must be academic references. All other application requirements are specified in the graduate application. Applicants holding an M.A. from another institution take fewer courses and advance to candidacy more quickly, as specified below. Upon entering the program,

students consult with the Graduate Adviser regularly to discuss their course of study and progress in the program.

Master's Degree

The terminal M.A. program will allow students to explore the academic study of art history, to pursue careers requiring some graduate education (such as museum education), or to prepare for admission to a Ph.D. program.

Course Work 48 units of course work are required for the M.A. degree, which may be awarded to a student upon finishing the requirements if the student does not hold an M.A. in Art History. At least 32 of these units must be in graduate level courses. The Department requires students to take a two-quarter Proseminar (AHS 251A and AHS 251B) in the first year and a one-quarter professional development and thesis writing course (AHS 280). In addition to AHS 251A, AHS 251B and AHS 280, students must take one graduate seminar in their area of specialization, two graduate seminars outside of their chosen area, two additional graduate seminars, and four additional graduate or upper-division courses. Students may also take courses – with the approval of the graduate advisor – in visual culture offered by the department of Anthropology, Media and Cultural Studies, or other departments or programs at UCR or other UC campuses.

Students may take as many units of AHS 297 and AHS 299 (thesis research and writing) as desired, but only 12 of these units may be applied to the 32 graduate units required for the degree.

The thesis is the culminating requirement for the degree. Students must complete a successful oral discussion (the "Thesis Meeting") prior to filing the completed thesis. The thesis should be filed within one year after completing all formal course work.

Language Requirement Students must demonstrate proficiency in one research language (in addition to English) appropriate to their area of study. The relevant language is chosen in consultation with the graduate advisor and, if possible, the potential M.A. thesis advisor. Ideally, the student should acquire this language proficiency before entering the program. If this is not the case, the language requirement should be fulfilled before the fourth quarter in residence. This requirement is meant to provide the student with an understanding of a foreign language so that the student can perform graduate level research in this language.

To satisfy the language requirement, the student has several options, which are outlined in the department's Graduate Student Handbook. Most commonly, students, while enrolled as graduate students, complete, with a grade of "B" or better, a UC language course equivalent to one of the following UCR classes.

CHN 006

FREN 004

GER 004

ITAL 004

JPN 006

SPN 006

Doctoral Degree

The Ph.D. will prepare students for academic work as researchers, university instructors, and curators in their fields of expertise.

Admission The Ph.D. program is conceived in two stages: coursework and candidacy. Students who already hold an M.A. in Art History are admitted Post-M.A., but are required to complete one year of coursework (20 units), including three graduate seminars, as well as the language requirements, and the field review as stated in the program description below. Students admitted post-M.A. usually advance to candidacy after one year of coursework.

Course Work Candidates for the Ph.D. degree entering with a baccalaureate degree complete a minimum of 60 units of required course work, 36 of which must be at the graduate level. The Department requires students to take a two-quarter Proseminar (AHS 251A and AHS 251B) in the fall of the first year and a one-quarter professional development and thesis writing course (AHS 280). In addition to AHS 251A, AHS 251B and AHS 280, students must take two graduate seminars in their area of specialization, two graduate seminars outside of their chosen area, two additional graduate level courses and six additional graduate or upper-division courses.

Students who enter with an M.A. degree complete a minimum of 20 units, 12 of which must be at the graduate level. These courses include AHS 251A, AHS 251B, AHS 280, one graduate seminar in their area of specialization, and two graduate or upper-division courses. Students may also take courses – with the approval of the graduate advisor – in visual culture offered by the department of Anthropology, Media and Cultural Studies, or other departments or programs at UCR or other UC campuses.

Language Requirement Ph.D. students are required to demonstrate competence in two foreign languages before advancement to candidacy. For some fields, additional languages may be required for mastery of the primary and secondary literature. The appropriate languages will be determined in consultation with the student's academic advisor and approved by the graduate advisor.

To satisfy the language requirements, the student has several options, which are outlined in the department's Graduate Student Handbook. Most commonly, students, while enrolled as graduate students, complete, with a grade of "B" or better a UC language course equivalent to one of the following UCR classes.

CHN 006

FREN 004

GER 004

ITAL 004

JPN 006

SPN 006

Written and Oral Qualifying Examination

The qualifying examination will take the form of written literature reviews, subsequently defended orally. In the second year of the doctoral program, each student will write a substantial literature review of the major field, with the expectation that the review of the major field will demonstrate a broad knowledge of the field in which the dissertation will make a contribution. The field review will then be examined by the faculty and approved by the graduate committee no later than the end of the winter quarter in the third year.

Advancement to Candidacy

Advancement to candidacy is predicated on successful passage of the required coursework, language exams, and field reviews/oral exams. To advance to candidacy, a student must write a dissertation prospectus and pass a qualifying oral examination. The prospectus consists of a concise explanation of the rationale, scope, and method of the proposed dissertation, and should be prepared in consultation with the dissertation advisor, who must approve it before the oral qualifying exam can be scheduled. The oral examination, which is supervised by a faculty committee as stipulated in the regulations of the Graduate Division, concentrates on the students' preparation of writing a dissertation as indicated by the dissertation prospectus.

Dissertation and Final Oral Examination

A dissertation to be presented as prescribed by the Graduate Council is prepared under the direction of the candidate's dissertation committee. The dissertation itself must make a significant and original contribution to the field of art history, as demonstrated in a final oral examination or defense.

Normative Time to Degree including UCR M.A. is 18 quarters counting time spent as UCR M.A. student or 15 quarters for those entering with an M.A. from another institution.

Lower-Division Courses

AHS 007 World Art: Images, Issues, and Ideas (4) Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours. Prerequisite(s): none. An introduction to artistic achievements of the world's cultures and ways in which they can be viewed. Considers such issues as the use of artworks as historical documents; connections between "high art" and popular culture; and the relationship between artist, viewer, artistic tradition, and society.

AHS 008 Modern Western Visual Culture (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Focuses on broadly defined cultural practices in relation to painting, photography, video, architecture, and film. Introduces historical, aesthetic, and theoretical issues in twentieth-century visual culture, emphasizing political and social themes relevant to contemporary life. **Kotz**

AHS 010 Topics in Art and Architectural History (4) Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): none. Explores significant themes and topics from the history of art and architecture around the world. Concentrates on particular subtopics to be announced in the Schedule of Classes. Course is repeatable as topics change to a maximum of 24 units.

AHS 015 Arts of Asia (4) Lecture, 3 hours; discussion, 1 hour; outside research, 2 hours. Prerequisite(s): none. A survey of the major monuments and themes

of the visual arts of India, China, and Japan. Topics include recent archaeological discoveries, Buddhist art, Hindu sculpture and architecture, Zen in art, and the development of Asian pictorial art.

AHS 017A History of Western Art: Prehistoric to Byzantine (4) Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours. Prerequisite(s): none. A survey of the visual arts of the ancient Near East and Egypt, the Greek world, and the Roman and Byzantine empires. Topics include the growth of urbanism, art as an expression of religious and political beliefs, and cultural contact as a source of artistic change. Credit is awarded for only one of AHS 017A or AHS 17HA.

AHS 017B History of Western Art: Medieval to Renaissance (4) Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours. Prerequisite(s): none. Surveys the visual arts of Europe in the Middle Ages and Renaissance. Includes the religious and political functions of art in the reestablishment of high civilization and the increased status of the individual artist. Credit is awarded for only one of AHS 017B or AHS 17HB. **Kohl**

AHS 017C History of Western Art: Baroque to Modern (4) Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours. Prerequisite(s): none. Surveys the visual arts of Europe and America from 1600 through the present. Includes the religious and political roles of art, the rise of secular imagery, the increased role of women in the arts, the impact of popular culture and photography, and other new media in the visual arts. Credit is awarded for only one of AHS 017C or AHS 17HC. **Neville**

AHS 020 Introduction to Media Art (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. An introduction to the impact of media technology on the visual arts, from photography to the Internet. Addresses mechanical reproduction, perception, gender, sexuality, identity, interactivity, cybernetics, and popular culture. Cross-listed with MCS 023.

AHS 021 Introduction to Architecture and Urbanism (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. An introduction to the built environment including buildings, gardens, and cities, examined in terms of historical, cultural, social, technological, and political factors. Emphasis is on examples from Southern California. Cross-listed with URST 021. **Morton**

AHS 023 Introduction to American Art (4) Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours. Surveys the art and visual culture of North America (primarily in the United States) from the first European contact to the present. Emphasizes visual representation as means for cultural encounter; the construction of race, class and gender; and the relationship between art, nation, and identity.

AHS 027 Art of Pre-Columbian America (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): none. A survey course that provides a background to the ancient art of Mexico, Central America, and the Andean region of western South America. Discusses art of pre-Columbian America according to the three broad cultural regions of Mesoamerica, the lower part of central and northwestern South America, and the Andean area. Cross-listed with ANTH 027 and LNST 027. **Taube**

AHS 028 Art and Architecture of Latin America (4) Lecture, 3 hours; discussion, 1 hour; individual study, 2 hours. Introduces Latin American art and architecture from the European conquest to the present. Topics include religious and secular art and architecture; hybridization of indigenous and imported styles; national styles after independence; Mexican murals; women artists; Latin American modernismo; and Chicano and Border art. Cross-listed with LNST 028.

AHS 030 Rome: The Ancient City (4) Lecture, 3 hours; extra reading, 3 hours. Traces the development of the city of ancient Rome. By studying the literary and historical evidence alongside the physical remains

of the city—its monuments, art, and historical and archaeological remains—this course seeks to introduce students to the Romans and to their importance for later ages. Cross-listed with CLA 017 and HIST 027.

Upper-Division Courses

AHS 102 Anthropology of Art (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Anthropological approaches to the study of art in traditional non-Western societies. Through specific readings and case studies from four geographic regions (North America, Southeast Asia, Oceania, and West Africa), the dynamic role of art in traditional societies is illustrated. Cross-listed with ANTH 102. **Taube**

AHS 112 The Art of the Aztec Empire (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): AHS 027/ANTH 027/LNST 027 or upper-division standing or consent of instructor. An introduction to the art of the Aztec Empire. Studies architecture, sculpture, ceramics, painting, lapidary work, gold work, and feather work. Explores the relationship between art and ritual and art and the imperial state. Cross-listed with ANTH 151 and LNST 112.

AHS 113 Sixteenth-Century Mexico: An Art of Two Worlds (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Explores the art of the first colonial century in Mexico. Investigates the translation of European art forms to the New World, the fate of indigenous traditions, and artistic change in the context of colonialism and evangelization.

AHS 115 Modern and Contemporary Art of Latin America (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. A study of Latin American art from circa 1900 to the present. Considers national and regional histories and artistic trajectories beginning with the advent of an artistic avant-garde. Investigates the relationships between European and Latin American developments. Cross-listed with LNST 115.

AHS 116 Architecture and Arts of the Andes (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. An introduction to architecture, urbanism, and related material culture of the Andes from ancient times to the present. Focuses on the diverse and rich architectural heritage of an important building center in the Americas. Addresses architecture's relationship to artistic and material production such as painting, pottery, sculpture, city planning, and textiles. Cross-listed with LNST 116.

AHS 117 Visual Culture of the Incas (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to the art, architecture, and urban form of the Inca civilization. Examines how these elements influenced state formation, conquest, and resistance. Includes studies of urban plans, buildings, paintings, textiles, prints, sculpture, metalwork, and ceramics. Cross-listed with ANTH 157 and LNST 117.

AHS 120 Berlin Metropolis in Literature, Film, Music, and Art (4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to the metropolis Berlin as a gateway between the East and West. Explores topography of the city through film, art, music, and literary texts. Considers Berlin's dramatic transformations as a microcosm of Germany and Europe's troubled history in the twentieth century. Course conducted in English. Cross-listed with CPLT 111, EUR 120, GER 111, and MCS 178.

AHS 134 Art and Society: Patrons and Museums (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores how patrons and museums have

influenced the production and reception of art. Topics include patronage, collecting, and audience for art in Renaissance Italy; modern American megapartners, such as the Gettys and Rockefellers; and multimedia museum programs used to educate a wider public in the visual arts. Cross-listed with HISE 134.

AHS 135 Postmedia Art (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Covers heterogeneous movements, theories, and practices from the 1960s to the present that have collectively challenged the doctrine of medium specificity. Topics may include dematerialization, conceptual and post-conceptual art, performance and body art, earthworks, process art, and experimental sound and radio.

AHS 136 History of Video Art (4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Traces the evolution of video art from the invention of the Portapak and early video collectives to the current ubiquity of video installation, single-channel, and multimedia art. Emphasizes video art in the United States. Cross-listed with MCS 137.

AHS 137 History of Experimental Cinema (4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. A survey of cinema outside of the economic, institutional, and aesthetic imperatives of mainstream film production. Covers an array of alternative film movements including surrealism and dada, Soviet avant-garde, the Cine 16 Group, French new wave, North American avant-garde, and the artist's film. Cross-listed with MCS 138.

AHS 138 Arts of China (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A survey of Chinese art and culture from the prehistoric to the contemporary. Cross-listed with AST 138.

AHS 139 The Arts of Buddhism (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores the history, concepts, and arts of Buddhism. Emphasizes the transmission and cultural translation of pictorial arts within Asia and to Western worlds. Cross-listed with AST 139.

AHS 143 Text and Image in Chinese Painting (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Examines the art of writing and painting in China, focusing on the close relationship between written language and pictorial image. Reading knowledge of the Chinese language is not necessary. Cross-listed with AST 143.

AHS 144 Japanese Painting (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Major developments in the arts of Japan from the prehistoric to the contemporary period. Emphasizes the social and cultural contexts of religious art, architecture, and master artists through history, with a brief introduction to contemporary art and pop culture. Cross-listed with AST 144.

AHS 145 Contemporary Asian Art (4) Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing in Art History/Administrative Studies (AHAT), or Art History/Religious Studies (AHR), or Art History (AHS), or Asian Studies (AST); or consent of instructor. Explores the wide spectrum of contemporary arts from China, Korea, and Japan in terms of modernism, orientalism/occidentalism, identity politics, and globalization. Cross-listed with AST 146.

AHS 146 The Japanese House (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. History of the traditional Japanese house from prehistoric times to the nineteenth century. Examples used

to place the Japanese house within the general history of Japanese architecture and within its social and cultural context. Cross-listed with AST 147.

AHS 147 The Art of Greece (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Explores the architecture, sculpture, painting, and minor arts of ancient Greece from the earliest Archaic Period through the Hellenistic Age. **Rudolph**

AHS 148 The Art of Rome (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Covers the architecture, sculpture, painting, and minor arts of ancient Rome from the Republic through the Age of Constantine. Considers the problems of the relationship between Hellenistic art and the art of Rome.

AHS 155 Cultures in Conflict: Art at the Fall of the Roman Empire (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Covers architecture, mosaic, wall painting, manuscript illumination, and sculpture from the origins of Christianity to the final dissolution of the Roman Empire. Stresses the role of art in the co-optation of the Church by the Empire and then in the aftermath of its fall.

AHS 156 Memory of Empire: the Art of Early Medieval Europe (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Covers manuscript illumination, barbarian jewelry, architecture, and sculpture from the fall of the Roman Empire and through the Carolingian Empire up to the tenth century. Stresses the interplay between indigenous Germanic and foreign classical traditions.

AHS 157 The Medieval Pilgrimage and the Art of Romanesque France (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Covers architecture, sculpture, and illuminated manuscripts of the eleventh and twelfth centuries. Stresses the role of the pilgrimage and of politics during the period of the revival of monumental architecture and of public sculpture of the Middle Ages.

AHS 159 The Gothic Cathedral in its Urban Context (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Covers architecture, sculpture, and stained glass in the twelfth and thirteenth centuries. Stresses the political origins and social setting of public art during this period of the reestablishment of urban culture with its resultant social tensions.

AHS 160 Renaissance Architecture (4) Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): an art history course or consent of instructor. An introduction to architecture in the period 1400-1600. Explores the major ideas and trends in architecture that took form in this period, including the architects and the ideas that motivated them in their historical context.

AHS 161 Italian Renaissance: Fifteenth- and Sixteenth-Century Florence (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Surveys the painting, sculpture, architecture, and gardens of this period within their historical and cultural context.

AHS 162 Italian Renaissance: Fifteenth- and Sixteenth-Century Rome (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Surveys the painting, sculpture, architecture, and gardens of this period within their historical and cultural context.

AHS 163 Renaissance in Venice: West meets East (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. An introduction to the art and culture of Venice circa 1420-1600. Addresses central

issues of artistic, cultural, and intellectual exchange among Venice, the Eastern Mediterranean, and the North. Discusses major artworks in the fields of painting, sculpture, and architecture.

AHS 164 The Northern Renaissance (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Surveys the paintings of the Netherlands and Germany within their religious, historical, and cultural context.

AHS 165 Women Artists in Renaissance Europe, 1400-1600 (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Surveys the lives and work of women artists in Renaissance Europe. Considers circumstances under which it was possible for women to become artists; how they evolved from practicing in the cloistered convent to participating in the competitive public market place; what they painted; and who their patrons were. Cross-listed with HISE 133 and WMST 170.

AHS 167 Europe in the Early Modern World: Global Artistic Contact and Exchange, 1492-1750 (4) Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores trade, religious conversion, intersecting traditions, and the creation of new traditions. Examines the mechanisms and cultural consequences of change through time.

AHS 168 Politeness and Commerce: British Art and Design, 1660-1820 (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. An introduction to the production and use of images and material culture in Britain between 1660 and 1820. Examines the role of art and design within British culture and public life.

AHS 169 Sculpture and Its Roles in Eighteenth-Century France and Britain (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Examines the production and uses of sculpture within eighteenth-century British and French culture.

AHS 170 Baroque Architecture (4) Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): Art History course or consent of instructor. Examines the development of architecture in Europe and the Americas from 1580 to 1750. Explores the concept of buildings and the city as a form of communication; the spread and reformulation of architectural ideas in new contexts; and the rise of the architectural profession.

AHS 171 The Church, the Court, and the People: Art in Seventeenth-Century Europe (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. A study of the dominant trends and figures of Italian, French, Spanish, Flemish, and Dutch Baroque art. Includes the works of Caravaggio, Bernini, Velazquez, and Rembrandt. Emphasizes the development of illusionistic ceiling decoration, the theoretical basis of Baroque art, and the sacred and political uses of art.

AHS 172 Baroque Rome (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. An in-depth examination of Roman art in the seventeenth century. Studies painting, sculpture, architecture, and urban planning in their political and religious contexts. Emphasizes the ecclesiastical and private patrons who transformed Rome into one of the world's most important cities.

AHS 173 Rococo to Revolution: Art in Eighteenth-Century Europe (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Examines major developments in eighteenth-century painting, sculpture, and interior decoration from the emergence of the Rococo to the dawn of Neoclassicism. Explores the

response of art to new forms of patronage, the erotics of eighteenth-century art, and how art functioned as social and political commentary.

AHS 174 Dutch Art and Culture in the Seventeenth Century (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Examines the artistic production of the Northern Netherlands in the seventeenth century - a period of exploration, invention, and growing wealth, as well as a time of uncertainty and war.

AHS 175 Industry and Alienation: Late Nineteenth-Century American Art (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): an Art History course or upper-division standing or consent of instructor. A study of American art from 1848 to 1900. Focuses on social, political, and artistic issues related to industrialization. Explores themes in visual culture; the construction of an American identity; the role of fine arts in American society; and the tensions of class, gender, race, and ethnicity in American art. **Weems**

AHS 176 Pictorialism to New Media: A History of Twentieth-Century Photography (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. A study of photographic practices from 1900 to the present. Topics include pictorialist "art" photographs (circa 1900), the subsequent refinement of styles and content in modernism, and the expansion of photographic practices into the digital realm. Examines technological, conceptual, aesthetic, economic, and social issues.

AHS 177 American Art: Colonial Period to 1900 (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Explores painting and architecture in the United States from the colonial period to 1900.

AHS 178 The Modern City (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines the modern metropolis from the Industrial Revolution to the present. Explores the history and theory of modern urbanism through case studies of metropolitan areas with a rich urban culture, architecture, and morphologic features. Investigates approaches to the problems of the large urban agglomeration in the context of social, political, and cultural conditions. Cross-listed with URST 178.

AHS 179 Revolution, Reaction, and Revision: American Art between the World Wars (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): an Art History course or upper-division standing or consent of instructor. An in-depth study of American art and visual culture during the early twentieth century, focusing on the period between the two world wars. Traces artistic developments in painting, photography, cinema, and material culture. Explores the issues of race, class, gender, and regional identity as addressed in these media.

AHS 17HA Honors History of Western Art: Prehistoric to Byzantine (4) Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours. Prerequisite(s): admission to the University Honors Program or consent of instructor. Honors course corresponding to AHS 017A. A survey of the visual arts of the ancient Near East and Egypt, the Greek world, and the Roman and Byzantine empires. Topics include the growth of urbanism, art as an expression of religious and political beliefs, and cultural contact as a source of artistic change. Satisfactory (S) or No Credit (NC) grading is not available. Credit is awarded for only one of AHS 017A or AHS 17HA.

AHS 17HB Honors History of Western Art: Medieval to Renaissance (4) Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours. Prerequisite(s): admission to the University Honors Program or consent of instructor. Honors course corresponding to AHS 017B. Surveys of the visual arts of Europe in the Middle Ages and Renaissance. Includes the religious and political functions of art in the reestablishment of high civilization and the increased status of the individual

artist. Satisfactory (S) or No Credit (NC) grading is not available. Credit is awarded for only one of AHS 017B or AHS 17HB.

AHS 17HC Honors History of Western Art: Baroque to Modern (4) Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours. Prerequisite(s): admission to the University Honors Program or consent of instructor. Honors course corresponding to AHS 017C. Surveys of the visual arts of Europe and America from 1600 through the present. Includes the religious and political roles of art, the rise of secular imagery, the increased role of women in the arts, the impact of popular culture and photography, and the other new media in the visual arts. Satisfactory (S) or No Credit (NC) grading is not available. Credit is awarded for only one of AHS 017C or AHS 17HC.

AHS 180 Modern European Art I: Nineteenth Century (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Surveys painting and sculpture in Europe from the French Revolution to the Franco-Prussian War. Introduces the ideas and concepts of modern European art. Traces artistic developments from Neoclassicism to the emergence of Impressionism in a broad cultural, social, and political context.

AHS 181 Modern Art II: Art in Europe, 1870-1945 (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Traces the history of the modern movement from Impressionism to the end of World War II. Focuses on the arts in their interrelationships to the political events and social conditions of the period. Emphasizes the persecution of modernism in Europe under fascism and communism.

AHS 182 Visual Art and Visual Theory after 1945 (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Examines visual art since 1945 primarily from Europe and the United States. Traces developments in all media within a historical and theoretical context. Focuses on the rise of postmodernism, analyzing work in relation to theories of representation and cultural identity.

AHS 183 Photography on Display (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Covers various topics related to current exhibitions at the California Museum of Photography. Provides the necessary historical and theoretical background of the specific photographs on display. Addresses the wider museum context of the difference between working photographs, art photographs, and the politics of that designation. Course is repeatable as topics change to a maximum of 12 units.

AHS 184 Modern Architecture (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Explores modern architecture and its sources from 1800 to the present. Cross-listed with URST 184. **Morton**

AHS 185 Architectural Theory from Vitruvius to Venturi (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. History of architectural thought from Vitruvius to the present, emphasizing the modern period. Surveys the major themes of architectural theory and investigates the relationships between ideas about architecture and architectural production. Cross-listed with URST 185. **Morton**

AHS 186 Media and Movements: Film, Video, Photography, and the Visual Arts (4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Focuses on key cultural movements or developments in Europe and the United States over the past century. Provides a thematic history of the avant-grade and experimental arts including painting, sculpture, photography, video, film, performance, installation, and new media art. Cross-listed with MCS 186.

AHS 187 Visual Culture and Art History (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Examines the broader concept of visual culture as it relates to the history of the visual arts. Focuses on visibility, identity, media culture, politics, and ethics.

AHS 188 Nineteenth-Century Photography (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Examines the development of photography in the nineteenth century. Addresses the technologies, artistic practices, and social uses of this medium. Focuses on European and American materials, as well as traces the histories of portrait, landscape, scientific, and documentary photography.

AHS 189 (E-Z) Topics in Contemporary Art (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Addresses selected issues, movements, and artists of importance to international art history since the 1960s. E. Art since Conceptual Art. Each segment is repeatable as its topics change to a maximum of 12 units.

AHS 190 Special Studies (1-5) To be taken with the consent of the chair of the department as a means of meeting special curricular problems. Course is repeatable to a maximum of 12 units.

AHS 191 California Modern Art (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): an Art History course or upper division standing or consent of instructor. Explores California visual expression from 1900 to 1980. Provides critical attention to the development of a purportedly unique California art and culture. Focuses on Southern California topics in order to take advantage of local and regional museums, collections, lectures, and events.

AHS 192 Junior and Senior Seminar in Art History (4) Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing in Art History or Art History Administrative Studies. Critical study of selected topics in the history of art and its methods. Topics vary. Course is repeatable to a maximum of 12 units.

AHS 195H Senior Honors Thesis (1-4) Thesis, 3-12 hours. Prerequisite(s): admission to the University Honors Program or consent of the Art History Department. Independent research and preparation of a senior honors thesis completed under the supervision of a faculty member. Satisfactory (S) or No Credit (NC) grading is not available. Course is repeatable to a maximum of 8 units.

AHS 198-I Individual Internship (1-12) research, variable. Prerequisite(s): consent of instructor and upper-division standing. Individual study or apprenticeship in a museum, art library, or slide and photo archive in order to gain practical experience and skills for future professional work. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 16 units.

Graduate Courses

AHS 251A Proseminar in Historiography (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An introduction to the history of the discipline of art history. Covers historiographic traditions from antiquity to the present.

AHS 251B Proseminar in Methodology (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An introduction to the history and methodologies of art history. Covers the models and approaches of different periods from Vasari to the present.

AHS 252 History and Ideology of the Museum (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Ex-

plores the history of collecting and the evolution of the museum as a cultural institution in the western world. Includes an investigation of sources, documents, and historiography complemented by a study of museums and collections in the Los Angeles area.

AHS 260 Seminar in Latin American Art (4) Seminar, 3 hours; outside research, 2 hours; term paper, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Selected topics in the history and theory of Latin American art from the European conquest to the present. Course is repeatable as topics change.

AHS 267 Seminar in Asian Art (4) Seminar, 3 hours; outside research, 3 hours; research paper, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Covers special topics in Asian art. Course is repeatable as topics change.

AHS 272 Seminar in Medieval Art (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Selected issues of the function of art within medieval social, political, theological, and intellectual culture. Course is repeatable as topics change. **Rudolph**

AHS 273 Seminar in Renaissance Art (4) Seminar, 3 hours; outside research, 2 hours; term paper, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Special topics in Italian and/or Northern Renaissance art. Course is repeatable as topics change.

AHS 274 Seminar in Seventeenth- and Eighteenth-Century Art (4) Seminar, 3 hours; outside research, 2 hours; term paper, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Special topics in seventeenth- and eighteenth-century art. Course is repeatable as topics change. **Neville**

AHS 276 Seminar in Nineteenth-Century Art (4) Seminar, 3 hours; outside research, 2 hours; term paper, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Selected topics in the history and theory of nineteenth-century European and/or American art. Course is repeatable as topics change.

AHS 277 Seminar in Twentieth-Century Art (4) Seminar, 3 hours; outside research, 2 hours; term paper, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Selected topics in the history and theory of twentieth-century European and/or American art. Course is repeatable as topics change.

AHS 278 Seminar in Modern Architecture (4) Seminar, 3 hours; outside research, 3 hours; research paper, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Selected topics in the history and theory of nineteenth- and twentieth-century architecture and urbanism. Course is repeatable as topics change.

Morton

AHS 279 Seminar in American Art (4) Seminar, 3 hours; outside research, 3 hours; research paper, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Selected topics in the history and theory of American art, photography, and visual/material culture from the colonial period to the present. Course is repeatable as topics change.

AHS 280 Seminar in Research, Critical Analysis, and Thesis Writing (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Covers advanced research that helps in conceptualizing a thesis topic, organizing and structuring material, and writing one chapter of the thesis. Examines research in different fields of the history of art. Explores scholarly issues from a diversity of specializations. Also provides strategic professional advice for career development. Course is repeatable as topics change.

AHS 282 Seminar in New Media (4) Seminar, 3 hours; outside research, 3 hours; term paper, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Selected topics in the history and theory of photography, film, video, and digital media. Course is repeatable as topics change.

AHS 283 Seminar in History of Photography (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Selected topics in the history of photography, with an emphasis on new theories and histories of photographic practice. Students encouraged to do research projects drawing on the collections of the UCR/California Museum of Photography. Course is repeatable as topics change. **Kotz**

AHS 284 Seminar in Contemporary Art and Theory (4) Seminar, 3 hours; individual study, 3 hours; research paper, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Studies of selected topics in contemporary art, photography, and related media, with an emphasis on critical theories of representation and issues of practice. Course is repeatable as topics change.

AHS 285 Getty Consortium Seminar (4) F, W, S Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An intramural seminar at the Getty Research Institute. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as topics change.

AHS 290 Directed Studies (1-6) research, variable. Prerequisite(s): consent of instructor. Independent work under a staff member's supervision in a particular field. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

AHS 292 Concurrent Analytical Studies (1-4) Outside research, 3-12 hours. Prerequisite(s): graduate standing and consent of instructor. To be taken concurrently with a 100-series course, but on an individual basis. It will be devoted to research, criticism, and written work of graduate order commensurate with the number of units elected. Graded Satisfactory (S) or No Credit (NC). May be repeated for credit.

AHS 297 Directed Research (1-6) research, variable. Prerequisite(s): consent of instructor, completion of language requirement and one seminar. Research study or exploratory work toward the development of the thesis. Graded Satisfactory (S) or No Credit (NC).

AHS 298-I Individual Internship (1-4) research, variable. Individual study or apprenticeship in a museum, art library, or slide and photo archive in order to gain practical experience and skills for future professional work. Graded Satisfactory (S) or No Credit (NC). Repeatable to a total of 12 units. Not more than 8 units count toward the 40 units required for the M.A.

AHS 299 Research for Thesis (1-12) variable hours. Prerequisite(s): consent of instructor, completion of language requirement and one seminar. Thesis research and writing. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Courses

AHS 301 Directed Studies in the Teaching of the History of Art (3) Seminar, 2 hours; consultation, 1 hour. Prerequisite(s): graduate standing. A program of weekly meetings and individual formative evaluation required of new Art History Teaching Assistants. Covers instructional methods and classroom/section activities. Conducted by the Teaching Assistant Development Program and department faculty. Credit is not applicable toward degree unit requirements. Graded Satisfactory (S) or No Credit (NC).

AHS 302 Teaching Practicum (1-4) Lecture, 1-4 hours; clinic, 1 hour. Prerequisite(s): limited to departmental teaching assistants; graduate standing. Supervised teaching in upper- and lower-division Art History courses. Required of all Art History teaching assistants. Credit not applicable toward degree unit requirements. Graded Satisfactory (S) or No Credit (NC). May be repeated for credit.

Dean, College of Humanities, Arts, and Social Sciences, ex officio

Major

The Asian Studies major affords students the opportunity to study Asia from an interdisciplinary perspective, drawing on courses and faculty from various departments of the College of Humanities, Arts, and Social Sciences. Students are strongly encouraged to consider participating in the Education Abroad Program offered through the UC in various Asian locales, including China, Taiwan, Hong Kong, Japan, Vietnam, Singapore, the Philippines, India, and Korea. Students may also participate in the undergraduate intercampus exchange program, which allows any UC student to apply for study for one term at other UC campuses. Both options provide rich opportunities to participate in additional course work on Asia that may be counted toward the major.

University Requirements

See Undergraduate Studies section.

College Requirements

See College of Humanities, Arts, and Social Sciences, Colleges and Programs section.

Major Requirements

The requirements for the B.A. degree in Asian Studies are as follows:

East Asian Studies Option

Students can focus on any aspect of Asia and/or Asian America, and are strongly encouraged to select a disciplinary focus in Anthropology, Art History, History, Comparative Literature and Foreign Languages, Ethnic Studies, Music and Culture, Media and Cultural Studies, or Religious Studies. Students may choose to focus on the historical interactions and cultural similarities and differences among East, Northeast, South, Southeast, West, and Central Asia peoples, including those constituting transnational and/or diaspora communities throughout the world. Students interested in Asian diaspora communities are also encouraged to consider a secondary disciplinary focus in Ethnic Studies, leading to a minor in Asian American Studies.

Students planning graduate work in Asian Studies are encouraged to write a senior thesis during the first or second quarter of their senior year. (This is a substantial paper based on original research; ideally, primary documents are consulted in the course of conducting the research.)

1. Lower-division requirements (12 units plus language requirement)
 - a) Two years of basic language instruction in any Asian language (This requirement may be filled by language courses currently offered at UCR or through approved summer language programs. In some cases, the second year requirement may be waived with the approval of the Asian Studies Committee in Charge)
 - b) At least 12 units from the following: AHS 015, AST 018/AHS 018, AST 022/MCS 022/JPN 022, AST 023/JPN 023/CPLT 023, AST 030/CHN 030, AST 032/JPN 032, AST 034/JPN 034, JPN 035, AST 040/CHN 040, AST 045 (E-Z)/HIST 045 (E-Z), AST 046/CHN 046, AST 047/KOR 047, AST 056/KOR 056, AST 062/CPLT 062, AST 063/CPLT 063, AST 064/MCS 049/VNM 064, AST 065, AST 090, CPLT 029, ETST 005, ETST 005H, HASS 021A, HASS 021B, HASS 021C, HIST 030, HIST 044/RLST 044, JPN 035, RLST 005, RLST 005H

2. Upper-division requirements (36 units)

Students are required to enroll in a minimum of one course each from three of the following areas of emphasis.

- a) Asian America: AST 124/MUS 124, ENGL 139, ENGL 139T, ETST 106, ETST 110 (E-Z), ETST 133, ETST 136, ETST 137, ETST 138, ETST 139, ETST 140, ETST 143A, ETST 143B, ETST 144, ETST 150, MUS 124, SOC 136
- b) China: AST 107/CHN 107/RLST 107, AST 140/AHS 140, AST 141/AHS 141, AST 142/CHN 142/RLST 142, AST 143/AHS 143, AST 135/

CHN 135, AST 136/CHN 136, AST 148/CHN 148, AST 185/CHN 185/MCS 169, CHN 105, CHN 108, CHN 110 (E-Z), CHN 115 (E-Z), CHN 190, HIST 180, HIST 181, HIST 182, HIST 191W, MCS 156 (E-Z), MCS 172, RLST 103

- c) Japan/Korea: KOR 110 (E-Z), AST 112/KOR 112, ETST 136, AST 144/AHS 144, JPN 145/CPLT 145, AST 147/AHS 146, AST 150/JPN 150, AST 151/JPN 151, AST 152 (E-Z)/JPN 152 (E-Z), AST 153 (E-Z)/JPN 153 (E-Z), AST 154 (E-Z)/JPN 154 (E-Z), AST 169/MUS 169 (4 units maximum), AST 184/MCS 184/JPN 184, CPLT 142 (E-Z)/WMST 142 (E-Z), JPN 150, JPN 190, RLST 105
- d) Southeast Asia: ANTH 140-I, AST 127/ANTH 176/DNCE 127/ETST 127/MUS 127, AST 162/HIST 187/VNM 162, AST 163/CPLT 163, AST 165 (E-Z)/VNM 165 (E-Z)/WMST 165 (E-Z), AST 168/MUS 168 (4 units maximum), AST 170/MUS 170 (4 units maximum), MUS 119, MUS 123, MUS 127, RLST 149, RLST 150
- e) Other East, Northeast, South, Southeast, West, or Central Asia: AST 128/MUS 128/DNCE 128/MUS 128/THEA 176, AST 145/CHN 141/CLA 141/CPAC 141, POSC 140, CPLT 144/RLST 144, PHIL 110, POSC 130, RLST 101, RLST 103, RLST 104, RLST 105, RLST 106, RLST 108, RLST 145

Minor

The Asian Studies minor allows students from any discipline to enhance their studies with a focus on Asian peoples and cultures. The minor consists of 28 units.

1. Lower-division requirements: 8 units from the following: AHS 015, AST 018/AHS 018, AST 022/MCS 022/JPN 022, AST 030/CHN 030, AST 034/JPN 034, AST 040/CHN 040, AST 045 (E-Z)/HIST 045 (E-Z), HIST 044/RLST 04, JPN 035, RLST 005, RLST 005H

2. Upper-division requirements: 20 units from the following:

ANTH 140-I

AST 107/CHN 107/RLST 107, AST 124/MUS 124, AST 127/ANTH 176/DNCE 127/ETST 172/MUS 127, AST 128/ANTH 128/DNCE 128/MUS 128/THEA 176, AST 135/CHN 135, AST 136/CHN 136, AST 140/AHS 140, AST 141/AHS 141, AST 142/CHN 142/RLST 142, AST 143/AHS 143, AST 144/AHS 144, AST 147/AHS 146, AST 148/CHN 148, AST 151/JPN 151, AST 152 (E-Z)/JPN 152 (E-Z), AST 153 (E-Z)/JPN 153 (E-Z), AST 154 (E-Z)/JPN 154 (E-Z), AST 162/HIST 187/VNM 162, AST 163/CPLT 163, AST 165 (E-Z)/VNM 165 (E-Z)/WMST 165 (E-Z), AST 168/MUS 168 (no more than 2 units may be applied to the minor), AST 169/MUS 169 (no more than 2 units may be applied to the minor), AST 170/MUS 170 (no more than 2 units may be applied to the minor),

AST 184/MCS 184/JPN 184, AST 185/CHN 185/MCS 169, AST 190 (no more than 4 units may be applied to the minor) CHN 101A, CHN 101B, CHN 101C, CHN 104, CHN 105, CHN 108, CHN 110 (E-Z), CHN 115 (E-Z), CHN 190 CPLT 141, CPLT 143, CPLT 142 (E-Z)/WMST 142 (E-Z), CPLT 144/RLST 144, ECON 179, ENGL 139, ENGL 139T, ETST 133, ETST 137, ETST 138, ETST 140, ETST 143A, ETST 144, ETST 150, HIST 180, HIST 181, HIST 182, HIST 191W, JPN 101A, JPN 101B, JPN 101C, JPN 150, JPN 190, PHIL 110, POSC 130, RLST 101, RLST 103, RLST 105, RLST 106, RLST 108

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Lower-Division Courses

AST 022 Introduction to Japanese Film (4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. An introduction to Japan's major directors and to watching and writing about Japanese film. Works studied range from the samurai epics of Kurosawa to recent anime. All films have subtitles. No previous knowledge of Japanese language or culture is required. Cross-listed with JPN 022 and MCS 022.

AST 023 Modern Japan and Personal Narrative (4) Lecture, 3 hours; extra reading, 1.5 hours; written work, 1.5 hours. Introduces major debates in history, politics, and culture through the genres of biography, autobiography, diary, and confession. Explores the parallel construction of the modern nation, the modern language, and the modern self. Traces the development of Japan's "I-novel." Builds skills in close reading by studying the rhetoric of self-narrative. Cross-listed with CPLT 023 and JPN 023.

AST 030 Introduction to Chinese Civilization (5) Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): none. An introduction to Chinese civilization through an interplay of philosophical, historical, religious, and literary readings from the ancient times through the modern age. Uses audiovisual media. All work is in English. Cross-listed with CHN 030.

AST 034 Introduction to Classical Japanese Literature (4) Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): none. A survey of some of the more famous works of premodern Japanese literature from 10th century poetry collections to 18th century puppet plays. Focuses on the relationship among aesthetics, politics, language, and gender. Assignments include manga translations, creative writing, and intensive Web research. Cross-listed with JPN 034.

AST 040 Masterworks of Chinese Literature (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): none. Reading and discussion of selected great works of Chinese literature (in English translation) with attention to cultural contexts. Various critical methods and approaches are used. Cross-listed with CHN 040.

AST 045 (E-Z) Topics in Asian History (4) Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): none. An introduction to regional histories and cultures of Asia. E. Premodern China and Japan; F. Contemporary China; G. India in the Western Imagination. Cross-listed with HIST 045 (E-Z).

AST 046 Responses to Political Repression in Modern Chinese Literature and Film (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): none. An examination of the various responses to political repression in China during the second half of the twentieth century through selected literary and artistic representations.

Cross-listed with CHN 046. Credit is awarded for only one of CHN 046/AST 046 or CHN 046W/AST 046W.

AST 046W Responses to Political Repression in Modern Chinese Literature and Film (4) Lecture, 2 hours; discussion, 1 hour; written work, 3 hours. Prerequisite(s): ENGL 001B with a grade of "C" or better or consent of instructor. An examination of the various responses to political repression in China during the second half of the twentieth century through selected literary and artistic representations. Fulfills the third-quarter writing requirement for students who earn a grade of "C" or better for courses that the Academic Senate designates, and that the student's college permits as alternatives to English 001C. Cross-listed with CHN 046W. Credit is awarded for only one of CHN 046/AST 046 or CHN 046W/AST 046W.

AST 047 Introduction to Korean Film (4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. An introduction to the major directors and films of Korea. Covers the genres and periods of works produced from the 1960s to the present. All films have English subtitles. No previous knowledge of Korean language or culture required. Cross-listed with KOR 047 and MCS 047.

AST 048 Chinese Cinema (4) Lecture, 2 hours; discussion, 1 hour; screening, 2 hours; outside research, 1 hour. Prerequisite(s): none. Study of selected films from China and Taiwan with attention to cultural context. Questions addressed may include the following: What do we look for in a film? What are the film's interrelations with theatre, photography, and literature? How do we understand the film as an art form? Cross-listed with CHN 048.

AST 049 Introduction to Southeast Asian History (4) Lecture, 3 hours; extra reading, 3 hours. Introduces major themes and events in Southeast Asian history. Covers from prehistory to contemporary events in the region. Develops basic historical approaches to understanding contemporary trends, such as the spread of world religions, regional differences and connections, trading patterns, cultural forms, and historically important sites. Cross-listed with HIST 046 and SEAS 047.

AST 056 Cultures of the Japanese Empire (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Covers the social histories and literatures of the Japanese Empire from the foundation of the Meiji state to the present. Includes the Ainu, Okinawan, Taiwanese, and Korean cultures. Explores the concepts of assimilation, citizenship, national language, nation-state, sovereignty, total war, and translation. Utilizes readings in English. Cross-listed with CPLT 056 and JPN 056.

AST 062 Introduction to Southeast Asian Literature (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): none. An introduction to modern and contemporary Southeast Asian literature and culture with a focus on individual national histories. Explores the relationship between aesthetics, politics, and academic scholarship. Readings are in translation; classes conducted in English. Cross-listed with CPLT 062 and SEAS 062.

AST 063 Reading Southeast Asian Stories (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): none. An introduction to the modern short story in Southeast Asia with a focus on literariness and the act of reading. Readings are in translation; classes conducted in English. Course is repeatable as content changes to a maximum of 8 units. Cross-listed with CPLT 063 and SEAS 063.

AST 064 Introduction to Vietnamese and Diasporic Film Culture (4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. Engages in critical viewing strategies and analytical visual critique. Explores the revival of film production in Vietnam following the Vietnam War, with a focus on the means of production, state control, and international distribution. Readings are in translation; classes conducted in English. Cross-listed with MCS 049, SEAS 064, and VNM 064.

AST 065 Introduction to Southeast Asian Cultures (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): none. An introduction to the world of Southeast Asia with an emphasis on aspects of local cultures. Cross-listed with SEAS 065.

AST 090 Special Studies (1-5) Individual study, 3-15 hours. To be taken with the consent of the Chair of the Program as a means of meeting special curricular problems. Course is repeatable.

Upper-Division Courses

AST 107 Taoist Traditions (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): AST 030/CHN 030 or upper-division standing or consent of instructor. A survey of the ancient mystical and philosophical aspects of Taoism as well as the living religious tradition, their relationships to each other, and their expression in Chinese culture and civilization. Topics include the Tao Te Ching, the *Chuang-tzu*, the Taoist canon, meditation, immortality, alchemy, and ritual. Cross-listed with CHN 107 and RLST 107.

AST 112 Modern Korean Literature (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A study of modern Korean literature from the colonial era to the present. Topics include colonialism; cultural influence and exchange; gender, family and sexuality; nation and nationalism; Confucian tradition and patriarchal culture; and modernization and capitalism. Cross-listed with KOR 112.

AST 118 (E-Z) Masterworks of Chinese Literature in Translation (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines canonical Chinese works of literature in translation. Conducted in English. E. The Ancient Times Through the Early Imperial Dynasties. Cross-listed with CHN 118 (E-Z).

AST 119 Javanese Music and Culture (4) Lecture, 3 hours; term paper, 1 hour; online discussion and listening, 2 hours per week. Prerequisite(s): upper-division standing or consent of instructor. Examines Javanese traditional and contemporary music. Focuses on the music of the Javanese gamelan and its relation to larger cosmological themes. Other topics include rural versus court traditions, popular music, mass media, piracy, Hindu roots, modernity, and local practices versus global trends. Cross-listed with MUS 119.

AST 123 Southeast Asian Performance (4) Lecture, 3 hours; screening, 2 hours; extra reading, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Introduction to the roles and genres of expressive culture in Southeast Asia, including dance, music, theater, film, and digital culture. Performance is discussed both as a time-honored and as a contemporary medium for cultural production, from the courts to everyday experience. Material will be drawn from the Philippines, Malaysia, Indonesia, Thailand, Laos, Cambodia, Vietnam, Burma, Singapore, and the Southeast Asian diaspora. Cross-listed with ANTH 126, DNCE 123, and MUS 123.

AST 124 Music of Asian America (4) Lecture, 3 hours; music listening, 1 hour; individual study, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores music as a window on the cultural politics of Asian America. Examines expressive culture as a constitutive site for ethnic identities and emergent political formations. Covers musics of Asian immigrants and of subsequent generations, including Asian American jazz and hip-hop. Cross-listed with MUS 124.

AST 126 Southeast Asia, Prehistory to 1800 (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Covers the major Southeast Asian historical periods and cultures. Includes prehistory, classical kingdoms, and early modern trading states. Considers the role of ancient stories, religious systems, technologies,

and art forms in forming traditional Southeast Asian identities, as well as the influences on these identities from outside the region. Cross-listed with HIST 185 and SEAS 185.

AST 127 Music Cultures of Southeast Asia (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A survey of music, dance, theatre, and ritual in the Philippines, Indonesia, Malaysia, Thailand, Myanmar (Burma), Laos, Cambodia, and Vietnam. Designed for the student interested in the performing arts and cultures of mainland and insular Southeast Asia. No Western music background is required. Cross-listed with ANTH 176, DNCE 127, ETST 172, and MUS 127.

AST 128 Performing Arts of Asia (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A survey of music, dance, theatre, and ritual in four major geocultural regions of Asia: Central, East, South and Southeast. No Western music training is required. Course is repeatable to a maximum of 8 units. Cross-listed with ANTH 128, DNCE 128, MUS 128, and THEA 176.

AST 129 Modern Southeast Asia, 1800 to Present (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores the formation of modern Southeast Asian nations and cultures since 1800. Compares colonial and postcolonial experiences in the region. Studies the formation of nationalist movements and the relationship of nationalist history with traditional and local histories. Considers the role of the individual, modern media, and global trade in the near-present. Cross-listed with HIST 186 and SEAS 186.

AST 132 Medical Traditions in China and Greece (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Comparative examination of the early development of Western medical traditions in classical Greece and the origins and development of the Chinese medical systems now referred to as traditional Chinese medicine, with specific attention to their cultural and social contexts. Cross-listed with CHN 132, CLA 132, and CPAC 132.

AST 133 Buddhist Literature (4) Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Readings in canonical and non-canonical Buddhist texts. Includes Buddhist-influenced literature written by Asian, European, and American authors. Examines themes of emptiness, impermanence, and no-self. Cross-listed with CPLT 144 and RLST 144.

AST 135 Great Novels of China (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines the social, philosophical, and aesthetic features in major Ming-Qing novels through critical reading and analysis of literature in translation. No knowledge of Chinese required. Cross-listed with CHN 135.

AST 136 Family and Gender in the Chinese Short Story (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines a broad array of short stories from the Tang to the Qing dynasties (approximately ninth to eighteenth century). Investigates love, marriage, family, gender dynamics, and the representation of women in Chinese literature. No knowledge of Chinese required. Cross-listed with CHN 136.

AST 138 Arts of China (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A survey of Chinese art and culture from the prehistoric to the contemporary. Cross-listed with AHS 138.

AST 139 The Arts of Buddhism (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores the history, concepts, and arts of Buddhism. Emphasizes

the transmission and cultural translation of pictorial arts within Asia and to Western worlds. Cross-listed with AHS 139.

AST 142 Chuang-tzu (4) Lecture, 3 hours; outside research, 1 hour; extra reading, 1 hour; term paper, 1 hour. Prerequisite(s): RLST 005 or RLST 005H or AST 107/CHN 107/RLST 107 or consent of instructor. An examination of chaos, epistemological, and linguistic relativism, fate, skill, and the character of the sage in the Chinese Taoist text *Chuang-tzu*. Discusses the structure and style of this literary masterpiece. Students with knowledge of classical Chinese may arrange additional work through special studies. Cross-listed with CHN 142 and RLST 142.

AST 143 Text and Image in Chinese Painting (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Examines the art of writing and painting in China, focusing on the close relationship between written language and pictorial image. Reading knowledge of the Chinese language is not necessary. Cross-listed with AHS 143.

AST 144 Japanese Painting (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. Major developments in the arts of Japan from the prehistoric to the contemporary period. Emphasizes the social and cultural contexts of religious art, architecture, and master artists through history, with a brief introduction to contemporary art and pop culture. Cross-listed with AHS 144.

AST 145 Militarism and Hegemony in the Ancient World (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Comparative study of ancient warfare and hegemony in two or more civilizations of the ancient world. Perspectives may include social and political contexts, gender and war, acquisition of empire, religious wars, and weapons, strategies and tactics in theory and practice. Study of primary source material in texts and visual arts. Cross-listed with CHN 141, CLA 141, CPAC 141, and POSC 140.

AST 146 Contemporary Asian Art (4) Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing in Art History/Administrative Studies (AHAT), or Art History/Religious Studies (AHRs), or Art History (AHS), or Asian Studies (AST); or consent of instructor. Explores the wide spectrum of contemporary arts from China, Korea, and Japan in terms of modernism, orientalism/occidentalism, identity politics, and globalization. Cross-listed with AHS 145.

AST 147 The Japanese House (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): sophomore, junior, or senior standing; or consent of instructor. History of the traditional Japanese house from prehistoric times to the nineteenth century. Examples used to place the Japanese house within the general history of Japanese architecture and within its social and cultural context. Cross-listed with AHS 146.

AST 148 Chinese Poetry and Poetics in Translation (4) Lecture, 2 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examination of traditional Chinese poetry through the study of selected major texts, emphasizing forms, themes, and Chinese poetics in its close relation to the development of Chinese literature. Classes are conducted in English. Cross-listed with CHN 148.

AST 150 In Women's Hands: Reading Japanese Women Writers (4) Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines major works of Japanese women writers from Heian (ninth century) to contemporary, focusing on themes, genres, representations of gender, ideas of love and romance, and feminine aesthetics. Readings include fiction, poetry, essays,

and drama, with the main emphasis on fictional writing. Classes are conducted in English. Cross-listed with JPN 150.

AST 152 (E-Z) Themes in Modern Japanese Literature (4) Lecture, 2 hours; discussion, 1 hour; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to modern Japanese literature in translation, as seen through the lens of a particular theme or issue. All materials read or viewed in English. E. The End of the World in Japanese Literature; F. The Mask in Japanese Fiction; G. Love and Death; J. Classics and Canon; K. Dreams and Other Virtual Worlds. Cross-listed with JPN 152 (E-Z).

AST 153 (E-Z) Themes in Early Japanese Literature (4) Lecture, 2 hours; discussion, 1 hour; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to early Japanese literature, as seen through the lens of a particular theme or issue. All works are read in English translation. E. Supernatural Japan; F. Warrior Japan; G. The Culture of the Floating World: Tokugawa Period Literature, Drama, and Art. Cross-listed with JPN 153 (E-Z).

AST 154 (E-Z) Themes in the Folklore and Popular Culture of Japan (4) Lecture, 2 hours; discussion, 1 hour; extra reading, 1 hour; written work, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. Topics include myth, legend, folktale, folk performance, festival, ritual, and the development of popular or commercial culture. Considers literary versus oral tradition, ethnic identity, authenticity, nationalism, modernity, commodification, and the invention of tradition. E. Ancient Myth to Contemporary Legend: A Study of Japanese Folk Narrative; F. History of Japanese Popular Culture. Cross-listed with JPN 154 (E-Z).

AST 160 The Vietnam Wars (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to Vietnamese history in the twentieth century. Covers the three Indochina wars (1945-1986) from different Vietnamese perspectives. Topics include experiences during French colonial rule; the anticolonial movements; periods of French and American military involvement up to 1975; the postwar society; and the post-*doi moi* society. Cross-listed with HIST 184, SEAS 184, and VNM 184. Credit is awarded for only one of the following: AST 160/HIST 184/SEAS 184/VNM 184 or AST 160S/HIST 184S/SEAS 184S/VNM 184S.

AST 160S The Vietnam Wars (5) Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to Vietnamese history in the twentieth century. Covers the three Indochina wars (1945-1986) from different Vietnamese perspectives. Topics include experiences during French colonial rule; the anticolonial movements; periods of French and American military involvement up to 1975; the postwar society; and the post-*doi moi* society. Cross-listed with HIST 184S, SEAS 184S, and VNM 184S. Credit is awarded for only one of the following: AST 160/HIST 184/SEAS 184/VNM 184 or AST 160S/HIST 184S/SEAS 184S/VNM 184S.

AST 161 Translating Modern Southeast Asian Texts (4) Lecture, 3 hours; term paper, 1.5 hours; written work, 1.5 hours. Prerequisite(s): upper-division standing; knowledge of one Southeast Asian language is recommended. An introduction to translating modern Southeast Asian texts into English. Presents translations of texts from Vietnam, Indonesia, and the Philippines in a context of theory. Materials are in English. Course is repeatable as content changes to a maximum of 8 units. Cross-listed with SEAS 161.

AST 162 Vietnamese Literary History (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing. A historical analysis of Vietnamese literature from its oral tradition to contemporary fiction. Follows the formation of the nation-state

and the subsequent struggles with the Chinese, French, Japanese, and Americans. No knowledge of Vietnamese required. Readings are in translation or bilingual editions. Classes are conducted in English. Cross-listed with HIST 187, SEAS 162, and VNM 162.

AST 163 Nationalism and the Novel (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to the novel and its role within nationalism as a representative summary or mirror of the nation. Cross-listed with CPLT 163 and SEAS 163.

AST 164 Vietnamese American Culture (4) Lecture, 3 hours; written work, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A study of the pervasive aspects of Vietnamese American culture. Includes shared histories, acculturation patterns, class diversity, identity struggles, community-building literary and cultural production, youth issues, and cultural survival. Also introduces foundational literature, visual culture, and scholarship in the field. Cross-listed with SEAS 164 and VNM 164.

AST 165 (E-Z) Themes in Vietnamese Literature (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An exploration of Vietnamese literature in translation as seen through the lens of a particular theme or issue. Focuses on the implications of gender and sexuality on nation formation. All materials are read or viewed in English. E. Women and War. Cross-listed with SEAS 165 (E-Z), VNM 165 (E-Z), and WMST 165 (E-Z).

AST 166 Vietnam and the Philippines (4) Lecture, 3 hours; written work, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to the comparative national histories of Vietnam and the Philippines by way of great literary works in various genres including poetry, short fiction, and novels. All materials are read in English. Cross-listed with CPLT 166, SEAS 166, and VNM 166.

AST 167 Postcolonial Literature and Criticism in Southeast Asia and South Asia (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores how the theoretical concepts of postcolonial criticism inform and challenge the literature of Southeast Asia and South Asia, as the literature itself pushes the limits of the criticism. Addresses themes of nation, identity, space, gender, home, diaspora, alterity, history, sexuality, transnationalism, neocolonialism, tourism, and education. Cross-listed with CPLT 167 and SEAS 167.

AST 168 Javanese Gamelan Ensemble: Beginning (2) Prerequisite(s): upper-division standing and consent of instructor. Study and performance of the Central Javanese gamelan, consisting mainly of gongs and gong-chime instruments. Readings and discussions focus on Javanese culture. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination. Course is repeatable. Cross-listed with MUS 168.

AST 169 Taiko Ensemble (1) Studio, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. Study and performance of Japanese drumming. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination. Course is repeatable. Cross-listed with MUS 169.

AST 170 Rondalla Ensemble (1-2) Studio, 2-4 hours. Prerequisite(s): upper-division standing or consent of instructor. Study and performance of the Filipino rondalla, an ensemble consisting of various sizes of lute-like and guitar-like instruments. Discussions focus on Filipino culture. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination. Course is repeatable. Cross-listed with MUS 170.

AST 180 Japanese Documentary (4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Studies the history of Japanese documentary cinema. Teaches strategies for reading nonfiction visual narrative. Explores other forms of documentation controversial in modern Japanese history including oral testimony, photography, and internet activism. Topics may include war, war protest, peace activism, environmental activism, nuclear politics, and green energy. Course is repeatable as topics and instructor change to a maximum of 8 units. Cross-listed with JPN 180 and MCS 180.

AST 184 Japanese Media and Cultural Studies (4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Investigates Japanese media and culture including film, television, video games, *manga* (comics), *anime*, music, and print and digital media. Analyzes the function of media relating to issues of national identity, imperial culture, collective memory, and censorship. Includes transnational circulation of Japanese cultural forms, alternative media, and historical changes in technologies. Cross-listed with JPN 184 and MCS 184.

AST 185 New Chinese Cinema (4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A study of representative films from the People's Republic of China, with a focus on those made during the last decade. Conducted in English; most films have English subtitles. Cross-listed with CHN 185 and MCS 169.

AST 186 Hong Kong Cinema: Gender, Genre, and the "New Wave" (4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): MCS 020 or upper-division standing or consent of instructor. Examines contemporary Hong Kong films, specifically the "New Wave" genre. Particular focus is on the sociopolitical conditions of Hong Kong and its relations with Great Britain and China, the linkages of which set the stage for the films and thematic concerns. Cross-listed with MCS 168.

AST 187 Vietnamese and Overseas Vietnamese Cinema (4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): MCS 020 or upper-division standing or consent of instructor. Explores how Vietnamese people and the Vietnamese diaspora seek to imagine a sense of community in the postwar era through contemporary film and video. Examines the thematics of return, longing, and exile. Reviews some of the texts' bold expressions of gender, sexuality, and identity. Cross-listed with MCS 167 and SEAS 177.

AST 188 (E-Z) Topics in Chinese History (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing; HIST 180 or HIST 181 or HIST 182; or consent of instructor. An in-depth look at important topics in Chinese history. E. Chinese Food Culture; F. Four Great Inventions of Imperial China; G. Environmental History of China. Cross-listed with HIST 188 (E-Z).

AST 189 Encountering Vietnam (5) Lecture, 6 hours; tutorial, 6 hours; project, 6 hours. Prerequisite(s): upper-division standing or consent of instructor. Focuses on literary and historical accounts of Vietnam. Utilizes translated travel writings from different genres and eras. Proficiency in Vietnamese not required. Taught in Vietnam and offered only in summer. Cross-listed with HIST 189, SEAS 189, and VNM 189.

AST 190 Special Studies (1-5) Individual study, 3-15 hours. Prerequisite(s): upper-division standing or consent of instructor. To be taken with the consent of the Chair of the Program as a means of meeting special curricular problems. Course is repeatable.

AST 195 Capstone Senior Thesis (1-4) Thesis, 3-12 hours. Prerequisite(s): senior standing. Thesis composition under the guidance of Asian Studies faculty. Required for all Asian Studies majors. Course is repeatable to a maximum of 8 units.

Biochemistry

Subject abbreviation: BCH
College of Natural and Agricultural Sciences

Richard J. Debus, Ph.D., Chair
Graduate Program (951) 827-4116
Undergraduate Program (951) 827-1763
biochemistry.ucr.edu

Professors

Thomas O. Baldwin, Ph.D.
Richard J. Debus, Ph.D.
Daniel R. Gallie, Ph.D.
Russ Hille, Ph.D.
Xuan Liu, M.D., Ph.D.
Stephen R. Spindler, Ph.D.

Professors Emeriti

Craig V. Byus, Ph.D. (Biochemistry/Biomedical Sciences)
Michael F. Dunn, Ph.D.
Helen L. Henry, Ph.D.
Darold D. Holten, Ph.D.
Richard A. Luben, Ph.D. (Biochemistry/Biomedical Sciences)
Anthony W. Norman, Ph.D. (Biochemistry/Biomedical Sciences)
Ning G. Pon, Ph.D.
Justin K.M. Roberts, Ph.D.
Jolinda A. Traugh, Ph.D.

Associate Professors

Paul B. Larsen, Ph.D.
Ernest Martinez, Ph.D.

Assistant Professors

Gregor Blaha, Ph.D.
Li Fan, Ph.D.
Noboru Sato, Ph.D.
Jikui Song, Ph.D.

Senior Lecturer

Miriam Ziegler, Ph.D.

**

Cooperating Faculty

Michael E. Adams, Ph.D. (Entomology/Cell Biology and Neuroscience)
Peter Atkinson, Ph.D. (Biomedical Sciences)
Jeffrey Bachant, Ph.D. (Cell Biology & Neurosciences)
Julia Bailey-Serres, Ph.D. (Botany and Plant Sciences)
David Binder, Ph.D. (Biomedical Sciences)
Katherine A. Borkovich, Ph.D. (Plant Pathology and Microbiology)
Richard Cardullo, Ph.D. (Biology)
Kathryn DeFea, Ph.D. (Biomedical Sciences)
Iryna Ethell, Ph.D. (Biomedical Sciences)
Thomas Eulgem, Ph.D. (Botany and Plant Sciences)
Xin Ge, Ph.D. (Chemical Environmental Engineering)
Sarjeet Gill, Ph.D. (Biomedical Sciences)
Hailing Jin, Ph.D. (Plant Pathology and Microbiology)
Edward Korzus, Ph.D. (Psychology)
Cynthia K. Larive, Ph.D. (Chemistry)
Julia Lyubovitsky, Ph.D. (Bioengineering)
Manuela Martins-Green, Ph.D. (Cell Biology & Neurosciences)
Ilhem Messaoudi, Ph.D. (Biomedical Sciences)
Thomas H. Morton, Ph.D. (Chemistry)
Leonard Mueller, Ph.D. (Chemistry)
Eugene Nothnagel, Ph.D. (Biomedical Sciences)
Constance Nugent, Ph.D. (Cell Biology & Neurosciences)
Schiller, Neal, Ph.D. (Biomedical Sciences)
John Shyy, Ph.D. (Biomedical Sciences)
Frances Sladek, Ph.D. (Cell Biology & Neurosciences)
Vullev, Valentine I., Ph.D. (Bioengineering)
Ian Wheelon, Ph.D. (Biomedical Science)
Emma Wilson, Ph.D. (Biomedical Sciences)
Raphael Zidovetzki, Ph.D. (Cell Biology & Neurosciences)

Major

The three emphases areas within the Biochemistry major are Chemistry, Biology, and Medical Sciences. The Biology and Chemistry emphases are for students interested in postgraduate education or employment in the basic areas of the discipline of Biochemistry. The goal of the Medical Sciences emphasis is to prepare students for admission to postbaccalaureate education in the health professions. The Biology, Chemistry, and Medical Sciences emphases focus on the development of laboratory and critical thinking skills, and hands-on laboratory experience. In addition, participation in an independent research project (BCH 197) or research tutorial (BCH 190), carried out under the supervision of a faculty member, is encouraged. Internships in industry (BCH 198-I) are also available, and often lead to valuable job experience and employment opportunities.

The department offers both B.A. and B.S. degrees. The major and emphasis requirements are the same for both, and most students choose the B.S. degree. The B.A. degree requires 12 additional units of Humanities and Social Sciences courses, and 16 units or a course 4 equivalency level of a foreign language (see College Breadth Requirements).

Note A maximum of 12 units of 190-199 courses may be counted toward the 180 unit graduation requirement. All courses used towards the Biochemistry major requirements must be taken for letter grades.

Transfer Students

Transfer students majoring in Biochemistry must complete at least three of the following full-year sequences, which must include first-year calculus and general chemistry:

1. First-year calculus, equivalent to MATH 009A, MATH 009B, MATH 0046
2. General chemistry, equivalent to CHEM 001A, CHEM 001B, CHEM 001C, CHEM 011A, CHEM 011B, CHEM 011C
3. Organic chemistry (must be completed with a minimum grade of "B" in each term)
4. General biology, equivalent to BIOL 005A, BIOL 05LA, and BIOL 005B (and BIOL 005C, if available)
5. General physics (calculus-based) equivalent to PHYS 002A, PHYS 002B, PHYS 002C or PHYS 040A, PHYS 040B, PHYS 040C

Students must have a minimum grade point average of 2.70 in transferable college courses.

University Requirements

See Undergraduate Studies section.

College Requirements

See College of Natural and Agricultural Sciences, Colleges and Programs section.

Some of the following requirements for the major may also fulfill some of the college's breadth requirements. Consult with a department advisor for course planning.

Major Requirements

The major requirements and the emphasis requirements are the same for the B.A. and the B.S. degree in Biochemistry. Choose one emphasis. All upper-division courses presume completion of the life sciences core curriculum.

Continuation in the major requires that the student maintains cumulative and upper division/science GPAs of 2.00 or higher, a GPA of 2.00 or higher in each academic quarter, and makes adequate progress in the major with no more than 16 units of repeated courses. Adequate progress in the major is defined as (a) earning no grade lower than a "C-" in any required lower division mathematics or science course, STAT 100A, CHEM 112A, CHEM 112B, CHEM 112C, or any upper division BCH course, and (b) completing MATH 9B and CHEM 1A by the end of the Fall Quarter of the second year of residence and BCH 110A, BCH 110B, and BCH 110C by the end of the third year of residence. Freshmen must also complete BCH 95 with a grade of "S" during their first year of residence. Freshmen in the Medical Science Emphasis must also complete BCH 96 with a grade of "S" during their first year of residence. A student who does not meet these adequate progress standards will be discontinued from the major. In addition, a student who receives a grade of "D+" or lower in any two of the courses in (A) on the first attempt, or in any one of these courses in each of two attempts, will be discontinued from the major. Students who receive a grade lower than "B-" in BIOL 5A or CHEM 112A are strongly encouraged to complete BCH 100 during their second year of residence to better prepare themselves for BCH 110A, BCH 110B, and BCH 110C.

Biology Emphasis

1. Lower-division requirements (56-57 units)
 - a) BCH 095 or equivalent
 - b) BIOL 005A, BIOL 05LA, BIOL 005B, BIOL 005C
 - c) CHEM 001A, CHEM 001B, CHEM 001C, CHEM 011A, CHEM 011B, CHEM 011C
 - d) MATH 008B or MATH 009A, MATH 009B, MATH 046
 - e) PHYS 002A, PHYS 002B, PHYS 002C, PHYS 02LA, PHYS 02LB, PHYS 02LC
2. Statistics requirement (5 units): STAT 100A
3. Upper-division requirements (59-65 units)
 - a) BCH 101, BCH 110A, BCH 110B, BCH 110C, BCH 162, BCH 184
 - b) At least 7 units from BCH 102, BCH 111, BCH 120, BCH 153/BIOL 153/BPSC 153, BCH 180 (E-Z), BCH 183/BPSC 183, BCH 186, BCH 187, BCH 210, BCH 211, BCH 212
 - c) BIOL 102
 - d) CHEM 109 or CHEM 110A; CHEM 112A, CHEM 112B, CHEM 112C
 - e) Choose three biological science courses from the following:

- (1) BCH 102, BCH 111, BCH 120, BCH 153/BIOL 153/BPSC 153, BCH 180 (E-Z), BCH 183/BPSC 183, BCH 186, BCH 187, BCH 210, BCH 211, BCH 212
- (2) BIOL 105, BIOL 108, BIOL 114, BIOL 117, BIOL 121/MCBL 121, BIOL 121L/MCBL 121L, BIOL 123/MCBL 123/PLPA 123, BIOL 124/MCBL 124, BIOL 128/CBNS 128, BIOL 151, BIOL 155/BPSC 155, BIOL 157, BIOL 159/NEM 159, BIOL 160, BIOL 161A, BIOL 161B, BIOL 171, BIOL 171L, BIOL 173/ENTM 173, BIOL 175
- (3) BIOL 104/BPSC 104, BIOL 132/BPSC 132, BIOL 143/BPSC 143, BIOL 148/BPSC 148, BIOL 155/BPSC 155, BPSC 135
- (4) BIOL 100/ENTM 100, BIOL 173/ENTM 173, ENTM 128
- (5) CBNS 101, CBNS 106, CBNS 116, CBNS 120/PSYC 120, CBNS 120L/PSYC 120L, CBNS 124/PSYC 124, CBNS 125/PSYC 125, CBNS 150/ENTX 150, CBNS 169
- (6) ENSC 100
- (7) ENTX 101, CBNS 150/ENTX 150

4. BCH 190 or BCH 197 are available as elective courses to juniors who have completed BCH 102 and to seniors. No more than 9 units of courses numbered 190-199 may be counted towards the major.

Chemistry Emphasis

1. Lower-division requirements (61-62 units)
 - a) BCH 095 or equivalent
 - b) BIOL 005A, BIOL 05LA, BIOL 005B, BIOL 005C
 - c) CHEM 001A, CHEM 001B, CHEM 001C, CHEM 011A, CHEM 011B, CHEM 011C, CHEM 005
 - d) MATH 008B or MATH 009A, MATH 009B, MATH 046
 - e) PHYS 002A, PHYS 002B, PHYS 002C, PHYS 02LA, PHYS 02LB, PHYS 02LC
2. Statistics requirement (5 units): STAT 100A
3. Upper-division requirements (58-59 units)
 - a) BCH 101, BCH 110A, BCH 110B, BCH 110C, BCH 162, BCH 184
 - b) At least 7 units from BCH 102, BCH 111, BCH 120, BCH 153/BIOL 153/BPSC 153, BCH 180 (E-Z), BCH 183/BPSC 183, BCH 186, BCH 187, BCH 210, BCH 211, BCH 212
 - c) BIOL 102
 - d) CHEM 109 or CHEM 110A; CHEM 112A, CHEM 112B, CHEM 112C
 - e) Two courses from CHEM 110B, CHEM 113, CHEM 125, CHEM 150A, CHEM 150B, CHEM 166 (Other graduate courses may be substituted by students with a GPA of 3.00 or better with permission of the instructor and the faculty advisor.)

4. BCH 190 or BCH 197 are available as elective courses to juniors who have completed BCH 102 and to seniors. No more than 9 units of courses numbered 190-199 may be counted towards the major.

Medical Sciences Emphasis

- Lower-division requirements (54-55 units)
 - BCH 095 or equivalent
 - BCH 096, BCH 098-I
 - BIOL 005A, BIOL 05LA, BIOL 005B, BIOL 005C
 - CHEM 001A, CHEM 001B, CHEM 001C, CHEM 01LA, CHEM 01LB, CHEM 01LC
 - MATH 008B or MATH 009A, MATH 009B
 - PHYS 002A, PHYS 002B, PHYS 002C, PHYS 02LA, PHYS 02LB, PHYS 02LC
- Statistics requirement (5 units): STAT 100A
- Upper-division requirements (59 units)
 - BCH 101, BCH 110A, BCH 110B, BCH 110C, BCH 120, BCH 162, BCH 184
 - BIOL 102
 - CHEM 109 or CHEM 110A; CHEM 112A, CHEM 112B, CHEM 112C
 - CBNS 101
 - At least 8 units from BIOL 121, BIOL 161A, BIOL 161B, BIOL 171, CBNS 106, CBNS 150/ENTX 150.

Graduate and upper-division courses can be substituted with permission of the instructor and the faculty advisor. Graduate courses require a GPA of 3.0 or greater in the sciences.

Students should be aware that CHEM 005 is often a requirement for admission to professional schools.

Graduate Program

The Department of Biochemistry offers a graduate program leading to the M.S. or Ph.D. degree in Biochemistry and Molecular Biology. This program emphasizes basic biochemistry with research specializations in the areas of molecular biology, physical biochemistry, molecular endocrinology, plant biochemistry and molecular biology, signal transduction, and biomedical research. It is designed for students who are planning a career of research and teaching in biochemistry at colleges and universities or who wish to engage in biochemical investigations of fundamental or applied nature in private, governmental or commercial laboratories.

Admission Students who have completed a bachelor's degree in physical, biological, chemical, or agricultural sciences are invited to apply to the program. Regardless of the area of their major for the baccalaureate degree, students should have taken the following courses prior to beginning graduate study in biochemistry or plan to make up deficiencies soon after entering graduate school:

- One year of calculus
- One year of general physics

- One year of organic chemistry
- An introductory course in physical chemistry
- At least two courses in biology at the upper-division level, including genetics

Students should arrange to take the GRE General Test in time for their scores to be submitted with their application.

Doctoral Degree

The Department of Biochemistry offers the Ph.D. degree in Biochemistry and Molecular Biology.

Course Work Students' course requirements are determined in consultation with a graduate advisor for them upon their arrival. The graduate advisor suggests an individualized course program involving classes in biochemistry and subsidiary fields of study, chosen from any of the physical, biological, or agricultural sciences. Although an adequate course preparation is a requisite part of the training program, the department encourages early involvement of the students in research directed toward their dissertations.

At the end of the second quarter, students select major professors and are ready to initiate a research project. At the end of the first year, students submit a written report describing their research efforts and relating them to current biochemical work in related areas.

Written and Oral Qualifying Examinations

Within the first two years, students take a comprehensive written qualifying examination, following which they submit and orally defend a research report in which they describe the research they have performed thus far and develop a plan for their complete dissertation research project. This fulfills the requirement for an oral qualifying examination; Students completing all necessary requirements are advanced to candidacy for the Ph.D. degree.

Students must sit the comprehensive written exam within the first two years in the program. Unless excused by either the graduate advisor or department chair, failure to sit the examination will be regarded as a failed exam. Students must sit every sequential offering of the exam and no student will be given more than two attempts to achieve a satisfactory grade on the comprehensive written exam.

Dissertation and Final Oral Examination

Following completion of their research, students submit a written dissertation and conclude their studies with an oral defense of the dissertation. As part of the program, each student is required to serve at least two quarters as a teaching assistant.

Normative Time to Degree 15 quarters. In the case that a student changes the degree aim from M.S. to Ph.D., normative time will be reset.

Master's Degree

In addition to the Ph.D. program, the department offers two plans for the master's degree (Plan I, Thesis; Plan II, Comprehensive Examination). Both plans require completion of at least 36 course units; for Plan I, a maximum of 12 units may be for thesis research.

Students pursuing Plan II must sit the first comprehensive written exam scheduled following the completion of the coursework. Unless excused by either the graduate advisor or department chair, failure to sit the examination will be regarded as a failed exam. Students must sit every sequential offering of the exam and no student will be given more than two attempts within one year following completion of the coursework to achieve a satisfactory grade on the comprehensive written exam.

Lower-Division Courses

BCH 010 Introduction to Nutrition (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Introduction to the biological basis of human nutrition in the context of plant-animal-microorganism cycles and the characteristics of different food classes. The effects of nutritional needs, food availability, and the expanding human population are discussed. Students record and evaluate their own diet.

BCH 095 Topics in Biochemistry for Career Planning (1) Seminar, 1 hour. Prerequisite(s): lower-division standing in Biochemistry. Topics include analysis of academic aspects of career goals and options; curriculum planning; undergraduate research opportunities; preparation for postgraduate education; laboratory experiences and evaluation of data; ethics in education and research; research problems in contemporary biochemistry; and modern experimental approaches in biochemistry. Graded Satisfactory (S) or No Credit (NC). Credit is awarded for only one of BCH 095, NASC 091, or NASC 093.

BCH 096 Introduction to Humanitarian and Healthcare Service (1) Lecture, 8 hours per quarter; consultation, 2 hours per quarter. Prerequisite(s): a major in Biochemistry with an emphasis in Medical Sciences. Acquaints students with opportunities for volunteer activities in the humanitarian and healthcare arenas in southern California. Provides students with the opportunity to validate their commitment to a career in the healthcare arena. Requires a term paper. Graded Satisfactory (S) or No Credit (NC).

BCH 097 Research Tutorial in Biochemistry (1) Laboratory, 3 hours. Prerequisite(s): lower-division standing, minimum grade point average of 3.5, approval of undergraduate advisor and consent of instructor. Laboratory tutorial in Biochemistry. To provide biochemistry laboratory experience for exceptional lower-division students. A written report is required at the end of each quarter. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 3 units.

BCH 098-I Individual Internship in a Humanitarian or Healthcare Arena (1) Internship, 3 hours; term paper, 10 hours per quarter. Prerequisite(s): a major in Biochemistry with an emphasis in Medical Sciences; BCH 096. Gives Biochemistry majors with a Medical Sciences emphasis real-world experience providing community service in a humanitarian or healthcare arena. Requires a written report. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 2 units.

Upper-Division Courses

BCH 100 Elementary Biochemistry (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, with grade of "C-" or better, CHEM 112C with grade of "C-" or better (CHEM 112C may be taken concurrently). Introduction to chemistry and molecular biology of living organisms based on a study of the structure, function, and metabolism of small molecules and macromolecules of biological significance. Examines selected animals, plants, and microorganisms to develop a general understanding of structure-function relationships, enzyme action, regulation, bioenergetics, intermediary metabolism, and molecular biology.

118 / Programs and Courses

Credit is not awarded for BCH 100 if a grade of C- or higher has been awarded previously in BCH 110A, BCH 110B or BCH 110C.

BCH 101 Introductory Biochemistry Laboratory (3)

Lecture, 1 hour; discussion, 1 hour; laboratory, 3 hours. Prerequisite(s): CHEM 112A with grade of "C-" or better (may be taken concurrently) or consent of instructor. Introduces basic biochemistry wet laboratory techniques for biological samples. Includes micropipetting, volumetric relationships, dilutions, pH measurement, buffer preparation, spectrophotometry, gel permeation chromatography, and ion-exchange chromatography. Explores the use of molecular graphics for investigation of macromolecular structure-function relationships.

BCH 110A General Biochemistry (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A; CHEM 112C both with grade of "C-" or better. Considers the structure and function of biological molecules including proteins, carbohydrates, lipids, and nucleic acids.

BCH 110B General Biochemistry (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BCH 110A with a grade of "C-" or better or consent of instructor. Consideration of metabolic pathways including mechanisms and regulation of catabolism, anabolism, and bioenergetics in living organisms.

BCH 110C General Biochemistry (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BCH 100 with a grade of "C-" or better or BCH 110B with a grade of "C-" or better or consent of instructor; BIOL 102 or consent of instructor. Considers regulation of gene expression, genome replication, recombination, and repair.

BCH 111 Molecular Biology and Genomics of Human Disease Vectors (3) Lecture, 2 hours; discussion, 1 hour. Prerequisite(s): BCH 110C or BIOL 107A. Covers molecular biology and genomics of human disease vectors, predominantly insects. Analyzes molecular aspects of immunity, blood digestion, reproduction, and other systems specific to arthropod vectors. Explores recent advances in vector-pathogen interactions and their potentials for control. Satisfactory (S) or No Credit (NC) grading is not available. Cross-listed with ENTM 111. **Raikhel**

BCH 120 Topics in Human Biochemistry (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BCH 100 with a grade of "C+" or better or BCH 110B with a grade of "C-" or better or consent of instructor. Lectures on biochemical and molecular aspects of modern endocrinology, nutrition, metabolic diseases, and blood chemistry. Emphasis is on relation of the above topics to medicine. The discussion sections are used for presentations on topical medical problems.

BCH 153 Plant Genomics and Biotechnology Laboratory (4) Lecture, 1 hour; discussion, 1 hour; laboratory, 6 hours. Prerequisite(s): BCH 110C or BIOL 107A; upper-division standing; consent of instructor. A study of modern techniques in plant genome modification. Topics include nucleic acid cloning and sequencing; plant tissue culture and genetic transformation; controlled-environment plant growth; gene mapping; and germplasm collections. Also explores the history of plant biotechnology; economic, agricultural, nutritional, medicinal, and societal relevance; and regulatory issues. Cross-listed with BIOL 153 and BPSC 153.

BCH 162 Advanced Biochemistry Laboratory (5)

Lecture, 2 hours; laboratory, 9 hours. Prerequisite(s): BCH 101; BCH 110B, BCH 110C all with grades of "C-" or better, or consent of instructor. Advanced biochemistry laboratory techniques including modern methods of protein engineering, purification, and characterization, enzyme assays, principles of various types of column chromatography, SDS gel and other methods of electrophoresis, centrifugation, and crystallization. Most experiments include quantitative reasoning through data manipulation, numerical

simulations, parametric evaluation, and detailed laboratory reports. Satisfactory (S) or No Credit (NC) grading is not available.

BCH 180 (E-Z) Advanced Methods in Biochemistry (2)

F, W Lecture, 1 hour; seminar, 1 hour; term paper, .5 hours; extra reading, 2 hours. Prerequisite(s): upper-division standing, concurrent enrollment in BCH 197 or equivalent or BCH 110C with grade of "C-" or better or BIOL 107A with grade of "C-" or better; or consent of instructor. An introduction and discussion of the experimental approaches and modern techniques in the study of cell growth regulation, signal transduction, and cell death in cancer. E. Gene Regulation; F. Chromatin Research; G. Cell Signaling; I. Structural Biology; J. Biophysical Chemistry; K. Cryoelectron Microscopy; M. Biological Structure/Function; N. Genome Stability; O. Genomics and Proteomics; P. Regulation of Protein Synthesis; Q. Stem Cell Biology; R. Epigenetics; S. Molecular Biology of Genetic Diseases; T. Biochemistry of Development and Aging; U. Biochemistry of Stress Responses. Course is repeatable as content changes to a maximum of 6 units.

BCH 183 Plant Biochemistry and Pharmacology of Plant Metabolites (4)

Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BCH 110A, BCH 110B; or BCH 100; or consent of instructor. Explores plant biochemistry and the significance of plant metabolites in medicine and pharmacology. Focuses on biotechnology, medicinal plants, and plant-derived drugs as well as the biochemical and pharmacological mode-of-action of secondary plant metabolites. Also addresses plant-specific biochemical processes such as photosynthesis. Cross-listed with BPSC 183.

BCH 184 Topics in Physical Biochemistry (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BCH 100 with a grade of "C-" or better or BCH 110A with a grade of "C-" or better; BIEN 135 with grade of "C-" or better, or CHEM 109 with grade of "C-" or better or CHEM 110A with grade of "C-" or better; or consent of instructor. Explores modern biophysical methods determining the structures of biological macromolecules and relating structure to function. Covers x-ray crystallography, NMR, and cryoelectron microscopy. Addresses imaging and mass spectrometry for determining structure and ultraviolet, visible, infrared, RAMAN, fluorescence, NMR, EPR, and other forms of spectroscopy for relating macromolecular structure to function.

BCH 186 Topics in Molecular Bioenergetics (3) Lecture, 3 hours. Prerequisite(s): BCH 100 with a grade of "C-" or better or BCH 110B with a grade of "C-" or better; BCH 184 with a grade of "C-" or better; or consent of instructor. Introduction to biological energy transduction. Describes the coupling of oxidative phosphorylation and photosynthesis to adenosine triphosphate (ATP) synthesis and the coupling of ATP hydrolysis to ion transport, chemotaxis, molecular motors, biomimetics, and other biological processes on the basis of recent structural and mechanistic studies of the protein complexes involved.

BCH 187 Fundamentals of Enzymology (3) Lecture, 3 hours. Prerequisite(s): BCH 100 or BCH 110A with a grade of C- or better. An introduction to the fundamental principles of enzymology. Specific topics include, acid-base catalysis, strain effects, transition state theory, enzyme kinetics (including isotope effects), enzyme dynamics and enzyme regulation. Considers in detail the reactions of several representative enzymes.

BCH 188 Introduction to Oral Presentations (2)

Seminar, 1 hour; discussion, 1 hour. Prerequisite(s): upper-division standing; consent of instructor. Prepares science students for oral presentations and formal research talks. Includes student presentations and discussions. Also covers the electronic preparation of figures and tables.

BCH 189 Reading and Analysis of Scientific Articles

(1) Lecture, 1 hour. Prerequisite(s): junior or senior standing or consent of instructor. Introduces students to the analysis of scientific articles. Students read current research papers, present the data, and learn to critique papers.

BCH 190 Special Studies (2-4)

Individual study, 6-16 hours. Prerequisite(s): upper-division standing and consent of instructor. Literature review and tutorial in select modern biochemical topics. Course is repeatable.

BCH 197 Research for Undergraduate Students (1-4)

Prerequisite(s): junior status and consent of the instructor. Directed research and preparation of written report. Course is repeatable.

BCH 198-I Internship in Biochemistry (1-12)

Internship, 3-36 hours. Prerequisite(s): BCH 101, consent of instructor, upper-division standing. An internship to provide on-the-job biochemical experience in government, industrial, or clinical laboratories. Each individual project must be approved by the Biochemistry Department and the laboratory director where the internship is to be carried out. A written report is required. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.

Graduate Courses

BCH 204 Genome Maintenance and Stability (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BCH 110C or BIOL 107A; BIOL 113 or BIOL 114 or CBNS 101; BIOL 102 is strongly recommended. Emphasizes chromosome-based processes that maintain genome integrity and ensure accurate genome transmission during cell division. Topics are drawn from the primary literature and include chromatin structure and composition, DNA repair and recombination, telomere function and chromosome maintenance, mitotic chromosome segregation, and checkpoint surveillance mechanisms. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with CMDB 204 and ENTX 204.

BCH 205 Signal Transduction Pathways in Microbes and Plants (4)

Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing in the biological sciences, BIOL 107A or BIOL 113 or BIOL 114 or CBNS 101; or consent of instructor. Advanced topics in signal transduction pathways that regulate growth and development in plants and prokaryotic and eukaryotic microbes. Areas covered include two-component regulatory systems; quorum sensing; signaling via small and heterotrimeric G proteins; mitogen-activated protein kinase cascades; cAMP signaling; photoreceptors; plant hormone signaling; responses to low-oxygen stress; calcium signaling; and plant pathogenesis. Cross-listed with BPSC 205, CMDB 205, GEN 205, MCBL 205, and PLPA 205.

BCH 210 Biochemistry of Macromolecules (4)

Lecture, 4 hours. Prerequisite(s): BCH 110A, BCH 110B, BCH 110C or equivalents; BCH 184 (may be taken concurrently); CHEM 109; graduate standing or consent of instructor. Discussion of recent advances in the knowledge of the molecular architecture of proteins and nucleic acids, especially with respect to new experimental approaches for analyzing their structure and function. Chemistry of the active site of enzymes.

BCH 211 Molecular Biology (3)

Lecture, 3 hours. Prerequisite(s): BCH 110A, BCH 110B, BCH 110C or equivalents; graduate standing or consent of instructor. Advanced topics in molecular biology of the biosynthesis and regulation of DNA, RNA, and proteins. Some topics covered include the following: molecular anatomy of genes and chromosomes; DNA repair and recombination; regulation of genes in the cell cycle; telomerase; RNA processing and splicing; RNA editing; regulation of normal genes and oncogenes; chaperones and protein targeting.

BCH 212 Signal Transduction and Biochemical

Regulation (3) Lecture, 3 hours. Prerequisite(s): BCH 110A, BCH 110B, BCH 110C or equivalents; graduate standing or consent of instructor. Advanced topics in signal transduction and biochemical regulation. Topics include protein kinases and protein phosphorylation; phosphatases and their role in regulation; function of phosphorylation events in regulation of metabolism and growth; calcium and other ion channels as signal transduction mechanisms; steroid hormones receptor super family; immune system signal transduction events.

BCH 230 (E-Z) Advanced Topics in Biochemistry (2)

Lecture, 1 hour; discussion, 1 hour. Prerequisite(s): BCH 100 or both BCH 110A and BCH 110B or consent of instructor. Addresses advances in a particular field of biochemistry by analysis of the recent literature. E. Structure of Biological Molecules; F. Enzyme Catalysis; G. Glycobiology; H. Membrane Biochemistry; I. Cytoskeleton and Extracellular Matrix; J. Metabolism; K. Regulation of Chromatin Structure and Transcription; M. Genome Stability; N. Regulation of Protein Synthesis; O. Signal Transduction; P. Emerging Topics in Biochemistry and Molecular Biology; Q. Cell Cycle Regulation; R. Biochemistry of Stress Responses; S. Biochemistry of Development and Aging; T. Molecular Basis of Genetic Diseases; U. Genomics and Proteomics; W. Stem Cell Biology.

BCH 231 The Plant Genome (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BCH 100, BIOL 107A; or BCH 110A, BCH 110B, BCH 110C; or consent of instructor. Gives students an appreciation for the structure of the plant nuclear, chloroplast, and mitochondrial genomes. Gene structure, regulation of gene expression, transposons, and methods of gene introduction are also emphasized. Cross-listed with BPCS 231.

BCH 240 Special Topics in Biochemistry (2) Lecture, 2 hours. Prerequisite(s): BCH 110A, BCH 110B, BCH 110C or equivalents (may be taken concurrently); graduate standing in Biochemistry or consent of instructor. Oral presentations and intensive small-group discussion of selected topics in the area of specialization of each faculty member. Course content emphasizes recent advances in the special topic area and varies accordingly. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 56 units.

BCH 250 Oral Presentations in Biochemistry (2)

Seminar, 1 hour; discussion, 1 hour. Prerequisite(s): graduate standing. Training and practice in the presentation of biochemical concepts in both short and long seminar formats, using blackboard, overhead projector, and slides. Presentations are immediately and critically evaluated by both faculty and staff. Limited to 10 students.

BCH 251 Graduate Seminar in Biochemistry (2)

Seminar, 1 hour; discussion, 1 hour. Prerequisite(s): BCH 250. Oral reports by graduate students on current research topics in biochemistry.

BCH 252 General Seminar in Biochemistry (1)

Seminar, 1 hour. Prerequisite(s): graduate standing. Oral reports by faculty, graduate students, and visiting scholars on current research topics in biochemistry. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

BCH 261 Seminar in Genetics, Genomics, and Bioinformatics (1)

Seminar, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Oral reports by visiting scholars, faculty, and students on current research topics in Genetics, Genomics, and Bioinformatics. Graded Satisfactory (S) or No Credit (NC). Course is repeatable. Cross-listed with BIOL 261, BPCS 261, ENTM 261, GEN 261, and PLPA 261.

BCH 289 Special Topics in Neuroscience (2)

Seminar, 2 hours. Prerequisite(s): graduate standing or consent of instructor. An interdisciplinary seminar consisting

of student presentations and discussion of selected topics in neuroscience. Content and instructor(s) vary each time course is offered. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable. Cross-listed with BIOL 289, CHEM 289, ENTM 289, NRSC 289, and PSYC 289.

BCH 290 Directed Studies (1-4) Outside research, 3-12 hours. Prerequisite(s): graduate standing in Biochemistry; consent of instructor and graduate advisor. Experimental or literature studies on specifically selected topics undertaken under the direction of a staff member. With prior approval of the graduate advisor, M.S. students may be assigned a letter grade; other students are graded Satisfactory (S) or No Credit (NC). Course is repeatable.

BCH 291 Individual Study in Biochemistry (1-6)

Prerequisite(s): graduate standing in Biochemistry or consent of instructor. A program of studies designed to advise and assist candidates who are preparing for examinations. Open to M.S. and Ph.D. candidates; does not count toward the unit requirement for the M.S. degree. Graded Satisfactory (S) or No Credit (NC). Repeatable up to 6 units for pre-Master's students and up to 12 units for Ph.D. students prior to successful completion of the qualifying examination.

BCH 297 Directed Research (1-6)

Prerequisite(s): graduate status in Biochemistry or consent of instructor. Directed research in preparation for dissertation projects performed prior to advancement to candidacy. Graded Satisfactory (S) or No Credit (NC).

BCH 299 Research for Thesis or Dissertation (1-12)

Prerequisite(s): graduate status in Biochemistry or consent of instructor. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Courses

BCH 301 Teaching of Biochemistry at the College

Level (1) Seminar, 1 hour. Prerequisite(s): graduate standing and consent of instructor. A program of weekly meetings and individual formative evaluations required of new biochemistry teaching assistants. Covers instructional methods and classroom/section activities most suitable for teaching Biochemistry. Conducted by the TA Development Program. Credit not applicable to graduate unit requirements. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

BCH 302 Apprentice Teaching (1-4)

variable hours. Prerequisite(s): graduate standing; limited to departmental teaching assistants. Supervised teaching in lower- and upper-division Biochemistry courses. Required for all Biochemistry teaching assistants. Fulfills portion of the teaching requirements for Ph.D. Graded Satisfactory (S) or No Credit (NC). May be repeated for credit.

Bioengineering

Subject abbreviation: BIEN
**The Marlan and Rosemary Bourns
College of Engineering**

Bir Bhanu, Ph.D., Interim Chair
Department Office, 205 MSE
(951) 827-4303; bioeng.ucr.edu

Professors

Bahman Anvari, Ph.D.
Bir Bhanu, Ph.D., *Distinguished Professor*
Dimitrios Morikis, Ph.D.
Victor G. J. Rodgers, D.Sc. (Bioengineering)
Jerome S. Schultz, Ph.D., *Distinguished Professor*

Associate Professors

Jiayu Liao, Ph.D.
Valentine Vullev, Ph.D.

Assistant Professors

Kaustabh Ghosh, Ph.D.

William H. Grover, Ph.D.

Huinan Liu, Ph.D.

Julia Lyubovitsky, Ph.D.

Jin Nam, Ph.D.

Boris Hyle Park, Ph.D.

Adjunct Professor

Shu-Wei Sun, Ph.D.

Major

The major in Bioengineering allows students to complete a B.S. degree that provides a basic education to enter the fields of bioengineering and biotechnology.

Bioengineering is rooted in physics, mathematics, chemistry, biology, and the life sciences. It is the application of a systematic, quantitative, and integrative way of thinking about and approaching the solutions of problems important to biology, health, and clinical practice.

Bioengineers develop processes and products that are important for health and treatment of diseases, new materials, protecting environments, and food production. They are employed by the pharmaceutical, biotechnology, medical device, and environmental and food industries. For students interested in medicine, the bioengineering program provides the basic courses to prepare for application to medical schools.

The objective of the bioengineering program is to produce graduates who:

- have a strong foundation to apply science, engineering, and biological principles to meet the challenges at the interface of engineering, life sciences, and medicine
- have the capability to pursue graduate studies, careers in the medical device or biotechnology industries, or entry into medical or other health related professional schools
- are effective as professionals working individually and in teams and can communicate effectively to integrate contributions from multiple disciplines to address biological and medical problems.
- have an appreciation of and sensitivity to a broad range of ethical and social concerns related to bioengineering

The Bioengineering B.S. degree program at UCR is accredited by the Engineering Accreditation Commission of ABET, abet.org.

All undergraduates in the College of Engineering must see an advisor at least annually. Visit student.engr.ucr.edu for details.

University Requirements

See Undergraduate Studies section.

College Requirements

See The Marlan and Rosemary Bourns College of Engineering, Colleges and Programs section.

The Bioengineering major uses the following major requirements to satisfy the college's Natural Sciences and Mathematics breadth requirement.

120 / Programs and Courses

1. BIOL 005A, BIOL 05LA
2. CHEM 001A, CHEM 001B, CHEM 001C
3. MATH 008B or MATH 009A

Major Requirements

1. Lower-division requirements (76 units)
 - a) BIEN 001, BIEN 010
 - b) BIOL 005A, BIOL 05LA, BIOL 005B
 - c) CHEM 001A, CHEM 001B, CHEM 001C, CHEM 011A, CHEM 011B, CHEM 011C
 - d) CS 010
 - e) EE 001A, EE 011A
 - f) MATH 009A, MATH 009B, MATH 009C, MATH 010A, MATH 010B, MATH 046
 - g) PHYS 040A, PHYS 040B, PHYS 040C
2. Upper-division requirements (78 units)
 - a) BIEN 101
 - b) BIEN 105, BIEN 110, BIEN 120, BIEN 125, BIEN 130, BIEN 130L, BIEN 135, BIEN 140A/CEE 140A, BIEN 155, BIEN 175A, BIEN 175B, BIEN 175C
 - c) BIEN 115
 - d) CHEM 112A, CHEM 112B
 - e) STAT 155
 - f) Technical electives (16 units): BIEN 136/ MSE 136, BIEN 137, BIEN 138, BIEN 140B/CEE 140B, BIEN 142, BIEN 159/ CEE 159, BIEN 160, BIEN 165, BIEN 166.

Visit the Student Affairs Office in the College of Engineering or student.engr.ucr.edu for a sample program.

Lower-Division Course

BIEN 001 Introductory Colloquium in Bioengineering (1) Colloquium, 1 hour. Colloquium on current topics in bioengineering and other related fields delivered at an introductory level. Presented by faculty members, visiting scientists, or individuals with industrial bioengineering experience. Graded Satisfactory (S) or No Credit (NC).

BIEN 010 Overview of Bioengineering (4) Lecture, 2 hours; discussion, 1 hour; practicum, 3 hours. Prerequisite(s): BIOL 002, CHEM 001A, PHYS 002A, or equivalents; or consent of instructor. Provides an overview of the various aspects of bioengineering and introduces bioengineering design. Illustrates the application of engineering principles for the design of various products to health science industries. Covers diagnostic instruments, artificial organs, biotechnology, and cell and tissue engineering. Covers engineering ethics. Requires a term project and oral presentation.

Upper-Division Courses

BIEN 101 Quantitative Biochemistry (4) W, S Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, CHEM 112A, MATH 046. Provides Bioengineering students with an in-depth experience in applying mathematical modeling and simulation methods to understand the dynamics of biochemical systems. Prepares for designing new applications of genetic engineering.

BIEN 105 Circulation Physiology (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005B, MATH

046, PHYS 040A. Introduces tensor and vector mathematics that describe the conservation of momentum and mass transport in biological sciences, the cardiovascular system, and pulmonary system. Includes constitutive equations such as the Navier-Stokes and Casson models, significance of fluid stress in biological vessels, and the physiological relevance of fundamental parameters. Emphasizes the relation between function and system behavior.

BIEN 110 Biomechanics of the Human Body (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 001C or CHEM 01HC, MATH 010A, PHYS 040B. Introduces the motion, structure and function of the musculoskeletal system, the cardiovascular system, and the pulmonary system. Topics include applied statics, kinematics, and dynamics of these systems and the mechanics of various tissues (ligament, bone, heart, blood vessels, lung). Emphasis is on the relation between function and material properties of these tissues.

BIEN 115 Quantitative Physiology (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIEN 110; consent of instructor is required for nonmajors. Analyzes engineering aspects of physiological systems and artificial organs. Covers the nervous system, muscular system, cardiovascular system, respiratory system, and renal system. Addresses ethical and professional considerations in the development and utilization of medical devices and interventions. **Anvari**

BIEN 120 Biosystems and Signal Analysis (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005B, CS 010, MATH 046, PHYS 040C. Provides basic knowledge for the quantitative analysis of the dynamic behavior of biological systems. Particular applications include neural systems, control of metabolic and hormonal systems, and design of instruments for monitoring and controlling biological systems. Topics include system theory, signal properties, control theory, and transfer functions.

BIEN 125 Biotechnology and Molecular Bioengineering (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BCH 100. Provides an overview of biochemical processes in cells and their use in developing new products and processes. Presents cellular processes such as metabolism, protein synthesis, enzyme behavior, and cell signaling and control from an engineering viewpoint of modeling and control.

BIEN 130 Bioinstrumentation (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIEN 120; concurrent enrollment in BIEN 130L. Introduces basic components of instruments for biological applications. Explores sources of signals and physical principles governing the design and operation of instrumentation systems used in medicine and physiological research. Topics include data acquisition and characterization; signal-to-noise concepts and safety analysis; and interaction of instrument and environment. **Anvari**

BIEN 130L Bioinstrumentation Laboratory (2) Laboratory, 3 hours; discussion, 1 hour. Prerequisite(s): concurrent enrollment in BIEN 130. Laboratory experience with instrumental methods of measuring biological systems. Introduces various sensors and transducers to measure physical, chemical, and biological properties. Covers reliability, dynamic behavior, and data analysis. **Anvari**

BIEN 135 Biophysics and Biothermodynamics (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BCH 100, MATH 010B, MATH 046, PHYS 040C. An introduction to the application of thermodynamic principles to understanding the behavior of biological systems. Discusses biophysical properties of biomacromolecules, such as proteins, polynucleotides, carbohydrates, and lipids, and methods of characterizing their properties and interactions.

BIEN 136 Tissue Engineering (4) Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): BIOL 005A and BIOL 005B, CHEM 001C or CHEM 01HC or equivalent;

lents; junior or senior standing or consent of instructor. Covers progress in cellular and molecular biology and engineering. Provides the basis for advancing tissue repair and regeneration with the goal of restoring compromised tissue functions. Presents methods for cell culture, tissue design and development, manipulation of the cell/tissue microenvironment, and current strategies for functional reconstruction of injured tissues. Cross-listed with MSE 136.

BIEN 137 Advanced Biomechanics (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIEN 110, BIOL 005B, MATH 046, PHYS 040A or equivalents; or consent of instructor. Focuses on mechanical characterization of biological tissues at the cellular, organ, and system level. Explores biomechanical factors of physiological and pathological conditions.

BIEN 138 Fundamental Principles of Wound Repair (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIEN 105, BIOL 002, BIOL 005A, or equivalents; or consent of instructor. Provides fundamental understanding of the molecular and cellular biology of wound repair and regeneration. Focuses on the spatiotemporal roles of inflammatory cytokines; growth factors; extracellular matrix; mechanical forces; tissue cells and adult stem/progenitor cells in soft tissue repair. Topics include embryonic wound regeneration and adult skin and cardiovascular repair.

BIEN 140A Biomaterials (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BCH 100, CHEM 112C, MATH 010B, PHYS 040B. Covers the principles of materials science and engineering, with attention to topics in bioengineering. Explores atomic structures, hard treatment, fundamentals of corrosion, manufacturing processes, and characterization of materials. Cross-listed with CEE 140A.

BIEN 140B Biomaterials (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIEN 140A/CEE 140A. Covers the structure-property relations of metals, ceramics, polymers, and composites, as well as hard and soft tissues such as bone, teeth, cartilage, ligament, skin, muscle, and vasculature. Focuses on behavior of materials in the physiological environment. Cross-listed with CEE 140B.

BIEN 142 Introductory Biomedical Optical Imaging (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PHYS 040C and MATH 010B; or consent of instructor. Examines fundamental theory and basic design of biomedical optical imaging systems. Topics include a basic understanding of the working principles of optical components, diagnostic light-tissue interaction, and design of imaging systems to exploit the interaction of light with biological phenomena.

BIEN 155 Biotechnology Laboratory (2) Laboratory, 3 hours; discussion, 1 hour. Prerequisite(s): BCH 100, PHYS 040C. Laboratory experience in cell culture, bioreactors, optical techniques, array techniques, and separation and purification methods.

BIEN 159 Dynamics of Biological Systems (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BCH 100 or BCH 110A. Covers engineering principles for the analysis and modeling of biological phenomena. Topics include molecular diffusion and transport, membranes, ligand-receptor interactions, enzyme kinetics, and dynamics of metabolic pathways. Examines the application of these principles to the design of bioreactors, bioassays, drug delivery systems, and artificial organs. Cross-listed with CEE 159.

BIEN 160 Biomedical Imaging (4) F Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIEN 120. An introduction to the fundamental physics and engineering principles for medical imaging systems. Covers X-ray, ultrasound, radionuclide, magnetic resonance imaging, positron emission tomography, optical coherent tomography, and other optical methods. Includes image formation and reconstruction, image characteristics, and quality and image processing. **Schultz**

BIEN 165 Biomolecular Engineering (4) Lecture, 2 hours; discussion, 1 hour; term paper, 3 hours. Prerequisite(s): BIEN 125; PHYS 040B or consent of instructor. Emphasizes engineering, biochemical, and biophysical concepts and technologies intrinsic to specific topics of biomolecular engineering. Introduces the history of genetic and protein engineering. Topics include biological thermodynamics, molecular kinetics, biochemical and biophysical approaches, protein engineering, high-throughput screening technologies, and protein engineering with unnatural amino acids. **Liao**

BIEN 166 Bioinspired Engineering for Sustainable Energy (4) Lecture, 3 hours; discussion, 1 hour; extra reading, 10 hours. Prerequisite(s): BIEN 140A/CEE 140A. Introduces the use of concepts from basic biological sciences (including biochemistry and biophysics) for applied energy engineering. Covers biological energy conversion (including photosynthesis) and its implication for sustainable energy technologies. Discusses recent advances in biomimetic and bioinspired energy conversion.

BIEN 167 Medical Diagnostics (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIEN 130 or consent of instructor. Provides an overview of medical diagnostics. Topics include methods of biochemical detection, genotyping, DNA sequencing, medical imaging, hematology, microfluidics, epidemiology, diagnostics for point-of-care and resource-limited settings, and case studies of commercially successful diagnostic products.

BIEN 175A Senior Design (2) Lecture, 1 hour; practicum, 3 hours. Prerequisite(s): BIEN 130L. Covers the entire design process for bioengineering. Explores intellectual property, quality control, and regulatory and ethical considerations. Requires working in small teams effectively to prepare formal engineering reports, web pages notebooks, oral presentations, a project demonstration, and a business plan. Graded In Progress (IP) until BIEN 175A, BIEN 175B, and BIEN 175C are completed, at which time a final letter grade is assigned.

BIEN 175B Senior Design (4) Lecture, 2 hours; discussion, 1 hour; practicum, 3 hours. Prerequisite(s): BIEN 175A; senior standing in Bioengineering. Covers the entire design process for bioengineering. Explores intellectual property, quality control, and regulatory and ethical considerations. Requires working in small teams effectively to prepare formal engineering reports, web pages, notebooks, oral presentation, a project demonstration, and a business plan. Graded In Progress (IP) until BIEN 175A, BIEN 175B, and BIEN 175C are completed, at which time a final, letter grade is assigned.

BIEN 175C Senior Design (4) Lecture, 2 hours; discussion, 1 hour; practicum, 3 hours. Prerequisite(s): BIEN 175B. Covers the entire design process for bioengineering. Explores intellectual property, quality control, and regulatory and ethical considerations. Requires working in small teams effectively to prepare formal engineering reports, web pages, notebooks, oral presentations, a project demonstration, and a business plan.

BIEN 190 Special Studies (1-5) Individual study, 3-15 hours. Prerequisite(s): upper-division standing; consent of instructor and department chair. Provides individual study to meet special curricular needs. Course is repeatable to a maximum of 9 units.

BIEN 197 Research for Undergraduates (1-4) Laboratory, 3-12 hours. Prerequisite(s): consent of instructor and Bioengineering undergraduate program advisor. Directed research on a topic relevant to bioengineering. Requires a final written report. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Graduate Courses

BIEN 201 Mathematical Methods for Bioengineering (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 146A or equivalent; first-year standing in the graduate program in Bioengineering. Provides a fundamental grounding in applied mathematics. Enables the provision of problems in biotransport and bioreaction kinetics. Topics include linear differential equations solutions; analytical methods for partial differential equations including separations of variables, similarity transforms, and perturbation methods; and numerical methods for bioengineering, regression techniques, and error analysis.

BIEN 220 Chemical Genomics Design Studio (2) Lecture, 1 hour; practicum, 4 hours. Prerequisite(s): course work in cell biology, genetics, combinatorial chemistry; or consent of instructor; graduate standing. Explores chemical genomic research approaches. Emphasizes critical thinking; advanced planning of time-consuming tests of hypotheses and experimental caveats, trade-offs, and options. Taught in a case-study approach, teams consist of students with engineering, biology, computational sciences, and chemical backgrounds. Teams generate an interdisciplinary chemical genomic research project. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with CMDB 220.

BIEN 223 Engineering Analysis of Physiological Systems (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): course work in basic biology, calculus, chemistry, and physics; graduate standing or consent of instructor. Provides a bioengineering approach to the physiological properties and interactions of various mammalian organ systems. Covers the nervous, muscular, cardiovascular, respiratory, and renal systems. Emphasizes the physical and engineering principles governing these systems by applying quantitative and analytical approaches. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Credit is awarded for only one of BIEN 223 or BIEN 223V. **Anvari**

BIEN 223V Engineering Analysis of Physiological Systems (4) Lecture, 4 hours; consultation and interaction with the student via web-based interactive system (e.g., skype) for 1 hour per week. Prerequisite(s): course work in basic biology, calculus, chemistry, and physics; graduate standing or consent of instructor; enrollment in the Online Masters of Science in Engineering Program. Provides a bioengineering approach to the physiological properties and interactions of various mammalian organ systems. Covers the nervous, muscular, cardiovascular, respiratory, and renal systems. Emphasizes the physical and engineering principles governing these systems by applying quantitative and analytical approaches. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Credit is awarded for only one of BIEN 223 or BIEN 223V.

BIEN 224 Cellular and Molecular Engineering (4) Lecture, 2 hours; discussion, 1 hour; practicum, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Emphasizes biophysical and engineering concepts intrinsic to specific topics at the cellular and molecular level. Includes receptor-ligand dynamics in cell signaling and function; DNA replication and RNA processing; cellular and protein sorting; control of gene expression; membrane structure, transport and traffic; biological signal transduction; and mechanics of cell division. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with MSE 246. Credit is awarded for only one of BIEN 224/MSE 246 or BIEN 224V.

BIEN 224V Cellular and Molecular Engineering (4) Lecture, 4 hours; consultation and interaction with student via a web-based interactive system (e.g., skype) for 1 hour per week. Prerequisite(s): consent of instructor or enrollment in the Online Masters-of-Sci-

ence in Engineering Program. Emphasizes biophysical and engineering concepts intrinsic to specific topics at the cellular and molecular level. Includes receptor-ligand dynamics in cell signaling and function; DNA replication and RNA processing; cellular and protein sorting; control of gene expression; membrane structure, transport and traffic; biological signal transduction; and mechanics of cell division. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Credit is awarded for only one of BIEN 224/MSE 246 or BIEN 224V.

BIEN 227 Biophotonics: Laser-Tissue Interactions and Therapeutic Applications (3) Lecture, 2 hours; term paper, .5 hours; extra reading, 1 hour; written work, 1.5 hours. Prerequisite(s): BIOL 005C, CHEM 001C, CS 005, MATH 046, PHYS 002C, or equivalents. Provides an overview of various types of interactions between lasers and biological tissues. Addresses methods of optical properties measurements, mathematical modeling of light propagation, and selected therapeutic applications of lasers. Includes one or two field trips to medical laser centers to observe laser treatment procedures.

BIEN 228 Biophotonics: Optical Diagnosis and Measurements (3) Lecture, 2 hours; outside research, .5 hours; extra reading, 1 hour; written work, 1.5 hours. Prerequisite(s): BIEN 227. Covers the fundamentals underlying optical diagnostic procedures, including absorption and scattering-based techniques. Also addresses physics of optical tweezers and their applications in biological sciences.

BIEN 233 Computational Modeling of Biomolecules (4) Lecture, 2 hours; workshop, 2 hours. Prerequisite(s): BIOL 005B; CHEM 112B; MATH 009C or MATH 09HC; PHYS 040B; basic computer programming experience. Introduces computational methods for the quantitative analysis of biomolecular structures at atomic resolution. Aids in understanding the physicochemical properties of biomolecular function, the prediction of biological properties, and the design of new experiments. Forms the basis for structure-based design of proteins with tailored properties and inhibitors of protein function. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

BIEN 234 Orthopaedic Regenerative Engineering and Mechanobiology (4) Lecture, 4 hours. Prerequisite(s): BIEN 110, BIEN 140A, BIOL 005A, and BIOL 005B, or equivalents; graduate standing or consent of instructor. Introduces advanced biomechanics and mechanobiology of skeletal tissues including bone and cartilage. Provides an understanding of structure-function relationship in biological tissues. Focuses on bone and cartilage regenerative engineering approaches based on scaffolds, stem cells, and mechanotransduction.

BIEN 235 Vascular Biomechanics and Engineering (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 002, BIOL 005A, BIEN 105, or equivalent; graduate standing or consent of instructor. Provides detailed understanding of the crucial role of mechanical forces in guiding blood vessel formation and function in human health and disease. Topics include embryogenesis, wound repair, atherosclerosis, and cancer. Addresses the principles of biomaterials science and regenerative medicine for promoting therapeutic neovascularization.

BIEN 236 Nanomaterials for Regenerative Medicine (4) Lecture, 4 hours. Prerequisite(s): BIOL 005C, CHEM 001C (or CHEM 01HC), MSE 001, or equivalents; graduate standing or consent of instructor. Covers recent advances in nanomaterial synthesis, fabrication, and characterization. Focuses on the medical applications of nanomaterials and nanotechnologies. Addresses methods of synthesis of nanomaterials such as nanoparticles, nanotubes, and nanofibers. Includes critical design criteria and assessment methods for properties of nanomaterials to meet medical requirements. Cross-listed with MSE 236.

BIEN 237 Medical Diagnostics (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Provides an in-depth analysis of current topics in medical diagnostics. Focuses on critical reviews of recent journal articles on diagnostics and case studies of recent commercial diagnostic products. Topics include methods of biochemical detection, genotyping, DNA sequencing, medical imaging, hematology, microfluidics, epidemiology, and diagnostics for point-of-care and resource-limited settings. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

BIEN 242 Advanced Biomedical Optical Imaging (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIEN 142 or equivalent; graduate standing or consent of instructor. Examines advanced theory and optimized design of biomedical optical imaging systems. Topics include a full understanding of the working principles of optical components, diagnostic light-tissue interaction, and design of imaging systems to exploit the interaction of light with biological phenomena. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

BIEN 245 Optical Methods in Biology, Chemistry, and Engineering (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 109 or equivalent; graduate standing; consent of instructor. Covers the origin of fluorescence and other emission processes that modulate the characteristics of molecular emissions. Presents emission-based analytical and bioanalytical methods and techniques. Reviews state-of-the-art instrumentation, including their applicability, limitations, and source. Also provides interpretation and meaning of the measured signals as applied to biological systems. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as content changes. Cross-listed with MSE 226.

BIEN 249 Integration of Computational and Experimental Biology (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): BIOL 005B; MATH 010B; MATH 046; PHYS 040C; graduate standing. A multidisciplinary introduction to computational methods used to analyze experimental biological data. Introduction to mathematical concepts needed to understand protein structure and dynamics, protein-protein interactions (structures and networks), gene regulatory networks, signal transduction networks, metabolic networks, and kinetic modeling of cellular processes. Also covers techniques used to derive experimental data. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with CEE 249. Credit is awarded for only one of BIEN 249/CEE 249 or BIEN 249V.

BIEN 249V Integration of Computational and Experimental Biology (4) Lecture, 4 hours; consultation and interaction with student via web-based interactive system (e.g., skype) for 1 hour per week. Prerequisite(s): BIOL 005B; MATH 010B; MATH 046; PHYS 040C; graduate standing; consent of the instructor; enrollment in the Online Masters-of-Science in Engineering Program. A multidisciplinary introduction to computational methods used to analyze experimental biological data. Introduction to mathematical concepts needed to understand protein structure and dynamics, protein-protein interactions (structures and networks), gene regulatory networks, signal transduction networks, metabolic networks, and kinetic modeling of cellular processes. Also covers techniques used to derive experimental data. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Credit is awarded for only one of BIEN 249/CEE 249 or BIEN 249V.

BIEN 251 Biophotonics: Optical Microscopy and Its Biological Applications (3) S, F, W Lecture, 2 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Examines the fundamentals of optical system design and system integration in light microscopy. Covers design components, including light sources, lenses, mirrors, dispersion elements, op-

tical fibers, and detectors. Also covers optical system analysis, transfer functions, magnification, resolution, contrast, and molecular, cellular, organ, and organism applications. **Lyubovitsky**

BIEN 260 Special Topics in Bioinstrumentation (1 or 2) Seminar, 1 hour; term paper, 0-3 hours. Prerequisite(s): graduate standing or consent of instructor. Focuses on advanced technologies in bioengineering studies, such as spectroscopy, microscopy, magnetic resonance imaging, computed tomography, ultrasonography, and biosensors. Students who submit a term paper receive credit for 2 units; other students receive credit for 1 unit. Students who submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

BIEN 261 Special Topics in Biotransport (1 or 2) Seminar, 1 hour; term paper, 0-3 hours. Prerequisite(s): graduate standing or consent of instructor. Focuses on advanced methods of analysis of biological transport phenomena such as drug distribution, microcirculation, membrane transport, and transport in organs and tissues. Students who submit a term paper receive credit for 2 units; other students receive credit for 1 unit. Students who submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

BIEN 262 Special Topics in Biosignaling (1 or 2) Seminar, 1 hour; term paper, 0-3 hours. Prerequisite(s): graduate standing or consent of instructor. Focuses on current research in cell signaling and control, including G protein-coupled receptors, signal transduction and cytoskeletal dynamics, and cell adhesion and cell metabolism. Students who submit a term paper receive credit for 2 units; other students receive credit for 1 unit. Students who submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

BIEN 263 Special Topics in Biocomputation (1 or 2) Seminar, 1 hour; term paper, 0-3 hours. Prerequisite(s): graduate standing; consent of instructor. Focuses on various advanced methods for computational studies of biomolecules and simulations. Includes Brownian dynamics simulations; Monte Carlo methods; normal mode analysis; electrostatic calculations; and free energy calculations. Students who submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

BIEN 264 Biotransport Phenomena (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIEN 105 or equivalent; graduate standing or consent of instructor. Covers the mathematical expression and modeling of principles underlying the transport processes of biological systems and biomedical engineering processes. Emphasizes momentum, mass transport, and interpretation of these processes. Topics include advanced development of governing conservation equations and the appropriate constitutive equations for transport in circulation and tissue. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Credit is awarded for only one of BIEN 264 or BIEN 264V.

BIEN 264V Biotransport Phenomena (4) Lecture, 4 hours; consultation and interaction with student via a web-based interactive system (e.g., skype) for 1 hour per week. Prerequisite(s): consent of instructor or enrollment in the Online Masters-of-Science in Engineering Program. Covers the mathematical expression and modeling of principles underlying the transport processes of biological systems and biomedical engineering processes. Emphasizes momentum, mass transport, and interpretation of these processes. Topics include advanced development of governing conservation equations and the appropriate constitutive equations for transport in circulation and tissue. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Credit is awarded for only one of BIEN 264 or BIEN 264V.

BIEN 265 Special Topics in Biomedical Optical Imaging (1 or 2) S Seminar, 1 hour; term paper, 0-3 hours. Prerequisite(s): graduate standing or consent of instructor. Focuses on advanced theory, technology, and applications of biomedical optical imaging. Addresses novel sources of optical contrast, current developments in optical imaging instrumentation, and recent advances in their application to bioengineering. Students who submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable. **Schultz in charge**

BIEN 266 Special Topics in Biological Nuclear Magnetic Resonance (NMR) Spectroscopy (1 or 2) Seminar, 1 hour; term paper, 0-3 hours. Prerequisite(s): graduate standing; consent of instructor. Focuses on various advanced methods for the determination of structure, dynamics, and interactions of biomolecules. Utilizes multidimensional and multinuclear NMR spectroscopy. Students who submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

BIEN 267 Special Topics in Biophotonics (1 or 2) Seminar, 1 hour; term paper, 0-3 hours. Prerequisite(s): graduate standing or consent of instructor. Focuses on advanced science and technology methods that use electromagnetic radiation for medical and biological applications. Covers photonic devices, detection, microscopy and spectroscopy techniques, and diagnostics and mechanistic ideas on photodynamic therapy. Students who submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable. **Lyubovitsky**

BIEN 268 Bioengineering Experimentation and Analysis (2) Laboratory, 3 hours; discussion, 1 hour; written work, 2 hours. Prerequisite(s): BIOL 005C, CHEM 001C, CS 005, MATH 046, PHYS 002C or equivalents or consent of instructor. Introduces measurement principles and data acquisition methods related to biomechanics and biochemical and bioelectrical signals from living systems. Addresses the fundamental mechanisms underlying the operation of various sensor types and the modern instruments illustrating noise analysis, filtering, signal processing, and conditioning. Includes experiments aimed at investigating physical responses of cells and tissues to a variety of stimuli.

BIEN 269 Special Topics in Optical Measurements and Photomedicine (2) Discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Focuses on the applications of optical trapping methods to characterize the mechanical and electromechanical properties of biological cells and membranes, as well as to quantify molecular interactions. Also covers the use of optical probes for cellular and tissue imaging, as well as optical therapy. Graded Satisfactory (S) or No Credit (NC). Course is repeatable as content changes. **Anvari**

BIEN 270 Transport with Reactions in Biological Systems (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIEN 264 or equivalent; graduate standing or consent of instructor. Covers the mathematical expression and modeling of principles underlying the transport processes of biological systems reactions and biomedical engineering processes involving reactions. Topics include advanced development of chemical kinetics and reaction mechanisms of biological systems; enzymatic reactions; Michaelis-Menton kinetics; and cell-surface ligand-receptor kinetics. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. **Rodgers**

BIEN 271 Video Bioinformatics: Multi-scale Analysis of Biological Systems (2) Lecture, 2 hours. Prerequisite(s): graduate standing or consent of instructor. Introduces the significant range for both the time and spatial scales of biological systems. Includes video imaging techniques, as well as how these spatial and time scales are analyzed for a better understanding of biological function. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with EE 271 and GEN 271.

BIEN 272 Special Topics in Biomaterials and Tissue Engineering (1-2) Seminar, 1-2 hours; term paper, 0-3 hours. Prerequisite(s): graduate standing or consent of instructor. Focuses on advanced biomaterials and tissue engineering for medical applications. Explores the design, processing, characterization, and evaluation of biomaterials. Examines current development in novel materials and recent advances in their applications in tissue engineering, drug delivery, gene therapy, cell therapy, medical devices, and implants. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable as content changes to a maximum of 30 units. Cross-listed with MSE 280.

BIEN 273 Special Topics in Regenerative Engineering and Biomechanics (2) Seminar, 2 hours. Prerequisite(s): graduate standing or consent of instructor. Focuses on advanced regenerative engineering and biomechanics in the skeletal system. Examines biomechanics of skeletal system at the tissue and cell levels utilizing molecular biology approaches. Develops and implements regenerative methodologies for repairing damaged skeletal tissues by a thorough understanding in mechanobiology. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable to a maximum of 30 units.

BIEN 274 Special Topics in Endothelial Biomedicine (2) Seminar, 2 hours. Prerequisite(s): graduate standing or consent of instructor. Presents an integrated view of the fundamental role of endothelial cells in regulating vascular tone, inflammation, and repair in both health and disease. Encompasses the principles related to developmental biology, molecular and cellular biology, biomechanics, bioengineering, and translational medicine. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable to a maximum of 30 units.

BIEN 286 Colloquium in Bioengineering (1) Colloquium, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Colloquia on current research topics in bioengineering and other related fields. Presented by faculty members and visiting scientists. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

BIEN 290 Directed Studies (1-6) Individual study, 3-18 hours. Prerequisite(s): graduate standing; consent of instructor and graduate advisor. Faculty-directed individual study of selected topics in Bioengineering. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 9 units.

BIEN 297 Directed Research (1-6) Outside research, 3-18 hours. Prerequisite(s): graduate standing; consent of instructor. Provides research opportunities for selected problems in bioengineering. Conducted under faculty supervision. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 15 units.

BIEN 298-I Individual Internship (1-12) Internship, 2-24 hours; written work, 1-12 hours. Prerequisite(s): graduate standing; consent of instructor. An individual apprenticeship in bioengineering with an approved professional individual or organization and academic work under the direction of a faculty member. Requires a written report. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 16 units.

BIEN 299 Research for the Thesis or Dissertation (1-12) Outside research, 3-36 hours. Prerequisite(s): graduate standing; consent of instructor. Designated for research in bioengineering for the M.S. thesis or Ph.D. dissertation. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Course

BIEN 302 Teaching Practicum (1-4) Practicum, 3-12 hours. Prerequisite(s): graduate standing; appointment as a teaching assistant or associate in Bioengineering. Provides supervised teaching in undergraduate courses. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

BIEN 401 Fundamentals of Proposal Preparation and Ethical Standards in Bioengineering (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing. An introduction to effective proposal preparation and writing for bioengineering-related research. Also covers ethical standards of scientific research related to bioengineering. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

BIEN 402 Effective Writing for Bioengineering Research Publications (4) Lecture, 4 hours. Prerequisite(s): BIEN 401. An introduction to effective manuscript writing for bioengineering-related research publications.

Bioengineering Interdepartmental Graduate Program

Bir Bhanu, D.Sc., Interim Chair
Department Office, 205 MSE
(951) 827-4303; bir.bhanu@ucr.edu

Distinguished Professors

Robert C. Haddon, Ph.D. (Chemistry)
Natasha Raikhel, Ph.D. (Botany & Plant Sciences)
Jerome S. Schultz, Ph.D. (Bioengineering)

Professors

Michael E. Adams, Ph.D. (Cell Biology & Neuroscience/ Entomology)
Bahman Anvari, Ph.D. (Bioengineering)
G. John Andersen, Ph.D. (Psychology)
Bir Bhanu, Ph.D. (Electrical and Computer Engineering)
David Bocian, Ph.D. (Chemistry)
Richard Cardullo, Ph.D. (Cell Biology & Neuroscience)
Quan Cheng, Ph.D. (Chemistry)
Wilfred Chen, Ph.D. (Chemical & Environmental Engineering)
Sarjeet S. Gill, Ph.D. (Cell Biology & Neuroscience/ Entomology)
Tao Jiang, Ph.D. (Computer Science)
David Johnson, Ph.D. (Biomedical Sciences)
Cynthia K. Larive, Ph.D. (Chemistry)
David Lo, Ph.D. (Biomedical Sciences)
Elizabeth Lord, Ph.D. (Botany & Plant Sciences)
Manuela Martins-Green, Ph.D. (Cell Biology & Neuroscience)
Umar Mohideen, Ph.D. (Physics & Astronomy)
Dimitrios Morikis, Ph.D. (Bioengineering)
Thomas H. Morton, Ph.D. (Chemistry)
Ashok Mulchandani, Ph.D. (Chemical & Environmental Engineering)
Nosang Myung, Ph.D. (Chemical & Environmental Engineering)
Eugene Nothnagel, Ph.D. (Botany & Plant Sciences)
Cengiz S. Ozkan, Ph.D. (Mechanical Engineering)
Mihri Ozkan, Ph.D. (Electrical and Computer Engineering)
Victor G. J. Rodgers, D.Sc. (Bioengineering)
Thomas F. Stahovich, Ph.D. (Mechanical Engineering)
Prudence Talbot, Ph.D. (Cell Biology and Neuroscience)
Harry W. K. Tom, Ph.D. (Physics & Astronomy)
Kambiz Vafai, Ph.D. (Mechanical Engineering)
Jianzhong Wu, Ph.D. (Chemical & Environmental Engineering)

Yushan Yan, Ph.D. (Chemical & Environmental Engineering)

Associate Professors

Guillermo Aguilar, Ph.D. (Mechanical Engineering)
Christopher J. Bardeen, Ph.D. (Chemistry)
Sean Cutler, Ph.D. (Plant Cell Biology and Chemistry)
Iryna Ethell, Ph.D. (Biomedical Sciences)
Thomas Girke, Ph.D. (Bioinformatics)
Jiayu Liao, Ph.D. (Bioengineering)
Stefano Lonardi, Ph.D. (Computer Science)
Michael Marsella, Ph.D. (Chemistry)
Aaron Seitz, Ph.D. (Psychology)
Valentine Vullev, Ph.D. (Bioengineering)
Sharon Walker, Ph.D. (Chemical & Environmental Engineering)

Assistant Professors

Devin K. Binder, Ph.D. (Biomedical Sciences)
Anupama Dahanukar, Ph.D. (Entomology)
Elisa Franco, Ph.D. (Mechanical Engineering)
Kastubh Ghosh, Ph.D. (Bioengineering)
Elaine Haberer, Ph.D. (Electrical and Computer Engineering)
Huinana Liu, Ph.D. (Bioengineering)
Julia Lyubovitsky, Ph.D. (Bioengineering)
Jin Nam, Ph.D. (Bioengineering)
B. Hyle Park, Ph.D. (Bioengineering)
Masaru P. Rao, Ph.D. (Mechanical Engineering)
Khalefi A. Razak, Ph.D., (Psychology)
Ian Wheelodon, Ph.D. (Chemical & Environmental Engineering)
Nicole I. Zur Nieden, Ph.D. (Cell Biology and Neuroscience)

Adjunct Professor

Shu-Wei Sun, Loma Linda University

Program Overview

The Bioengineering Interdepartmental Graduate program (BIG) is the umbrella for graduate level research effort associated with the faculty in the Department of Bioengineering as well as other faculty at UCR who have an interest in training graduate students in bioengineering. The program offers graduate instruction leading to M.S. and Ph.D. degrees in Bioengineering.

Our interdisciplinary program combines a solid fundamental foundation in biological science and engineering, and aims to equip the students with diverse communication skills and training in the most advanced quantitative bioengineering research so that they can become leaders in their respective fields. The result is a rigorous, but exceptionally interactive and welcoming educational training for Bioengineering graduate students.

The interdepartmental aspect of the program allows students to develop skills related to bioengineering with faculty in a broad range of disciplines. The research vision is to build strength from experts in biochemistry, biophysics, biology and engineering to focus on critical themes that impact bioengineering.

Contributing departments include: Bioengineering, Biochemistry, Biomedical Sciences, Botany & Plant Sciences, Cell Biology & Neuroscience, Chemistry, Chemical & Environmental Engineering, Computer Science, Electrical and Computer Engineering, Entomology, Mechanical Engineering, Physics & Astronomy, and Psychology.

The dominant research themes of BIG are advanced techniques development, bioimaging, biophysics of cellular systems, biomaterials, drug design and delivery, tissue engineering, cellular control and regulation, and computational modeling of biological systems.

Other research areas include: high-throughput screening systems, structural bioinformatics, microfluidics, charge transfer in biological and biomimetic systems, immunophysics, auditory bioengineering, molecular mechanisms of platelets activation, fatty acid contributions to obesity and diabetes, brain imaging, and bioseparations.

Please visit the UCR website to determine the research emphasis of the various participating faculty. The research efforts of faculty in the Department of Bioengineering can be found at bioeng.ucr.edu.

Combined B.S. + M.S. Five-Year Program The college offers a combined B.S. + M.S. program in Bioengineering designed to lead to a Bachelor of Science degree as well as a Master of Science degree in five years. Applicants for this program must have a high school GPA above 3.6, a combined SAT Reasoning score above 1950 (or ACT plus Writing equivalent), complete the Entry Level Writing Requirement before matriculation, and have sufficient mathematics preparation to enroll in calculus in their first quarter as freshmen.

Interested students who are entering their junior year should check with their academic advisor for information on eligibility and other details.

Students in the B.S. + M.S. program may use units from their last two technical electives from their undergraduate course work towards their M.S. degree in addition to their B.S. degree. Students may not choose which technical elective units they will use. Only the last two courses will count. To transfer the units to the M.S. degree, students must see the department to submit the proper paperwork.

Admission In addition to the following requirements, all applicants must meet the general requirements as set forth in this catalog under the Graduate Studies section.

Application to the BIG program is limited to the fall quarter.

Applicants will need to have completed coursework in chemistry, physics, math, biochemistry and biology, and engineering. Students without an undergraduate engineering degree should have excellent training in mathematics and the physical sciences.

Specific recommendations for students without an undergraduate engineering degree are:

- Two years of mathematics (equivalent UCR course = MATH 009A, MATH 009B, MATH 009C, MATH 010A, MATH 010B).
- One year of physics (equivalent UCR course = PHYS 002A, PHYS 002B, PHYS 002C with lab).
- One year of inorganic chemistry including lab (equivalent UCR course = CHEM 001A, CHEM 001B, CHEM 001C).
- One year of organic chemistry including lab (equivalent UCR course = CHEM 112A, CHEM 112B, CHEM 112C).
- One course in biochemistry (equivalent UCR course = BCH 100 or BCH 110A or BCH 110B or BCH 110C).

- One course in molecular biology (equivalent UCR course = BCH 110C or BIOL 107).

Students with strong academic records may be admitted with limited coursework deficiencies, provided that these are satisfied by appropriate coursework taken during the first two years of graduate study.

Language Requirement All International students whose first language is not English must satisfactorily complete the SPEAK test.

Students may be admitted to either the Master's or the Ph.D. program. Students in the Master's program may petition for admission into the Ph.D. program.

Master's Program

The M.S. program is ideal for professionals seeking greater depth in several areas of bioengineering. The degree requires a minimum of 36 quarter credits and may be completed in three to four academic quarters of full-time study. Both thesis and non-thesis options are offered for the degree program (Plan I, Thesis and Plan II, Comprehensive Examination).

Student must request permission to pursue an M.S. in Bioengineering while simultaneously pursuing a Ph.D. in a program other than Bioengineering.

Normative Time to Degree Two years.

Plan I (Thesis)

In addition to the following requirements, all applicants must meet the requirements for Plan I as set forth in this catalog under the Graduate Studies section Master's Degree Plan I (Thesis).

Course Requirements Students must satisfy the core course requirements (see Core Courses). Students must enroll in BIEN 286, Colloquium in Bioengineering, each quarter it is offered.

Plan II (Comprehensive Examination)

This plan is designed primarily for students who do not intend to pursue a Ph.D. in Bioengineering.

In addition to the following requirements, all applicants must meet the requirements for Plan I as set forth in this catalog under the Graduate Studies section Master's Degree Plan II (Comprehensive Examination).

Course Requirements Students must satisfy the core course requirements (see Core Courses). Students must enroll in BIEN 286, Colloquium in Bioengineering, each quarter it is offered.

The comprehensive examination is prepared and administered by the Graduate Examination Committee. The student is allowed to choose between an oral and a written examination. The examination covers a broad range of topics chosen from upper division undergraduate courses and graduate courses taken by M.S. students.

Subsequent to the examination, the Graduate Examination Committee issues a passing or failing grade. Students who fail in the first attempt may retake the examination at the next scheduled comprehensive examination period. No more than two attempts to pass the exam are allowed.

The M.S. Comprehensive Examination may be held at the end of any quarters throughout the year. The committee to administer the M.S. Comprehensive Examination is selected by the Graduate Advisor and approved by the Graduate Program Committee.

Doctoral Program

The Ph.D. program is heavily integrated with research activities and is intended for well-qualified individuals who wish to pursue leadership careers in academic or industrial research. The Ph.D. program requires approximately three years of full-time study beyond the master's degree. In consultation with a faculty advisor, Ph.D. students plan their program of study.

The doctoral dissertation is based on original research in the field of specialization. An M.S. degree is not a prerequisite for entering the Ph.D. program.

The doctoral program includes a teaching requirement, an oral and written qualifying examination, and a dissertation.

Normative Time to Degree Five years.

Course Requirements Students must satisfy the core course requirements (see Core Courses). Students must enroll in BIEN 286, Colloquium in Bioengineering, each quarter it is offered.

Written Qualifying Examination Students in the Ph.D. program must pass a written qualifying examination that covers the fields of engineering and biology that relate to the student's dissertation project.

Oral Qualifying Examination Following successful completion of the written examination, candidates for the doctoral degree must pass an oral examination, normally within three quarters of the date of their written exam. The oral examination is scheduled only after the candidate has written a proposal detailing the rationale, specific aims and approaches to be undertaken for her/his dissertation research.

Dissertation A written dissertation is completed by each student.

Candidates for the degree of Ph.D. may be required to defend the dissertation in a public, oral presentation at a time announced to members of the University community.

Core Courses All BIG graduate students are required to take at least three courses from the following six Bioengineering courses. Other courses may be substituted but must be approved by the bioengineering graduate advisor. Students from non-engineering backgrounds are also required to take BIEN 264 as one of their core course requirements.

Bioengineering Core

1. BIEN 223 - Engineering Analysis of Physiological Systems
2. BIEN 224 - Cellular and Molecular Engineering
3. BIEN 245 - Optical Methods in Biology, Chemistry, and Engineering
4. BIEN 249 - Integration of Computational and Experimental Biology

5. BIEN 264 - Biotransport Phenomena

6. BIEN 270 - Transport with Reactions in Biological Systems

Other required courses:

1. One bioscience class chosen from: BCH 210, BCH 211, BCH 212, BIOL/CMDB 200, BIOL/CMDB 201, BIOL 203, BIOL 221/ MCBL 221/PLPA 226, or, with consent of instructor, BMSC 229, BMSC 230, BMSC 231, BMSC 232, BMSC 234, and BMSC 235.

2. Other courses may be substituted but must be approved by the Bioengineering Graduate Advisor.

3. BIEN 286 - Colloquium in Bioengineering
This course is required every quarter in which it is offered.

Additional courses may be required by the Advisory Committee depending on the student's background and fields of interest.

M.S. and Ph.D. students are expected to complete the course requirements for the programs within their first year of residence.

Course Descriptions All Bioengineering courses are listed and described under Bioengineering.

Biological Sciences

Subject abbreviation: BLSC

College of Natural and Agricultural Sciences

Raphael Zidovetzki, Ph.D., Lead Advisor
Program Office, 1223 Pierce Hall
(951) 827-3579

The Biological Sciences interdepartmental major is not currently accepting new students. For more information, contact CNAS Undergraduate Academic Advising Center, 1223 Pierce Hall, (951) 827-7294.

Biology

Professors

Michael F. Allen, Ph.D. (Biology/Plant Pathology)
Richard A. Cardullo, Ph.D.
Mark A. Chappell, Ph.D.
Daphne Fairbairn, Ph.D.
Theodore Garland, Jr., Ph.D.
Kimberly A. Hammond, Ph.D.
Cheryl Y. Hayashi, Ph.D.
Bradley C. Hyman, Ph.D.
Dmitri Maslov, Ph.D.
Leonard P. Nunney, Ph.D.
David N. Reznick, Ph.D.
Derek A. Roff, Ph.D.
Wendy G. Saltzman, Ph.D.
Mark S. Springer, Ph.D.

Professors Emeriti

Carlton R. Bovell, Ph.D.
Roger D. Farley, Ph.D.
Leah T. Haimo, Ph.D.
Wilbur W. Mayhew, Ph.D.
Edward G. Platzer, Ph.D. (Biology/Nematology)
Mary V. Price, Ph.D.
John T. Rotenberry, Ph.D.

Rodolfo Ruibal, Ph.D.
Clay A. Sassaman, Ph.D.
Irwin W. Sherman, Ph.D.
Nickolas M. Waser, Ph.D.

Associate Professors

John Gatesy, Ph.D.
Morris F. Maduro, Ph.D.
Helen M. Regan, Ph.D.
Joel L. Sachs, Ph.D.

Assistant Professors

Kurt Anderson, Ph.D.
Christopher Clark, Ph.D.
Timothy E. Higham, Ph.D.
Jonah Piovia-Scott, Ph.D.
**

Adjunct Faculty

Marlene Zuk, Ph.D.

Lecturer

Tracy L. Kahn, Ph.D.

Cooperating Faculty

Khaleel A. Razak, Ph.D. (Psychology)
Edith B. Allen, Ph.D. (Botany and Plant Sciences)
Emma Aronson, Ph.D. (Plant Pathology & Microbiology)
Ring T. Carde, Ph.D. (Entomology)
Matthew Daugherty, Ph.D. (Entomology)
Mary L. Droser, Ph.D. (Earth Sciences)
Norman C. Ellstrand, Ph.D. (Botany and Plant Sciences)
J. Daniel Hare, Ph.D. (Entomology)
John M. Heraty, Ph.D. (Entomology)
Nigel C. Hughes, Ph.D. (Earth Sciences)
Darrel Jenerette, Ph.D. (Botany and Plant Sciences)
Timothy D. Paine, Ph.D. (Entomology)
Richard A. Redak, Ph.D. (Entomology)
Louis Santiago, Ph.D. (Botany and Plant Sciences)
Jason Stajich, Ph.D. (Plant Pathology & Microbiology)
William E. Walton, Ph.D. (Entomology)
Bradley White, Ph.D. (Entomology)
Emma Wilson, Ph.D. (Plant Pathology & Microbiology)

Major

The Department of Biology offers B.A. and B.S. degrees in Biology. Both programs are based on the conviction that broad undergraduate training in biology, mathematics and the physical sciences, together with study in the humanities and social sciences, are fundamental to the education of a biologist. In addition to English composition, humanities, social sciences and the Life Sciences core curriculum (see below, Major Requirements), both degrees require 36 units of upper-division (numbered 100-199) biology courses. The degrees differ in the humanities and social sciences requirements; also 16 units of a foreign language are required for the B.A., whereas the B.S. requires 16 additional units in substantive courses in biology or related fields.

The research and teaching of the Department of Biology includes different levels (e.g., molecules, cells, organisms, populations, communities) and processes (e.g., development, evolution) of biological organization. An overview is presented in the introductory courses (BIOL 005A, BIOL 05LA, BIOL 005B, and BIOL 005C), and emphasis is placed on the unifying principles of the discipline.

Because of the diversity within biology and the wide range of career options, much latitude is allowed in selecting upper-division biology courses for the 36 units required for the major. Each student can select courses and plan a program of study to meet her/his specific

interests and career goals. For assistance with this, faculty advisors are available in the CNAS Academic Advising Center (1223 Pierce Hall, (951) 827-7294). The section below, Programs of Specialization, is provided as a guide for course selection for graduate schools, medical and health science professional schools and the broad range of careers that are possible with the Biology major.

The 36 upper-division units are selected from a list which includes courses offered by the Department of Biology (BIOL 100-199) and a limited number of courses in Biochemistry (BCH), and Cell Biology and Neuroscience (CBNS). Qualified undergraduates (GPA 3.0 or above) may participate in graduate-level biology seminar courses with consent of the instructor, and up to 4 units (with letter grade) may be included in the major.

Those who choose to obtain a B.S. degree have as a college requirement an additional 16 units in upper-division biology courses and/or substantive courses in a field or fields related to the major. The purpose of this related area is to add strength and breadth to the major and to meet specific requirements for postgraduate study or a chosen career. The substantive courses in fields related to the major may be lower or upper division, but they usually have science or mathematics prerequisites (e.g., CBNS 120/PSYC 120, CHEM 005, STAT 100A, STAT 100B, MATH 009C).

The Thomas Haider Program at the UCR School of Medicine

Students in the Biology major and all others at UCR are eligible to complete admission requirements and apply for up to 24 positions reserved for UCR students in the UCR School of Medicine. Students eligible to apply to this unique pathway into the UCR medical school, called the Thomas Haider Program at the UCR School of Medicine, are those who attend UCR for at least six consecutive quarters and complete their bachelor's degree at UCR. Information on this program and general admission to the UCR medical school is provided at medschool.ucr.edu, in the school's section of this catalog, in the medical school Student Affairs Office (1682A School of Medicine Education Building, (951) 827-4334), and at orientation meetings held at UCR.

University Requirements

See Undergraduate Studies section.

College Requirements

See College of Natural and Agricultural Sciences, Colleges and Programs section.

Major Requirements

Some of the following requirements for the major in Biology may also fulfill the College's breadth requirements. Consult with a department advisor for course planning.

- Life Sciences core curriculum (68-72 units)
 - BIOL 005A, BIOL 05LA, BIOL 005B, BIOL 005C
 - CHEM 001A, CHEM 001B, CHEM 001C, CHEM 011A, CHEM 011B, CHEM 011C
 - CHEM 112A, CHEM 112B, CHEM 112C

126 / Programs and Courses

- d) MATH 008B or MATH 009A, MATH 009B
- e) PHYS 002A, PHYS 002B, PHYS 002C, PHYS 02LA, PHYS 02LB, PHYS 02LC
- f) STAT 100A
- g) BCH 100 or BCH 110A

The core curriculum must be completed with a grade point average of 2.0 or better and no grade lower than "C-." If a grade of D or F is received in two core curriculum courses, either in separate courses or repetitions of the same course, the student will not be permitted to continue in the major.

2. Upper-division requirements (36 units)

- a) BIOL 102
- b) Thirty-two (32) additional Biology units to be taken in consultation with a faculty advisor

3. Other requirements

For the Bachelor of Arts only (0-16 units): The foreign language requirement may be fulfilled by completing level four or the demonstration of equivalent proficiency in one foreign language.

For the Bachelor of Science only (16 units): An additional 16 units in upper-division biology courses and/or substantive courses in a field or fields related to the major. A list of acceptable courses is available in the CNAS Academic Advising Center.

Programs of Specialization

The Life Sciences core curriculum (item 1 above) fulfills many of the requirements for admission to graduate schools in biology or professional schools in the medical and health science fields. In addition to Introductory Genetics (BIOL 102, 4 units), a wide choice is available for the remaining 32 upper-division units required for the Biology major (item 2.b) above) and the 16 additional units related to the field of the major (B.S. degree, item 3 above). Each student selects upper-division and related courses depending on the type of school and career chosen (e.g., education, medicine, pharmacy, dentistry, optometry, veterinary medicine, nursing, physical therapy, public health, graduate school in one of the fields below).

In planning an academic program to prepare for teaching or one of the medical fields, present and prospective Biology majors are referred to relevant topics in the Biological Sciences section of this catalog. That section has information for those planning to attend graduate school in education to obtain a teaching credential (subsection, Teaching Credential) and/or a master's or Ph.D. degree in education (subsection, Preparation for Graduate School). Also included are guidelines to help students select courses to prepare for admission to professional schools in the medical field (subsections, Medical Biology, Suggestions for Elective Units for Medical/Health Professions, Admission Requirements for Medical and Health Professional Schools). Additional information about required course work and admission tests (MCAT, OAT, VCAT, PCAT, GRE) can be obtained from Career

Services (Veitch Student Center) and the Health Professions Advising Center (visit 1114 Pierce Hall or hpac.ucr.edu).

Suggested courses of study are provided below for those interested in various biological fields. These programs meet most of the requirements for admission to corresponding graduate schools for those students who wish to pursue a master's and/or Ph.D. degree. The faculty advisor assists in selecting combinations of courses appropriate for advanced study in the fields below and others. Students considering graduate study are encouraged to do undergraduate research and take courses in computer science and statistics.

In some cases, a course of study differing substantially from the examples given below will best meet the needs of the student. In consultation with a faculty advisor, a student may prepare a program in some other biological specialization such as animal behavior, evolution/development or developmental biology.

Cell and Molecular Biology BIOL 102, BIOL 105, BIOL 107A, BIOL 107B, BIOL 109 or BIOL 153/BCH 153/BPSC 153, CBNS 101 or BIOL 113 and BIOL 114, BIOL 119, BIOL 121/MCBL 121, BIOL 121L/MCBL 121L, BIOL 122/MCBL 122, BIOL 123/MCBL 123/PLPA 123, BIOL 124/MCBL 124, BIOL 128/CBNS 128, BIOL 155/BPSC 155, BIOL 168, BCH 100 or the BCH 110A, BCH 110B, and BCH 110C sequence, BCH 102, CBNS 108, CBNS 150/ENTX 150, CHEM 005, CHEM 109, STAT 100A and STAT 100B

Ecology and Population Biology BIOL 102, BIOL 104/BPSC 104, BIOL 105, BIOL 108, BIOL 116, BIOL 116L, BIOL 117, BIOL 160, BIOL 160L, BIOL 174, either BIOL 175 or BIOL 143/BPSC 143, the MATH 008B or MATH 009A, MATH 009B, and MATH 009C sequence, STAT 100A and STAT 100B. Also recommended: BIOL 151, BIOL 161A, BIOL 163, BPSC 146, MATH 046, BIOL 165/BPSC 165, BIOL 166

Molecular Genetics BIOL 102, BIOL 105, BIOL 107A, BIOL 107B, BIOL 108, BIOL 109 or BIOL 153/BCH 153/BPSC 153, BIOL 115, BIOL 121/MCBL 121, BIOL 121L/MCBL 121L, BIOL 122/MCBL 122, BIOL 123/MCBL 123/PLPA 123, BIOL 128/CBNS 128, BIOL 155/BPSC 155, BIOL 168, CBNS 108, CBNS 150/ENTX 150, CBNS 169

Zoology and Physiology BIOL 100/ENTM 100, BIOL 102, BIOL 105, CBNS 101 or BIOL 113 and BIOL 114, BIOL 151, BIOL 152/GEO 152, BIOL 157, BIOL 159, BIOL 160, BIOL 160L, BIOL 161A, BIOL 161B, BIOL 162/ENTM 162, BIOL 168, BIOL 171, BIOL 171L, BIOL 173/ENTM 173, BIOL 174, BIOL 175, BIOL 178, BCH 100, CBNS 106, CBNS 108, CBNS 116, CBNS 169. Students are also encouraged to take laboratory courses (e.g., BCH 102). Also recommended: a course in ecology (e.g., BIOL 116, BIOL 116L), STAT 100A and STAT 100B

California Teach-Science/Mathematics Initiative (CaTEACH-SMI) California Teach-Science Mathematics Initiative (CaTEACH-SMI) has a goal of addressing the critical need of highly qualified K-12 science and mathematics

teachers in California. With an economy increasingly reliant on science, technology, engineering, and mathematics (STEM) and the anticipated large scale retirement of qualified teachers, this is an essential time to explore and prepare for a career in teaching science or mathematics.

CaTEACH-SMI at UCR offers undergraduate students paid/unpaid opportunities, such as the SMI & Alpha Center Apprentice Programs, to explore STEM teaching as a career option. Through CaTEACH-SMI, students receive advising and mentoring to prepare for entrance into an intern teaching credential program while diligently coordinating with academic advisors to ensure completion of STEM degree requirements. The CaTEACH-SMI Resource Center provides future STEM teachers with material and financial resources which includes the National Science Foundation (NSF) Noyce Scholarship Program to promote planning and professional development towards a science/mathematics education career.

For more information about the CaTEACH-SMI program, please visit smi.ucr.edu, the Resource Center at 1315 Pierce Hall, or on Facebook at [facebook.com/ScienceMathInitiativeAtUcr](https://www.facebook.com/ScienceMathInitiativeAtUcr).

Additional Curricular and Advising Information

This catalog has sections applicable for all students at UCR (Finances and Registration, Academic Regulations), and a specific section for students in this college (College of Natural and Agricultural Sciences). Present and prospective students are referred to those sections for enrollment policies and procedures and curricular and advising information for the campus and college.

For Biology majors, information regarding the following topics can be obtained from the CNAS Undergraduate Academic Advising Center in 1223 Pierce Hall:

- Student Academic Advising
- Grading Basis: Letter Grade or S/NC
- Full or Part-time Study
- Transfer Students
- Minor
- Double Major
- Internships
- Teaching Credential
- Preparation for Graduate School
- Suggestions for Elective Units for Medical/Health Professionals
- Admission Requirements for Medical and Health Professional Schools
- Education and Research Centers, Institutes and Resources

Independent Study and Research

The Department of Biology offers courses in which students can enroll to do independent laboratory research or an in-depth library study of a topic of special interest.

Students desiring to do Independent Reading (BIOL 194), Introduction to Research (BIOL 197) or Junior/Senior Research (BIOL 199) should consult with a professor who is willing to supervise the project. The student may suggest a specific question or formulate a project after consultation with the instructor. Information about the research fields of the professors is available at the CNAS Academic Advising Center (1223 Pierce Hall).

To enroll in these courses, the student must obtain an application form from the Biological Sciences Undergraduate Advising Center. Instructions for writing a brief description of the proposed project are provided with the form. The completed application, signed by the professor in charge of the project, is submitted to the advising center preferably before the first day of the quarter but no later than the end of the second week of the quarter.

Applicants for BIOL 194 and BIOL 199 should ordinarily be juniors or seniors with a GPA of 3.00 or higher. Sophomore students with a GPA of 3.00 or higher may apply to enroll in BIOL 197 (Introduction to Research), since the purpose of this course is to enable the student to do preliminary reading and laboratory research to explore with the professor the feasibility of undertaking a project for later enrollment in BIOL 199. Enrollment in BIOL 197 is not required before enrollment in BIOL 199, but the former course is available for those situations where preliminary work will be helpful.

For BIOL 194 and BIOL 199, the student writes a report of the library study or laboratory results for the quarter, which is reviewed by the sponsoring professor and submitted to the CNAS Academic Advising Center by the last day of instruction of the quarter.

BIOL 194, BIOL 197, and BIOL 199 are graded "S/NC", and up to 9 units of credit may be counted as part of the 16 substantive units related to the major for the B.S. degree.

Natural Reserve System

This system was formed by the UC in 1965 to preserve for study a series of undisturbed natural areas representing the state's vast ecological diversity. Since then the system has grown to include thirty-seven reserves, eight of them administered by the UCR campus. See Research Opportunities in this catalog.

Most of the reserves are undeveloped except for fencing, roads and trails, but laboratory facilities, housing and campgrounds for class use are available at some sites. The reserves are used as outdoor classrooms and laboratories by students, teachers and researchers from educational institutions, public and private, throughout the state, across the nation and around the world. Some of the courses offered by the UCR Department of Biology include field trips and overnight camping trips to the reserves. In the field, students are introduced to the great diversity of plant and animal organisms in Southern California, and to the effect of environmental factors on this diversity.

Undergraduate and graduate students who wish to use the reserves in their individual

research projects should contact Dr. Kim Hammond, Department of Biology, 3318 Spieth Hall, (951) 827-4767, to obtain an application, map and list of rules and regulations.

Graduate Program

The Department of Biology administers programs leading to the M.S. and Ph.D. degrees in Evolution, Ecology, and Organismal Biology, with specializations in Evolutionary Biology, Ecology, and Physiology and Biophysics.

Admission Applicants are strongly advised to contact potential faculty advisor prior to applying to the program. Applicants must submit GRE scores for the General Test (verbal, quantitative, and analytical). In addition, submission of the Subject Test score may improve chances of admission and is recommended.

All graduate students entering the department meet with a guidance committee during the first quarter of enrollment so that their educational background can be addressed. Considering the requirements of the student's specialization, the committee recommends a program of study to be followed in pursuit of graduate work. Because of the diversity among the specializations, course requirements for advanced degrees are specified by the student's guidance committee.

Doctoral Degree

The Department of Biology offers the Ph.D. degree in Evolution, Ecology, and Organismal Biology. In addition to the general requirements of the Graduate Division, students intending to become candidates for the Ph.D. degree in Evolution, Ecology, and Organismal Biology must complete the following.

Course Work Course requirements are determined in consideration of the requirements of the student's area of specialization. Selection of specific courses is done by the guidance committee in consultation with the student.

All students are required to take EEOB 400, at least one of EEOB 210, EEOB 216 or EEOB 217 and at least one other four-unit graduate level course from an approved list. Students also are required to take two current research topics courses (BIOL 252 or another disciplinary colloquium and EEOB 265) for a minimum of 5 quarters prior to advancement to candidacy and 12 quarters prior to completion of the doctoral degree.

Professional Development One unit of coursework in professional development, which is satisfied by EEOB 400.

Written and Oral Qualifying Examinations Students must pass a written examination in their specialized field of interest not later than the end of the second year of residence. Written Qualifying Examinations must be completed by the eighth week of the sixth quarter in residence. Upon successful completion of the Written Qualifying Examination, an Oral Qualifying Examination is administered wherein students defend a

proposal detailing the rationale, specific aims, and approaches to be undertaken for their proposed dissertation research.

Dissertation Candidates may be required to successfully defend their dissertation research in a public oral presentation.

Teaching Requirement Students must have at least one year of approved teaching experience.

Normative Time to Degree 18 quarters

Master's Degree

The Department of Biology offers the M.S. degree in Evolution, Ecology, and Organismal Biology, with specializations in Evolutionary Biology, Ecology, and Physiology & Biophysics. To qualify for the M.S. degree in Evolution, Ecology, and Organismal Biology, candidates must meet the requirements of the Department of Biology.

These requirements are as follows:

Plan I (Thesis) Thirty-six (36) quarter units of approved courses in the 100 or 200 series, of which at least 24 units must be in the 200 series courses in the biological sciences. Not more than 12 units of EEOB 299 may be applied to the degree. A minimum of 12 units of course work other than courses in the 290 series must be completed in fulfillment of the requirement for 24 units of graduate courses. Students must present an acceptable thesis and undergo a final oral examination in defense of the thesis.

Lower-Division Courses

BIOL 002 Cellular Basis of Life (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): none. An introduction to the fundamentals of life processes at the cellular level. Topics include cell structure, chemical composition, metabolism, reproduction, genetics, and development with emphasis on humans. Not recommended for natural science majors. Either BIOL 002 or BIOL 003 may be taken as a breadth requirement in biology; together they provide a general introduction to the field of biology. Credit is not awarded for BIOL 002 if it has already been awarded for BIOL 005A, BIOL 05LA or BIOL 020.

BIOL 003 Organisms in Their Environment (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): none. An introduction to the physiology, ecology, and evolution of living organisms with emphasis on humans. Not recommended for natural science majors. Either BIOL 002 or BIOL 003 may be taken as a breadth requirement in biology; together they provide a general introduction to the field of biology. Credit is not allowed for both BIOL 003 and BIOL 005B.

BIOL 005A Introduction to Cell and Molecular Biology (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 05LA (may be taken concurrently) or BIOL 020 (may be taken concurrently) with grades of "C-" or better; CHEM 001A and CHEM 01LA with grades of "C-" or better or CHEM 01HA and CHEM 1HLA with grades of "C-" or better; consent of instructor is required for students repeating the course. An intensive course designed to prepare for upper-division courses in cell and molecular biology. Covers biochemical, structural, metabolic, and genetic aspects of cells. Required for Biology majors; recommended for science majors desiring an introduction to biology. Credit is not awarded for BIOL 005A if it has already been awarded for BIOL 002.

BIOL 005B Introduction to Organismal Biology (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s):

BIOL 005A and BIOL 05LA or BIOL 020 with grades of "C-" or better; CHEM 001A or CHEM 01HA; CHEM 001B or CHEM 01HB; consent of instructor is required for students repeating the course. An intensive course designed to prepare for upper-division courses in organismal biology. Covers developmental biology, physiology, and regulation at the level of the organism. Required for Biology majors; recommended for science majors desiring an introduction to biology. Credit is awarded for only one of BIOL 003 or BIOL 005B.

BIOL 005C Introductory Evolution and Ecology (4)

Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): BIOL 005A, BIOL 020 or BIOL 05LA, and BIOL 005B (or BIOL 002 and BIOL 003 for non-biology majors) with grades of "C-" or better; MATH 008B with a grade of "C-" or better or MATH 009A with a grade of "C-" or better or equivalent; consent of instructor is required for students repeating the course. An intensive introduction to the subjects of evolution and ecology. Covers population dynamics, community ecology, population genetics, and evolutionary theory. Recommended for science majors desiring an introduction to biology. Students who take equivalent first-year biology at another institution may enter directly into BIOL 005C without critical handicap.

BIOL 010 Headlines in the History of Life (4)

Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): none. Evolution of life beginning with precellular life. Topics include the origin of sex; multicellularity; vertebrate classes; morphological specializations; adaptive radiations; extinction dynamics; and the biology of dinosaurs. Cross-listed with GEO 003.

BIOL 020 Dynamic Genome (2) F

Laboratory, 6 hours. Prerequisite(s): CHEM 001A or CHEM 01HA, MATH 008B or MATH 009A (may be taken concurrently); freshman standing. Introduces computational and experimental approaches in investigating the genomes of plants and animals. Explores scientific discovery using the tools of bioinformatics and genomics. Includes participation in research projects being conducted on campus. Credit is not awarded for BIOL 020 if it has already been awarded for BIOL 002 or BIOL 05LA.

Wessler

BIOL 030 Human Reproduction and Sexual Behavior (4)

Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. A consideration of human anatomy, physiology and behavior as related to sexual reproduction, including discussion of fertility, pregnancy, childbirth and birth control. Consideration will also be given to homosexuality, venereal diseases, sex education, sexual intercourse and response.

BIOL 034 Human Heredity and Evolution (4)

Lecture, 3 hours; discussion and problem solving, 1 hour; audio-visual aids plus discussion, 1 hour. Basic human genetics and evolution, emphasizing their relationship to physical and emotional health. Political, philosophical and ethical implications of human heredity and evolution.

BIOL 040 Disease and History: From the Bubonic Plague to AIDS (4)

Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. This lecture course for nonscience majors will deal with the natural history of infectious diseases and how plagues have influenced the course of human history. It will cover the biology, pathology, epidemiology, and immunology of viruses, bacteria, and protozoan parasites causing smallpox, yellow fever, influenza, AIDS, syphilis, bubonic plague, tuberculosis, leprosy, malaria, and African sleeping sickness. The role of scientific inquiry in the conquest of human disease will be emphasized.

BIOL 05LA Introduction to Cell and Molecular Biology Laboratory (1)

Laboratory, 3 hours. Prerequisite(s): BIOL 005A (may be taken concurrently); consent of instructor is required for students repeating the course. An introduction to laboratory exercises on fundamental principles of and techniques in cell and molecular biology. Illustrates the experimental

foundations of the topics covered in BIOL 005A. Credit is not awarded for BIOL 05LA if it has already been awarded for BIOL 002 or BIOL 020.

Upper-Division Courses

BIOL 100 General Entomology (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): BIOL 005B, BIOL 005C, or equivalents; or consent of instructor. Introductory study of insects, Earth's most diverse group of animals (75 percent of animal species are insects). Lecture covers the anatomy, physiology, ecology, behavior, and diversity of insects. Laboratory focuses on insect identification. Cross-listed with ENTM 100.

BIOL 102 Introductory Genetics (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 020 or BIOL 05LA, and BIOL 005B with grades of "C-" or better. An introductory course that includes classical Mendelian genetics, linkage and recombination, sex-linked traits, cytogenetics, developmental genetics, and molecular genetics. Also includes some probability theory and statistics.

BIOL 104 Foundations of Plant Biology (4)

Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): BIOL 005C. A study of the plant world from cells to ecosystems. Examines the structure and function of organisms from the major plant groups and their role in the biosphere. The laboratory explores the unique properties of plants. Cross-listed with BPSC 104.

BIOL 105 Evolution (4)

Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005C with a grade of "C-" or better, BIOL 102, CHEM 112C, MATH 009B or MATH 09HB, PHYS 002C, PHYS 02LC, BCH 100 or BCH 110A, one course in statistics; or consent of instructor. Covers the causal interpretation of organic diversity and adaptation. Topics include inference of evolutionary change from the fossil record and from genomic and molecular patterns; microevolution and macroevolution; systematics and the species problem; and natural selection, drift, and other forces of evolution.

BIOL 106 Biology of Human Variation (4)

Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 102; BIOL 105 or BIOL 108; STAT 100B (STAT 100B may be taken concurrently); or consent of instructor. A survey of variation within and among contemporary human populations arising from genetic and environmental factors. Covers single-locus and polygenic inheritance, developmental plasticity, and physiological acclimatization. Includes biogeographic and demographic influences; variation in pigmentation, stature, physiology, disease susceptibility, behavior, and IQ; and critical evaluation of racial and ethnic classifications.

BIOL 107A Molecular Biology (4)

Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 005B, BIOL 005C; CHEM 001C or CHEM 01HC; CHEM 112C; MATH 009B or MATH 09HB; PHYS 002C, PHYS 02LC; BCH 100 or BCH 110A. The study of the structure and function of the genetic material, including DNA structure, DNA replication and recombination, regulation of gene expression, and protein synthesis. Examines both prokaryotic and eukaryotic systems including contemporary recombinant DNA technology and applications of molecular cloning procedures.

BIOL 107B Advanced Molecular Biology (3)

Lecture, 2 hours; discussion, 1 hour. Prerequisite(s): BIOL 107A or BCH 110C or equivalents. An advanced treatment of the functional architecture of genetic material. Topics include genome structure and chromosome organization, DNA replication and gene expression, cloning organisms, molecular medicine, protein engineering, and application of modern molecular biology to agricultural problems. Coverage of each topic includes discussion of the impact of the emergent molecular technology on society.

BIOL 108 Introductory Population Genetics (4)

Lecture, 3 hours; discussion and demonstration, 1 hour. Prerequisite(s): BIOL 005A, BIOL 005B, BIOL 005C, CHEM 001C or CHEM 01HC, CHEM 112C, MATH 009B or MATH 09HB, PHYS 002C, PHYS 02LC, one course in statistics. A study of the factors influencing the genetic structure of natural populations. Topics discussed include the incidence of genetic disease, inbreeding, conservation genetics, molecular evolution, adaptation in a changing environment, and how natural selection acts at different levels of organization.

BIOL 110 Biology of Human Problems (4)

Seminar, 4 hours. Prerequisite(s): BIOL 005A, BIOL 005B, BIOL 005C; CHEM 001C or CHEM 01HC; CHEM 112C; MATH 009B or MATH 09HB; PHYS 002C, PHYS 02LC; BCH 100 or BCH 110A; one course in statistics. Devoted to selected human problems that have a large biological component and relate to medicine, ethics, and human existence. Topics covered vary from year to year and include issues of major bioethical importance such as euthanasia, national health care, effects of industrial pollution on individuals and communities, population problems, abortion, and genetic engineering.

BIOL 111 Infectious Disease Epidemiology (4) S

Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 005B, and BIOL 005C with a grade of "C-" or better, BIOL 102 with a grade of "C-" or better, STAT 100A or equivalent (or consent of instructor) with a grade of "C-" or better. Introduces epidemiological methods used to investigate infectious diseases. Includes examples and case studies presented for a variety of human infectious diseases.

BIOL 112 Systematics (4)

Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005C or equivalent. Principles and philosophy of classification: phylogenetic and phenetic methods, species concepts, taxonomic characters, evolution, hierarchy of categories, and nomenclature. Cross-listed with BPSC 112 and ENTM 112.

BIOL 113 Advanced Cell Biology: Membranes, Organelles, and the Cytoskeleton (4)

Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 005B, BIOL 005C, BIOL 102, CHEM 001C or CHEM 01HC, CHEM 112C, MATH 009B or MATH 09HB, PHYS 002C, PHYS 02LC, BCH 100 or BCH 110A, one course in statistics. An examination of the organization, function, and behavior of eukaryotic cells. Topics include membrane systems, protein targeting, the cytoskeleton, motility, and cell division. Emphasis is on the experiments that form the basis of the current understanding of the cell. Students read original journal articles, an analysis of which is the focus of the discussion section.

BIOL 114 Advanced Cell Biology: Cellular Reproduction and Signaling (4)

Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 005B, BIOL 005C, BIOL 102, CHEM 001C or CHEM 01HC, CHEM 112C, MATH 009B or MATH 09HB, PHYS 002C, PHYS 02LC, BCH 100 or BCH 110A, one course in statistics. An examination of the organization, function, and behavior of eukaryotic cells. Explores the molecular mechanisms used by cells to control reproduction, growth, and responses to extracellular signals. Emphasis is on experiments that form the basis of the current understanding of the cell. Students read original journal articles, an analysis of which is the focus of the discussion section.

BIOL 116 Ecology and Conservation Biology (4)

Lecture, 3 hours; discussion, 1 hour; field, 9 hours per quarter. Prerequisite(s): BIOL 005C with a grade of "C-" or better, CHEM 001C (or CHEM 01HC), MATH 009B (or MATH 09HB); or consent of instructor. Introduces principles of ecology with emphasis on implications for the conservation of biodiversity. Topics include physiological ecology, organismal adaptations to the environment, life histories, the niche concept,

population growth, interspecific interactions, and the structure and functioning of communities and ecosystems. Also covers topics in applied ecology and conservation biology.

BIOL 118 Laboratory in Molecular Phylogenetics and Evolution (4) Lecture, 2 hours; discussion, 1 hour; laboratory, 3 hours. Prerequisite(s): BCH 100 or BCH 110A, BIOL 005C with a grade of "C-" or better, CHEM 112C, MATH 009B or MATH 09HB, PHYS 002C, PHYS 02LC, STAT 100A; or consent of instructor. Covers theory, techniques, and analytical methods for interpreting patterns of molecular evolution and phylogeny. Explores the comparative analysis of DNA and tests of evolutionary hypotheses using modern computational methods. Includes polymerase chain reaction (PCR), cloning, gel electrophoresis, and restriction site analysis.

BIOL 119 Introduction to Genomics and Bioinformatics (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005C with a grade of "C-" or better, BIOL 102, CHEM 001C or CHEM 01HC, CHEM 112C, MATH 009B or MATH 09HB, PHYS 002C, PHYS 02LC, BCH 100 or BCH 110A, one course in statistics. An introduction to the science of genomics and bioinformatics. Includes genome sequencing; database techniques; structural, comparative, and evolutionary genomics; and microarray analysis.

BIOL 120 Introduction to Plant Pathology (3) Lecture, 3 hours. Prerequisite(s): BIOL 005A, BIOL 05LA, BIOL 005B, BIOL 005C, CHEM 001C or CHEM 01HC, CHEM 112C, MATH 009B or MATH 09HB, PHYS 002C, PHYS 02LC, BCH 100 or BCH 110A, one course in statistics; or consent of instructor. An introduction to the study of plant diseases. Topics include diseases and disease-causing agents, host-pathogen interaction during disease development, and strategies for disease management. An optional, separate laboratory is offered. Cross-listed with MCBL 120 and PLPA 120.

BIOL 120L Introduction to Plant Pathology Laboratory (1) Laboratory, 4 hours. Prerequisite(s): BIOL 005A, BIOL 005B; concurrent enrollment in BIOL 120/MCBL 120/PLPA 120 or consent of instructor; BIOL 121/MCBL 121 and BIOL 124/MCBL 124 recommended. Covers fundamentals in the use of laboratory instruments and techniques for the detection, isolation, and identification of representative infectious agents that cause disease in plants. Cross-listed with MCBL 120L and PLPA 120L.

BIOL 121 Introductory Microbiology (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 05LA, BIOL 005B, BIOL 005C, CHEM 001C or CHEM 01HC, CHEM 112C, MATH 009B or MATH 09HB, PHYS 002C, PHYS 02LC, BCH 100 or BCH 110A (BCH 100 or BCH 110A may be taken concurrently); or consent of instructor. An intensive introduction to the fundamental physiology and molecular biology of bacteria and viruses. Covers evolutionary origins of metabolic diversity, bacterial and viral molecular genetics, and an introduction to microbial pathogenesis. Cross-listed with MCBL 121.

BIOL 121L Microbiology Laboratory (3) Lecture, 1 hour; laboratory, 6 hours. Prerequisite(s): BIOL 121/MCBL 121 with a grade of "C-" or better. Laboratory exercises in diagnostic bacteriology, basic virology, and epidemiology. Includes fundamental quantitative and diagnostic microbiological procedures, basic mechanisms of microbial genetic exchange, and a project examining bacterial epidemiology. Cross-listed with MCBL 121L.

BIOL 122 Food Microbiology (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 121/MCBL 121 with a grade of "C-" or better; BIOL 121L/MCBL 121L. Covers spoilage and preservation of food; food quality and indicator organisms; the role of microorganisms in the production of dairy goods and fermented beverages; food-borne pathogens and microbiological

production of toxins; and classical and modern molecular methods for detection of food microorganisms. Cross-listed with MCBL 122.

BIOL 123 Introduction to Comparative Virology (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 05LA, BIOL 005B, BIOL 005C, CHEM 001C or CHEM 01HC, CHEM 112C, MATH 009B or MATH 09HB, PHYS 002C, PHYS 02LC, BCH 100 or BCH 110A, one course in statistics; or consent of instructor. Considers viruses as infectious agents of bacteria, plants, and animals (vertebrates and invertebrates). Compares the major groups of viruses to each other with respect to their biological and biochemical properties, molecular and genetic characteristics, and modes of replication. Cross-listed with MCBL 123 and PLPA 123.

BIOL 124 Pathogenic Microbiology (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 121/MCBL 121 with a grade of "C-" or better or consent of instructor. An intensive introduction to the fundamental physiology and molecular biology of bacteria and viruses. Covers research strategies for examining microbial pathogenic mechanisms. Cross-listed with MCBL 124.

BIOL 127 Insect Ecology (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 05LA, BIOL 005B, BIOL 005C, CHEM 001C or CHEM 01HC, CHEM 112C, MATH 009B or MATH 09HB, PHYS 002C, PHYS 02LC, BCH 100 or BCH 110A, one course in statistics; or consent of instructor. Introduces principles of insect ecology with examples emphasizing the Arthropoda. Topics include factors governing population growth; ecological and evolutionary interactions with hosts, competitors, and natural enemies; structure of ecological communities; and adaptations to different environments. Cross-listed with ENTM 127.

BIOL 128 Immunology (3) Lecture, 3 hours. Prerequisite(s): BIOL 005C; PHYS 002C; PHYS 02LC; BCH 100 or BCH 110A. A study of humoral and cellular immunology. Topics include lymphoid systems, cells, antigens, antibodies, antibody formation, cellular immunity, and tumor and transplantation immunology. Diseases and altered immune states associated with each topic are discussed in detail. Cross-listed with CBNS 128.

BIOL 132 Plant Anatomy (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): BIOL 005A and BIOL 005B, or consent of instructor. Functional and developmental aspects of plant cell, tissue, and organ structure. Covers all aspects of the flowering plant life cycle from germination to pollination and fruit and seed development. Cross-listed with BPSC 132.

BIOL 134 Introduction to Mycology (3) Lecture, 3 hours. Prerequisite(s): BIOL 005A, BIOL 05LA, BIOL 005B, BIOL 005C, CHEM 001C or CHEM 01HC, CHEM 112C, MATH 009B or MATH 09HB, PHYS 002C, PHYS 02LC, BCH 100 or BCH 110A, one course in statistics; or consent of instructor. Introduction to the morphology, taxonomy, genetics, physiology, ecology, and economic importance of the major groups of the fungi. Cross-listed with PLPA 134.

BIOL 134L Introduction to Mycology Laboratory (1) Laboratory, 3 hours. Prerequisite(s): BIOL 005A, BIOL 005B, BIOL 005C, or equivalents; concurrent enrollment in BIOL 134/PLPA 134; or consent of instructor. Introduces fundamentals in the use of laboratory instruments and techniques for the isolation, cultivation, and identification of representatives of the major taxa of fungi. Cross-listed with PLPA 134L.

BIOL 138 Plant Developmental Morphology (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): BIOL 005B, BIOL 005C, CHEM 112C, BCH 100 or BCH 110A (BCH 100 or BCH 110A may be taken concurrently), PHYS 002C, PHYS 002LC; or consent of instructor. Introduces the key areas of research in

plant morphology and developmental biology. Emphasizes flowering plants (angiosperms). Cross-listed with BPSC 138.

BIOL 143 Plant Physiology (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): BIOL 005A, BIOL 005B, BIOL 005C, CHEM 001C or CHEM 01HC, CHEM 112C, MATH 009B or MATH 09HB, PHYS 002C, PHYS 02LC, BCH 100 or BCH 110A (BCH 100 or BCH 110A may be taken concurrently), BIOL 104/BPSC 104; or consent of instructor. A survey of the fundamental principles of plant physiology including photosynthesis, respiration, water relations, mineral nutrition, growth, morphogenesis, plant hormones, dormancy, and senescence. Cross-listed with BPSC 143.

BIOL 148 Quantitative Genetics (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 05LA, BIOL 005B, BIOL 005C, BIOL 102, CHEM 001C or CHEM 01HC, CHEM 112C, MATH 009B or MATH 09HB, PHYS 002C, PHYS 02LC, BCH 100 or BCH 110A, STAT 100B; or consent of instructor. Examines approaches to studying the genetic basis of polygenic, metric traits. Includes types of gene action, partitioning of variance, response to selection, and inferring the number and location of quantitative trait loci. Cross-listed with BPSC 148.

BIOL 151 Invertebrate Zoology (5) Lecture, 3 hours; discussion, 1 hour; laboratory, 3 hours. Prerequisite(s): BIOL 005A, BIOL 005B, BIOL 005C, PHYS 002A with grades of "C-" or better. Structure, classification, and biology of the invertebrates.

BIOL 152 Principles of Invertebrate Paleobiology and Paleocology (4) Lecture, 2 hours; laboratory, 3 hours; three 1-day field trips. Prerequisite(s): BIOL 005C with a grade of "C-" or better or BIOL 010/GEO 003 with a grade of "C-" or better. Topics include evolution and the fossil record, paleocology, classification theory, the nature of adaptive radiations, and extinctions. Cross-listed with GEO 152.

BIOL 153 Plant Genomics and Biotechnology Laboratory (4) F, Even Years Lecture, 1 hour; discussion, 1 hour; laboratory, 6 hours. Prerequisite(s): BCH 110C or BIOL 107A; upper-division standing; consent of instructor. A study of modern techniques in plant genome modification. Topics include nucleic acid cloning and sequencing; plant tissue culture and genetic transformation; controlled-environment plant growth; gene mapping; and germplasm collections. Also explores the history of plant biotechnology; economic, agricultural, nutritional, medicinal, and societal relevance; and regulatory issues. Cross-listed with BCH 153 and BPSC 153.

BIOL 155 Chromosomes (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 005B, BIOL 005C, CHEM 001C or CHEM 01HC, CHEM 112C, MATH 009B or MATH 09HB, PHYS 002C, PHYS 02LC, BCH 100 or BCH 110A (BCH 100 or BCH 110A may be taken concurrently); or consent of instructor. An examination of the structure, function, and behavior of eukaryotic chromosomes. Cross-listed with BPSC 155.

BIOL 157 Parasitology (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 005B, BIOL 005C, CHEM 001C or CHEM 01HC, CHEM 112C, MATH 009B or MATH 09HB, BCH 100 or BCH 110A, one course in statistics. Surveys the biology of protozoan and helminth interactions with their human hosts.

BIOL 158 Medical Molecular Parasitology (4) Lecture, 3 hours; seminar, 1.5 hours. Prerequisite(s): BCH 110C or BIOL 107A. An overview of genome organization and gene expression, with aspects of biochemistry, evolution, natural history, and clinical manifestations of human parasites *Trypanosoma*, *Leishmania*, *Plasmodium*, and others. Emphasizes the molecular and biochemical adaptations to parasitism. Prior

130 / Programs and Courses

knowledge of classical parasitology is not assumed. Students present original research papers during the seminar.

BIOL 159 Biology of Nematodes (3) Lecture, 2 hours; discussion and demonstration, 1 hour. Prerequisite(s): BIOL 005A, BIOL 005B, BIOL 005C, CHEM 001C or CHEM 01HC, CHEM 112C, MATH 009B or MATH 09HB, PHYS 002C, PHYS 02LC, BCH 100 or BCH 110A, one course in statistics. An introduction to the biology of nematodes. Topics include the morphology, physiology, development, genetics, behavior, and ecology of nematodes from parasitic and free-living habitats. In the discussion and demonstration section, students observe the comparative morphology and biology of nematodes and give oral presentations on selected nematode life histories. Cross-listed with NEM 159.

BIOL 160 Animal Behavior (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 005B, BIOL 005C, and BIOL 102 with grades of "C-" or better, CHEM 001C or CHEM 01HC, CHEM 112C, MATH 009B or MATH 09HB, PHYS 002C, PHYS 02LC, BCH 100 or BCH 110A, one course in statistics. An examination of behavior from an evolutionary and ecological perspective. Topics include the inheritance of behavior, evolution of communication and displays, migration and habitat selection, foraging ecology, mating systems, and the evolution of social behavior.

BIOL 160L Laboratory in Animal Behavior (1) Laboratory, 4 hours. Prerequisite(s): BIOL 160 (may be taken concurrently). Laboratory and field exercises in animal behavior. Covers topics such as foraging behavior, aggression, and territoriality.

BIOL 161A Functional Anatomy of the Vertebrates (5) Lecture, 3 hours; discussion, 1 hour; laboratory, 3 hours. Prerequisite(s): BIOL 005A, BIOL 005B, BIOL 005C, CHEM 001C or CHEM 01HC, CHEM 112A, MATH 009B or MATH 09HB, PHYS 002A, and one course in statistics with grades of "C-" or better. A study of the functional anatomy of vertebrates including humans. Examines each organ system from a developmental and evolutionary perspective. Topics include phylogeny, the skeleton, muscles, and the nervous system. BIOL 161A, BIOL 161B, BIOL 171, and BIOL 171L provide a one-year sequence in vertebrate and human anatomy and physiology. Recommended for sophomores and juniors.

BIOL 161B Functional Anatomy of the Vertebrates (5) Lecture, 3 hours; discussion, 1 hour; laboratory, 3 hours. Prerequisite(s): BIOL 161A, CHEM 112B, and PHYS 002B with grades of "C-" or better. A study of the functional anatomy of vertebrates, including humans. Examines each organ system from a developmental and evolutionary perspective. Topics include circulation, sense organs, the integument, and the respiratory, digestive, and urogenital systems. BIOL 161A, BIOL 161B, BIOL 171, and BIOL 171L provide a one-year sequence in vertebrate and human anatomy and physiology. Recommended for sophomores and juniors.

BIOL 162 Insect Behavior (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 005B, BIOL 005C; or BIOL 100 /ENTM 100; or consent of instructor. An analysis of the mechanisms that cause and control behavioral reactions of insects. Emphasizes ethological and physiological knowledge concerning orientation mechanisms, communication systems, learning, and the role of the nervous system in integrating behavior in insects. Cross-listed with ENTM 162.

BIOL 163 Evolutionary Ecology of Terrestrial Vertebrates (5) Lecture, 3 hours; discussion, 1 hour; laboratory, 3 hours. Prerequisite(s): BIOL 005A, BIOL 005B, BIOL 005C, CHEM 001C or CHEM 01HC, CHEM 112C, MATH 009B or MATH 09HB, PHYS 002C, PHYS 02LC, BCH 100 or BCH 110A, one

course in statistics. Topics include ecology, evolution, and behavior of birds, mammals, reptiles, and amphibians. Laboratory covers systematics, morphology, and identification, and includes field trips to local habitats.

BIOL 165 Restoration Ecology (4) Lecture, 3 hours; two 1-day field trips; three half-day field trips. Prerequisite(s): BIOL 104/BPSC 104 or BIOL 116 or ENSC 100; CHEM 112A; STAT 100A (STAT 100A may be taken concurrently); or consent of instructor. BIOL 102 and CHEM 112C are recommended. An examination of the basic ecological principles related to land restoration. Topics include enhanced succession, plant establishment, plant adaptations, ecotypes, weed colonization and competition, nutrient cycling, functions and reintroduction of soil microorganisms, restoration for wildlife, and the determination of successful restoration. Includes field trips to restored sites. Cross-listed with BPSC 165.

BIOL 168 Developmental Biology (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BCH 110C or BIOL 107A; a course in cell biology is recommended. An advanced description of the embryonic development of animals. Covers the basic concepts of fertilization, gastrulation, and neurulation. Analyzes topics in current developmental research, with an emphasis on the molecular mechanisms of pattern formation and differentiation.

BIOL 171 Human Anatomy and Physiology (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 161A; CHEM 112C; MATH 009B or MATH 09HB; PHYS 002C; PHYS 02LC; BCH 100 or BCH 110A; one course in statistics; concurrent enrollment in BIOL 171L is recommended. An analysis of cell, tissue, and organ structure and function in normal and diseased conditions. Topics include the musculoskeletal, circulatory, and autonomic nervous systems; glands and hormones; body fluids and the kidney; digestion and absorption; and pharmacology and hematology. BIOL 161A, BIOL 161B, BIOL 171, and BIOL 171L provide a one-year sequence in vertebrate and human anatomy and physiology.

BIOL 171L Human Anatomy and Physiology Laboratory (1) Laboratory, 3 hours. Prerequisite(s): BIOL 161A (may be taken concurrently), CHEM 112C, MATH 009B or MATH 09HB, PHYS 002C, PHYS 02LC, BCH 100 or BCH 110A, one course in statistics; BIOL 161B is recommended; concurrent enrollment in BIOL 171. Involves laboratory experiments in physiology and study of human anatomy and histology (normal and diseased). Covers experimentation, data collection, and analysis that incorporates hematology, blood proteins, urinalysis, neuromuscular control, cardiac excitation and pharmacology, blood pressure, electrocardiography, and electroencephalography. BIOL 161A, BIOL 161B, BIOL 171, and BIOL 171L provide a one-year sequence in vertebrate and human anatomy and physiology.

BIOL 173 Insect Physiology (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): BIOL 005A and BIOL 005B or equivalents; CHEM 112A, CHEM 112B, CHEM 112C or equivalents; or consent of instructor. Introduction to principles of insect physiology. Subjects include growth, development and hormones, cuticle, nervous system, circulation, respiration, digestion, nutrition, excretion, reproduction, water balance, and temperature relations. Prior knowledge of insects is not assumed. Cross-listed with ENTM 173.

BIOL 174 Ecological and Evolutionary Physiology (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 005B, BIOL 005C, CHEM 001C or CHEM 01HC, CHEM 112C, MATH 009B or MATH 09HB, PHYS 002C, PHYS 02LC, BCH 100 or BCH 110A, one course in statistics. Examines the interactions between organisms and their environments, emphasizing coadaptation of physiological, morphological, and behavioral phenotypes. Includes allometry and scaling, metabolism and locomotion, heat and water exchange, evolution of endothermy,

artificial selection experiments, and phylogenetically based statistical methods.

BIOL 175 Comparative Animal Physiology (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 005B, BIOL 005C, BIOL 161A, CHEM 001C or CHEM 01HC, CHEM 112C, MATH 009B or MATH 09HB, PHYS 002C, PHYS 02LC, BCH 100 or BCH 110A, STAT 100A; recommended: BIOL 151 and BIOL 161B. Topics include nutrition and energy metabolism, gas exchange, circulation, and regulation of body fluid composition.

BIOL 176 Comparative Biomechanics (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005C; PHYS 002C or PHYS 040C; BCH 100 or BCH 110A. Applies principles from physics and engineering to the study of the relationship between organismal form and function. Covers examples from diverse plant and animal systems. Includes fundamental properties of solids and fluids, viscoelasticity, drag, biological pumps, locomotion, and muscle mechanics.

BIOL 178 Hormones and Behavior (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 005B, BIOL 005C, CHEM 001C or CHEM 01HC, CHEM 112C, MATH 009B or MATH 09HB, PHYS 002C, PHYS 02LC, BCH 100 or BCH 110A, one course in statistics. An examination of the interactions between hormones and behavior in animals, including humans. Provides an overview of endocrine physiology, and examines the roles of hormones in sexual differentiation, sex differences in behavior, sexual behavior, parental behavior, affiliation, aggression, stress, and mood.

BIOL 190 Special Studies (1-4) Individual study, 3-12 hours. Prerequisite(s): consent of instructor and departmental chairperson. To be taken as a means of meeting special curricular needs. Grading basis to be selected in consultation with the instructor and departmental chairperson. Course is repeatable.

BIOL 191 Seminar in Biology (2-4) Seminar, 2-4 hours. Prerequisite(s): upper-division standing; consent of instructor. A critical study of selected topics in biology. Course is repeatable.

BIOL 194 Independent Reading (1-4) Consultation, 1-4 hours. Prerequisite(s): junior or senior standing and consent of instructor and departmental chairperson. Independent study under faculty supervision. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 4 units.

BIOL 197 Introduction to Research (1-2) Consultation, 1-2 hours. Prerequisite(s): sophomore, junior or senior standing and consent of instructor and departmental chairperson. Reading, planning and preliminary laboratory work to develop a research project suitable for BIOL 199, Junior/Senior Research. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

BIOL 199 Junior/Senior Research (1-4) Laboratory, 1-4 hours. Prerequisite(s): junior or senior standing, a minimum GPA of 3.0 and consent of instructor and departmental chairperson. Special problems and research in biology performed under the supervision of members of the faculty of the Department of Biology. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Graduate Courses

BIOL 200 Cell Biology (4) Lecture, 3 hours; seminar, 1 hour. Prerequisite(s): BCH 110A or BCH 110B or equivalent (may be taken concurrently); BIOL 102 or equivalent; BIOL 113 or BIOL 114 or CBNS 101 or equivalent. An examination of the structure and function of eukaryotic cells and their components with emphasis on the key experiments that provide the foundation for our current knowledge. Covers topics such as cell membranes, intracellular trafficking, cell-to-cell interactions, motility, and the cytoskeleton. Cross-listed with CMDB 200.

BIOL 201 Molecular Biology (4) Lecture, 3 hours; seminar, 1 hour. Prerequisite(s): BCH 110A or BCH 110B or equivalent (may be taken concurrently); BIOL 102 or equivalent; BIOL 107A or equivalent. Covers the structure and inheritance of genetic material, the regulation of gene expression at the cellular and molecular level including molecular mechanisms for regulation of gene transcription, posttranscriptional regulation at the level of messenger RNA stability, processing, editing and translation, methods for gene mapping, and positional cloning. Cross-listed with CMDB 201.

BIOL 203 Cellular Biophysics (3) Lecture, 3 hours. Prerequisite(s): BIOL 200/CMDB 200; BIOL 201/CMDB 201; CHEM 109 or equivalent; or consent of instructor. Biophysical principles that determine cellular structure and function including diffusion, electrochemical gradients, transport, macromolecular interactions, and genetic recombination. Illustrative examples are used to highlight the importance of these principles in modern cell biology and physiology.

BIOL 221 Microbial Genetics (4) W Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BCH 110C or BIOL 107A; BIOL 102. In-depth coverage of the genetics of microbes. Emphasizes the primary data and the foundation of modern techniques using viruses, archae, prokaryotes, and eukaryotes. Includes genome sequences and organization, plasmids and other vectors, and mutation and genetic screens. Also covers transposable elements, recombination, and regulation of gene expression, development, and pathogenesis. Cross-listed with MCBL 221 and PLPA 226. **Borkovich**

BIOL 250 Special Topics in Biology (1-2) Seminar, 1-2 hours. Prerequisite(s): graduate standing and consent of instructor. Oral presentations and intensive small-group discussion of selected topics in the area of special competence of each staff member. Course content will emphasize recent advances in the special topic area and will vary accordingly. Graded Satisfactory (S) or No Credit (NC). May be repeated for credit.

BIOL 252 General Colloquium in Biology (1) Seminar, 1 hour; discussion, 1 hour. Prerequisite(s): graduate standing. Oral reports by visiting scholars on current biological research. Graded Satisfactory (S) or No Credit (NC). May be repeated for credit.

BIOL 261 Seminar in Genetics, Genomics, and Bioinformatics (1) Seminar, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Oral reports by visiting scholars, faculty, and students on current research topics in Genetics, Genomics, and Bioinformatics. Graded Satisfactory (S) or No Credit (NC). Course is repeatable. Cross-listed with BCH 261, BPSC 261, ENTM 261, GEN 261, and PLPA 261.

BIOL 281 (E-Z) Seminar in Cell Development, Structure, and Function (2) Seminar, 2 hours. Prerequisite(s): graduate standing; consent of instructor. Lectures, discussions, and demonstrations by students, faculty, and invited scholars on selected subjects concerned with the principles of cell development, structure, and function. E. Cell Biology; F. Molecular Biology; G. Developmental Biology. Segments are repeatable. Cross-listed with CMDB 281 (E-Z).

BIOL 284 Seminar in Biology (2-4) Seminar, 2-4 hours. Prerequisite(s): graduate standing; consent of instructor. Consists of lectures, discussions, and demonstrations by students, faculty, and invited scholars on selected topics concerned with the principles of biology. Course is repeatable.

BIOL 289 Special Topics in Neuroscience (2) Seminar, 2 hours. Prerequisite(s): graduate standing or consent of instructor. An interdisciplinary seminar consisting of student presentations and discussion of selected topics in neuroscience. Content and instructor(s) vary each time course is offered. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is

repeatable. Cross-listed with BCH 289, CHEM 289, ENTM 289, NRSC 289, and PSYC 289.

EEOB 210 Organismal Biology (4) Lecture, 4 hours. Prerequisite(s): At least one upper division undergraduate course that covers the principles of physiology (such as animal physiology, plant physiology, human physiology, or comparative anatomy and physiology), or a similar course, AND an upper division undergraduate course that covers the principles of evolution, or a similar course, OR consent of instructor. Explores the historical development of modern ideas in organismal biology. Topics include homeostasis, scaling, energetics, structure-function relationships, control systems, and response systems. Examines recent research in the context of the classic studies.

EEOB 211 Foundations of Ecology (4) Lecture, 4 hours. Prerequisite(s): BIOL 116 or consent of instructor. Examination of the history, theory, and interrelationships of fundamental ecological principles through readings and discussions of classic and recent literature. Topics include quantitative, population, community, ecosystem, evolutionary, and conservation ecology.

EEOB 212 Ecological Systems in Space and Time (4) Lecture, 3 hours; field, 30 hours per quarter. Prerequisite(s): One upper-division undergraduate course in population or community ecology or paleoecology; or consent of instructor. Focuses on how ecological systems are interpreted and reconciled at the community, landscape, and paleontological scales. Addresses the role of extrinsic factors operating at each of these scales. Also examines the historical development of our understanding of ecological systems at various scales. Cross-listed with ENTM 212 and GEO 212.

EEOB 213 Behavioral Ecology (4) Lecture, 4 hours. Prerequisite(s): BIOL 160 or consent of instructor. Examines animal behavior in an evolutionary context. Traces the historical development of the study of behavior, drawing from ethology, comparative psychology, and sociobiology. Topics include evolution of sociality, sexual selection, predator-prey behavior, and parental care.

EEOB 214 Evolutionary Genetics (4) Lecture, 4 hours. Prerequisite(s): BIOL 108 or consent of instructor. Traces the historical development of modern ideas in evolutionary genetics. Focuses on the influence of Fisher, Haldane, and Wright on current views of genetic variation in natural populations, by examining recent research in the context of their classic works.

EEOB 215 Advanced Methods of Data Analysis in Evolution, Ecology, and Behavior (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): PSYC 212 or STAT 100B or equivalent. Introduces students to new methods of data analysis in the fields of evolution, ecology, and behavior. Covers theory and practical application using relevant examples. Topics include maximum likelihood, randomization, the jackknife, bootstrapping, Monte Carlo approaches, and meta-analysis.

EEOB 216 The Theory of Evolution (4) Lecture, 4 hours. Prerequisite(s): BIOL 105 or consent of instructor. Traces the historical development of modern ideas in evolutionary theory. Focuses on the influence of Darwin and of the various authors of the modern synthesis on current views of macroevolution, by examining recent research in the context of their classic works.

EEOB 217 Advanced Population and Community Ecology (4) Lecture, 4 hours. Prerequisite(s): One upper-division undergraduate class in population or community ecology; or consent of instructor. Traces the development of the major concepts in ecology. Focuses on the influence of pioneers in the field, historical roots of key concepts, and key controversies. Evaluates current research with reference to these historical origins. **Redak**

EEOB 219 Theory of Systematics (4) Lecture, 4 hours. Prerequisite(s): BIOL 112/BPSC 112/ENTM 112 or equivalent or consent of instructor. Examines topics

developed around a series of classical and recent papers on the principles, philosophy, and methodology of modern systematics and phylogenetic methods. Cross-listed with ENTM 219 and GEO 219.

EEOB 220 Evolutionary Physiology (4) S, Even Years Lecture, 4 hours. Prerequisite(s): an upper-division course in evolution and animal physiology or behavior, an upper-division course in statistics that covers analysis of covariance; or consent of instructor. Covers evolutionary approaches to the study of animal physiology. Includes organismal and organ-system physiology; biomechanics and locomotor mechanisms; cell physiology; the development of physiological systems; and behavioral neuroscience. **Garland, Jr.**

EEOB 230 Analysis of Ecological Communities (5) Lecture, 3 hours; discussion, 2 hours. Prerequisite(s): PSYC 212 or STAT 231B or equivalent; consent of instructor. Covers principles of multivariate analysis and its application to the interpretation of ecological community data. Topics include multiple and partial correlation and regression, canonical correlation, detrended and canonical correspondence analysis, multidimensional scaling, similarity indices and cluster analysis, and discriminant analysis.

EEOB 265 Advances in Population and Evolutionary Biology (1 or 2) Seminar, 1 hour; outside research, 0-3 hours. Prerequisite(s): graduate standing or consent of instructor. Presentations by visiting scholars, faculty, and students on current research topics in population and evolutionary biology. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

EEOB 282 Seminar in Genetics and Evolution (2-4) Seminar, 2-4 hours. Prerequisite(s): graduate standing; consent of instructor. Presentations by students, faculty, and invited scholars on selected topics concerned with the principles of genetics and evolution. Course is repeatable.

EEOB 283 Seminar in Organismal Physiology and Physiological Ecology (2-4) Seminar, 2-4 hours. Prerequisite(s): graduate standing; consent of instructor. Presentations by students, faculty, and invited scholars on selected topics concerned with the principles of organismal physiology and physiological ecology. Course is repeatable.

EEOB 290 Directed Studies (1-6) Individual study, 3-18 hours. Prerequisite(s): graduate standing; consent of instructor and graduate advisor. Individual studies on specially selected topics in evolution, ecology, and organismal biology under the direction of a faculty member. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

EEOB 291 Individual Study in Coordinated Areas (1-6) Individual study, 3-18 hours. Prerequisite(s): graduate standing. Provides a program of study designed to advise and assist candidates who are preparing for examinations. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

EEOB 292 Concurrent Analytical Studies in Evolution, Ecology, and Organismal Biology (2-4) Outside research, 6-12 hours. Prerequisite(s): consent of instructor. Elected concurrently with an appropriate undergraduate course but on an individual basis. Devoted to one or more graduate papers based on research or criticism related to the course. Faculty guidance and evaluation provided throughout the quarter. Course is repeatable.

EEOB 297 Directed Research (1-6) Outside research, 3-18 hours. Prerequisite(s): graduate standing; consent of instructor. Directed research in evolution, ecology, and organismal biology. Experimental studies on specially selected topics under the direction of a faculty member. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

EEOB 299 Research for the Thesis or Dissertation (1-12) Outside research, 3-36 hours. Prerequisite(s):

graduate standing; consent of instructor. Original research in an area selected for the advanced degree. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Courses

BIOL 301 Teaching of Biology at the College Level (1) Seminar, 1 hour. Prerequisite(s): graduate standing. A program of weekly meetings and individual formative evaluations required of new Biology Teaching Assistants. Covers instructional methods and classroom/section activities most suitable for teaching Biology. Conducted by the TA Development Program. Graded Satisfactory (S) or No Credit (NC).

BIOL 303 Philosophy and Pedagogy of Teaching Undergraduate Life Sciences (3) Lecture, 1 hour; laboratory, 3 hours; workshop, 1 hour. Prerequisite(s): graduate standing in life sciences. Explores the opportunities and challenges associated with developing an undergraduate course in the life sciences. Emphasizes determining how students learn, as well as exploring contemporary instruction methods that foster student engagement in the classroom. Graded Satisfactory (S) or No Credit (NC). Cross-listed with ENTM 303. **Cardullo, Paine, Regan**

EEOB 400 Introduction to Graduate Study in Biology (2) Lecture, 1 hour; discussion, 1 hour. Prerequisite(s): graduate standing; consent of instructor. Introduces opportunities and requirements for successful graduate study. Emphasis is placed on effective strategies for developing and implementing a program of professional development and graduate research. Graded Satisfactory (S) or No Credit (NC).

Biomedical Sciences

Subject abbreviation: BMSC
Division of Biomedical Sciences

G. Richard Olds, M.D., Vice Chancellor for Health Affairs and Dean of the School of Medicine

David Lo, M.D., Ph.D., Senior Associate Dean, Research

Neal L. Schiller, Ph.D., Senior Associate Dean, Student Affairs, UCR School of Medicine; Director, Thomas Haider Program at the UCR School of Medicine; and *Salma Haider Endowed Chair in Biomedical Sciences*

Ameae Walker, Ph.D., Chair of the Faculty, School of Medicine

Biological Sciences Graduate Student Affairs Center,
1140 Batchelor Hall,
(951) 827-4716;
medschool.ucr.edu/graduate

Professors

Monica J. Carson, Ph.D. *Neuroimmunology*
Iryna M. Ethell, Ph.D. *Biology/Biochemistry*
David Lo, M.D., Ph.D. *Distinguished Professor, Genetics*

G. Richard Olds, M.D., FACP, *Infectious Diseases*
Paul M. Quinton, Ph.D. *Physiology, Nancy MacCracken Chair in Pediatric Pulmonary Medicine, UCSD School of Medicine*

Neal L. Schiller, Ph.D. *Distinguished Teaching Professor, Microbiology/Immunology*

Ameae M. Walker, Ph.D. *Distinguished Teaching Professor, Microanatomy*

Professors Emeriti

Mary Ann Baker, Ph.D. *Neurosciences*
Craig V. Byus, Ph.D. *Pharmacology (Biomedical Sciences/Biochemistry)*
David A. Johnson, Ph.D. *Pharmacology*

Richard A. Luben, Ph.D. *Endocrinology (Biomedical Sciences/Biochemistry)*
Anthony W. Norman, Ph.D. *Endocrinology (Biomedical Sciences/Biochemistry)*
Michael B. Stemerman, M.D. *Biomedical Sciences*
Daniel S. Straus, Ph.D. *Human Genetics (Biomedical Sciences)*

Associate Professors

Kathryn DeFea, Ph.D. *Cell Biology/Biochemistry*
Christian Y. Lytle, Ph.D. *Physiology*
Ilhem Messaoudi, Ph.D. *Immunology/Microbiology/Aging*
Seema K. Tiwari-Woodruff, Ph.D. *Neurodegenerative Diseases/Glia Biology*
Emma Wilson, Ph.D. *Parasite Immunologist*

Assistant Professor

Djordjica Coss, Ph.D. *Endocrinology, Neuroscience*
Declan McCole, Ph.D. *Physiology, Pharmacology*
Meera G. Nair, Ph.D. *Infectious Diseases, Mucosal Immunology*
Sika Zheng, Ph.D. *Neurobiology/Molecular Genetics*

**

Associate Professor in Residence

Devin Binder, M.D., *Clinical Neuroscience*

Adjunct Professor

John Y.-J. Shyy, Ph.D. *Pharmacology/Physiology*

University Requirements

See Undergraduate Studies section.

College Requirements

See College of Natural and Agricultural Sciences, Colleges and Programs section.

B.S. Degree Requirements

The following major requirements apply only to students who, in truly exceptional cases, matriculate into the Thomas Haider Program at the UCR School of Medicine without a UCR baccalaureate degree. These students are eligible to receive a B.S. degree in Biomedical Sciences upon satisfactory completion of the first year of the curriculum leading to the M.D. degree.

Major Requirements

1. Biological Sciences Core Curriculum (65-68 units)
 - a) BIOL 005A, BIOL 05LA, BIOL 005B, BIOL 005C or equivalent
 - b) CHEM 001A, CHEM 001B, CHEM 001C, CHEM 01LA, CHEM 01LB, CHEM 01LC, CHEM 112A, CHEM 112B, CHEM 112C or equivalent
 - c) PHYS 002A, PHYS 002B, PHYS 002C, PHYS 02LA, PHYS 02LB, PHYS 02LC or equivalent
 - d) MATH 008B or MATH 009A, MATH 009B or equivalent
 - e) STAT 100A or equivalent
 - f) BCH 100 or BCH 110A or equivalent
2. Courses taken during the first year of medical school (59 units)

BMSC 231, BMSC 231M, BMSC 232, BMSC 232M, BMSC 233, BMSC 233M, BMSC 234, BMSC 234M, BMSC 235, BMSC 235M

Lower-Division Courses

BMSC 091 Freshman Advising Seminar for Medical Scholars Program Students (1) Seminar, 1 hour. Prerequisite(s): freshman standing in the Medical

Scholars Program. Introduction to UCR for students in the Medical Scholars Program. Focuses on learning the necessary survival skills to succeed in college and prepare for a career in the allied health sciences. Graded Satisfactory (S) or No Credit (NC).

BMSC 092 First-Year Seminar for Medical Scholars Program Students: Topics in Health Careers (1)

Seminar, 1 hour. Prerequisite(s): freshman standing in the Medical Scholars Program or consent of instructor. A discussion of health careers in biomedical sciences and allied health sciences for students in the Medical Scholars Program. Graded Satisfactory (S) or No Credit (NC).

BMSC 093 Seminar for Medical Scholars Program Students (1)

Seminar, 1 hour. Prerequisite(s): lower-division standing in the Medical Scholars Program or consent of instructor. A discussion of special topics in biomedical sciences and allied health sciences as they pertain to students in the Medical Scholars Program. Graded Satisfactory (S) or No Credit (NC). **Schiller**

BMSC 094 Independent Reading (1-2)

Consultation, 1-2 hours. Prerequisite(s): consent of instructor. Independent study under faculty supervision. Possible topics include modern approaches to the pathophysiology of disease, delivery of medical care to the community, or current medical education. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 4 units.

BMSC 097 Research Tutorial in Biomedical Sciences (1-2)

Laboratory, 3-6 hours. Prerequisite(s): grade point of 3.0 and consent of instructor. Laboratory tutorial in research related to biomedical sciences. To provide laboratory experience in the areas of physiology, microbiology, molecular biology, pharmacology, cell biology, immunology, biochemistry for exceptional lower-division students. A written report is required at the end of each quarter. Graded Satisfactory (S) or No Credit (NC). May be repeated for up to 6 units.

Upper-Division Courses

BMSC 191 Seminar in Biomedical Sciences (2)

Seminar, 20 hours per quarter. Prerequisite(s): upper-division standing in the Medical Scholars Program or consent of instructor. Special topics in biomedical sciences, healthcare delivery, cultural competency, biomedical research, and related areas. Course is repeatable to a maximum of 6 units.

BMSC 194 Independent Reading (1-2)

Discussion, 1 hour; outside research, 2-3 hours. Prerequisite(s): upper-division standing and consent of instructor and Divisional Dean. Independent study involving library projects on topics related to Biomedical Sciences. Independent study will be conducted under faculty supervision. A written report to be graded Satisfactory (S) or No Credit (NC) will be requested. Course is repeatable to a maximum of 4 units.

BMSC 197L Research for Undergraduates (1-3)

Laboratory, 3-9 hours. Prerequisite(s): upper-division standing (completion of 90 quarter units) and consent of instructor. An introduction to the methods of research in biomedical sciences. The student will conduct investigation in an area of biomedical sciences under the supervision of a Division of Biomedical Sciences faculty member and submit a written report on his/her work. Course is repeatable.

Graduate Courses

BMSC 202 Molecular Basis of Disease (3) S Lecture, 2 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Discussion of the molecular basis of disease with special emphasis on new developments and the broad application of approaches and techniques. Course is repeatable with consent of the student's advisory committee; may be applied only once toward core requirements.

BMSC 222 (E-Z) Special Topics in Biomedical Sciences

(2) Lecture, 1 hour; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. For BMSC 222W: BIOL 128/CBNS 128 or consent of instructor. Oral presentations and intensive small-group discussion of selected topics in the area of special competence of each faculty member. Course emphasizes recent advances in the special topic area and varies accordingly. **E.** Basic Epitheliology. **Lytle, Quinton.** **G.** Regulation of Gene Expression. **Straus.** **J.** Microbial Pathogenesis and Host-Pathogen Interactions. **Schiller.** **L.** Current Topics in Cell Biology. **Walker.** **M.** Hormone Action. **Byus, Luben.** **N.** Mechanisms of Steroid Hormones. **Norman.** **O.** Steroid Metabolism. **Henry.** **P.** Molecular Pharmacology. **Johnson.** **Q.** Mechanisms of Carcinogenesis. **Byus.** **U.** Transport Physiology. **Lytle.** **W.** Advanced Immunology. **X.** Mutagenesis and Genetic Instability. **Grosovsky.** **Y.** Cancer Genetics. Segments are repeatable.

BMSC 223 (E-Z) Themes in Human Biology and Disease

(2-4) For hours and prerequisites, see segment descriptions. Graduate students write a paper on current basic research relevant to the course theme.

BMSC 223E Inflammation, Autoimmunity, and Pathogen Defense

(3) Lecture, 23 hours per quarter; discussion, 8 hours per quarter; laboratory, 8 hours per quarter. Prerequisite(s): consent of course coordinator. Integrative view of the human immune system and inflammation in health and disease. Credit is awarded for only one of BMSC 223E or BMSC 229 or BMSC 231 or MDCL 231. **Carson**

BMSC 223F Cardiovascular Physiology

(4) Lecture, 30.5 hours per quarter; discussion, 11.5 hours per quarter; laboratory, 5 hours per quarter. Prerequisite(s): consent of course coordinator. Integrative view of the human cardiovascular system in health and disease. Credit is awarded for only one of BMSC 223F or BMSC 232 or MDCL 232. **Lytle**

BMSC 223G Renal Physiology

(3) Lecture, 22 hours per quarter; discussion, 8 hours per quarter; laboratory, 2 hours per quarter. Prerequisite(s): consent of course coordinator. Integrative view of human kidney function and dysfunction. Credit is awarded for only one of BMSC 223G or BMSC 232 or MDCL 232. **Quinton**

BMSC 223-I Respiratory Physiology

(3) Lecture, 25 hours per quarter; discussion, 8 hours per quarter; laboratory, 6.5 hours per quarter. Prerequisite(s): consent of course coordinator. Integrative view of the human respiratory system in health and disease. Credit is awarded for only one of BMSC 223I or BMSC 232 or MDCL 232. **Quinton**

BMSC 223J Gastrointestinal Physiology

(3) Lecture, 33 hours per quarter; laboratory, 6 hours per quarter. Prerequisite(s): consent of course coordinator. Integrative view of the human gastrointestinal system in health and disease. Credit is awarded for only one of BMSC 223J or BMSC 233. **Lytle**

BMSC 229 Foundations in Translational Research

(8) Summer Lecture, 67 hours per quarter; discussion, 7 hours per quarter; laboratory, 18 hours per quarter. Prerequisite(s): first-year standing in the Biomedical Sciences graduate program or consent of graduate advisor. Covers basic principles of disease processes, genetics, and molecular, cellular, and developmental biology. Case-driven instruction accomplished through lectures and discovery in small group discussions and laboratories. Offered in summer only. Credit is awarded for only one of BMSC 223E or BMSC 229 or BMSC 231 or MDCL 231. **Carson, Messaoudi**

BMSC 231 Foundations of Medicine I

(7.5) Lecture, 65.5 hours per quarter; discussion, 6 hours per quarter; laboratory, 20.5 hours per quarter. Prerequisite(s): first-year standing in medical school or consent of instructor. Covers basic principles of disease processes, genetics, and molecular, cellular, and developmental biology. Instruction is driven by cases and accomplished through lectures and discovery in small group

discussions, laboratories, and conferences. Students using this course to fulfill requirements for the B.S. degree in Biomedical Sciences receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Credit is awarded for only one of BMSC 223E or BMSC 229 or BMSC 231 or MDCL 231.

Carson, Messaoudi

BMSC 232 Cardiovascular, Renal, and Respiratory Sciences I

(12) Discussion, 9 hours per quarter; laboratory, 19 hours per quarter; lecture, 107 hours per quarter. Prerequisite(s): first-year standing in medical school or the graduate program in Biomedical Sciences or consent of instructor; BMSC 229 or BMSC 231. Covers physiology, pathophysiology, physical diagnosis, and imaging in the cardiovascular, renal, and respiratory sciences. Instruction is driven by cases and accomplished through lectures and discovery in small group discussions, laboratories, and conferences. Students using this course to fulfill requirements for the B.S. or Ph.D. degree in Biomedical Sciences receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Credit is awarded for only one of BMSC 223F or BMSC 232 or MDCL 232 and for only one of BMSC 223G or BMSC 232 or MDCL 232. **Lytle, Quinton**

BMSC 233 Gastrointestinal, Endocrine, and Reproductive Health I

(10) Lecture, 85 hours per quarter; discussion, 8 hours per quarter; laboratory, 21 hours per quarter. Prerequisite(s): first-year standing in medical school or the graduate program in Biomedical Sciences or consent of instructor; BMSC 232. Covers biochemistry, pathophysiology, physical diagnosis, and imaging associated with gastrointestinal, endocrine, and reproductive health. Instruction is driven by cases and accomplished through lectures and discovery in small group discussions, laboratories, and conferences. Students using this course to fulfill requirements for the B.S. or Ph.D. degree in Biomedical Sciences receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Credit is awarded for only one of BMSC 223J or BMSC 233 or MDCL 233. **Luben, DeFea**

BMSC 234 Musculoskeletal Medicine

(4) Lecture, 36 hours per quarter; discussion, 2 hours per quarter; laboratory, 7 hours per quarter. Prerequisite(s): first-year standing in medical school or the graduate program in Biomedical Sciences or consent of instructor; BMSC 233. Covers the musculoskeletal system, biology and pathology of the peripheral nervous system, and physical diagnosis. Utilizes lectures and case studies to accomplish course objectives. Promotes discovery of learning by small group discussions, laboratories, and conferences. Students using this course to fulfill requirements for the B.S. or Ph.D. degree in Biomedical Sciences receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Credit is awarded for only one of BMSC 234 or MDCL 234. **Ethell**

BMSC 235 Clinical Neurosciences I

(5) Lecture, 42 hours per quarter; discussion, 8 hours per quarter; laboratory, 6 hours per quarter. Prerequisite(s): BMSC 234. Covers neurobiology and provides an introduction to neurology and psychiatry, as well as physical diagnosis and imaging of the nervous system. Utilizes lectures and case studies to accomplish course objectives. Promotes discovery of learning by small group discussions, laboratories, and conferences. Students using this course to fulfill requirements for the B.S. or Ph.D. degree in Biomedical Sciences receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Credit is awarded for only one of BMSC 235 or MDCL 235. **Ethell**

BMSC 236 Foundations of Medicine II

(10) Lecture, 93 hours per quarter; discussion, 8 hours per quarter; laboratory, 10 hours per quarter. Prerequisite(s): second-year standing in medical school or the graduate program in Biomedical Sciences or consent of instructor; BMSC 235. Covers the pathophysiology, pharmacology, physical diagnosis and treatment of infectious diseases, clinical hematology and oncology,

and epidemiology and clinical reasoning skills. Instruction involves weekly cases and is presented through lectures and discovery in small group discussions, laboratories, and conferences. Students using this course to fulfill requirements for the Ph.D. degree in Biomedical Sciences receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. **Schiller, Wilson**

BMSC 251 Colloquium in Biomedical Sciences

(1) Colloquium, 1 hour. Prerequisite(s): graduate standing in Biomedical Sciences or consent of instructor. Specialized discussions by staff and students of current research topics in biomedical sciences. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

BMSC 252 General Seminar in Biomedical Sciences

(1) Seminar, 1 hour. Prerequisite(s): graduate standing. Oral presentations by staff and visiting scholars on current research topics in the field of biomedical sciences. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

BMSC 254 Graduate Seminar in Biomedical Sciences

(1) Seminar, 1 hour. Prerequisite(s): graduate standing. Oral reports by graduate students on current research topics in biomedical sciences. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

BMSC 260A Topics in Translational Biomedical Research

(2) F Lecture, 2 hours per quarter; discussion, 18 hours per quarter. Prerequisite(s): consent of instructor or graduate advisor; concurrent enrollment in BMSC 232. A survey of the mechanisms of common human diseases at the molecular, cellular and organ system levels and the multidisciplinary approaches used for their investigation. Instructional components include lectures, discovery in problem-based learning sessions, and independent study. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. **DeFea, Lytle**

BMSC 260B Topics in Translational Biomedical Research

(2) Lecture, 2 hours per quarter; discussion, 18 hours per quarter. Prerequisite(s): consent of instructor or graduate advisor; concurrent enrollment in BMSC 233. A survey of the mechanisms of common human diseases at the molecular, cellular and organ system levels and the multidisciplinary approaches used for their investigation. Instructional components include lectures, discovery in problem-based learning sessions, and independent study. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. **DeFea, Lytle**

BMSC 260C Topics in Translational Biomedical Research

(2) Lecture, 2 hours per quarter; discussion, 18 hours per quarter. Prerequisite(s): consent of instructor or graduate advisor; concurrent enrollment in BMSC 234 and BMSC 235. A survey of the mechanisms of common human diseases at the molecular, cellular and organ system levels and the multidisciplinary approaches used for their investigation. Instructional components include lectures, discovery in problem-based learning sessions, and independent study. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. **DeFea, Lytle**

BMSC 261 Methods in Biomedical Research

(1) Tutorial, 3 hours. Prerequisite(s): graduate standing in Biomedical Sciences or consent of instructor. Experimental studies on a specific laboratory technique involved in the study of human disease. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 3 units. **Lytle**

BMSC 290 Directed Studies

(1-6) Outside research, 3-18 hours. Prerequisite(s): graduate standing in Biomedical Sciences or consent of instructor. Experimental or literature studies on specifically selected topics under direction of a staff member. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

BMSC 297 Directed Research (1-6) Outside research, 3-18 hours. Prerequisite(s): graduate standing in Biomedical Sciences or consent of instructor. Directed research in biomedical sciences performed prior to advancement to candidacy in preparation for dissertation projects. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

BMSC 299 Research for Dissertation (1-12) Outside research, 3-36 hours. Prerequisite(s): graduate standing in Biomedical Sciences or consent of instructor. Original research in the area selected for the advanced degree. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Course

BMSC 302 Directed Teaching (2) Practicum, 6 hours. Prerequisite(s): graduate standing in Biomedical Sciences. Supervised teaching in medical school courses. Required for all Biomedical Sciences graduate students. Fulfills the teaching portion of the teaching requirement for the Ph.D.; four units are required for the Ph.D. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 6 units.

Biomedical Sciences Graduate Program

Andre Obenaus, Ph.D. (Biochemistry, Loma Linda University)

Graduate Program

The multidisciplinary interdepartmental graduate program in Biomedical Sciences offers graduate instruction leading to a Ph.D. degree or a combined M.D.–Ph.D. degree.

The aim of the graduate program is to provide students with training that crosses traditional boundaries between scientific disciplines and allows them to address modern biomedical research questions. The objective is to train scientists who have a broad knowledge of basic medical sciences, a high degree of expertise in an area of specialization, and effective teaching skills for a medical school or university environment.

The need for scientists who understand the interrelationships of various areas of medical science is readily apparent. For example, it is clearly advantageous for a scientist studying diabetes to understand the disease in depth. This requires a fundamental understanding of endocrinology (hormone secretion and action), cell biology (cell types that produce insulin and upon which insulin acts), biochemistry (insulin-receptor interactions, biochemical pathways regulated by insulin), genetics (hereditary factors in the development of diabetes), immunology (autoimmune mechanisms in diabetes), and anatomy (microvascular pathology). There is a growing need for scientists who can communicate among disciplines so that very effective research collaborations can be developed.

Cell Biology/Physiology research areas include function of transcription factors in development, disease, and in the promotion of regeneration; fluid and electrolyte pathophysiology in cystic fibrosis; molecular genetics of human cell response to environmental carcinogens; tumor suppressor genes in malignant melanoma; factors controlling lymphocyte differentiation; mechanisms of action of cytotoxic lymphokines; physiological aspects of host–parasite interaction; host defense mechanisms in

infectious disease; and mucosal immunity and molecular approaches to vaccine development.

Endocrinology/Pharmacology research areas include regulation and actions of the vitamin D endocrine system; mechanism of action of insulin and insulin-like growth factors; prolactin as a growth factor in health and disease; hormonal and electric field regulation of bone development and growth; and molecular mechanisms for carcinogenesis (glioblastoma, breast and prostate cancer).

Neurosciences research areas include studies of the hypothalamic control of homeostatic and sexual function; molecular mechanisms of neurodevelopment, neuronal death and neurodegeneration with emphasis on the following diseases: Alzheimer's disease, Parkinson's disease, Autism, Fragile X/mental retardation, multiple sclerosis, Huntington's disease, stroke and pathogen-induced encephalitis.

Admission Applicants should have completed an undergraduate degree in one of the physical or biological sciences and must submit scores from the GRE General Test (verbal and quantitative). (GRE requirement not applicable to UCR Biomedical Sciences students applying for the M.D.–Ph.D.) Courses required for admission include one year each of general chemistry, organic chemistry, physics, and calculus and at least two years of biological sciences. Preferred upper-division courses in biology include vertebrate or human anatomy and physiology, embryology, genetics, cell biology, microbiology, immunology, and neurosciences.

Doctoral Degree

The aim of the graduate program in Biomedical Sciences is to train Ph.D. scientists in a specific area of research specialization who also have enough general knowledge in the basic medical sciences to apply their research expertise to unraveling the basis of disease. This approach includes understanding not only pathogenic manifestations of disease but also the normal physiologic state. To accomplish this, the student completes a core and elective curriculum, the latter tailored to the student's research interests.

Core requirements include:

1. BMSC 229: Foundations of Translational Research
2. BMSC 232, 233, 234 and 235: Foundations of Medicine Series
3. BMSC 260A, BMSC 260B, BMSC 260C: Topics in Biomedical Research. The entire 3 quarter series is required in the first year of graduate education.
4. BMSC 261: Methods in Biomedical Research. Enrollment required all 3 quarters of the first year of graduate education.
5. BMSC 252: General seminar in Biomedical Sciences (enrollment required each quarter)
6. BMSC 254: Graduate seminar in Biomedical Sciences (enrollment required each quarter)
7. BMSC 302: (one-quarter requirement, not required of M.D.–Ph.D. students)

Under normal circumstances, each student should complete core course work requirements 1-4 during the first year of studies.

At the end of the student's first full year of residence, the advisory committee for each student evaluates the progress of the student and recommends to the faculty whether the student should continue in the program.

In addition, prior to advancement to candidacy and at the beginning of each academic year, the student presents a written summary of the research progress and plans to the advisory committee. Continuation in the program depends on the advisory committee's positive evaluation of the student's research progress.

Written and Oral Qualifying Examinations

Prior to advancement to candidacy, students must complete both parts of a qualifying examination. Part I consists of the preparation of a research proposal, to be written in the form of a grant proposal, including literature review, description of methods and experimental plans for the dissertation. This proposal should outline the research progress of the student to date and delineate the planned dissertation research aims and objectives. Part I is usually completed in the spring quarter of year 2 and no later than the fall quarter of year 3 of a student's graduate training. Part II consists of an oral comprehensive examination administered by a committee of five faculty members, at least one of whom is from outside the program. The student's research advisor does not serve on the oral qualifying committee. The oral comprehensive examination includes examination of the student's knowledge and understanding of material covered in the core courses and in the student's area of specialization. Part II must be completed no later than the end of year 3 of the student's graduate training.

Research Project, Dissertation and Final Oral Examination

After successful completion of the qualifying exam and advancement to candidacy, the student completes the research project, submits a written dissertation, and defends the dissertation in a final oral examination.

Normative Time to Degree 15 quarters

M.D.–Ph.D. Combined Degree

Admission The combined degree is offered to students admitted to the medical school and to exceptional students from other four-year LCME-accredited medical schools. Normally, a student completes the first two years of medical school, and then spends approximately three years in the Ph.D. part of the program before completing the M.D. degree. However, the track is also offered to students who have completed the M.D. degree. UCR Biomedical Sciences students may apply for admission concurrently with their applications to the medical school or any time after acceptance to the medical school. For these students only, the MCAT is accepted in lieu of the GRE.

Students from other medical schools should apply in the fall of their sophomore or senior year. Applications from sophomores must

be accompanied by official permission for an appropriate leave of absence. The GRE requirement is the same as for regular Ph.D. students.

Master's Degree

The Biomedical Sciences Graduate Group offers an M.S. degree. No students are admitted directly into the program for work toward the master's degree. However, a Plan I (Thesis) or Plan II (Comprehensive Examination) M.S. degree is available in special circumstances when work leading to the Ph.D. degree cannot be completed. The student's advisory committee decides whether the master's degree is an appropriate alternative to the Ph.D. degree. This decision may be made at the end of the student's first year of residence or at other times in the student's career, particularly at the time of the qualifying examination.

Course Descriptions

All Biomedical Sciences courses are listed and described under Biomedical Sciences.

Further information regarding graduate studies in Biomedical Sciences may be obtained from medschool.ucr.edu/graduate/.

Book, Archive, and Manuscript Studies Designated Emphasis

Subject abbreviation: BAM
College of Humanities, Arts, and Social Sciences

Robb Hernandez (English)
Rob Latham (English)
Kristoffer Neville (Art History)
Thomas Scanlon (Comparative Literature & Foreign Languages)
Deborah Willis (English)

Designated Emphasis Requirements

The Designated Emphasis is a 14-unit interdisciplinary graduate course of study, requiring coursework across at least two departments. Two of the three required courses, if otherwise eligible, may count towards the student's Ph.D. requirements.

1. Three (3) courses (12 units) selected from AHS 274, CRWT 186A, CRWT 186B, ENGL 246, ENGL 273, ENGL 282, HIST 240 (E-Z), HIST 262, HIST 263, HISE 113, HISE 114. Students may ask to count another

course with relevant content as approved by the Designated Emphasis Directors. Students must select courses from at least two different departments or programs, one of which may be their home department. Undergraduate courses taken to fulfill these requirements must be accompanied by a 292 course taken in the student's department with extra work mutually agreed upon by professor and student.

2. MCS280 (2 units): Colloquium on Book, Archive, and Manuscript Studies. Addresses current research topics pertaining to the program. Includes events conducted both on and off campus. Graded Satisfactory (S) or No Credit (NC).
3. Significant Research Product: The Designated Emphasis requires that 4 credits reflect a "significant research product." It is the committee's expectation that students will fulfill this component in at least one of the required courses, typically by writing a research paper appropriate to that discipline's journal publication or conference presentation conventions. In rare cases in which the research component has not otherwise been met, a student may undertake MCS 280 for 4 units in order to produce a research paper of approximately 25 pages.

All requirements for the Designated Emphasis must be satisfied before a student advances to candidacy in their Ph.D. field; a minimum GPA of 3.0 is required for the award of the Designated Emphasis.

 Joel Sachs, Ph.D. (Biology)

Major

The mission of the interdepartmental Undergraduate Program in Plant Biology is to provide students with a solid background in modern principles and research practices of basic Plant Biology and in their area of specialization.

Courses prerequisite to the major, courses used to satisfy major requirements, and the 16 units (for B.S. degree) related to the major must be taken for letter grades. Students may elect to take other courses on a Satisfactory (S)/No Credit (NC) basis. Refer to the Academic Regulations section of this catalog for additional information on "S/NC" grading.

Information about this program is available from the CNAS Academic Advising Center (1223 Pierce Hall, Monday through Friday, 9 a.m. to noon and 1 to 4 p.m., [951] 827-7294).

Transfer Students

Students planning to transfer to UCR with a major in Plant Biology must have a minimum GPA of 2.7 in transferable college courses and "C" or higher grades in a year sequence of general chemistry and in courses equivalent to our BIOL 005A, BIOL 005B. We also recommend that transfer students complete a year of college calculus before admission. Exceptions may be granted by the faculty advisor.

University Requirements

See Undergraduate Studies section.

College Requirements

See College of Natural and Agricultural Sciences, Colleges and Programs section.

Some of the following requirements for the major may also fulfill some of the college's breadth requirements. Consult with a department advisor for course planning.

Major Requirements

The major requirements for the B.S. and B.A. degrees in Plant Biology are as follows:

1. Life Sciences core requirements (68-72 units)

Students must complete all required courses with a grade of "C-" or better and with a cumulative GPA in the core courses of at least 2.0. Grades of "D" or "F" in two core courses, either separate courses or repetitions of the same course, are grounds for discontinuation from the major.

- a) BIOL 005A, BIOL 05LA, BIOL 005B, BIOL 005C
- b) CHEM 001A, CHEM 001B, CHEM 001C, CHEM 01LA, CHEM 01LB, CHEM 01LC, CHEM 112A, CHEM 112B, CHEM 112C
- c) MATH 008B or MATH 009A, MATH 009B (MATH 009C recommended)
- d) PHYS 002A, PHYS 002B, PHYS 002C, PHYS 02LA, PHYS 02LB, PHYS 02LC
- e) STAT 100A
- f) BCH 100 or BCH 110A (BCH 110A is strongly recommended)

Note for the B.S. degree, courses in Statistics and Biochemistry taken as part of the core may count toward the 16 units from an area of specialization. For the B.A. degree, courses in Statistics and Biochemistry taken as part of the core may not count toward the 12 units required from an area of specialization.

2. Upper-division requirements (40–52 units)

A GPA of at least 2.0 in upper-division courses taken in the field of the major is a graduation requirement. A student is subject to discontinuation from the major whenever the GPA in upper-division course work is below 2.0. Students finding themselves in this circumstance must meet with an advisor.

- a) BIOL 102
- b) BPSC 104/BIOL 104 (may be waived with consent of the faculty advisor)
- c) BIOL 132/BPSC 132, BIOL 143/BPSC 143, BPSC 133
- d) At least 8 units for B.S. or 4 for B.A. from the following:
 BIOL 100/ENTM 100, BIOL 120/MCBL 120/PLPA 120, BIOL 120L/MCBL 120L/PLPA 120L, BIOL 121/MCBL 121, BIOL 121L/MCBL 121L, BIOL 123/MCBL 123/PLPA 123, BIOL 124/MCBL 124, BIOL 134/PLPA 134, BIOL 134L/PLPA 134L, BIOL 159/NEM 159, BPSC 134/ENSC 134, ENSC 120/NEM 120, ENTM 124

- e) Two (2) units of BPSC 195H, BPSC 197, BPSC 198-I, or BPSC 199
- f) BPSC 193 with a grade of C- or better
- g) **For the B.S.** 16 additional units from one of the four areas of specialization (consult with a faculty advisor) and additional upper-division courses in biological sciences and related areas from any of the areas of specialization lists, and students may apply a maximum of 6 units of BPSC 190 and/or BPSC 195H and/or BPSC 197 and/or BPSC 198-I and/or BPSC 199. Requirements a) through g) must be at least 52 units in total.

For the B.A. 12 additional units from one of the four areas of specialization (consult with a faculty advisor).

Note Students planning a B.A. degree should schedule the required language courses in place of a series of electives.

Areas of Specialization

Individual student career goals may be achieved by selecting an area of specialization within the diverse disciplines of botany and plant sciences. Adjustments within these programs can be made to accommodate students' interests. Students must consult with a faculty advisor to clarify educational goals and to plan a program of study.

1. Plant Cellular, Molecular, and Developmental Biology

- a) BPSC 135
- b) Additional units from the following to meet either the B.S. or B.A. requirement: BCH 102, BCH 110B, BCH 110C or BIOL 107A, BCH 153/BIOL 153/BPSC 153, BCH 162, BCH 183/BPSC 183, BIOL 107B, BIOL 113, BIOL 114, BIOL 121/MCBL 121, BIOL 121L/MCBL 121L, BIOL 123/MCBL 123/PLPA 123, BIOL 155/BPSC 155, BIOL 168, BPSC 138/BIOL 138, BPSC 185, CBNS 101, CBNS 108

2. Plant Genetics, Breeding, and Biotechnology

- a) BPSC 150
- b) Additional units from the following to meet either the B.S. or B.A. requirement: BCH 153/BIOL 153/BPSC 153, BIOL 105, BIOL 107A, BIOL 107B, BIOL 108, BIOL 119, BIOL 148/BPSC 148, BIOL 155/BPSC 155, BPSC 135, BPSC 158, BPSC 185, CBNS 108, STAT 100B

3. Ecology, Evolution, and Systematics

- a) BPSC 146
- b) Additional units from the following to meet either the B.S. or B.A. requirement: ANTH 170/BPSC 170, BIOL 105, BIOL 108, BIOL 112/BPSC 112/ENTM 112, BIOL 116, BIOL 116L, BIOL 138/BPSC 138, BIOL 165/BPSC 165, BPSC 134/ENSC 134, BPSC 158, BPSC 166, BPSC 185, ENSC 100, GEO 151, GEO 153, GEO 169

4. Plant Pathology, Nematology, and Pest Management

- a) BIOL 120/MCBL 120/PLPA 120

- b) Additional units from the following to meet either the B.S. or B.A. requirement:
 BCH 183/BPSC 183, BIOL 121/MCBL 121, BIOL 121L/MCBL 121L, BIOL 124/MCBL 124, BPSC 146, BPSC 150, BPSC 158, BPSC 166, ENSC 134/BPSC 134, ENTM 100/BIOL 100, ENTM 109, ENTM 124, ENTM 127/BIOL 127, ENTM 129, ENTM 129L, ENSC 100, ENSC 120/NEM 120, NEM 159/BIOL 159, PLPA 120L/BIOL 120L/MCBL 120L, PLPA 123/BIOL 123/MCBL 123, PLPA 134/BIOL 134, PLPA 134L/BIOL 134L, ENSC 104

Minor

The minor in Plant Biology allows students majoring in other departments to obtain in-depth training in Plant Biology.

Requirements for the minor in Plant Biology are as follows:

1. BIOL 104/BPSC 104 (4 units)
2. One course (4–5 units) from the following:
 BIOL 132/BPSC 132, BIOL 138/
 BPSC 138, BIOL 143/BPSC 143, BPSC 133
3. Twelve (12) to 20 units from the following:
 ANTH 170/BPSC 170, BCH 153/BIOL 153/
 BPSC 153, BCH 183/BPSC 183, BIOL 132/
 BPSC 132, BIOL 138/BPSC 138, BIOL 143/
 BPSC 143, BIOL 148/BPSC 148, BIOL 155/
 BPSC 155, BIOL 165/BPSC 165, BPSC 133,
 BPSC 134/ENSC 134, BPSC 135, BPSC 146,
 BPSC 150, BPSC 158, BPSC 166, BPSC
 190, BPSC 195H, BPSC 197, BPSC 198-I,
 BPSC 199, PLPA 120/BIOL 120/MCBL 120

Note No more than 4 units of BPSC 190–199 may be used to fulfill this requirement. The course used to fulfill the requirement in 2. cannot also be used to fulfill the requirement in 3.

See Minors under the College of Natural and Agricultural Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Graduate Program

The Department of Botany and Plant Sciences offers programs leading to the M.S. degree in Plant Biology with two tracks, Botany or Plant Science, and a program leading to Ph.D. degrees in Plant Biology or Plant Biology (Plant Genetics)*. Research in these programs can focus on basic and/or applied questions.

Admission Applicants who have a baccalaureate degree and who satisfy the general requirements of the university listed in the Graduate Studies section of this catalog are considered for admission to graduate status. Students applying to the Ph.D. program and domestic applicants to the M.S. program must submit GRE General Test scores (verbal, quantitative, and analytical).

Regardless of the area of their major for the baccalaureate degree, students must have had, or complete soon after entering graduate school the following:

1. A year of course work in general biology and general chemistry

2. A course in genetics, biochemistry, and calculus

3. Two courses in physics and/or statistics.

Credit from these courses does not count toward the graduate degree.

Immediately after being admitted, each student should identify a faculty advisor and consult with that advisor or the graduate advisor regarding educational goals; scheduling initial course work and possible lab rotations; and forming a guidance committee. Further guidance on these matters is provided in the Botany and Plant Sciences Graduate Student Handbook.

Master's Degree

The Department of Botany and Plant Sciences offers programs leading to the M.S. degree in Plant Biology with tracks in Botany or Plant Science.

The master's degree may be earned under Plan I (Thesis) or Plan II (Comprehensive Examination). Students must meet all general requirements of the Graduate Division. The detailed course program is determined by the guidance committee after considering the specific interests of the student. Department requirements are as follows:

Plan I (Thesis)

1. Three courses from Section I of either the Botany track or the Plant Science track M.S. list
2. Two courses from Section II. In fulfilling the Section II requirement, students may use no more than one course cross-listed by Botany and Plant Sciences and another program. If such a cross-listed course is used toward fulfilling the Section II requirement, the same course may not be used toward fulfilling the Section I or III requirements.
3. At least 6 units from Section III of either the Botany track or Plant Science track M.S. list
4. Preparation of a thesis (not more than 12 units from Section V may apply toward the degree)

If the student takes research courses from Section IV, not more than 6 units may be applied toward the degree. Students who have taken courses comparable to those in Section I during their baccalaureate training may have a portion or all of this section waived. In such instances, however, it is expected that their programs include increased units in courses from Sections II, III, and/or IV. Recommendations for waivers should specify alternative courses and should be sent to the department educational advisory committee for approval.

Plan II (Comprehensive Examination)

1. Three courses from Section I of either the Botany track or Plant Science track M.S. list
2. Two courses from Section II. In fulfilling the Section II requirement, students may use no more than one course cross-listed by Botany and Plant Sciences and another program. If such a cross-listed course is used toward fulfilling the Section II requirement, the

same course may not be used toward fulfilling the Section I or III requirements.

3. At least 12 units from Section III of either the Botany track or Plant Science track M.S. list
4. At least 6 units from Section IV for a research project or literature review, which should be described in a report to be submitted for evaluation by the comprehensive examination committee
5. Comprehensive written and oral examinations

Students who have taken courses comparable to those in Section I during their baccalaureate training may have a portion or all of this section waived. In such instances, however, it is expected that their programs include increased units in courses from Section II and/or III. Recommendations for waivers should specify alternative courses and should be sent to the educational advisory committee for approval.

Seminar Requirement All full-time students must enroll in the BPSC 250 seminar during each quarter in which it is offered. Part-time students must take one BPSC 250 seminar for every 12 units of courses. One quarter per year, students may enroll in an equivalent seminar course as a replacement for the BPSC 250 seminar course. All students must present at least one BPSC 250 seminar and complete at least two quarters of BPSC 240 (or equivalent).

Courses available for fulfilling the requirement for the M.S. degree:

Section I — Upper-division undergraduate courses:

Botany track ANTH 170/BPSC 170, BCH 153/BIOL 153/BPSC 153, BCH 183/BPSC 183, BIOL 104/BPSC 104, BIOL 112/BPSC 112/ENTM 112, BIOL 120/MCBL 120/PLPA 120, BIOL 132/BPSC 132, BIOL 134/PLPA 134, BIOL 138/BPSC 138, BIOL 143/BPSC 143, BIOL 155/BPSC 155, BIOL 165/BPSC 165, BPSC 133, BPSC 134/ENSC 134, BPSC 135, BPSC 146, BPSC 148, BPSC 166

Plant Science track ANTH 170/BPSC 170, BCH 153/BIOL 153/BPSC 153, BCH 183/BPSC 183, BIOL 104/BPSC 104, BIOL 112/BPSC 112/ENTM 112, BIOL 120/MCBL 120/PLPA 120, BIOL 132/BPSC 132, BIOL 134/PLPA 134, BIOL 138/BPSC 138, BIOL 143/BPSC 143, BIOL 148/BPSC 148, BPSC 150, BIOL 155/BPSC 155, BIOL 165/BPSC 165, BPSC 133, BPSC 134/ENSC 134, BPSC 135, BPSC 146, BPSC 158, BPSC 166

Section II — Graduate and upper-division undergraduate courses in related departments or programs and professional development courses (i.e., BPSC 200A - BPSC 200B). Applicable courses are approved by the Graduate Educational Advisory Committee. A minimum of 6 units of course work is required. No more than 4 units may be from professional development classes.

Section III —

Botany track BCH 205/BPSC 205/

CMDB 205/GEN 205/MCBL 205/PLPA 205, BCH 231/BPSC 231, BPSC 201 (E-Z) (for a maximum of 2 units), BPSC 210, BPSC 230, BPSC 232, BPSC 234, BPSC 237, BPSC 239, BPSC 240 (only if taken in addition to the required seminar units; see seminar requirement), BPSC 243, BPSC 245, BPSC 246, and BPSC 247

Plant Science track BCH 205/BPSC 205/CMDB 205/GEN 205/MCBL 205/PLPA 205, BCH 231/BPSC 231, BPSC 201 (E-Z) (for a maximum of 2 units), BPSC 221, BPSC 222, BPSC 232, BPSC 234, BPSC 237, BPSC 239, BPSC 240 (only if taken in addition to the required seminar units; see seminar requirement), BPSC 243, BPSC 245, BPSC 246, and BPSC 247

Section IV — Research courses: BPSC 290 and BPSC 297

Section V — Thesis research: BPSC 299, Thesis for Plan I

Normative Time to Degree 7 quarters

Doctoral Degree

The Department of Botany and Plant Sciences offers programs leading to the Ph.D. degree in Plant Biology.

The student must meet the general requirements of the Graduate Division.

Admission Either prior to entering the graduate program or before advancement to candidacy, students must have completed the equivalent of BPSC 104 and one other course from the core plant biology courses (BIOL 107A, BPSC 132, BPSC 135, BPSC 138, BPSC 143, BPSC 146). Course requirements for each student are determined by individual guidance committees and by the educational advisory committee. No later than the second quarter in residence, students meet with a guidance committee to (1) determine a course program to be submitted to the educational advisory committee, and (2) choose a major area of specialization and two minor areas.

Course Work Guidance committees and students should design individual course programs that meet the specific needs of the student and the requirements of the Ph.D. program. Course programs should prepare students for the qualifying examination and dissertation research. All first-year students must enroll in BPSC 200A and 200B during their first Fall and Spring quarters. Students must take a minimum of 12 additional graduate-level units relevant to the specialization. Graduate courses taken previously may be considered towards fulfilling this requirement. Students' course programs must be approved by the educational advisory committee. At the time of submission of course programs to the educational advisory committee, the area of specialization and two minor areas to be covered on the qualifying examination should be specified. Students may petition to change the course program, area of specialization, or minor areas at any time.

Students entering the Plant Biology Ph.D. program have four choices, as listed below. Students with a general interest in plant biology and/or evolution are encouraged to choose the first.

Ph.D. in Plant Biology Students who choose to obtain a Ph.D. in Plant Biology without one of the following concentrations are encouraged to – with the advice and consent of their Major Professor and Guidance Committee – create a set of coursework that is specifically tailored to their individual research interests and career objectives.

Students can also choose from one of three concentrations:

Ph.D. in Plant Biology (Concentration in Plant Cell, Molecular, and Developmental Biology) To earn the concentration in Plant Cell, Molecular, and Developmental Biology (appears on the transcript only), students must complete BPSC 231, BPSC 232, and BPSC 237. In addition, the required BPSC 240 course must be on a topic related to the concentration.

Ph.D. in Plant Biology (Concentration in Plant Ecology) To earn the concentration in Plant Ecology (appears on the transcript only), students must complete BPSC 245, and 8 additional units from the following list: EEOB 211, EEOB 212, EEOB 217, EEOB 230, BPSC 225J, BPSC 243, BPSC 247, ENTM 241, ENSC 218, ENSC 232, GEO 260, GEO 268 and BPSC 246. In addition, the required BPSC 240 course must be on a topic related to the concentration.

Ph.D. in Plant Biology (Concentration in Plant Genetics) To earn the concentration in Plant Genetics (appears on the transcript only), students must complete 12 graduate-level units relating to Genetics. Required courses must include two courses from the following list: BPSC 221, BPSC 222, BPSC 225K, BPSC 231, BPSC 234, EEOB 214, BIOL 221/MCBL 221/PLPA 226, GEN 240A. The additional units can be chosen in an area that supports the concentration. In addition, the required BPSC 240 course must be on a topic related to the concentration.

Written and Oral Qualifying Examinations Advancement to candidacy depends on the student passing written and oral qualifying examinations. The qualifying examination covers the student's area of specialization and two minor areas. Granting of the degree is contingent upon acceptance of the dissertation by the candidate's dissertation committee and satisfactory oral defense of the dissertation.

Seminar Requirement All candidates must enroll in the BPSC 250 seminar during each quarter in which it is offered. The dissertation defense is normally presented in the BPSC 250 seminar series; however, if necessary, a special seminar may be scheduled for the defense. Also, students must present at least one BPSC 250 seminar in addition to the defense of the dissertation. All students must complete at least one quarter of BPSC 240 (or approved similar equivalent that involves substantial student presentations) during the Ph.D. program.

Professional Development Training Ph.D. graduate students must enroll in BPSC 200A and BPSC 200B to fulfill their professional development training requirement.

Foreign Language Requirement None

Teaching Requirement Students must obtain at least one quarter of teaching experience.

Normative Time to Degree 15 quarters

Normative Time to Candidacy 2 years

Lower-Division Courses

BPSC 011 Plants and Human Affairs (4) F, S Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. An introduction for nonscience and non-Botany majors to the importance of plants and plant products in the shaping of human affairs and civilization. Covers the origin and practice of agriculture; the utilization of plant products; the latest agricultural advances, including genetic engineering; and the current agricultural and social issues. Plants and plant products are examined during class demonstrations and exercises. **Close, Huang**

BPSC 021 California's Cornucopia: Food from the Field to Your Table (5) S Lecture, 3 hours; discussion, 1 hour; outside activities, 30 hours per quarter. Prerequisite(s): none. Examines California's diverse agricultural products. Addresses related contemporary issues such as crop improvement by biotechnology, climate change, pollution, resource use, and nutrition. Also examines how the interplay of geography, history, and culture shapes the cuisine of a region. **Ellstrand**

BPSC 031 Spring Wildflowers (4) S Lecture, 3 hours; laboratory, 3 hours; one Saturday field trip. Prerequisite(s): none. General approach to the study of vegetative and floral features of plants as a means of identification and botanical classification of major plant families in Southern California. Secondary emphasis on the field biology of flowering plants. **Ezcurra**

BPSC 050 The Evidence for Evolution (4) Lecture, 3 hours; extra reading, 3 hours. Introduces and explores the extensive evidence supporting evolution as the driver of biological diversity. Designed for non-science majors and/or those with limited prior knowledge about biology. Includes the scientific method, paleontology, natural selection, genetics, speciation, and the importance of sex. Addresses the broader need for scientific literacy in society. Letter Grade or Satisfactory/No Credit (S/NC); no petition required. Cross-listed with ENTM 050. **Ellstrand, White**

BPSC 097 Lower-Division Research (1-4) Individual study, 3-12 hours. Prerequisite(s): consent of instructor. Involves special research projects in plant biology performed under faculty supervision. Requires a final written report. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 6 units.

Upper-Division Courses

BPSC 104 Foundations of Plant Biology (4) F, S Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): BIOL 005C. A study of the plant world from cells to ecosystems. Examines the structure and function of organisms from the major plant groups and their role in the biosphere. The laboratory explores the unique properties of plants. Cross-listed with BIOL 104.

BPSC 112 Systematics (4) F Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005C or equivalent. Principles and philosophy of classification. Topics include phylogenetic and phenetic methods, species concepts, taxonomic characters, evolution, hierarchy of categories, and nomenclature. Cross-listed with BIOL 112 and ENTM 112.

BPSC 132 Plant Anatomy (4) W Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): BIOL 005A and BIOL 005B, or consent of instructor. Functional and developmental aspects of plant cell, tissue, and organ structure. Covers all aspects of the flowering plant life cycle from germination to pollination and fruit and seed development. Cross-listed with BIOL 132. **Springer**

BPSC 133 Taxonomy of Flowering Plants (5) Lecture, 3 hours; laboratory, 3 hours; three 1-day Saturday field trips. Prerequisite(s): BIOL 005C. Introduces the principles and methods of identifying, naming, and classifying flowering plants. Surveys selected flowering

plant families in California and shows their interrelationships. **Waines**

BPSC 134 Soil Conditions and Plant Growth (4) W Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 104/BPSC 104 or ENSC 100; or consent of instructor. A study of the chemical, physical, and biological properties of soils and their influence on plant growth and development. Topics include soil-plant water relations; fundamentals of plant mineral nutrition; soil nutrient pools and cycles; soil acidity, alkalinity, salinity, and sodicity; root symbioses; and rhizosphere processes. Cross-listed with ENSC 134. **Crowley**

BPSC 135 Plant Cell Biology (4) W Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005C; BCH 100 or BCH 110A; or consent of instructor. Explores concepts of dynamic plant cell structures and functions as revealed by modern technologies such as genetic manipulation and live-imaging of cellular structures and molecules. **Yang**

BPSC 138 Plant Developmental Morphology (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): BIOL 005B, BIOL 005C, CHEM 112C, BCH 100 or BCH 110A (BCH 100 or BCH 110A may be taken concurrently), PHYS 002C, PHYS 002LC; or consent of instructor. Introduces the key areas of research in plant morphology and developmental biology. Emphasizes flowering plants (angiosperms). Cross-listed with BIOL 138. **Springer**

BPSC 143 Plant Physiology (4) W Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): BIOL 005A, BIOL 005B, BIOL 005C, CHEM 001C or CHEM 01HC, CHEM 112C, MATH 009B or MATH 09HB, PHYS 002C, PHYS 02LC, BCH 100 or BCH 110A (BCH 100 or BCH 110A may be taken concurrently), BIOL 104/BPSC 104; or consent of instructor. A survey of the fundamental principles of plant physiology including photosynthesis, respiration, water relations, mineral nutrition, growth, morphogenesis, plant hormones, dormancy, and senescence. Cross-listed with BIOL 143. **Lovatt**

BPSC 146 Plant Ecology (4) F Lecture, 3 hours; laboratory, 18 hours per quarter; field trip, 12 hours per quarter. Prerequisite(s): BIOL 104/BPSC 104 or BIOL 116; STAT 100A; or consent of instructor. A study of the fundamentals of plant ecology. Emphasizes community ecology, environment, life histories, population dynamics, species interactions, succession, ecosystem and landscape ecology, and plant conservation ecology. **Allen**

BPSC 148 Quantitative Genetics (4) W Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 05LA, BIOL 005B, BIOL 005C, BIOL 102, CHEM 001C or CHEM 01HC, CHEM 112C, MATH 009B or MATH 09HB, PHYS 002C, PHYS 02LC, BCH 100 or BCH 110A, STAT 100B; or consent of instructor. Examines approaches to studying the genetic basis of polygenic, metric traits. Includes types of gene action, partitioning of variance, response to selection, and inferring the number and location of quantitative trait loci. Cross-listed with BIOL 148. **Xu**

BPSC 150 Genes, Selection, and Populations (4) S Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 102 with a grade of "C-" or better, upper-division standing; or consent of instructor. Considers the conscious manipulation of allelic frequencies in populations as the basis for domestication of crop and animal species. Examines the genetic basis and standard strategies for the improvement of targeted characteristics in populations of plants and animals through selection and introgression of specific genes and gene constructs. **Close, Lukaszewski**

BPSC 153 Plant Genomics and Biotechnology Laboratory (4) F, Even Years Lecture, 1 hour; discussion, 1 hour; laboratory, 6 hours. Prerequisite(s): BCH 110C or BIOL 107A; upper-division standing; consent of instructor. A study of modern techniques in plant genome modification. Topics include nucleic acid

cloning and sequencing; plant tissue culture and genetic transformation; controlled-environment plant growth; gene mapping; and germplasm collections. Also explores the history of plant biotechnology; economic, agricultural, nutritional, medicinal, and societal relevance; and regulatory issues. Cross-listed with BCH 153 and BIOL 153. **Close**

BPSC 155 Chromosomes (4) F Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 005B, BIOL 005C, CHEM 001C or CHEM 01HC, CHEM 112C, MATH 009B or MATH 09HB, PHYS 002C, PHYS 02LC, BCH 100 or BCH 110A (BCH 100 or BCH 110A may be taken concurrently); or consent of instructor. An examination of the structure, function, and behavior of eukaryotic chromosomes. Cross-listed with BIOL 155. **Lukaszewski**

BPSC 158 Subtropical and Tropical Horticulture (4) F, Even Years Lecture, 4 hours; occasional field trips. Prerequisite(s): BIOL 005C or BIOL 104/BPSC 104 or consent of instructor. Studies the important subtropical and tropical crops of the world, emphasizing fruits, including citrus and avocado, with special reference to their botany, germplasm resources, climatic adaptation, and culture. **Waines**

BPSC 165 Restoration Ecology (4) W Lecture, 3 hours; two 1-day field trips; three half-day field trips. Prerequisite(s): BIOL 104/BPSC 104 or BIOL 116 or ENSC 100; CHEM 112A; STAT 100A (STAT 100A may be taken concurrently); or consent of instructor. BIOL 102 and CHEM 112C are recommended. An examination of the basic ecological principles related to land restoration. Topics include enhanced succession, plant establishment, plant adaptations, ecotypes, weed colonization and competition, nutrient cycling, functions and reintroduction of soil microorganisms, restoration for wildlife, and the determination of successful restoration. Includes field trips to restored sites. Cross-listed with BIOL 165. **Allen**

BPSC 166 Plant Physiological Ecology (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): BIOL 005C or consent of instructor; university-level courses in mathematics, physics, and chemistry are recommended. Topics include plant responses to light, temperature, evaporative demand, and limiting soil conditions. Explores photosynthesis, plant-water relations, and plant-temperature relations. Gives attention to plant adaptation to climates with varying aridity and temperature extremes. **Santiago**

BPSC 170 Ethnobotany (4) Lecture, 2 hours; seminar, 1 hour; discussion, 1 hour. Prerequisite(s): BIOL 104/BPSC 104 or consent of instructor. Introduces students to ethnobotanical research by reviewing selected ethnobotanical studies. Topics covered by lectures include fundamental principles of ethnobotany, the search for new medicines and other products made from plants, the role of humans in plant evolution, and the impact of plants on human cultures. Discussions focus on the past and present role of humans in plant conservation and the search for sustainable management practices in agriculture and forestry. Seminars by invited guests and enrolled students present selected topics in ethnobotany. Cross-listed with ANTH 170.

BPSC 183 Plant Biochemistry and Pharmacology of Plant Metabolites (4) F Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BCH 110A, BCH 110B; or BCH 100; or consent of instructor. Explores plant biochemistry and the significance of plant metabolites in medicine and pharmacology. Focuses on biotechnology, medicinal plants, and plant-derived drugs as well as the biochemical and pharmacological mode-of-action of secondary plant metabolites. Also addresses plant-specific biochemical processes such as photosynthesis. Cross-listed with BCH 183. **Eulgem**

BPSC 185 Molecular Evolution (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 105 or BIOL 107A or consent of instructor; BIOL 108 is recommended. Explores the evolution of genes, proteins,

and genomes at the molecular level. Focuses on the processes that drive molecular evolutionary change. Covers basic methodological tools for comparative and phylogenetic analyses of molecular data from an evolutionary perspective.

BPSC 190 Special Studies (1-5) F, W, S variable hours. Library, laboratory or field work designed to meet special curricular needs. A written proposal signed by the supervising faculty member must be approved by the major advisor and the Department Vice Chair. A written report must be filed. Course is repeatable, but total credit toward graduation may not exceed 6 units.

BPSC 193 Senior Seminar (2) W Seminar, 1 hour; lecture, 1 hour. Prerequisite(s): senior standing in Plant Biology. Emphasizes thinking across hierarchical levels and understanding structure-function relationships in plant biology. Includes lectures by instructors and presentation of classical or landmark papers by students. Satisfactory (S) or No Credit (NC) grading is not available. **Allen, Roose**

BPSC 195H Senior Honors Thesis (1-4) Thesis, 3-12 hours. Prerequisite(s): upper division standing; admission to the University Honors Program or consent of instructor. Directed research and completion of a senior Honors thesis under the supervision of a faculty member. Course is repeatable to a maximum of 12 units.

BPSC 197 Research for Undergraduates (1-4) F, W, S Outside research, 3-12 hours. Prerequisite(s): upper-division standing; consent of instructor. Individual research conducted under the direction of a Botany and Plant Sciences faculty member. A written proposal must be approved by the supervising faculty member and undergraduate advisor. A written report must be filed with the supervising faculty member at the end of the quarter. Course is repeatable.

BPSC 198-I Individual Internship in Botany and Plant Sciences (1-12) Internship, 2-24 hours; written work, 1-12 hours. Prerequisite(s): upper-division standing; consent of instructor. An off-campus internship related to plant biology. The student conducts the internship in the public or private sector but is jointly supervised by an off-campus sponsor and a faculty member in Botany and Plant Sciences. Requires an initial written proposal and a final written report. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.

BPSC 199 Senior Research (2-4) F, W, S Laboratory, 6-12 hours. Prerequisite(s): senior status; a GPA of 3.2 or better in upper-division courses in Botany/Plant Science and Biology; or consent of instructor. Individual research on a problem relating to Botany/Plant Science. A written proposal signed by the supervising faculty member must be approved by the major advisor and the Department Vice Chair. A written report must be filed with the supervising faculty member. Course is repeatable, but total credit toward graduation may not exceed 9 units.

Graduate Courses

BPSC 200A Plant Biology Core (2) F Lecture, 1 hour; practicum, 3 hours. Prerequisite(s): graduate standing in Plant Biology or consent of instructor. Explores plant biology research approaches. Emphasizes critical thinking and advanced planning of hypothesis testing, as well as experimental/descriptive/theoretical caveats, trade-offs, and options. Presents topics in a case-study approach. Also addresses professional development. Graded Satisfactory (S) or No Credit (NC). **Walling**

BPSC 200B Plant Biology Core (2) S Lecture, 1 hour; practicum, 3 hours. Prerequisite(s): BPSC 200A. Builds on material covered in BPSC 200A. Focuses on creating complete grant proposals based upon the guidelines of an actual funding source. Presents topics in a case-study approach. Includes peer review of completed proposals. **Walling**

BPSC 201 (E-Z) Methods in Plant Biology (1-2) F, S, W Laboratory, 3-6 hours. Prerequisite(s): consent of instructor. Explores the theory and principles of instruments and laboratory techniques applicable to research in the plant sciences. Experiments provide experience in the use of laboratory instruments and techniques including applications and limitations. E. Plant Molecular Biology; F. Plant Ecology; G. Plant Systematics; I. Plant Microscopy; J. Plant Physiology; K. Plant Genetics; M. Plant Cell Biology; N. Plant Cytogenetics. Segments are repeatable as content changes.

BPSC 205 Signal Transduction Pathways in Microbes and Plants (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing in the biological sciences, BIOL 107A or BIOL 113 or BIOL 114 or CBNS 101; or consent of instructor. Advanced topics in signal transduction pathways that regulate growth and development in plants and prokaryotic and eukaryotic microbes. Areas covered include two-component regulatory systems; quorum sensing; signaling via small and heterotrimeric G proteins; mitogen-activated protein kinase cascades; cAMP signaling; photoreceptors; plant hormone signaling; responses to low-oxygen stress; calcium signaling; and plant pathogenesis. Cross-listed with BCH 205, CMDB 205, GEN 205, MCBL 205, and PLPA 205.

BPSC 210 Methods in Arabidopsis Research (4) F Lecture, 1 hour; discussion, 1 hour; laboratory, 6 hours. Prerequisite(s): BCH 110C or BIOL 107A; BIOL 102; consent of instructor. A study of modern techniques used in Arabidopsis research. Topics include plant growth conditions, pest control, genetic crosses, chemical and insertional mutagenesis, genetic mapping techniques, nucleic acid isolation and manipulation, transformation, and internet resources.

BPSC 221 Advanced Plant Breeding (4) S, Even Years Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 148/BPSC 148 or consent of instructor; BPSC 150. Advanced treatment of plant breeding theory and practice including development and use of information on inheritance of traits; choice of breeding plans; breeding for yield, quality, and disease and stress resistance; and use of biotechnology. **Roose**

BPSC 222 Origins of Agriculture and Crop Evolution (3) W, Odd Years Lecture, 3 hours. Prerequisite(s): BIOL 102, BIOL 104/BPSC 104; or consent of instructor. Analysis of origins of agriculture in the Near East, China, the New World, and Africa. Survey of domestication and evolution of major crop plants and animals. **Waines**

BPSC 225 (E-Z) Advanced Topics in Plant Biology (2) F, W, S Lecture, 2 hours. Prerequisite(s): graduate standing or consent of instructor. An in-depth examination of selected topics in plant biology. E. Agricultural Plant Biology; F. Plant Cell Biology; G. Plant Development; I. Plant Evolution and Systematics; J. Plant Ecology; K. Plant Genetics; M. Plant Molecular Biology; N. Plant Biochemistry and Physiology Each segment is repeatable as its content changes.

BPSC 230 Molecular Plant-Microbial Interactions (3) Lecture, 2 hours; discussion, 1 hour. Prerequisite(s): BCH 100, BIOL 120/MCBL 120/PLPA 120, or equivalents. A study of the physiology of host-pathogen interactions with emphasis on the metabolism of diseased plants, nature of pathogenicity, and defense mechanisms in plants. Cross-listed with CMDB 230, GEN 230, and PLPA 230.

BPSC 231 The Plant Genome (4) W Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BCH 100, BIOL 107A; or BCH 110A, BCH 110B, BCH 110C; or consent of instructor. Gives students an appreciation for the structure of the plant nuclear, chloroplast, and mitochondrial genomes. Gene structure, regulation of gene expression, transposons, and methods of gene introduction are also emphasized. Cross-listed with BCH 231. **Bailey-Serres, Eulgem, Walling**

BPSC 232 Plant Development (4) S Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BCH 110C or BIOL 107A; BIOL 102; BIOL 104/BPSC 104; or consent of instructor. An examination of plant development, with emphasis on the genetic mechanisms used in patterning plant forms. Topics are taken from current literature and focus on molecular and cellular mechanisms. **Reddy**

BPSC 234 Statistical Genomics (4) F, Even Years Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 102, STAT 231B; or consent of instructor. Examines statistical methods of genome analysis. Topics include screening for genetic markers, linkage analysis, linkage disequilibrium, and mapping genes for complex diseases and quantitative traits. Covers statistical techniques, including analysis of least squares and maximum likelihood, Bayesian analysis, and Markov chain Monte Carlo algorithm. **Xu**

BPSC 237 Plant Cell Biology (4) F Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 107A or BIOL 143/BPSC 143 or BCH 100 or CBNS 101 or their equivalents, or consent of instructor. Studies the structure, function, and dynamics of plant cell division, expansion, and specialization. Emphasis on aspects unique to plants including cytoskeletal and cell plate dynamics during cytokinesis; intracellular trafficking and wall-dynamics during expansion; and targeting to chloroplasts and vacuoles during specialization. **Raikhel, Yang**

BPSC 239 Advanced Plant Physiology (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 143/BPSC 143 or consent of instructor. Examines advances in plant physiology, with emphasis on carbon and nitrogen metabolism, mineral nutrition, solute transport and phloem translocation, plant growth regulators, and secondary compounds in relation to growth and development. **Lovatt**

BPSC 240 Special Topics in Plant Biology (2) F, W, S Seminar, 2 hours. Prerequisite(s): consent of instructor. Discussion of current literature within special areas of plant science. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

BPSC 243 Plant Physiological Ecology (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 143/BPSC 143; BPSC 146 or equivalent; or consent of instructor. Analyzes adaptations and responses of plants to their environment, with emphasis on the physical environment, photosynthesis, temperature and water relations, growth and allocation, and plant interactions. **Santiago**

BPSC 245 Advanced Plant Ecology (4) F, Odd Years Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 009C or MATH 09HC; STAT 110 or STAT 231A or equivalent; an undergraduate course in ecology; or consent of instructor. Explores the fundamental ecological concepts, theoretical developments, quantitative methods, and experimental results involved in multiscale plant ecological studies. Emphasizes plant strategies, vegetation processes, ecosystem properties, and terrestrial landscapes and their interaction with environmental change and human land use. **Li**

BPSC 246 Landscape Ecology (4) F Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 116 or BPSC 146; STAT 231A; or consent of instructor. Introduces landscape ecology both as a sub-discipline of ecology and an interdisciplinary approach for environmental research. Includes identification of spatial patterns, pattern-process relationships, and scaling. Analyzes population, community, and ecosystem dynamics in connection with landscape functioning. Evaluates landscape theory and methods for applications in species conservation, pollution, and climate changes. **Jenerette**

BPSC 247 Ecological Theory and Modeling (4) W, Even Years Lecture, 2 hours; discussion, 2 hours. Prerequisite(s): MATH 009C or MATH 09HC; STAT 110 or STAT 231B or equivalent; an undergraduate course in

ecology; or consent of instructor. Explores the fundamental ecological theory and modeling methodology with emphasis on the ecosystem and landscape levels. Synthesizes current research developments in the context of their classic works. **Li**

BPSC 250 Seminar in Plant Biology (1) F, W, S Seminar, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Intensive study of selected topics in plant biology. Includes lectures by students, faculty, and invited scholars on subjects related to the principles of plant biology. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

BPSC 252 Special Topics in Botany/Plant Science (1) F, W, S Seminar, 1 hour. Prerequisite(s): graduate standing and consent of instructor. Oral presentations and intensive small-group discussion of selected topics in the area of special competence of each staff member. Course content will emphasize recent advances in the special topic area and will vary accordingly. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

BPSC 260 Seminar in Plant Physiology, Botany, or Genetics (1) W Seminar, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Lectures, discussions, and demonstrations by students, faculty, and invited scholars on selected subjects concerned with the principles of plant physiology, botany, or genetics. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

BPSC 261 Seminar in Genetics, Genomics, and Bioinformatics (1) W, S Seminar, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Oral reports by visiting scholars, faculty, and students on current research topics in Genetics, Genomics, and Bioinformatics. Graded Satisfactory (S) or No Credit (NC). Course is repeatable. Cross-listed with BCH 261, BIOL 261, ENTM 261, GEN 261, and PLPA 261.

BPSC 290 Directed Studies (1-6) F, W, S Individual study, 3-18 hours. Prerequisite(s): consent of instructor. Library, laboratory, or field studies conducted under the direction of a faculty member. Designed to meet specific curricular needs in areas of plant biology not covered by formal course work and outside of required directed dissertation or thesis research. Not intended to replace BPSC 297 or BPSC 299. Students who complete assigned extra work receive letter grades; other students receive Satisfactory (S) or No Credit (NC) grades. Course is repeatable to a maximum of 42 units.

BPSC 291 Individual Study in Coordinated Areas (1-6) F, W, S Prerequisite(s): graduate standing. A program of study designed to advise and assist candidates who are preparing for examinations. Up to 6 units may be taken prior to the master's degree. Up to 12 units may be taken prior to advancement to candidacy for the Ph.D. Graded Satisfactory (S) or No Credit (NC). Course is repeatable upon recommendation of the instructor.

BPSC 292 Concurrent and Advanced Studies in Botany and Plant Sciences (1-4) F, W, S Outside research, 3-12 hours. Prerequisite(s): consent of instructor. Elected concurrently with an appropriate undergraduate course, but on an individual basis. Devoted to one or more graduate projects based on research and criticism related to the course. Faculty guidance and evaluation is provided throughout the quarter. Course is repeatable.

BPSC 297 Directed Research (1-6) F, W, S Outside research, 3-18 hours. Prerequisite(s): graduate standing or consent of instructor. Individual research conducted under the direction of a Botany and Plant Sciences faculty member. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

BPSC 299 Research for Thesis or Dissertation (1-12)

F, W, S Graded Satisfactory (S) or No Credit (NC).
Course is repeatable.

Professional Course

BPSC 302 Teaching Practicum (1-4) F, W, S Prerequisite(s): graduate standing and appointment as Teaching Assistant. Supervised teaching of Botany/Plant Science courses including laboratory and/or discussion sections. Graded Satisfactory (S) or No Credit (NC). Course is repeatable for credit, but units not applicable toward degree unit requirements.

Business Administration

Adjunct Professor

Richard Savich, Ph.D. (Accounting and Information Systems)

Lecturers

Paul Beehler (Management)
Essia Hamouda (Accounting and Information Systems)
Sean Jasso (Management and Marketing)
Gary Patterson (Accounting and Information Systems)
Bruce Samuelson (Accounting and Information Systems)
Asish Satpathy (Information Systems and Finance)
Raj Singh (Management and Marketing)
Craig Weaver (Accounting and Information Systems)
Sari Silvanto-Ryan (Management and Marketing)

Majors

The B.S. in Business Administration is a two-year upper-division major offered by the School of Business Administration (SoBA). Students can enroll in a Pre-Business status and are advised in CHASS during their freshman and sophomore years. The Pre-Business curriculum includes the prerequisites to the major and the college breadth requirements. After admission to the major, students are advised by the SoBA through its Office of Undergraduate Programs located at 2340 Olmsted Hall. The B.S. degree in Business Administration is conferred by the SoBA.

The program is accredited by the AACSB International - The Association to Advance Collegiate Schools of Business.

Admission A limited number of students are accepted into the Business Administration major, chosen according to overall GPA. Students must apply for the major when they have completed not fewer than 75 and not more than 100 quarter units of college work. Final acceptance into the major is based on completion of all prerequisites and breadth requirements within a 100-quarter-unit limit, a GPA above 2.50 in major prerequisites, and cumulative GPA of at least 2.70. (Students who have not completed the foreign language breadth requirement may be accepted into the program, but they must complete the requirement before graduation.) Exceptions to the 100-quarter-unit maximum must be requested by petition.

UCR Students (excluding Pre-Business students) interested in changing major to Business Administration will be admissible to the Business Preparatory (BSPR), (which is not a major in UCR, but a holding group of transfer students who appear to be qualified for admission into business administration, but have some deficiencies which need to be completed before admission into business administration) status only if they can complete their deficiencies in breadth and/or major prerequisites within one quarter (the first quarter after admission into Bus-Preparatory).

The same rule will apply to students transferring in from a community college or a four-year school. In the event these students fail to meet this one quarter requirement, they will not be admitted into the BSPR category, and will be advised to find another major at UCR.

Students are encouraged to participate in at least one internship during their junior or senior year. Students interested in international

business are encouraged to consider opportunities for study through the Education Abroad Program, which has centers affiliated with more than 150 institutions in 35 countries worldwide. For further details, visit UCR's Off Campus Academic Experiences at eapoap.ucr.edu or call (951) 827-2508.

Outstanding academic achievement is recognized by the awarding of the Delta Sigma Pi Scholarship Key to a graduating senior. Other awards, presented on an annual basis, include the Bank of America Business Leaders Scholarship, Deloitte and Touche Scholarship, Gordon Blunden/Provident Savings Bank Business Scholarship, and the Ernst & Young Scholarship.

Graduating seniors are also eligible for the School of Business Administration Award for Academic and Service Excellence, and also the SoBA Concentration Area Awards, which recognizes the student with the best overall performance in each concentration area.

Each Spring, the top 10% of juniors and seniors in the Business Administration program are invited to join Beta Gamma Sigma, the only international honors society recognized by AACSB International. Membership in Beta Gamma Sigma is the highest recognition a business student anywhere in the world can receive in a business program accredited by AACSB International. New Members are recognized by an official induction ceremony led by the Dean of the School of Business Administration in the Spring quarter.

University Requirements

See Undergraduate Studies section.

College Requirements

Students must fulfill all breadth requirements of the College of Humanities, Arts, and Social Sciences or the Intersegmental General Education Transfer Curriculum prior to transferring to the UC.

Major Requirements

The following are requirements leading to the B.S. degree in Business Administration. At least 50 percent of business course requirements must be completed at UCR.

Business Administration Major

1. Preparation for Business Administration major (8 courses [at least 32 units])

Major prerequisites (non-BUS courses may be used to satisfy breadth requirements for the School of Business Administration):

- (1) BUS 010
- (2) BUS 020
- (3) ECON 002
- (4) ECON 003
- (5) CS 008
- (6) STAT 048
- (7) MATH 022
- (8) ECON 102 or ECON 103

142 / Programs and Courses

The major requirements for the B.S. in Business Administration are as follows:

- Upper-division major requirements (18 courses [at least 72 units])

Core courses (at least 10 courses [at least 40 units]):

BUS 100W, BUS 101, BUS 102, BUS 103, BUS 104/STAT 104, BUS 105, BUS 106/ECON 134, BUS 107, BUS 108, BUS 109

Concentration (At least 20 units): Students in the Business Administration major (BSAD) will be required to declare a concentration at least three quarters prior to graduation, provided they be allowed to change their concentration, if justified. The Office of Undergraduate Business Programs will manage the process. Students can declare one concentration.

Choose five courses from one of the concentrations listed below. Courses completed to meet upper division core requirements may not be used to meet concentration requirements.

Accounting and Auditing: BUS 154, BUS 160/ECON 160, BUS 161, BUS 162/ECON 162, BUS 165A, BUS 165B, BUS 165C, BUS 166, BUS 167, BUS 168A, BUS 168B, BUS 169A, BUS 169B

Finance: BUS 132 and at least four of the following: BUS 131, BUS 134, BUS 135, BUS 136, BUS 137, BUS 138, BUS 139, BUS 140E, BUS 146, BUS 147, BUS 148, BUS 153/ECON 153

Management: BUS 143, BUS 144, BUS 145, BUS 146, BUS 147, BUS 148, BUS 149, BUS 154, BUS 155, BUS 156, BUS 157, ANTH 105/BUS 158, BUS 173

Information Systems: BUS 125, BUS 128, BUS 171, BUS 172, BUS 173, BUS 174, BUS 175

Marketing: BUS 111, BUS 112, BUS 113, BUS 114, BUS 115, BUS 116, BUS 117, BUS 118, BUS 119, BUS 126

Operations and Supply Chain Management: BUS 122, BUS 124, BUS 125, BUS 126, BUS 127/STAT 127, BUS 128, BUS 129, BUS 130, BUS 173

An additional 3 courses (at least 12 units) of Business Administration elective courses from BUS 111-BUS 199H, excluding BUS 190. Courses completed to satisfy the five-course concentration requirement may not be used to meet this requirement. Related courses outside of Business Administration may be approved to satisfy their requirement with the approval of the Associate Dean or Assistant Dean of Undergraduate Student Affairs of SoBA.

Majors with Administrative Studies Components

B.A. degrees are offered in Art History, Economics, History, Political Science, and Sociology with Administrative Studies. A B.S. degree is offered in Sociology with Administrative Studies. Specified departmental requirements are listed under respective departmental listings.

- All requirements of the College of Humanities, Arts, and Social Sciences
- Specified requirements of the relevant department, to include at least 36 upper-division units in that discipline
- Administrative Studies requirements (37 units)**
 - Four lower-division courses (17 units)
 - BUS 010, BUS 020
 - STAT 048 or equivalent (may be used to satisfy breadth requirements)
 - CS 008 (may be used to satisfy breadth requirements)
 - Two upper-division courses (8 units) from the list below:
 - ECON 102 or ECON 104A or ECON 130 or ECON 162/BUS 162
 - PSYC 140 or PSYC 142
 - SOC 150 or SOC 151 or SOC 171
 - POSC 181 or POSC 182 or POSC 183
 - ANTH 127 or ANTH 131These two courses must be outside the discipline of the relevant major and cannot be courses included as part of the three-course Business Administration track or their cross-listed equivalents.
 - A three-course track (12 units) in Business Administration courses, from one of the following:
 - Accounting and Auditing: BUS 108, BUS 154, BUS 160/ECON 160, BUS 161, BUS 162/ECON 162, BUS 165A, BUS 165B, BUS 165C, BUS 166, BUS 167, BUS 168A, BUS 168B, BUS 169A, BUS 169B
 - Finance: BUS 106/ECON 134, BUS 131, BUS 132, BUS 134, BUS 135, BUS 136, BUS 137, BUS 138, BUS 139, BUS 140E, BUS 146, BUS 147, BUS 148, BUS 153/ECON 153
 - Management: BUS 107, BUS 143, BUS 144, BUS 145, BUS 146, BUS 147, BUS 148, BUS 149, BUS 154, BUS 155, BUS 156, BUS 157, ANTH 105/BUS 158, BUS 173.
 - Information Systems: BUS 101, BUS 125, BUS 128, BUS 171, BUS 172, BUS 173, BUS 174, BUS 175
 - Marketing: BUS 103, BUS 111, BUS 112, BUS 113, BUS 114, BUS 115, BUS 116, BUS 117, BUS 118, BUS 119, BUS 126
 - Operations and Supply Chain Management: BUS 104, BUS 105, BUS 122, BUS 124, BUS 125, BUS 126, BUS 127/STAT 227, BUS 128, BUS 129, BUS 130, BUS 173

Minor

Students declaring a minor in Business Administration will petition the Office of Undergraduate Business Programs at least three quarters prior to graduation. That office

will publicize the deadlines each quarter to all colleges and major departments.

Prerequisites for the minor in Business Administration are as follows:

- Three lower-division courses (14 units) (must be completed with no grade lower than "C"): BUS 020, ECON 003, STAT 048

Requirements for the minor in Business Administration are as follows:

- Six upper-division courses (24 units):
 - Four courses from the following: BUS 101, BUS 102, BUS 103, BUS 104/STAT 104, BUS 105, BUS 106/ECON 134, BUS 108
 - Two additional upper-division Business Administration courses from BUS 100W-BUS 199H, excluding BUS 190. Courses completed to satisfy the four course requirement in section "a)" above may not be used to meet this requirement.

Lower-Division Courses

BUS 010 Introduction to Business (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Provides an overview of the field of business administration. Explores business goals and strategies, functional areas of business and their integration in policy and decision making, social responsibility, computers in business, and business trends and challenges including the international dimension.

BUS 020 Financial Accounting and Reporting (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. A study of the concepts and techniques for measurement and communication of financial information. Includes interpretation of financial statements.

BUS 021 Generation of Financial Accounting Information (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BUS 020 with a grade of "C-" or better. A detailed study of the process of measuring, recording, and communicating financial accounting information.

Upper-Division Courses

BUS 100 Management Communication (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): upper-division standing. Covers the theory and practice of communication in a business environment. Topics include written and oral presentations, interpersonal skills, teamwork in a multicultural setting, and effective use of communication technologies.

BUS 100W Management Writing and Communication (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ENGL 001B with a grade of "C" or better; upper-division standing or consent of instructor. Focuses on writing and communication methods in a business environment. Topics include written and oral presentations, interpersonal skills, teamwork in a multicultural setting, and effective use of communication technologies. Fulfills the third-quarter writing requirement for students who earn a grade of "C" or better for courses that the Academic Senate designates, and that the student's college permits as alternatives to English 001C.

BUS 101 Information Technology Management (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CS 008 or equivalent; upper-division standing. Topics include computer hardware and software, business data processing, databases, telecommunications, systems analysis and design, cost-benefit analysis, and systems applications in business. Includes database and spreadsheet projects.

BUS 102 Ethics and Law in Business and Society (4)

Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): upper-division standing. Analyzes the legal, ethical, political, and social aspects of the business environment. Topics include ethics and social responsibility, government regulation, corporate governance, and global management issues.

BUS 103 Marketing and Distribution Management (4)

Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. An introduction to the role of marketing in society with emphasis on concepts, marketing methods, and institutions.

BUS 104 Decision Analysis and Management Science (4)

Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CS 008 or equivalent; STAT 048 or STAT 100A or equivalent; upper-division standing. A survey of deterministic and probabilistic models for decision making. Topics include linear programming and extensions, networks, dynamic programming, decision trees, queuing models, and simulation. Explores the application of these models in decision making. Emphasizes use of the computer. Cross-listed with STAT 104.

BUS 105 Production and Operations Management (4)

Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BUS 104/STAT 104 or equivalent. Deals with the issues of design and control of production systems in manufacturing and service organizations. Covers product and process selection, capacity planning, location and layout design, project and job scheduling, inventory control, material planning, and quality control.

BUS 106 Introduction to Financial Management (4)

Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BUS 020; ECON 002 (or ECON 002H); ECON 003; ECON 101 or STAT 048; upper-division standing. An introduction to financial management and financial institutions. Includes time value of money, stock and bond valuation, risk and return, portfolio theory, capital budgeting, capital structure, dividend policy, and financial databases. Cross-listed with ECON 134.

BUS 107 Organizational Behavior (4)

Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): upper-division standing. Studies organizations from the behavioral science perspective. Topics include motivation, leadership, communication, groups, organization structure and culture, and control in complex organizations.

BUS 108 Financial Evaluation and Managerial Analysis (4)

Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BUS 020 or equivalent; upper-division standing. Study of accounting data used for managerial planning and controlling of business operations. Provides an introduction to manufacturing operations and cost accounting systems, cost-volume-profit analysis, relevant costing, standard costing and variance analysis, as well as budgeting.

BUS 109 Competitive and Strategic Analysis (4)

Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): senior standing in Business Administration. An integrative course which provides an understanding of strategic decision-making processes in organizations, the interrelationships among functional areas, and how decision making is affected by internal and external environments. Teamwork and case studies are emphasized.

BUS 111 Services Marketing (4)

Lecture, 3 hours; outside project, 3 hours. Prerequisite(s): BUS 103. Covers the marketing of services and ideas. Focuses on marketing for service organizations such as hotels, hospitals, and banks. Provides understanding of the broader role of service provision for both service firms and goods firms.

BUS 112 Consumer Behavior (4)

Lecture, 3 hours; extra reading, 2 hours; projects, 1 hour. Prerequisite(s): BUS 103. Provides a basic understanding of

the general models of choice behavior as it relates to marketing decision making. Emphasis is on motivation, perceptions, learning, and social forces as they impact on the choice process.

BUS 113 Marketing Institutions (4)

Lecture, 3 hours; extra reading, 2 hours; projects, 1 hour. Prerequisite(s): BUS 103. Covers the concepts and strategies relating to the delivery of consumer goods and services, the main topic being the management of marketing activities within the channels of distribution, especially in retail and wholesale institutions.

BUS 114 Marketing in a Global Environment (4)

Lecture, 3 hours; outside research, 2 hours; term paper, 1 hour. Prerequisite(s): BUS 103. Covers the theory and practice of marketing across national borders. Provides an understanding of global marketing environments and examines the development of marketing strategies to maximize growth of global companies.

BUS 115 Marketing Research (4)

Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): BUS 103. Covers types and sources of marketing information, the marketing research process, and techniques of data collection and analysis, including consumer and customer surveys and test marketing. Examines both quantitative and qualitative research with analysis of the values and limitations of data. Emphasis is placed on evaluation and interpretation of results.

BUS 116 Pricing Strategy and Management (4)

Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): BUS 103 or consent of instructor. Integrates theory and practice into a framework for making pricing decisions. Prepares for addressing strategic and tactical pricing issues. Topics include customer demand and price sensitivity, psychological reaction to price, segmented pricing, price promotions, bundling, online pricing, dynamic pricing, competitive reaction, profitability analysis, and pricing strategy development.

BUS 117 Advertising (4)

Lecture, 3 hours; extra reading, 2 hours; projects, 1 hour. Prerequisite(s): BUS 103. Covers the basic concepts and functions of advertising, with emphasis on media selection, message design, and effectiveness measurement.

BUS 118 Electronic Marketing (4)

Lecture, 3 hours; outside project, 3 hours. Prerequisite(s): BUS 103. An introduction to the role of electronic commerce in business-to-consumer and business-to-business marketing. Covers the application of traditional marketing principles to an electronic commerce environment and new marketing techniques made possible by this environment.

BUS 119 Database Marketing (4)

Lecture, 3 hours; individual study, 2 hours; extra reading, 1 hour. Prerequisite(s): BUS 103. Examines marketing cases and develops data analytical skills for managerial decision making. Utilizes statistical software to manage, display, and analyze marketing information, including consumer survey, relationship management, scanner, and socioeconomic data. Topics include attitude measurement, market segmentation and targeting, competition analysis, market performance analysis, and store location choice.

BUS 122 Linear Programming with Applications (4)

Lecture, 3 hours; homework problems and projects, 3 hours. Prerequisite(s): BUS 104/STAT 104 or equivalent. Investigates many real-life decision problems that give rise to linear programs with special structures, network flow problems, integer programs, and large-scale programs. Presents theory and algorithms of these models applied to various decision problems in management with use of computer packages.

BUS 123 Spreadsheet Modeling for Decision-Making (4)

Lecture, 3 hours; written work, 3 hours. Prerequisite(s): BUS 104/STAT 104 or consent of instructor. Introduces the fundamental techniques of using data to make informed management decisions in the

presence of uncertainty of advanced Microsoft Excel functionality. Uses spreadsheet modeling for decision analysis and optimization applications. Enhances and reinforces analytical skills and the ability to intelligently use information for making decisions under uncertainty.

BUS 124 Business Analytics (4)

Lecture, 3 hours; term paper, 1 hour; written work, 2 hours. Prerequisite(s): STAT 048 or consent of instructor. Provides fundamental concepts and tools needed to understand the emerging role of business analytics in organizations. Applies basic business analytics tools in a spreadsheet environment. Introduces market-leading techniques that help identify and manage key data from business processes. Provides the essential tools required for data mining and business process re-engineering.

BUS 125 Simulation for Business (4)

Lecture, 3 hours; extra reading, 1.5 hours; outside projects, 1.5 hours. Prerequisite(s): BUS 104/STAT 104, STAT 048, or equivalents. Introduces simulation as a tool for analyzing complex systems. Analyzes and discusses the theory and practice of modeling through simulation. Topics include modeling uncertainty and collecting input data, Monte Carlo simulation techniques, model verification and validation, and sensitivity analysis. Examines applications in finance, marketing, operations, and supply chain management.

BUS 126 Practical Business Forecasting (4)

Lecture, 3 hours; assigned problems, 3 hours. Prerequisite(s): STAT 048 or STAT 100A or equivalent; upper-division standing. Teaches how forecasts are developed and utilized. Emphasizes common forecasting methods used in business and uses specific cases to illustrate these methods. Applications to business include forecasting sales, production, inventory, macroeconomic factors such as interest and exchange rates, and other aspects of both short- and long-term business planning.

BUS 127 Introduction to Quality Improvements (4)

Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): STAT 048 or STAT 100A or consent of instructor. Explores Deming's 14 points for management, graphical methods, fishbone diagram, Pareto analysis, control charts for attributes and variables, cusum and moving average charts, process-capability, economic design, acceptance sampling, Taguchi method, parameter design, tolerance design, reliability, hazard rate, censoring, and accelerated life testing. Cross-listed with STAT 127.

BUS 128 Project Planning and Control (4)

Lecture, 3 hours; assigned problems and field project, 3 hours. Prerequisite(s): BUS 104/STAT 104 or consent of instructor. Covers issues related to planning and control. Explores the differences between projects and production systems; breakdown structures of project organization and work; sequencing and budgeting; resource management; project evaluation and control; and use of current project management software. Includes application of methodology to a real-world project.

BUS 129 Supply Chain Management (4)

Lecture, 3 hours; assigned problems, 3 hours. Prerequisite(s): BUS 105. Focuses on management of the distribution of goods and services from plants, ports, and vendors to customers. Key topics include transportation, inventories, warehousing, materials handling, order processing, packaging, pricing, customer service standards, and warehouse and retail location.

BUS 130 Supply Chain Modeling (4)

Lecture, 3 hours; homework problems and preparation for presentations, 3 hours. Prerequisite(s): BUS 104/STAT 104 or BUS 105. Covers the modeling and analysis of decision problems in supply chain management. Includes logistics network design, integration of supply chain operations, and supply and sourcing decisions. Utilizes the electronic spreadsheet as the principal device for building models, as well as addresses the concepts of effective spreadsheet design and use.

BUS 131 Fixed-Income Securities (4) Lecture, 3 hours; outside research, 1 hour; extra reading, 2 hours. Prerequisite(s): BUS 106/ECON 134 and BUS 132 with grades of "C-" or better. Covers fixed-income securities and basic analytical tools in fixed-income markets. Topics include relative pricing of fixed-income securities, yield-curve estimation, securities with embedded options, and trading strategies. Utilizes instruments such as interest rate swaps, mortgage-backed securities, and credit derivatives.

BUS 132 Foundations of Finance (4) Lecture, 3 hours; written work, 3 hours. Prerequisite(s): BUS 020; ECON 101 or STAT 048; ECON 102 or ECON 104A; upper-division standing. Covers the mathematical and economic foundations of finance. Topics include intertemporal production and consumption, fisher separation, risk and return, two-fund separation, standard asset-pricing models, arbitrage, derivatives concepts and parity relationships, and international finance parity relationships.

BUS 134 Corporate Finance (4) Lecture, 3 hours; term paper, 2 hours; extra reading, 1 hour. Prerequisite(s): BUS 106/ECON 134 and BUS 132 with grades of "C-" or better. Explores capital budgeting under uncertainty, cost of capital, capital structure, and basics of corporate governance. May cover other related topics. Provides an understanding of the theoretical issues related to these topics. Emphasizes formulating optimal financial decisions. May include case-method teaching and data analysis.

BUS 135 Corporate Financial Policy (4) Lecture, 3 hours; term paper, 2 hours; extra reading, 1 hour. Prerequisite(s): BUS 106/ECON 134 and BUS 132 with grades of "C-" or better. Covers application of option pricing in corporate finance, financial planning, working capital management, mergers and acquisitions, and risk management. May cover other related topics. Emphasizes formulating optimal financial decisions. May include case-method teaching and data analysis.

BUS 136 Investments: Security Analysis and Portfolio Management (4) Lecture, 3 hours; extra reading, 2 hours; projects, 1 hour. Prerequisite(s): BUS 106/ECON 134 and BUS 132 with grades of "C-" or better. Provides a thorough study of the investment process. Topics include portfolio selection, asset-pricing models, term structure, and portfolio performance valuation. Discusses empirical uses of securities data and empirical issues in testing asset pricing models.

BUS 137 Investments: Derivatives Markets (4) Lecture, 3 hours; extra reading, 2 hours; projects, 1 hour. Prerequisite(s): BUS 106/ECON 134 and BUS 132 with grades of "C-" or better. Covers option market characteristics, option pricing theories, and speculative strategies used in local, national, and international markets. Analyzes other derivatives instruments including futures, forwards, and swaps. Discusses empirical uses of securities data related to derivatives markets.

BUS 138 International Finance (4) Lecture, 3 hours; extra reading, 2 hours; projects, 1 hour. Prerequisite(s): BUS 106/ECON 134 with grade of "C-" or better or equivalent; upper-division standing. A survey of international financial institutions and the financial factors that affect the modern multinational corporation. Covers trade and international investment theories and empirical analysis. Topics include the international financial systems, balance of payments, foreign exchange markets, measurement of foreign exchange risk, hedging, international asset pricing, and trade financing.

BUS 139 Real Estate Investments (4) Lecture, 3 hours; extra reading, 2 hours; projects, 1 hour. Prerequisite(s): BUS 106/ECON 134 with grade of "C-" or better. Analysis of real estate development including consideration of site selection, market analysis, financing, design and construction, loan contracts, mortgage risks, and investment analysis.

BUS 140 (E-Z) Current Topics in Finance (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): BUS 106/ECON 134 with grade of "C-" or better. Addresses contemporary issues in finance. Includes financial markets, private equity, asset pricing, performance evaluation, derivative securities, market micro structure, corporate finance, corporate control and governance, and the global economy. Explores recent developments in theoretical, empirical, and applied finance. Also addresses the regulatory and ethical environment of finance. Each segment is repeatable as its topics change to a maximum of 8 units.

BUS 143 Judgment and Decision Making (4) Lecture, 3 hours; written work and group presentation, 3 hours. Prerequisite(s): senior standing. Covers decision making, including thinking and judgments; information selection and evaluation; learning and memory; the social side of judgment and decision making; fairness, moral obligations, and social dilemmas; and decision making in organizations.

BUS 144 Negotiation Fundamentals (4) Lecture, 3 hours; outside projects, 3 hours. Prerequisite(s): senior standing. Develops an understanding of the theory and processes underlying a broad spectrum of negotiation problems. Students attain competency in negotiations by applying analytic and interpersonal skills covered in readings and lecture to regular exercises and debriefings.

BUS 145 Conflict and Cooperation in Groups (4) Lecture, 3 hours; assigned problems, 3 hours. Prerequisite(s): STAT 048 or STAT 100A; senior standing. A general survey of the major concepts and techniques of game theory. Illustrates the basic concepts of games in extensive and strategic form. Also addresses the solution concept of the Nash equilibrium for non-cooperative games with major findings of experimental research. Reviews selected applications in business and economics.

BUS 146 Introduction to Entrepreneurship (4) Lecture, 30 hours per quarter; outside research, 30 hours per quarter. Prerequisite(s): BUS 106/ECON 134 with grade of "C-" or better; upper-division standing. Discusses the nature of entrepreneurship and its role in the economy. Topics include identifying and evaluating business opportunities, creating a team, and acquiring financial and other necessary resources.

BUS 147 Entrepreneurial Finance (4) Lecture, 30 hours per quarter; outside research, 30 hours per quarter. Prerequisite(s): BUS 106/ECON 134 and BUS 132 with grades of "C-" or better. Focuses on the financing of entrepreneurial ventures. Provides an understanding of opportunity recognition skills, funding techniques, and institutions involved in the financing of new ventures. Includes financial modeling, cash needs assessment, valuation, deal structure, financing alternatives, simulation, and harvesting.

BUS 148 Business Plan Development (4) Lecture, 30 hours per quarter; outside research, 30 hours per quarter. Prerequisite(s): BUS 146. Covers the process of developing a business plan. Provides students with skills necessary to assess new venture opportunities and convert them into businesses.

BUS 149 Application of Psychology and Economics to Management (4) Lecture, 3 hours; extra reading, 1.5 hours; written work, 1.5 hours. Prerequisite(s): upper-division standing or consent of instructor. Covers behavioral economics and the applications to management. Includes incentives and motivation, social labor, the psychology of money, competition and markets, grey marketing and revenge, dishonesty and cheating, decision-making in groups, other-regarding preferences, and welfare inferences and well-being.

BUS 153 Labor Economics (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 102 or ECON 104A. An analysis of labor demand, labor supply, and the structure of wages. Emphasizes neoclassical, institutional, and radical perspectives. Cross-listed with ECON 153.

BUS 154 Business Law (4) Lecture, 3 hours; extra reading, 1.5 hours; term paper, 1.5 hours. Prerequisite(s): upper-division standing. Studies law as an integral part of the business environment, a process derived from and changing with the larger society. Areas covered include contracts, torts, agency, partnerships, corporations, and bankruptcy.

BUS 155 Managing Human Resources (4) Lecture, 3 hours; extra reading and project, 3 hours. Prerequisite(s): BUS 107; upper-division standing. Applies a strategic planning approach to managing relations between an organization and its human resources. Topics include processes of forecasting and job analysis, environmental scanning, recruitment and selection, evaluation and compensation, and dispute resolution.

BUS 156 Leadership Development (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): BUS 107; upper-division standing. Analyzes leadership theory and practice through lectures, self-analysis instruments, and discussions of independent field experiences. Surveys areas pertaining to leadership, such as leadership theory, leadership style, oral and written communication, ethical leadership, interpersonal conflict management, and the dynamics of culture, and gender in organization leadership.

BUS 157 Managing Work Force Diversity (4) Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing. BUS 155 or PSYC 142 is recommended. Covers management issues triggered by the increasing participation of women and minorities in the work force. Topics include work role stereotyping, workplace representation and segregation, culturally based leadership and communication styles, work-family conflicts, and related legislative initiatives.

BUS 158 Organizations as Cultural Systems (4) Lecture, 6 hours; extra reading and written exercises, 6 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines the role of culture in the formation and management of complex bureaucratic organizations. Covers types of organizations and organizational cultures, the impact of the cultural environment, and problems posed by rapid cultural change. Offered in summer only. Cross-listed with ANTH 105.

BUS 160 Industrial Organization (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 104B. A study of the organization and structure of the American industrial system. Emphasizes production and pricing behavior and policies. Also addresses market structure and public policies regulating or influencing market behavior. Cross-listed with ECON 160.

BUS 161 Forensic and Fraud Auditing (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BUS 165B. An introduction to forensic accounting and fraud examination and how they pertain to both civil and criminal matters. Covers the characteristics of fraud, fraud prevention and detection, investigative techniques, asset recovery, and the use of information technology.

BUS 162 Managerial Economics (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ECON 102 or ECON 104A. Examines applications of economic analysis to problems of management, especially of capital. Emphasis is on production economics and cost analysis. Cross-listed with ECON 162.

BUS 165A Intermediate Financial Accounting (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): BUS 021 or equivalent. In-depth study of financial accounting theory and practice. Develops an understanding of accounting concepts and generally accepted accounting principles and the ability to apply this technical knowledge to solve accounting problems. Topics include principal financial statements and accounting and valuation of various assets.

BUS 165B Intermediate Financial Accounting (4)

Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): BUS 165A or equivalent. Continuation of study of financial accounting theory and practice. Topics include current liabilities and contingencies, long-term liabilities, contributed capital, retained earnings, and temporary and long-term investments.

BUS 165C Intermediate Financial Accounting (4)

Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): BUS 165B or equivalent. Continuation of study of financial accounting theory and practice. Covers the conceptual discussion and procedural presentation of financial accounting topics as well as recent developments in accounting valuation and reporting practices promulgated by practitioners in industry and public accountants.

BUS 166 Accounting Information Systems (4)

Lecture, 3 hours; extra reading, 2 hours; projects, 1 hour. Prerequisite(s): BUS 101, BUS 108, or equivalents. Study of the concepts and techniques in the design and implementation of accounting information systems within companies' operating environments. Emphasis is on the effects of the computer on these systems.

BUS 167 Advanced Financial Accounting (4)

Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): BUS 165C (may be taken concurrently). Covers advanced accounting topics such as consolidated financial statements, accounting for multinational corporations, partnership accounting, and accounting for nonprofit organizations.

BUS 168A Individual Taxation (4)

Lecture, 3 hours; extra reading, 2 hours; projects, 1 hour. Prerequisite(s): BUS 108 or equivalent. Concentrates primarily on the basic provisions of the federal income taxes imposed on individuals and the accounting for those taxes. While the major emphasis is on current tax provisions and tax planning, consideration is also given to the legislative and judicial development of these provisions.

BUS 168B Federal Taxation for Corporations, Partnerships, Estates, and Trusts (4)

Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): BUS 168A. Covers tax research, corporate taxation, partnership taxation, the wealth transfer taxes, income taxation of estates and trusts, international taxation, and tax administration.

BUS 169A Auditing (4)

Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): BUS 165B. Covers the auditing environment, the auditor's legal liability, audit responsibilities and objectives, audit evidence, audit planning and documentation, the auditor's report, and management letters.

BUS 169B Quality Assurance in Auditing (4)

Lecture, 3 hours; case analyses, 3 hours. Prerequisite(s): BUS 169A. Covers the audit process (internal control, compliance tests, sampling, substantive evidence gathering, electronic data processing auditing) and the audit procedures for various types of accounts such as sales, cash, accounts receivable, payroll, inventory, and capital acquisitions.

BUS 171 Systems Analysis and Design (4)

Lecture, 3 hours; extra reading, 2 hours; projects, 1 hour. Prerequisite(s): BUS 101 or equivalent. Involves detailed analysis, specification, design, and implementation of computer-based information systems. Includes economic analyses, evaluation of alternatives, analysis or design tools, and systems project management and planning. Case studies are used.

BUS 172 Information Economics (4)

Lecture, 3 hours; assigned cases and project, 3 hours. Prerequisite(s): BUS 103; ECON 004 or equivalent. Discusses economic concepts and strategies related to the network economy. Topics include economic issues surrounding information goods, competition in electronic business, pricing strategies, and intellectual property protections. Examines business strategies for the information (software) and infrastructure (hardware) elements of electronic business.

BUS 173 Introduction to Databases for Management (4)

Lecture, 3 hours; extra reading, 2 hours; projects, 1 hour. Prerequisite(s): BUS 101 or equivalent. Covers physical and conceptual aspects of database management systems, including familiarity with the variety of database systems based on different data models. Examines the role of database systems in management information systems (MIS) and issues in database design for effective support of MIS. Requires the use of a database package.

BUS 174 Electronic Commerce (4)

Lecture, 3 hours; extra reading, 2 hours; project, 1 hour. Prerequisite(s): BUS 101. Reviews the technological evolution of electronic commerce (EC). Investigates how EC can be used to interact with customers, other organizations, and those within the organization. Studies technical innovations, provides a critical evaluation of strategies, and examines current applications and their impact on the business environment.

BUS 175 Business Data Communications (4)

Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): BUS 101. Surveys components of telecommunication systems; examines major design and analysis issues in the development and implementation of computer communication systems. Studies both voice and data communication systems including local area networks, wireless systems, satellite systems, and distributed computer and database systems. Emphasizes evaluation of these systems for business purposes.

BUS 176 The Sociology of Work in Organizations (4)

Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): SOC 001 or SOC 001H or consent of instructor. Emphasizes the roles of individuals in organizations. Topics include the effects of jobs on workers, long-term trends in the nature of work, and differences in work among major segments of the labor force. Cross-listed with SOC 176.

BUS 178 International Trade (4)

Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 102 or ECON 104A. A study of the pure theory of trade, trade policy, and international factor movements. Includes illustrative applications to current issues and problems. Cross-listed with ECON 178.

BUS 190 Special Studies (1-5)

Individual study, 3-15 hours. Prerequisite(s): upper-division standing; consent of instructor and program chair. A project to be undertaken under faculty supervision. Course is repeatable to a maximum of 12 units.

BUS 198-I Individual Internship in Business Administration (1-12)

Seminar, 1 hour; internship, 3-36 hours; term paper, 1-11 hours. Prerequisite(s): upper-division standing in Business Administration; consent of instructor. Active participation in the work of a business concern or a public or quasi-public agency combining academic instruction and supervised field experience. A maximum of 4 quarter units may be counted toward the degree requirements for Business Administration. Course is repeatable to a maximum of 16 units.

BUS 199H Senior Honors Research (1-5)

Seminar, 1 hour; extra reading, 2-12 hours; term paper, 2-12 hours. Prerequisite(s): senior standing with a major in Business Administration; admission to the University Honors Program or consent of instructor. Involves research in business administration under faculty supervision. Students submit a written report. Graded In Progress (IP) until the last quarter is completed, at which time a final grade is awarded. Course is repeatable to a maximum of 12 units.

Cell Biology and Neuroscience

Subject abbreviation: CBNS

College of Natural and Agricultural Sciences

David A. Eastmond, Ph.D., Chair
Department Office, 2710 Life Sciences,
Psychology Bldg.
(951) 827-5903; cbns.ucr.edu

Professors

Michael E. Adams, Ph.D. (Cell Biology and Neuroscience/Entomology)
Maksim Bazhenov, Ph.D.
David A. Eastmond, Ph.D.
Sarjeet S. Gill, Ph.D.
Manuela Martins-Green, Ph.D.
Frances M. Sladek, Ph.D.
B. Glenn Stanley, Ph.D. (Cell Biology and Neuroscience/Psychology)
Prudence Talbot, Ph.D.
Raphael Zidovetzki, Ph.D.

Professors Emeritus

Katharine D. Atkinson, Ph.D.

Associate Professors

Jeffrey B. Bachant, Ph.D.
Margarita C. Currás-Collazo, Ph.D.
Scott N. Currie, Ph.D.
Karine G. Le Roch, Ph.D.
Constance I. Nugent, Ph.D.

Assistant Professors

Todd Fiacco, Ph.D.
I-Chueh Huang, Ph.D.
Fedor V. Karginov, Ph.D.
Nicole zur Nieden, Ph.D.
Martin Riccomagno, Ph.D.
**

Adjunct Associate Professors

André Obenaus, Ph.D.

Research in the Department of Cell Biology and Neuroscience uses multidisciplinary approaches to understanding basic cellular processes in various tissues, including the nervous system, as well as more integrative levels of analysis, including behavior. Areas of research represented in the department include the following:

- Biophysical properties of excitable membranes
- DNA repair
- Transcriptional regulation
- Mechanisms of toxicity
- Insect development
- Membrane transport
- Mechanisms of mitotic chromosome transmission
- Telomere maintenance
- Synaptic structure and function
- Changes in nervous system with experience
- Interactions of nervous and endocrine systems
- Reproductive biology and fertilization
- Chemokine function in wound healing and tumor development
- Glia-neuron signaling and sensory and motor integrative processes
- RNA Biology

Undergraduate Curriculum

Students interested in cell, molecular, and developmental biology can obtain training through the interdepartmental major in Cell, Molecular, and Developmental Biology leading to the B.S. degree. Students interested in neuroscience can obtain training in behavioral neuroscience, neurobiology, and neurochemistry through the Neuroscience major leading to the B.A. or B.S. degree. The Neuroscience major is an intercollege major offered by the College of Humanities, Arts, and Social Sciences and the College of Natural and Agricultural Sciences. See Cell, Molecular, and Developmental Biology section and Neuroscience Undergraduate Major section, respectively.

Graduate Curriculum

Courses and research opportunities are offered by the interdepartmental graduate programs in Cell, Molecular, and Developmental Biology; Environmental Toxicology; and Neuroscience. See the respective graduate program section.

Lower-Division Course

CBNS 004 Concepts in Medical Cell Biology (3)

Lecture, 1 hour; workshop, 4 hours. Prerequisite(s): CHEM 001A or CHEM 01HA (may be taken concurrently). Introduces fundamental concepts in molecular cell biology, with emphasis on human health and disease. Modules involve lectures and interactive, problem-oriented discussions with faculty. Through classical and contemporary examples, modules acquaint students with the scientific process and how it leads to insights into human biology. Credit is not awarded for CBNS 004 if it has already been awarded for BIOL 005A.

Upper-Division Courses

CBNS 101 Fundamentals of Cell Biology (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 112C; BCH 100 or BCH 110A (BCH 100 or BCH 110A may be taken concurrently). Introduces the principles of eukaryotic cell biology. Includes an examination of the molecules and systems that mediate cell function and an overview of membrane architecture and function, cell signaling and signal transduction, the cytoskeleton, organelles, protein targeting and secretion, and the nucleus and nuclear transport. Credit is not awarded for CBNS 101 if it has already been awarded for BIOL 113 or BIOL 114.

CBNS 106 Introduction to Neuroscience (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A and BIOL 005B with grades of "C-" or better, CHEM 001A, CHEM 001B, CHEM 001C; or consent of instructor. An introduction to cellular, organismal, and behavioral neuroscience for science majors. Topics include structure and functions of the brain, neurons, and synapses; sensory systems and perception; control of movement; neurobiology of hormones and sexual behavior; biorhythms, learning, memory, and psychoses. **Currás-Collazo, Fiacco, Korzus, Stanley**

CBNS 108 Introduction to Developmental Biology (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 102, CHEM 112C; or consent of instructor. Emphasizes common principles and key concepts that govern development of multiple eukaryotic systems, and how genes control cell behavior during development.

CBNS 116 Human Neuroanatomy: Structure-Function Relationships (4) S

Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CBNS 106 with a grade of "C-" or better or consent of instructor. Provides in-depth study of human functional neuroanatomy including gross anatomy of the brain and spinal cord, microscopic anatomy (histology) of cellular components, and fine structure of the nervous system at the electron microscope (EM) level. Emphasizes understanding the neuroanatomy of key structures (e.g., hypothalamus, brainstem, hippocampus).

Fiacco

CBNS 120 Cellular Neuroscience: Membrane and Synaptic Phenomena (4)

Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CBNS 106 or consent of instructor. An examination of cellular and molecular mechanisms of nervous system function using concepts drawn from the study of vertebrates and invertebrates with emphasis on mammalian systems. Cross-listed with PSYC 120.

CBNS 120L Neuroscience Laboratory (2)

Lecture, 1 hour; laboratory, 3 hours. Prerequisite(s): CBNS 120/PSYC 120 or concurrent enrollment. Laboratory experiments using electrophysiological, chemical, and anatomical research methods fundamental to understanding neurons and neural systems. Cross-listed with PSYC 120L.

CBNS 121 Developmental Neuroscience (4)

Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CBNS 106 or consent of instructor. A study of the development of nervous systems. Examines the cellular and molecular mechanisms of neural development and the determinants of cell birth and death, axonal pathfinding, neuronal connections, and development of neural systems underlying behavior. Cross-listed with PSYC 121.

CBNS 124 Systems Neuroscience (4)

Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CBNS 106 with a grade of "C-" or better or consent of instructor. A study of the structure and function of motor and sensory systems in vertebrate and invertebrate nervous systems. Cross-listed with PSYC 124.

CBNS 125 Neuropharmacology (4)

Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CBNS 120/PSYC 120; previous or concurrent enrollment in CBNS 120L/PSYC 120L and CBNS 124/PSYC 124 recommended. Examines synaptic neurotransmitter systems, mechanisms, and pharmacological agents and effects, which are fundamental to neural information processing. Cross-listed with PSYC 125.

CBNS 126 Neuroscience of Learning and Memory (4)

Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CBNS 106 or PSYC 110 or consent of instructor. Covers mechanisms of learning and memory across levels of analysis, including genetic, neuronal, systems and theory. Topics include the multiple memory systems, memory consolidation, working memory, emotional memory, recognition memory, spatial memory, and human amnesia. Cross-listed with PSYC 126.

CBNS 127 Behavioral Control Systems (4)

Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CBNS 120/PSYC 120; CBNS 124/PSYC 124 strongly recommended. An analysis of the principles of nervous system operation from the processing of sensory inputs for object recognition and localization to the organization of central patterns for generation of sequenced motor output. Cross-listed with PSYC 127.

CBNS 128 Immunology (3)

Lecture, 3 hours. Prerequisite(s): BIOL 005C; PHYS 002C; PHYS 02LC; BCH 100 or BCH 110A. A study of humoral and cellular immunology. Topics include lymphoid systems, cells, antigens, antibodies, antibody formation, cellular immunity, and tumor and transplantation immunology. Diseases and altered immune states associated with each topic are discussed in detail. Cross-listed with BIOL 128.

CBNS 129 Brain Control of Bodily Functions (4)

Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CBNS 124/PSYC 124 with a grade of "C-" or better

or consent of instructor. Emphasizes principles of organization and function related to endocrine and other physiological systems. Selected topics include control of breathing, body water, temperature, cardiovascular function, and the stress response.

CBNS 130L Computational Neuroscience Laboratory: Introduction to Brain Modeling Techniques (2) Lecture, 1 hour; laboratory, 3 hours. Prerequisite(s): CBNS120/PSYC 120 or consent of instructor. Introduces computer modeling techniques used to study neurons and neural systems. Selected topics include biophysical models of single neurons, small neural circuits, synaptic interactions, and larger scale network models. **Bazhenov**

CBNS 133 Scientific Writing for Cell, Molecular and Developmental Biologists (4) S Lecture, 2 hours; written work, 6 hours. Prerequisite(s): BIOL 102, BIOL 107A, CBNS 101, CBNS 108; a major in Cell, Molecular, and Developmental Biology; or consent of instructor. An introductory course in scientific writings. Includes preparing scientific manuscripts, research proposals, and other types of technical presentations. Satisfactory (S) or No Credit (NC) grading is not available. **Bachant**

CBNS 135 Educational Outreach Training in Neuroscience (4) W Lecture, 10 hours per quarter; discussion, 10 hours per quarter; practicum, 20 hours per quarter; activity, 20 hours per quarter; written work, 20 hours per quarter. Prerequisite(s): CBNS 120/PSYC 120 and CBNS 124/PSYC 124 with grades of "C" or better and upper division standing in Neuroscience. Introduction to multiple approaches and activities that can be used when teaching neuroscience concepts. Builds proficiency in organizational and presentation skills, as well as provides opportunities for educational outreach. Topics include components of oral presentation, models of teaching and learning styles, and published successes in neuroscience outreach. Satisfactory (S) or No Credit (NC) grading is not available.

CBNS 150 Cancer Biology (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BCH 110C or BIOL 107A or CBNS 101 (may be taken concurrently with consent of instructor). Explores the origin, development, and treatment of cancer with emphasis on molecular mechanisms. Covers topics such as oncogenes, tumor suppressors, cell cycle and differentiation, AIDS, and hereditary and environmental factors in the development of cancer. Cross-listed with ENTX 150.

CBNS 165 Stem Cell Biology (4) W Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CBNS 101 or consent of instructor. An introduction to various stem cells, their characteristics, and their niches. Explores the molecular concepts of stem cell self-renewal and tissue and organ development. Illustrates their application in therapies and explains routine methods used in stem cell biology. Reviews current governmental regulations and ethics. **zur Nieden**

CBNS 169 Human Embryology (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005A, BIOL 005B, BIOL 005C or consent of instructor. An in-depth study of normal human development from conception through the early postnatal period. Demonstrations use microscopic and other materials specifically adapted for the course. Some consideration is given to abnormal development.

CBNS 190 Special Studies (1-4) Individual study, 3-12 hours. Prerequisite(s): upper-division standing; consent of instructor and department chair. Individual study to meet special curricular needs. Grading basis to be determined in consultation with the instructor and department chair. Course is repeatable to a maximum of 12 units.

CBNS 194 Independent Reading (1-2) Individual study, 3-6 hours. Prerequisite(s): consent of instructor. Individual reading under faculty direction. Course is repeatable to a maximum of 4 units.

CBNS 197 Research for Undergraduates (1-4) Outside research, 3-12 hours. Prerequisite(s): either sophomore standing and one course in Cell Biology

and Neuroscience or upper-division standing; consent of instructor. An introduction to laboratory research conducted under faculty supervision. Students who submit a written report or give an oral presentation receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

CBNS 198-I Individual Internship (1-12) F, W, S, Summer Internship, 2-24 hours; written work, 1-12 hours. Prerequisite(s): consent of instructor. Explores career development within the context of cell, molecular, and developmental biology or health sciences. Includes supervision by an off-campus sponsor and an on-campus faculty member. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.

CBNS 199 Senior Research (1-4) Outside research, 3-12 hours. Prerequisite(s): senior standing; consent of instructor. Original research undertaken under the direction of a faculty member. Students who submit a written report or give an oral presentation receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

Major

The Cell, Molecular and Developmental Biology major is designed to prepare students for diverse and exciting careers that include research, professional programs in the health sciences, and biotechnology. Course work is structured so that students first receive a solid grounding in the basic genetic and biological principles. Subsequent course requirements expand upon these themes and include courses in cell biology, molecular biology, developmental biology and genetics. Problem-based learning is employed throughout the curriculum to produce graduates with the analytical and critical thinking skills necessary to become successful researchers and professionals. After completing required core courses, students take intermediate level courses that lay the foundation for more advanced undergraduate courses. Several mechanisms exist to tailor the curriculum to the needs of the individual student, including by choosing either Disciplinary or Health Science track options.

Both the Disciplinary and Health Science tracks can lead to B.A. or B.S. degrees. They have similar major requirements, but the B.A. degree requires 12 additional units of Humanities and Social Sciences courses and 16 units in a foreign language (see College Breadth Requirements).

University Requirements

See the Undergraduate Studies section for requirements that all students must satisfy.

College Requirements

See Degree Requirements, College of Natural and Agricultural Sciences, in the Undergraduate Studies Section, for requirements that students must satisfy.

Major Requirements

Some of the following requirements for the Cell, Molecular and Developmental Biology major may also fulfill the College's breadth requirements. Consult with an advisor for course planning.

- Life Sciences core curriculum (72-76 units)
 - BIOL 005A, BIOL 05LA, BIOL 005B, BIOL 005C
 - CHEM 001A, CHEM 001B, CHEM 001C, CHEM 01LA, CHEM 01LB, CHEM 01LC
 - CHEM 112A, CHEM 112B, CHEM 112C

148 / Programs and Courses

- d) PHYS 002A, PHYS 002B, PHYS 02LA, PHYS 02LB, PHYS 002C, PHYS 02LC
- e) MATH 009A, MATH 009B
- f) STAT 100A
- g) BCH 100, or BCH 110A and BCH 110B

2. Upper-division requirements (48 units)

- a) Major core (16 units) BIOL 102, BIOL 107A, CBNS 101, CBNS 108.
- b) Major electives (32 units from the following).

Cellular emphasis. At least one of the following is required: BIOL 113; BIOL 114; BIOL 121/MCBL 121, BIOL 128/CBNS 128; BPSC 135; CBNS 116; CBNS 120/PSYC 120.

Molecular emphasis. At least one of the following is required: BCH 180A; BCH 180B; BIOL 107B; BIOL 119; BIOL 124/MCBL 124; BIOL 155/BPSC 155; CBNS 150/ENTX 150.

Developmental emphasis. At least one of the following is required: BIOL 132/BPSC 132; BIOL 138/BPSC 138; BIOL 168; CBNS 121/PSYC 121; CBNS 169.

Laboratory course: Two courses in a biological science are required. Courses including at least 3 hours of lab per week are eligible, including combined lecture and lab classes. Eligible classes include BCH 102; BCH 153/BIOL 153/BPSC 153; BIOL 121/MCBL 121L; BIOL 132/BPSC 132 or BIOL 138/BPSC 138; CBNS 120/PSYC 120; and others. Students in the Health Science Track may substitute one laboratory course with a course in ethics.

Note A maximum of 8 units of 190-199 courses, including no more than 4 units of 198 courses, may be counted towards this requirement.

- 3. **Depth requirement (16 units).** For B.A. students, this requirement can be fulfilled with additional courses in Humanities and Social Sciences, and Foreign Languages. For the B.S. degree, students are required to take an additional 16 units of course work in natural sciences (including a biological or chemical science) or mathematics. Additional major elective units beyond the 32 required in 2b may be applied to this requirement.

- 4. **Health Science track.** Students wishing to apply to medical, dental or veterinary professional schools must follow the requirements listed above, but are encouraged to select from the following courses. For B.A. students, some of these will fulfill their Humanities and Social Sciences and Foreign Languages requirements. Please consult the faculty adviser.

- i. Foreign language: three courses are recommended.
- ii. Community service: a maximum of 4 units may be counted towards the 180 unit graduation requirement, using CBNS 198-I or equivalent.

- iii. Ethics: A course is strongly recommended, such as PHIL 009 or PHIL 167.
- iv. Two upper-division classes in Psychology are recommended, such as CBNS 126/PSYC 126; CBNS 127/PSYC 127; PSYC 129; PSYC 178; or PSYC 179.
- v. When selecting electives in the natural sciences, students are recommended to include classes in an area of microbiology (e.g. BIOL 157, BIOL 171, ENSC 133/MCBL 133/SWSC 133, ENSC 141/MCBL 141/SWSC 141, BIOL 121/MCBL 121, BIOL 123/MCBL 123/PLPA 123, BIOL 124/MCBL 124, BIOL 134/PLPA 134), and in anatomy, zoology, or physiology (BIOL 151, BIOL 161A, BIOL 175, BIOL 176).

Sample Program Outlines

1. Bachelor of Science Degree (Disciplinary track)

The sample program for B.S. students provides a solid science background for students interested in research or teaching careers in biomedical science. Undergraduate laboratory research is strongly recommended as an important element in the program.

2. Bachelor of Science Degree (Health Science track)

The sample program for B.S. students with a professional emphasis provides a very strong science background, with recommended elective course choices emphasizing biomedical pertinence. Additionally, a foreign language is recommended, as well as Community Service (for course credit). Further breadth may be developed by electing Humanities and Social Science course options within the major depth requirement.

Program Overview

The Cell, Molecular, and Developmental Biology Graduate Program is an interdepartmental program offering M.S. and Ph.D. degrees to students seeking advanced training in these disciplines. The program focuses on the bridge between basic and applied research and on the interface between cell, molecular, and developmental biology. Participating faculty are drawn from numerous biological sciences departments whose research interests in cell, molecular, and developmental biology span biomedical to agricultural problems, and students in the program benefit from unique training opportunities.

Students seeking admission into the program should meet all general requirements of the Graduate Division as printed in the Graduate Studies section of this catalog.

The Cell, Molecular, and Developmental Biology program offers the M.S. and Ph.D. degrees in Cell, Molecular, and Developmental Biology.

Admission Applicants should have adequate undergraduate course work in chemistry (two years), physics (one year), calculus (one year), statistics (one course), biochemistry (one course), and biology (two years, including a course in genetics and two courses among cell, molecular, or developmental biology). Applicants with strong academic records but with deficiencies in preparation for graduate training may be admitted and must rectify undergraduate deficiencies early in the first two years of residence. Applicants must submit GRE General Test scores (verbal, quantitative and analytical).

150 / Programs and Courses

Course Work All students must complete the following core of course work:

1. CMDB 203
2. One graduate-level course in cell biology (BIOL 200/CMDB 200, BPSC 237, or NRSC 200A/PSYC 200A)
3. One graduate-level course in molecular biology (BIOL 201/CMDB 201, BCH 211, BPSC 231/BCH 231, BMSC 202, or NRSC 200B/PSYC 200B)
4. One graduate-level course in developmental biology (BPSC 232, CMDB 202)

Each student must enroll in the program seminars (CMDB 257, CMDB 258) each time they are offered. Upon entry into the program, each student meets with a guidance committee, which recommends a course of study commensurate with the student's interests and background.

Master's Degree

The Cell, Molecular, and Developmental Biology program offers an M.S. degree.

Plan I (Thesis) Students complete the course work above, enroll in one graduate seminar course in cell, molecular, or developmental biology (BCH 230(E-Z), BIOL 281(E-Z)/CMDB 281(E-Z), BPSC 240, BCH 289/BIOL 289/NRSC 289/PSYC 289), and undertake a research project leading to a thesis.

Each student must complete 36 units of course work, of which at least 24 units must be in the graduate series (200 level) in the biological sciences. No more than 12 units in courses numbered 290-299 may be taken to fulfill the 24-unit requirement. Candidates for the M.S. degree must defend their thesis at a public oral presentation.

Normative Time to Degree Two years

Doctoral Degree

The Cell, Molecular, and Developmental Biology program offers a Ph.D. degree.

Degree Requirements

1. Completion of the course work listed above
2. One additional graduate course in cell, molecular, and developmental biology
3. One graduate seminar course in cell, molecular, or developmental biology (BCH 230 (E-Z), BIOL 281 (E-Z)/CMDB 281 (E-Z), BPSC 240, BCH 289/BIOL 289/CHEM 289/ENTM 289/NRSC 289/PSYC 289)
4. A research project leading to a dissertation
5. Oral public defense of dissertation

Written and Oral Qualifying Examinations

Doctoral students are advanced to candidacy following successful completion of written and oral qualifying examinations. Students write a proposal detailing the rationale, specific aims, and approaches to be undertaken for their proposed dissertation research prior to taking the oral qualifying examination.

Dissertation Candidates must successfully defend their dissertation research in a public oral presentation.

Teaching Requirement Students must fulfill a two-quarter teaching requirement.

Career Opportunities

There is a high demand in industry and academia for scientists with training in cell, molecular, and developmental biology. Students matriculating from the program are well trained in this field and successfully obtain positions in biotechnology, including biomedical and agricultural industries, and at colleges and universities nationwide.

Normative Time to Degree Five years

Graduate Courses

CMDB 200 Cell Biology (4) F Lecture, 3 hours; seminar, 1 hour. Prerequisite(s): BCH 110A or BCH 110B or equivalent (may be taken concurrently); BIOL 102 or equivalent; BIOL 113 or BIOL 114 or CBNS 101 or equivalent. An examination of the structure and function of eukaryotic cells and their components with emphasis on the key experiments that provide the foundation for our current knowledge. Covers topics such as cell membranes, intracellular trafficking, cell-to-cell interactions, motility, and the cytoskeleton. Cross-listed with BIOL 200.

CMDB 201 Molecular Biology (4) W Lecture, 3 hours; seminar, 1 hour. Prerequisite(s): BCH 110A or BCH 110B or equivalent (may be taken concurrently); BIOL 102 or equivalent; BIOL 107A or equivalent. Covers the structure and inheritance of genetic material, the regulation of gene expression at the cellular and molecular level including molecular mechanisms for regulation of gene transcription, posttranscriptional regulation at the level of messenger RNA stability, processing, editing and translation, methods for gene mapping, and positional cloning. Cross-listed with BIOL 201.

CMDB 202 Developmental Biology (4) S Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CBNS 101 or equivalent. An examination of development, beginning with the principles that underlie developmental studies of all multicellular organisms. Focuses on plants, insects, and fungi but introduces other model systems. Topics are taken from the current literature.

CMDB 203 Advanced Genetic Analysis in Model Organisms (4) Lecture, 2 hours; discussion, 2 hours. Prerequisite(s): BIOL 102 or equivalent; graduate standing or consent of instructor. Examines essential concepts in modern genetics. Focuses on universal principles of genetic analysis in prokaryotic and eukaryotic model organisms, emphasizing underlying concepts and logic. Develops skills reading primary scientific literature and critical thinking through analysis of landmark papers. Cross-listed with GEN 203.

CMDB 204 Genome Maintenance and Stability (4) S Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BCH 110C or BIOL 107A; BIOL 113 or BIOL 114 or CBNS 101; BIOL 102 is strongly recommended. Emphasizes chromosome-based processes that maintain genome integrity and ensure accurate genome transmission during cell division. Topics are drawn from the primary literature and include chromatin structure and composition, DNA repair and recombination, telomere function and chromosome maintenance, mitotic chromosome segregation, and checkpoint surveillance mechanisms. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with BCH 204 and ENTX 204.

CMDB 205 Signal Transduction Pathways in Microbes and Plants (4) S Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing in the biological sciences, BIOL 107A or BIOL 113 or BIOL 114 or CBNS 101; or consent of instructor. Advanced topics in signal transduction pathways that regulate growth and development in plants and prokaryotic and eukar-

yotic microbes. Areas covered include two-component regulatory systems; quorum sensing; signaling via small and heterotrimeric G proteins; mitogen-activated protein kinase cascades; cAMP signaling; photoreceptors; plant hormone signaling; responses to low-oxygen stress; calcium signaling; and plant pathogenesis. Cross-listed with BCH 205, BPSC 205, GEN 205, MCBL 205, and PLPA 205.

CMDB 206 Gene Silencing (3) Lecture, 2 hours; discussion, 1 hour. Prerequisite(s): graduate standing, BIOL 107A or CBNS 101; or consent of instructor. An in-depth coverage of mechanisms, functions, and applications of RNAi and related gene regulatory pathways guided by small RNAs such as siRNAs and miRNAs in plants and animals. Cross-listed with GEN 206 and MCBL 206.

CMDB 207 Stem Cell Biology and Disease (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CBNS 101 or equivalent, graduate standing; or consent of instructor. Introduces animal and human stem cell biology and the application of stem cell biology to medicine.

CMDB 208 Bioethics (1) Discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Introduces bioethics, with an emphasis on the medical and social implications of stem cell biology. **Cranor in charge**

CMDB 210 Molecular Biology of Human Disease Vectors (3) Lecture, 2 hours; seminar, 1 hour. Prerequisite(s): consent of instructor. Covers the molecular aspects of vectors transmitting most dangerous human diseases. Involves lectures and student presentations about current issues in molecular biology and genomics of vector insects and pathogens they transmit. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with ENTM 210 and MCBL 210. **Raikhel**

CMDB 211 Laboratory in Human Embryonic Stem Cell Culture (2) Lecture, 5 hours per quarter; laboratory, 40 hours per quarter; workshop, 5 hours per quarter. Prerequisite(s): consent of instructor. Introduces the methods used to culture human embryonic stem cells (hESC) in vitro. Provides hands-on experience in plating, passaging, culturing, differentiating, and freezing of hESC. Additional topics include staining colonies of hESC for pluripotency markers (including alkaline phosphatase); labeling colonies using immunohistochemistry; and performing chromosome squashes for evaluation of aneuploidy. Graded Satisfactory (S) or No Credit (NC). **Talbot, zur Nieden**

CMDB 220 Chemical Genomics Design Studio (2) Lecture, 1 hour; practicum, 4 hours. Prerequisite(s): course work in cell biology, genetics, combinatorial chemistry; or consent of instructor; graduate standing. Explores chemical genomic research approaches. Emphasizes critical thinking; advanced planning of time-consuming tests of hypotheses and experimental caveats, trade-offs, and options. Taught in a case-study approach, teams consist of students with engineering, biology, computational sciences, and chemical backgrounds. Teams generate an interdisciplinary chemical genomic research project. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with BIEN 220. **Schultz**

CMDB 230 Molecular Plant-Microbial Interactions (3) Lecture, 2 hours; discussion, 1 hour. Prerequisite(s): BCH 100, BIOL 120/MCBL 120/PLPA 120, or equivalents. A study of the physiology of host-pathogen interactions with emphasis on the metabolism of diseased plants, nature of pathogenicity, and defense mechanisms in plants. Cross-listed with BPSC 230, GEN 230, and PLPA 230. **Eulgem, Jin**

CMDB 250 Special Topics in Cell, Molecular, and Developmental Biology (1-2) F, W, S Seminar, 1-2 hours. Prerequisite(s): graduate standing. Oral presentations and intensive small-group discussion of selected

topics in the area of special competence of each participant. Content emphasizes recent advances in the topic area and varies accordingly. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CMDB 255 Stem Cell Biology (1) Discussion, 10 hours per quarter. Prerequisite(s): graduate standing or consent of instructor. Presents research data to an interdisciplinary group of stem cell biologists. Covers presentation skills and answering questions about research data. Fosters discussion of stem cell biology. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

CMDB 256 Seminar in Stem Cell Biology (1) Seminar, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Provides opportunities to meet stem cell researchers from other campuses and learn about the latest developments in animal and human stem cell research. Includes investigators who focus on the potential application of stem cells to medicine. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CMDB 257 Seminar in Cell, Molecular, and Developmental Biology (1) F, W Seminar, 1 hour. Prerequisite(s): graduate standing. Presentations by visiting scholars, CMDB faculty, and CMDB students on current research in cell, molecular, and developmental biology. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable to a maximum of 30 units.

CMDB 258 Graduate Student Seminar in Cell, Molecular, and Developmental Biology (1) W Seminar, 10 hours per quarter; one 1-day seminar. Prerequisite(s): graduate standing in Cell, Molecular, and Developmental Biology. An interdisciplinary seminar consisting of student presentations of original research and discussion of current research topics in cell, molecular, and developmental biology. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable to a maximum of 30 units.

CMDB 281 (E-Z) Seminar in Cell Development, Structure, and Function (2) F, W, S Seminar, 2 hours. Prerequisite(s): graduate standing; consent of instructor. Lectures, discussions, and demonstrations by students, faculty, and invited scholars on selected subjects concerned with the principles of cell development, structure, and function. E. Cell Biology; F. Molecular Biology; G. Developmental Biology. Segments are repeatable. Cross-listed with BIOL 281 (E-Z).

CMDB 290 Directed Studies (1-6) Individual study, 3-18 hours. Prerequisite(s): graduate standing; consent of instructor and graduate advisor. Individual study, directed by a faculty member, of specially selected topics in cell, molecular, and developmental biology. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CMDB 292 Concurrent Analytical Studies in Cell, Molecular, and Developmental Biology (2-4) Outside research, 6-12 hours. Prerequisite(s): graduate standing. Elected concurrently with an appropriate undergraduate course, but on an individual basis. Students are required to submit one or more graduate papers based on research or criticism related to the course. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CMDB 297 Directed Research (1-6) Outside research, 3-18 hours. Prerequisite(s): graduate standing. Research and experimental studies conducted under the supervision of a faculty member on specially selected topics in cell, molecular, and developmental biology. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CMDB 299 Research for the Thesis or Dissertation (1-12) Outside research, 3-36 hours. Prerequisite(s):

graduate standing. Original research in an area selected for the advanced degree. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Course

CMDB 301 Teaching of Cell, Molecular, and Developmental Biology at the College Level (1) Seminar, 1 hour. Prerequisite(s): graduate standing. A program of weekly meetings and individual formative evaluations required of new teaching assistants. Covers instructional methods and classroom/section activities most suitable for teaching Biology. Conducted by the Teaching Assistant Development Program. Graded Satisfactory (S) or No Credit (NC).

CHASS FIRST

Subject abbreviation: CHFY
College of Humanities, Arts, and Social Sciences

Geoff Cohen Ph.D., Director
1609 Humanities and Social Sciences
(951) 827-7831; Chassfirst.ucr.edu

Committee in Charge

Steven Brint, Ph.D. (Sociology)
Peter Graham, Ph.D. (Philosophy)
Michael Jayme, M.F.A. (Creative Writing)
Vorris Nunly, Ph.D. (English)
Georgia Warnke, Ph.D. (Political Science)

CHASS FIRST provides first-year students with courses designed to help with the transition to UCR, a major research university setting, which involves high academic standards and rigorous course work. The courses offer students the resources and tools necessary to excel in the first year and beyond. They take place within a "learning-communities" framework so that students can successfully integrate into campus life.

Lower-Division Courses

CHFY 001 (E-Z) CHASS FIRST Humanities Course (4) Lecture, 3 hours; assignment of the remaining hours varies from segment to segment. Prerequisite(s): first-year freshman standing in the College of Humanities, Arts, and Social Sciences. A College of Humanities, Arts, and Social Sciences course designed to introduce students to the humanities and to academic life. Segments of CHFY 001 (E-Z), CHFY 002 (E-Z), and/or CHFY 003 (E-Z) may be thematically and pedagogically linked.

CHFY 002 (E-Z) CHASS FIRST Fine Arts Course (4) Lecture, 3 hours; assignment of the remaining hours varies from segment to segment. Prerequisite(s): first-year freshman standing in the College of Humanities, Arts, and Social Sciences. A College of Humanities, Arts, and Social Sciences course designed to introduce students to the fine arts and to academic life. Segments of CHFY 001 (E-Z), CHFY 002 (E-Z), and/or CHFY 003 (E-Z) may be thematically and pedagogically linked.

CHFY 003 (E-Z) CHASS FIRST Social Science Course (4) Lecture, 3 hours; assignment of the remaining hours varies from segment to segment. Prerequisite(s): first-year freshman standing in the College of Humanities, Arts, and Social Sciences. A College of Humanities, Arts, and Social Sciences course designed to introduce students to the social sciences and to academic life. Segments of CHFY 001 (E-Z), CHFY 002 (E-Z), and/or CHFY 003 (E-Z) may be thematically and pedagogically linked.

CHFY 007 CHASS FIRST Learning Community Workshop (1) Workshop, 1 hour; activity, 2 hours. Prereq-

uisite(s): first-year freshman standing in the College of Humanities, Arts, and Social Sciences. A workshop linked to a CHASS FIRST Learning Community lecture course. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 3 units.

CHFY 010 CHASS Gateway Lecture Course (5) Lecture, 3 hours; discussion, 1 hour; workshop, 1 hour. Prerequisite(s): first-year freshman standing in the College of Humanities, Arts, and Social Sciences. A College of Humanities, Arts, and Social Sciences course designed to introduce freshmen to the College's annual theme.

CHFY 020 Theory and Practice of Peer Instruction (4) Seminar, 4 hours. Prerequisite(s): consent of the CHASS FIRST Academic Advisor. An intensive examination of study development theory, retention models, and pedagogy related to peer-to-peer instruction. Graded Satisfactory (S) or No Credit (NC).

Upper-Division Course

CHFY 198-I CHASS FIRST Individual Internship (1-4) Consultation, .5-2 hours; internship, 3-12 hours; written work, 1-4 hours. Prerequisite(s): approval of the CHASS FIRST Academic Coordinator. Provides on-campus opportunities in the CHASS FIRST office to acquire skills and experience for future endeavors. Course is repeatable to a maximum of 8 units.

Chemical and Environmental Engineering

Subject abbreviations: CEE, CHE, ENVE
The Marian and Rosemary Bourns College of Engineering

Nosang Myung, Ph.D., Chair
Department Office, A220 Bourns Hall
(951) 827-2859; cee.ucr.edu

Professors

David R. Cocker, Ph.D.
Robert Haddon, Ph.D. *Distinguished Professor*
(Chemistry/Chemical and Environmental Engineering)
Mark R. Matsumoto, Ph.D.
Ashok K. Mulchandani, Ph.D.
Nosang Myung, Ph.D.
Jianzhong Wu, Ph.D.
Charles Wyman, Ph.D., *Ford Motor Company Chair in Environmental Engineering*

Professor Emeritus

Joseph M. Norbeck, Ph.D.

Associate Professors

David Kisailus, Ph.D.
Sharon Walker, Ph.D., *John Babbage Chair in Environmental Engineering*

Assistant Professors

Akua A. Asa-Awuku, Ph.D.
Phillip Christopher, Ph.D.
Xin Ge, Ph.D.
Juchen Guo, Ph.D.
David Jassby, Ph.D.
Haizhou Liu, Ph.D.
Ian Wheelon, Ph.D.
Bryan Wong, Ph.D.
Ruoxue Yan, Ph.D.

**

Adjunct Professor

Wayne Miller, Ph.D.

Adjunct Assistant Professor

Kanok Boriboonsomsin, Ph.D.
Joon H. Min, Ph.D.

Cooperating Faculty

Matthew J. Barth, Ph.D. (Electrical and Computer Engineering)
Heejung Jung, Ph.D. (Mechanical Engineering)

Majors

The Department of Chemical and Environmental Engineering offers B.S. degrees in Chemical Engineering and in Environmental Engineering, and M.S. and Ph.D. degrees in Chemical and Environmental Engineering. For more details, see cee.ucr.edu.

Chemical Engineering focuses on transforming raw materials into useful everyday products. Chemical engineers turn the discoveries of chemists and physicists into commercial realities. They find work in a variety of fields including pharmaceuticals, materials, chemical, fuels, pollution control, medicine, and nuclear and electronic industries. At UCR, the B.S. degree in Chemical Engineering offers students three options: Biochemical Engineering, focusing on biochemical processes; Nanotechnology, focusing on nanoscale processes; or Chemical Engineering, emphasizing traditional chemical engineering issues.

The program's educational objectives are to produce graduates who attain high levels of technical expertise to enable their achievement in diverse chemical engineering practice and research, or in allied careers, prepare them for graduate level education, and enable them to be successful members of the professional community, for the benefit of our constituents.

The Chemical Engineering B.S. degree program at UCR is accredited by the Engineering Accreditation Commission of ABET, abet.org.

Environmental Engineering deals with design and construction of processes and equipment intended to lessen the impact of man's activities on the environment. With the growing importance of environmental quality, the environmental engineer plays a pivotal role in modern industrial activity. Environmental engineers are involved in a wide range of activities including the design of alternative fueled vehicles, the development of renewable energy sources, the design of equipment for solid waste collection and disposal, municipal and industrial wastewater treatment, air pollution control systems, and hazardous waste management. At UCR, the B.S. degree in Environmental Engineering allows students to concentrate on air and/or water quality.

The program's educational objectives are to produce graduates who attain high levels of technical expertise to enable their achievement in diverse environmental engineering practice and research, or in allied careers, prepare them for graduate level education, and enable them to be successful members of the professional community, for the benefit of our constituents.

The Environmental Engineering B.S. degree program at UCR is accredited by the Engineering Accreditation Commission of ABET, abet.org.

All undergraduates in the College of Engineering must see an advisor at least annually. Visit student.engr.ucr.edu for details.

University Requirements

See Undergraduate Studies section.

College Requirements

See The Marlan and Rosemary Bourns College of Engineering, Colleges and Programs section.

The Chemical Engineering major and the Environmental Engineering major use the following major requirements to satisfy the college's Natural Sciences and Mathematics breadth requirement.

1. BIOL 005A, BIOL 05LA
2. CHEM 001A, CHEM 001B, CHEM 001C, CHEM 01LA, CHEM 01LB, CHEM 01LC
3. MATH 008B or MATH 009A

Major Requirements

Chemical Engineering

Students must choose either a Biochemical Engineering, Chemical Engineering or Nanotechnology option.

1. Lower-division requirements (63 units)
 - a) BIOL 005A, BIOL 05LA
 - b) CHEM 001A, CHEM 001B, CHEM 001C, CHEM 01LA, CHEM 01LB, CHEM 01LC
 - c) CS 010
 - d) MATH 008B or MATH 009A, MATH 009B, MATH 009C, MATH 010A, MATH 010B, MATH 046
 - e) PHYS 040A, PHYS 040B, PHYS 040C
2. Upper-division requirements (75 units)
 - a) CEE 158
 - b) CHEM 112A, CHEM 112B, CHEM 112C
 - c) CHE 100, CHE 110A, CHE 110B, CHE 114, CHE 116, CHE 117, CHE 118, CHE 120, CHE 122, CHE 160B, CHE 160C, CHE 175A, CHE 175B
 - d) CHE 130/ENVE 130, CHE 160A/ENVE 160A
 - e) ENGR 118
3. Option requirements: choose one option
 - a) Biochemical Engineering option (20 units)
 - (1) BCH 110A
 - (2) BIOL 121/MCBL 121
 - (3) CEE 010
 - (4) CHE 124, CHE 124L
 - (5) Four (4) units of technical electives chosen from CEE 132, CEE 135, CHE 140, CHE 150, CHE 171, ENVE 121
 - b) Chemical Engineering option (18 units)
 - (1) CEE 010, CEE 125
 - (2) Twelve (12) units of technical electives chosen from CEE 132, CEE 135, CHE 102, CHE 136, CHE 171, ENVE 120, ENVE 133, ENVE 134, ENVE 138
 - c) Nanotechnology option (21 units)
 - (1) CEE 010
 - (2) CHE 105
 - (3) CHE 161
 - (4) CEE 135

- (5) Eight (8) units of technical electives chosen from CHE 102, CHE 131, ENVE 133, ME 114, MSE 160, MSE 161

Visit the Student Affairs Office in the College of Engineering or student.engr.ucr.edu for a sample program.

Environmental Engineering

Students must choose either an Air Pollution Control Technology or a Water Pollution Control Technology option.

1. Lower-division requirements (69 units)
 - a) BIOL 005A, BIOL 05LA
 - b) CEE 010
 - c) CHEM 001A, CHEM 001B, CHEM 001C, CHEM 01LA, CHEM 01LB, CHEM 01LC
 - d) CS 010
 - e) MATH 008B or MATH 009A, MATH 009B, MATH 009C, MATH 010A, MATH 010B, MATH 046
 - f) ME 010
 - g) PHYS 040A, PHYS 040B, PHYS 040C
2. Upper-division requirements (77 units)
 - a) CEE 158
 - b) CHEM 112A, CHEM 112B
 - c) CHE 100, CHE 114, CHE 120
 - d) ENGR 118
 - e) ENSC 100/SWSC 100
 - f) ENVE 120, ENVE 133, ENVE 135, ENVE 142, ENVE 146, ENVE 160B, ENVE 160C, ENVE 171, ENVE 175A, ENVE 175B
 - g) ENVE 130/CHE 130, ENVE 160A/CHE 160A
3. Option requirements: choose one option (12 units)
 - a) Air Pollution Control Technology option
 - (1) CHE 116
 - (2) ENVE 134
 - (3) Choose one from CEE 125, CEE 132, CHE 102, ENSC 135/CHEM 135/ENTX 135, ENVE 144/ENSC 144, ENVE 138, ENVE 145
 - b) Water Pollution Control Technology option
 - (1) CHE 124 or ENVE 121
 - (2) Choose one from CEE 125, CHE 116, ENSC 136, ENSC 163
 - (3) Choose one from CEE 132, ENSC 155, ENVE 144/ENSC 144, ENVE 145

Visit the Student Affairs Office in the College of Engineering or student.engr.ucr.edu for a sample program.

Graduate Program

The Graduate Program in Chemical and Environmental Engineering offers training leading to the degrees of M.S. and Ph.D. in Chemical and Environmental Engineering. Fields of specialization include biochemical

engineering and bioengineering, environmental biotechnology, air quality systems engineering, water quality systems engineering, thermodynamics, advanced materials, and nanotechnology.

Combined B.S. + M.S. Five-Year Program

The college offers combined B.S.+ M.S. programs in both Chemical Engineering and Environmental Engineering designed to lead to a Bachelor of Science degree as well as a Master of Science degree in five years. Applicants for this program must have a high school GPA above 3.6, a combined SAT Reasoning score above 1950 (or ACT plus Writing equivalent), complete the Entry Level Writing Requirement before matriculation, and have sufficient mathematics preparation to enroll in calculus in their first quarter as freshmen.

Interested students who are entering their junior year should check with their academic advisor for information on eligibility and other details.

Admission Applicants should have a degree in chemical and environmental engineering or closely related fields, have a satisfactory overall GPA from their undergraduate studies, good letters of recommendation, and high scores on the GRE General Test. Normally, students admitted to regular standing have satisfied all prerequisite course work. Under special circumstances, students who have not completed all undergraduate requirements may be admitted provided that the deficiencies are corrected to the satisfaction of the student's advisory committee within the first year of graduate study. Courses taken for this purpose do not count towards an advanced degree. International students, permanent residents, and even U.S. citizens whose native language is not English and who do not have a bachelor's or postgraduate degree from an institution where English is the exclusive language of instruction must complete the Test of English as a Foreign Language (TOEFL) with a minimum score of 550 (paper-based test), 213 (computer-based), or 80 (internet-based).

Language Requirement All students whose native language is not English must achieve a "clear pass" on the TAST or SPEAK test before the completion of their first year or they will be asked to leave the program. However, for those who receive a "conditional pass," a departmental committee will evaluate their English proficiency before a final decision is made.

Course Work To ensure that advanced degree recipients in the graduate program have advanced knowledge in mathematics and chemical engineering principles that form the foundation for chemical and environmental engineering, a core course program has been implemented. All M.S. and Ph.D. students must participate in the core course program. Students who have completed these (or equivalent) courses elsewhere may petition to have the core course requirement waived or some of their units transferred (see the Graduate Division policy for transferring course units). Competency in these areas will be tested as part of the comprehensive exam for

M.S. students and in the written preliminary examination for Ph.D. students. The current core courses are as follows:

CEE 200 (Advanced Engineering Computations)

CEE 202 (Transport Phenomena)

CEE 204 (Advanced Kinetics and Reaction Engineering)

CEE 206 (Advanced Chemical Engineering Thermodynamics)

Academic Appeals Process Policies and procedures relating to Academic Appeals can be found through the UCR Graduate Division link, graduate.ucr.edu/academic_affairs.html.

Incoming students without a B.S. degree in chemical or environmental engineering must demonstrate competency in these areas either by taking the appropriate undergraduate courses and/or by passing the written preliminary exam. At UCR, the required courses are CHE 100, CHE 110A, CHE 110B, ENVE 171, CHE 114, CHE 116, CHE 120, CHE 130, and ENGR 118. Students may also be required to take some of the above courses to satisfy the prerequisites of the core graduate courses.

Each quarter, all M.S. and Ph.D. students in residence must enroll in CEE 286 (Colloquium in Chemical and Environmental Engineering). In addition, all M.S. and Ph.D. students must participate each year in the CEE Graduate Student Symposium, usually held just before the beginning of the fall quarter.

Professional Development Training

1. Two sessions of CEE 286 each quarter will be dedicated to professional development. The subjects will include but are not limited to: research ethics, scientific and technical writing, academic careers, employment opportunities beyond academia, and professional networking.
2. A weekly one hour networking meeting with a visiting colloquia speaker.
3. Fall quarter fellowship/grant writing workshops. Focus will be on incoming domestic students applying for NSF graduate fellowships.

Master's Degree

The Department of Chemical and Environmental Engineering offers the M.S. degree in Chemical and Environmental Engineering.

Plan I (Thesis) requires completion of a minimum of 36 units of approved course work including the core courses and submission of an acceptable M.S. thesis. At least 24 of these units must be in regular lecture graduate courses (200 series courses). No more than 4 units of CEE 290 or CEE 297 combined and 6 units of CEE 286 or special topics courses (CEE 250 or CEE 260 series) may apply towards the 36 units.

Plan II (Comprehensive Examination)

requires completion of a minimum of 36 units of approved course work including the core courses and successful passage of a

comprehensive examination. At least 28 of these units must be in regular lecture graduate courses (200-series courses), and none may be in courses numbered CEE 286, CEE 290, CEE 297, CEE 299, or CEE 302.

Examination - The exam consists of three written tests in three different areas emphasizing graduate level fundamental knowledge and breadth of the study area rather than specifics covered in individual courses. Exams areas can include, but are not limited to:

1. Advanced Air Pollution Control and Engineering
2. Advanced Chemical Engineering Thermodynamics
3. Advanced Kinetics and Reaction Engineering
4. Physical and Chemical Separation Processes
5. Transport Phenomena

An oral follow-up session may be requested by the examination committee following its evaluation of the written exam. No more than two attempts to pass the exam are allowed. Students who fail the exam once and then want to switch to the thesis plan should contact the graduate advisor. Students who fail the exam twice may not switch to the thesis plan.

The Comprehensive Exam is only offered once an academic year during the Spring quarter. Students should state intent to take the exam by week 10 of Winter quarter.

For the M.S. degree, students must complete a minimum of three quarters in residence in the UC with a GPA of 3.00 or better in all 100- and 200-level course work related to the degree.

Thesis Committee The committee consists of three members. The student and advisor nominate the committee before the end of the first year with the concurrence of the graduate committee. After review of the nominations, the dean of the Graduate Division appoints the committee on behalf of the Graduate Council. The committee, once approved by the graduate dean, rather than the department, becomes responsible for the student's academic guidance and evaluation. The chairman of the committee is the director of the candidate's research and is normally a faculty member of the CEE department or a cooperating faculty member. A member may be appointed who is a researcher on campus, from off-campus, or a visiting lecturer within the department; however, a memo indicating the academic degree and affiliation of the nominated member, as well as a curriculum vitae, must accompany such a request. (Memos need not accompany the nomination of an adjunct faculty member.) After the committee is formed, the committee must approve the subject of the thesis. A joint meeting of the committee members and the student should be held before work on the thesis is begun to ensure the topic is clear and acceptable to all. Once the thesis is completed, all three members of the committee must approve the thesis and sign the title page. Students must give a departmental seminar presentation of their thesis work to the department and members of the academic community before completing the thesis.

Normative Time to Degree 6 quarters

Doctoral Degree

The Department of Chemical and Environmental Engineering offers the Ph.D. degree in Chemical and Environmental Engineering. Satisfying the requirements for the degree consists of four parts:

1. Successful completion of an approved program of course work
2. Passing a written preliminary examination
3. Approval of a dissertation proposal
4. Defense and approval of the dissertation

Course Work Upon choosing a faculty advisor, each Ph.D. student is appointed a Ph.D. advisory committee consisting of two CEE faculty members and the faculty advisor. This advisory committee is responsible for guiding the students in formulating their research activities and preparing for the preliminary and qualifying exams.

The program of course work is formulated by each student and a faculty advisor in the first or second quarter after admission to the program and must be approved by the student's advisor and advisory committee. Every student must complete a program of study that includes:

1. A major area of study intended to increase the student's depth of knowledge in an engineering research specialty and
2. A minor area of study intended to support and increase the student's breadth of knowledge in the major area

The CEE graduate program requires a coherent program of

1. Sixteen (16) units of core courses and
2. Eight (8) units of graduate and/or upper-division work approved by the advisory committee

None of these credits may be in courses numbered between CEE 250 and CEE 270, CEE 286, CEE 290, CEE 297, CEE 299, or CEE 302.

Preliminary Examination The preliminary examination tests students' understanding of the fundamental principles of chemical and environmental engineering at the undergraduate level. This comprehensive examination consists of three written tests in three different areas selected from the following five subjects:

1. Thermodynamics
2. Kinetics
3. Transport (heat and mass transfer, fluid dynamics)
4. Air pollution control and engineering
5. Water quality engineering

The three subjects selected should be closely connected to the student's undergraduate training and approved by the student's advisory committee. Students who fail all three subjects on the preliminary exam must leave the Ph.D. program.

Preliminary Examination Retest - Students who fail one or two subjects of the exam are granted a final attempt to pass a makeup written examination that includes an oral defense of their answers in front of a faculty committee.

Students who fail one or two subjects after the retest must enroll in remedial undergraduate courses and pass with a grade of "B+" or better. Credits from these remedial courses do not count toward the Ph.D. course work requirement. Students who fail all three subjects after the retest must leave the Ph.D. program.

Teaching Requirement All students must be employed as teaching assistants for at least one quarter. All TAs must take CEE 302 (Teaching Practicum) to help them learn effective teaching methods such as handling discussion sections; preparing and handling laboratory sections; preparing and grading homework, examinations, and lab reports; and student relations.

Oral Qualifying Examination Selection of the Qualifying Committee is as follows: 2 members are selected by the Graduate Committee, 2 members are selected by the student, and the student's advisor will chair the committee. All members of the qualifying committee are expected to have the appropriate expertise to guide and evaluate a candidate's research. No more than 1 member can be a non-academic senate member. After review of the nominations, the dean of the Graduate Division appoints the committee on behalf of the Graduate Council. This committee becomes responsible for the student's academic guidance and evaluation until advancement to candidacy and administers the qualifying examination.

Dissertation Proposal After successful completion of the written preliminary examination, each student, with advisement from an advisor, prepares a dissertation proposal. Typically, students submit a dissertation proposal to their qualifying committee within one year after successfully completing the written preliminary examination. The proposal should clearly demonstrate the student's adequate preparation for the completion of the thesis research, which includes but is not limited to a thorough review of the pertinent literature, a presentation and discussion of the candidate's own research, and a detailed research plan with sufficient breadth and depth for the completion of the thesis. The qualifying committee chair schedules an oral defense normally within one month of the written proposal submission. The presentation is given only to the dissertation committee members.

The oral presentation/defense of the proposal focuses on the dissertation problem. Students should demonstrate considerable depth of knowledge in the student's area of specialization and a clear understanding of the research methods that are needed for successful completion of the dissertation research. The oral presentation/defense begins with a presentation by students on their dissertation topic and is followed by questions and suggestions from the qualifying committee.

On the basis of the written proposal and oral defense, the qualifying committee decides whether the student should be advanced to candidacy, asked to modify and enhance the proposal, or requested to withdraw from the program.

Dissertation and Final Oral Examination

Following advancement to candidacy, students formally focus on their dissertation research. The progress of the dissertation is monitored by the student's dissertation committee. Candidates should interact frequently with members of their dissertation committee to insure that dissertation progress is acceptable.

The graduate committee nominates and approves the dissertation committee after consideration of the suggestions made by the student and thesis advisor. The dissertation committee consists of a minimum of three UCR Academic Senate members. The chair and majority of members must be from Chemical and Environmental Engineering. All committee members should be in a position to offer guidance and be able to judge the scholarship of the dissertation work. Upon recommendation of the graduate advisor, doctoral dissertation committees are appointed by the dean of the Graduate Division.

After completing the dissertation research, students must submit a written copy of the dissertation for approval for defense by the student's dissertation committee. Once a draft has been approved, an oral defense of the dissertation is scheduled. This defense consists of a seminar open to the entire academic community, followed by a question-and-answer period conducted by the dissertation committee.

Students must complete at least six quarters in residence in the UC with a GPA of 3.00 or better in all 100- and 200-level course work related to the degree.

Normative Time to Degree Three years for students with a UCR M.S. degree in Chemical and Environmental Engineering (five years for those without an M.S. degree in Chemical and Environmental Engineering)

Lower-Division Courses

CEE 010 Introduction to Chemical and Environmental Engineering (2)

Lecture, 1 hour; laboratory, 3 hours. Prerequisite(s): none. An introduction to chemical and environmental engineering for engineering and nonengineering majors. Aims to enrich an appreciation of chemical, biochemical, and environmental engineering. Discusses typical careers, key applications, latest developments and the need to engage in lifelong learning in the field. Provides hands-on experiences and includes a field trip. Graded Satisfactory (S) or No Credit (NC).

CEE 011 Introduction to Bioengineering (2)

Lecture, 1 hour; laboratory, 3 hours. An introduction to bioengineering for engineering and nonengineering majors. Discusses the application of concepts and methods of the physical sciences and mathematics to problems in the life sciences. Covers typical careers, key applications, latest developments in the field, and the need to engage in lifelong learning. Provides hands-on experiences and includes a field trip. Graded Satisfactory (S) or No Credit (NC).

Upper-Division Courses

CEE 125 Analytical Methods for Chemical and Environmental Engineers (4) Lecture, 2 hours; laboratory, 6 hours. Prerequisite(s): CHEM 001C, CHEM 011C. Topics include chromatographic separations, mass spectrometry, atomic absorption, and electrophoresis. Presents total carbon analysis as an introduction to analytical methods and their use in the chemical and environmental engineering fields.

CEE 132 Green Engineering (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 110A or ENVE 171, senior standing or consent of instructor. An introduction to the design, commercialization, and use of feasible and economical processes and products that minimize risks to human health and the environment. Topics covered include environmental risk assessment; regulations; chemical process flow-sheet analysis for pollution prevention; product life-cycle assessment; and industrial ecology. Credit is awarded for only one of CEE 132 or CEE 232.

CEE 135 Chemistry of Materials (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PHYS 040C, CHEM 112A. An introduction to the synthesis, structure, properties, and performance of modern materials. Topics include the science of materials, bonding and structure, the strength of materials, electrons in materials, semiconductors, superconductors, and optical properties of materials.

CEE 140A Biomaterials (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BCH 100, CHEM 112C, MATH 010B, PHYS 040B. Covers the principles of materials science and engineering, with attention to topics in bioengineering. Explores atomic structures, hard treatment, fundamentals of corrosion, manufacturing processes, and characterization of materials. Cross-listed with BIEN 140A.

CEE 140B Biomaterials (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIEN 140A/CEE 140A. Covers the structure-property relations of metals, ceramics, polymers, and composites, as well as hard and soft tissues such as bone, teeth, cartilage, ligament, skin, muscle, and vasculature. Focuses on behavior of materials in the physiological environment. Cross-listed with BIEN 140B.

CEE 147 Bio-Microelectromechanical Systems (BioMEMS) (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 005C, CEE 011, CHEM 112C, MATH 046, PHYS 040C; or consent of instructor. An introduction to bio-microelectromechanical systems with applications in bioengineering. Topics include biocompatible materials, device fabrication techniques, and principles of practical biomedical devices. Exposes students to the biotech industry and possible career paths in bioengineering.

CEE 158 Professional Development for Engineers (3) Lecture, 3 hours. Prerequisite(s): upper-division standing. A review of various topics relevant to the professional development of chemical engineers. Includes career paths; interview strategies; professional registration and preparation for certification examinations; ethics; risk management and environmental health and safety; regulatory issues; and lifelong learning.

CEE 159 Dynamics of Biological Systems (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BCH 100 or BCH 110A. Covers engineering principles for the analysis and modeling of biological phenomena. Topics include molecular diffusion and transport, membranes, ligand-bioreceptor interactions, enzyme kinetics, and dynamics of metabolic pathways. Examines the application of these principles to the design of bioreactors, bioassays, drug delivery systems, and artificial organs. Cross-listed with BIEN 159.

CEE 197 Research for Undergraduates (1-4) Outside research, 3-12 hours. Prerequisite(s): consent of instructor and Chemical and Environmental Engineering undergraduate program advisor. Directed research on a topic relevant to chemical and environmental engineering. Requires a final written report. Course is repeatable to a maximum of 8 units.

Chemical Engineering

Upper-Division Courses

CHE 100 Engineering Thermodynamics (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 001C, MATH 010A, PHYS 040B; or consent of instructor. An introduction to engineering thermodynamics with emphasis on chemical and environmental engineering systems. Topics include concepts of equilibrium, temperature, and reversibility; the first law and concept of energy; and the second law and concept of entropy. Also examines equations of state, thermodynamic properties, and engineering applications used in the analysis and design of closed and open systems. Credit is awarded for only one of CHE 100 or ME 100A.

CHE 102 Catalytic Reaction Engineering (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 122 or consent of instructor. Principles of surface reactions and heterogeneous catalysis. Catalyzed reaction kinetics, heterogeneous reactions, diffusion and heterogeneous catalysis, analysis and design of heterogeneous reactors.

CHE 105 Introduction to Nanoscale Engineering (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CEE 135, MATH 010A, PHYS 040C; or consent of instructor. An introduction to nanotechnology engineering and its various applications. Includes electromagnetic waves and quantum mechanics; synthesis of nanostructures; assembly of nanostructures; and traditional and nontraditional methods of nanolithography and interactions between electronic and optical properties. Also covers organic heterostructures, nanotubes, and quantum computing.

CHE 110A Chemical Process Analysis (3) Lecture, 2 hours; discussion, 1 hour. Prerequisite(s): CHEM 001C, MATH 009C, PHYS 040B; or consent of instructor. Introduces the principles of conservation of mass in chemical process systems. Topics include the development of steady-state mass balances, and application of mass balances to existing industrial processes.

CHE 110B Chemical Process Analysis (3) Lecture, 2 hours; discussion, 1 hour. Prerequisite(s): CHE 110A with a grade of "C-" or better; or consent of instructor. Applies principles of conservation of energy to chemical process systems. Topics include the development of steady-state and unsteady-state energy balances as well as combined mass and energy balances in industrial processes.

CHE 114 Applied Fluid Mechanics (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 110A or ENVE 171, MATH 010A, MATH 046, PHYS 040B; or consent of instructor. An introduction to fluid statics, fluid flow, and flow of compressible and incompressible fluids in conduits and open-channel flow. Also covers flow past immersed bodies, transportation and metering of fluids, and agitation and mixing of liquids. Credit is awarded for only one of CHE 114 or ME 113.

CHE 116 Heat Transfer (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 100, CHE 114 with a grade of "C-" or better; or consent of instructor. An analysis of heat transfer for Chemical Engineering and Environmental Engineering majors. Topics include steady- and unsteady-state heat conduction, forced convection, basic radiation heat transfer, and design of heat exchangers. Credit is awarded for only one of CHE 116 or ME 116A.

CHE 117 Separation Processes (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 116, CHE 120; or consent of instructor. Covers fundamental concepts and practical techniques for designing equipment based on equilibrium stage processes. Explores gas-liquid absorption, distillation, liquid-liquid extraction, solid-liquid extraction, humidification, drying, and membrane processes.

CHE 118 Process Dynamics and Control (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 117, CHE 122, ENGR 118; or consent of instructor. Fundamentals of process control. Feedback and feedforward control of dynamic processes. Frequency response analysis. Introduction to multivariable control.

CHE 120 Mass Transfer (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 114 with a grade of "C-" or better, MATH 046; or consent of instructor. Introduction to analysis of mass transfer in systems of interest to chemical and environmental engineering practice. Explores transport of matter by diffusion, free, and forced convection.

CHE 122 Chemical Engineering Kinetics (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 110B, MATH 010A, MATH 046; or consent of instructor. Introduction to homogeneous and heterogeneous kinetics and reactor design for chemical and biochemical processes.

CHE 124 Biochemical Engineering Principles (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BCH 110A, BIOL 121/MCBL 121 (BIOL 121/MCBL 121 may be taken concurrently), CHE 120, CHE 122; or consent of instructor. Examines the principles of biochemical engineering. Topics include kinetics of enzymatic reactions and microbial growth, batch and continuous culture reactors, product formulation, and nutrient utilization. Also studies oxygen transfer, bioreactor scale-up, air and media sterilization, fundamentals of bioreactor design, and bioseparations.

CHE 124L Biochemical Engineering Laboratory (2) Laboratory, 6 hours. Prerequisite(s): CHE 124 or consent of instructor. Laboratory practices in biochemical engineering. Determination of microbial kinetics and biologically mediated reactions, oxygen transfer coefficients. Batch and continuous culturing, air and media sterilization, bioseparations.

CHE 130 Advanced Engineering Thermodynamics (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 100 or consent of instructor. Advanced study of chemical thermodynamics and their applications to chemical and environmental engineering processes. Applies principles for the thermodynamic behavior of pure solutions and mixtures, phases, and chemical equilibria for homogeneous and heterogeneous systems to a variety of processes common to chemical and environmental engineering. Cross-listed with ENVE 130.

CHE 131 Electrochemical Engineering (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 116, CHE 122, CHE 130; or consent of instructor. Explores role of thermodynamics, charge transfer kinetics, and mass transfer on behavior of electrochemical systems. Includes cell thermodynamics, faradaic and non-faradaic rate processes, ionic transport, nucleation and growth theories. Shows applications to chemical sensors, batteries, corrosion, and thin film deposition. Provides in-class demonstrations to illustrate concepts.

CHE 136 Advanced Topics in Heat Transfer (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 116, CHE 120. Advanced study of the computational and theoretical methods associated with heat transfer, fluid flow, and other related processes. Topics include phenomena of heat conduction, convection, and the calculation of flow fields.

CHE 140 Cell Engineering (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): CHE 124 or consent of instructor. Introduction to genetic and environmental manipulation of cells for production of proteins and for enhanced biocatalytic and synthetic activities. Cloning and gene expression in different host systems, posttranslational processing, metabolic controls and kinetics, *in vivo* NMR spectroscopy, cell modeling, and sensitivity analysis.

CHE 150 Biosensors (4) Lecture, 2 hours; laboratory, 6 hours. Prerequisite(s): BCH 184 or CHE 124 or

consent of instructor. Introduces the fundamentals and applications of biosensors. Topics on enzyme-, whole cell-, tissue-, and antibody/antigen-based electrochemical, optical, and piezoelectric biosensors for applications in bioprocess monitoring and control, environmental monitoring, and health care are covered.

CHE 160A Chemical and Environmental Engineering Laboratory (3) Laboratory, 6 hours; written work, 3 hours. Prerequisite(s): CHE 114, CHE 120. Involves laboratory exercises in chemical and environmental engineering. Experiments cover physical measurements, fluid mechanics, and mass transfer. Emphasizes experimental design, analysis of results, and preparation of engineering reports. Cross-listed with ENVE 160A.

CHE 160B Chemical Engineering Laboratory (3) Laboratory, 6 hours; written work, 3 hours. Prerequisite(s): CHE 116, CHE 122. Consists of laboratory exercises in chemical engineering. Includes experiments in physical measurements, heat transfer, reactor analysis, and chemical kinetics. Emphasis is on experimental design, analysis of results, and preparation of engineering reports.

CHE 160C Chemical Engineering Laboratory (3) Laboratory, 6 hours; written work, 3 hours. Prerequisite(s): CHE 117, CHE 118 (CHE 117 and CHE 118 may be taken concurrently), CHE 122. Consists of laboratory exercises in chemical engineering. Includes experiments and simulations in separation processes and in process control. Emphasis is on experimental design, analysis of results, and preparation of engineering reports.

CHE 161 Nanotechnology Processing Laboratory (3) Laboratory, 6 hours; written work, 3 hours. Prerequisite(s): CHE 100 or consent of instructor. An introduction to growth and characterization techniques that involve nanomaterials and devices. Includes preparing thin films; synthesizing Au and CdS nanoparticles; synthesizing carbon nanotubes; synthesizing alumina nanotemplate; synthesizing gold and nickel nanowires; and assembling of nanowires. Also includes imaging samples with optical, scanning electron microscope, scanning tunneling microscope, and atomic force microscope.

CHE 171 Pollution Control for Chemical Engineers (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): CHE 117 or consent of instructor. Principles of industrial pollution control in chemical engineering plants. Regulations, criteria, measurements, and pollution control systems associated with air, wastewater, and solid waste management.

CHE 175A Chemical Process Design (4) Lecture, 1 hour; laboratory, 6 hours; consultation, 1 hour. Prerequisite(s): CHE 117, CHE 122, MATH 010B, senior standing in Chemical Engineering; CHE 118 (may be taken concurrently). Introduction to chemical process plant design procedures through economic analysis and actual design of chemical processes. Addresses practical applications to current chemical and biochemical processes and economic constraints. Concentrates on general design considerations and economic principles. Graded In Progress (IP) until CHE 175A and CHE 175B are completed, at which time a final, letter grade is assigned.

CHE 175B Chemical Process Design (4) Lecture, 1 hour; laboratory, 6 hours; consultation, 1 hour. Prerequisite(s): CHE 175A; senior standing in Chemical Engineering. Introduction to chemical process plant design procedures through economic analysis and actual design of chemical processes. Topics address practical applications to current chemical and biochemical processes and economic constraints. Students complete a detailed analysis and process design of the projects begun in CHE 175A. A final report and oral presentation are required. Satisfactory (S) or No Credit (NC) grading is not available.

CHE 190 Special Studies (1-5) Individual study, 3-15 hours. Prerequisite(s): upper-division standing;

consent of instructor and department chair. Individual study to meet special curricular needs. Course is repeatable to a maximum of 9 units.

Environmental Engineering

Upper-Division Courses

ENVE 120 Unit Operations and Processes in Environmental Engineering (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 120, ENVE 133; or consent of instructor. Fundamentals of physicochemical unit processes used in environmental engineering. Addresses coagulation and flocculation, sedimentation, filtration, adsorption, redox processes, and heat and mass transfer processes.

ENVE 121 Biological Unit Processes (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ENVE 120 (may be taken concurrently), ENVE 142. An introduction to the theory and design of biological unit processes used in environmental engineering. Suspended growth processes, attached growth processes, digestion processes, and nutrient removal systems are covered.

ENVE 130 Advanced Engineering Thermodynamics (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 100 or consent of instructor. Advanced study of chemical thermodynamics and their applications to chemical and environmental engineering processes. Applies principles for the thermodynamic behavior of pure solutions and mixtures, phases, and chemical equilibria for homogeneous and heterogeneous systems to a variety of processes common to chemical and environmental engineering. Cross-listed with CHE 130.

ENVE 133 Fundamentals of Air Pollution Engineering (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): PHYS 040B, MATH 046, CHE 114, CHEM 112B, CHE 110A or ENVE 171; or consent of instructor. Covers principles, modeling, and design of systems for atmospheric emission control of pollutants such as photochemical smog and by-products of combustion. Explores the effects of air pollution on health.

ENVE 134 Technology of Air Pollution Control (4) Lecture, 4 hours. Prerequisite(s): ENVE 133. Processes and design of control technologies for gaseous and particulate pollutants. Methods and design of ambient air quality measurements and air pollution source sampling for both gaseous and particulate pollutants.

ENVE 135 Fate and Transport of Environmental Contaminants (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 120, ENVE 133, ENVE 142, ENGR 118, CHEM 112B; or consent of instructor. Covers fate and transport of contaminants in the air, water, and soil environments. Addresses description and modeling of advection, dispersion, phase transfer, and chemical transformation mechanisms.

ENVE 138 Combustion Engineering (4) Lecture, 4 hours. Prerequisite(s): CHE 114, ENVE 133. Covers the fundamental development of the engineering and design principles underlying combustion engines and turbines and the associated emission control technology. Includes aspects of fuels, lubricants, instrumentation, chemistry of combustion, and kinetics related to the understanding of engineering processes, engine design, and emission control.

ENVE 142 Water Quality Engineering (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 114 or ENVE 171; or consent of instructor. An introduction to the engineering aspects of water quality management. Addresses water quality characterization and mode-

ling techniques for natural and engineered systems. Discusses application of chemical equilibrium and kinetic models to water quality.

ENVE 144 Solid Waste Management (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 002 or both BIOL 005A and BIOL 05LA; both CHEM 001C and CHEM 01LC or both CHEM 01HC and CHEM 11LC; either both ENSC 001 (or ENSC 001H) and ENSC 002 (or ENSC 002H) or ENVE 171; MATH 009B (or MATH 09HB); or consent of instructor. A study of the characterization, collection, transportation, processing, disposal, recycling, and composting of municipal solid waste. Emphasizes accepted management strategies and design procedures for recovering or disposing solid wastes while protecting public and environmental well-being. Cross-listed with ENSC 144.

ENVE 145 Hazardous Waste Management (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ENVE 120 and ENVE 142. Advanced course in the study of physio-chemical, thermal, and biological treatment of hazardous waste. Emphasis is placed on the technical understanding and design of physical, biological, and thermal treatment methods; transportation of hazardous waste; and hazardous waste characterization and site assessment.

ENVE 146 Water Quality Systems Design (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 114 or consent of instructor. Analysis and design of water conveyance systems including water distribution networks, wastewater and storm water collection systems, structures for flow measurement and control, and pumps and pump stations. Includes projects to develop design process skills including problem specification, modeling, and analysis.

ENVE 160A Chemical and Environmental Engineering Laboratory (3) Laboratory, 6 hours; written work, 3 hours. Prerequisite(s): CHE 114, CHE 120. Involves laboratory exercises in chemical and environmental engineering. Experiments cover physical measurements, fluid mechanics, and mass transfer. Emphasizes experimental design, analysis of results, and preparation of engineering reports. Cross-listed with CHE 160A.

ENVE 160B Environmental Engineering Laboratory (3) Laboratory, 6 hours; written work, 3 hours. Prerequisite(s): ENVE 133. Consists of laboratory exercises in environmental engineering. Includes experiments in physical measurements, reaction kinetics, reactor analysis, and air pollution engineering. Emphasis is on experimental design, analysis of results, and preparation of engineering reports.

ENVE 160C Environmental Engineering Laboratory (3) Laboratory, 6 hours; written work, 3 hours. Prerequisite(s): ENVE 120, ENVE 142. Consists of laboratory exercises in environmental engineering. Includes experiments in physical measurements, water quality, and unit operations and processes. Emphasis is on experimental design, analysis of results, and preparation of engineering reports.

ENVE 171 Fundamentals of Environmental Engineering (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 001C, MATH 009C, PHYS 040B; or consent of instructor. An introduction to mass and energy balances. Includes an overview of contaminants and their effects on human health and the environment. Provides a basic understanding of contaminants, their sources, and their movement and fate in the environment.

ENVE 175A Senior Design Project (4) Lecture, 1 hour; laboratory, 6 hours; consultation, 1 hour. Prerequisite(s): senior standing in Environmental Engineering. Under the direction of a faculty member, students (individually or in small teams with shared responsibilities) propose, design, build, and test environmental engineering devices or systems. A written report,

giving details of the project and test results, and an oral presentation of the design aspects are required. Graded In Progress (IP) until ENVE 175A and ENVE 175B are completed, at which time a final, letter grade is assigned.

ENVE 175B Senior Design Project (4) Lecture, 1 hour; laboratory, 6 hours; consultation, 1 hour. Prerequisite(s): senior standing in Environmental Engineering; ENVE 175A. Under the direction of a faculty member, students (individually or in small teams with shared responsibilities) propose, design, build, and test environmental engineering devices or systems. A written report, giving details of the project and test results, and an oral presentation of the design aspects are required. Satisfactory (S) or No Credit (NC) grading is not available.

ENVE 190 Special Studies (1-5) Individual study, 3-15 hours. Prerequisite(s): upper-division standing; consent of instructor and department chair. Individual study to meet special curricular needs. Course is repeatable to a maximum of 9 units.

Graduate Courses

CEE 200 Advanced Engineering Computation (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ENGR 118 or consent of instructor. Problem-solving techniques for basic engineering systems including heat and mass transfer, coupled reactions, fluid flow potential, and control.

CEE 202 Transport Phenomena (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 114, CHE 116, CHE 120, ENGR 118; or consent of instructor. Topics include transport phenomena, potential flow, and boundary layer theories with applications to simultaneous heat, momentum, and mass transfer. Introduces numerical techniques used to solve advanced transport phenomena problems.

CEE 204 Advanced Kinetics and Reaction Engineering (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 102 or CHE 120 or consent of instructor. Emphasizes kinetics and mechanisms of heterogeneous reactions in different types of reactors. Specific topics include gas-solid noncatalytic reactions; catalytic surfaces and catalyst characterization; and adsorption, diffusion, reaction, and heat transfer in porous catalysts.

CEE 206 Advanced Chemical Engineering Thermodynamics (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 130/ENVE 130 or consent of instructor. Application of the laws of thermodynamics to phase and chemical reaction equilibrium. Introduction to statistical thermodynamics, molecular simulations, and the evaluation of thermodynamic properties from molecular simulations.

CEE 210 Cell Engineering (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): CHE 124 or consent of instructor. Introduction to genetic and environmental manipulation of cells for production of proteins and for enhanced biocatalytic and synthetic activities. Topics include cloning and gene expression in different host systems, posttranslational processing, metabolic controls and kinetics, in vivo nuclear magnetic resonance spectroscopy, cell modeling, and sensitivity analysis.

CEE 212 Bioseparations and Bioprocess Engineering (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 124 or consent of instructor. Examines fundamentals of separation processes used to isolate and purify biochemical products such as whole cells, enzymes, food additives, and pharmaceuticals. Covers selected aspects of biochemical engineering such as microbial interactions, economics, and mathematical modeling of bioprocesses.

CEE 220 Modeling Chemical, Biochemical, and Environmental Processes (4) Lecture, 2 hours; discussion, 2 hours. Prerequisite(s): graduate standing in Chemical and Environmental Engineering

or consent of instructor. Introduces simulation software and the use of numerical simulation to solve dynamic chemical, biochemical, and environmental problems. Topics include model formulation and development, model sensitivity studies, and application of simulations to chemical, biochemical, and environmental processes.

CEE 221 Introduction to Microfluidics (4) Lecture, 4 hours. Prerequisite(s): CHE 160A/ENVE 160A or consent of instructor. Provides a theoretical and practical introduction to microfluidic devices. Covers traditional and new methods for making microfluidic devices and assembly of components into systems. Emphasizes the considerations underlying the design or operation of devices based on pressure-driven or electrokinetic flow. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CEE 225 Physical and Chemical Separation Processes (4) Lecture, 4 hours. Prerequisite(s): graduate standing in Chemical and Environmental Engineering or consent of instructor. Covers the fundamental and applied concepts of physical and chemical processes relevant to engineered and natural environmental systems. Topics include basic colloid chemistry and an introduction to DLVO theory, coagulation and flocculation, mechanisms of particle removal in filters and transport in porous media, absorption, disinfection, control of disinfection by-products, and advanced treatment processes such as membranes.

CEE 230 Biosensors (4) Lecture, 2 hours; laboratory, 6 hours. Prerequisite(s): BCH 110A, BCH 110B, BIOL 121/MCBL 121, CHE 124; or consent of instructor. Introduces the fundamentals and applications of biosensors. Covers enzyme-, whole cell-, and antibody- or antigen-based electrochemical, optical, and piezoelectric biosensors. Applies such knowledge to bioprocess monitoring and control, environmental monitoring, and health care.

CEE 231 Scattering and Reflectometry for Environmental, Material, and Biological Applications (4) Lecture, 3 hours; discussion, 5 hours per quarter; laboratory, 15 hours per quarter. Prerequisite(s): CEE 206 or equivalent. Covers experimental and theoretical aspects of conventional static and dynamic light scattering, small-angle X-ray scattering, small-angle neutron scattering, X-ray and neutron reflectivity for colloids and biological solutions, surfaces, and interfaces. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CEE 232 Green Engineering (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 120 or consent of instructor. A study of the design, commercialization, and use of feasible and economical processes and products that minimize risks to human health and the environment. Topics include environmental issues, risk assessment, and regulations; flow of chemical and manufacturing unit processes and flow-sheet analysis for pollution prevention; product life-cycle assessment; and industrial ecology. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Credit is awarded for only one of CEE 132 or CEE 232.

CEE 233 Advanced Air Pollution Control and Engineering (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CEE 202, CEE 206, CHEM 112A, CHEM 112B, ENVE 133, ENVE 134; or consent of instructor. Covers principles necessary to understand the atmospheric behavior of air pollutants. Topics include gas- and aerosol-phase chemistry, atmospheric diffusion, removal processes and residence times, and the formation and fate of gas and aerosol pollutants.

CEE 234 Vehicle Emissions Control Technology, Measurement Procedures, and Alternative Fuels (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Covers the nature of gaseous and particulate emissions and the technical aspects of energy efficiency from mobile sources. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CEE 241 Water Quality (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ENVE 142 or consent of instructor. Topics include assessment of surface water and groundwater quality for beneficial uses, fate and transport of waterborne pollutants, and water quality modeling in natural and engineered systems.

CEE 242 Pilot Plant Laboratory (4) Lecture, 1 hour; laboratory, 9 hours. Prerequisite(s): ENVE 120, ENVE 121; or consent of instructor. Laboratory investigations of physical, chemical, and biological processes for water treatment, wastewater treatment, and soil remediation.

CEE 245 Advanced Hydraulic Engineering (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 114, ENVE 142 (ENVE 142 may be taken concurrently); or consent of instructor. An introduction to the basic methods of hydraulic engineering for water quality control. Topics include design and analysis of basic flow and water containment structures, sanitary and storm sewers, pumps and valves, and pipe networks. Emphasis is given to design projects aimed at developing skills in problem specification, modeling, and analysis. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CEE 246 Surface and Interface Phenomena (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHE 100 or ME 100A or consent of instructor. An introduction to colloid systems, capillarity, surface tension and contact angle, and micelles and microemulsions. Also covers adsorption and desorption at the solid-liquid interface, electrostatic forces, and colloid stability.

CEE 247 Molecular Thermodynamics of Complex Fluids (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CEE 200, CEE 206, or consent of instructor. Introduces recent developments in applied thermodynamics and molecular simulations, with emphasis on current concerns in chemical and environmental engineering such as colloids, polymers, biomacromolecules, and fluids under inhomogeneous conditions.

CEE 249 Integration of Computational and Experimental Biology (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): BIOL 005B; MATH 010B, MATH 046, PHYS 040C; graduate standing. A multidisciplinary introduction to computational methods used to analyze experimental biological data. Introduction to mathematical concepts needed to understand protein structure and dynamics, protein-protein interactions (structures and networks), gene regulatory networks, signal transduction networks, metabolic networks, and kinetic modeling of cellular processes. Also covers techniques used to derive experimental data. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with BIEN 249.

CEE 250 Special Topics in Chemical and Environmental Engineering (1 or 2) Seminar, 1-2 hours. Prerequisite(s): graduate standing. Seminar in selected topics in chemical and environmental engineering presented by graduate students, staff, faculty, and invited speakers. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

CEE 251 Microbial Engineering and Environmental Biotechnology (1 or 2) Seminar, 1-2 hours. Discusses the recent development of novel biocatalysts and biological materials for degrading toxic pollutants or synthesizing environmentally friendly chemicals. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

CEE 253 Biodegradation and Bioremediation (1 or 2) Seminar, 1-2 hours. Prerequisite(s): graduate standing. Reviews current research. Special emphasis is placed on biological techniques for air pollution control, bioremediation of methyl tert-butyl ether, and molecular techniques for microorganism monitoring. Normally graded Satisfactory (S) or No Credit

158 / Programs and Courses

(NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination. Course is repeatable.

CEE 254 Organic Electronic Materials (2) Seminar, 2 hours. Prerequisite(s): graduate standing or consent of instructor. A study of design, synthesis, purification, manufacture, and application of carbon-based electronic materials. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable. Cross-listed with CHEM 267.

CEE 255 Special Topics in Water Quality Engineering (1 or 2) Seminar, 1-2 hours. Prerequisite(s): graduate standing. Involves reports and discussion by students, faculty, and visiting scholars on current research topics in water quality engineering. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

CEE 256 Special Topics in Particulate Measurement and Air Quality (1 or 2) Seminar, 1-2 hours. Prerequisite(s): graduate standing. Topics include atmospheric chemistry, aerosol chemistry and physics, and measurement techniques used for source and ambient sampling of gases and aerosols. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination. Course is repeatable.

CEE 257 Special Topics in Bio-Nanotechnology (1-2) Seminar, 1 hour; consultation, 0-1 hour. Prerequisite(s): graduate standing or consent of instructor. Focuses on the application of nanotechnology for further developments in bioengineering and medicine. Students complete presentations on the latest developments in nanotechnology. Students who submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

CEE 258 Biosensing and Bioremediation (1 or 2) Seminar, 1-2 hours. Prerequisite(s): graduate standing. Involves oral presentations and intensive small-group discussions of current literature on biological detoxification of hazardous chemicals and biological-based sensors for environmental, clinical, food quality, and process monitoring. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CEE 259 Special Topics in Materials Electrochemistry (1) Seminar, 1 hour. Prerequisite(s): graduate standing. Topics include nanoelectrochemical systems, electrochemistry, bioelectrochemistry, magnetic materials, spintronics, microelectromechanical systems/nanoelectromechanical systems (MEMS/NEMS), nanosensor arrays, nanoelectronics, corrosion, fuel cells, batteries, thermoelectric materials, electroenzymology, electrodeposition, electroless deposition, and synthesis of nanowires and nanotubes. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination. Course is repeatable as topics change.

CEE 260 Structural Ordering in Colloidal Dispersions (1 or 2) Seminar, 1-2 hours. Prerequisite(s): graduate standing. Introduces recent advances in understanding intercolloid forces and self-assembly of colloidal particles for the fabrication of new materials. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

CEE 261 Special Topics in Zeolites, Fuel Cells, and Nanostructured Materials (1 or 2) Seminar, 1-2 hours. Prerequisite(s): graduate standing. Covers design, synthesis, and engineering of zeolite thin films for applications in semiconductors and in aerospace; development of fuel cell membranes and electrode catalysts and production of hydrogen; and synthesis and manipulation of nanomaterials. Students who

present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

CEE 262 Special Topics in Systems Biology (1 or 2) Seminar, 1-2 hours. Prerequisite(s): graduate standing. Consists of oral presentations and intense small-group discussions of the current literature and research on computational and experimental aspects of systems biology. Explores high-throughput experiments, experimental design, numerical methods, model development, written and oral presentation skills, ethics, and laboratory techniques. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable.

CEE 263 Membrane Separations (2) Seminar, 2 hours. Prerequisite(s): graduate standing in Chemical and Environmental Engineering or consent of instructor. Covers theoretical and applied concepts of membrane separation processes. Topics may include basic membrane transport theory, membrane materials and formation processes, advanced colloid and surface chemistry, Derjaguin-Landau-Verwey-Overbeek (DLVO) theory on colloid stability, colloidal hydrodynamics, and transport in porous media. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CEE 265 Special Topics in Microbial Fate and Transport in Aquatic Environments (1 or 2) Seminar, 1 hour; individual study, 0-3 hours. Prerequisite(s): graduate standing or consent of instructor. Explores the theoretical and applied research currently being conducted in the area of microbial pathogen transport in natural and engineered aquatic systems. Topics include the theory of colloid transport and filtration, quantification and analysis of microbial adhesion or deposition kinetics, and whole-cell and molecular-scale microbial analysis techniques. Students who give class presentations receive credit for 2 units; other students receive credit for 1 unit. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CEE 266 Special Topics in Biological Conversion of Biomass (1 or 2) Seminar, 1 hour; individual study, 0-3 hours. Prerequisite(s): graduate standing. Consists of oral presentations and small group discussions of current and historic literature on biological conversion of biomass to fuels and chemicals. Students who make presentations receive credit for 2 units; other students receive credit for 1 unit. Graded Satisfactory (S) or No Credit (NC). Course is repeatable as topics change.

CEE 267 Special Topics in Bionanotechnology (2) Seminar, 2 hours. Prerequisite(s): graduate standing. Introduces recent advances in biomimetics, biomineralization, and bio-inspired materials for nanostructures, as well as for energy storage and conversion applications. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable to a maximum of 18 units.

CEE 268 Special Topics in Environmental Chemistry (2) Seminar, 2 hours. Prerequisite(s): graduate standing. Addresses the key role that environmental chemical processes play in water quality, pollutant fate, and the development of strategies for the treatment and reuse of contaminated natural resources. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable to a maximum of 18 units.

CEE 269 Special Topics in Aerosols and Climate (2) Seminar, 2 hours. Prerequisite(s): graduate standing. Introduces research at the interface of particle air quality and climate. Focuses on the effects of particle formation and composition on climate. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination. Course is repeatable.

CEE 286 Colloquium in Chemical and Environmental Engineering (1) Colloquium, 1 hour. Prerequisite(s): graduate standing. Lectures on a current research topic in chemical engineering, environmental engineering, and other related fields presented by faculty members and visiting scientists. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CEE 290 Directed Studies (1-6) Individual study, 3-18 hours. Prerequisite(s): graduate standing; consent of instructor and graduate advisor. Individual study, directed by a faculty member, of selected topics in chemical and environmental engineering. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 9 units.

CEE 292 Concurrent Studies in Chemical and Environmental Engineering (1-4) Outside research, 3-12 hours. Prerequisite(s): consent of instructor. To be taken concurrently with a 100-series course but on an individual basis. Devoted to specific additional projects related to the 100-series course. Faculty provide guidance and evaluation throughout the quarter. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 8 units.

CEE 297 Directed Research (1-6) Outside research, 3-18 hours. Prerequisite(s): graduate standing; consent of instructor. Research conducted under the supervision of a faculty member on selected problems in chemical and environmental engineering. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 9 units.

CEE 298-I Individual Internship (1-12) Written work, 1-12 hours; internship, 2-24 hours. Prerequisite(s): graduate standing; consent of instructor. Individual apprenticeship in chemical and environmental engineering with an approved professional individual or organization, and a faculty member. A written report is required. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 16 units.

CEE 299 Research for the Thesis or Dissertation (1-12) Outside research, 3-36 hours. Prerequisite(s): graduate standing; consent of instructor. Research in chemical and environmental engineering for the M.S. thesis or Ph.D. dissertation. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Course

CEE 302 Teaching Practicum (1-4) Seminar, 1-4 hours. Prerequisite(s): appointment as a teaching assistant or associate in Chemical and Environmental Engineering. Topics include effective teaching methods such as those involved in leading discussion sections, preparing and grading examinations, and student-instructor relations in lower- and upper-division Chemical Engineering and Environmental Engineering courses. Required each quarter of teaching assistants and associates in Chemical and Environmental Engineering. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.

Chemistry

Subject abbreviation: CHEM
College of Natural and Agricultural Sciences

Eric L. Chronister, Ph.D., Chair
Leonard Mueller, Ph.D., Vice Chair
Department Office, 248 Chemical Sciences
(951) 827-3789; chem.ucr.edu

Distinguished Professors

David F. Bocian, Ph.D.
Robert Haddon, Ph.D. (Chemistry/Chemical and Environmental Engineering)
Michael Pirrung, Ph.D.
Francisco Zaera, Ph.D.

Professors

Christopher J. Bardeen, Ph.D.
Ludwig Bartels, Ph.D.
Quan "Jason" Cheng, Ph.D.
Eric L. Chronister, Ph.D.
Pingyun Feng, Ph.D.
Cynthia K. Larive, Ph.D.
Thomas H. Morton, Ph.D.
Leonard J. Mueller, Ph.D.
Christopher Y. Switzer, Ph.D.
Yinsheng Wang, Ph.D.

Jack Eichler, Ph.D.

Cooperating Faculty

Richard J. Debus, Ph.D. (Biochemistry)
Jocelyn G. Millar, Ph.D. (Entomology)
Ashok Mulchandani, Ph.D. (Chemical & Environmental Engineering)
Mihri Ozkan, Ph.D. (Electrical and Computer Engineering)
Roya Bahreini, Ph.D. (Atmospheric Science)
Valentine Vullev, Ph.D. (Bioengineering)
Paul J. Ziemann, Ph.D. (Environmental Sciences)

Major

The Department of Chemistry offers a B.S. and B.A. degree in Chemistry and a B.S. in Chemistry with a Chemical Physics option or an Environmental Chemistry option.

The B.S. program is certified by the American Chemical Society and is designed for students interested in a professionally oriented major leading most often to a career or advanced study in chemistry.

The B.A. program is designed for students who wish to obtain a broad educational background with less intensive emphasis on chemistry. In this program, students have increased ease in meeting requirements for such areas as premedical, pre dental, or prepharmaceutical science; education; and administration. Check careers.ucr.edu.

A **Chemical Physics** option is available for students who wish to prepare for admission to a graduate program in chemical physics.

The **Environmental Chemistry** option is available for students who wish to become familiar with environmental processes and problems related to air, water, and soil, and to apply their chemical knowledge working in environmental-related areas. This option also prepares students for admission to a graduate program emphasizing environmental chemistry.

Pre-Health Science Chemistry majors in either the B.S. or B.A. programs can prepare for admission to medical, pharmacy, or dental schools by carefully planning their programs of study. Students planning to apply for post-graduate studies in the health sciences should make it a special point to consult with their Chemistry advisor early in their studies at UCR. Check hpac.ucr.edu.

Teaching Credential

Teachers in the public schools in California must have a credential approved by the State Commission on Teacher Credentialing. The credential requires an undergraduate major, baccalaureate degree, and completion of a graduate credential program such as that offered by the Graduate School of Education at UCR (see Education in this catalog and education.ucr.edu).

UCR has an approved undergraduate program for Chemistry majors who plan to get a Multiple Subjects Credential and teach in the elementary (K-6) grades. A breadth of course work is necessary, in addition to the specified requirements for the major. Students are urged to start early, preferably as freshmen, selecting courses most helpful for this career. Details and counseling on the Bridge to Teaching Program, a preparation program for the multiple subjects credential, are available in the Office of Interdisciplinary Programs, 3111 Interdisciplinary Building South (INTS), (951) 827-1584; lsnid.ucr.edu. Details and counseling on other programs are available in the Graduate School of Education and education.ucr.edu/programs.html.

UCR does not yet have a state-approved undergraduate program for chemistry majors who wish to teach at the secondary level. The Teaching Credential in Science, chemistry emphasis, is required for chemistry teachers, grades 7-12. Students who plan to get this credential must take the commission's subject-matter assessment examination and should make certain their academic program includes preparatory course work. The examination includes chemistry in depth and general science with introductory, college-level biology, chemistry, physics, and geoscience (geology, meteorology, oceanography, astronomy).

Further information about courses, requirements, and examinations can be obtained in orientation meetings and the Graduate School of Education (1124 Sproul Hall).

California Teach-Science/Mathematics Initiative (CaTEACH-SMI) California Teach-Science Mathematics Initiative (CaTEACH-SMI) has a

goal of addressing the critical need of highly qualified K-12 science and mathematics teachers in California. With an economy increasingly reliant on science, technology, engineering, and mathematics (STEM) and the anticipated large scale retirement of qualified teachers, this is an essential time to explore and prepare for a career in teaching science or mathematics.

CaTEACH-SMI at UCR offers undergraduate students paid/unpaid opportunities, such as the SMI & Alpha Center Apprentice Programs, to explore STEM teaching as a career option. Through CaTEACH-SMI, students receive advising and mentoring to prepare for entrance into an intern teaching credential program while diligently coordinating with academic advisors to ensure completion of STEM degree requirements. The CaTEACH-SMI Resource Center provides future STEM teachers with material and financial resources which includes the National Science Foundation (NSF) Noyce Scholarship Program to promote planning and professional development towards a science/mathematics education career.

For more information about the CaTEACH-SMI program, please visit smi.ucr.edu, the Resource Center at 1315 Pierce Hall, or on Facebook at [facebook.com/ScienceMathInitiativeAtUcr](https://www.facebook.com/ScienceMathInitiativeAtUcr).

Transfer Students

Students transferring to the Chemistry major must complete courses comparable to the following one-year sequences before they transfer:

1. General chemistry, equivalent to CHEM 001A, CHEM 001B, CHEM 001C, CHEM 011A, CHEM 011B, CHEM 011C, each course completed with a grade of "C" or better
2. First-year calculus, equivalent to MATH 009A, MATH 009B, MATH 009C, each course completed with a grade of "C" or better

At least one of the following one-year sequences:

1. General physics (calculus-based) equivalent to PHYS 040A, PHYS 040B, PHYS 040C, each course completed with a grade of "C" or better (strongly recommended)
2. Second-year calculus, equivalent to MATH 010A, MATH 010B, MATH 046, each course completed with a grade of "C" or better
3. Organic chemistry (one-year lower-division), each course completed with a grade of "B" or better

Students must have a minimum grade point average of 2.70 in transferable college courses. UCR has articulation agreements with most of the California community colleges. These agreements list specific community college courses that have been designated as comparable to UCR courses (see the statewide articulation web site at assist.org). Transfer students will usually find it advantageous to complete most or all sequences before starting at UCR. All prospective transfers should try to complete the sequences they begin rather than divide a sequence between two campuses.

Change of Major Criteria

General requirement:

1. Students must be in good academic standing with 2.0 cumulative GPA and 2.0 upper-division chemistry major GPA.
2. Grades for all chemistry core and required lower-division math and physics courses must be "C-" or better.
3. A grade of "C-" or better in each of the courses used to satisfy the 20-unit CNAS Natural Science and Mathematics breadth requirement.
4. AP credit is not accepted for lower-division chemistry courses.

Specific requirement:

If student has completed less than 45 units (first year students), then

- Completion of CHEM 001A, CHEM 01LA, MATH 008B or MATH 009A.

If student has completed between 45 and 90 units (second year students), then

- Completion of MATH 008B or MATH 009A, MATH 009B, MATH 009C.
- Completion of CHEM 001A, CHEM 001B, CHEM 001C, CHEM 01LA, CHEM 01LB, CHEM 01LC and PHYS 040A or PHYS 002A and PHYS 02LA (PHYS 002A & PHYS 02LA can be used for B.A. program only)

If student has completed between 90 and 135 units (third year students), then

- Completion of all lower-division math requirements (MATH 008B or MATH 009A, MATH 009B, MATH 009C, MATH 010A for B.A. program; and MATH 008B or MATH 009A, MATH 009B, MATH 009C, MATH 010A, MATH 010B, MATH 046 for B.S. program).
- Completion of the following chemistry courses (CHEM 001A, CHEM 001B, CHEM 001C, CHEM 01LA, CHEM 01LB, CHEM 01LC, CHEM 005, CHEM 112A, CHEM 112B, CHEM 112C).
- Completion of all lower-division physics requirements (PHYS 040A, PHYS 040B, PHYS 040C or PHYS 002A, PHYS 002B, PHYS 002C and PHYS 02LA, PHYS 02LB, PHYS 02LC) (Phys 002A, PHYS 002B, PHYS 002C and PHYS 02LA, PHYS 02LB, PHYS 02LC can be used for B.A. program only)

If student has completed more than 135 units (fourth year students), then

- Completion of all lower-division math requirements (MATH 008B or MATH 009A, MATH 009B, MATH 009C, MATH 010A for B.A. program; and MATH 008B or MATH 009A, MATH 009B, MATH 009C, MATH 010A, MATH 010B, MATH 046 for B.S. program).
- Completion of all lower-division chemistry courses (CHEM 001A, CHEM 001B, CHEM 001C, CHEM 01LA, CHEM 01LB, CHEM 01LC, CHEM 005, CHEM 112A, CHEM 112B, CHEM 112C).

- Completion of all lower-division physics requirements (PHYS 040A, PHYS 040B, PHYS 040C or PHYS 002A, PHYS 002B, PHYS 002C and PHYS 02LA, PHYS 02LB, PHYS 02LC) (PHYS 002A, PHYS 002B, PHYS 002C and PHYS 02LA, PHYS 02LB, PHYS 02LC can be used for B.A. program only)
- Completion of upper-division chemistry courses (CHEM 125 and CHEM 150A)

University Requirements

See Undergraduate Studies section.

College Requirements

See College of Natural and Agricultural Sciences, Colleges and Programs section.

Some of the following requirements for the major may also fulfill some of the college's breadth requirements. Consult with a professional academic advisor at the CNAS Advising Center, 1223 Pierce Hall.

Major Requirements

The major requirements for the B.A. and the B.S. degree in Chemistry are as follows:

Bachelor of Arts

1. Lower-division requirements (51-52 units)

- a) CHEM 001A, CHEM 001B, CHEM 001C, CHEM 01LA, CHEM 01LB, CHEM 01LC (or CHEM 01HA and CHEM 1HLA, CHEM 01HB and CHEM 1HLB, CHEM 01HC and CHEM 1HLC), CHEM 005
- b) MATH 008B or MATH 009A, MATH 009B, MATH 009C, MATH 010A
- c) PHYS 040A, PHYS 040B, PHYS 040C (or PHYS 002A, PHYS 002B, PHYS 002C, PHYS 02LA, PHYS 02LB, PHYS 02LC)

2. Upper-division requirements (38-48 units)

- A minimum grade of "C-" for any upper-division course used to fulfill the requirements for the B.A. degree.
- a) CHEM 110A, CHEM 110B, CHEM 112A, CHEM 112B, CHEM 112C, CHEM 113, CHEM 125, CHEM 150A, CHEM 191, and either CHEM 111 or CHEM 140 or CHEM 166
 - b) Ten (10) additional upper-division units in Chemistry if the year of organic chemistry is taken at a community college

Bachelor of Science

1. Lower-division requirements (59-60 units)

- a) CHEM 001A, CHEM 001B, CHEM 001C, CHEM 01LA, CHEM 01LB, CHEM 01LC (or CHEM 01HA and CHEM 1HLA, CHEM 01HB and CHEM 1HLB, CHEM 01HC and CHEM 1HLC), CHEM 005
- b) MATH 008B or MATH 009A, MATH 009B, MATH 009C, and three out of the following: MATH 010A, MATH 010B, MATH 031, MATH 046
- c) PHYS 040A, PHYS 040B, PHYS 040C

2. Upper-division requirements (53-54 units)

- A minimum grade of "C-" for any

upper-division course used to fulfill the requirements for the B.S. degree.

- a) CHEM 110A, CHEM 110B, CHEM 111, CHEM 112A, CHEM 112B, CHEM 112C, CHEM 113, CHEM 125, CHEM 150A, CHEM 191
- b) Two laboratory courses from CHEM 114 or CHEM 140, CHEM 166, BCH 162
- c) One course from BCH 100, BCH 110A, CHEM 143
- d) One 4-unit course from CHEM 135/ENSC 135/ENTX 135, CHEM 136/ENSC 136/ENTX 136/SWSC 136, CHEM 150B, CHEM 197, CHEM 199. CHEM 197 and CHEM 199 must be taken for a grade and a written report submitted.

Chemical Physics Option

Students must consult with their Chemistry advisor before electing this option.

1. Lower-division requirements (67-69 units)

- a) CHEM 001A, CHEM 001B, CHEM 001C, CHEM 01LA, CHEM 01LB, CHEM 01LC (or CHEM 01HA and CHEM 1HLA, CHEM 01HB and CHEM 1HLB, CHEM 01HC and CHEM 1HLC), CHEM 005

- b) MATH 008B or MATH 009A, MATH 009B, MATH 009C, MATH 010A, MATH 010B, MATH 046

- c) PHYS 041A, PHYS 041B, PHYS 41C or PHYS 040A, PHYS 040B, PHYS 040C, and PHYS 041C

2. Upper-division requirements (72 units)

A minimum grade of "C-" for any upper-division course used to fulfill the requirements for the Chemical Physics option.

- a) CHEM 110A, CHEM 110B, CHEM 111, CHEM 112A, CHEM 112B, CHEM 112C, CHEM 113, CHEM 114, CHEM 150A, CHEM 150B, CHEM 191
- b) Twenty-one (21) units of upper-division course work in Mathematics or Physics (110 or above excluding 190 series)
- c) Nine (9) additional units in physical chemistry

Environmental Chemistry Option

Students must consult with their Chemistry advisor before electing this option.

1. Lower-division requirements (72-73 units)

- a) CHEM 001A, CHEM 001B, CHEM 001C, CHEM 01LA, CHEM 01LB, CHEM 01LC (or CHEM 01HA and CHEM 1HLA, CHEM 01HB and CHEM 1HLB, CHEM 01HC and CHEM 1HLC), CHEM 005
- b) MATH 008B or MATH 009A, MATH 009B, MATH 009C, MATH 010A, MATH 010B, MATH 046
- c) PHYS 040A, PHYS 040B, PHYS 040C
- d) BIOL 005A, BIOL 05LA, BIOL 005B, BIOL 005C

2. Upper-division requirements (73-75 units)

A minimum grade of "C-" for any upper-division course used to fulfill the

requirements for the Environmental Chemistry option.

- CHEM 110A, CHEM 110B, CHEM 111, CHEM 112A, CHEM 112B, CHEM 112C, CHEM 113, CHEM 125, CHEM 135/ENSC 135/ENTX 135, CHEM 136/ENSC 136/ENTX 136/SWSC 136, CHEM 114 or CHEM 140, CHEM 150A, CHEM 166, CHEM 191
- One course from ENSC 104/SWSC 104 or GEO 137
- One course from BCH 100, BCH 110A or CHEM 143
- Two additional courses from CHEM 150B, CHEM 197, CHEM 199, ENSC 100, ENSC 101, ENSC 102, ENSC 104/SWSC 104, ENSC 140/SWSC 140, ENSC 142, ENSC 155, ENSC 163, ENTX 101, GEO 132, GEO 137, GEO 157 (4 units total from CHEM 197 and/or CHEM 199)

Undergraduate Research is strongly encouraged for students with the requisite ability. Students wishing to participate in this activity should consult Chemistry faculty, their Chemistry advisor, or check: ugr.ucr.edu.

Sample Program

Student programs are planned on an individual basis with their advisors, and there is considerable flexibility in the sequence in which courses required for the major are taken. For example, PHYS 040A, PHYS 040B, PHYS 040C can be started equally well during either the freshman or sophomore year. The sample program is typical for a well-prepared entering freshman who seeks the B.S. degree.

Freshman Year	Fall	Winter	Spring
CHEM 001A, CHEM 001B, CHEM 001C, CHEM 011A, CHEM 011B, CHEM 011C (or CHEM 011A and CHEM 1HLA, CHEM 011B and CHEM 1HLB, CHEM 011C and CHEM 1HLC)	4,1	4,1	4,1
PHYS 040A, PHYS 040B		5	5
MATH 008B or MATH 009A, MATH 009B, MATH 009C	4	4	4
ENGL 001A, ENGL 001B, ENGL 001C	4	4	4
Elective (optional)	4		
Total Units	17	18	18
Sophomore Year	Fall	Winter	Spring
CHEM 112A, CHEM 112B, CHEM 112C	4	4	4
PHYS 040C	5		
MATH 010A, MATH 010B, MATH 046	4	4	4
CHEM 005		5	
Electives		4	8
Total Units	13	17	16

Junior Year	Fall	Winter	Spring
CHEM 110A, CHEM 110B, CHEM 113	4	4	4
Biological Science w/ Lab			4
CHEM 150A, CHEM 150B	4	4	4
CHEM 125	5		
CHEM 143		3	
CHEM 191			1
Electives	4	4	8
Total Units	17	15	17
Senior Year	Fall	Winter	Spring
CHEM 111, CHEM 140		4	4
CHEM 166			4
Electives	12	8	4
Total Units	12	12	12

Minor

The minor in Chemistry consists of 28 upper-division units in chemistry.

- Of the specified upper-division units, a minimum of 16 units must be unique to the minor and may not be used to satisfy major requirements.
- At least one of the courses used to satisfy the 28 units must be in CHEM 125, CHEM 111, CHEM 140 or CHEM 166 (courses which include laboratory work).
- No more than 4 units of 190-199 courses may be used in fulfilling the upper-division units for a minor.

All of the upper-division courses in chemistry have a prerequisite of CHEM 001A, CHEM 001B, CHEM 001C, CHEM 011A, CHEM 011B, CHEM 011C, or CHEM 011A and CHEM 1HLA, CHEM 011B and CHEM 1HLB, CHEM 011C and CHEM 1HLC and most have CHEM 005 as a prerequisite.

Students with a minor in Chemistry should consult with their Chemistry advisor to construct a specific program consistent with their career goals.

See Minors under the College of Natural and Agricultural Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Graduate Program

The Chemistry Department offers the M.S. and Ph.D. degrees in Chemistry.

Fields of specialization (subdisciplines) are analytical chemistry, inorganic chemistry, organic chemistry, and physical chemistry. Research is also carried out in bioanalytical, bioinorganic, bioorganic, and biophysical chemistry and in chemical physics, environmental/atmospheric, organometallic chemistry, and neuroscience. For additional information on the latter, please see Neuroscience Graduate Program in the Programs and Courses section of this catalog.

Admission All applicants must submit scores from the GRE General Test. A score from the Advanced Chemistry GRE is not required for admission. It is strongly recommended, however, that applicants submit this score in order to receive maximum consideration for fellowships. The department normally considers applications for teaching and research assistantships at the same time as fellowships; therefore, students are strongly encouraged to complete their applications for admission and support as early as possible. Normally applications for fellowships are awarded by February for students entering in the following fall quarter. Although most students begin in the fall quarter, students may begin their studies in the winter or spring quarter.

Orientation Examinations Admitted students must, at the beginning of their first quarter in residence, take orientation examinations. The examinations are normally given during two consecutive days starting up to one week prior to the first day of instruction. Although a notice of the times and places of these examinations is sent to each student admitted to regular graduate status in chemistry, it is the student's responsibility to be on the campus early enough to check the bulletin boards in Chemical Sciences for this information. Students take these examinations in the four subdisciplines: analytical, inorganic, organic, and physical chemistry. The purpose of these examinations is to assess the student's undergraduate preparation. The results permit the faculty to determine the course program that will most effectively aid the students' development in their chosen subdisciplines.

Master's Degree

The Department of Chemistry offers the M.S. degree in Chemistry.

Requirements are:

- Satisfactory performance in orientation examinations in analytical, inorganic, organic, and physical chemistry
- General university requirements and departmental requirements for either Plan I or Plan II.

Plan I (Thesis) Students must take at least 36 units of approved courses and graduate research of which five regular lecture courses in the CHEM 200-249 series (CHEM 110A or CHEM 110B, CHEM 113, CHEM 125, and CHEM 150A or CHEM 150B may apply under certain circumstances). A maximum of 12 units of seminar courses (CHEM 250-259) and a maximum of 12 units of graduate research; (but not those numbered CHEM 260-289) may apply towards the 36 units. Students must complete a thesis, and a final oral examination on the thesis may be required.

Plan II (Comprehensive Examination) Students must complete at least 36 units of approved courses of which at least 18 must be in regular lecture courses numbered CHEM 200-249 (CHEM 110A or CHEM 110B, CHEM 113, CHEM 125, and CHEM 150A or CHEM 150B may apply under certain circumstances) and up to 12 units of graduate seminar courses numbered CHEM 250-259. Those numbered CHEM 260-289 are specifically excluded.

Doctoral Degree

The Department of Chemistry offers the Ph.D. degree in Chemistry.

The requirements are orientation examinations in analytical, inorganic, organic, and physical chemistry; general university requirements; and departmental requirements.

Program of Study The departmental committee on graduate study determines a program of study on the basis of the students' performance on the orientation examinations and a consideration of their subdisciplines. For students with a normal B.S. level preparation, the typical course pattern for each subdiscipline is as follows:

1. Analytical (a minimum of three courses selected from CHEM 221A, CHEM 221B, CHEM 221C, CHEM 221D, CHEM 221E plus two other courses)
2. Inorganic (CHEM 231A, CHEM 231B, CHEM 231C plus two other courses)
3. Organic (CHEM 211A, CHEM 211B, CHEM 211C plus two other courses)
4. Physical (a minimum of three courses selected from CHEM 201A, CHEM 201B, CHEM 201C, CHEM 201D, CHEM 201E plus two other courses)

Second Year Research Evaluation Students seeking advancement to candidacy for the Ph.D. degree must undergo a Second-Year Research Evaluation (SYRE). The SYRE must take place by the end of the student's fourth academic quarter of residency and is administered by a four-member committee of the Chemistry faculty, one of whom is the student's dissertation advisor. The Chair of the SYRE Committee will be someone other than the dissertation advisor. Typically, these same four faculty members would also serve on the oral qualifying examination committee, with the Chair of the SYRE Committee continuing on as Chair of the oral qualifying examination committee.

The SYRE consists of both a written and oral component and the student is assessed on both components. The written SYRE document should provide an introduction to the dissertation research, an outline of the goals and objectives, a description of the progress to date, and a delineation of the path forward. The SYRE document is limited to five single-spaced pages (12-point type), excluding references. The oral component of the SYRE will be a presentation of the written document. After presentation of the SYRE document, the student will be queried by committee to assess the student's general knowledge of the material. A student will receive a single grade of Pass, Qualified Pass, or Fail. A Pass signifies that the student has made satisfactory progress in research and is on track to pass the oral qualifying examination. A Qualified Pass signifies that a student's progress in research is reasonable, but that improvement is needed, and should be demonstrated at the time of the oral qualifying examination. A Fail signifies that a student has to date, not made satisfactory progress in research. A student who fails the SYRE would not be required to undergo a

second evaluation; however, such students would be placed on notice that they are not on track to pass the oral qualifying examination unless major steps are taken to correct serious deficiencies in research performance.

Foreign Language Requirement A reading knowledge of German, French, or Russian is recommended but not required.

Oral Qualifying Examination This examination consists in part of defending an original proposition and is designed to test the extent of the candidates' development and their breadth of knowledge in chemistry and related fields.

Teaching Requirement Normally requires three quarters of service as a teaching assistant, or equivalent.

Normative Time to Degree 15 quarters

Lower-Division Courses

CHEM 001A General Chemistry (4) F, W, Summer Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): a score of 3, 4, or 5 on the College Board Advanced Placement Chemistry Examination or a passing score on the California Chemistry Diagnostic Test or a grade of "C-" or better in MATH 005 or concurrent enrollment in MATH 008B or a grade of "C-" or better in MATH 008B or a grade of "C-" or better in an equivalent college-level mathematics or chemistry course; concurrent enrollment in CHEM 011A or a grade of "C-" or better in CHEM 011A. An introduction to the basic principles of chemistry. Credit is awarded for only one of CHEM 001A or CHEM 011A.

CHEM 001B General Chemistry (4) W, S, Summer Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): grades of "C-" or better in CHEM 001A and CHEM 011A or grades of "C-" or better in CHEM 011A and CHEM 1HLA; concurrent enrollment in CHEM 011B or a grade of "C-" or better in CHEM 011B. An introduction to the basic principles of chemistry. Credit is awarded for only one of CHEM 001B or CHEM 011B.

CHEM 001C General Chemistry (4) F, S, Summer Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): grades of "C-" or better in CHEM 001B and CHEM 011B or grades of "C-" or better in CHEM 011B and CHEM 1HLB; concurrent enrollment in CHEM 011C or a grade of "C-" or better in CHEM 011C. An introduction to the basic principles of chemistry. Credit is awarded for only one of CHEM 001C or CHEM 011C.

CHEM 001W Preparation for General Chemistry (3) F Lecture, 2 hours; workshop, 3 hours. Prerequisite(s): completion of or concurrent enrollment in MATH 005 or MATH 008A. For students who are not prepared or qualified for admission to CHEM 001A. Instruction and practice in concept manipulation and problem solving to prepare students to master material in CHEM 001A. Concurrent enrollment in CHEM 001A is not allowed. Not open to students who have completed CHEM 001A with a grade of "C-" or better. Counts toward the 180-unit graduation requirement for the baccalaureate degree but does not satisfy any major or college breadth requirements. Graded Satisfactory (S) or No Credit (NC).

CHEM 003 Concepts of Chemistry (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. A survey of basic concepts of Chemistry. Designed for non-science majors and not as preparation for CHEM 001A or CHEM 011A. Not open to students with credit for CHEM 001A or CHEM 011A, but students who have completed CHEM 003 may take CHEM 001A or CHEM 011A for full credit.

CHEM 005 Quantitative Analysis (5) F Lecture, 3 hours; laboratory, 8 hours. Prerequisite(s): CHEM 001C and CHEM 011C with grades of "C-" or better or CHEM 011C and CHEM 1HLC with grades of "C-" or

better. Stoichiometric calculations and applications of principles of chemical equilibrium to analytical problems. Includes titrimetric and gravimetric laboratory procedures.

CHEM 011A Honors General Chemistry (4) F Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): completion of or concurrent enrollment in MATH 009A or MATH 09HA or equivalent or Advanced Placement (AP) chemistry credit or AP calculus credit or AP physics credit; a score of 640 or higher on the mathematics portion of the SAT Reasoning Test or a score of 28 or higher on the ACT Mathematics Test; high school chemistry; or consent of instructor; concurrent enrollment in CHEM 1HLA or a grade of "B" or better in CHEM 1HLA. Honors course corresponding to CHEM 001A. A limited enrollment course in which the principles of chemistry are covered in more depth than in CHEM 001A. Credit is awarded for only one of CHEM 001A or CHEM 011A.

CHEM 011B Honors General Chemistry (4) W Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): grades of "B" or better in CHEM 001A and CHEM 011A or grades of "B" or better in CHEM 011A and CHEM 1HLA or consent of instructor; concurrent enrollment in CHEM 1HLB or a grade of "B" or better in CHEM 1HLB. Honors course corresponding to CHEM 001B. A limited enrollment course in which the principles of chemistry are covered in more depth than in CHEM 001B. Credit is awarded for only one of CHEM 001B or CHEM 011B.

CHEM 011C Honors General Chemistry (4) S Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): grades of "B" or better in CHEM 001B and CHEM 011B or grades of "B" or better in CHEM 011B and CHEM 1HLB or consent of instructor; concurrent enrollment in CHEM 1HLC or a grade of "B" or better in CHEM 1HLC. Honors course corresponding to CHEM 001C. A limited enrollment course in which the principles of chemistry are covered in more depth than in CHEM 001C. Credit is awarded for only one of CHEM 001C or CHEM 011C.

CHEM 011A General Chemistry Laboratory (1) F, W, Summer Laboratory, 3 hours. Prerequisite(s): concurrent enrollment in CHEM 001A or a grade of "C-" or better in CHEM 001A. An introduction to laboratory principles and techniques related to lecture topics in CHEM 001A. Credit is awarded for only one of CHEM 011A or CHEM 1HLA.

CHEM 011B General Chemistry Laboratory (1) W, S, Summer Laboratory, 3 hours. Prerequisite(s): grades of "C-" or better in CHEM 001A and CHEM 011A or grades of "C-" or better in CHEM 011A and CHEM 1HLA; concurrent enrollment in CHEM 001B or a grade of "C-" or better in CHEM 001B. An introduction to laboratory principles and techniques related to lecture topics in CHEM 001B. Credit is awarded for only one of CHEM 011B or CHEM 1HLB.

CHEM 011C General Chemistry Laboratory (1) F, S, Summer Laboratory, 3 hours. Prerequisite(s): grades of "C-" or better in CHEM 001B and CHEM 011B or grades of "C-" or better in CHEM 011B and CHEM 1HLB; concurrent enrollment in CHEM 001C or a grade of "C-" or better in CHEM 001C. An introduction to laboratory principles and techniques related to lecture topics in CHEM 001C. Credit is awarded for only one of CHEM 011C or CHEM 1HLC.

CHEM 1HLA Honors General Chemistry Laboratory (1) F, W, Summer Laboratory, 3 hours. Prerequisite(s): concurrent enrollment in CHEM 011A or a grade of "B" or better in CHEM 011A. Honors course corresponding to CHEM 011A. An introduction to laboratory principles and techniques related to lecture topics in CHEM 011A. Credit is awarded for only one of CHEM 011A or CHEM 1HLA.

CHEM 1HLB Honors General Chemistry Laboratory (1) W, S, Summer Laboratory, 3 hours. Prerequisite(s): grades of "B" or better in CHEM 001A and CHEM

O1LA or grades of "B" or better in CHEM O1HA and CHEM 1HLA; concurrent enrollment in CHEM O1HB or a grade of "B" or better in CHEM O1HB. Honors course corresponding to CHEM O1LB. An introduction to laboratory principles and techniques related to lecture topics in CHEM O1HB. Credit is awarded for only one of CHEM O1LB or CHEM 1HLB.

CHEM 1HLC Honors General Chemistry Laboratory (1) F, S, Summer Laboratory, 3 hours. Prerequisite(s): grades of "B" or better in CHEM O01B and CHEM O1LB or grades of "B" or better in CHEM O1HB and CHEM 1HLB; concurrent enrollment in CHEM O1HC or a grade of "B" or better in CHEM O1HC. Honors course corresponding to CHEM O1LC. An introduction to laboratory principles and techniques related to lecture topics in CHEM O1HC. Credit is awarded for only one of CHEM O1LC or CHEM 1HLC.

CHEM 091 Freshman Seminar: What Chemists Do (1) Seminar, 1 hour. Explores the frontiers of chemistry (analytical, inorganic, organic, and physical) as well as the role of chemistry in allied areas such as agriculture, biology, environmental science, forensics, materials, medicine, and neuroscience. Graded Satisfactory (S) or No Credit (NC).

CHEM 092 Introduction to Undergraduate Research in Chemistry (1) S Seminar, 1 hour. Prerequisite(s): CHEM 001C or CHEM O1HC (may be taken concurrently); lower-division standing. Introduction to the elements of chemistry research (e.g., laboratory safety, literature searches, scientific writing, research ethics, oral or poster presentation preparation). Explores specific research opportunities within the Chemistry Department. Intended to assist Chemistry majors interested in pursuing undergraduate research opportunities in Chemistry. Graded Satisfactory (S) or No Credit (NC).

CHEM 095 Explorations in Molecular Science (1) W, S Laboratory, 3 hours. Prerequisite(s): freshman standing; CHEM 001A or CHEM O1HA with a grade of "C-" or better; concurrent enrollment in or completion of CHEM 001B or CHEM O1HB; NASC 093; or consent of instructor. Laboratory experiments and computer modeling in areas of chemistry (analytical, inorganic, organic, and physical) relevant to allied fields such as environmental science, astrophysics, chemical biology, or materials sciences. Course is repeatable as topics change to a maximum of 2 units.

CHEM 097H Freshman Honors Project: Introduction to Research (1-4) Outside research, 3-12 hours. Prerequisite(s): admission to the University Honors Program. Prior arrangement with a chemistry faculty member is required. An introduction to the methods of research in chemical sciences. The student conducts an investigation under the supervision of a faculty member. A written report is required at the end of the quarter. To satisfy the requirement for the University Honors Program Freshman Project, the student must earn a minimum of 4 units during the first year. Satisfactory (S) or No Credit (NC) grading is not available. Course is repeatable.

Upper-Division Courses

CHEM 109 Survey of Physical Chemistry (4) F Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 001C and CHEM O1LC with grades of "C-" or better or CHEM O1HC and CHEM 1HLC with grades of "C-" or better; MATH 009B with a grade of "C-" or better or MATH 09HB with a grade of "C-" or better. Introduces thermodynamics, chemical equilibrium, kinetics, quantum chemistry, atomic and molecular structure, and spectroscopy. Primarily for students with major interests in life and agricultural sciences; not recommended for Chemistry majors. Credit is not awarded for CHEM 109 if it has already been awarded for CHEM 110A or CHEM 110B.

CHEM 110A Physical Chemistry: Chemical Thermodynamics (4) F Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 001C and CHEM O1LC with

grades of "C-" or better or CHEM O1HC and CHEM 1HLC with grades of "C-" or better; MATH 010A with a grade of "C-" or better (or if MATH 010A is taken concurrently, MATH 009C with a grade of "C-" or better or MATH 09HC with a grade of "C-" or better); PHYS 002C with a grade of "C-" or better or PHYS 040C with a grade of "C-" or better (PHYS 040C may be taken concurrently); or consent of instructor. An introduction to thermodynamics, with applications to chemical systems.

CHEM 110B Physical Chemistry: Introduction to Statistical Mechanics and Kinetics (4) W Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 110A with a grade of "C-" or better or consent of instructor; prior or concurrent enrollment in MATH 010B is recommended. Statistical mechanics, kinetic molecular theory, and chemical kinetics with applications to chemical systems.

CHEM 111 Physical Chemistry Laboratory (4) W Lecture, 2 hours; laboratory, 8 hours. Prerequisite(s): CHEM 110A and CHEM 110B with grades of "C-" or better (CHEM 110B may be taken concurrently), or consent of instructor. CHEM 113 recommended. Physical chemical measurements and laboratory experiments illustrating fundamental principles of physical chemistry. Modern electronic and optical measurement techniques.

CHEM 112A Organic Chemistry (4) F, W, Summer Lecture, 3 hours; laboratory, 4 hours. Prerequisite(s): CHEM 001C and CHEM O1LC with grades of "C-" or better or CHEM O1HC and CHEM 1HLC with grades of "C-" or better. Covers modern organic chemistry including structure, nomenclature, reactivity, synthesis, and reaction mechanisms and the chemistry of carbohydrates, lipids, nucleic acids, amino acids, and proteins. Also includes laboratory techniques of purification, isolation, synthesis, reactions, and spectroscopic analysis.

CHEM 112B Organic Chemistry (4) W, S, Summer Lecture, 3 hours; laboratory, 4 hours. Prerequisite(s): CHEM 112A with a grade of "C-" or better. Covers modern organic chemistry including structure, nomenclature, reactivity, synthesis, and reaction mechanisms and the chemistry of carbohydrates, lipids, nucleic acids, amino acids, and proteins. Also includes laboratory techniques of purification, isolation, synthesis, reactions, and spectroscopic analysis.

CHEM 112C Organic Chemistry (4) F, S, Summer Lecture, 3 hours; laboratory, 4 hours. Prerequisite(s): CHEM 112B with a grade of "C-" or better. Covers modern organic chemistry including structure, nomenclature, reactivity, synthesis, and reaction mechanisms and the chemistry of carbohydrates, lipids, nucleic acids, amino acids, and proteins. Also includes laboratory techniques of purification, isolation, synthesis, reactions, and spectroscopic analysis.

CHEM 113 Physical Chemistry: Introduction to Quantum Chemistry (4) S Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 001C and CHEM O1LC with grades of "C-" or better or CHEM O1HC and CHEM 1HLC with grades of "C-" or better; MATH 009C with a grade of "C-" or better or MATH 09HC with a grade of "C-" or better. MATH 046 is recommended. Introduction to quantum mechanics with application to atomic and molecular structure and spectra.

CHEM 114 Advanced Physical Chemistry Laboratory (4) Lecture, 2 hours; laboratory, 8 hours. Prerequisite(s): CHEM 111 with a grade of "C-" or better or consent of instructor; completion of or concurrent enrollment in CHEM 113. Involves measurements and laboratory experiments illustrating applications of physical chemistry methods to problems in environmental, materials, and biological chemistry. Covers modern data acquisition, analysis, and computational techniques.

CHEM 122H Honors Discussion for Organic Chemistry (1) F Discussion, 1 hour. Prerequisite(s): concurrent enrollment in CHEM 112A; admission to the Univer-

sity Honors Program or consent of instructor. Involves advanced, in-depth discussions of current literature relevant to the content of CHEM 112A. Students work in small teams to solve advanced problem sets. Satisfactory (S) or No Credit (NC) grading is not available.

CHEM 123H Honors Discussion for Organic Chemistry (1) W Discussion, 1 hour. Prerequisite(s): concurrent enrollment in CHEM 112B; admission to the University Honors Program or consent of instructor. Involves advanced, in-depth discussions of current literature relevant to the content of CHEM 112B. Students work in small teams to solve advanced problem sets. Satisfactory (S) or No Credit (NC) grading is not available.

CHEM 124 Discussion for Organic Chemistry (1) S Discussion, 1 hour. Prerequisite(s): concurrent enrollment in CHEM 112C. Involves in-depth discussions of problems relevant to the content of CHEM 112C. Graded Satisfactory (S) or No Credit (NC). Credit is awarded for only one of CHEM 124 or CHEM 124H.

CHEM 124H Honors Discussion for Organic Chemistry (1) S Discussion, 1 hour. Prerequisite(s): concurrent enrollment in CHEM 112C; admission to the University Honors Program or consent of instructor. Honors course corresponding to CHEM 124. Involves advanced, in-depth discussions of current literature relevant to the content of CHEM 112C. Students work in small teams to solve advanced problem sets. Satisfactory (S) or No Credit (NC) grading is not available. Credit is awarded for only one of CHEM 124 or CHEM 124H.

CHEM 125 Instrumental Methods (3 or 5) W Lecture, 3 hours; laboratory, 8 hours. Prerequisite(s): CHEM 005 with a grade of "C-" or better; PHYS 002C or PHYS 040C (PHYS 002C or PHYS 040C may be taken concurrently); or equivalents; or consent of instructor. Presents chromatographic separations, electrochemistry, and principles of spectroscopic techniques as an introduction to instrumental methods and their use in chemistry. Graduate students may register for either lecture only (3 units) or for lecture and laboratory (5 units).

CHEM 135 Chemistry of the Clean and Polluted Atmosphere (4) W Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 112A, CHEM 112B, or consent of instructor; ENSC 102 recommended. Structure of the troposphere and stratosphere; formation of atmospheric ozone; tropospheric NO_x chemistry; methane oxidation cycle; phase distributions of chemicals; wet and dry deposition; chemistry of volatile organic compounds; formation of photochemical air pollution; modeling of air pollution and control strategies; stratospheric ozone depletion and global warming. Cross-listed with ENSC 135 and ENTX 135.

CHEM 136 Chemistry of Natural Waters (4) S Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 005 with a grade of "C-" or better or ENSC 101 with a grade of "C-" or better or consent of instructor. Introduction to processes controlling the chemical composition of natural waters. Topics include chemical equilibria, acid-base and coordination chemistry, oxidation-reduction reactions, precipitation-dissolution, air-water exchange, and use of equilibrium and kinetic models for describing marine nutrient, trace metal, and sediment chemistry. Cross-listed with ENSC 136.

CHEM 140 Environmental Chemistry Laboratory (4) S Lecture, 2 hours; laboratory, 8 hours. Prerequisite(s): CHEM 125 with a grade of "C-" or better; CHEM 110A (or CHEM 109) with a grade of "C-" or better; or consent of instructor. Theory and application of chemical techniques for the analysis of environmentally relevant chemical processes. Discusses gas phase, condensed phase, surface, and particulate chemistry. Topics include "acid rain," photochemical smog, ozone depletion, and chemical analysis monitoring.

CHEM 143 Bioorganic Chemistry (3) S Lecture, 3 hours. Prerequisite(s): BCH 184 or CHEM 109 or

CHEM 110B; CHEM 112C. Discusses biochemical reactions from a chemical standpoint. Includes reactions associated with bioenergetics, biosynthesis, and enzyme catalysis. Emphasizes reaction mechanisms.

CHEM 150A Inorganic Chemistry (4) W Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 112A, CHEM 112B, CHEM 112C all with grades of "C-" or better; CHEM 110A (or CHEM 109) with a grade of "C-" or better. A systematic introduction to the synthesis, reactions, structure, and bonding of important classes of inorganic compounds. Emphasis on non-transition metal chemistry.

CHEM 150B Inorganic Chemistry (4) S Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CHEM 150A with a grade of "C-" or better. A systematic introduction to synthesis, reactions, structure, and bonding of important classes of inorganic compounds. Emphasis on transition metal chemistry.

CHEM 166 Advanced Structural and Synthetic Methods (2 or 4) S Lecture, 2 hours; laboratory, 8 hours. Prerequisite(s): CHEM 005 with a grade of "C-" or better or BCH 162 with a grade of "C-" or better; CHEM 112C with a grade of "C-" or better; consent of instructor is required for students enrolling only in the lecture (2 units); CHEM 125 and CHEM 150A are recommended. Covers methods for the characterization of organic and inorganic compounds and advanced methods of synthesis of organic and inorganic compounds such as vacuum, inert atmosphere, high-pressure, and photochemical techniques. Involves hands-on use of spectroscopic (nuclear magnetic resonance and optical spectroscopy and mass spectrometry) and computer-based methods for structural characterization. Non-Chemistry majors and graduate students may enroll for the lecture (2 units) or for the lecture and laboratory (4 units).

CHEM 190 Special Studies (1-5) To be taken with the consent of the chair of the department as a means of meeting special curricular problems.

CHEM 191 Seminar in Chemistry Careers (1) S Seminar, 1 hour. Prerequisite(s): upper-division standing. Oral reports and discussions by students, faculty, and visiting speakers. Required of chemistry majors; normally taken in the spring of the junior year. Graded Satisfactory (S) or No Credit (NC).

CHEM 197 Research for Undergraduates (1-4) Outside research, 3-12 hours. Prerequisite(s): sophomore or junior standing; consent of instructor. An introduction to the methods of research in chemistry. Includes a research project completed under the supervision of a Chemistry faculty member. Students who submit a written research report receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable to a maximum of 6 units.

CHEM 198-I Individual Internship (1-12) Internship, 2-24 hours; term paper or preparation for presentation, 1-12 hours. Prerequisite(s): upper-division standing in chemistry; consent of instructor. Industrial work experience coordinated and supervised by a chemistry faculty member and an off-campus sponsor. Requires a term paper or presentation. Course is repeatable to a maximum of 12 units.

CHEM 199 Senior Research (1-4) Outside research, 3-12 hours. Prerequisite(s): senior standing; consent of instructor. Research project completed under the supervision of a Chemistry faculty member. Students who submit a written research report receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Total credit for CHEM 199 and/or CHEM 199H may not exceed 9 units.

CHEM 199H Senior Honors Research (1-5) Outside research, 3-15 hours. Prerequisite(s): senior standing; consent of instructor; a minimum GPA of 3.00 in chemistry courses and in all university course work. Research in chemistry conducted under the supervision of a Chemistry faculty member. Students who submit a written research report receive a letter grade;

other students receive a Satisfactory (S) or No Credit (NC) grade. Total credit for CHEM 199 and/or CHEM 199H may not exceed 9 units.

Graduate Courses

CHEM 201A Advanced Physical Chemistry: Quantum Mechanics (3) Lecture, 3 hours. Prerequisite(s): CHEM 113 with a grade of "C" or better. Covers concepts in quantum mechanics including wavepackets, uncertainty, single particles in multiple dimensions, and approximate methods for solving the Schroedinger equation.

CHEM 201B Advanced Physical Chemistry: Quantum Mechanics and Spectroscopy (3) Lecture, 3 hours. Prerequisite(s): CHEM 113 with a grade of "C" or better. Covers concepts in quantum mechanics with particular applications to spectroscopy.

CHEM 201C Advanced Physical Chemistry: Elementary Statistical Mechanics (3) Lecture, 3 hours. Prerequisite(s): CHEM 110A and CHEM 110B with grades of "C" or better. Covers concepts in elementary statistical mechanics including ensembles, interpretations of thermodynamic functions, and quantum statistics.

CHEM 201D Advanced Physical Chemistry: Thermodynamics (3) Lecture, 3 hours. Prerequisite(s): CHEM 110A and CHEM 110B with grades of "C" or better. Covers concepts in thermodynamics including fundamental equations, potentials, Maxwell relations, and stability criteria. Cross-listed with MSE 205.

CHEM 201E Advanced Physical Chemistry: Kinetics (3) Lecture, 3 hours. Prerequisite(s): CHEM 110A and CHEM 110B with grades of "C" or better. Covers concepts in kinetics including reaction mechanisms and the molecular interpretation of reaction dynamics.

CHEM 202 Advanced Instrument Design (2) Lecture, 1 hour; laboratory, 3 hours. Prerequisite(s): graduate standing in Chemistry or consent of instructor; consent of instructor of CHEM 202 or both concurrent enrollment in and consent of instructor of CHEM 297 or both concurrent enrollment in and consent of instructor of CHEM 299. Focuses on the technical aspects of design and manufacture of instrumentation for physical chemistry and related fields. Introduces design and simulation software and provides hands-on experience in the realization of advanced instrumentation development projects. Students who complete a project and take the final examination receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade.

CHEM 203 Nanoscience and Nanotechnology (3) Lecture, 3 hours. Prerequisite(s): graduate standing in Chemistry, Physics, Engineering, or a related subject or consent of instructor. Provides a condensed, interdisciplinary overview of selected fields of nanoscience and emerging nanotechnological applications. Focuses on applications relevant for the campus research community that are not based on electronic applications of silicon. Cross-listed with MSE 245C.

CHEM 206A Introduction to Computational Quantum Chemistry (3) Lecture, 3 hours. Prerequisite(s): CHEM 113 or equivalent, graduate standing; or consent of instructor. Introduces computational techniques in quantum chemistry. Includes Hartree-Fock theory, Density Functional Theory, and electron correlation methods. Emphasizes practical applications in a research setting. Cross-listed with MSE 225C.

CHEM 206B Modeling Chemical and Biochemical Molecules (3) Lecture, 3 hours. Prerequisite(s): graduate standing in Chemistry or a related field or consent of instructor. Introduces students to the principles, concepts, and techniques for modeling chemical and biological systems. Covers the various methods and techniques for molecular simulations, energy calculations, obtaining initial data, accessing data reliably, visualization and analysis of molecules, and screening and designing chemicals for proteins.

CHEM 207 Chemical Group Theory (3) Lecture, 3 hours. Prerequisite(s): consent of instructor. The principles of group theory and molecular symmetry. Applications in several areas of chemistry.

CHEM 208 Interdisciplinary Overview of Current Issues in Semiconductor Processing (3) Lecture, 3 hours. Prerequisite(s): graduate standing in Chemistry, Physics, Engineering, or a related subject or consent of instructor. An interdisciplinary overview of present-day semiconductor processing. Introduces topics such as properties of semiconductors, cleanroom environment, epitaxy, ion implantation, etching, lithography, device architecture, testing, and fault detection. May offer field trips. Cross-listed with MSE 245D and PHYS 202. Bartels

CHEM 209 (E-Z) Advanced Topics in Physical Chemistry (2-3) lecture, 2 hours (2 units) or 3 hours (3 units). Prerequisite(s): consent of instructor. Additional prerequisites are required for some segments of this course; see department. Selected advanced topics from modern physical chemistry.

CHEM 210 Advanced Organic Reactions (3) Lecture, 3 hours. Prerequisite(s): CHEM 112C. Covers modern organic reactions and reagents and their mechanistic pathways. Emphasizes recent developments. Cross-listed with MSE 245A.

CHEM 211A Structure and Mechanism in Organic Chemistry (3) Lecture, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Covers structure and bonding in organic compounds emphasizing more advanced aspects of the field.

CHEM 211B Advanced Organic Chemistry: Reactions and Mechanism (3) Lecture, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Explores organic and organometallic reaction mechanisms and their application to modern synthesis.

CHEM 211C Advanced Synthetic Analysis (3) Lecture, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Covers synthetic organic chemistry emphasizing strategy, reactions, and techniques.

CHEM 216A Physical Organic Chemistry: Organic Structure Analysis (3) Lecture, 3 hours. Prerequisite(s): CHEM 211A, CHEM 211B, CHEM 211C. Utilizes modern spectroscopic techniques such as IR, mass spectrometry, and ¹H and ¹³C NMR to determine the structure of complex organic molecules. Topics include advanced NMR techniques such as 2D NMR, NMR pulse sequences, diffusion NMR, and MRI. Cross-listed with MSE 225A.

CHEM 216B Physical Organic Chemistry (3) Lecture, 3 hours. Prerequisite(s): CHEM 211A, CHEM 211B, CHEM 211C. An advanced treatment of physical organic chemistry.

CHEM 221A Advanced Analytical Chemistry: Separation Science (3) Lecture, 3 hours. Prerequisite(s): CHEM 125. Provides an overview of modern analytical separations including theory, instrumentation, and applications.

CHEM 221B Advanced Analytical Chemistry: Optical Spectroscopy (3) Lecture, 3 hours. Prerequisite(s): CHEM 125. Provides an overview of modern analytical optical spectroscopic techniques including theory, instrumentation, and applications. Cross-listed with MSE 225B.

CHEM 221C Advanced Analytical Chemistry: Electrochemistry (3) Lecture, 3 hours. Prerequisite(s): CHEM 125. Provides an overview of modern electrochemistry including basic theory, applications, and instrumentation of potentiometry and amperometry.

CHEM 221D Advanced Analytical Chemistry: Mass Spectroscopy (3) Lecture, 3 hours. Prerequisite(s): CHEM 125. Provides an overview of modern mass spectroscopy including basic theory, instrumentation, and applications. Focus is on biological applications.

CHEM 221E Advanced Analytical Chemistry: Introduction to Bioanalytical Chemistry (3) Lecture, 3 hours. Prerequisite(s): CHEM 125. Covers important aspects of modern chemical measurements, with particular emphasis on bioanalysis. Discusses analytical challenges associated with drug discovery and development, including analysis of combinatorial libraries, high-throughput screening, metabolomics, genomics, and proteomics, as well as new developments in analytical methods and instrumentation.

CHEM 223 Nature of the Chemical Bond (3) Lecture, 3 hours. Prerequisite(s): graduate standing in Chemistry or a related field or consent of instructor. Explores all aspects of chemical bonding including molecular orbital theory, valence bond theory, and noncovalent bonding, with coverage of key concepts from all subdivisions of chemistry.

CHEM 229 (E-Z) Advanced Topics in Analytical Chemistry (2 or 3) Lecture, 2-3 hours. Prerequisite(s): consent of instructor. Additional prerequisites may be required for segments of this course; see department. Selected advanced topics from modern analytical chemistry. Course content will vary.

CHEM 231A Structure and Bonding in Inorganic Chemistry (3) Lecture, 3 hours. Prerequisite(s): CHEM 150A, CHEM 150B. Covers advanced synthesis, structure, and bonding in inorganic, coordination, and organometallic chemistry. Cross-listed with MSE 245B.

CHEM 231B Reactivity and Mechanism in Inorganic and Organometallic Chemistry (3) Lecture, 3 hours. Prerequisite(s): CHEM 231A/MSE 245B. Covers advanced synthesis, reactivity, and mechanism in inorganic, coordination, and organometallic chemistry.

CHEM 231C Solid State and Materials in Inorganic Chemistry (3) Lecture, 3 hours. Prerequisite(s): CHEM 231A/MSE 245B. Covers the advanced synthesis, structure, bonding, and properties of inorganic materials.

CHEM 239 (E-Z) Advanced Topics in Inorganic Chemistry (2-3) lecture, 2 hours (2 units) or 3 hours (3 units). Prerequisite(s): graduate standing. Prerequisites are required for some segments of this course; see department. Covers selected advanced topics in modern inorganic chemistry. The contents of the segments vary.

CHEM 242 Combinatorial Chemistry and Chemical Genomics (3) Lecture, 3 hours. Prerequisite(s): BIOL 102, CHEM 112C, or equivalents; a passing grade on the Chemistry Department organic orientation examination. Explores topics in chemical genomics. Part I of the course involves combinatorial principles, library methods, solid-phase and split-pool synthesis, deconvolution, library design and informatics, and parallel synthesis. Part II involves screening and selection systems, forward and reverse chemical genetic approaches, phenocopies and epistasis, preparation and use of molecular arrays, and target identification. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CHEM 245 Chemistry and Physics of Aerosols (3) Lecture, 3 hours. Prerequisite(s): CHEM 109, CHEM 110B; or consent of instructor. Fundamentals of chemical and physical processes controlling behavior and properties of airborne particles. Topics include particle mechanics; electrical, optical, and thermodynamic properties; nucleation; surface and aqueous-phase chemistry; gas particle partitioning; sampling; size and chemical analysis; atmospheric aerosols; and environmental effects. Cross-listed with ENTX 245 and SWSC 245.

CHEM 246 Fate and Transport of Chemicals in the Environment (4) Lecture, 4 hours. Prerequisite(s): CHEM 109 or CHEM 110B; CHEM 112A, CHEM 112B, CHEM 112C; or consent of instructor. Covers the identification of toxicants and their sources in the environment; equilibrium partitioning of chemicals in

the environment (between air, water, soil, sediment, and biota) using physico-chemical properties; and the transport and chemical transformations of chemical compounds in air, water, and soil media. Includes case studies of fate and transport of selected toxic chemicals. Cross-listed with ENSC 200 and ENTX 200.

CHEM 250 Graduate Seminar in Chemistry (1) Seminar, 1.5 hours. Prerequisite(s): graduate standing. Oral reports by graduate students, faculty, and visiting scholars on current research topics in chemistry. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CHEM 251 Graduate Seminar in Analytical Chemistry (2) Seminar, 2 hours. Prerequisite(s): graduate standing or consent of instructor. Includes oral reports and discussion by students, faculty, and visiting scholars from academia and industry on current research topics in analytical chemistry. Offered each quarter. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable to a maximum of 99 units.

CHEM 252 Graduate Seminar in Inorganic Chemistry (2) Seminar, 2 hours. Prerequisite(s): graduate standing or consent of instructor. Includes oral reports and discussion by students, faculty, and visiting scholars from academia and industry on current research topics in inorganic chemistry. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable to a maximum of 99 units.

CHEM 253 Graduate Seminar in Organic Chemistry (2) Seminar, 2 hours. Prerequisite(s): graduate standing or consent of instructor. Includes oral reports and discussion by students, faculty, and visiting scholars from academia and industry on current research topics in organic chemistry. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable to a maximum of 99 units.

CHEM 254 Graduate Seminar in Physical Chemistry (2) Seminar, 2 hours. Prerequisite(s): graduate standing or consent of instructor. Includes oral reports and discussion by students, faculty, and visiting scholars from academia and industry on current research topics in physical chemistry. Offered each quarter. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable to a maximum of 99 units.

CHEM 256 Chemistry of Nanostructured Materials (2) Seminar, 2 hours. Prerequisite(s): graduate standing in Chemistry or consent of instructor. Explores the chemistry of nanostructured materials. Introduces nanotechnology, solid state chemistry and physics of nanomaterials, nanoscale characterization tools, lithography, micro- and nanofabrication, physical and chemical methods to nanomaterials, surface modification, sol-gel chemistry, self assembly at various length scales, and bio-inspired materials. Emphasis is on development of novel functional nanostructured materials through chemical synthesis, surface modification, and self-assembly. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable. **Yin**

CHEM 258 Seminar in Surface Science (1) Seminar, 1 hour. Prerequisite(s): graduate standing in Physics or Chemistry or consent of instructor. Oral presentations by participating visiting scholars, postdoctoral researchers, students, and UCR faculty on current research topics in surface science. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable. Cross-listed with PHYS 258. **Zaera**

CHEM 259 Bioanalytical Chemistry (2) Seminar, 2 hours. Prerequisite(s): graduate standing in Chemistry or consent of instructor. Explores bioanalytical separation and detection techniques. Topics include liquid chromatography, capillary electrophoresis, field flow fractionation, flow cytometry, multidimensional or multiplexed chromatography, microfluidics, mass spectrometry, biological sample preparation, and biosensors. Emphasis is on development of new bioanalytical techniques for detection of pathogens and study of pathogen-host interactions. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable. **Zhong**

CHEM 260 Organic and Organometallic Methodology and Synthesis (2) Seminar, 2 hours. Prerequisite(s): graduate standing in Chemistry or consent of instructor. Introduces key areas of synthetic organic and organometallic chemistry in a mechanism-based approach. Explores current literature with an emphasis on catalytic asymmetric reactions and their application to the synthesis of biologically active compounds. Surveys the background and history of discoveries leading to the development of new catalytic methodology. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable to a maximum of 36 units. **Larsen**

CHEM 261 Scanning Probe Microscopy in Surface Science (2) Seminar, 2 hours. Prerequisite(s): graduate standing; consent of instructor. Focuses on theory and applications of scanning probe microscopy in surface science, including the use of scanning tunneling microscopy to image surfaces on the atomic and molecular length scale, and scanning probe techniques to investigate and control elementary steps of surface reactions. Reviews surface crystallography, electronic, and phononic band structure. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable. **Bartels**

CHEM 262 Ultrafast Dynamics in Condensed Matter (2) Seminar, 2 hours. Prerequisite(s): consent of instructor. The extremely fast relaxation and dephasing of nuclear (vibrational) and electronic excitations in condensed matter are probed by the use of coherent spectroscopy using (sub-picosecond) light pulses. Decay mechanisms are studied by making spectroscopic measurements at cryogenic temperatures (approximately 1K) and at various high pressures (greater than 100 Kbar). Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. May be repeated for credit. **Chronister**

CHEM 263 Analysis and Synthesis at the Chemistry-Biology Interface (2) Seminar, 2 hours. Prerequisite(s): graduate standing in Chemistry or consent of instructor. Introduces key areas of bioanalytical chemistry and chemical biology. Explores current literature with an emphasis on protein engineering, fluorescence imaging, and synthesis of light-active compounds and their applications to the modulation of biological pathways. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable to a maximum of 36 units. **Al**

CHEM 264 Novel Synthesis in Inorganic Chemistry (2) Seminar, 2 hours. Prerequisite(s): graduate standing or consent of instructor. Discusses strategies for the synthesis of novel structures in bioinorganic coordination, organometallic, and materials chemistry. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade based on seminar participation. Course is repeatable. **Reed**

CHEM 265 Raman Spectroscopy of Biological Systems (2) Seminar, 2 hours. Prerequisite(s): graduate standing or consent of instructor. Applications of Raman spectroscopy to the characterization of the structure

and function of biological membranes and membrane proteins. Emphasis will be placed on resonance enhanced Raman scattering, including the theoretical origins of resonance enhancement. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable. **Bocian**

CHEM 266 Molecular Recognition and Catalysis (2) Seminar, 2 hours. Prerequisite(s): graduate standing in Chemistry or consent of instructor. Explores topics in biological and organic chemistry relevant to the study of molecular recognition. Emphasizes the study of non-covalent forces in self-association and the properties of macromolecular constructs. Also involves the study of the synthetic organic and inorganic chemistry used to create these constructs. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable. **Hooley**

CHEM 267 Organic Electronic Materials (2) Seminar, 2 hours. Prerequisite(s): graduate standing or consent of instructor. A study of design, synthesis, purification, manufacture, and application of carbon-based electronic materials. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable. Cross-listed with CEE 254. **Haddon**

CHEM 269 New Trends in Main Group Chemistry (2) Seminar, 2 hours. Prerequisite(s): senior or graduate standing in Chemistry or consent of instructor. Training in modern main group chemistry, covering boron, silicon, phosphorous, and related elements. Organic and inorganic chemists benefit from this course. Introduces students to the peculiar properties of these elements, thus enabling them to use this knowledge in their own field of expertise. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable. **Lavallo**

CHEM 270 Theoretical Quantum Chemistry: Methods and Applications (2) Seminar, 2 hours. Prerequisite(s): graduate standing in Chemistry or consent of instructor. Explores topics in computational quantum chemistry relevant to both wave function and density functional theories. Emphasizes new computational algorithms and physical approximations that can be used to accelerate calculations and the applications of these methods to solve chemical problems. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable. **Beran**

CHEM 271 Design, Synthesis, and Applications of Highly Conjugated Organic Systems (2) Seminar, 2 hours. Prerequisite(s): graduate standing or consent of instructor. Focuses on the design and synthesis of highly conjugated organic molecules and polymers for application in molecule-based devices such as sensors, light emitting diodes, and conductors. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable. **Marsella**

CHEM 272 Gaseous Ion Chemistry (2) Seminar, 2 hours. Prerequisite(s): graduate standing in Chemistry or consent of instructor. Surveys all aspects of ion chemistry in the gas phase. Topics include mass spectrometry, ion mobility, electrospray ionization, matrix-assisted laser desorption ionization, ion-molecule reactions, ion-ion reactions, quantum calculations, instrumentation, and photodissociation spectroscopy. Emphasis is on bioanalytical applications for the study of protein structure, folding, and assembly. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable. **Julian**

CHEM 273 Bioanalytical Nuclear Magnetic Resonance Spectroscopy (2) Seminar, 2 hours. Prerequisite(s):

consent of instructor. Development of Pulse Fourier transform NMR techniques and their application to the characterization of peptides, proteins and intact cells. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. May be repeated for credit. **Rabenstein**

CHEM 274 Chemical Biology (2) Seminar, 2 hours. Prerequisite(s): senior or graduate standing in Chemistry or consent of instructor. Involves formal presentations by graduate students on topics in the current literature and their research. Presentation responsibilities rotate among enrolled students and postdoctoral fellows. Also entails team work on problem sets and oral presentation of solutions. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable. **Pirung**

CHEM 275 Bioorganic Chemistry of Nucleic Acids (2) Seminar, 2 hours. Prerequisite(s): consent of instructor. The design, synthesis, and evaluation of nucleotides with novel hydrogen-bonding capabilities as well as oligonucleotides capable of regulating gene expression. Discussion of ribonucleic acid catalysis, including possible catalytic functions that have not yet been determined. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable. **Switzer**

CHEM 276 The Nanocrystal-ligand Interface (2) Seminar, 1 hour; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Explores the nanocrystal-ligand interface. Topics include a quantitative understanding of the nanocrystal-ligand interface, single molecule spectroscopic methods; the self-assembly of nanoparticles; supramolecular chemistry; synthesis and characterization of organic-inorganic hybrid nanostructures; and nanostructures with novel catalytic and optoelectronic properties. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable to a maximum of 36 units. **Tang**

CHEM 277 Surface Chemistry (2) Seminar, 2 hours. Prerequisite(s): consent of instructor. Discussions for new advances in surface science, concentrating mainly on the use of molecular level. Letter grades will be assigned to students who present a paper; others will be graded Satisfactory (S) or No Credit (NC). May be repeated for credit. **Zaera**

CHEM 278 Nuclear Magnetic Resonance: Theory, Techniques, and Applications (2) Seminar, 2 hours. Prerequisite(s): graduate standing or consent of instructor. Focuses on the development of solid-state and liquid-state nuclear magnetic resonance (NMR) as a probe of molecular structure, function, and dynamics with applications that range from chemistry to physics and biology. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade based on seminar participation. Course is repeatable. **Mueller**

CHEM 279 Molecular Spectroscopy (2) Seminar, 2 hours. Prerequisite(s): consent of instructor. Properties of excited states of molecules. Molecular photo-physics and photochemistry. Theory of radiationless transitions. Kinetics and mechanism of excited state decay. Laser spectroscopy. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. May be repeated for credit. **Scott**

CHEM 280 Chemistry and Biochemistry of Gaseous Molecules (2) Lecture, 1 hour; discussion, 1 hour. Prerequisite(s): consent of instructor. Reactions and properties of organic compounds and ions in the absence of bulk media. Preparative mass spectrometry and ion-molecule reactions. Molecular mechanisms in the sense of smell. Students who present a seminar

or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. May be repeated for credit. **Morton**

CHEM 281 Interface between Heteroatom and Transition Metal Chemistry (2) Seminar, 2 hours. Prerequisite(s): graduate standing in Chemistry or consent of instructor. Discusses heteroatom chemistry as a source of new ligands for transition metal chemistry and applications in catalysis and material science. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable. **Mathey**

CHEM 282 Elementary Processes in Atmospheric Chemistry (2) Seminar, 2 hours. Prerequisite(s): graduate standing or consent of instructor. Applies state-of-the-art laser techniques to investigate elementary processes in atmospheric chemistry. Emphasis is quantitative understandings of atmospheric free-radical intermediates, their photochemistry, and their reaction mechanisms. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable. **Zhang**

CHEM 283 Development of Inorganic Solid State Materials (2) Seminar, 2 hours. Prerequisite(s): graduate standing; consent of instructor. Focuses on the development of advanced materials such as optical, electronic, and porous materials. Topics include synthetic methods, characterization techniques, property measurements, and device applications. Special emphasis is placed on the design of synthetic strategies for the discovery of new functional materials with novel properties. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade based on seminar participation. Course is repeatable. **Feng**

CHEM 284 Biological Mass Spectrometry (2) Seminar, 2 hours. Prerequisite(s): graduate standing or consent of instructor. A study of the synthesis, purification, and mass spectrometric characterization of biomolecules, nucleic acids in particular. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable. **Wang**

CHEM 285 Bio-inspired Materials and Chemical Sensors (2) Seminar, 2 hours. Prerequisite(s): graduate standing or consent of instructor. A study of biomaterials and their application in analytical chemistry. Focus is on the design and synthesis of new materials, electrochemical detection, and the Surface Plasmon Resonance (SPR) technique. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable. **Cheng**

CHEM 286 Time-Resolved Spectroscopy and Microscopy and Dynamics in Complex Systems (2) F, W, S Seminar, 2 hours. Prerequisite(s): senior or graduate standing in Chemistry or consent of instructor. A comprehensive survey of modern time-resolved spectroscopy and microscopy techniques. Emphasizes applications to outstanding problems in materials science and biology. Specific problems include the measurement of energy transport in organic semiconductors and DNA dynamics in biological media. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable. **Bardeen**

CHEM 287 Modeling Molecular Recognition (2) Seminar, 2 hours. Prerequisite(s): graduate standing in Chemistry or consent of instructor. Focuses on molecular recognition and systems-level simulations, addressing theory and applications. Includes statistical mechanics (as applied to the prediction of equilibrium and nonequilibrium properties of chemical and biological systems), drug design and discovery, and cheminformatics. Utilizes numerical analysis, mo-

lecular dynamics and Brownian dynamics simulations, docking and scoring programs, and chemical database tools. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable. **Chang**

CHEM 288 Bioanalytical Applications of Nuclear Magnetic Resonance (NMR) and Mass Spectrometry (MS) (2)

Seminar, 2 hours. Prerequisite(s): consent of instructor. Focuses on the study of ligand-protein interactions, metabolomics, with special emphasis on the application of hyphenated NMR and MS experiments. Also discusses new NMR pulse sequences and microcoil probes. Students who present a seminar or submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable. **Larive**

CHEM 289 Special Topics in Neuroscience (2)

Seminar, 2 hours. Prerequisite(s): graduate standing or consent of instructor. An interdisciplinary seminar consisting of student presentations and discussion of selected topics in neuroscience. Content and instructor(s) vary each time course is offered. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable. Cross-listed with BCH 289, BIOL 289, ENTM 289, NRSC 289, and PSYC 289. **Haddon in charge**

CHEM 297 Directed Research (1-6)

Prerequisite(s): consent of a staff member. Research in analytical, inorganic, organic, or physical chemistry under the direction of a member of the staff. A written report is required of the research study. Graded Satisfactory (S) or No Credit (NC).

CHEM 299 Research for Thesis or Dissertation (1-12)

Prerequisite(s): consent of a staff member. Research in analytical, inorganic, organic, or physical chemistry under the direction of a member of the staff. This research is to be included as part of the dissertation. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Courses

CHEM 301 Oral Presentations in Chemistry (1)

Lecture, 1 hour. The technique of oral presentation, emphasizing the problems that arise in chemistry laboratory and classroom situations. Designed primarily for new graduate students in the Chemistry Department. Graded Satisfactory (S) or No Credit (NC).

CHEM 302 Teaching Practicum (1-2)

lecture/laboratory, 4-8 hours. Prerequisite(s): Limited to Chemistry Department teaching assistants and Associates-In Chemistry. Supervised teaching in undergraduate courses in Chemistry. Graded Satisfactory (S) or No Credit (NC). May be repeated for credit. Units are not applicable to degree unit requirements.

CHEM 401 Professional Development in Chemistry (1)

Lecture, 1 hour. Prerequisite(s): graduate standing in Chemistry. Provides skill development and theory in writing, public speaking, and pedagogy related to chemical science. Designed primarily for new graduate students in the Chemistry Department. Graded Satisfactory (S) or No Credit (NC).

The Chicano Bilingual-Bicultural Studies Minor

College of Humanities, Arts, and Social Sciences

Adalberto Aguirre, Jr., Ph.D., Chair
Office, 1140 Watkins Hall
(951) 827-5507; chicanobbstudies.ucr.edu

Committee in Charge

Philip Gericke (Spanish & Portuguese)
Alfredo Mirande (Ethnic Studies)
Yolanda Venegas, non voting
Stephen E. Cullenberg, Ph.D.
Dean, College of Humanities, Arts, and Social Sciences, ex officio

The Chicano Bilingual-Bicultural Studies minor provides the student with a basic understanding of the Spanish language and of the Mexican American bicultural contexts in which that language is used in the southwestern United States.

1. Lower-division requirements (8 units)

- Four (4) units from ETST 002, ETST 004/HIST 004
- Four (4) units from one of the following:
 - SPN 006
 - Any upper-division course taught in Spanish language

2. Upper-division requirements (16 units)

- One course in the general area of Education and Bilingualism from ETST 146/EDUC 146, ETST 163/SOC 163, ETST 165/SOC 165, ETST 166
- One course from the general area of Societal Perspectives on the Chicano Experience ETST 142
- One course from ETST 123, ETST 124, ETST 126, ETST 128/SOC 128
- One course in Chicano Art or Literature from ETST 108P, ETST 114, ETST 153/LNST 153, ETST 191N

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Comparative Literature and Foreign Languages

College of Humanities, Arts, and Social Sciences

Thomas F. Scanlon, Ph.D., Chair
Department Office, 2402 Humanities and Social Sciences
(951) 827-1462; compliforlang.ucr.edu

Professors

Eugene Perry Link, Ph.D., Chancellorial Chair for Innovative Teaching, *Chinese Literature, Language and Culture*
Hendrik M.J. Maier, Ph.D. *Literature of Southeast Asia and Indonesia/Comparative Literature*
Lisa A. Raphals, Ph.D. *Chinese/Comparative Literature*
Thomas F. Scanlon, Ph.D. *Classics/Comparative Ancient Civilizations/Comparative Literature*
Marguerite Waller, Ph.D. *Italian/Comparative Literature* (Gender and Sexuality Studies/*Comparative Literature and Foreign Languages*)
Yenna Wu, Ph.D. *Chinese/Civilizations/Comparative Literature*

Professors Emeriti

Sam J. Borg, Ph.D. *French*
David K. Danow, Ph.D. *Russian/Comparative Literature*

Donald G. Daviau, Ph.D. *Germanic Studies*
Henry W. Decker, Ph.D. *French*
Robert B. Griffin, Ph.D. *Comparative Literature/French*
Georg M. Gugelberger, Ph.D. *Comparative Literature*
Stephanie B. Hammer, Ph.D. *Germanic Studies/Comparative Literature*
Jules F. Levin, Ph.D. *Linguistics/Russian*
Eliud Martinez, Ph.D. *Comparative Literature* (Comparative Literature and Foreign Languages Creative Writing)
Josef Purkart, Ph.D. *Germanic Studies*
Lubomir Radoyce, M.A. *Russian/Comparative Literature*
Theda Shapiro, Ph.D. *French/Comparative Literature*
George E. Slusser, Ph.D., *Comparative Literature*
Ben F. Stoltzfus, Ph.D., Litt.D. *Comparative Literature/French* (Comparative Literature and Foreign Languages/Creative Writing)

Associate Professors

Michelle E. Bloom, Ph.D. *Comparative Literature/French*
Heidi Brevik-Zender, Ph.D. *French/Comparative Literature*
Kelly Jeong, Ph.D. *Korean Literature and Culture/Comparative Literature*
John N. Kim, Ph.D. *German/Japanese/Comparative Literature*
Mariam Beevi Lam, Ph.D. *Comparative Literature/Vietnamese*
Margherita Long, Ph.D. *Japanese/Comparative Literature*
Jeffrey Sacks, Ph.D. *Arabic Literature/Comparative Literature*
Yang Ye, Ph.D. *Chinese/Comparative Literature*

Assistant Professor

Annmaria Shimabuku, Ph.D. *Japanese Literature and Culture/Comparative Literature*
**

Lecturers

Han-hua Chao, Ph.D. *Chinese*
Jingsong Chen, Ph.D. *Chinese*
Christine Duvergé, Ph.D. *French*
Young Hong, Ph.D. *Korean*
Shuliang Hsu, M.A. *Chinese*
Benjamin King, Ph.D. *Classics*
Nicoletta Tinozzi Mehrmand, Ph.D. *Italian*
Kim Dzung Pham, M.A. *Vietnamese*

Jennifer Ramos, M.A. *French*
Wendy J. Raschke, Ph.D. *Classics/Comparative Literature/Comparative Ancient Civilizations*
Kyoko Sagawa, M.A. *Japanese*
Reiko Sato, M.A. *Japanese*
Cheryl Tarantino, M.A. *Italian/French*
Sabine Thuerwaechter, Ph.D. *German/Comparative Literature*
Kelle Truby, Ph.D. *French*
Heidi Waltz, Ph.D. *Linguistics/Germanic Studies*
Ekaterina Yudina, Ph.D. *Russian*

Majors

The Department of Comparative Literature and Foreign Languages offers courses and degree programs in Western and non-Western national literatures, languages, and civilizations. It also has programs in Comparative Literature, Comparative Ancient Civilizations, and Linguistics. The department believes in the importance of offering fundamental training in the humanities in their own literary and linguistic contexts as well as in their cultural and interdisciplinary dimensions. Accordingly, students may obtain degrees or take courses in a specialized field, while at the same time enhancing the breadth of their education within and outside of the department.

The department offers the following majors leading to the B.A. degree.

Chinese and Japanese

The B.A. degrees in Languages and Literatures/Chinese and Languages and Literatures/Japanese offer a diverse, flexible program for students interested in the study of Asian languages, cultures, and literatures.

Classical Studies

The B.A. in Languages and Literatures/Classical Studies combines the study of Greek and/or Latin language and literature with courses which explore the historical, philosophical, political, and cultural developments of Greece and Rome and their impact on Western civilization. The department is a joint member of the UC Tri-Campus Graduate Program in Classics (UCI, UCR, UCSD), which offers M.A. and Ph.D. degrees in Classics.

Comparative Ancient Civilizations

For the B.A. in Languages and Literatures/Comparative Ancient Civilizations, students employ the methods of humanities and social sciences in the comparison study of several major cultures of the past. They acquire skills of historical and social analysis, multicultural awareness, and insight into constructions of civilizations in general.

Comparative Literature

The department offers the B.A. degree in Languages and Literatures/Comparative Literature and the M.A. and Ph.D. graduate degrees in Comparative Literature.

While students majoring in Languages and Literatures/Comparative Literature must have a knowledge of the languages involved in the literatures of their choice, Comparative Literature courses themselves are open to all students. All work is done in translation and the courses are given in English.

French, Germanic Studies, and Russian Studies

The B.A. degree is offered in Languages and Literatures/French, Languages and Literatures/Germanic Studies, and Languages and Literatures/Russian Studies. Requirements for degrees include proficiency in the language of the literature.

Languages

The Languages and Literatures/Languages major allows a student to specialize in two foreign languages through a knowledge not only of the languages themselves but also of the bases of language (linguistics), examples of their creative use (literature), and the cultures which they reflect (civilization).

Linguistics

A B.A. in Linguistics is available through a program administered by an interdepartmental committee. Some foreign language study is essential for specialization in this discipline, as well as the pursuit of research projects and other kinds of practical work in linguistic-related areas.

Graduate Degrees

Comparative Literature (interliterary) M.A.

Comparative Literature (interliterary or interdisciplinary) Ph.D.

UC Tri-Campus Graduate Program in Classics M.A. and Ph.D.

Teaching Assistantships and Fellowships

Teaching assistantships and fellowships are available. Teaching assistants are normally held for CPLT 301 (Teaching of Foreign Language at the College Level). Course work and/or teaching experience at another college-level institution may be accepted in fulfillment of this requirement.

Education Abroad Program

The EAP is an excellent opportunity to travel and learn more about another country and its culture while taking courses to earn units toward graduation. Students should plan study abroad well in advance to ensure that the courses taken fit with their overall program at UCR. Consult the departmental student affairs officer for assistance. For further details, visit UCR's Off Campus Academic Experiences at eapop.ucr.edu or call (951) 827-2508.

See Education Abroad Program in the Educational Opportunities section of this catalog. A list of participating countries is found under Education Abroad Program in the Programs and Courses section. Search for programs by specific areas at eap.ucop.edu/ourprograms.

 Jeffrey Sacks, Ph.D. *Arabic Literature/Comparative Literature*
 Marguerite Waller, Ph.D. *Italian/Gender and Sexuality Studies*
 Yenna Wu, Ph.D. *Chinese/Civilizations/Comparative Literature*
 Yang Ye, Ph.D., *Chinese/Comparative Literature*
 Stephen E. Cullenberg, Ph.D.
Dean, College of Humanities, Arts, and Social Sciences, ex officio

The department offers the B.A. in Comparative Literature. Comparative Literature is an interdisciplinary field which is studied internationally. At UCR, the Comparative Literature curriculum is organized around a core staff of comparatists assisted by qualified faculty from other departments and programs. The discipline of Comparative Literature encourages study of interliterary relationships among various cultural traditions; on the graduate level, it seeks to promote the study of interdisciplinary relationships. Comparative Literature courses, undergraduate or graduate,

require that the majors read whenever possible in the languages (two for undergraduates, one of which may be English, and three for graduates) they present. Nonmajors may do all the readings in English translations. Comparative Literature majors may also work with translations.

Comparative Literature and World Literature courses are open to all students.

Languages and Literatures/ Comparative Literature

1. Lower-division requirements (20 units plus proficiency)

- a) Proficiency in at least one language (besides English), ancient or modern, through the intermediate level (second year)
- b) CPLT 001 or CPLT 001W, CPLT 002
- c) CPLT 017A, CPLT 017B, CPLT 017C

2. Upper-division requirements (52 units)

- a) Sixteen (16) units in one literature, distributed as much as possible among courses representing the various literary periods
- b) Twelve (12) units in a second literature
- c) CPLT 110, CPLT 193, (CPLT 196 strongly recommended but not required)
- d) Sixteen (16) elective units in Comparative Literature

Students contemplating graduate study in Comparative Literature are urged to complete two years in a second (non-English) language before graduation.

Graduate Programs

The Department of Comparative Literature and Foreign Languages grants graduate degrees based on the comparative studies of world literatures and cultures. The Ph.D. degree has three tracks: Interliterary Studies, Interdisciplinary Studies, and Science Fiction, Science, and Literature described below. The department faculty, well balanced between Asianists and Europeanists, share a strong commitment to the study of literature through comparative and interdisciplinary approaches. We have particular strengths in comparative Asian and European studies; comparative ancient studies; gender and feminist studies; global cultures and post-colonialism; film and visual culture studies; narrative and cultural translation; and science and science fiction.

Students are admitted into the Ph.D. program only. Entering students who do not already hold a master's degree in Comparative Literature, in literature, or in comparable fields from another institution must complete M.A. requirements while pursuing the Ph.D.

Admission All applicants must supply GRE General Test (verbal, quantitative, analytical) scores.

S/NC Courses No S/NC-graded courses may be applied toward the minimum unit requirement for the graduate degree(s).

Note Courses in the student's special literature areas used to fulfill either the M.A. or Ph.D. literature requirements may be either graduate courses, or undergraduate courses together with a concurrent 292 course.

Language Requirement Students must have attained at least advanced language competency in their non-English areas of literary specialization. Competency is demonstrated by one of the following for each language required for a student's particular literary specializations:

1. **Course Work** A translation seminar with additional work in a specific national language/literature as required by the instructor.
2. **Translation Examination** A translation exercise from the foreign language into English with use of only a dictionary administered on campus and about two hours long. Period and genre should be discussed in advance with the examiner. The choice of examiner is approved by the graduate advisor.

Master's Degree

The Department of Comparative Literature and Foreign Languages requires the following for the M.A. degree in Comparative Literature.

All students must complete a minimum of 36 units of course work. Candidates must work in three of the following literatures, or two literatures for students in the interdisciplinary track: Chinese, English (either British or American), French, German, Classical Greek, Italian, Indonesian, Japanese, Latin, Filipino, Portuguese, Russian, Spanish, and Vietnamese.

Requirements are as follows:

1. Two courses in canonical literature (CPLT 210)
2. Two courses in methods and theory (CPLT 214 and CPLT 215A)
3. One course from CPLT 212, CPLT 222, or CPLT 301
4. Two graduate courses in each of three literatures or in each of two literatures and one interdisciplinary area
5. Three elective courses in Comparative Literature

Note Students must take at least one graduate course in each of the following four areas: European, Asian, Ancient, and Modern Literature.

After completing the course requirements, the student has two options:

- a) Submit a portfolio of three essays, each one representing one of their three literary or interdisciplinary areas, and write a 750-1000 word commentary explaining the aims and achievements of the essays in relation to one another.
- b) Write a comprehensive research paper (40-50 pages) that incorporates their three interliterary or interdisciplinary areas; this paper may develop topics of previous papers, or explore a new topic area.

The student then undergoes oral examination on the portfolio or the research paper. Following the examination, the graduate committee, after evaluation of the student's entire graduate record, determines the candidate's suitability for continuing in the Ph.D. program.

Doctoral Degree

The Department of Comparative Literature and Foreign Languages offers the Ph.D. degree in Comparative Literature with three tracks: Interliterary Studies, Interdisciplinary Studies, and Science Fiction, Science, and Literature. Areas of particular strength in the Interdisciplinary Studies are comparative Asian and European studies; comparative ancient civilizations; gender and feminist studies; global cultures and post-colonialism; film and visual culture studies; narrative and cultural translation; and science and science fiction.

Interliterary Studies This program is designed for students wishing to concentrate in Comparative Literature as an interliterary discipline. Students examine the relation among various national literatures. They are expected to work in three of the following literatures: Chinese, English (either British or American), French, German, Classical Greek, Italian, Indonesian, Japanese, Latin, Portuguese, Russian, Spanish, and Vietnamese. Permission is granted in exceptional cases to work in other literatures related to the Germanic, Romance, or Slavic families, in Hebrew or Arabic literature, in other Asian Literatures, and the literatures of Africa.

Students must obtain comprehensive knowledge of their first literature (the major specialty), in its language, literary history, and critical scholarship. In their two other literatures, they specialize in a genre, a period, critical school or theoretical approach, always in combination with their main literature. Work in the three literatures must be done in the languages of these literatures.

Students entering the interliterary Ph.D. program with an M.A. in literature must take two courses from the canons (CPLT 210), CPLT 214, and CPLT 215A (or demonstrate having taken similar courses).. Course requirements are two graduate courses in a first literature, two graduate courses in a second literature, two graduate courses in a third literature, and three additional elective graduate courses in Comparative Literature.

Note Students must take at least one graduate course in each of the following four areas: European, Asian, Ancient, and Modern Literature.

Students entering the interliterary Ph.D. program with an M.A. in another discipline must do course work equivalent to the M.A. degree in Comparative Literature while proceeding with course work for the Ph.D. program.

Interdisciplinary Studies This program is designed for students with interests in interdisciplinary studies. Students examine relationships between literary studies and other disciplines (such as art, ethnic studies, film, history, law, music, philosophy, political

170 / Programs and Courses

science, psychology, religious studies, science, sociology, theater). Students complete the literary requirements of the program but substitute an appropriate discipline for one of the second or third literatures. This option is recommended to students who enter Comparative Literature with an M.A. in a non-literary discipline.

Students entering the interdisciplinary studies Ph.D. program with an M.A. in any discipline must take two courses from the canons (CPLT 210), as well as CPLT 214 and CPLT 215A (or demonstrate having taken similar courses). In addition, course requirements are two graduate courses in each of two literatures; two courses in another discipline; and three elective graduate courses in Comparative Literature. The graduate advisor may require appropriate courses on an individual basis.

Note Students must take at least one graduate course in each of the following four areas: European, Asian, Ancient, and Modern Literature.

Science Fiction, Science, and Literature This option is designed for students with interests in science fiction studies and the relations of science to world literature. It builds upon the current widespread interest in Science Fiction and draws on the Eaton Collection. The program is intended for students who have already completed an undergraduate degree in Comparative Literature, English or kindred studies. It draws on the speculative richness of science fiction literature in a wide variety of social contexts, including the role of science in society (genetic engineering, artificial environments, nanotechnology, etc.), race and ethnicity, and social ethics. This track interacts with existing programs in the humanities, arts, social sciences and sciences. It is inherently cross-disciplinary both within the humanities, and between the humanities and sciences.

Students entering the Science Fiction, Science, and Literature Ph.D. program with an M.A. in any discipline must take courses from the following areas:

1. Three theory courses from among CPLT 214, CPLT 215A, and CPLT 210 (repeatable).
2. Three science, science fiction theory, literature and methods courses, including CPLT 272, CPLT 273, CPLT 274, CPLT 275.
3. One history of science course, (PHIL 237, PHIL 239, CHN/CLA 231, CHN/CLA 232, CPAC 134)
4. One course in Film and Media Studies (SOC 211, CPLT 174, CPLT 173, MCS 175, MCS 139, MCS 146)
5. One course in Philosophy or Religion from among either PHIL 234, PHIL 237, PHIL 238 and PHIL 239 -- or RLST 200A, RLST 200C, and RLST 224)
6. One course in Social Sciences (ANTH 261, ANTH 277, ANTH 279, CHN/CLA 141, SOC 247, SOC 261, SOC 281)
7. Three elective courses from any of the groups listed above.

Among all the various courses selected there must be at least one course on non-Western

materials and two graduate literature courses with readings in the original language in each of the student's two language areas. Language areas include: Arabic, Chinese, English, French, German, Classical Greek, Italian, Indonesian, Japanese, Latin, Philippino, Portuguese, Russian, Spanish, and Vietnamese. The graduate advisor may require appropriate courses on an individual basis. When taking any upper-division undergraduate course listed here, the student must enroll in a 292 course.

Teaching Requirement Normally some teaching experience is required; such experience is obtained through a teaching assistantship whereby a student is assigned either to Comparative Literature or to another program. Students are strongly recommended to take one of the pedagogy courses in the department (CPLT 222 or CPLT 301) which may be used as one of their required elective courses.

Written and Oral Qualifying Examinations The written qualifying examination consists of the following:

1. For a student in the track of Interliterary Studies, the examination consists of four parts, which include the three national literatures that the student specializes in, with a comparative perspective, and on critical theory.
2. For a student in the track of Interdisciplinary Studies, the examination consists of four parts, which include two national literatures and one non-literary discipline that the student specializes in, with a comparative perspective, and on critical theory.

Prior to the examination for either track, students in consultation with the designated members of their committee, formulate a Special Reading List based on available departmental reading lists for each of the four parts that reflects the student's chosen fields of study and research and provides a basis for the examination.

Each of the four parts of the written examination for either the Interliterary or the Interdisciplinary Track is a three-hour exam.

The written examinations are followed by an oral qualifying examination.

Dissertation and Final Oral Examination

Candidates must write a dissertation on a topic approved by the dissertation committee and may be required to successfully undergo an oral examination on the dissertation.

Normative Time to Degree 18 quarters

Lower-Division Courses

CPLT 001 Introduction to Close Reading (4) Lecture, 3 hours; discussion, 1 hour. Teaches focused reading of works of literature and construction of compelling written arguments about texts. Explores methods of analyzing literature, framing relevant questions, and writing clear essays. Compares fiction and non-fiction, poetry and prose, narrator and author, and ancient and modern. Also covers basic critical concepts. Emphasizes non-English language traditions. Credit is awarded for only one of CPLT 001 or CPLT 001W.

CPLT 001W Introduction to Close Reading (5) Lecture, 3 hours; discussion, 1 hour; written work, 3 hours. Prerequisite(s): ENGL 001B with a grade of "C" or

better or consent of instructor. Teaches focused reading of literature and construction of compelling written arguments. Compares fiction and non-fiction, poetry and prose, and narrator and author. Also covers basic critical concepts. Fulfills the third-quarter writing requirement for students who earn a grade of "C" or better for courses that the Academic Senate designates, and that the student's college permits as alternatives to English 001C. Credit is awarded for only one of CPLT 001 or CPLT 001W.

CPLT 002 Reading World Literature (4) Lecture, 3 hours; discussion, 1 hour. Teaches concepts of cross-cultural literacy. Explores how writers in different cultures use literature to define the human, process the foreign, and perceive the world. Discusses what world literature has been and what it could be. Considers reading as a tool for approaching cultural difference. Emphasizes non-English language traditions.

CPLT 012 The Writer in Writing (4) Lecture, 3 hours; written work, 2 hours; outside research, 1 hour. Prerequisite(s): none. Targeted at the fledgling creative writer and apprentice literary critic, surveys the complex legacy surrounding the figure of the writer in world literature. Discussion and weekly writing exercises demonstrate the use of brainstorming in creating and critiquing literature. Cross-listed with CRWT 012.

CPLT 015 Language, Literature, and Culture (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): none. Introduces students to the connections between language, literature, and culture over the centuries and across national traditions through study of an array of literary forms and genres. Close reading of masterworks, selected to provide an overview of the fields of literary, linguistic, and cultural analysis.

CPLT 017A Masterworks of World Literature (5) Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Explores selected great works of literature from around the world in historical and cultural contexts. Covers antiquity to the early Renaissance, emphasizing textual analysis.

CPLT 017B Masterworks of World Literature (5) Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Explores selected great works of literature from around the world in historical and cultural contexts. Covers the early Renaissance to the Enlightenment, emphasizing textual analysis.

CPLT 017C Masterworks of World Literature (5) Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Explores selected great works of literature from around the world in historical and cultural contexts. Covers the modern period, emphasizing critical methods and approaches to comparative literature.

CPLT 018 The Nature of Narrative (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): none. Examines the basic features of narrative (including plot, character, point of view, and time and space relations) within various literary forms, such as the anecdote, story, tale, novella, and novel.

CPLT 021 Introduction to Film, Literature, and Culture (4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. Surveys critical approaches to the cinema such as auteur and genre theory. Studies literature and film, national cinemas, and film movements. Cross-listed with MCS 021.

CPLT 022A Introduction to World Literature by Women (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Introduction to world literature by women across many centuries. Covers the creative work of women from ancient to early modern periods, examining both texts and the historical circumstances of the earliest women writers. Emphasis is on texts originally written in languages other than English, from around the globe. Cross-listed with WMST 022A.

CPLT 022B Introduction to World Literature by Women (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Introduction to the increasingly powerful

voices of women writers in modernity and postmodernity. Emphasis is on texts originally written in languages other than English, from around the globe. Topics include the question of feminine writing and feminist theories about literature by women. Cross-listed with WMST 022B.

CPLT 023 Modern Japan and Personal Narrative (4) Lecture, 3 hours; extra reading, 1.5 hours; written work, 1.5 hours. Introduces major debates in history, politics, and culture through the genres of biography, autobiography, diary, and confession. Explores the parallel construction of the modern nation, the modern language, and the modern self. Traces the development of Japan's "I-novel." Builds skills in close reading by studying the rhetoric of self-narrative. Cross-listed with AST 023 and JPN 023.

CPLT 024 World Cinema (4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. Introduction to world cinema as a fusion of national and international, culturally specific, and globally universal characteristics. Topics include realism, the role of world wars, Hollywood's global reach, alternative aesthetics of third-world cinemas, cross-fertilization between Europe and Asia, and the function of international film festivals and the international film market. Cross-listed with MCS 024.

CPLT 025 Introduction to Science Fiction (4) Lecture, 3 hours; outside research, 3 hours. Considers science fiction as an interface between today's scientific and humanistic disciplines. Utilizes books, films, and works of art to examine the interplay of these disciplines. Explores the perspective of science fiction on such themes as time, space, God, nature, mind, and the future.

CPLT 027 Food in Film (4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. Explores the representation of food, cooking, and restaurants in films from different national traditions. Includes gender roles; sensuality and sexuality; social class and the economics of food; excess and lack. Cross-listed with MCS 036.

CPLT 028 Justice, Law, Violence (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. An introduction to the concepts of justice, law, and violence through literary and philosophical texts. Raises fundamental questions of individual human existence within the social collective. Topics include natural right, freedom of will, sacrifice, revolution, gender, and power.

CPLT 029 The Arts: Approach, Comparison, and Culture (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): none. An introductory course on the arts, their meaning and interrelationship as well as their cultural contexts East and West. Stresses such approaches as: How do you understand a poem? What do you look for in a painting? What do you listen for in music? How do different cultural backgrounds help in appreciating a work of art?

CPLT 040 Literary Response to Disaster and Repression (5) Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): none. An examination of how literature (e.g., memoir, fiction, and poetry) can be utilized in the recovery from disaster or repression. Analyzes examples from Asia, Africa, and Europe to address the issues of looking squarely, coming to terms, commemoration, and apology. Cross-listed with HIST 040. Credit is awarded for only one of CPLT 040/HIST 040 or CPLT 040W/HIST 040W.

CPLT 040W Literary Response to Disaster and Repression (5) Lecture, 3 hours; discussion, 1 hour; written work, 3 hours. Prerequisite(s): ENGL 001B with a grade of "C" or better or consent of instructor. Examines how literature is utilized in the recovery from major disaster or repression. Analyzes examples from Asia, Africa, and Europe that address the issues of looking squarely, coming to terms, commemoration, and apology. Fulfills the third-quarter writing require-

ment for students who earn a grade of "C" or better for courses that the Academic Senate designates, and that the student's college permits as alternatives to English 001C. Cross-listed with HIST 040W. Credit is awarded for only one of CPLT 040/HIST 040 or CPLT 040W/HIST 040W.

CPLT 046 Representing the Holocaust in Words and Images (4) Lecture, 3 hours; screening, 3 hours. Introduces representations of the Holocaust in documentary and narrative film, literature, and painting. Explores notions such as memory, mourning, trauma, spectatorship, and atrocity to come to terms with different responses to the Holocaust. Topics include memorialization, stigmatization, the ethics of historical representation, and black humor. Cross-listed with GER 046.

CPLT 056 Cultures of the Japanese Empire (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Covers the social histories and literatures of the Japanese Empire from the foundation of the Meiji state to the present. Includes the Ainu, Okinawan, Taiwanese, and Korean cultures. Explores the concepts of assimilation, citizenship, national language, nation-state, sovereignty, total war, and translation. Utilizes readings in English. Cross-listed with AST 056 and JPN 056.

CPLT 062 Introduction to Southeast Asian Literature (4) F, W, S Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): none. An introduction to modern and contemporary Southeast Asian literature and culture with a focus on individual national histories. Explores the relationship between aesthetics, politics, and academic scholarship. Readings are in translation; classes conducted in English. Cross-listed with AST 062 and SEAS 062.

CPLT 063 Reading Southeast Asian Stories (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): none. An introduction to the modern short story in Southeast Asia with a focus on literariness and the act of reading. Readings are in translation; classes conducted in English. Course is repeatable as content changes to a maximum of 8 units. Cross-listed with AST 063 and SEAS 063. **Maier**

Upper-Division Courses

CPLT 110 Literary Analysis and Criticism (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A study of different critical approaches to literature, through reading and discussion of literary texts and critical essays on those texts. Reading and discussions cover different genres and traditions as well as different critical approaches.

CPLT 111 Berlin Metropolis in Literature, Film, Music, and Art (4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to the metropolis Berlin as a gateway between the East and West. Explores topography of the city through film, art, music, and literary texts. Considers Berlin's dramatic transformations as a microcosm of Germany and Europe's troubled history in the twentieth century. Course conducted in English. Cross-listed with AHS 120, EUR 120, GER 111, and MCS 178.

CPLT 112 Mythology (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A comparative study of mythic traditions from several world cultures and religions viewed from a variety of theoretical perspectives. Includes material drawn from epics, religious texts, divine hymns, creation myths, heroic legends, and concepts of the afterlife as reflected in literary and nonliterary sources. Cross-listed with CLA 112 and RLST 117.

CPLT 114 The Classical Tradition (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A survey of the legacy of Greece and Rome in Western culture,

from the Renaissance to the present. Topics include literature, art, architecture, and politics. Cross-listed with CLA 114.

CPLT 115 Modern German History through Film (4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores twentieth-century German history through film. Includes World Wars I and II, inflation and polarization of classes, Nazi Germany, representations of the Holocaust, and a divided and reunited Germany. Cross-listed with GER 163, HISE 163, and MCS 115.

CPLT 118 The Alien as Other (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Considers the alien in science fiction studies as an image of both alterity ("Otherness") and a reflection on what it means to be human. Topics include alien contact, societies and languages, and the deliberate modifications of both humans and aliens. Utilizes short stories, novels, and film.

CPLT 120 Autobiography (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A study of the genre of literary autobiography and its visual equivalents (self-portraits and autobiographical film). An examination of narrative structure and point of view; the boundaries between fiction and nonfiction; and concepts such as masks, sexuality, memory, and biculturalism. Focus may change from year to year. Course is repeatable as topics change.

CPLT 121 Crossing Borders: Immigration, Migration, and Exile in Cinema (4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Proposes an international look at the phenomenon of migration through film. Film can be considered the foremost medium to do justice to this issue.

CPLT 123 Transnational Feminist Film and Media (4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Covers contemporary women's and feminist film and media productions. Connects the forces of globalization and militarization with gender-related experiences of displacement, migration, immigration, diaspora, trafficking, and refugee status. Focuses on innovative uses of visual language signaling changes in notions of nation, identity, class, race, ethnicity, gender, and sexuality. Cross-listed with WMST 123.

CPLT 126 From Novel to Screen: Film Adaptations of German Literature (4) Lecture, 3 hours; screening, 2 hours; individual study, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. An introduction to classic works of German literature and their film adaptations. Explores adaptations by film directors such as Welles, Kubrick, Visconti, and Fassbinder. Studies the nexus between literature, film, and theatre. Course conducted in English. Cross-listed with GER 126 and MCS 126.

CPLT 131 Marx, Nietzsche, Freud (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Critical introduction to three central thinkers of modernity. Topics include alienation, free will, revolution, the unconscious, sexual difference, political power, and the modern conception of truth. Readings and discussions are in English. Selected readings are in German for German majors and minors. Cross-listed with GER 131.

CPLT 132 Rousseau and Revolution (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introductory study of the French philosopher and novelist Jean-Jacques Rousseau and the age of revolution in France, Germany, and England. Topics include social inequality, slavery, gender, subjectivity, violence, and political rights. All readings are in English. Cross-listed with FREN 132 and GER 132.

CPLT 134 Cinematic War Memory (4) Lecture, 3 hours; screening, 2 hours; extra reading, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Examines cinematic confrontations involving World War II in Germany and Japan. Topics include desire between victims and perpetrators, representation of trauma, and ethical responsibility. All screenings have English subtitles. Cross-listed with GER 134, JPN 134, and MCS 114.

CPLT 136 The Enlightenment and Its Consequences: Modern Europe in the Arts (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores the basic ideas of modernity in Europe that are central to the history of western cultures and civilization. Focuses on the function of the arts and sciences in relation to the philosophy and concepts of the Enlightenment. Addresses humankind's changing relationship to religion, state, society, and history, as well as new strategies of self-reflection. Cross-listed with GER 136.

CPLT 137 Passions, Apparitions, and Automata (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introductory study of German Romanticism from its origins in Goethe to its development in Hoffmann. Topics include madness, sexual desire, doppelgänger, homicide, and *automata*. All readings are in English; selected readings are in German for German majors and minors. Cross-listed with EUR 137 and GER 137.

CPLT 142 (E-Z) Women's Writing in Modern Asia and Asian America (4) Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Covers comparative histories of feminist literary movements, gender and immigration, autobiography, translation, and subjectivity. Asian literature will be circulated in the original language to students with reading ability (not required). E. Chinese and Chinese American Writing; J. Japanese and Japanese American Writing; K. Korean and Korean American Writing; U. Vietnamese and Vietnamese American Writing. Cross-listed with WMST 142 (E-Z).

CPLT 143 France and Asia in Literature and the Arts (4) Lecture, 3 hours; screening, 20 hours per quarter; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Explores French portrayals of Asia in literature, cinema, the other arts, and popular culture. Topics include colonialism, orientalism, gender, race, and language. Cross-listed with FREN 143.

CPLT 144 Buddhist Literature (4) Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Readings in canonical and non-canonical Buddhist texts. Includes Buddhist-influenced literature written by Asian, European, and American authors. Examines themes of emptiness, impermanence, and no-self. Cross-listed with AST 133 and RLST 144.

CPLT 145 Modern Japanese Thought (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Survey of modern Japanese thought from a theoretical and intellectual historical perspective. Topics include philosophical discussions of modernization, "Westernization," nationalism, colonialism and imperialism, "comfort women," Japanese war crimes in continental Asia, the American bombing of Hiroshima and Nagasaki, post-World War II remembrance and denial. All readings are in English. Cross-listed with JPN 145.

CPLT 146 Comedy and Satire (4) Lecture, 3 hours; outside reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Investigates the origins and historical development of contemporary Western culture's two most popular genres. Although the focus is on literary texts ranging from Aristophanes to the present, the course also considers the many other cultural media through which the comic and the satirical find expression—among them, caricature drawing, photography, comic books, film, and televi-

sion. Attention is given to debates about the related functions of irony, laughter, violence, and sexuality.

CPLT 147 (E-Z) The Novel (4) Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Investigation of the novel as a preeminent register of cultural values and common literary themes derived from the various national literatures and literary epochs. Examines the novel form in terms of selected, related works by some of its greatest practitioners. E. The Existential Novel; F. The Carnavalesque.

CPLT 148 Short Narrative (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Analysis and interpretation of short narrative texts from the linked perspectives of universal themes and shared literary concerns. The finest short prose, including the anecdote, short story, tale, and novella, by some of the world's greatest writers is explored in depth.

CPLT 149 The Development of Classical Modern Drama (4) Lecture, 3 hours; written work, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Consisting of readings, discussions, and lectures, treats plays and theories from the German, Scandinavian, Russian, and French repertoire among others. Covers Naturalism to Expressionism (1880-1918).

CPLT 151 Palestine/Algeria (4) Lecture, 3 hours; screening, 6 hours per quarter; extra reading, 24 hours per quarter. Prerequisite(s): upper-division standing or consent of instructor. Considers two distinct and related literary and historical moments: Palestine and Algeria. Topics include the relations between language and context; literature and literary historiography; genre and idiom; violence and the body; and the state and institutional practices of writing. Cross-listed with ARLC 151 and MEIS 151.

CPLT 152 Modern Arabic Poetry in a Multilingual Frame (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Considers selected writings of Adunis ('Ali Ahmed Sa'id), Mahmoud Darwish, Abdelatif La'abi, and Etel Adnan, published originally in Arabic, French, and English. Topics include language (idiom, statement, utterance, translation, repetition, rhythm) and history (loss, violence, mourning, inheritance, future, legacy). Course is taught in English. Cross-listed with ARLC 152.

CPLT 153 Literature, Language, Relation (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Considers the rapport among language, relation, and literature. Focuses upon the relations among context and modes of address (the *Qur'an*, Levinas, Austin, Derrida); the name and the positing force of language (Darwish, Plato, Nietzsche); and language, violence, and poetic statement (Ibn Arabi, Heidegger, Benjamin).

CPLT 154 Introduction to Arabic Philosophy (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to Arabic philosophical texts. Provides close and literary reading of texts in philosophy, as well as considers the impact these texts have had or can have on Western cultural formation. Cross-listed with ARLC 154 and PHIL 128.

CPLT 155 Introduction to Arabic Literature (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to Arabic literature that focuses on language and rhetoric. Considers major issues such as colonialism, secularism, modernity, language, and the state. Utilizes texts from literature, the law, and philosophy. Cross-listed with ARLC 155, MEIS 155, and RLST 157.

CPLT 156 Jews and Arabs (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Traces the formation of the shared and divided history of the Jewish and Arab peoples. Focuses on the literary and institutional dimensions of this history, as well as the formation of related areas of study, such as religion, philosophy, literature, and psychoanalysis. Cross-listed with ARLC 156, MEIS 156, and RLST 156.

CPLT 158 Islam and Psychoanalysis (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores contemporary psychoanalytic readings of Islam to consider the relationship between Islam and Orientalism, Orientalism and psychoanalysis, and psychoanalysis and Islam. Cross-listed with ARLC 158, MEIS 158, and RLST 158.

CPLT 160 (E-Z) Comparative Cultural Studies: From the Middle Ages to Postmodernism (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Each segment deals with a significant cultural "event" whose implications (historical, political, literary) cross national and cultural boundaries. In order to present a diversity of national and linguistic views, segments are where feasible team taught. F. The French Revolution and Napoleon; G. The Holocaust; M. Millennium and Apocalypse.

CPLT 163 Nationalism and the Novel (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to the novel and its role within nationalism as a representative summary or mirror of the nation. Cross-listed with AST 163 and SEAS 163.

CPLT 166 Vietnam and the Philippines (4) Lecture, 3 hours; written work, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to the comparative national histories of Vietnam and the Philippines by way of great literary works in various genres including poetry, short fiction, and novels. All materials are read in English. Cross-listed with AST 166, SEAS 166, and VNM 166.

CPLT 167 Postcolonial Literature and Criticism in Southeast Asia and South Asia (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores how the theoretical concepts of postcolonial criticism inform and challenge the literature of Southeast Asia and South Asia, as the literature itself pushes the limits of the criticism. Addresses themes of nation, identity, space, gender, home, diaspora, alterity, history, sexuality, transnationalism, neocolonialism, tourism, and education. Cross-listed with AST 167 and SEAS 167.

WRLT 170 Third World Literature (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Analysis of some major works associated with Third World literature and film. Emphasis on African, Latin American, Caribbean, African-American, and Chicano literature. Cross-listed with ETST 170.

CPLT 173 (E-Z) International Cinemas (4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): MCS 020 or upper-division standing or consent of instructor. Considers non-Hollywood cinemas in the national, historical, political, and cultural contexts which produced them. E. Experimental and Avant-Garde Film; F. French New Wave; G. New German Cinema; I. Italian Neorealism; T. Third World Cinema; U. Global Perspectives on the Vietnam War. Cross-listed with MCS 173 (E-Z).

CPLT 174 (E-Z) Comparative Studies in Film (4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Considers film in the context of the other arts. Compares the treatment of various themes or problems in film and other media. E. Film and Literature in the Avant-Garde. Cross-listed with MCS 174 (E-Z).

CPLT 178 Religious Biography (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A study of the construction and continuing appropriation of biographical images (textual and visual narratives) in selected religious traditions. Special attention is given to problems of intertextuality and the medium of presentation in the communication of "religious" meaning. Cross-listed with RLST 178.

CPLT 180 (E-Z) Literature and Related Fields (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A critical survey of the theories and methodologies involved in the comparative study of literature and nonliterary fields. E. Literature and History; I. Literature and Institutions; L. Prelaw Readings in Literature; M. Literature and Music; P. Literature and Psychopathology; S. Literature and Science; U. Literature and the Visual Arts; X. Literature and Marxism; Z. Literature and Fiction/Fantasy.

CPLT 181 Existentialism in Literature, Film, and Culture (4) Lecture, 3 hours; screening, 2 hours; outside research, .5 hours; term paper, .5 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores the Existentialist movement in literature, film, and culture. Texts range from essays, plays, and novels to documentary and fiction film. Topics include choice, subjectivity, and alienation. Cross-listed with FREN 181 and MCS 181.

CPLT 187 Metafiction (4) Lecture, 3 hours; creative writing, take-home midterm, or term paper, 30 hours per quarter. Prerequisite(s): upper-division standing or consent of instructor. Covers postmodernism, metafiction, and the new novel in Europe and America. Creative writers submit fiction in lieu of a term paper or midterm. Cross-listed with CRWT 187.

CPLT 190 Special Studies (1-5) To be taken with the consent of the chair of the Department as a means of meeting special curricular requirements. Course is repeatable.

CPLT 193 Capstone Research Seminar (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): Junior standing in Asian Literatures and Cultures, Classical Studies, Comparative Ancient Civilizations, Comparative Literature, French Studies, Germanic Studies, Languages, or Russian Studies; not open to students who are in their final quarter of study. Develops skills in the formulation and selection of research questions in Comparative Literature. Includes the identification of research questions and the use of primary texts, secondary texts, and theory to seek answers. Addresses techniques in the organization and presentation of writing.

CPLT 195H Senior Thesis (1-2) Open by invitation to students in the Honors Program in Comparative Literature. Grade is deferred until the end of the second or third quarter. To be taken for two or three consecutive quarters; total credit may not exceed 6 units.

CPLT 196 Senior Research Paper (2) Consultation, 1 hour; term paper, 3 hours. Prerequisite(s): CPLT 193. A continuation of the research project begun in CPLT 193. Conducted under supervision of a faculty advisor in the applicable field of study. Satisfactory (S) or No Credit (NC) grading is not available.

Graduate Courses

CPLT 200 Topics in Southeast Asian Studies (4) Seminar, 3 hours; written work, 2 hours; term paper, 1 hour. Prerequisite(s): graduate standing or consent of instructor. An introduction to the world of Southeast Asia and the scholarly discussions about it, with an emphasis on cultural aspects, embedded in their historical context. Materials are in English. Course is repeatable as content changes to a maximum of 12 units. Cross-listed with SEAS 200.

CPLT 205 Literature of Southeast Asia (4) Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Explores themes and theories related to understanding literature and literary culture in Southeast Asia, insisting that the space of literature reaches beyond the text to include all disciplines. Students critically read, engage in, and question discourses of nationhood, identity, loss, mourning, history, and memoir. Course is repeatable as content changes to a maximum of 12 units. Cross-listed with SEAS 205.

CPLT 210 Canons in Comparative Literature (4) Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Studies the concept of the canon and literary texts included in it and excluded from it. Considers the distinction between "mainstream" and "marginal" works. Examines how the canon of texts changes over time. Course is repeatable as topics change.

CPLT 212 Introduction to Graduate Studies in Comparative Literature (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing. Surveys the history of comparative literature and introduces the beginning graduate student to the various methodologies, aesthetic theories, and critical approaches which have come to dominate its field of inquiry. In addition to class discussion, examinations, and a term paper, students are also involved in a number of practical activities designed to sharpen their critical acumen, enlarge academic vocabulary, and encourage mastery of scholarship procedures.

CPLT 213 Rhetoric and Argument in Ancient China and Greece (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. A study of theories and practices of rhetoric, argument, persuasion, and, in some cases, poetics in ancient China and Greece (texts dating from the fifth to the third centuries B.C.), as well as some of their implications for contemporary theory and practice. Students who submit a seminar paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. This course may also be taken on a Satisfactory (S) or No Credit (NC) basis by students advanced to candidacy for the Ph.D. Cross-listed with POSC 213.

CPLT 214 History of Criticism (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing; seniors may be admitted by consent of instructor. A survey of critical theories from Plato to modern time through reading and group discussion. Emphasis is on fundamental theoretical issues that recur in the history of literary criticism and are relevant to modern concerns.

CPLT 215A Contemporary Critical Theory (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing. Considers representative critical works and movements in contemporary theory. Includes the study of formalism, structuralism, semiotics, psychoanalytic and feminist theory, and deconstruction.

CPLT 215B Issues in Contemporary Theory (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing. Focuses on a specific problem or movement in contemporary theory. Course is repeatable as content changes.

CPLT 219 Dante and Italian Cinema (4) Seminar, 3 hours; screening, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Compares the poetic goals and strategies of each of the three sections of Dante's *Commedia*—*Inferno*, *Purgatorio*, and *Paradiso*—with the innovative cinematic languages of leading post-World War II Italian filmmakers, including Rossellini, Pasolini, Fellini, Antonioni, Cavani, Wertmüller, Nichetti, and Moretti. Integrates theoretical discussions of representation, desire, knowledge, gender, sexuality, and subjectivity with close textual analysis of poetry and film.

CPLT 220 (E-Z) German Aesthetic Theory (4) Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An introduction to individual figures in the history of German aesthetic theory and their legacy in critical discourse. Topics include philhellenism, the beautiful, the sublime, the ugly, fascist chic, mimesis, ornament, the "thing," mechanical reproduction, suddenness, synaesthesia, and technomedia. All readings are in English. E. Kant; F. Benjamin. Students who submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Each segment is repeatable as its topics change.

CPLT 222 Problems in the Pedagogy of Comparative Literature (4) Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing. Addresses the theories of literary pedagogy and emerging discussions about the teaching of comparative literature.

CPLT 224 Film Theory (4) Seminar, 3 hours; screening, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Advanced introduction to classic texts of early and contemporary film theory. Discusses theoretical claims of relevant films. Major concepts include realist film theory, cinema of attractions, apparatus theory, theory of film practice, feminist film theory, and notions of gender, race, and class. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CPLT 243 France and Asia: Orientalism and Beyond (4) Seminar, 3 hours; screening, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Explores the phenomenon and concept of Orientalism as well as alternative paradigms for East-West aesthetic and cultural relations through theory, literature, and film. Geographical areas and periods of focus may vary. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CPLT 252 Topics in Tourism, Cultural Authenticity, and the Question of Nostalgia (4) Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Introduces theoretical literature concerning the intertwined notions of tourism, cultural authenticity, and nostalgia. Encourages students to approach written texts and other media from a critical perspective, considering the context of both cultural production and consumption. Valuable to students working on issues such as orientalism, modernity studies, diasporic literature, and postcolonial literature. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as content changes.

CPLT 261 European Modernities (4) Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing. Examines theoretical issues of late nineteenth-century European modernities. Utilizes literature, art, and popular images from France, England, Austria, and Russia. Addresses aesthetics, consumption, mass culture, fashion, melodrama, technology, psychology, and nihilism. Includes works by Baudelaire, Zola, Braddon, Boucicault, Turgenev, Manet, Degas, Daumier, and Klimt. Course is repeatable as content changes to a maximum of 12 units.

CPLT 267 Colonialisms and Postcolonial Criticism (4) Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Covers the historical development of postcolonial criticism and how its theoretical concepts inform and challenge the study of literature and culture. Addresses themes of nation, identity, space, gender, home, diaspora, alterity, history, sexuality, transnationalism, neocolonialism, domestic colonialism, tourism, and education. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as content changes.

CPLT 272 The Origins and Promise of Science Fiction (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of

instructor. Studies the literary, scientific, and social origins of the science fiction genre and how it generates new themes, narrative structures, and perspectives on the human condition.

CPLT 273 Genre and Method in Science Fiction Studies (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An introduction to the critical debate within the field of science fiction and to some of the early and fundamental concepts of what science fiction is and what it does. Examines the development of science fiction from its origins through its influence on critical theory in twentieth- and twenty-first century texts.

CPLT 275 Science Fiction Authors (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines the work of one of the core authors of science fiction and the reception of that work in either the initial formation or later development of the genre. Course is repeatable as content changes to a maximum of 12 units.

CPLT 276 Science Meets the Fiction (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines how changing scientific views of the world impact the science fiction genre. Studies the evolution of travel narratives and the historical novel into new adaptations of scientific visions of space and time. More broadly, examines how the genre reflects changing social and scientific contexts.

CPLT 277 Seminar in Comparative Literature (4) Seminar, 3 hours; consultation, 1 hour. Special topics in comparative literature. Subject may vary from quarter to quarter depending on instructor. Course may be given by visiting faculty. May be repeated.

CPLT 284 Literature, Colonialism, and Religion (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An introduction to debates on secularism and religion in Europe. Examines how these debates may illumine perspectives on literary studies and colonialism.

CPLT 290 Directed Studies (1-6) Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CPLT 290 (E-Z) Directed Studies (1-6) Outside research, 3-18 hours. Prerequisite(s): graduate standing; consent of instructor and department chair. To be taken as a means of meeting special curricular needs in literature. E. English; F. French; G. German; H. Greek; I. Italian; J. Japanese; K. Chinese; L. Latin; M. Latin American; R. Russian; S. Spanish; T. Scandinavian; U. American; V. Slavic. Segments are repeatable.

CPLT 291 Individual Studies in Coordinated Areas (1-6) A directed program of study designed to advise and assist candidates who are preparing for examinations. Open to M.A. and Ph.D. candidates. Does not count toward the unit requirement for the M.A. Graded Satisfactory (S) or No Credit (NC). May be repeated quarterly until the qualifying examinations are completed.

CPLT 292 Concurrent Analytical Studies (2) Research, 6 hours. Prerequisite(s): consent of instructor; concurrent enrollment in CPLT 100-series course. To be taken on an individual basis. Student will complete a graduate paper based on research related to the CPLT 100-series course. May be repeated with different topic.

CPLT 299 Research for Thesis or Dissertation (1-12) Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Courses

CPLT 301 Teaching of Foreign Language at the College Level (4) Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing, or senior standing with consent of instructor. Covers first and second language acquisition; general models of L2 learning; learning different types of grammar; learning other components of language; acquisition of pronunciation, vocabulary, and discourse; multilingual societies and the goals of language teaching; and implications of second language acquisition research for the foreign language classroom. Graded Satisfactory (S) or No Credit (NC).

CPLT 302 Teaching Practicum (1-4) Practicum, 3-12 hours. Prerequisite(s): CPLT 301 or equivalent; graduate standing; employment as a teaching assistant or associate in. Supervised teaching in lower-division courses. Required of all teaching assistants in Comparative Literature. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Languages and Literatures/Arabic Minor

This minor introduces the field of Arabic studies, and offers training in the Arabic language and in the close reading of texts—including poetry, literature, philosophy, theoretical writings, essays, and film—with attention to problems of translation, the history of disciplines, and the formation of institutions. It teaches students to read cultural objects, practices, texts, and institutions as active sites of translation, negotiation, contestation, and invention.

Minor Requirements

- Lower Division Requirements (language proficiency)
 - ARBC 001, 002, 003, and 004
- Upper Division Requirements (16 units)
 - Twelve upper-division units in Arabic Literature and Culture from ARLC 120, ARLC 151/CPLT 151/MEIS 151, ARLC 152/CPLT 152, ARLC 154/CPLT 154/PHIL 128, ARLC 155/CPLT 155/MEIS 155/RLST 157, ARLC 156/CPLT 156/MEIS 156/RLST 156, ARLC 158/CPLT 158/MEIS 158/RLST 158, and any other related courses chosen in consultation with the student's faculty advisor.
 - Four upper-division units from CPLT 110 or a related upper-division course

Arabic Language

Foreign Language Placement Examination A placement examination is required of all freshmen entering the College of Humanities, Arts, and Social Sciences who wish to meet the foreign language requirement with the same language taken in high school. Consult the quarterly Schedule of Classes and [placementtest.ucr.edu](#) for date and time. Transfer students who have taken a college-level language course cannot take the placement examination and should consult with their advisors. No college-level credit may be duplicated. See college placement examination policy.

Lower-Division Courses

ARBC 001 Elementary Arabic (4) Lecture, 4 hours. Prerequisite(s): Student must take the Arabic placement examination. An introduction to modern standard Arabic. Focuses on the development of the four language skills: listening, speaking, reading, and writing. Also explores aspects of Arabic cultures. Classes conducted primarily in Arabic.

ARBC 002 Elementary Arabic (4) Lecture, 4 hours. Prerequisite(s): ARBC 001 with a grade of "C-" or better or equivalent or a sufficiently high test score on the Arabic placement examination as determined by the department faculty. An introduction to modern standard Arabic. Focuses on the development of the four language skills: listening, speaking, reading, and writing. Also explores aspects of Arabic cultures. Classes conducted primarily in Arabic.

ARBC 003 Elementary Arabic (4) Lecture, 4 hours. Prerequisite(s): ARBC 002 with a grade of "C-" or better or equivalent or a sufficiently high test score on the Arabic placement examination as determined by the department faculty. An introduction to modern standard Arabic. Focuses on the development of the four language skills: listening, speaking, reading, and writing. Also explores aspects of Arabic cultures. Classes conducted primarily in Arabic.

ARBC 004 Intermediate Arabic (4) Lecture, 4 hours. Prerequisite(s): ARBC 003 with a grade of "C-" or better or equivalent or a sufficiently high test score on the Arabic placement examination as determined by the department faculty. An introduction to intermediate modern standard Arabic. Builds upon current knowledge levels of grammar and vocabulary to gain greater fluency and accuracy in listening, speaking, reading, and writing. Classes conducted in Arabic.

ARBC 005 Intermediate Arabic (4) Lecture, 4 hours. Prerequisite(s): ARBC 004 with a grade of "C-" or better or equivalent or a sufficiently high test score on the Arabic placement examination as determined by the department faculty. An introduction to intermediate modern standard Arabic. Builds upon current knowledge levels of grammar and vocabulary to gain greater fluency and accuracy in listening, speaking, reading, and writing. Classes conducted in Arabic.

ARBC 006 Intermediate Arabic (4) Lecture, 4 hours. Prerequisite(s): ARBC 005 with a grade of "C-" or better or equivalent or a sufficiently high test score on the Arabic placement examination as determined by the department faculty. An introduction to intermediate modern standard Arabic. Builds upon current knowledge levels of grammar and vocabulary to gain greater fluency and accuracy in listening, speaking, reading, and writing. Classes conducted in Arabic.

Upper-Division Courses

ARBC 101A Advanced Arabic (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ARBC 006 or equivalent. An introduction to advanced modern standard Arabic. Builds upon knowledge of grammar and vocabulary to gain greater fluency and accuracy in listening, speaking, reading, and writing. Class conducted in Arabic.

ARBC 101B Advanced Arabic (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ARBC 101A or equivalent. An introduction to advanced modern standard Arabic. Builds upon knowledge of grammar and vocabulary to gain greater fluency and accuracy in listening, speaking, reading, and writing. Class conducted in Arabic.

ARBC 101C Advanced Arabic (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ARBC 101B or equivalent. An introduction to advanced modern standard Arabic. Builds upon knowledge of grammar and vocabulary to gain greater fluency and accuracy

in listening, speaking, reading, and writing. Class conducted in Arabic.

ARBC 110 Advanced Readings in Arabic (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): ARBC 006 or consent of instructor. Advanced seminar in the reading of Arabic texts. Focuses on improving students' reading skills while reviewing and deepening knowledge of Arabic grammar and vocabulary. Course is repeatable as content changes up to a maximum of 12 units.

Arabic Literatures and Cultures

Upper-Division Courses

ARLC 120 Classical Arabic Literary Prose (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores aspects of classical Arabic literary prose. Includes the modes of quotation, citation, falsification, fabrication, and forgery. Focuses upon selected writings of al-Hamadhai, al-Jahiz, al-Ma'arri, Ibn Tufayl, and Ibn Hazim.

ARLC 151 Palestine/Algeria (4) Lecture, 3 hours; screening, 6 hours per quarter; extra reading, 24 hours per quarter. Prerequisite(s): upper-division standing or consent of instructor. Considers two distinct and related literary and historical moments: Palestine and Algeria. Topics include the relations between language and context; literature and literary historiography; genre and idiom; violence and the body; and the state and institutional practices of reading. Cross-listed with CPLT 151 and MEIS 151.

ARLC 152 Modern Arabic Poetry in a Multilingual Frame (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Considers selected writings of Adunis ('Ali Ahmed Sa'id), Mahmoud Darwish, Abdelatif La'abi, and Etel Adnan, published originally in Arabic, French, and English. Topics include language (idiom, statement, utterance, translation, repetition, rhythm) and history (loss, violence, mourning, inheritance, future, legacy). Course is taught in English. Cross-listed with CPLT 152.

ARLC 154 Introduction to Arabic Philosophy (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to Arabic philosophical texts. Provides close and literary reading of texts in philosophy, as well as considers the impact these texts have had or can have on Western cultural formation. Cross-listed with CPLT 154 and PHIL 128.

ARLC 155 Introduction to Arabic Literature (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to Arabic literature that focuses on language and rhetoric. Considers major issues such as colonialism, secularism, modernity, language, and the state. Utilizes texts from literature, the law, and philosophy. Cross-listed with CPLT 155, MEIS 155, and RLST 157.

ARLC 156 Jews and Arabs (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Traces the formation of the shared and divided history of the Jewish and Arab peoples. Focuses on the literary and institutional dimensions of this history, as well as the formation of related areas of study, such as religion, philosophy, literature, and psychoanalysis. Cross-listed with CPLT 156, MEIS 156, and RLST 156.

ARLC 158 Islam and Psychoanalysis (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor.

Explores contemporary psychoanalytic readings of Islam to consider the relationship between Islam and Orientalism, Orientalism and psychoanalysis, and psychoanalysis and Islam. Cross-listed with CPLT 158, MEIS 158, and RLST 158.

Languages and Literatures / Southeast Asian Minor

The Southeast Asian minor provides students with the opportunity to enhance their knowledge of Southeast Asian languages, cultures, and literatures.

1. Lower-division requirements (8 units plus language proficiency)
 - a) Proficiency in one of the Southeast Asian languages (Vietnamese/Indonesian/Tagalog) through the first-year level
 - b) Eight (8) units from lower-division lecture courses on Southeast Asian literature and culture: AST 062/CPLT 062/SEAS 062, AST 063/CPLT 063/SEAS 063, AST 064/MCS 049/SEAS 064/VNM 064, AST 065/SEAS 065
2. Upper-division requirements (16 units)

Sixteen (16) units in Southeast Asian literature and culture from CPLT 142V/WMST 142V, AST 161/SEAS 161, AST 162/HIST 187/VNM 162, AST 163/CPLT 163/SEAS 163, AST 165 (E-Z)/SEAS 165 (E-Z)/VNM 165 (E-Z)/WMST 165(E-Z), AST 166/CPLT 166/SEAS 166/VNM 166, AST 167/CPLT 167/SEAS 167, AST 168/MUS 168/SEAS 168, or graduate courses in Southeast Asian literature and culture (with consent of instructor) such as CPLT 200/SEAS 200 and CPLT 205/SEAS 205

Chinese Courses

For the list of courses offered in Chinese, please see the Languages and Literatures/Chinese major section.

Filipino Courses

Foreign Language Placement Examination

A placement examination is required of all freshmen entering the College of Humanities, Arts, and Social Sciences who wish to meet the foreign language requirement with the same language taken in high school. Consult the quarterly Schedule of Classes and **placementtest.ucr.edu** for date and time. Transfer students who have taken a college-level language course may not take the placement examination and should consult with their advisors.

No college-level credit may be duplicated. See college placement examination policy.

Lower-Division Courses

FIL 001 First-Year Filipino (4) Lecture, 4 hours. Prerequisite(s): Student must take the Filipino placement examination. An introduction to the sound system and grammar of Filipino. Emphasizes reading, writing, understanding, and speaking. Conducted in Filipino whenever possible.

FIL 002 First-Year Filipino (4) Lecture, 4 hours. Prerequisite(s): FIL 001 with a grade of "C-" or better or equivalent or a sufficiently high test score on the Filipino placement examination as determined by the department faculty. An introduction to the sound system and grammar of Filipino. Emphasizes reading, writing, understanding, and speaking. Conducted in Filipino whenever possible.

FIL 003 First-Year Filipino (4) Lecture, 4 hours. Prerequisite(s): FIL 002 with a grade of "C-" or better or equivalent or a sufficiently high test score on the Filipino placement examination as determined by the department faculty. An introduction to the sound system and grammar of Filipino. Emphasizes reading, writing, understanding, and speaking. Conducted in Filipino whenever possible.

FIL 004 Second-Year Filipino (4) Lecture, 4 hours. Prerequisite(s): FIL 003 with a grade of "C-" or better or equivalent or a sufficiently high test score on the Filipino placement examination as determined by the department faculty. Emphasizes further development of the four language skills: reading, writing, understanding, and speaking. Conducted primarily in Filipino.

Japanese Courses

For the list of courses offered in Japanese, please see the Languages and Literatures/Japanese major section.

Southeast Asian Studies Courses

Lower-Division Course

SEAS 047 Introduction to Southeast Asian History (4) Lecture, 3 hours; extra reading, 3 hours. Introduces major themes and events in Southeast Asian history. Covers from prehistory to contemporary events in the region. Develops basic historical approaches to understanding contemporary trends, such as the spread of world religions, regional differences and connections, trading patterns, cultural forms, and historically important sites. Cross-listed with AST 049 and HIST 046.

SEAS 062 Introduction to Southeast Asian Literature (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): none. An introduction to modern and contemporary Southeast Asian literature and culture with a focus on individual national histories. Explores the relationship between aesthetics, politics, and academic scholarship. Readings are in translation; classes conducted in English. Cross-listed with AST 062 and CPLT 062.

SEAS 063 Reading Southeast Asian Stories (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): none. An introduction to the modern short story in Southeast Asia with a focus on literariness and the act of reading. Readings are in translation; classes conducted in English. Course is repeatable as content changes to a maximum of 8 units. Cross-listed with AST 063 and CPLT 063.

SEAS 064 Introduction to Vietnamese and Diasporic Film Culture (4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. Engages in critical viewing strategies and analytical visual critique. Explores the revival of film production in Vietnam following the Vietnam War, with a focus on the means of production, state control, and international distribution. Readings are in translation; classes conducted in English. Cross-listed with AST 064, MCS 049, and VNM 064.

SEAS 065 Introduction to Southeast Asian Cultures

(4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): none. An introduction to the world of Southeast Asia with an emphasis on aspects of local cultures. Cross-listed with AST 065.

Upper-Division Courses

SEAS 136 Anthropological Perspectives on Gender in Southeast Asia

(4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines the intersections of gender, power, and sexuality in post-colonial Southeast Asia. Revisits early ethnographic claims of gender equality. Addresses current anthropological literature on the effects of colonialism, capitalism, and globalization on gender roles and relations within national and transnational contexts. Cross-listed with ANTH 136.

SEAS 137 The Vietnamese Americans: The Refugee and Immigrant Experience

(4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Focuses on the Vietnamese American experience in contemporary society. Emphasizes the relationship of Vietnamese Americans to the larger society and on intergenerational strains and conflicts. Topics include socioeconomic and educational problems, family, religion, and the relationship between Vietnamese Americans and other ethnic groups. Cross-listed with ETST 137.

SEAS 143A Critical Filipino(a) Studies: Histories and Legacies of U.S. Conquest, Colonialism, and Empire

(4) Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Critically examines and theorizes the historical impact and legacies of U.S. conquest and colonialism in the Philippines. Analyzes the origins of Filipino American civic existence and its links to histories of U.S. racial formation, racialized industrialization, and racialized frontier warfare. Cross-listed with ETST 143A.

SEAS 143B Critical Filipino(a) Studies: Interrogating the Filipino American Present

(4) Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): ETST 143A/SEAS 143A; upper-division standing or consent of instructor. Critically analyzes the emergence of Filipino American community and identity in relation to the U.S. emancipation of the Philippines and the complex restructuring of a neocolonial and imperial relation. Examines the theoretical and conceptual premises of Filipino Americanism through counterhegemonic social movements, cultural production, and identity formation. Cross-listed with ETST 143B.

SEAS 145 Buddhism in Southeast Asia

(4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): RLST 106 or consent of instructor. Explores various texts, magical practices, forms of meditation, rituals, and beliefs of ancient and modern Buddhism, focusing on the ways in which they are transformed by nuns, monks, and the laity in Burma, Cambodia, Laos, Thailand, and California. Cross-listed with RLST 145.

SEAS 149 Southeast Asian Religions

(4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): one Religious Studies course or upper-division standing or consent of instructor. Introduces aspects of religion in various Southeast Asian countries including Indonesia, Malaysia, Thailand, Cambodia, Vietnam, and the Philippines. Provides contextualized readings featuring historical, anthropological, literary, and other disciplinary perspectives. Cross-listed with RLST 149.

SEAS 150 Islam in Southeast Asia

(4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introduces the religious, intellectual, and cultural history of Muslim Southeast Asia. Includes Indonesia, Malaysia, and Brunei, as well as minority communities in Singapore, Thailand, Cambodia, and the southern Philippines. Examines a series of contextualized read-

ings in translated primary sources. Approaches texts from historical, anthropological, literary, and other disciplinary perspectives. Cross-listed with RLST 150.

SEAS 161 Translating Modern Southeast Asian Texts

(4) Lecture, 3 hours; term paper, 1.5 hours; written work, 1.5 hours. Prerequisite(s): upper-division standing; knowledge of one Southeast Asian language is recommended. An introduction to translating modern Southeast Asian texts into English. Presents translations of texts from Vietnam, Indonesia, and the Philippines in a context of theory. Materials are in English. Course is repeatable as content changes to a maximum of 8 units. Cross-listed with AST 161.

SEAS 162 Vietnamese Literary History

(4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing. A historical analysis of Vietnamese literature from its oral tradition to contemporary fiction. Follows the formation of the nation-state and the subsequent struggles with the Chinese, French, Japanese, and Americans. No knowledge of Vietnamese required. Readings are in translation or bilingual editions. Classes are conducted in English. Cross-listed with AST 162, HIST 187, and VNM 162.

SEAS 163 Nationalism and the Novel

(4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to the novel and its role within nationalism as a representative summary or mirror of the nation. Cross-listed with AST 163 and CPLT 163.

SEAS 164 Vietnamese American Culture

(4) Lecture, 3 hours; written work, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A study of the pervasive aspects of Vietnamese American culture. Includes shared histories, acculturation patterns, class diversity, identity struggles, community-building literary and cultural production, youth issues, and cultural survival. Also introduces foundational literature, visual culture, and scholarship in the field. Cross-listed with AST 164 and VNM 164.

SEAS 165 (E-Z) Themes in Vietnamese Literature

(4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An exploration of Vietnamese literature in translation as seen through the lens of a particular theme or issue. Focuses on the implications of gender and sexuality on nation formation. All materials are read or viewed in English. E. Women and War. Cross-listed with AST 165 (E-Z), VNM 165 (E-Z), and WMST 165 (E-Z).

SEAS 166 Vietnam and the Philippines

(4) Lecture, 3 hours; written work, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to the comparative national histories of Vietnam and the Philippines by way of great literary works in various genres including poetry, short fiction, and novels. All materials are read in English. Cross-listed with AST 166, CPLT 166, and VNM 166.

SEAS 167 Postcolonial Literature and Criticism in Southeast Asia and South Asia

(4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores how the theoretical concepts of postcolonial criticism inform and challenge the literature of Southeast Asia and South Asia, as the literature itself pushes the limits of the criticism. Addresses themes of nation, identity, space, gender, home, diaspora, alterity, history, sexuality, transnationalism, neocolonialism, tourism, and education. Cross-listed with AST 167 and CPLT 167.

SEAS 172 Gender in Southeast Asian Diasporic Literature and Film

(5) Lecture, 3 hours; screening, 3 hours; written work, 1 hour; extra reading, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. Focuses on former Indochinese refugees who are producing literature and films in the United States and France. Examines how the perception of Indochina has been constructed, particularly how the region has been gendered female in the colonial

imaginary. Explores the return of Southeast Asian immigrants to the Western gaze. Cross-listed with MCS 142 and WMST 122.

SEAS 175 Asian American Women: Writing the Self in Literature and Film

(4) Lecture, 3 hours; screening, 1 hour; written work, 1 hour; extra reading, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Analyzes Asian American autobiographies and films written and directed by women. Explores why the genre of autobiography is enabling and contentious within Asian American women's writings. Examines films to see how such women filmmakers contend with memory, gender, and identity. Cross-listed with MCS 123 and WMST 124.

SEAS 177 Vietnamese and Overseas Vietnamese Cinema

(4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): MCS 020 or upper-division standing or consent of instructor. Explores how Vietnamese people and the Vietnamese diaspora seek to imagine a sense of community in the postwar era through contemporary film and video. Examines the thematics of return, longing, and exile. Reviews some of the texts' bold expressions of gender, sexuality, and identity. Cross-listed with AST 187 and MCS 167.

SEAS 184 The Vietnam Wars

(4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to Vietnamese history in the twentieth century. Covers the three Indochina wars (1945-1986) from different Vietnamese perspectives. Topics include experiences during French colonial rule; the anticolonial movements; periods of French and American military involvement up to 1975; the postwar society; and the post-*doi moi* society. Cross-listed with AST 160, HIST 184, and VNM 184. Credit is awarded for only one of the following: AST 160/HIST 184/SEAS 184/VNM 184 or AST 160S/HIST 184S/SEAS 184S/VNM 184S.

SEAS 184S The Vietnam Wars

(5) Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to Vietnamese history in the twentieth century. Covers the three Indochina wars (1945-1986) from different Vietnamese perspectives. Topics include experiences during French colonial rule; the anticolonial movements; periods of French and American military involvement up to 1975; the postwar society; and the post-*doi moi* society. Cross-listed with AST 160S, HIST 184S, and VNM 184S. Credit is awarded for only one of the following: AST 160/HIST 184/SEAS 184/VNM 184 or AST 160S/HIST 184S/SEAS 184S/VNM 184S.

SEAS 185 Southeast Asia, Prehistory to 1800

(4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Covers the major Southeast Asian historical periods and cultures. Includes prehistory, classical kingdoms, and early modern trading states. Considers the role of ancient stories, religious systems, technologies, and art forms in forming traditional Southeast Asian identities, as well as the influences on these identities from outside the region. Cross-listed with AST 126 and HIST 185.

SEAS 186 Modern Southeast Asia, 1800 to Present

(4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores the formation of modern Southeast Asian nations and cultures since 1800. Compares colonial and postcolonial experiences in the region. Studies the formation of nationalist movements and the relationship of nationalist history with traditional and local histories. Considers the role of the individual, modern media, and global trade in the near-present. Cross-listed with AST 129 and HIST 186.

SEAS 189 Encountering Vietnam

(5) Lecture, 6 hours; tutorial, 6 hours; project, 6 hours. Prerequisite(s): upper-division standing or consent of instructor. Focuses on literary and historical accounts of Vietnam. Utilizes translated travel writings from different genres and

eras. Proficiency in Vietnamese not required. Taught in Vietnam and offered only in summer. Cross-listed with AST 189, HIST 189, and VNM 189.

Graduate Courses

SEAS 200 Topics in Southeast Asian Studies (4)

Seminar, 3 hours; written work, 2 hours; term paper, 1 hour. Prerequisite(s): graduate standing or consent of instructor. An introduction to the world of Southeast Asia and the scholarly discussions about it, with an emphasis on cultural aspects, embedded in their historical context. Materials are in English. Course is repeatable as content changes to a maximum of 12 units. Cross-listed with CPLT 200.

SEAS 202 Southeast Asian Religions (4) Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Discusses different and dynamic aspects of religion in various Southeast Asian countries, including Indonesia, Malaysia, Thailand, Cambodia, Vietnam, and the Philippines. Explores contextualized readings featuring historical, anthropological, literary, and other disciplinary perspectives on this diverse region. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as topic changes up to 8 units.

SEAS 203 Southeast Asian Cultures (4) Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Surveys ethnographic literature on Southeast Asian cultures, with an emphasis on contemporary research. Covers anthropological approaches to the study of text, ritual, and performance practices; intercultural dynamics; the impact of colonialism and nationalism on traditional cultures; and globalization. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with ANTH 203.

SEAS 204 Approaches to Southeast Asian History (4) Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Introduces students to central historical problems, historiographical debates, materials, and theoretical approaches in Southeast Asian history. Readings each week focus on a different theme. Course is repeatable to a maximum of 8 units. Cross-listed with HIST 242.

SEAS 205 Literature of Southeast Asia (4) Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Explores themes and theories related to understanding literature and literary culture in Southeast Asia, insisting that the space of literature reaches beyond the text to include all disciplines. Students critically read, engage in, and question discourses of nationhood, identity, loss, mourning, history, and memoir. Course is repeatable as content changes to a maximum of 12 units. Cross-listed with CPLT 205.

SEAS 206 Southeast Asian Diasporic Literature and Film (4) Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Explores the contemporary works by Southeast Asian immigrants within the United States and France. Emphasizes the concept that the dynamic production of culture is a negotiation of power and an expression of resistance. Provides an interdisciplinary framework by utilizing historical as well as theoretical works to contextualize the cultural productions. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as content changes to a maximum of 12 units.

SEAS 243A Research Seminar in Southeast Asian History (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Discusses Southeast Asian topics from regional, comparative, and local perspectives. May be taken as a one- or two-quarter course (HIST 243A/SEAS 243A, HIST 243B/SEAS 243B). Graded In Progress (IP) until the last quarter is completed, at which time a final grade is assigned. After completing both

HIST 243A/SEAS 243A and HIST 243B/SEAS 243B, students may repeat the sequence once for credit; total credit for each course may not exceed 8 units. Cross-listed with HIST 243A.

SEAS 243B Research Seminar in Southeast Asian History (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor; HIST 243A/SEAS 243A. Discusses Southeast Asian topics from regional, comparative, and local perspectives. Students produce a substantial research paper that continues their work from HIST 243A/SEAS 243A. May be taken as a one- or two-quarter course (HIST 243A/SEAS 243A, HIST 243B/SEAS 243B). After completing both HIST 243A/SEAS 243A and HIST 243B/SEAS 243B, students may repeat the sequence once for credit; total credit for each course may not exceed 8 units. Cross-listed with HIST 243B.

SEAS 290 Directed Studies (1-6) Individual study, 3-18 hours. Prerequisite(s): consent of instructor and graduate advisor. Directed study to meet special curricular needs. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

SEAS 292 Concurrent Analytical Studies in Southeast Asian Studies (1-4) Individual study, 3-12 hours. Prerequisite(s): graduate standing; consent of instructor and graduate advisor. Taken concurrently with a 100-series course, but on an individual basis. Devoted to research, criticism, and written work at the graduate level related to the 100-series course. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

SEAS 297 Directed Research (1-6) Outside research, 3-18 hours. Prerequisite(s): consent of instructor; graduate standing. Individualized research under the sponsorship of specific faculty members. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.

SEAS 299 Research for the Thesis (1-12) Thesis, 3-36 hours. Prerequisite(s): consent of thesis director. Research and preparation for the thesis. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Vietnamese Courses

Foreign Language Placement Examination

A placement examination is required of all freshmen entering the College of Humanities, Arts, and Social Sciences who wish to meet the foreign language requirement with the same language taken in high school. Consult the quarterly Schedule of Classes and placementtest.ucr.edu for date and time.

Transfer students who have taken a college-level language course may not take the placement examination and should consult with their advisors. No college-level credit may be duplicated. See college placement examination policy.

Lower-Division Courses

VNM 001 Elementary Vietnamese (4) Lecture, 4 hours. Prerequisite(s): Student must take the Vietnamese placement examination. An introduction to the sound system and grammar of Vietnamese. Focuses on the development of the four skills: comprehension, speaking, reading, and writing. Classes are conducted in Vietnamese as often as possible. Credit is awarded for only one of the following sequences: VNM 001, VNM 002, and VNM 003; VNM 020A and VNM 020B.

VNM 002 Elementary Vietnamese (4) Lecture, 4 hours. Prerequisite(s): VNM 001 with a grade of "C-" or better or equivalent or a sufficiently high test score on the Vietnamese placement examination as determined by the department faculty. An introduction to the

sound system and grammar of Vietnamese. Focuses on the development of the four skills: comprehension, speaking, reading, and writing. Classes are conducted in Vietnamese as often as possible. Credit is awarded for only one of the following sequences: VNM 001, VNM 002, and VNM 003; VNM 020A and VNM 020B.

VNM 003 Elementary Vietnamese (4) Lecture, 4 hours. Prerequisite(s): VNM 002 with a grade of "C-" or better or equivalent or a sufficiently high test score on the Vietnamese placement examination as determined by the department faculty. An introduction to the sound system and grammar of Vietnamese. Focuses on the development of the four skills: comprehension, speaking, reading, and writing. Classes are conducted in Vietnamese as often as possible. Credit is awarded for only one of the following sequences: VNM 001, VNM 002, and VNM 003; VNM 020A and VNM 020B.

VNM 004 Intermediate Vietnamese (4) Lecture, 4 hours. Prerequisite(s): VNM 003 with a grade of "C-" or better or VNM 020B with a grade of "C-" or better or equivalent or a sufficiently high test score on the Vietnamese placement examination as determined by the department faculty. Emphasizes further development of vocabulary, reading, writing, comprehension, and speaking skills. Provides foundation for recognizing, formulating, and articulating complex ideas.

VNM 005 Intermediate Vietnamese (4) Lecture, 4 hours. Prerequisite(s): VNM 004 or equivalent or a sufficiently high test score on the Vietnamese placement examination as determined by the department faculty. Emphasizes further development of vocabulary, reading, writing, comprehension, and speaking skills. Provides foundation for recognizing, formulating, and articulating complex ideas.

VNM 020A Beginning Vietnamese for Advanced Heritage Learners (4) Lecture, 4 hours. Prerequisite(s): Student must take the Vietnamese placement examination. Structured for the heritage student at the beginning level who has advanced comprehension and some speaking skills. Focuses on developing language skills and improving existing reading and writing skills. Credit is awarded for only one of the following sequences: VNM 001, VNM 002, and VNM 003; VNM 020A and VNM 020B.

VNM 020B Beginning Vietnamese for Advanced Heritage Learners (4) Lecture, 4 hours. Prerequisite(s): VNM 020A with a grade of "C-" or better or equivalent or a sufficiently high test score on the Vietnamese placement examination as determined by the department faculty. Builds upon course work covered in VNM 020A. Includes integrating situational lessons with vocabulary, sentence patterns, grammar, and socio-linguistics used in daily life. Credit is awarded for only one of the following sequences: VNM 001, VNM 002, and VNM 003; VNM 020A and VNM 020B.

VNM 064 Introduction to Vietnamese and Diasporic Film Culture (4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. Engages in critical viewing strategies and analytical visual critique. Explores the revival of film production in Vietnam following the Vietnam War, with a focus on the means of production, state control, and international distribution. Readings are in translation; classes conducted in English. Cross-listed with AST 064, MCS 049, and SEAS 064.

Upper-Division Courses

VNM 101 Advanced Vietnamese (4) Lecture, 3 hours; written work, 3 hours. Prerequisite(s): VNM 005 or equivalent or a sufficiently high test score on the Vietnamese placement examination as determined by the department faculty or consent of instructor. Designed to develop fluency in Vietnamese to the level of intellectual conversation. Emphasis is on reading and writing of Vietnamese literature and criticism, visual culture, and discussion of current issues of Vietnamese society.

VNM 162 Vietnamese Literary History (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing. A historical analysis of Vietnamese literature from its oral tradition to contemporary fiction. Follows the formation of the nation-state and the subsequent struggles with the Chinese, French, Japanese, and Americans. No knowledge of Vietnamese required. Readings are in translation or bilingual editions. Classes are conducted in English. Cross-listed with AST 162, HIST 187, and SEAS 162. **Beevi Lam**

VNM 164 Vietnamese American Culture (4) Lecture, 3 hours; written work, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A study of the pervasive aspects of Vietnamese American culture. Includes shared histories, acculturation patterns, class diversity, identity struggles, community-building literary and cultural production, youth issues, and cultural survival. Also introduces foundational literature, visual culture, and scholarship in the field. Cross-listed with AST 164 and SEAS 164.

VNM 165 (E-Z) Themes in Vietnamese Literature (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An exploration of Vietnamese literature in translation as seen through the lens of a particular theme or issue. Focuses on the implications of gender and sexuality on nation formation. All materials are read or viewed in English. E. Women and War. Cross-listed with AST 165 (E-Z), SEAS 165 (E-Z), and WMST 165 (E-Z).

VNM 166 Vietnam and the Philippines (4) Lecture, 3 hours; written work, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to the comparative national histories of Vietnam and the Philippines by way of great literary works in various genres including poetry, short fiction, and novels. All materials are read in English. Cross-listed with AST 166, CPLT 166, and SEAS 166.

VNM 184 The Vietnam Wars (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to Vietnamese history in the twentieth century. Covers the three Indochina wars (1945-1986) from different Vietnamese perspectives. Topics include experiences during French colonial rule; the anticolonial movements; periods of French and American military involvement up to 1975; the postwar society; and the post-*doi moi* society. Cross-listed with AST 160, HIST 184, and SEAS 184. Credit is awarded for only one of the following: AST 160/HIST 184/SEAS 184/VNM 184 or AST 160S/HIST 184S/SEAS 184S/VNM 184S.

VNM 184S The Vietnam Wars (5) Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to Vietnamese history in the twentieth century. Covers the three Indochina wars (1945-1986) from different Vietnamese perspectives. Topics include experiences during French colonial rule; the anticolonial movements; periods of French and American military involvement up to 1975; the postwar society; and the post-*doi moi* society. Cross-listed with AST 160S, HIST 184S, and SEAS 184S. Credit is awarded for only one of the following: AST 160/HIST 184/SEAS 184/VNM 184 or AST 160S/HIST 184S/SEAS 184S/VNM 184S.

VNM 189 Encountering Vietnam (5) Lecture, 6 hours; tutorial, 6 hours; project, 6 hours. Prerequisite(s): upper-division standing or consent of instructor. Focuses on literary and historical accounts of Vietnam. Utilizes translated travel writings from different genres and eras. Proficiency in Vietnamese not required. Taught in Vietnam and offered only in summer. Cross-listed with AST 189, HIST 189, and SEAS 189.

Civilization

Committee in Charge

Thomas Scanlon, Ph.D. *Classics/Comparative Ancient Civilizations/Comparative Literature*
Wendy J. Raschke, Ph.D. *Classics/Comparative Literature*
Theda Shapiro, Ph.D. *French/Comparative Literature*
Nicoletta Tinozzi Mehrmand, Ph.D. *Italian*
Yang Ye, Ph.D. *Chinese/Civilizations/Comparative Literature*
Stephen E. Cullenberg, Ph.D.
Dean, College of Humanities, Arts, and Social Sciences, ex officio

The Civilization concentration is available in French and Russian Studies. See specific requirements under each respective section.

Lower-Division Courses

EUR 042 Italian Americans: Voices and Visions (4) Lecture, 1.5 hours; discussion, 1.5 hours; screening, 2 hours; written work, 1 hour. Prerequisite(s): none. A study of the Italian American experience as seen through major works of Italian and Italian American writers and filmmakers. Covers the 1950s to the present. No knowledge of Italian required. Cross-listed with ITAL 042.

EUR 044 Mafia and Malavita in Italian Literature and Film (4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. A study of the history of malavita in the Italian peninsula. Explores topics from mischievous transgression to organized crime and Mafia, as presented through the works of renowned Italian writers and directors. No knowledge of Italian required. Cross-listed with ITAL 044.

EUR 047 Introduction to Russian Culture (4) Lecture, 3 hours; consultation, 1 hour. A multimedia introduction to Russian culture. Emphasis on Russian masterpieces in art, architecture, dance, theatre, literature, film, and music which are characteristic of the culture and life of their period. All work is done in English. Strongly recommended for Russian majors.

Upper-Division Courses

EUR 111A Survey of Russian Civilization (4) Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Covers pre-twentieth century Russian music, architecture, and art. Any course within the EUR 111A, EUR 111B, and EUR 111C sequence may be taken independently. No knowledge of Russian is necessary.

EUR 111B Survey of Russian Civilization (4) Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Covers Russian symbolism and the Great Emigration. Any course within the EUR 111A, EUR 111B, and EUR 111C sequence may be taken independently. No knowledge of Russian is necessary.

EUR 111C Survey of Russian Civilization (4) Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Covers Soviet culture. Any course within the EUR 111A, EUR 111B, and EUR 111C sequence may be taken independently. No knowledge of Russian is necessary.

EUR 115 (E-Z) French Studies (4) Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Varying topics relating to the literature, thought, and culture of France. Possible topics might include: the Paris mystique, French literary existentialism, individualism in the Renaissance. F: Paris; M: Medieval Women in France. No knowledge of French is necessary.

EUR 119 (E-Z) Topics in Italian Culture (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. In-depth study of major topics in Italian institutions, society, and culture. E. Contemporary Italy; M. Making of Italian Arts; R. Risorgimento: Birth of the Italian Nation; U. Italian Urban Culture. No knowledge of Italian is required.

EUR 120 Berlin Metropolis in Literature, Film, Music, and Art (4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to the metropolis Berlin as a gateway between the East and West. Explores topography of the city through film, art, music, and literary texts. Considers Berlin's dramatic transformations as a microcosm of Germany and Europe's troubled history in the twentieth century. Course conducted in English. Cross-listed with AHS 120, CPLT 111, GER 111, and MCS 178.

EUR 124 Nordic Mythology, Folklore, and Fairytales (4) Seminar, 3 hours; extra reading, 1 hour; written work, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. Introduces the representation of animals, plants, and other appearances of the natural world such as sunrise and sunset in European creation and destruction mythology, fairytales, and folklore. Cross-listed with GER 124.

EUR 137 Passions, Apparitions, and Automata (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introductory study of German Romanticism from its origins in Goethe to its development in Hoffmann. Topics include madness, sexual desire, doppelgänger, homicide, and *automata*. All readings are in English; selected readings are in German for German majors and minors. Cross-listed with CPLT 137 and GER 137.

EUR 192 Workshop in European Languages (1) Workshop, 1 hour. Prerequisite(s): concurrent enrollment in an upper-division course in European literature or culture that is taught in English. Taken in conjunction with an upper-division course in European literature or culture, provides discussion and alternative assignments in the language of the student's emphasis. Course is repeatable to a maximum of 6 units.

Students are encouraged to consider opportunities for study through the Education Abroad Program (EAP). This is an excellent opportunity to become deeply familiar with another country and its culture while earning academic units towards graduation. Students should plan study abroad well in

advance to ensure that the courses taken fit with their overall program at UCR. Consult the departmental student affairs officer for assistance. For further details, visit UCR's Off Campus Academic Experiences at eapoap.ucr.edu or call (951)827-2508.

See Education Abroad Program in the Educational Opportunities section of this catalog. A list of participating countries is found under Education Abroad Program in the Programs and Courses section. Search for programs by specific areas at eap.ucop.edu/ourprograms.

Minor

The Italian Studies minor offers students the opportunity to attain an advanced level of proficiency in Italian language while taking a number of discipline-based courses that concentrate on Italian themes. The minor complements liberal arts degrees in many aspects of Western or European studies, including art history, history, philosophy, political science, and religious studies.

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog.

Requirements for the minor consist of 24 units, distributed as follows:

1. Twelve (12) units of ITAL 101A and ITAL 101B and ITAL 101C
2. Eight (8) units of upper-division courses in Italian literature, film and/or culture offered by the Department of Comparative Literature and Foreign Languages.
3. Four (4) units of upper-division courses in Italian art history, history, film, theatre, or another related discipline offered by other departments and approved by the student's advisor.

Foreign Language Placement Examination

A placement examination is required of all freshmen entering the College of Humanities, Arts, and Social Sciences who wish to meet the foreign language requirement with the same language taken in high school. Consult the quarterly Schedule of Classes and placementtest.ucr.edu for date and time. Transfer students who have taken a college-level language course may not take the placement examination and should consult with their advisors. No college-level credit may be duplicated. See college placement examination policy.

Lower-Division Courses

ITAL 001 Elementary Italian (4) Lecture, 4 hours. Prerequisite(s): none. An introduction to the sound system and grammar of Italian focusing on the development of the four skills: understanding, speaking, reading, and writing. Classes conducted in Italian insofar as possible. Audio-lingual and media-based learning materials available in the Media Library. Credit is awarded for only one of the following sequences: ITAL 001, ITAL 002, and ITAL 003; ITAL 020A and ITAL 020B.

ITAL 002 Elementary Italian (4) Lecture, 4 hours. Prerequisite(s): ITAL 001 with a grade of "C-" or better or equivalent. An introduction to the sound system and grammar of Italian focusing on the development of the four skills: understanding, speaking, reading, and

writing. Classes conducted in Italian insofar as possible. Audio-lingual and media-based learning materials available in the Media Library. Credit is awarded for only one of the following sequences: ITAL 001, ITAL 002, ITAL 003; ITAL 20A and ITAL 20B.

ITAL 003 Elementary Italian (4) Lecture, 4 hours. Prerequisite(s): ITAL 002 with a grade of "C-" or better or equivalent. An introduction to the sound system and grammar of Italian focusing on the development of the four skills: understanding, speaking, reading, and writing. Classes conducted in Italian insofar as possible. Audio-lingual and media-based learning materials available in the Media Library. Credit is awarded for only one of the following sequences: ITAL 001, ITAL 002, ITAL 003; ITAL 020A and ITAL 020B.

ITAL 004 Intermediate Italian (4) Lecture, 4 hours. Prerequisite(s): ITAL 003 or ITAL 020B with a grade of "C-" or better or equivalent. Continued study of the basic grammatical structures of Italian emphasizing competency in reading, writing, and speaking. Involves reading varied materials (literary and journalistic) dealing with contemporary Italy.

ITAL 020A Italian for Spanish Speakers (4) Lecture, 4 hours. Prerequisite(s): appropriate native or heritage proficiency in Spanish as determined by the department faculty. Student must take the Spanish placement examination. Introduction to the fundamental skills of listening, speaking, reading, and writing Italian for students with proficiency in Spanish. Emphasizes comparison of Italian and Spanish grammatical constructions. Admission by placement examination only. Credit is awarded for only one of the following sequences: ITAL 001, ITAL 002, and ITAL 003; ITAL 020A and ITAL 020B.

ITAL 020B Italian for Spanish Speakers (4) Lecture, 4 hours. Prerequisite(s): ITAL 020A with a grade of "C-" or better or a sufficiently high test score on both the Italian and Spanish language placement examinations as determined by the department faculty. Introduction to the fundamental skills of listening, speaking, reading, and writing Italian for students with proficiency in Spanish. Emphasizes comparison of Italian and Spanish grammatical constructions. Credit is awarded for only one of the following sequences: ITAL 001, ITAL 002, and ITAL 003; ITAL 020A and ITAL 020B.

ITAL 042 Italian Americans: Voices and Visions (4) Lecture, 1.5 hours; discussion, 1.5 hours; screening, 2 hours; written work, 1 hour. Prerequisite(s): none. A study of the Italian American experience as seen through major works of Italian and Italian American writers and filmmakers. Covers the 1950s to the present. No knowledge of Italian required. Cross-listed with EUR 042.

ITAL 043 Italian Cuisine and Literature through the Centuries (4) Lecture, 3 hours; screening, 2 hours; extra reading, 1 hour. Analysis of the relationship between food and literature in Italian culture through the study of gastronomic and literary texts from the Roman to present times. Films are used to enrich this theme.

ITAL 044 Mafia and Malavita in Italian Literature and Film (4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. A study of the history of malavita in the Italian peninsula. Explores topics from mischievous transgression to organized crime and Mafia, as presented through the works of renowned Italian writers and directors. No knowledge of Italian required. Cross-listed with EUR 044.

ITAL 045 Italian Cinema (4) Lecture, 1.5 hours; discussion, 1.5 hours; screening, 3 hours. Prerequisite(s): none. Covers major works of the Italian cinema from Neo-Realism to the present, with emphasis on their historical evolution and representation of major elements of Italian culture. Knowledge of Italian not required. Cross-listed with MCS 044.

ITAL 090 Special Studies (1-3) To be taken with the consent of the chair of the department as a means

of meeting special curricular problems. Course is repeatable.

Upper-Division Courses

ITAL 101A Advanced Italian (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ITAL 004 with a grade of "C" or better or equivalent. Advanced Italian grammar and conversation. Emphasizes mastery of the subtleties of the language in conversation, reading, and writing.

ITAL 101B Advanced Italian (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ITAL 101A. Advanced Italian grammar and conversation. Emphasizes mastery of the subtleties of the language in conversation, reading, and writing.

ITAL 101C Advanced Italian (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ITAL 101B or equivalent. Advanced Italian grammar and conversation. Emphasizes mastery of the subtleties of the language in conversation, reading, and writing.

ITAL 125 (E-Z) Studies in Italian Literature (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): ITAL 101A or consent of instructor. Selected topics in Italian literature. Provides detailed study of subjects and periods relevant to Italian culture. Must have good reading and aural comprehension ability in Italian. G. The Difficulties of Love in Italian Literature and Culture; S. Italian Literature of the Holocaust; T. Italian Theatre. Credit is awarded for only one of ITAL 125T or ITAL 150.

ITAL 139 The Divine Comedy (4) Lecture, 3 hours; consultation, 1 hour. A close reading of Dante's *Divine Comedy*, using a bilingual edition. Attention is paid to conceptual and aesthetic questions. Although the work is read in English, students without previous knowledge of Italian are given some instruction in it to enable them to understand parts of the original.

ITAL 150 Italian Theatre (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A study of the development of Italian theatre from the commedia dell'arte to the present. Discusses works by Ruzzante, Machiavelli, Metastasio, Goldoni, Alfieri, Verga, Pirandello, Fo, and Rame. Includes videos of plays, melodramas, and operas. No knowledge of Italian required. Credit is awarded for only one of ITAL 125T or ITAL 150.

ITAL 158 Italian Literature in the Period of Unification (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A study of nineteenth-century Italian literature. Emphasis on the pre-Unification, "Risorgimento", period is through the works of Foscolo, Leopardi, Pellico and Manzoni. No knowledge of Italian is required.

ITAL 162 Contemporary Italian Women Writers in Translation (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Study of works by contemporary Italian women writers from critical, cultural, and historical perspectives. No knowledge of Italian is required.

ITAL 185 Modern and Contemporary Italian Literature in Translation (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Considers selected works by authors who exemplify major cultural and literary trends in Italy from the period of unification (1860s) to the present. Readings are supplemented by viewing of films. No knowledge of Italian is required.

ITAL 190 Special Studies (1-5) To be taken with the consent of the chair of the department as a means of meeting special curricular problems. Course is repeatable.

Graduate Courses

CPLT 290 Directed Studies (1-6) Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CPLT 290 (E-Z) Directed Studies (1-6) Outside research, 3-18 hours. Prerequisite(s): graduate standing; consent of instructor and department chair. To be taken as a means of meeting special curricular needs in literature. E. English; F. French; G. German; H. Greek; I. Italian; J. Japanese; K. Chinese; L. Latin; M. Latin American; R. Russian; S. Spanish; T. Scandinavian; U. American; V. Slavic. Segments are repeatable.

ITAL 292 Concurrent Analytical Studies (2) Outside research, 6 hours. Prerequisite(s): consent of instructor; concurrent enrollment in Italian 100-series course. To be taken on an individual basis. Student will complete a graduate paper based on research related to the Italian 100-series course. May be repeated with different topic.

Professional Courses

CPLT 301 Teaching of Foreign Language at the College Level (4) Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing, or senior standing with consent of instructor. Covers first and second language acquisition; general models of L2 learning; learning different types of grammar; learning other components of language: acquisition of pronunciation, vocabulary, and discourse; multilingual societies and the goals of language teaching; and implications of second language acquisition research for the foreign language classroom. Graded Satisfactory (S) or No Credit (NC).

ITAL 302 Teaching Practicum (1-4) Practicum, 3-12 hours. Prerequisite(s): CPLT 301 or equivalent; graduate standing; employment as a teaching assistant or associate in. Supervised teaching in lower-division courses. Required of all teaching assistants in Italian. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Major

The Chinese Major enables a student to acquire proficiency in the Chinese language and to study Chinese literature, culture, and society using interdisciplinary methods.

1. Lower-division requirements (12 units plus language proficiency)

- Proficiency in Chinese through the intermediate level (CHN 006 or its equivalent)
- Four (4) units from lower-division lecture courses on Chinese literature, culture, and film: AST 030/CHN 030, AST 040/CHN 040, AST 046/CHN 046, AST 048/CHN 048, and any other lower-division lecture courses on Chinese literature, culture, and film chosen in consultation with the student's advisor.
- Eight (8) units: CPLT 001 or CPLT 001W, CPLT 002

2. Upper-division requirements (36 units)

- Twelve (12) units in Chinese language from CHN 101A, CHN 101B, CHN 101C, CHN 102, CHN 105, CHN 108, CHN 110 (E-Z), CHN 115 (E-Z)
- Twelve (12) units in Chinese literature, culture, and film from AST 107/CHN 107/RLST 107, AST 135/CHN 135, AST 136/CHN 136, AST 142/CHN 142, AST 145/CHN 141/CLA 141/CPAC 141/POSC 140, AST 148/CHN 148, AST 185/CHN 185/MCS 169, CHN 102, CHN 104, CHN 105, CHN 106, CHN 108, CHN 110 (E-Z), CHN 115 (E-Z), CHN 134, CHN 137, CHN 190, CPLT 142E/WMST 142E, and any other upper-division lecture courses on Chinese literature, culture, and film chosen in consultation with the student's advisor.
- Eight (8) units in China-related upper-division courses from other departments (with adviser's consent), can include the courses listed under (b).
- CPLT 193 (4) units. (CPLT 196 strongly recommended but not required)

CHN 132/AST 132/CLA 132/CPAC 132, CHN 134, CHN 135/AST 135, CHN 136/AST 136, CHN 137, CHN 141/AST 145/CLA 141/CPAC 141/POSC 140, CHN 142/AST 142, CHN 148/AST 148, CHN 185/AST 185/MCS 169, CHN 190 CPLT 142E/WMST 142E,

- Four (4) units in Asian literatures and cultures: can be chosen from all the upper-division lecture courses on Asian literature and culture from the department as well as China-related upper-division courses from other departments (with adviser's consent), including the courses listed under (b).

Chinese Courses

Foreign Language Placement Examination

A placement examination is required of all freshmen entering the College of Humanities, Arts, and Social Sciences who wish to meet the foreign language requirement with the same language taken in high school. Consult the quarterly Schedule of Classes and placementtest.ucr.edu for date and time. Transfer students who have taken a college-level language course may not take the placement examination and should consult with their advisors. No college-level credit may be duplicated. See college placement examination policy.

Lower-Division Courses

CHN 001 First-Year Chinese (4) Lecture, 4 hours. Prerequisite(s): Student must take the Chinese placement examination. An introduction to the sound system and grammar of Chinese. Focuses on the development of the four skills: understanding, speaking, reading, and writing. Classes are conducted in Chinese as much as possible. Audio-lingual learning materials are available in the language laboratory. Credit is awarded for only one of the following sequences: CHN 001, CHN 002, CHN 003, and CHN 004; CHN 001, CHN 002, and CHN 020B; CHN 020A and CHN 020B.

CHN 002 First-Year Chinese (4) Lecture, 4 hours. Prerequisite(s): CHN 001 with a grade of "C-" or better or equivalent or a sufficiently high test score on the Chinese placement examination as determined by the department faculty. An introduction to the sound system and grammar of Chinese. Focuses on the development of the four skills: understanding, speaking, reading, and writing. Classes are conducted in Chinese as much as possible. Audio-lingual learning materials are available in the language laboratory. Credit is awarded for only one of the following sequences: CHN 001, CHN 002, CHN 003, and CHN 004; CHN 001, CHN 002, and CHN 020B; CHN 020A and CHN 020B.

CHN 003 First-Year Chinese (4) Lecture, 4 hours. Prerequisite(s): CHN 002 with a grade of "C-" or better or equivalent or a sufficiently high test score on the Chinese placement examination as determined by the department faculty. An introduction to the sound system and grammar of Chinese. Focuses on the development of the four skills: understanding, speaking, reading, and writing. Classes are conducted in Chinese as much as possible. Audio-lingual learning materials are available in the language laboratory. Credit is awarded for only one of the following sequences: CHN 001, CHN 002, CHN 003, and CHN 004; CHN 001, CHN 002, and CHN 020B; CHN 020A and CHN 020B.

CHN 004 Second-Year Chinese (4) Lecture, 4 hours. Prerequisite(s): CHN 003 with a grade of "C-" or

Languages and Literatures/Chinese Minor

1. Lower-division requirements (4 units plus language proficiency)

- Proficiency in Chinese through the intermediate level (second year)
- Four (4) units from lower-division lecture courses on Chinese literature and culture: CHN 030/AST 030, CHN 040/AST 040, CHN 046/AST 046 or CHN 046W/AST 046W, CHN 048/AST 048

2. Upper-division requirements (20 units)

- 8 upper-division units in Chinese language from CHN 101A, CHN 101B, CHN 101C, CHN 102, CHN 105, CHN 108, CHN 110 (E-Z), CHN 115 (E-Z)
- Eight (8) units in Chinese literature and culture from CHN 104, CHN 105, CHN 106/PHIL 123, CHN 107/AST 107/RLST 107, CHN 108, CHN 110 (E-Z), CHN 115 (E-Z), CHN 118 (E-Z)/AST 118 (E-Z),

better or equivalent or a sufficiently high test score on the Chinese placement examination as determined by the department faculty. Provides continuing development of the four skills: understanding, speaking, reading, and writing. Lectures are conducted primarily in Mandarin. Credit is awarded for only one of the following sequences: CHN 001, CHN 002, CHN 003, and CHN 004; CHN 001, CHN 002, and CHN 020B; CHN 020A and CHN 020B.

CHN 005 Second-Year Chinese (4) Lecture, 4 hours. Prerequisite(s): CHN 004 or CHN 020B or equivalent or a sufficiently high test score on the Chinese placement examination as determined by the department faculty. Continued development of the four skills: understanding, speaking, reading, and writing. Lectures are conducted primarily in Mandarin. Credit is awarded for only one of CHN 025 or the CHN 005 and CHN 006 sequence.

CHN 006 Second-Year Chinese (4) Lecture, 4 hours. Prerequisite(s): CHN 005 or equivalent or a sufficiently high test score on the Chinese placement examination as determined by the department faculty. Continued development of the four skills: understanding, speaking, reading, and writing. Lectures are conducted primarily in Mandarin. Credit is awarded for only one of CHN 025 or the CHN 005 and CHN 006 sequence.

CHN 020A First-Year Chinese for Heritage Learners (4) Lecture, 4 hours. Prerequisite(s): Student must take the Chinese placement examination. A first-year Mandarin Chinese course designed for heritage learners who have some proficiency in listening comprehension and speaking but are unable to read and write in Mandarin. Credit is awarded for only one of the following sequences: CHN 001, CHN 002, CHN 003, and CHN 004; CHN 001, CHN 002, and CHN 020B; CHN 020A and CHN 020B.

CHN 020B First-Year Chinese for Heritage Learners (4) Lecture, 4 hours. Prerequisite(s): CHN 002 with a grade of "C-" or better or CHN 020A with a grade of "C-" or better or equivalent or a sufficiently high test score on the Chinese placement examination as determined by the department faculty. A first-year Mandarin Chinese course designed for heritage learners who have some proficiency in listening comprehension and speaking but are unable to read and write in Mandarin. Credit is awarded for only one of the following sequences: CHN 001, CHN 002, CHN 003, and CHN 004; CHN 001, CHN 002, and CHN 020B; CHN 020A and CHN 020B.

CHN 025 Accelerated Second-Year Chinese (4) Lecture, 4 hours. Prerequisite(s): CHN 004 or CHN 020B or equivalent or a sufficiently high test score on the Chinese placement examination as determined by the department faculty. Designed for students with advanced comprehension and speaking skills. Focuses on improving reading and writing skills. Credit is awarded for only one of CHN 025 or the CHN 005 and CHN 006 sequence.

CHN 030 Introduction to Chinese Civilization (5) Lecture, 3 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): none. An introduction to Chinese civilization through an interplay of philosophical, historical, religious, and literary readings from the ancient times through the modern age. Uses audiovisual media. All work is in English. Cross-listed with AST 030. **Ye**

CHN 040 Masterworks of Chinese Literature (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): none. Reading and discussion of selected great works of Chinese literature (in English translation) with attention to cultural contexts. Various critical methods and approaches are used. Cross-listed with AST 040. **Wu, Ye**

CHN 046 Responses to Political Repression in Modern Chinese Literature and Film (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): none. An examina-

tion of the various responses to political repression in China during the second half of the twentieth century through selected literary and artistic representations. Cross-listed with AST 046. Credit is awarded for only one of CHN 046/AST 046 or CHN 046W/AST 046W.

CHN 046W Responses to Political Repression in Modern Chinese Literature and Film (4) Lecture, 2 hours; discussion, 1 hour; written work, 3 hours. Prerequisite(s): ENGL 001B with a grade of "C" or better or consent of instructor. An examination of the various responses to political repression in China during the second half of the twentieth century through selected literary and artistic representations. Fulfills the third-quarter writing requirement for students who earn a grade of "C" or better for courses that the Academic Senate designates, and that the student's college permits as alternatives to English 001C. Cross-listed with AST 046W. Credit is awarded for only one of CHN 046/AST 046 or CHN 046W/AST 046W.

CHN 048 Chinese Cinema (4) Lecture, 2 hours; discussion, 1 hour; screening, 2 hours; outside research, 1 hour. Prerequisite(s): none. Study of selected films from China and Taiwan with attention to cultural context. Questions addressed may include the following: What do we look for in a film? What are the film's interrelations with theatre, photography, and literature? How do we understand the film as an art form? Cross-listed with AST 048. **Ye**

CHN 090 Special Studies (1-5) Individual study, 3-15 hours. To be taken with the consent of the Chair of the Department as means of meeting special curricular problems in either language or literature. Course is repeatable.

Upper-Division Courses

CHN 101A Third-Year Chinese (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): CHN 006 or CHN 025 or equivalent. Further development of the four skills: understanding, speaking, reading, and writing; with an emphasis on reading and writing. Classes conducted in Mandarin.

CHN 101B Third-Year Chinese (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): CHN 101A or equivalent or consent of instructor. Further development of the four skills: understanding, speaking, reading, and writing; with an emphasis on reading and writing. Classes conducted in Mandarin.

CHN 101C Third-Year Chinese (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): CHN 101B or equivalent or consent of instructor. Further development of the four skills: understanding, speaking, reading, and writing; with an emphasis on reading and writing. Classes conducted in Mandarin.

CHN 102 Fourth-Year Chinese (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): CHN 101C or equivalent. Reinforces speaking, reading, and writing skills through study of a broad range of texts and various styles of writing. Course is repeatable as content changes to a maximum of 8 units.

CHN 104 Introduction to Classical Chinese Texts (4) Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): CHN 003 or equivalent or consent of instructor. Introduction to classical Chinese philosophical and historical texts. Readings of primary source materials and analysis of grammar and usage. Class is conducted in English.

CHN 105 Classical Chinese Prose (4) Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): CHN 101C. Close reading of selected texts from the Han and pre-Han period, chosen to illustrate the main features of the Chinese *Ku-wen* (classical prose). **Ye**

CHN 106 Readings in Classical Chinese Philosophy (4) Lecture, 3 hours; written work, 3 hours. Prerequisite(s): CHN 104 or consent of instructor. Introduces selections from key philosophical texts in classical

Chinese. Focuses on a combination of Chinese reading and philosophical understanding. Cross-listed with PHIL 123.

CHN 107 Taoist Traditions (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): AST 030/CHN 030 or upper-division standing or consent of instructor. A survey of the ancient mystical and philosophical aspects of Taoism as well as the living religious tradition, their relationships to each other, and their expression in Chinese culture and civilization. Topics include the Tao Te Ching, the *Chuang-tzu*, the Taoist canon, meditation, immortality, alchemy, and ritual. Cross-listed with AST 107 and RLST 107. **Raphals**

CHN 108 Introduction to Classical Chinese Poetry (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): CHN 102 or equivalent. Explores the representative texts in various genres and forms that illustrate the development of classical Chinese poetry from its origin through the premodern age. Course conducted primarily in Chinese. **Ye**

CHN 110 (E-Z) Readings in Twentieth-Century Chinese Literature (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): CHN 102 or equivalent. Presents the works of major authors of twentieth-century Chinese literature. Course conducted in Chinese. E. Contemporary Chinese Fiction; M. Modern Chinese Fiction; S. Modern Chinese Poetry; T. Love in Taiwanese and Chinese Stories; W. Modern Chinese Prose. Credit is awarded for only one of CHN 110E or CHN 137 and for only one of CHN 110M or CHN 134. **Wu, Ye**

CHN 115 (E-Z) Readings in Thirteenth- to Nineteenth-Century Chinese Literature (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): CHN 102 or equivalent. Covers vernacular literature from the Yuan to the Qing dynasties. Course conducted in Chinese. G. Honglou meng; M. Ming Novel; Q. Qing Novel; S. The Short Story; Y. Yuan Drama. **Wu**

CHN 118 (E-Z) Masterworks of Chinese Literature in Translation (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines canonical Chinese works of literature in translation. Conducted in English. E. The Ancient Times Through the Early Imperial Dynasties. Cross-listed with AST 118 (E-Z).

CHN 132 Medical Traditions in China and Greece (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Comparative examination of the early development of Western medical traditions in classical Greece and the origins and development of the Chinese medical systems now referred to as traditional Chinese medicine, with specific attention to their cultural and social contexts. Cross-listed with AST 132, CLA 132, and CPAC 132.

CHN 134 Modern Chinese Literature in Translation (4) Seminar, 2 hours; lecture, 1 hour; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to major works of Chinese fiction, drama, and poetry from the first half of the twentieth century. Considers literary quality and technique, as well as the social and political ideas of Chinese writers during a turbulent time in China's history. Credit is awarded for only one of CHN 110M or CHN 134.

CHN 135 Great Novels of China (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines the social, philosophical, and aesthetic features in major Ming-Qing novels through critical reading and analysis of literature in translation. No knowledge of Chinese required. Cross-listed with AST 135. **Wu**

CHN 136 Family and Gender in the Chinese Short Story (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines a broad array of short stories from the Tang to the Qing dynasties (approximately

182 / Programs and Courses

ninth to eighteenth century). Investigates love, marriage, family, gender dynamics, and the representation of women in Chinese literature. No knowledge of Chinese required. Cross-listed with AST 136. **Wu**

CHN 137 Contemporary Chinese Literature in Translation (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to important works of fiction, drama, poetry, and reportage from the mid-twentieth century to the present. Includes readings from mainland China, as well as writings from Taiwan and other overseas communities. Credit is awarded for only one of CHN 110E or CHN 137.

CHN 141 Militarism and Hegemony in the Ancient World (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Comparative study of ancient warfare and hegemony in two or more civilizations of the ancient world. Perspectives may include social and political contexts, gender and war, acquisition of empire, religious wars, and weapons, strategies and tactics in theory and practice. Study of primary source material in texts and visual arts. Cross-listed with AST 145, CLA 141, CPAC 141, and POSC 140.

CHN 142 Chuang-tzu (4) Lecture, 3 hours; outside research, 1 hour; extra reading, 1 hour; term paper, 1 hour. Prerequisite(s): RLST 005 or RLST 005H or AST 107/CHN 107/RLST 107 or consent of instructor. An examination of chaos, epistemological, and linguistic relativism, fate, skill, and the character of the sage in the Chinese Taoist text *Chuang-tzu*. Discusses the structure and style of this literary masterpiece. Students with knowledge of classical Chinese may arrange additional work through special studies. Cross-listed with AST 142 and RLST 142. **Nyitray**

CHN 148 Chinese Poetry and Poetics in Translation (4) Lecture, 2 hours; discussion, 1 hour; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examination of traditional Chinese poetry through the study of selected major texts, emphasizing forms, themes, and Chinese poetics in its close relation to the development of Chinese literature. Classes are conducted in English. Cross-listed with AST 148. **Ye**

CHN 185 New Chinese Cinema (4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A study of representative films from the People's Republic of China, with a focus on those made during the last decade. Conducted in English; most films have English subtitles. Cross-listed with AST 185 and MCS 169. **Ye**

CHN 190 Special Studies (1-5) Individual study, 3-15 hours. Prerequisite(s): upper-division standing or consent of instructor. To be taken with the consent of the Chair of the Department as a means of meeting special curricular problems in either language or literature. Course is repeatable.

CHN 195 Senior Thesis (2-4) Thesis, 6-12 hours. Prerequisite(s): senior standing; consent of instructor. Individual research and preparation of a thesis completed under the supervision of a faculty member. Course is repeatable to a maximum of 12 units.

Languages and Literatures/Classical Studies

College of Humanities, Arts, and Social Sciences

Michele Salzman, Ph.D., Chair

Committee in Charge

Jozef Muller (Philosophy)

Benjamin King, non-voting
Wendy Raschke, non-voting
Thomas Scanlon (Comparative Literature & Foreign Languages)
Stephen E. Cullenberg, Ph.D.
Dean, College of Humanities, Arts, and Social Sciences, ex officio

The objective of the B.A. in Classical Studies is the furthering of knowledge of classical civilization through two emphases: the study of Greek and/or Latin language(s) and literature(s) and the study of courses in English translation on topics including classical literature, history, politics, religion, mythology, and art in order to aid students' appreciation of the Greek and Roman contributions to later Western civilization.

The student who majors in Classical Studies acquires a balanced yet focused view of the language, literature, thought, and civilization of Greece and Rome. The student also obtains the valuable skills of a better vocabulary, a sharper critical sense, logical analysis of texts, coherent argumentation, and a valuable perspective on our own society. Classical Studies majors receive a liberal arts education of traditional excellence and one widely esteemed by business and professional schools. A student may also pursue graduate training in Classics, Art History, History, Philosophy, or other related disciplines.

Major

Language Proficiency All students in Classical Studies must complete either LATN 001, LATN 002, LATN 003, and LATN 004 (or equivalents) or GRK 001, GRK 002, and GRK 003 (or equivalents). They must also complete 12 upper-division units (or the equivalent) of course work in Latin or Greek.

1. Language proficiency requirement:

- either LATN 001, LATN 002, LATN 003, and LATN 004 (or equivalents) or GRK 001, GRK 002, and GRK 003 (or equivalents)

and

- Twelve (12) upper-division units or the equivalent of course work in Latin or Greek

2. Civilization requirement

Two courses from CLA 010A, CLA 010B, or CLA 010C

3.a) CPLT 001 or CPLT 001W and CPLT 002 (8 units)

- CPLT 193 (4 units). (CPLT 196 strongly recommended but not required).

4. Twenty-four (24) units from the following:

- Upper-division Latin or Greek literature courses beyond the language proficiency requirement
- AHS 147, AHS 148, CLA 100/HISE 110, CLA 102/CPAC 102, CLA 112/CPLT 112/RLST 117, CLA 113/CPAC 112/HISE 113, CLA 114/CPLT 114, CLA 120 (E-Z), CLA 121/CPAC 121/POSC 121, CLA 132/AST 132/CHN 132/CPAC 132, CLA 141/CHN 141/CPAC 141, CLA 165, CLA 190, GRK 190, HISE 112, HISE 114/CPAC 133,

HISE 115, HISE 116, HISE 117, HISE 118, HIST 103, HIST 110/CPAC 134, LATN 190, PHIL 120(E-Z), PHIL 121Q, POSC 110, RLST 136, THEA 125E

- Other courses outside the Classics program related to the major with approval of the student's advisor.

Highly recommended lower-division courses are CLA 040 (Classical Mythology) and CLA 045 (The Ancient World in Film and Television). In their course selection, students should seek exposure to both the Greek and Roman components of the major.

Minor

The Classical Studies minor offers students a fundamental understanding of classical language and culture which form the basis of much of western civilization. The minor naturally complements liberal arts degrees in many areas, including History, Art History, Philosophy, English, and Religious Studies. Students profit from the skills associated with a degree in the classics, such as enhancement of analytical and critical abilities, communication skills, and verbal proficiency.

- One course from CLA 010A, CLA 010B, or CLA 010C
- Either LATN 001, LATN 002, LATN 003, and LATN 004 (or equivalents) or GRK 001, GRK 002, and GRK 003 (or equivalents)
- One upper-division course (4 units) in either Latin or Greek
- Three courses from among the following (12 units)
 - Greek at or above the 100 level
 - Latin at or above the 100 level
 - AHS 147, AHS 148, CLA 100/HISE 110, CLA 102/CPAC 102, CLA 112/CPLT 112/RLST 117, CLA 113/CPAC 112/HISE 113, CLA 114/CPLT 114, CLA 120 (E-Z), CLA 121/CPAC 121/POSC 121, CLA 132/AST 132/CHN 132/CPAC 132, CLA 141/AST 145/CHN 141/CPAC 141/POSC 140, CLA 165, CLA 190, GRK 190, HISE 111, HISE 112, HISE 114/CPAC 133, HISE 115, HISE 116, HISE 117, HISE 118, HIST 110/CPAC 134, LATN 190, PHIL 120 (E-Z), LATN 190, PHIL 121Q, POSC 110, RLST 136, THEA 125E

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Classics

Subject abbreviation: **CLA**

Lower-Division Courses

CLA 010A Ancient Civilization: Early Greece and the Mediterranean (4) Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): none. A broad treatment of history, art and archaeology, and literature, read in translation, comprising a cultural survey of the origins and the first formation of Western civilization. **Raschke**

CLA 010B Ancient Civilization: Classical Greece (4) Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): none. A broad treatment of history, art and archaeology, and literature, read in translation, comprising a cultural survey of the origins and the first formation of Western civilization. **Raschke**

CLA 010C Ancient Civilization: Rome (4) Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): none. A broad treatment of history, art and archaeology, and literature, read in translation, comprising a cultural survey of the origins and the first formation of Western civilization. **Raschke**

CLA 017 Rome: The Ancient City (4) Lecture, 3 hours; extra reading, 3 hours. Traces the development of the city of ancient Rome. By studying the literary and historical evidence alongside the physical remains of the city—its monuments, art, and historical and archaeological remains—this course seeks to introduce students to the Romans and to their importance for later ages. Cross-listed with AHS 030 and HIST 027.

CLA 020 Word Power from Greek and Latin Roots (4) Lecture, 3 hours; consultation, 1 hour. An intensive study of Greek and Latin elements in English etymology and word derivation. No knowledge of Greek or Latin is necessary. **King, Scanlon**

CLA 030 Scientific Word Power from Latin and Greek Roots (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): none. A systematic analysis of the scientific terminology in English derived from Greek and Latin stems, including those in the biological and natural sciences. Aims are to teach word-analysis, to increase technical and taxonomic vocabulary, and to study our linguistic and cultural debt to Greek and Roman scientific language. **King**

CLA 040 Classical Mythology (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. An introductory survey of the mythology of Greece and Rome, including the divine myths, heroic legends, and the implications of these polytheistic systems for ancient culture. **King, Scanlon**

CLA 045 The Ancient World in Film and Television (4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. A study of representations of Greece and Rome in film, television, and other modern media. Introduces these 'visual texts' both as popular art forms on their own and in relation to their ancient and modern literary sources. Cross-listed with MCS 038.

CLA 050 Folktales, Monsters, and Magic in Ancient Greece and Rome (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): none. Examines beliefs of the supernatural as part of life in the ancient world. Topics include magic and witchcraft, the fear of demons and ghosts, and the wish to manipulate invisible powers. Utilizes a variety of media and sources both ancient and modern.

Upper-Division Courses

CLA 100 Ancient Historians (4) Lecture, 3 hours; outside research, 2 hours; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. The historical development of historiography as evidenced in ancient historical writings from Near Eastern king lists and biblical histories to the narrative histories of Greece and Rome. Focuses on the ideas of history in the various cultures of the ancient Near East and Mediterranean and their relation to modern historical thought. Cross-listed with HISE 110.

CLA 102 Ancient Civilizations and Later Identities (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Topical survey of aspects of ancient civilizations appropriated and re-applied to modern cultures. Course is repeatable as content changes to a maximum of 12 units. Cross-listed with CPAC 102.

CLA 112 Mythology (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A comparative study of mythic traditions from several world cultures and religions viewed from a variety of theoretical perspectives. Includes material drawn from epics, religious texts, divine hymns, creation myths, heroic legends, and concepts of the afterlife as reflected in literary and nonliterary sources. Cross-listed with CPLT 112 and RLST 117.

CLA 113 Comparative Ancient Historical Writing (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A survey of the literary aspects of historical writing in ancient cultures, with some comparison of the ancient contribution to later authors of the genre. Cross-listed with CPAC 112 and HISE 113.

CLA 114 The Classical Tradition (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A survey of the legacy of Greece and Rome in Western culture, from the Renaissance to the present. Topics include literature, art, architecture, and politics. Cross-listed with CPLT 114. **King, Scanlon**

CLA 120 (E-Z) Themes and Issues of the Classical World (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Focuses on an aspect of antiquity of critical importance to modern culture, and examines the relevant literary texts, artistic monuments, and cultural data. Students explore and interpret ancient sources to gain an appreciation of the differences and similarities between the classical world and the world today. All readings are in English; no knowledge of foreign languages is required. E. Ancient Sexuality and Gender: Myths and Realities; F. Greco-Roman Popular Culture; G. Reading Greek and Roman Sports; J. Guide to Living in the Ancient World.

CLA 121 Monarchy (4) Lecture, 3 hours; extra reading, 2 hours; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. A cross-cultural survey of the institution of monarchy in the ancient world and its role in political, social, economic, and religious life. Cross-listed with CPAC 121 and POSC 121. Credit is awarded for only one of CLA 121/CPAC 121/POSC 121 or CLA 121S/CPAC 121S/POSC 121S.

CLA 121S Monarchy (5) Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Examines the cross-cultural survey of the institution of monarchy in the ancient world and its role in political, social, economic, and religious life. Cross-listed with CPAC 121S and POSC 121S. Credit is awarded for only one of CLA 121/CPAC 121/POSC 121 or CLA 121S/CPAC 121S/POSC 121S.

CLA 132 Medical Traditions in China and Greece (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Comparative examination of the early development of Western medical traditions in classical Greece and the origins and development of the Chinese medical systems now referred to as traditional Chinese medicine, with specific attention to their cultural and social contexts. Cross-listed with AST 132, CHN 132, and CPAC 132.

CLA 141 Militarism and Hegemony in the Ancient World (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Comparative study of ancient warfare and hegemony in two or more civilizations of the ancient world. Perspectives may include social and political contexts, gender and war, acquisition of empire, religious wars, and weapons, strategies and tactics in theory and practice. Study of primary source material in texts and visual arts. Cross-listed with AST 145, CHN 141, CPAC 141, and POSC 140.

CLA 165 Greco-Roman Cults and Credence (4) Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Survey of the rich diversity of religious belief and systems of worship in the Greco-Roman world, from Bronze Age and Classical Greeks, to the Romans of the late Empire. Texts, documents, and archaeological evidence are examined to explore these unique constructions of ritual and creed. **Scanlon**

CLA 190 Special Studies (1-5) To be taken with the consent of the chairman of the department as a means of meeting special curricular problems or deficiencies. Course is repeatable.

Graduate Courses

See also UC Tri-Campus Graduate Program in Classics.

CLA 200A Contemporary Literary Theory and the Classics (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): admission to the UC Tri-Campus Graduate Program in Classics or consent of instructor. An introduction to contemporary literary theory focusing on important critical approaches. Topics vary from year to year. Requires written work that explores theoretical issues and involves engagement with a Greek or Latin text. This work may, for example, illuminate some aspect of a theorist's work, put two theorists into dialogue, or explore the usefulness of a particular approach to texts, authors, or genres. Taught at UC Irvine. Same as UC Irvine CLASSIC 200A. Course is repeatable.

CLA 200B Diachronic Perspectives on Classical Antiquity (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): admission to the UC Tri-Campus Graduate Program in Classics or consent of instructor. Examines ways in which classical texts and ideas have been received and appropriated for the diverse purposes of ancient and subsequent cultures. Taught at UC Irvine. Same as UC Irvine CLASSIC 200B. Course is repeatable.

CLA 200C Greece and Rome in Their Contemporary Cultural Contexts (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): admission to the UC Tri-Campus Graduate Program in Classics or consent of instructor. An introduction to the methods and perspectives of social scientific theory used to study the material and social dimensions of the ancient cultures of Greece and Rome. Taught at UC Irvine. Same as UC Irvine CLASSIC 200C. Course is repeatable.

CLA 201 Research Methods in Classical Studies (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): admission to the UC Tri-Campus Graduate Program in Classics or consent of instructor. Covers various technical skills essential for successful research and pedagogy in Classics. Includes use of digital resources (e.g., bibliographical databases). Introduces important disciplinary subfields, such as textual criticism and epigraphy. Selection of topics is at the instructor's discretion. Taught at UC Irvine. Same as UC Irvine CLASSICS 201. Course is repeatable as topics change.

CLA 250 Seminar in Classics (4) Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): admission to the UC Tri-Campus Graduate Program in Classics or consent of instructor. Focuses mainly, but not exclusively, on major literary topics. Subject matter varies. Taught at UC Irvine. Same as UC Irvine CLASSIC 220. Course is repeatable.

CLA 290 Directed Studies (1-6) Outside research, 3-18 hours. Prerequisite(s): consent of instructor and graduate advisor; normally open only to students in the UC Tri-Campus Graduate Program in Classics. Supervised independent research. Same as UC Irvine CLASSIC 280. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CLA 292 Concurrent Studies in Classics (2) Individual study, 6 hours. Prerequisite(s): admission to the UC Tri-Campus Graduate Program in Classics or consent of instructor. Concurrent enrollment in an advanced undergraduate Greek or Latin course, with credit awarded for additional reading and separate examinations. Same as UC Irvine CLASSIC 205. Course is repeatable.

CLA 297 Directed Research (1-6) Outside research, 3-18 hours. Prerequisite(s): admission to the UC Tri-Campus Graduate Program in Classics or consent of instructor. Research in preparation for the Candidacy Examination. Same as UC Irvine CLASSIC 290. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CLA 299 Research for the Thesis or Dissertation (1-12) Outside research, 3-36 hours. Prerequisite(s): admission to the UC Tri-Campus Graduate Program in Classics or consent of instructor. Directed research for the M.A. thesis or Ph.D. dissertation. Same as UC Irvine CLASSIC 299. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Course

CLA 302 Teaching Practicum (1-4) Practicum, 3-12 hours. Prerequisite(s): CPLT 301 or equivalent; graduate standing; employment as a teaching assistant or associate in. Supervised teaching in lower-division courses. Required of all teaching assistants in Classics. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Greek Courses

Subject abbreviation: GRK

Foreign Language Placement Examination

A placement examination is required of all freshmen entering the College of Humanities, Arts, and Social Sciences who wish to meet the foreign language requirement with the same language taken in high school. Consult the quarterly Schedule of Classes and placementtest.ucr.edu for date and time. Transfer students who have taken a college-level language course may not take the placement examination and should consult with their advisors. No college-level credit may be duplicated. See college placement examination policy.

Lower-Division Courses

GRK 001 Introduction to Classical Greek (4) Lecture, 4 hours. Prerequisite(s): none. Intensive study of the fundamentals of Attic Greek with practice in reading and writing. **King**

GRK 002 Introduction to Classical Greek (4) Lecture, 4 hours. Prerequisite(s): GRK 001 with a grade of "C-" or better or equivalent. Intensive study of the fundamentals of Attic Greek with practice in reading and writing. **King**

GRK 003 Introduction to Classical Greek (4) Lecture, 4 hours. Prerequisite(s): GRK 002 with a grade of "C-" or better or equivalent. Intensive study of the fundamentals of Attic Greek with practice in reading and writing. **King**

Upper-Division Courses

GRK 101 (E-Z) Advanced Greek Reading and Grammar (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): GRK 003 with a grade of "C-" or better or equivalent. One or two of the following will be offered every year, according to need. E. Homer *Iliad*; F. Homer *Odyssey*; G. Lyric Poets; H. Aeschylus; I.

Sophocles; J. Euripides; K. Aristophanes; L. Herodotus; M. Thucydides; N. Xenophon; O. The Attic Orators; P. Plato; Q. Aristotle; R. New Testament; T. Hellenistic and Later Greek.

GRK 190 Special Studies (1-5) To be taken with the consent of the instructor as a means of meeting special curricular problems. Course is repeatable.

Graduate Courses

See also *UC Tri-Campus Graduate Program in Classics*.

CPLT 290 Directed Studies (1-6) Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CPLT 290 (E-Z) Directed Studies (1-6) Outside research, 3-18 hours. Prerequisite(s): graduate standing; consent of instructor and department chair. To be taken as a means of meeting special curricular needs in literature. E. English; F. French; G. German; H. Greek; I. Italian; J. Japanese; K. Chinese; L. Latin; M. Latin American; R. Russian; S. Spanish; T. Scandinavian; U. American; V. Slavic. Segments are repeatable.

GRK 292 Concurrent Analytical Studies (2) Outside research, 6 hours. Prerequisite(s): consent of instructor; concurrent enrollment in GRK 100-series course. To be taken on an individual basis. Each student completes a graduate paper based on research related to the GRK 100-series course. Course is repeatable.

Professional Course

CPLT 301 Teaching of Foreign Language at the College Level (4) Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing, or senior standing with consent of instructor. Covers first and second language acquisition; general models of L2 learning; learning different types of grammar; learning other components of language: acquisition of pronunciation, vocabulary, and discourse; multilingual societies and the goals of language teaching; and implications of second language acquisition research for the foreign language classroom. Graded Satisfactory (S) or No Credit (NC).

Latin Courses

Subject abbreviation: LATN

Foreign Language Placement Examination

A placement examination is required of all freshmen entering the College of Humanities, Arts, and Social Sciences who wish to meet the foreign language requirement with the same language taken in high school. Consult the quarterly Schedule of Classes and placementtest.ucr.edu for date and time. Transfer students who have taken a college-level language course may not take the placement examination and should consult with their advisors. No college-level credit may be duplicated. See college placement examination policy.

Lower-Division Courses

LATN 001 Introduction to Latin (4) Lecture, 4 hours. Prerequisite(s): none. Intensive study of the fundamentals of the Latin language with practice in reading and writing.

LATN 002 Introduction to Latin (4) Lecture, 4 hours. Prerequisite(s): LATN 001 with a grade of "C-" or better or equivalent. Intensive study of the fundamentals of the Latin language with practice in reading and writing.

LATN 003 Introduction to Latin (4) Lecture, 4 hours. Prerequisite(s): LATN 002 with a grade of "C-" or better or equivalent. Intensive study of the fundamentals of the Latin language with practice in reading and writing.

LATN 004 Intermediate Latin (4) Lecture, 3 hours; grammar study projects, 3 hours. Prerequisite(s): LATN 003 with a grade of "C-" or better or equivalent. Involves readings from Latin prose and poetry, accompanied by selective review of grammar and presentation of more advanced grammatical issues. Designed to complete the introductory sequence and to ease the transition to upper-division literature courses.

Upper-Division Courses

LATN 101 (E-Z) Advanced Latin Reading and Grammar (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): LATN 004 or equivalent. One or two of the following are offered every year according to need. E. Plautus; F. Terence; G. Virgil; H. Catullus; I. Horace; J. Ovid; K. Propertius; L. Tibullus; M. Sallust; N. Cicero; O. Livy; P. Tacitus; Q. Juvenal; R. Lucretius; S. Seneca; T. Pliny; U. Medieval Latin; Z. Renaissance Latin.

LATN 135 The Roman Novel (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): LATN 004 or equivalent. Reading and discussion of Latin prose fiction as represented by Petronius' *Satyricon* and/or Apuleius' *Metamorphoses*. Emphasis given to the development of the romantic novel in Latin. **Raschke**

LATN 190 Special Studies (1-5) Individual study, 3-15 hours. Prerequisite(s): LATN 004 or equivalent or consent of instructor. To be taken as a means of meeting special curricular problems. Course is repeatable.

Scanlon

Graduate Courses

See also *UC Tri-Campus Graduate Program in Classics*.

CPLT 290 Directed Studies (1-6) Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CPLT 290 (E-Z) Directed Studies (1-6) Outside research, 3-18 hours. Prerequisite(s): graduate standing; consent of instructor and department chair. To be taken as a means of meeting special curricular needs in literature. E. English; F. French; G. German; H. Greek; I. Italian; J. Japanese; K. Chinese; L. Latin; M. Latin American; R. Russian; S. Spanish; T. Scandinavian; U. American; V. Slavic. Segments are repeatable.

LATN 292 Concurrent Analytical Studies (2) Outside research, 6 hours. Prerequisite(s): consent of instructor; concurrent enrollment in LATN 100-series course. To be taken on an individual basis. Student will complete a graduate paper based on research related to the LATN 100-series course. Course is repeatable with different topic.

Professional Course

CPLT 301 Teaching of Foreign Language at the College Level (4) Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing, or senior standing with consent of instructor. Covers first and second language acquisition; general models of L2 learning; learning different types of grammar; learning other components of language: acquisition of pronunciation, vocabulary, and discourse; multilingual societies and the goals of language teaching; and implications of second language acquisition research for the foreign language classroom. Graded Satisfactory (S) or No Credit (NC).

The UC Tri-Campus Graduate Program in Classics

web2.hnet.uci.edu/classics/Tricampus

(UC Irvine, UC Riverside, UC San Diego)

The UC Tri-Campus Graduate Program in Classics is a joint venture that combines faculty in Classics and related disciplines from the three southernmost UC campuses.

Students accepted into the program may enroll at any of the three campuses, but they normally apply for admission to the Tri-Campus program through UC Irvine, which is the main location for instruction and administration. Applications to the Tri-Campus program are reviewed by an admissions committee composed of faculty members from all three campuses.

The goal of the program is to provide a graduate education that unites the main currents of modern literary, cultural, and social-scientific theory with the traditional skills and methodologies of classical philology. Candidates for degrees must exhibit facility in Greek and Latin, competence in research, including theoretical approaches to texts and objects, technical mastery of computing for research and teaching, and experience in teaching.

These goals are realized through the four core courses (CLA 200A, CLA 200B, CLA 200C, and CLA 201), seminars (UC Riverside CLA 250/UC Irvine CLASSICS 220) and reading courses (UC Riverside CLA 292/UC Irvine CLASSICS 205).

All students are admitted into the Ph.D. program. With the exception of those granted advanced standing because they hold the M.A. degree in Classics from another institution, entering students are concurrently enrolled in the M.A. program.

Master's Degree

Students are admitted into the Ph.D. program only. Entering students who do not already hold a master's degree in Classics from another institution will be required to complete M.A. requirements while pursuing the Ph.D.

The requirements for the M.A. degree in Classics are two years (six quarters) of course work, passage of a special set of examinations, and completion of a master's paper. The normal course load is three 200-level courses each quarter. Minimum course requirements are four quarters of CLA 200A, CLA 200B, CLA 200C, and CLA 201; four quarters of UC Riverside CLA 292/UC Irvine CLASSICS 205; and four quarters of UC Riverside CLA 250/UC Irvine CLASSICS 220. (UC Riverside CLA 290/UC Irvine CLASSICS 280 may be substituted for these courses at the discretion of the faculty.) Requires a reading knowledge of either Germanic Studies, French, Italian, or equivalent language, demonstrated by examination or other means.

Normative Time to Degree Two years

Doctoral Degree

The requirements for the Ph.D. degree in Classics are three years (nine quarters) of course work. Minimum course requirements are four quarters of CLA 200A, CLA 200B, CLA 200C, and CLA 201; five quarters of UC Riverside CLA 292/UC Irvine CLASSICS 205; and six quarters of UC Riverside CLA 250/UC Irvine CLASSICS 220 or an equivalent course. (UC Riverside CLA 290/UC Irvine CLASSICS 280 may be substituted for these courses at the discretion of the Program faculty.) Students are encouraged to take courses and seminars in relevant areas outside the program at any of the three campuses.

Students must demonstrate reading proficiency in a second modern language by the end of the third year. By the end of the third year and during the fourth year of study, students must have read extensively in the primary texts and in literary history and theory and in ancient history. To qualify as a candidate and enter the dissertation stage, a student must pass an individually designed set of qualifying examinations, including translation examinations in Greek and Latin, written examinations or lengthy papers in special authors and field, and an oral examination.

The facilities, course offerings, programs, and individual faculty mentorship of all three campuses are available to students in the Tri-Campus degree program. The resources of the program are enhanced through a cooperative teaching arrangement among the Tri-Campus program and the Classics graduate programs of UC Los Angeles and the University of Southern California.

Foreign Language Requirement Students must demonstrate reading proficiency in a second modern language by the end of the third year.

Teaching Requirement Experience in supervised teaching and/or research activity is normally required.

Normative Time to Degree Six years

Faculty

Michele Salzman, Ph.D. Director
Professor of History, UCR; Late Antiquity; Roman History and Literature, Religion, Gender and Sexuality Studies

Georgios Anagnostopoulos, Ph.D.
Professor of Philosophy, UCSD; Ancient Greek Philosophy, Ethics, Metaphysics

Luci Berkowitz, Ph.D.
Professor Emerita of Classics, UCI; Greek Literary History, Computer Application to Literature

Charles Chamberlain, Ph.D. Lecturer in Classics and Comparative Literature, UCSD; Greek and Latin Literature, Aristotle, Poetics

Cynthia L. Claxton, Ph.D.
Lecturer in Classics, and graduate teaching supervisor, UCI; Greek prose, Historiography

Page duBois, Ph.D.
Professor of Classics and Comparative Literature, UCSD; Greek Literature, Rhetoric, Critical Theory, Cultural Studies

Anthony Edwards, Ph.D.,
Associate Professor of Classics and Comparative Literature; Program Director, UCSD; Epic, Greek Comedy, Critical Theory

Leslie Collins Edwards, Ph.D.
Lecturer in Classics and Comparative Literature, UCSD; Homer, Greek Drama, Education in Ancient Greece

Richard I. Frank, Ph.D.
Associate Professor Emeritus of History and Classics, UCI; Roman history, Latin Elegy and Satire, Classical Tradition

Zina Giannopoulou, Ph.D.
Assistant Professor of Classics, UCI; literary theory and Platonic hermeneutics, classical and Hellenistic philosophy, Greek tragedy and epic.

David Glidden, Ph.D.
Professor of Philosophy, UCR; Greek and Roman Philosophy

Max Goldman, Ph.D.
Lecturer in Classics, UCI; Latin poetry, ancient novel, literary criticism

Anna Gonosová, Ph.D.
Associate Professor of Art History, UCI; Byzantine and Medieval Art

Benjamin King, Ph.D.
Lecturer in Classics, UCR; Greek Literature and Philosophy

Edward N. Lee, Ph.D.
Professor Emeritus of Philosophy, UCSD; Greek Philosophy, Plato

Marianne McDonald, Ph.D.
Professor of Theatre and Classics, UCSD; Greek and Roman Theatre, Ancient Drama in Modern Plays, Film, and Opera

Margaret M. Miles, Ph.D.
Associate Professor of Art History, UCI; Greek and Roman Art and Archaeology, Ancient Sicily, Greek Religion

Alden A. Mosshammer, Ph.D., Emeritus,
Professor of History, UCSD; Early Christian Thought, Greek Chronography, Early Greek History

Sheldon Nodelman, Ph.D.
Associate Professor of Visual Arts, UCSD; Classical Art and Architecture, Roman Portraiture, Critical Theory

Maria C. Pantelia, Ph.D.
Associate Professor of Classics, and Director, Thesaurus Linguae Graecae, UCI; Greek Epic Poetry, Hellenistic Poetry, Computer Applications to Classics

Lisa Raphals, Ph.D.
Professor of Chinese/Comparative Literature, UCR

Wendy J. Raschke, Ph.D.
Lecturer in Classics, UCR ; Roman Satire, Greek Art and Archaeology

B. P. Reardon, D.U.
Professor Emeritus of Classics, UCI; Late Greek Literature, Ancient Novel

Gerasimos Santas, Ph.D.
Professor of Philosophy, UCI; Ancient Philosophy, History of Philosophy, Ethics

Thomas F. Scanlon, Ph.D.
Professor of Classics, UCR; Greek and Roman Historiography, Ancient Athletics

Gary Shiffman, Ph.D.
Assistant Professor of Political Science, UCSD; Greek Political Theory

Patrick Sinclair, Ph.D.
Associate Professor Emeritus of Classics, UCI; Roman Historiography, Latin Lexicography, Rhetoric

Dana F. Sutton, Ph.D.
Professor Emeritus of Classics, UCI; Greek and Latin drama, Greek poetry, Anglo-Latin Literature

Nicholas White, Ph.D.

Professor of Philosophy and Classics, UCI; ancient philosophy, ethics, epistemology/metaphysics

Eliot Wirshbo, Ph.D.

Lecturer in Classics and Comparative Literature, UCSD; Greek Epic, Folklore

Andrew Zissos, Ph.D.

Associate Professor of Classics; graduate advisor, UCI; Latin Epic; Medieval Latin; Roman Culture

Graduate Courses

Most of the following courses are taught at the UC Irvine campus.

See also CLA 302 under the Classics section.

CLA 200A Contemporary Literary Theory and the Classics (4)

Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): admission to the UC Tri-Campus Graduate Program in Classics or consent of instructor. An introduction to contemporary literary theory focusing on important critical approaches. Topics vary from year to year. Requires written work that explores theoretical issues and involves engagement with a Greek or Latin text. This work may, for example, illuminate some aspect of a theorist's work, put two theorists into dialogue, or explore the usefulness of a particular approach to texts, authors, or genres. Taught at UC Irvine. Same as UC Irvine CLASSIC 200A. Course is repeatable.

CLA 200B Diachronic Perspectives on Classical Antiquity (4)

Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): admission to the UC Tri-Campus Graduate Program in Classics or consent of instructor. Examines ways in which classical texts and ideas have been received and appropriated for the diverse purposes of ancient and subsequent cultures. Taught at UC Irvine. Same as UC Irvine CLASSIC 200B. Course is repeatable.

CLA 200C Greece and Rome in Their Contemporary Cultural Contexts (4)

Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): admission to the UC Tri-Campus Graduate Program in Classics or consent of instructor. An introduction to the methods and perspectives of social scientific theory used to study the material and social dimensions of the ancient cultures of Greece and Rome. Taught at UC Irvine. Same as UC Irvine CLASSIC 200C. Course is repeatable.

CLA 201 Research Methods in Classical Studies (4)

Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): admission to the UC Tri-Campus Graduate Program in Classics or consent of instructor. Covers various technical skills essential for successful research and pedagogy in Classics. Includes use of digital resources (e.g., bibliographical databases). Introduces important disciplinary subfields, such as textual criticism and epigraphy. Selection of topics is at the instructor's discretion. Taught at UC Irvine. Same as UC Irvine CLASSICS 201. Course is repeatable as topics change.

CLA 250 Seminar in Classics (4)

Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): admission to the UC Tri-Campus Graduate Program in Classics or consent of instructor. Focuses mainly, but not exclusively, on major literary topics. Subject matter varies. Taught at UC Irvine. Same as UC Irvine CLASSIC 220. Course is repeatable.

CLA 290 Directed Studies (1-6)

Outside research, 3-18 hours. Prerequisite(s): consent of instructor and graduate advisor; normally open only to students in the UC Tri-Campus Graduate Program in Classics. Supervised independent research. Same as UC Irvine CLASSIC 280. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CLA 292 Concurrent Studies in Classics (2)

Individual study, 6 hours. Prerequisite(s): admission to the UC

Tri-Campus Graduate Program in Classics or consent of instructor. Concurrent enrollment in an advanced undergraduate Greek or Latin course, with credit awarded for additional reading and separate examinations. Same as UC Irvine CLASSIC 205. Course is repeatable.

CLA 297 Directed Research (1-6) Outside research, 3-18 hours. Prerequisite(s): admission to the UC Tri-Campus Graduate Program in Classics or consent of instructor. Research in preparation for the Candidacy Examination. Same as UC Irvine CLASSIC 290. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CLA 299 Research for the Thesis or Dissertation (1-12)

Outside research, 3-36 hours. Prerequisite(s): admission to the UC Tri-Campus Graduate Program in Classics or consent of instructor. Directed research for the M.A. thesis or Ph.D. dissertation. Same as UC Irvine CLASSIC 299. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Languages and Literatures/Comparative Ancient Civilizations

Subject abbreviation: CPAC
College of Humanities, Arts, and Social Sciences

Lisa Raphals, Ph.D., Chair

Committee in Charge

Wendy Ashmore (Anthropology)
Christopher Chase-Dunn (Sociology)
Lucile Chia (History)
David Glidden (Philosophy)
Denver Granninger (History)
John Laursen (Political Science)
Hendrick Maier (Comparative Literature & Foreign Languages)
Jozef Muller (Philosophy)
Vivian Nyitray (Religious Studies)
Thomas Patterson (Anthropology)
Wendy Rashke (Comparative Literature & Foreign Languages)
Michele Salzman (History)
Thomas Scanlon (Comparative Literature & Foreign Languages)
Karl Taube (Anthropology)
Sabine Thuerwaechter (Comparative Literature & Foreign Languages)
Stephen E. Cullenberg, Ph.D.
Dean, College of Humanities, Arts, and Social Sciences, ex officio

The Comparative Ancient Civilizations B.A. combines the breadth of an interdisciplinary major with the focus of more traditional majors like History or Classical Civilization. By undertaking a comparison of several major cultures of the past that have continued importance in the construction of our present world, the program affords a truly liberal education. Students have a unique opportunity to employ the methods of humanities and social sciences in their major study. They acquire skills of historical and social analysis, multicultural awareness, insight into constructions of gender and sexuality, and mental flexibility.

The major is an excellent choice as a double major taken along with any of the traditional disciplines to add distinction and intellectual breadth to one's background.

Major

1. Lower-division requirements (20 units): CPLT 001 or CPLT 001W, CPLT 002 and any three from ANTH 003, ANTH 004, AST 030/CHN 030, CLA 010A, CLA 010B, CLA 010C, CPLT 017A
2. Upper-division requirements (48 units)
 - a) At least 16 units from CPAC 102/CLA 102, CPAC 112/CLA 113/HISE 113, CPAC 121/CLA 121/POSC 121, CPAC 132/AST 132/CHN 132/CLA 132, CPAC 133/HISE 114, CPAC 134/HIST 110, CPAC 141/AST 141/CHN 141/CLA 141/AST 145/POSC 140
 - b) CPLT 193 (4 units). (CPLT 196 strongly recommended but not required)
 - c) The balance (28 units) from any of the following upper-division courses in related disciplines; students are recommended, in consultation with their advisor, to focus on one or two ancient civilizations in related courses to obtain special depth in those areas. Since related course offerings in these areas are often added, some of the most recent courses acceptable to fulfill this requirement may not be listed and students are advised to consult with the major advisor.

Upper-Division Courses

CPAC 102 Ancient Civilizations and Later Identities

(4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Topical survey of aspects of ancient civilizations appropriated and re-applied to modern cultures. Course is repeatable as content changes to a maximum of 12 units. Cross-listed with CLA 102. *Fulfills either the Humanities or Social Sciences requirement for the College of Humanities, Arts, and Social Sciences, but not both.*

CPAC 112 Comparative Ancient Historical Writing

(4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A survey of the literary aspects of historical writing in ancient cultures, with some comparison of the ancient contribution to later authors of the genre. Cross-listed with CLA 113 and HISE 113. *See the Student Affairs Office in the College of Humanities, Arts, and Social Sciences for breadth requirement information.*

CPAC 121 Monarchy (4) Lecture, 3 hours; extra reading, 2 hours; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. A cross-cultural survey of the institution of monarchy in the ancient world and its role in political, social, economic, and religious life. Cross-listed with CLA 121 and POSC 121. Credit is awarded for only one of CLA 121/CPAC 121/POSC 121 or CLA 121S/CPAC 121S/POSC 121S. *Fulfills either the Humanities or Social Sciences requirement for the College of Humanities, Arts, and Social Sciences, but not both.*

CPAC 121S Monarchy (5) Lecture, 3 hours; discussion, 1 hour; extra reading, 2 hours; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Examines the cross-cultural survey of the institution of monarchy in the ancient world and its role in political, social, economic, and religious life. Cross-listed with CLA 121S and POSC 121S. Credit is awarded for only one of CLA 121/CPAC 121/POSC 121 or CLA 121S/CPAC 121S/POSC 121S. *Fulfills either the Humanities or Social Sciences requirement for the College of Humanities, Arts, and Social Sciences, but not both.*

CPAC 132 Medical Traditions in China and Greece (4)

Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Comparative examination of the early development of Western medical traditions in classical Greece and the origins and development of the Chinese medical systems now referred to as traditional Chinese medicine, with specific attention to their cultural and social contexts. Cross-listed with AST 132, CHN 132, and CLA 132. *Fulfills either the Humanities or Social Sciences requirement for the College of Humanities, Arts, and Social Sciences, but not both.*

CPAC 133 Ancient Writing and Literacy (4)

Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Uses cross-cultural comparison to survey writing and literacy in ancient civilizations and how they are related in the origin and development of selected ancient cultures. Cross-listed with HISE 114. *Fulfills either the Humanities or Social Sciences requirement for the College of Humanities, Arts, and Social Sciences, but not both.*

CPAC 134 History of Ancient Astronomy (4)

Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores the origins and history of ancient astronomy from Mesopotamia to the Greco-Roman world. Topics include the problems of the calendar and planetary motion, and the relation between astronomy and astrology in the ancient world. Focuses on readings from primary texts. Cross-listed with HIST 110. *Fulfills either the Humanities or Social Sciences requirement for the College of Humanities, Arts, and Social Sciences, but not both.*

CPAC 141 Militarism and Hegemony in the Ancient World (4)

Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Comparative study of ancient warfare and hegemony in two or more civilizations of the ancient world. Perspectives may include social and political contexts, gender and war, acquisition of empire, religious wars, and weapons, strategies and tactics in theory and practice. Study of primary source material in texts and visual arts. Cross-listed with AST 145, CHN 141, CLA 141, and POSC 140. *Fulfills either the Humanities or Social Sciences requirement for the College of Humanities, Arts, and Social Sciences, but not both.*

Languages and Literatures/French

Subject abbreviation: FREN**Committee in Charge**

Heidi Brevik-Zender, Ph.D., Chair, *French/Comparative Literature*
Michelle E. Bloom, Ph.D., *Comparative Literature/French*
Christine Duvergé, Ph.D. *French*
Jennifer Ramos, M.A. *French*
Cheryl Tarantino, M.A. *French/Italian*
Kelle Truby, Ph.D. *French*
Stephen E. Cullenberg, Ph.D.
Dean, College of Humanities, Arts, and Social Sciences, ex officio

The department offers the B.A. program in French. The core of the major is the study of French and Francophone literatures and cultures through innovative textual, visual and interdisciplinary approaches.

Students are encouraged to consider opportunities for study through the Education Abroad Program (EAP). This is an excellent opportunity to become deeply familiar with another country and its culture while earning academic units towards graduation. Students should plan study abroad well in advance to ensure that the courses taken fit with their overall program at UCR. Consult the departmental student affairs officer for assistance. For further details, visit UCR's Off Campus Academic Experiences at eapoap.ucr.edu or call (951)827-2508.

See Education Abroad Program in the Educational Opportunities section of this catalog. A list of participating countries is found under Education Abroad Program in the Programs and Courses section. Search for programs by specific areas at eap.ucop.edu/ourprograms.

Foreign Language Placement Examination

A placement examination is required of all freshmen entering the College of Humanities, Arts, and Social Sciences who wish to meet the foreign language requirement with the same language taken in high school. Consult the quarterly Schedule of Classes and placementtest.ucr.edu for date and time. Transfer students who have taken a college-level language course may not take the placement examination and should consult with their advisors. No college-level credit may be duplicated. See college placement examination policy.

Major

1. CPLT 001 or CPLT 001W, CPLT 002
2. Language proficiency (16 units) - FREN 100, FREN 101A, FREN 101B, FREN 101C
3. Eight courses (32 units) of upper-division electives in the French Program. Of these the student must choose a minimum of five courses (20 units) offered entirely in French. Students may petition to take one course (4 units) outside of the French Program on a related topic. It is strongly encouraged that students take at least one class focusing on a time period earlier than 1800. It is highly

recommended that students complete FREN 101B and FREN 101C before enrolling in upper-division electives.

4. CPLT 193 (4 units). (CPLT 196 strongly recommended but not required)

Minor

1. Language proficiency (16 units) - FREN 100, FREN 101A, FREN 101B, FREN 101C
2. Two courses (8 units) chosen from among upper-division courses offered entirely in French.

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Honors Program

Students who wish to undertake a special program of honors study in upper-division courses should apply to the department.

Graduate Programs

Master's Degree

The master's program in French is not currently accepting new students.

Doctoral Degree

Ph.D. studies in French are available through the Ph.D. program in Comparative Literature.

Lower-Division Courses

FREN 001 Introduction to French (4) F, W, S Lecture, 4 hours. Prerequisite(s): Student must take the French placement examination. An introduction to the sound system and grammar of French. Focuses on the development of the four skills: understanding, speaking, reading, and writing. Classes conducted in French.

FREN 002 Introduction to French (4) F, W, S Lecture, 4 hours. Prerequisite(s): FREN 001 with a grade of "C-" or better or equivalent. An introduction to the sound system and grammar of French. Focuses on the development of the four skills: understanding, speaking, reading, and writing. Classes conducted in French.

FREN 003 Introduction to French (4) F, W, S Lecture, 4 hours. Prerequisite(s): FREN 002 with a grade of "C-" or better or equivalent. Continued study of the grammatical structures of French; vocabulary building; and development of reading and compositional skills. Classes conducted in French.

FREN 004 Intermediate French (4) Lecture, 4 hours. Prerequisite(s): FREN 003 with a grade of "C-" or better or equivalent. Continued study of the grammatical structures of French; vocabulary building; and development of reading and compositional skills. Classes conducted in French.

FREN 009A French for Reading Knowledge (4) Lecture, 3 hours. A specialized course developing the skill to translate from French into English. No previous knowledge of French is required.

FREN 009B French for Reading Knowledge (4) Lecture, 3 hours. Prerequisite(s): FREN 009A. A specialized course developing the skill to translate from French into English. No previous knowledge of French is required.

FREN 015A Introduction to Literature and Culture (4) F, W, S Lecture, 3 hours; individual study, 3 hours. Pre-

requisite(s): FREN 004 with a grade of "C" or better or consent of instructor. Continued progress towards mastery of the French language. Classes conducted entirely in French.

FREN 015B Introduction to Literature and Culture (4) F, W, S Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): FREN 015A with a grade of "C" or better or consent of Instructor. Continued progress towards mastery of the French language. Classes conducted entirely in French.

FREN 045 French Cinema (4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. Covers masterpieces of French cinema. Examines the historical evolution of French cinema as an art form, with emphasis on major themes and directors. Cross-listed with MCS 045.

FREN 090 Special Studies (1-3) To be taken with the consent of the Chair of the Department as a means of meeting special curricular problems. Course is repeatable.

Upper-Division Courses

FREN 100 Advanced Conversation (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): FREN 015B with a grade of "C" or better or equivalent. Provides practice in the development of oral proficiency, fluency of expression, and listening comprehension. Only 4 units may be applied toward the major. Course is repeatable to a maximum of 8 units.

FREN 101A Advanced French Studies (4) F, W, S Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): FREN 015B with a grade of "C" or better or equivalent. Advanced analysis of topics in literature, film, visual arts, or culture. Focuses on the development of written expression in French.

FREN 101B Advanced French Studies (4) F, W, S Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): FREN 101A with a grade of "C" or better or consent of instructor. Advanced analysis of topics in literature, film, visual arts, or culture. Focuses on the development of written expression in French.

FREN 101C Advanced French Studies (4) F, W, S Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): FREN 101A or FREN 101B with a grade of "C" or better or consent of instructor. Advanced analysis of topics in literature, film, visual arts, or culture. Focuses on the development of written expression in French.

FREN 109A Main Currents in French Literature: Middle Ages and Renaissance (4) Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): comprehension of written and spoken French. A study of the principal movements in French literature, based on the reading of representative works in their entirety.

FREN 109B Main Currents in French Literature: Seventeenth and Eighteenth Centuries (4) Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): comprehension of written and spoken French. A study of the principal movements in French literature, based on the reading of representative works in their entirety.

FREN 109C Main Currents in French Literature: Nineteenth Century (4) Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): comprehension of written and spoken French. A study of the principal movements in French literature, based on the reading of representative works in their entirety.

FREN 109D Main Currents in French Literature: Twentieth Century (4) Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): comprehension of written and spoken French. A study of the principal movements in French literature, based on the reading of representative works in their entirety.

FREN 112 Mythology in French Literature, Film, and the Visual Arts (4) Lecture, 3 hours; field, 1 hour; outside research, 1 hour; term paper, 1 hour. Prerequisite(s): FREN 101A or FREN 101B or FREN 101C or consent of instructor. Studies myths and mythological figures in 17th- through 20th-century French texts. Focuses on literature (theatre, short stories, and novels), and film, painting, and popular culture. Myths include Pygmalion, Venus, Orpheus, Narcissus and Echo, and Icarus. Course is conducted in French.

FREN 124 (E-Z) Gender in French Studies (4) Lecture, 3 hours; extra reading, 2 hours; screening, 1 hour. Prerequisite(s): FREN 101A or FREN 101B or FREN 101C or consent of instructor. Examines gender issues in French studies, including literature, culture, and visual arts. Topics include depictions of women, writing by male and/or female authors, and women in relation to power. Instruction is in French. G. Gender, Race, and Identity Politics; P. Portrayals of Women in Literature and Film.

FREN 132 Rousseau and Revolution (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introductory study of the French philosopher and novelist Jean-Jacques Rousseau and the age of revolution in France, Germany, and England. Topics include social inequality, slavery, gender, subjectivity, violence, and political rights. All readings are in English. Cross-listed with CPLT 132 and GER 132.

FREN 143 France and Asia in Literature and the Arts (4) Lecture, 3 hours; screening, 20 hours per quarter; term paper, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Explores French portrayals of Asia in literature, cinema, the other arts, and popular culture. Topics include colonialism, orientalism, gender, race, and language. Cross-listed with CPLT 143.

FREN 148 (E-Z) French Literature of the City (4) Lecture, 3 hours; screening, 1 hour; extra reading, 2 hours. Prerequisite(s): FREN 101A or FREN 101B or FREN 101C or consent of instructor. Explores aspects of French literature dealing with city life. Examines visual and cultural material in conjunction with literary works read and discussed. Instruction and reading is in French. S. The Culture of the Paris Suburbs.

FREN 150 (E-Z) Francophone Studies (4) Lecture, 3 hours; screening, 1 hour; term paper, 1 hour; outside research, 1 hour. Prerequisite(s): FREN 101A or consent of instructor. Explores the literature, film, and culture of French-speaking countries and regions outside of metropolitan France. Courses taught in French. E. Autobiographies by West African Women; F. Island Literature; W. Writing by and about Women.

FREN 152 Food and French Literature (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): FREN 101A or consent of instructor. Explores the role of food in French literature. Discusses descriptions of food and concepts such as reading as consuming; food, desire, and sex; gendering of food; cooking, food preparation, recipes, and menus; and food and social class (poverty and wealth). Taught in French.

FREN 153 Children in French Cinema (4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): FREN 101A or consent of instructor. Explores the representation of children in French cinema from its inception to the present. Topics include children in the classroom (teachers' pets and troublemakers); outside of school (juvenile delinquents); social class (the underprivileged and well-off); gender; coming of age; and parental roles (child neglect, the maternal/paternal). Conducted in French.

FREN 155 The Bande Dessinée: From Comics to Graphic Novels in French (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): FREN 101A or FREN 101B or FREN 101C or consent of instructor. Explores the medium of the Bande Dessinée in its various forms (precursors, comic strips, graphic novels, films).

Examines form, content, and their interactions. Focus may vary depending on instructor and year. Taught entirely in French.

FREN 160 The Fashion of Modernity (4) Lecture, 3 hours; extra reading, 2 hours; outside research, 1 hour. Prerequisite(s): FREN 101A or FREN 101B or FREN 101C or consent of instructor. Examines nineteenth-century French modernity as expressed through fashion. Utilizes critical and literary texts, fashion magazines, and films. Topics include the department store, cross-dressing, ready-to-wear, and the rise of the designer. Incorporates work by Baudelaire, Zola, Rachilde, Feydeau, and Maupassant. Course taught in French.

FREN 181 Existentialism in Literature, Film, and Culture (4) Lecture, 3 hours; screening, 2 hours; outside research, .5 hours; term paper, .5 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores the Existentialist movement in literature, film, and culture. Texts range from essays, plays, and novels to documentary and fiction film. Topics include choice, subjectivity, and alienation. Cross-listed with CPLT 181 and MCS 181.

FREN 190 Special Studies (1-5) To be taken with the consent of the department chair as a means of meeting special curricular problems. Course is repeatable.

FREN 195H Senior Honor Thesis (1-4) Consultation, 1 hour; individual study, 3-9 hours. Prerequisite(s): invitation by faculty to pursue honors work in French. Senior standing. Intensive study and research in consultation with a faculty member, leading to a senior thesis. Grades will be deferred until presentation of the thesis during the final quarter. Satisfactory (S) or No Credit (NC) grading is not available. To be taken during two or three consecutive quarters; repeatable to a maximum of 8 units.

Graduate Courses

FREN 290 Directed Studies (1-6) Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

FREN 291 Individual Studies in Coordinated Areas (1-6) A program of studies designed to advise and assist candidates who are preparing for examinations. Open to M.A. candidates. Does not count toward the unit requirement for the M.A. May be repeated quarterly until the qualifying examinations are completed. Graded Satisfactory (S) or No Credit (NC).

FREN 292 Concurrent Analytical Studies in French (2) Outside research, 6 hours. Prerequisite(s): consent of instructor; concurrent enrollment in a French 100-series course. To be taken on an individual basis. Student completes a graduate paper based on research related to the French 100-series course. Course is repeatable as topics change. FREN 100 and the FREN 101A, FREN 101B, and FREN 101C sequence may not be used for FREN 292.

FREN 299 Research for Thesis or Dissertation (1-12) Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Courses

FREN 302 Teaching Practicum (1-4) Practicum, 3-12 hours. Prerequisite(s): CPLT 301 or equivalent; graduate standing; employment as a teaching assistant or associate in. Supervised teaching in lower-division courses. Required of all teaching assistants in French. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Languages and Literatures/Germanic Studies

Subject abbreviation: GER

Committee in Charge

Thomas Scanlon, Ph.D., Chair, *Classics/Comparative Literature*
John M. Kim, Ph.D. *Comparative Literature*
Sabine Thueraewachter, Ph.D. *German/Comparative Literature*
Heidi Waltz, Ph.D. *Linguistics/Germanic Studies*
Stephen E. Cullenberg, Ph.D.
Dean, College of Humanities, Arts, and Social Sciences, ex officio

The B.A. in Germanic Studies enables a student to specialize in the German language through the acquisition of language competence, as well as exposure to the study of cultural, literary and filmic practices.

Students are encouraged to consider opportunities for study through the Education Abroad Program (EAP). This is an excellent opportunity to become deeply familiar with another country and its culture while earning academic units towards graduation. Students should plan study abroad well in advance to ensure that the courses taken fit with their overall program at UCR. Consult the departmental student affairs officer for assistance. For further details, visit UCR's Off Campus Academic Experiences at eapop.ucr.edu or call (951)827-2508.

See Education Abroad Program in the Educational Opportunities section of this catalog. A list of participating countries is found under Education Abroad Program in the Programs and Courses section. Search for programs by specific areas at eap.ucop.edu/ourprograms.

Foreign Language Placement Examination

A placement examination is required of all freshmen entering the College of Humanities, Arts, and Social Sciences who wish to meet the foreign language requirement with the same language taken in high school. Consult the quarterly Schedule of Classes and **placementtest.ucr.edu** for date and time. Transfer students who have taken a college-level language course may not take the placement examination and should consult with their advisors. No college-level credit may be duplicated. See college placement examination policy.

Major

- Lower-division requirements (24 units)
 - Sixteen (16) units: GER 001, GER 002, GER 003, GER 004, or equivalents
 - Eight (8) units: CPLT 001 or CPLT 001W, CPLT 002
- Upper-division requirements (36 units)
 - Sixteen (16) units from the following: GER 100, GER 101, GER 102, GER 103A, GER 103B, GER 104, GER 108, GER 172/PHIL 172
 - Twenty (20) units as follows:

(1) Sixteen (16) upper-division units in German literature and film beyond the language proficiency requirement, chosen in consultation with student's advisor.

(2) CPLT 193 (CPLT 196 strongly recommended but not required)

Minor

- Lower-division requirements (16 units)
GER 001, GER 002, GER 003, GER 004, or equivalents
- Upper-division requirements (28 units)
 - Sixteen (16) units from the following: GER 100, GER 101, GER 102, GER 103A, GER 103B, GER 104, GER 108, GER 172/PHIL 172
 - Twelve (12) upper-division elective units in German literature, film, or courses related to Germanic Studies, with approval of the student's advisor.

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Honors Program

Students who wish to undertake a special program of honors study in the upper division should apply at the beginning of the junior year. Acceptance for honors study is based on students' previous grade records and the recommendations of their instructors. Candidates for honors must demonstrate superior capacity for independent study and during the senior year are required write an individually directed senior thesis.

Graduate Programs

Master's Degree

The master's program in Germanic Studies is not currently accepting new students.

Doctoral Degree

Ph.D. studies in Germanic Studies are available through the Ph.D. program in Comparative Literature.

Lower-Division Courses

GER 001 Elementary German (4) Lecture, 4 hours. Prerequisite(s): none. An introduction to the sound system and grammar of German. Focuses on the development of the four skills: listening, speaking, reading, and writing. Classes conducted in German as much as possible. Credit is awarded for only one of the following sequences: GER 001, GER 002, and GER 003; GER 010A and GER 010B.

GER 001R German for Reading Knowledge (4) Lecture, 4 hours. Prerequisite(s): none. First of an intensive two-quarter sequence providing a comprehensive coverage of basic German grammar. Differs from GER 001 by placing exclusive emphasis on developing the skills of reading and translating German. No previous knowledge of German is required.

GER 002 Elementary German (4) Lecture, 4 hours. Prerequisite(s): GER 001 with a grade of "C-" or better or equivalent. An introduction to the sound system

and grammar of German. Focuses on the development of the four skills: listening, speaking, reading, and writing. Classes conducted in German as much as possible. Credit is awarded for only one of the following sequences: GER 001, GER 002, and GER 003; GER 010A and GER 010B.

GER 002R German for Reading Knowledge (4) Lecture, 4 hours. Prerequisite(s): GER 001R or equivalent. Provides the second of a two-quarter sequence of a comprehensive coverage of basic German grammar. Emphasizes developing the skills of reading and translating German. No previous knowledge of German required.

GER 003 Elementary German (4) Lecture, 4 hours. Prerequisite(s): GER 002 with a grade of "C-" or better or equivalent. An introduction to the sound system and grammar of German. Focuses on the development of the four skills: listening, speaking, reading, and writing. Classes conducted in German as much as possible. Credit is awarded for only one of the following sequences: GER 001, GER 002, and GER 003; GER 010A and GER 010B.

GER 004 Intermediate German (4) Lecture, 2 hours; discussion, 2 hours. Prerequisite(s): GER 003 with a grade of "C-" or better or equivalent. Involves a grammar review combined with introductory readings of contemporary authors. Develops active language skills through readings, audiovisual media, and field trips.

GER 010A Accelerated German (6) Lecture, 4 hours; discussion, 2 hours. Prerequisite(s): none. Accelerated study of German. The GER 010A and GER 010B sequence is equivalent to the GER 001, GER 002, and GER 003 sequence including the four basic skills of listening, speaking, reading, and writing. Credit is awarded for only one of the GER 001, GER 002, and GER 003 or GER 010A and GER 010B sequences.

GER 010B Accelerated German (6) Lecture, 4 hours; discussion, 2 hours. Prerequisite(s): GER 010A with a grade of "C-" or better or equivalent. An accelerated study of German that covers the four basic skills of listening, speaking, reading, and writing. Credit is awarded for only one of the following sequences: GER 001, GER 002, and GER 003; GER 010A and GER 010B.

GER 014 The German Big Ten: German-Speaking Authors That Writers Should Know (4) Lecture, 3 hours; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): none. An introduction to ten key authors in German literature. Covers from the Brothers Grimm to contemporary writers such as Elfriede Jelinek and Patrick Süskind. Course conducted in English. Cross-listed with CRWT 014.

GER 045 Introduction to German Cinema (4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. Introduction to the history of German cinema from the advent of the studio system to the present. Covers film in Germany, Switzerland, and Austria. Attention is paid to the work of German-speaking filmmakers living in other parts of the world. Instruction is in English; all films have subtitles. Cross-listed with MCS 042.

GER 046 Representing the Holocaust in Words and Images (4) Lecture, 3 hours; screening, 3 hours. Introduces representations of the Holocaust in documentary and narrative film, literature, and painting. Explores notions such as memory, mourning, trauma, spectatorship, and atrocity to come to terms with different responses to the Holocaust. Topics include memorialization, stigmatization, the ethics of historical representation, and black humor. Cross-listed with CPLT 046.

GER 090 Special Studies (1-3) To be taken with the consent of the department chair as a means of meeting special curricular problems. Course is repeatable.

Upper-Division Courses

GER 100 Introduction to German Literature (4) Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): GER 004; consent of instructor. Involves reading and analysis of literary texts within a literary-historical framework. Seeks to familiarize the beginning student of literature with the main currents, representatives, and genres of modern German literature. Language of instruction is German. **Ochs**

GER 101 German Conversation (4) Lecture, 4 hours. Prerequisite(s): GER 004 or equivalent. Involves development of active control of the language with discussion and oral presentation of assigned topics. Supervised work in German phonetics.

GER 102 Contemporary German Cinema for Conversation (4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): GER 004 or consent of instructor. Utilizes a series of German language films to connect cultural background and historical contexts with linguistic aspects. Topics include The Wall, reunification, Turkish-German relationships, and heritage films. Class conducted in German.

GER 103A Advanced Composition and Conversation (4) Lecture, 4 hours. Prerequisite(s): GER 004 or consent of instructor. Emphasis is on the mastery of the subtleties of the German language, including conversation, reading, listening, and writing. Reinforces oral and written skills through exposure to and analysis of a broad range of texts, essay writing, and oral presentations. **Ochs**

GER 103B Advanced Composition and Conversation (4) Lecture, 4 hours. Prerequisite(s): GER 004 or consent of instructor. Improves oral and written proficiency of the German language. Emphasis is on reading increasingly difficult material, conversational use of German, vocabulary building, and study of idioms. Materials include newspaper articles and television programs that explain the German educational system, the arts, history, and politics.

GER 104 Intro to German Cultural History for Conversation (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): GER 004 or equivalent. Introduces German cultural history through conversation and composition in German. Organized thematically around politics, philosophy, music, art, and architecture. Class conducted in German.

GER 107 German Drama in Translation: Theater of Revolution / Theater as Revolution (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores the influence of drama and stage on society and their role in disseminating philosophical ideas and aiding social change. Topics include the medieval Carnival play, theater of the Enlightenment and the Sturm und Drang, 19th century Realism and social drama, and Epic Theater.

GER 108 The Art of Translation (4) Lecture, 1 hour; discussion, 3 hours. Prerequisite(s): GER 101 or GER 103A or GER 103B or consent of instructor. Examines theories of translation, including recognized examples of good and bad translations. Provides an opportunity to put theory into practice.

GER 109 Masterworks of German Literature in Translation: Plays, Nineteenth-Century Realism to the 1960s (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing. Provides an introduction to the great contribution of German letters to world literature.

GER 111 Berlin Metropolis in Literature, Film, Music, and Art (4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to the metropolis Berlin as a gateway between the East and West. Explores topography of the city through film, art, music, and literary

texts. Considers Berlin's dramatic transformations as a microcosm of Germany and Europe's troubled history in the twentieth century. Course conducted in English. Cross-listed with AHS 120, CPLT 111, EUR 120, and MCS 178.

GER 118 (E-Z) Topics in German Cinema (4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Study of selected films, directors, and movements in German film. Films are in German with English subtitles. No knowledge of German is required. Cross-listed with MCS 118 (E-Z).

GER 124 Nordic Mythology, Folklore, and Fairytales (4) Seminar, 3 hours; extra reading, 1 hour; written work, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. Introduces the representation of animals, plants, and other appearances of the natural world such as sunrise and sunset in European creation and destruction mythology, fairytales, and folklore. Cross-listed with EUR 124.

GER 126 From Novel to Screen: Film Adaptations of German Literature (4) Lecture, 3 hours; screening, 2 hours; individual study, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. An introduction to classic works of German literature and their film adaptations. Explores adaptations by film directors such as Welles, Kubrick, Visconti, and Fassbinder. Studies the nexus between literature, film, and theatre. Course conducted in English. Cross-listed with CPLT 126 and MCS 126.

GER 131 Marx, Nietzsche, Freud (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Critical introduction to three central thinkers of modernity. Topics include alienation, free will, revolution, the unconscious, sexual difference, political power, and the modern conception of truth. Readings and discussions are in English. Selected readings are in German for German majors and minors. Cross-listed with CPLT 131.

GER 132 Rousseau and Revolution (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introductory study of the French philosopher and novelist Jean-Jacques Rousseau and the age of revolution in France, Germany, and England. Topics include social inequality, slavery, gender, subjectivity, violence, and political rights. All readings are in English. Cross-listed with CPLT 132 and FREN 132.

GER 134 Cinematic War Memory (4) Lecture, 3 hours; screening, 2 hours; extra reading, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Examines cinematic confrontations involving World War II in Germany and Japan. Topics include desire between victims and perpetrators, representation of trauma, and ethical responsibility. All screenings have English subtitles. Cross-listed with CPLT 134, JPN 134, and MCS 114.

GER 136 The Enlightenment and Its Consequences: Modern Europe in the Arts (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores the basic ideas of modernity in Europe that are central to the history of western cultures and civilization. Focuses on the function of the arts and sciences in relation to the philosophy and concepts of the Enlightenment. Addresses humankind's changing relationship to religion, state, society, and history, as well as new strategies of self-reflection. Cross-listed with CPLT 136.

GER 137 Passions, Apparitions, and Automata (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introductory study of German Romanticism from its origins in Goethe to its development in Hoffmann. Topics include madness, sexual desire, doppelgänger, homicide, and *automata*. All readings are in English; selected readings are in German for German majors and minors. Cross-listed with CPLT 137 and EUR 137.

GER 163 Modern German History through Film (4)

Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores twentieth-century German history through film. Includes World Wars I and II, inflation and polarization of classes, Nazi Germany, representations of the Holocaust, and a divided and reunited Germany. Cross-listed with CPLT 115, HISE 163, and MCS 115.

GER 172 Reading Philosophical German (4)

Lecture, 3 hours; written work, 3 hours. Prerequisite(s): GER 002R or GER 004 or consent of instructor. Develops reading strategies and translation skills for German philosophical texts through a review of grammar and readings in the original language. Prepares for a graduate-level translation exam and independent research in German. Intermediate to advanced German reading proficiency required; familiarity with German philosophical works is recommended but not required. Cross-listed with PHIL 172.

GER 173 The Age of Goethe (4)

Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores the mature work of Goethe against the dual backdrops of Klassik and Romantik. Considers works by Schiller, Kleist, Holderlin, the Schlegels, and E.T.A. Hoffmann in analysis of early nineteenth-century literary currents in Germany. **Hammer**

GER 185 Currents in Modern German Literature (4)

Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Analysis and interpretation of such major modern writers as Brecht, Mann, and Kafka.

GER 190 Special Studies (1-5)

Tutorial, 1-4 hours. To be taken with the consent of the department chair as a means of meeting special curricular problems. Course is repeatable.

Graduate Courses

GER 290 Directed Studies (1-6) Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

GER 291 Individual Studies in Coordinated Areas (1-6)

A program of studies designed to advise and assist candidates who are preparing for examinations. Open to M.A. and Ph.D. candidates. Does not count toward the unit requirement for the M.A. Graded Satisfactory (S) or No Credit (NC). May be repeated quarterly until the qualifying examinations are completed.

GER 292 Concurrent Analytical Studies (2)

Outside research, 6 hours. Prerequisite(s): consent of instructor; concurrent enrollment in German 100-series course. To be taken on an individual basis. Student will complete a graduate paper based on research related to the German 100-series course. Course is repeatable with different topic.

GER 299 Research for Thesis or Dissertation (1-12)

Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Courses

CPLT 301 Teaching of Foreign Language at the College Level (4)

Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing, or senior standing with consent of instructor. Covers first and second language acquisition; general models of L2 learning; learning different types of grammar; learning other components of language: acquisition of pronunciation, vocabulary, and discourse; multilingual societies and the goals of language teaching; and implications of second language acquisition research for the foreign language classroom. Graded Satisfactory (S) or No Credit (NC).

GER 302 Teaching Practicum (1-4)

Practicum, 3-12 hours. Prerequisite(s): CPLT 301 or equivalent; graduate standing; employment as a teaching

assistant or associate in. Supervised teaching in lower-division courses. Required of all teaching assistants in German. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Major

The Japanese Major enables students to acquire advanced proficiency in the Japanese language and to develop critical thinking skills in their analysis of Japanese literary, filmic, and social texts. Student are encouraged to study in Japan through the University of California's numerous Education Abroad Programs.

1. Lower-division requirements (16 units plus language proficiency)

- a) Proficiency in Japanese through the intermediate level (JPN 006 or its equivalent)
- b) Eight (8) units from lower-division lecture courses on Japanese literature and culture: AST 022/JPN 022/MCS 022, AST 023/CPLT 023/JPN 023, AST 032/JPN 032, AST 034/JPN 034, AST 056/CPLT 056/JPN 056, JPN 035. and any other lower-division lecture courses on Japanese literature, culture, and film chosen in consultation with the student's advisor.
- c) Eight (8) units from CPLT 001 or CPLT 001W, CPLT 002.

2. Upper-division requirements (36 units)

- a) Twelve (12) upper-division units in Japanese language from JPN 101A, JPN 101B, JPN 101C, JPN 110. Students whose proficiency exceeds the 101 series should take the 12 required units by taking 110 more than once, by using EAP language courses, or, under the JPN 190 rubric, by converting an existing "content" course into a language course with the instructor's help.

b) Twenty (20) units in upper-division Japanese literature and culture from AST 150/JPN 150, AST 151/JPN 151, AST 152 (E-Z)/JPN 152 (E-Z), AST 153 (E-Z)/JPN 153 (E-Z), AST 184/JPN 184, AST 190, CPLT 134/GER 134/JPN 134/MCS 134, CPLT 142J/WMST 142J, CPLT 145/JPN 145, JPN 110, JPN 190, KOR 112, and any other upper-division lecture courses on Japanese literature, culture, and film chosen in consultation with the student's advisor.

c) Four (4) units in CPLT 193. (CPLT 196 strongly recommended but not required)

Languages and Literatures/Japanese Minor

The Japanese Minor enables students to acquire intermediate proficiency in the Japanese language and to develop critical thinking skills in their analysis of these literary, filmic, and social texts. Students are encouraged to study in Japan through the University of California's numerous Education Abroad Programs.

1. Lower-division requirements (4 units plus language proficiency)

- a) Proficiency in Japanese through the intermediate level (JPN 006 or its equivalent)
- b) Four (4) units from lower-division lecture courses on Japanese literature and culture: JPN 022/AST 022/MCS 022, JPN 023/AST 023/CPLT 023, JPN 034/AST 034, JPN 035, JPN 056/AST 056/CPLT 056, and any other lower-division lecture courses on Japanese literature, culture, and film chosen in consultation with the student's advisor.

2. Upper-division requirements (20 units)

- a) Eight (8) upper-division units in Japanese language from: JPN 101A, JPN 101B, JPN 101C, JPN 110. Students whose proficiency exceeds the 101 series should take the 8 required units by taking JPN 110 more than once, by using EAP language courses, or, under the JPN 190 rubric, by converting an existing "content" course into a language course with the instructor's help.
- b) Twelve (12) units in Japanese literature and culture from: AST 190, CPLT 142J/WMST 142J, JPN 110, JPN 134/CPLT 134/GER 134/MCS 114, JPN 145/CPLT 145, JPN 150/AST 150, JPN 152 (E-Z)/AST 152 (E-Z), JPN 153 (E-Z)/AST 153 (E-Z), JPN 154 (E-Z)/AST 154 (E-Z), JPN 184/AST 184/MCS 184, JPN 190, and any other upper-division lecture courses on Japanese literature, culture, and film chosen in consultation with the student's advisor.

Japanese Courses

Foreign Language Placement Examination

A placement examination is required of all freshmen entering the College of Humanities, Arts, and Social Sciences who wish to meet the foreign language requirement with the same language taken in high school. Consult the quarterly Schedule of Classes and placementtest.ucr.edu for date and time. Transfer students who have taken a college-level language course may not take the placement examination and should consult with their advisors. No college-level credit may be duplicated. See college placement examination policy.

Lower-Division Courses

JPN 001 First-Year Japanese (4) Lecture, 4 hours. Prerequisite(s): Student must take the Japanese placement examination. An introduction to the sound system and grammar of Japanese. Emphasizes speaking, reading, writing, and comprehension skills. Classes are conducted in Japanese whenever possible. Credit is awarded for only one of the following sequences: JPN 001, JPN 002, and JPN 003; JPN 010A and JPN 010B.

JPN 002 First-Year Japanese (4) Lecture, 4 hours. Prerequisite(s): JPN 001 with a grade of "C-" or better or equivalent. An introduction to the sound system and grammar of Japanese with emphasis on speaking, reading, writing, and understanding. Classes are conducted in Japanese insofar as possible. Credit is awarded for only one of the JPN 001, JPN 002, and JPN 003 or JPN 010A and JPN 010B sequences.

JPN 003 First-Year Japanese (4) Lecture, 4 hours. Prerequisite(s): JPN 002 with a grade of "C-" or better or equivalent. An introduction to the sound system and grammar of Japanese with emphasis on speaking, reading, writing, and understanding. Classes are conducted in Japanese insofar as possible. Credit is awarded for only one of the JPN 001, JPN 002, and JPN 003 or JPN 010A and JPN 010B sequences.

JPN 004 Second-Year Japanese (4) Lecture, 4 hours. Prerequisite(s): JPN 003 with a grade of "C-" or better or JPN 010B with a grade of "C-" or better or equivalent. Introduces levels of speech and emphasizes reading and writing of advanced prose.

JPN 005 Second-Year Japanese (4) Lecture, 4 hours. Prerequisite(s): JPN 004 or equivalent. Concentrates on advanced speech levels and their cultural underpinnings.

JPN 006 Second-Year Japanese (4) Lecture, 4 hours. Prerequisite(s): JPN 005 or equivalent. Emphasizes the academic style of written and spoken Japanese and academic comprehension of the cultural background.

JPN 010A Intensive First-Year Japanese (6) Lecture, 4 hours; discussion, 2 hours. Prerequisite(s): Student must take the Japanese placement examination. An intensive introduction to Japanese. Addresses speaking, reading, writing, and comprehension skills. The JPN 010A and JPN 010B sequence covers the same material as the JPN 001, 002, and 003 sequence. Credit is awarded for only one of the following sequences: JPN 001, JPN 002, and JPN 003; JPN 010A and JPN 010B.

JPN 010B Intensive First-Year Japanese (6) Lecture, 4 hours; discussion, 2 hours. Prerequisite(s): JPN 010A with a grade of "C-" or better or equivalent. Conclusion of intensive first-year Japanese, with emphasis among speaking, reading, writing, and understanding. The intensive JPN 010A and JPN 010B sequence covers the same material as the JPN 001, JPN 002, and JPN 003 sequence. Credit is awarded for only

one of the JPN 001, JPN 002, and JPN 003 or JPN 010A and JPN 010B sequences.

JPN 022 Introduction to Japanese Film (4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. An introduction to Japan's major directors and to watching and writing about Japanese film. Works studied range from the samurai epics of Kurosawa to recent anime. All films have subtitles. No previous knowledge of Japanese language or culture is required. Cross-listed with AST 022 and MCS 022.

JPN 023 Modern Japan and Personal Narrative (4) Lecture, 3 hours; extra reading, 1.5 hours; written work, 1.5 hours. Introduces major debates in history, politics, and culture through the genres of biography, autobiography, diary, and confession. Explores the parallel construction of the modern nation, the modern language, and the modern self. Traces the development of Japan's "I-novel." Builds skills in close reading by studying the rhetoric of self-narrative. Cross-listed with AST 023 and CPLT 023.

JPN 034 Introduction to Classical Japanese Literature (4) Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): none. A survey of some of the more famous works of premodern Japanese literature from 10th century poetry collections to 18th century puppet plays. Focuses on the relationship among aesthetics, politics, language, and gender. Assignments include manga translations, creative writing, and intensive Web research. Cross-listed with AST 034.

JPN 035 Modern Japanese Society (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. An introduction to Japanese culture and society with emphasis on the day-to-day lives of the modern Japanese people at home, work, and play.

JPN 056 Cultures of the Japanese Empire (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Covers the social histories and literatures of the Japanese Empire from the foundation of the Meiji state to the present. Includes the Ainu, Okinawan, Taiwanese, and Korean cultures. Explores the concepts of assimilation, citizenship, national language, nation-state, sovereignty, total war, and translation. Utilizes readings in English. Cross-listed with AST 056 and CPLT 056.

JPN 090 Special Studies (1-5) Individual study, 3-15 hours. To be taken with the consent of the Chair of the Department as a means of meeting special curricular problems in either language or literature. Course is repeatable.

Upper-Division Courses

JPN 101A Third-Year Japanese (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): JPN 006. Designed to develop students' reading, writing, and speaking abilities in Japanese. The course is conducted in Japanese.

JPN 101B Third-Year Japanese (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): JPN 101A. Designed to develop students' reading, writing, and speaking abilities in Japanese. The course is conducted in Japanese.

JPN 101C Third-Year Japanese (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): JPN 101B. Designed to develop students' reading, writing, and speaking abilities in Japanese. The course is conducted in Japanese.

JPN 110 Advanced Reading in Japanese (4) Lecture, 3 hours; extra reading, 1 hour; written work, 2 hours. Prerequisite(s): previous or concurrent enrollment in JPN 101C or equivalent. Reading of extended authentic texts in Japanese. Texts may include newspaper or magazine articles, literature, or nonfiction. Emphasis may extend to translation, textual analysis, basic research using primary sources, or discussion of texts in Japanese. Course is repeatable as content changes.

JPN 134 Cinematic War Memory (4) Lecture, 3 hours; screening, 2 hours; extra reading, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Examines cinematic confrontations involving World War II in Germany and Japan. Topics include desire between victims and perpetrators, representation of trauma, and ethical responsibility. All screenings have English subtitles. Cross-listed with CPLT 134, GER 134, and MCS 114.

JPN 145 Modern Japanese Thought (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Survey of modern Japanese thought from a theoretical and intellectual historical perspective. Topics include philosophical discussions of modernization, "Westernization," nationalism, colonialism and imperialism, "comfort women," Japanese war crimes in continental Asia, the American bombing of Hiroshima and Nagasaki, post-World War II remembrance and denial. All readings are in English. Cross-listed with CPLT 145.

JPN 150 In Women's Hands: Reading Japanese Women Writers (4) Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines major works of Japanese women writers from Heian (ninth century) to contemporary, focusing on themes, genres, representations of gender, ideas of love and romance, and feminine aesthetics. Readings include fiction, poetry, essays, and drama, with the main emphasis on fictional writing. Classes are conducted in English. Cross-listed with AST 150.

JPN 152 (E-Z) Themes in Modern Japanese Literature (4) Lecture, 2 hours; discussion, 1 hour; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to modern Japanese literature in translation, as seen through the lens of a particular theme or issue. All materials read or viewed in English. E. The End of the World in Japanese Literature; F. The Mask in Japanese Fiction; G. Love and Death; J. Classics and Canon; K. Dreams and Other Virtual Worlds. Cross-listed with AST 152 (E-Z).

JPN 153 (E-Z) Themes in Early Japanese Literature (4) Lecture, 2 hours; discussion, 1 hour; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. An introduction to early Japanese literature, as seen through the lens of a particular theme or issue. All works are read in English translation. E. Supernatural Japan; F. Warrior Japan; G. The Culture of the Floating World: Tokugawa Period Literature, Drama, and Art. Cross-listed with AST 153 (E-Z).

JPN 154 (E-Z) Themes in the Folklore and Popular Culture of Japan (4) Lecture, 2 hours; discussion, 1 hour; extra reading, 1 hour; written work, 2 hours. Prerequisite(s): upper-division standing or consent of instructor. Topics include myth, legend, folktales, folk performance, festival, ritual, and the development of popular or commercial culture. Considers literary versus oral tradition, ethnic identity, authenticity, nationalism, modernity, commodification, and the invention of tradition. E. Ancient Myth to Contemporary Legend: A Study of Japanese Folk Narrative; F. History of Japanese Popular Culture. Cross-listed with AST 154 (E-Z).

JPN 180 Japanese Documentary (4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Studies the history of Japanese documentary cinema. Teaches strategies for reading nonfiction visual narrative. Explores other forms of documentation controversial in modern Japanese history including oral testimony, photography, and internet activism. Topics may include war, war protest, peace activism, environmental activism, nuclear politics, and green energy. Course is repeatable as topics and instructor change to a maximum of 8 units. Cross-listed with AST 180 and MCS 180.

JPN 184 Japanese Media and Cultural Studies (4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. In-

investigates Japanese media and culture including film, television, video games, *manga* (comics), *anime*, music, and print and digital media. Analyzes the function of media relating to issues of national identity, imperial culture, collective memory, and censorship. Includes transnational circulation of Japanese cultural forms, alternative media, and historical changes in technologies. Cross-listed with AST 184 and MCS 184.

JPN 190 Special Studies (1-5) Individual study, 3-15 hours. Prerequisite(s): upper-division standing or consent of instructor. To be taken with the consent of the Chair of the Department as a means of meeting special curricular problems in either language or literature. Course is repeatable.

Languages and Literatures/Korean Minor

The Korean minor provides students with the knowledge of Korean language, literature, culture, and society.

1. Lower-division requirements (8 units plus language proficiency)

- Proficiency in Korean through the intermediate level, KOR 005 (second year)
- Eight (8) units from lower-division lecture courses on Korean literature and culture: KOR 042, KOR 047/AST 047/MCS 047

2. Upper-division requirements (16 units)

- Four (4) upper-division units in Korean language from KOR 101
- Eight (8) units in Korean literature and culture from KOR 110 (E-Z), KOR 112/AST 112, Four (4) units in Asian literatures and cultures: can be chosen from all the upper-division lecture courses on Asian literature and culture from the department as well as Korea-related upper-division courses from other departments (with adviser's consent), including the courses listed under (2)

Korean Courses

Foreign Language Placement Examination

A placement examination is required of all freshmen entering the College of Humanities, Arts, and Social Sciences who wish to meet the foreign language requirement with the same language taken in high school. Consult the quarterly Schedule of Classes and placementtest.ucr.edu for date and time. Transfer students who have taken a college-level language course may not take the placement examination and should consult with their advisors. No college-level credit may be duplicated. See college placement examination policy.

Lower-Division Courses

KOR 001 First-Year Korean (4) Lecture, 4 hours. Prerequisite(s): Student must take the Korean placement examination. An introduction to the sound system and grammar of Korean. Emphasizes reading, writing, understanding, and speaking. Credit is awarded for only one of the following sequences: KOR 001, KOR

002, KOR 003, and KOR 004; KOR 001, KOR 002, and KOR 020B; KOR 020A and KOR 020B.

KOR 002 First-Year Korean (4) Lecture, 4 hours. Prerequisite(s): KOR 001 with a grade of "C-" or better or equivalent. An introduction to the sound system and grammar of Korean with emphasis on reading, writing, understanding, and speaking. Credit is awarded for only one of the following sequences: KOR 001, KOR 002, KOR 003, and KOR 004; KOR 001, KOR 002, and KOR 020B; KOR 020A and KOR 020B.

KOR 003 First-Year Korean (4) Lecture, 4 hours. Prerequisite(s): KOR 002 with a grade of "C-" or better or equivalent. An introduction to the sound system and grammar of Korean with emphasis on reading, writing, understanding, and speaking. Credit is awarded for only one of the following sequences: KOR 001, KOR 002, KOR 003, and KOR 004; KOR 001, KOR 002, and KOR 020B; KOR 020A and KOR 020B.

KOR 004 Second-Year Korean (4) Lecture, 4 hours. Prerequisite(s): KOR 003 with a grade of "C-" or better or equivalent. A continuation of Korean language study. Emphasizes reading, writing, grammar, and conversation. Credit is awarded for only one of the following sequences: KOR 001, KOR 002, KOR 003, and KOR 004; KOR 001, KOR 002, and KOR 020B; KOR 020A and KOR 020B.

KOR 005 Second-Year Korean (4) Lecture, 4 hours. Prerequisite(s): KOR 004 or KOR 020B. A continuation of Korean language study. Emphasizes reading, writing, grammar, and conversation. Conducted primarily in Korean.

KOR 020A First-Year Korean for Heritage Learners (4) Lecture, 4 hours. Prerequisite(s): Student must take the Korean placement examination. A first-year Korean course designed for heritage learners who have some proficiency in listening comprehension and speaking but are unable to read and write in Korean. Credit is awarded for only one of the following sequences: KOR 001, KOR 002, KOR 003, and KOR 004; KOR 001, KOR 002, and KOR 020B; KOR 020A and KOR 020B.

KOR 020B First-Year Korean for Heritage Learners (4) Lecture, 4 hours. Prerequisite(s): KOR 002 with a grade of "C-" or better or KOR 020A with a grade of "C-" or better or equivalent or a sufficiently high test score on the Korean placement examination as determined by the department faculty. A first-year Korean course designed for heritage learners who have some proficiency in listening comprehension and speaking but are unable to read and write in Korean. Credit is awarded for only one of the following sequences: KOR 001, KOR 002, KOR 003, and KOR 004; KOR 001, KOR 002, and KOR 020B; KOR 020A and KOR 020B.

KOR 042 Korean Culture and Society (4) Lecture, 3 hours; screening, 15 hours per quarter; extra reading, 1.5 hours. Prerequisite(s): none. An introduction to major themes, events, and trends in Korean culture and society. Covers the end of the nineteenth century to the present. All readings are in English, and all films have subtitles.

KOR 047 Introduction to Korean Film (4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. An introduction to the major directors and films of Korea. Covers the genres and periods of works produced from the 1960s to the present. All films have English subtitles. No previous knowledge of Korean language or culture required. Cross-listed with AST 047 and MCS 047.

Upper-Division Course

KOR 101 Advanced Korean (4) Lecture, 3 hours; written work, 3 hours. Prerequisite(s): KOR 005 or consent of instructor. Designed to develop students' fluency in Korean to the level of intellectual conversation. Students review Korean web sites, view Korean films, read Korean short stories and journal articles,

and discuss current issues of Korean society. Course is repeatable as content changes.

KOR 110 (E-Z) Themes in Modern and Contemporary Culture of Korea (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores themes of modern and contemporary Korean literature and culture. M. History, Memory, and Nostalgia; T. Tradition of Social Criticism.

KOR 112 Modern Korean Literature (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A study of modern Korean literature from the colonial era to the present. Topics include colonialism; cultural influence and exchange; gender, family and sexuality; nation and nationalism; Confucian tradition and patriarchal culture; and modernization and capitalism. Cross-listed with AST 112.

KOR 120 Narrating the Korean War (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores the Korean War from various perspectives and through diverse reading and visual material (including film). Topics and themes may include narrative techniques, colonialism, imperialism, militarism, humanism, nationalism, the East/West relationship, and gender ideologies.

Languages and Literatures/Languages

Committee in Charge

Thomas F. Scanlon, Ph.D., Chair *Classics/Comparative Ancient Civilizations/Comparative Literature*
Heidi Waltz, Ph.D. *Linguistics/Germanic Studies*
Yenna Wu, Ph.D. *Chinese/Civilizations/Comparative Literature*
Stephen E. Cullenberg, Ph.D.
Dean, *College of Humanities, Arts, and Social Sciences, ex officio*

Major

The B.A. in Languages enables a student to specialize in two foreign languages through the acquisition of language competencies, as well as exposure to the theoretical basis and structure of language itself (linguistics), and the study of the cultural and literary practices, which the target languages reflect and enact. Students interested in a single language concentration should see individual language program listings in this catalog.

Two Foreign Languages Option

- CPLT 001 or CPLT 001W, CPLT 002, and LING 020
- Elementary and intermediate courses in languages one and two as required
- Sixty-four (64) upper-division units distributed as follows:
 - Language one — 28 units which must include the following minimums:
 - Sixteen (16) units in language
 - Twelve (12) units in literature and culture
 - Language two — 20 units which must include the following minimums:
 - Twelve (12) units in language

- (2) Eight (8) units in literature and culture
- c) LING 111 — 4 units
- d) One other course in Linguistics — 4 units
- e) Four (4) units of electives in any of the above-mentioned areas
- f) CPLT 193 (4 units). CPLT 196 strongly recommended by not required.)

Subject abbreviation: RUSN

Committee in Charge

Thomas F. Scanlon, Ph.D., Chair *Classics/Comparative Ancient Civilizations/Comparative Literature*

Ekaterina Yudina, Ph.D. *Russian*

Stephen E. Cullenberg, Ph.D.

Dean, College of Humanities, Arts, and Social Sciences, ex officio

Students are encouraged to consider opportunities for study through the Education Abroad Program (EAP). This is an excellent opportunity to become deeply familiar with another country and its culture while earning academic units towards graduation. Students should plan study abroad well in advance to ensure that the courses taken fit with their overall program at UCR. Consult the departmental student affairs officer for assistance. For further details, visit UCR's Off Campus Academic Experiences at eapoap.ucr.edu or call (951)827-2508.

See Education Abroad Program in the Educational Opportunities section of this catalog. A list of participating countries is found under Education Abroad Program in the Programs and Courses section. Search for programs by specific areas at eap.ucop.edu/ourprograms.

Major

The Russian Studies B.A. has been developed for students who are interested in Russian language and literature, Russian history and civilization.

Individual major programs are dependent upon the students' particular interests. In consultation with the advisor, each student plans a coherent program of courses to meet the requirements for the major. Normally, students' programs are submitted for approval no later than the beginning of their junior year.

1. Lower-division requirement: CPLT 001 or CPLT 001W, and CPLT 002
2. Upper-division requirements
 - a) Language requirement: 12 units from RUSN 101 (E-Z), RUSN 102 (E-Z), RUSN 120 (E-Z), RUSN 103
 - b) Literature requirement: 12 units from RUSN 109A, RUSN 109B, RUSN 109C
3. Civilization requirements: 12 units from EUR 111A, EUR 111B, EUR 111C
4. CPLT 193 (4 units). (CPLT 196 strongly recommended but not required)

In addition, 20 units are selected from appropriate courses in other programs, including linguistics, comparative literature, Russian history, economics, and political science chosen in consultation with a faculty advisor. Total upper-division units: 60.

Minor

The department offers a 24-unit disciplinary minor in Russian Studies.

The requirements for the minor are as follows:

1. Eight (8) units of RUSN 101 (E-Z), RUSN 102 (E-Z), RUSN 103
2. Sixteen (16) units of Russian Literature and Civilization courses chosen from the following:
 - RUSN 109A, RUSN 109B, RUSN 109C, RUSN 120 (E-Z)
 - EUR 111A, EUR 111B, EUR 111C

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Foreign Language Placement Examination

A placement examination is required of all freshmen entering the College of Humanities, Arts, and Social Sciences who wish to meet the foreign language requirement with the same language taken in high school. Consult the quarterly Schedule of Classes and placementtest.ucr.edu for date and time. Transfer students who have taken a college-level language course may not take the placement examination and should consult with their advisors. No college-level credit may be duplicated. Lower-Division Courses

RUSN 001 Elementary Russian (4) Lecture, 4 hours. Prerequisite(s): none. An introduction to the sound system and grammar of Russian, with attention to the development of the four skills of listening, speaking, reading, and writing.

RUSN 002 Elementary Russian (4) Lecture, 4 hours. Prerequisite(s): RUSN 001 with a grade of "C-" or better. An introduction to the sound system and grammar of Russian. Focuses on the development of the four skills of listening, speaking, reading, and writing.

RUSN 003 Elementary Russian (4) Lecture, 4 hours. Prerequisite(s): RUSN 002 with a grade of "C-" or better. An introduction to the sound system and grammar of Russian. Focuses on the development of the four skills of listening, speaking, reading, and writing.

RUSN 004 Intermediate Russian (4) Lecture, 4 hours. Prerequisite(s): RUSN 003 with a grade of "C-" or better. A comprehensive review of the basic grammatical structures of Russian. Includes irregular and idiomatic forms, vocabulary building, and development of conversation and composition skills.

RUSN 027 Russian Conversation (1) Discussion, 1 hour. Prerequisite(s): RUSN 001. Weekly discussion of topics of current interest, intended to develop and maintain basic conversational skills. Graded Satisfactory (S) or No Credit (NC). May be repeated for credit for a total of 6 units.

RUSN 045 Soviet Cinema (4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): none. A survey of

the Soviet cinema, beginning with the film innovations of the 1920s and continuing with representative films from each of the ensuing periods of Soviet culture. All work done in English. Cross-listed with MCS 043.

RUSN 090 Special Studies (1-5) To be taken with the consent of the chair of the department as a means of meeting special curricular problems. Course is repeatable.

Upper-Division Courses

RUSN 101 (E-Z) Advanced Russian (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): RUSN 004 or consent of instructor. Students read texts in literature and expository prose, with attention to usage, style, grammar, and interpretation. Emphasis on developing reading and translating skills for adult-level reading competence. G. Readings from Poetry; J. Readings from Soviet Literature; M. Readings from Drama; N. Readings in History; O. Readings in Social Science; Q. Readings in Newspapers and Popular Literature; R. Readings from Classics of Russian Literature.

RUSN 102 (E-Z) Advanced Russian: Grammar (2) Lecture, 2 hours. Prerequisite(s): RUSN 004 or consent of instructor. Each segment will deal with a specific topic in Russian grammar at an advanced level. Texts or materials vary from quarter to quarter. E. Nominal Declensions; F. Syntax I; G. Phonetics; I. Syntax II; J. Syntax III; K. Vocabulary Building; M. Verb Morphology.

RUSN 103 Advanced Russian Conversation and Composition (2) Lecture, 2 hours. Prerequisite(s): RUSN 004 or consent of instructor. Conversation and short compositions in Russian. Intended to develop and maintain basic conversational and writing skills. Course is repeatable to a maximum of 8 units.

RUSN 109A Survey of Russian Literature in Translation (4) F Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introduction to major literary figures and representative masterpieces of the Golden Age (1830-1880). Any course in the RUSN 109A, RUSN 109B, and RUSN 109C sequence may be taken independently.

RUSN 109B Survey of Russian Literature in Translation (4) W Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introduction to major literary figures and representative classics of the late nineteenth century and prerevolutionary twentieth century (1880-1917). Any course in the RUSN 109A, RUSN 109B, and RUSN 109C sequence may be taken independently. **Danow**

RUSN 109C Survey of Russian Literature in Translation (4) S Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introduction to major literary figures and representative works of the Soviet period (1917-1991). Any course in the RUSN 109A, RUSN 109B, and RUSN 109C sequence may be taken independently. **Danow**

RUSN 120 (E-Z) Studies in Russian Literature (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): RUSN 004 or consent of instructor. Analysis and discussion of representative works of Russian literature. Readings are in Russian and vary from quarter to quarter. F. Readings in Twentieth Century; G. Readings in Nineteenth Century.

RUSN 190 Special Studies (1-5) To be taken with the consent of the chairman of the department as a means of meeting special curricular problems. Course is repeatable.

RUSN 195 Senior Thesis (1-4) Outside research, 3-12 hours. Prerequisite(s): senior standing and consent

of instructor. The student works independently with a faculty member doing research and preparing a thesis as a final phase of the student's major.

Graduate Courses

CPLT 290 Directed Studies (1-6) Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CPLT 290 (E-Z) Directed Studies (1-6) Outside research, 3-18 hours. Prerequisite(s): graduate standing; consent of instructor and department chair. To be taken as a means of meeting special curricular needs in literature. E. English; F. French; G. German; H. Greek; I. Italian; J. Japanese; K. Chinese; L. Latin; M. Latin American; R. Russian; S. Spanish; T. Scandinavian; U. American; V. Slavic. Segments are repeatable.

RUSN 292 Concurrent Analytical Studies (2) Outside research, 6 hours. Prerequisite(s): consent of instructor; concurrent enrollment in RUSN 100-series course. To be taken on an individual basis. Student will complete a graduate paper based on research related to the RUSN 100-series course. May be repeated with different topic. RUSN 103 may not be used for RUSN 292.

Professional Courses

CPLT 301 Teaching of Foreign Language at the College Level (4) Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing, or senior standing with consent of instructor. Covers first and second language acquisition; general models of L2 learning; learning different types of grammar; learning other components of language: acquisition of pronunciation, vocabulary, and discourse; multilingual societies and the goals of language teaching; and implications of second language acquisition research for the foreign language classroom. Graded Satisfactory (S) or No Credit (NC).

RUSN 302 Teaching Practicum (1-4) Practicum, 3-12 hours. Prerequisite(s): CPLT 301 or equivalent; graduate standing; employment as a teaching assistant or associate in. Supervised teaching in lower-division courses. Required of all teaching assistants in Russian. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Linguistics

Subject abbreviation: LING

College of Humanities, Arts, and Social Sciences

Peter Graham (Philosophy)
Covadonga Lamar-Prieto (Hispanic Studies)
Larry Rosenblum (Psychology)

Melanie Sperling (School of Education)
Stanley Stewart (English)
Heidi Waltz (Comparative Literature & Foreign Languages)
Howard Wettstein (Philosophy)
Stephen E. Cullenberg, Ph.D.
Dean, College of Humanities, Arts, and Social Sciences, ex officio

Linguistics is the science of language. It seeks to discover the psychological and motor mechanisms of human speech, the similarities and differences among languages, how languages change, and the way in which language is acquired. Because linguistics

is largely independent of fields with which the student is likely to be familiar, no special background is required for students entering the major.

Linguistics interacts with a wide variety of fields, such as articulatory phonetics (biology), acoustic phonetics (physics), field methods (anthropology), language and culture (anthropology), sociolinguistics, psycholinguistics, neurolinguistics, logic, the philosophy of language, and the study of particular languages (including their history). This interaction provides opportunities for students with varied interests and can give new perspectives to those in related disciplines.

Major

Upon electing the linguistics major, and certainly no later than the middle of the sophomore year, a student should see the Director of the Linguistics Committee for advising.

The director can help students find a suitable advisor to file the necessary forms. In consultation with an advisor, a student plans a coherent program of specific courses to meet the requirements below. The student and the advisor must then submit a copy of the program to the full Committee on Linguistics for approval.

Students interested in the linguistics major should request from the committee director information concerning the many possible course programs. Many of them permit double majors, thus providing strong preparation for further study in two fields.

Students may add variety and depth to their UCR linguistics major by attending a Summer Program in Linguistics (held in various places) or by participating in the Education Abroad Program (EAP). This is an excellent opportunity to become deeply familiar with another country and its culture while earning academic units towards graduation. Students should plan study abroad well in advance to ensure that the courses taken fit with their overall program at UCR. Consult the departmental student affairs officer for assistance. For further details, visit UCR's Off Campus Academic Experiences at eapop.ucr.edu or call (951)827-2508.

See Education Abroad Program in the Educational Opportunities section of this catalog. A list of participating countries is found under Education Abroad Program in the Programs and Courses section. Search for programs by specific areas at eap.ucop.edu/ourprograms.

Requirements for the major are as follows:

1. LING 020
2. Twenty-four (24) upper-division units distributed as follows:
 - a) LING 111, LING 121, LING 131, LING 141
 - b) ANTH 123
 - c) PHIL 132 or PSYC 135
3. At least 12 additional upper-division units of linguistic electives, to be chosen in

consultation with the advisor and with the approval of the Linguistics Program director. (The additional courses may be in linguistics or in related fields. They may relate either to a particular field or specialization or to general linguistics.)

4. Foreign language proficiency equivalent to six quarters (24 units) of study, including at least fourth-quarter proficiency in one language. (Students may arrange with the director to satisfy this requirement by examination.)

Honors Program in Linguistics

1. Linguistics requirement: LING 020, LING 111, LING 121, LING 141, LING 190, LING 191
2. Related courses requirement:
 - a) ANTH 120, ANTH 123
 - b) ENGL 112
 - c) CS 008, CS 010, CS 012
 - d) MATH 144
 - e) PHIL 008 or PHIL 008H
 - f) Additional courses as may be required by the Linguistics Committee
3. Language Requirement — study in at least two language areas:
 - a) Primary language: 24 units of foreign language instruction in a single language (this may include any courses taught in that language) plus courses in the structure, phonetics and history of the primary language, if available
 - b) Secondary language: 16 units of a single language or at least 8 units in each of two languages (none of which may be members of the same subfamily of Indo-European as the primary language) plus at least 8 units in the structure, phonetics, or history of the language(s) chosen for the secondary area

In fulfilling the language requirement, students interested in earning a degree beyond the B.A. should take into account the foreign language requirements of the graduate schools to which they may apply. Students must have at least a 3.00 GPA in courses required for the Honors Program.

Lower-Division Courses

LING 020 Language and Linguistics (4) Lecture, 3 hours. An introduction to modern linguistics. The nature of language; language structure; grammars; the languages of the world; historical and comparative linguistics; interdisciplinary approaches, including anthropological and psycholinguistics. **Megenney, Waltz**

LING 021 Grammar (4) Lecture, 3 hours; consultation, 1 hour. Fundamental concepts of grammatical structure: parts of speech, paradigms, word families, agreement and government, the grammar of sentences and longer units of discourse; style.

Upper-Division Courses

LING 111 Phonetics (4) Lecture, 3 hours; laboratory, 1 hour; outside research, 1 hour; extra reading, 1 hour. Prerequisite(s): LING 020. Practice in pronouncing and recognizing sounds from many languages. Covers methods of transcribing and analyzing these sounds.

LING 121 Syntax (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): LING 020. Survey of various approaches to syntax, including transformational. Syntactic structures of English and other languages are examined. Applications: English, foreign languages, philosophy, mathematics. **Kronenfeld, Waltz**

LING 131 Morphology (4) Lecture, 3 hours; seminar, 1 hour. Prerequisite(s): LING 020, LING 111 or LING 121. Studies word structure, the lexical component of language, allomorphy, types of morphemes, and inflexional and derivational morphology. Examines various theories of lexical/morphological organization in the brain. Examples are taken from English and other Indo-European languages.

LING 141 Phonology (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): LING 111. Introduction to the study of functional sound units in speech, including phonotactics, morphophonemics. Various theories are examined, including generative. Applications: speech correction, speech analysis, English, foreign languages. **Levin**

LING 151 Semantics (4) Lecture, 3 hours; extra reading, 1 hour; outside research, 1 hour; term paper, 1 hour. Prerequisite(s): LING 121. Introduces the study of meaning and its metalinguistic preliminaries. Explores lexical, sentence, and utterance meaning (including speech acts, text, and discourse). Provides a survey of theories of meaning, such as structural semantics and language as a semiotic system.

LING 160 (E-Z) Topics in Dynamic and Comparative Linguistics (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): LING 111; LING 121 or LING 141. Comparative analyses of language groups such as Spanish and Portuguese, Slavic languages, and Native American languages. E. Historical Linguistics; F. Dialectology; G. Language Change; I. Sociolinguistics.

LING 162 Language and the Brain (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): LING 020. Introduces the study of language and the brain, including speech production and comprehension, neurolinguistics, and aphasiology. Explores language acquisition problems, links between language knowledge and language use, speech disorders, and aphasia types. Presents neurolinguistic case studies with evidence from split-brain patients and fMRI data.

LING 167 Structural/Descriptive Linguistics (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): LING 020 or consent of instructor. An overview, from the original sources, of the contribution of major figures and schools in linguistics from Saussure through early Chomsky. Cross-listed with ANTH 167. **Kronenfeld**

LING 190 Special Studies (1-5) To be taken with the consent of the chair of the Committee as a means of meeting special curricular problems. Course is repeatable.

LING 192 Tutorial Activities (1-2) Prerequisite(s): junior or senior standing and nomination by faculty. Enlarging understanding of linguistics through conducting tutorial sessions in introductory courses, under the supervision of faculty members responsible for the courses involved. Graded Satisfactory (S) or No Credit (NC). May be repeated for a maximum of three quarters.

LING 195 Senior Thesis (2-4) Thesis, 6-12 hours. Prerequisite(s): senior standing or consent of instructor. Independent research and preparation of a thesis completed under the supervision of a faculty member. Course is repeatable to a maximum of 12 units.

LING 195H Senior Honors Thesis (2-4) Thesis, 6-12 hours. Prerequisite(s): invitation by faculty to pursue honors work in Linguistics; senior standing or consent of instructor. Intensive study, research, and preparation of a thesis in consultation with a faculty member. Grades are deferred until presentation of the thesis at the end of the final quarter. Satisfactory (S)

or No Credit (NC) grading is not available. To be taken during two or three successive quarters; course is repeatable to a maximum of 12 units.

Major

The Computer Engineering major stresses the study of core computer science and electrical engineering topics. It prepares students for careers in the design of complex systems involving computer hardware, computer software, electronics and electrical signals for communications, networking, desktop computing, and embedded computing.

The objective of the Computer Engineering program is to produce graduates who:

- have a mastery of the fundamental areas required for designing and using computers and engineered systems that contain computers
- have an ability to apply principles of engineering, mathematics, science, and statistics to the use, design, and interfacing of computers
- are able to apply modern design methodologies and state-of-the-art tools to design problems common to modern computer engineering practice
- have had extensive, relevant laboratory and hands-on experience to strengthen their understanding of scientific, logical, statistical, and engineering principles
- have a well-rounded and balanced education through required studies in elected areas of the humanities and social sciences

- are adept at both oral and written communication
- possess the high-quality undergraduate education necessary to progress to the M.S. and Ph.D. level or succeed in a career in industry
- understand the social, cultural, ethical, and environmental context of their work

The Computer Engineering B.S. degree program at UCR is accredited by the Engineering Accreditation Commission of ABET, abet.org. For more details, visit cen.ucr.edu.

The Intersegmental General Education Transfer Curriculum (IGETC) does not meet transfer requirements for Engineering.

All undergraduates in the College of Engineering must see an advisor at least annually. Visit student.engr.ucr.edu for details.

University Requirements

See Undergraduate Studies section.

College Requirements

See The Marlan and Rosemary Bourns College of Engineering, Colleges and Programs section.

The Computer Engineering major uses the following major requirements toward the satisfaction of some of the college's Natural Science and Mathematics breadth requirements.

1. MATH 008B or MATH 009A
2. PHYS 040A, PHYS 040B, PHYS 040C

Major Requirements

1. Lower-division requirements (72 units):

- a) ENGR 001G
- b) CS 010 or CS 10V, CS 012 or CS 012V, or CS 013, CS 014, CS 061
- c) CS 011/MATH 011
- d) EE 001A, EE 011A, EE 001B, EE 020
- e) MATH 008B or MATH 009A, MATH 009B, MATH 009C, MATH 010A, MATH 046
- f) PHYS 040A, PHYS 040B, PHYS 040C
- g) One course of 4 or more units in an engineering discipline outside the field of computer science to be selected in consultation with a faculty advisor. Either a lower-division or an upper-division course may be used to satisfy this requirement.

2. Upper-division requirements (73 units minimum)

- a) CS 100, CS 141, CS 153, CS 161, CS 161L
- b) CS 120A/EE 120A, CS 120B/EE 120B; one course from CS 122A or EE 128
- c) CS 111
- d) CS 168
- e) ENGR 180W

- f) EE 100A
- g) EE 114 or STAT 155
- h) Five courses (at least 20 units) as technical electives from the following set of Computer Science and Engineering, and Electrical Engineering upper-division courses
CS 122A, CS 122B, CS 130, CS 133, CS 150, CS 152, CS 160, CS 162, CS 164, CS 165, CS 166, CS 169, CS 170, CS 171, CS 172, CS 177, CS 179 (E-Z), CS 180, CS 181, CS 183, CS 193

EE 100B, EE 105, EE 110A, EE 110B, EE 115, EE 128, EE 132, EE 133, EE 134, EE 135, EE 140, EE 141, EE 144, EE 146, EE 150, EE 151, EE 152, EE 175A, EE 175B, EE 175C

The technical electives selected from h) must include either CS 179 (E-Z) or EE 175A and EE 175B and EE 175C. The selection of the remaining technical electives must be planned, in consultation with a faculty advisor, to include at least one coherent sequence of two classes from either Computer Science and Engineering or Electrical Engineering. The technical electives must be distinct from those used to satisfy the upper-division requirements specified in items a) and b) above.

Students may petition for exceptions to the above degree requirements. Exceptions to Computer Science course requirements must be approved by the Computer Science and Engineering undergraduate advisor or chair, and exceptions to Electrical Engineering course requirements must be approved by the Electrical Engineering undergraduate advisor or chair. Exceptions to other requirements require the approval of the undergraduate advisors or chairs of both departments.

Visit the Student Affairs Office in the College of Engineering or student.engr.ucr.edu for a sample program.

Graduate Program

The Computer Engineering program offers the B.S. + M.S. program and the M.S. degree in Computer Engineering. Specific requirements for each degree are described below.

Master's Degree

M.S. in Computer Engineering The college offers an M.S. program in Computer Engineering.

Admission All applicants to this program must have completed a bachelor's degree or its approved equivalent from an accredited institution and to have attained undergraduate record that satisfies the standards established by the Graduate Division and University Graduate Council. Applicants should have at least an undergraduate major in Computer Engineering, Computer Science, Electrical Engineering or a closely related field. Applicants who fail to meet this criterion may sometimes be admitted with course deficiencies. However, no more than three deficiencies will be allowed.

A student who is deficient in a competency area may be asked to complete the corresponding UCR course with a letter grade of at least B+, or to pass a challenge examination based on that course's final exam with a grade of at least B-. All such remedial work should be completed with the first year of graduate study, and in all cases the deficiency(s) must be corrected BEFORE a student can enroll in any graduate course from the same specialty area.

All applicants must submit scores from the Graduate Record Exam, General Test (GRE). The GRE subject test in Computer Science or Electrical Engineering is recommended but not required. Applicants whose first language is not English are required to submit acceptable scores from the TEST of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) unless they have a degree from an institution where English is the exclusive language of instruction. Additionally each applicant must submit three letters of recommendation, at least two of which must be academic references. All other application requirements are specified in the graduate application.

Prerequisite Material Competence in the areas defined by the following UCR courses is essential to graduate study in computer engineering:

EE 100A, EE 100B, CS 153, CS 161, CS 161L, CS 120A/EE 120A, CS 120B/EE 120B

A student who is deficient in any of these competency areas may be asked to complete the corresponding UCR course with a letter grade of at least B+, or to pass a challenge examination based on that course's final exam with a grade of at least B-. All such remedial work should be completed within the first year of graduate study, and in all cases the deficiency must be corrected BEFORE a student can enroll in any graduate course from the same specialty area. The admission prerequisite courses listed above may not be taken for graduate credit.

Course Requirements Students must be in residence for one year and complete a minimum of 36 quarters units of graduate and upper division undergraduate courses in or related to the major subject area. Students who have completed similar courses elsewhere may petition for waiver of a required course or for substitution of an alternative course. For students interested in interdisciplinary research, individual study programs can be approved.

1. Core Requirement (12 units). Three courses from the list of core courses below, with no grade lower than B-.

CS 201 or CS 202, CS 203, CS 220, EE 213, EE 221

2. Technical Electives (12 units). Three courses from the list of technical elective courses below.

CS 204, CS 213, CS 218, CS 223, CS 239, CS 240, CS 246, CS 255, CS 257, EE 202, EE 203, EE 210, EE 211, EE 215, EE 222, EE 226, EE 229, EE 235, EE 241, EE 243.

3. Professional Development Requirement,

Colloquium (3 units). Satisfactory completion of three quarters of CS 287 (Colloquium in Computer Science) or EE 259 (Colloquium in Electrical Engineering) in three distinct quarters.

4. Capstone Experience

All students must complete a capstone experience that synthesizes and integrates the knowledge and skills obtained throughout the master's program, by either passing a comprehensive exam, writing a thesis, or completing a project. The Comprehensive Examination plan is the default option. If a student chooses the alternative project or thesis plan, it is their responsibility to find a faculty member willing to supervise the master's project or thesis, to form the faculty examining committee, and to schedule the oral examination.

a. Comprehensive Examination (Plan I).

A minimum of 36 units are required, of which 24 must be selected from the Core Requirement and Technical Electives courses above. The remaining 12 units must be in approved graduate-level courses related to the major subject area, and/ or approved Computer Engineering undergraduate technical electives. Units obtained in graduate research for the thesis or dissertation, directed research, or directed studies (CS 290, CS 297, CS 299, EE 290, EE 297, EE 299) may not be used to satisfy any course requirements under this plan. Students must pass a comprehensive examination administered by the Computer Engineering Program.

b. Project (Plan II).

A minimum of 36 units are required, of which 24 must be selected from the Core Requirement and Technical Electives courses above. The remaining 12 units must be in approved graduate-level courses related to the major subject area, and/ or approved Computer Engineering undergraduate technical electives, and may include up to 4 units of directed research (CS 297, EE 297) and/ or directed studies (CS 290, EE 290). Units obtained in graduate research for the thesis or dissertation (CS 299, EE 299) may not be used to satisfy any course requirements under this plan. Students must complete a research project under the guidance of a faculty member. The project will be approved by a committee of at least two faculty members and requires a presentation and written report.

c. Thesis (Plan III).

A minimum of 36 units are required, of which 24 must be selected from the Core Requirement and Technical Electives courses above. The remaining 12 units must be in approved graduate-level courses related to the major subject area, approved Computer Engineering undergraduate technical electives, or graduate research for the thesis or dissertation (CS 299, EE 299). Units obtained in directed research or directed studies (CS 290, CS 297, EE 290, EE 297) may not be used to satisfy any course requirements under this plan. Students must submit a master's thesis in

accordance with the general requirements of the university. The thesis is original research work, and it should demonstrate the student's ability to study a research area, identify an open problem and make a research contribution. The thesis requires a presentation and must be approved by a committee of at least three faculty members.

Combined B.S. + M.S. Five-Year Program. The college offers a combined five year B.S. + M.S. program, designed to allow successful UCR Computer Engineering B.S. graduates to complete the Master of Science degree in Computer Engineering in one year, by allowing up to 12 credits of coursework taken as a UCR undergraduate to be counted towards the elective requirements of the M.S. (The courses that can be double counted are those that are eligible to be counted as technical electives in the B.S. requirements.)

A student may apply at the start of their senior year by submitting an application to the Computer Engineering M.S. program, provided that at the end of junior year, the student was a UCR Computer Engineering B.S. student with cumulative GPA at least 3.4 and had completed the following courses with no grade less than a B- and average grade at least 3.2: CS 100, CS 120A, CS 120B, CS 161, CS 161L. The application to the M.S. program must include at least two recommendation letters from UCR Academic Senate faculty members (at least one, and preferably both, CSE faculty). Submission of GRE scores with the application is recommended but not required. Matriculation into the combined program occurs in the Fall term following senior year, provided: (a) the M.S. application is accepted, (b) throughout senior year, the student is a Computer Engineering B.S. major with cumulative GPA 3.4 or higher, (c) by the end of senior year, the student completes the Computer Engineering B.S. degree requirements.

Incoming students who are applying to the Computer Engineering B.S. program may simultaneously apply for preliminary admission into the combined program provided their high school GPA is at least 3.6, their SAT-I combined score is at least 1950, they satisfy the Entry Level Writing requirement before matriculation, and they have sufficient math preparation to enroll in calculus upon arrival. Preliminary admission status is maintained as long as the student is a Computer Engineering or Computer Science B.S. student in good standing with a cumulative GPA of at least 3.4. Preliminarily admitted students still need to apply for full admission in their senior year as described above.

Five-year programs leading to M.S. degrees in other programs (including Computer Science) are also available. They are described separately in the catalog sections for those programs.

 Zhiyun Qian, Ph.D.
 Tamar Shinar, Ph.D.

**

Adjunct Professors

Gianfranco Ciardo, Ph.D.
 Michalis Faloutsos, Ph.D.

Cooperating Faculty

Bir Bhanu, Ph.D. (Electrical and Computer Engineering)
 Ilya Dumer, Ph.D. (Electrical and Computer Engineering)
 Thomas Girke, Ph.D. (Botany and Plant Sciences)
 Roger Lake, Ph.D. (Electrical and Computer Engineering)
 Michel L. Lapidus, Ph.D. (Mathematics)
 Erik Rolland, Ph.D. (Accounting and Information Systems)
 Amit Roy-Chowdhury, Ph.D. (Electrical and Computer Engineering)
 Thomas Stahovich, Ph.D. (Mechanical Engineering)
 Sheldon Tan, Ph.D. (Electrical and Computer Engineering)
 Qi Zhu, Ph.D. (Electrical and Computer Engineering)

Major

The Department of Computer Science and Engineering offers three majors at the undergraduate level. UCR's offerings of all three majors are unique compared to many schools in the emphasis on theoretical foundations and practical applications.

The **Computer Science** major stresses the study of core and advanced computer science topics. It prepares students for a large variety of careers in computing, including software

engineering, networks, databases, graphics, algorithms, security, system analysis, and embedded systems.

The objective of the B.S. degree program in Computer Science is to prepare graduates for professional practice in both the private and public sectors and for life-long learning, including the option for graduate degrees, by providing them with:

- **Background:** the necessary technical competencies, including knowledge of scientific principles and skill at rigorous analysis and creative design
- **Breadth:** a broad education that includes knowledge of current issues and trends in society and technology
- **Professionalism:** professional attitudes and ethics and skills for clear communication and responsible teamwork
- **Learning environment:** a learning environment that is rigorous, challenging, open, and supportive

The Computer Science B.S. degree program at UCR is accredited by the Computing Accreditation Commission of ABET, abet.org.

The **Computer Engineering** major stresses the study of core computer science and electrical engineering topics. It prepares students for careers in the design of complex systems involving computer hardware, computer software, electronics and electrical signals for communication, networking, desktop computing, and embedded computing. See Computer Engineering in this catalog.

The Computer Engineering B.S. degree program at UCR is accredited by the Engineering Accreditation Commission of ABET, abet.org.

The **Business Informatics** major covers the core of computer science and basic business and management topics. It prepares students for careers in design and management of computer and information systems, system and network administration, and e-commerce. It is also useful for careers that apply information technology to support business processes.

The objective of the B.S. degree program in Business Informatics is to prepare graduates for professional practice in both the private and public sectors and for life-long learning, including the option for graduate degrees, by providing them with:

- **Background:** the necessary technical competencies, including knowledge of scientific principles and skill at rigorous analysis and creative design
- **Breadth:** a broad education that includes knowledge of current issues and trends in society and technology
- **Professionalism:** professional attitudes and ethics and skills for clear communication and responsible teamwork
- **Learning environment:** a learning environment that is rigorous, challenging, open, and supportive

All undergraduates in the College of Engineering must see an advisor at least annually. Visit student.engr.ucr.edu for details.

University Requirements

See Undergraduate Studies section.

College Requirements

See The Marlan and Rosemary Bourns College of Engineering, Colleges and Programs section.

The **Computer Science** major uses the following major requirements toward the satisfaction of some of the college's Natural Sciences and Mathematics breadth requirements and one of the college's English Composition breadth requirements.

1. ENGR 180W
2. MATH 008B or MATH 009A
3. PHYS 040A, PHYS 040B, PHYS 040C

The **Business Informatics** major uses the following major requirements toward the satisfaction of the college's Social Sciences breadth requirements and one of the College's Natural Science and Mathematics breadth requirements.

1. ECON 002, ECON 003
2. MATH 008B or MATH 009A
3. SOC 150

Major Requirements

Computer Science Major

1. Lower-division requirements (61 units)
 - a) ENGR 001-I
 - b) CS 010 or CS 010V, CS 012 or CS 012V or CS 013, CS 014, CS 061
 - c) CS 011/MATH 011
 - d) MATH 008B or MATH 009A, MATH 009B, MATH 009C, MATH 010A, MATH 031
 - e) PHYS 040A, PHYS 040B, PHYS 040C
 - f) One course of 4 or more units in an engineering discipline outside the field of computer science to be selected in consultation with a faculty advisor. (Either a lower-division or an upper-division course may be used to satisfy this requirement.)
2. Upper-division requirements (86 units minimum)
 - a) ENGR 101-I
 - b) CS 100, CS 141, CS 150, CS 152, CS 153, CS 161, CS 179 (E-Z)
 - c) CS 120A/EE 120A, CS 120B/EE 120B
 - d) CS 111/MATH 111
 - e) ENGR 180W
 - f) STAT 155
 - g) Two courses from MATH 046, MATH 120, MATH 126, PHIL 124
 - h) At least 28 units of technical electives to be chosen from an approved list of

courses which currently includes CS 122A, CS 122B, CS 130, CS 133, CS 134, CS 145, CS 151, CS 160, CS 162, CS 164, CS 165, CS 166, CS 168, CS 169, CS 170, CS 171, CS 172, CS 177, CS 179 (E-Z) (4 units maximum), CS 180, CS 181, CS 182, CS 183, CS 193 (4 units maximum), EE 140, MATH 120, MATH 135A, MATH 135B. The technical electives selected must be distinct from those used to satisfy the requirements specified in 2.a)–h) above.

Visit the Student Affairs Office in the College of Engineering or student.engr.ucr.edu for a sample program.

Business Informatics Major

1. Lower-division requirements (56 units)
 - a) ENGR 001M
 - b) BUS 020
 - c) CS 010 or CS 010V, CS 012 or CS 012V, or CS 013, CS 014, CS 061
 - d) CS 011/MATH 011
 - e) ECON 002, ECON 003
 - f) MATH 008B or MATH 009A, MATH 009B, MATH 009C, MATH 010A, and MATH 031
2. Upper-division requirements (93 units)
 - a) ENGR 101M
 - b) BUS 103, BUS 104/STAT 104, BUS 106/ECON 134
 - c) CS 100, CS 141, CS 153, CS 165
 - d) At least two courses from CS 164, CS 166, CS 172, CS 180
 - e) CS 111/MATH 111
 - f) ENGR 180W
 - g) SOC 150
 - h) STAT 155
 - i) Sixteen (16) units of upper-division Computer Science technical electives, which must be distinct from the courses used to satisfy the above major requirements. These 16 units may be chosen from those courses listed as upper-division requirements or technical electives for the Computer Science major. At least three courses must be in the Department of Computer Science and Engineering.
 - j) Twenty-four (24) units of Business Administration technical electives, including at least 8 units of courses listed in the Information Systems concentration within the Business Administration major. These 24 units must be distinct from the courses used to satisfy the above major requirements and may be chosen from any of the available Business Administration courses, with the following restrictions: no credit will be given for BUS 101, only one of BUS 171 and CS 180 can be taken for credit, only one of BUS 173 and CS 166 can be taken for credit, only one of BUS 175 and CS 164

200 / Programs and Courses

can be taken for credit, and only one of BUS 125 and CS 177 can be taken for credit.

Students may petition for exceptions to the above degree requirements. Exceptions to Computer Science course requirements must be approved by the Computer Science and Engineering undergraduate advisor or chair.

Visit the Student Affairs Office in the College of Engineering or student.engr.ucr.edu for a sample program.

Minor in Computer Science

The minor in Computer Science is designed to enhance majors with limited computational theory or practice. As such, students with majors in Computer Engineering, Computer Science, Business Informatics, and Mathematics (Computational Mathematics option) are not eligible.

Requirements for the minor in Computer Science are:

1. Lower-division courses: CS 010 or CS 010V, CS 012 or CS 012V, or CS 013, CS 014, CS 061, CS 011/MATH 011, MATH 008B or MATH 009A, MATH 009B, MATH 009C
2. Core courses: CS 100, CS 111
3. Three elective courses, each of four or more units, such that:
 - a) Each is an upper-division requirement or a listed technical elective for the Computer Science major, excluding courses numbered 190-199
 - b) No course may be an upper-division requirement of the student's major
 - c) At least two courses must be in the Department of Computer Science and Engineering
4. All courses for the minor must be taken for a letter grade.

Note Students with a minor in Computer Science must obtain approval from the undergraduate advisor in Computer Science and Engineering for a specific program of electives consistent with their career goals.

Graduate Program

The Department of Computer Science and Engineering offers the M.S. and Ph.D. degrees in Computer Science. General requirements are listed in the Graduate Studies section of this catalog. Specific requirements for each degree are described below.

Students enrolled prior to Fall 2008 can still follow the old Graduate Program.

Admission All applicants must supply GRE General Test scores. The GRE subject test in Computer Science is recommended but not required. Applicants should have at least an undergraduate degree in computer science or a closely related field, but applicants who fail to meet this criterion may sometimes be admitted with deficiencies.

Prerequisite Material Competence in the areas defined by the following UCR courses is

essential to graduate study in computer science: CS 141, CS 150, CS 152, CS 153, CS 161.

A student who is deficient in any of these competency areas may be asked to complete the corresponding UCR course with a letter grade of at least B+, or to pass a challenge examination based on that course's final exam with a grade of at least B+. All such remedial work should be completed within the first year of graduate study, and in all cases the deficiency must be corrected before a student can enroll in any graduate course from the same specialty area.

Core Areas Students have considerable flexibility in selecting specialty area(s) within the program. However, the following core areas introduce fundamental concepts and tools of general interest to all students.

1. Hardware design principles: CS 203 or CS 220.
2. Theoretical foundations: CS 215 or CS 218.
3. Software and systems: CS 201 or CS 202.

Major Specialty Areas The department has active research programs in the following major specialty areas. A list of related graduate courses is provided for each area. Courses that qualify for the M.S. Breadth Requirement are marked with an asterisk (*).

- A. Algorithms, Bioinformatics, and Theory of Computation: CS 215*, CS 218*, CS 234, CS 238
- B. Computer Architecture, Embedded Systems, and CAD: CS 203*, CS 213, CS 220*, CS 223, EE 213
- C. Databases, Data Mining, and Machine Learning: CS 205*, CS 235*, CS 229, CS 236*, CS 272
- D. Operating Systems and Distributed Systems: CS 202*, CS 253, CS 255*, CS 237
- E. Computer Networks: CS 204*, CS 237, CS 239*, CS 240, CS 257, CS 255*
- F. Programming Languages, Compilers, and Software Engineering: CS 201*, CS 206*, CS 207*, CS 245*, CS 246*
- G. Computer Graphics and Human-Computer Interaction: CS 230*, CS 231*, CS 233, ME 230, ME 231

Master's Degree

The Department of Computer Science and Engineering offers the M.S. degree in Computer Science, after completion of the following degree requirements.

Satisfactory completion of CS 287 (Colloquium in Computer Science) each quarter of enrollment for full-time in-residence graduate students.

Course Requirements 48 quarter units of graduate or upper-division undergraduate courses are required. Students who have completed similar courses elsewhere may petition for a waiver of a required course or for substitution of an alternative course. For students interested in interdisciplinary research, individual study programs can be approved. All courses used to satisfy these requirements (with the exception of CS 297

and CS 299) must be taken for a letter grade. No course can be counted towards more than one category.

1. **Core Requirement (8 units).** Choose one course from two of the three Core Areas listed above, with no grade lower than B-.
2. **Breadth Requirement (8 units).** Two approved breadth courses chosen in such a way that together the core and breadth courses cover four different Major Specialty Areas (A to G).
3. **Electives (32 units).** Students have the option of completing their degree by taking a comprehensive exam, writing a thesis, or completing a project. Depending on the option selected, the electives that may be taken are:

- a. **Comprehensive Examination Option.** For a student pursuing the M.S. degree, comprehensive examination option, the 32 elective units must include at least 16 units of approved graduate lecture courses. The remaining 16 units may include additional approved graduate lecture courses, up to 8 units of graduate seminars in CS 260–269, and up to 12 units of approved undergraduate technical electives. Research units (CS 297 or CS 299) may not be used to satisfy any course requirements under this option.
- b. **Project Option.** A student pursuing the M.S. degree, project option, may include up to 4 units of Directed Research (CS 297) towards the elective requirement. Of the remaining 28 units, at least 12 units must be approved graduate lecture courses. The remaining 16 units may include additional approved graduate lecture courses, up to 8 units of graduate seminars in CS 260–269, and up to 12 units of approved undergraduate technical electives.
- c. **Thesis Option.** A student pursuing the M.S. degree, thesis option, may include up to 12 units of graduate research (CS 297 or CS 299) towards the elective unit requirement. Of the remaining 20 units, at least 4 units must be approved graduate lecture courses. The remaining 16 units may include additional approved graduate lecture courses, up to 8 units of graduate seminars in CS 260–269, and up to 8 units of approved undergraduate technical electives.

Capstone Experience All students must complete a capstone experience that synthesizes and integrates the knowledge and skills obtained throughout the master's program, by either passing a comprehensive exam, writing a thesis, or completing a project. The Comprehensive Examination Option is the default option. If a student chooses the project or thesis option, it is the responsibility of the student to find a faculty member willing to supervise the master's project or thesis, to form the faculty examining committee, and to schedule the oral examination.

- a. **Comprehensive Examination Option**
Students must pass a comprehensive examination administered by the

Department of Computer Science and Engineering.

- b. Project Option** Students must complete a research project under the guidance of a faculty member. The project will be approved by a committee of at least two faculty members and requires a presentation and written report.
- c. Thesis Option** Students must submit a master's thesis in accordance with the general requirements of the university. The thesis is original research work, and it should demonstrate the student's ability to study a research area, identify an open problem, and make a research contribution. The thesis requires a presentation and must be approved by a committee of at least three faculty members.

Normative Time to Degree 2 years.

Combined B.S. + M.S. Five-Year Program The college offers combined five year B.S. + M.S. programs designed to allow successful UCR Computer Science or Computer Engineering B.S. graduates to complete the Master of Science degree in Computer Science in one year, by allowing up to 12 credits of coursework taken as a UCR undergraduate to be counted towards the 32-unit elective requirements of the M.S. (The courses that can be double counted are those that are eligible to be counted as technical electives in the B.S. requirements.)

A student may apply at the start of their senior year by submitting an application to the Computer Science M.S. program, provided that at the end of junior year, the student was a UCR Computer Science or Computer Engineering B.S. student with cumulative GPA at least 3.4 and had completed the following courses with no grade less than a B- and average grade at least 3.2: CS 100, CS 120A, CS 120B, CS 161. The application to the M.S. program must include at least two recommendation letters from UCR Academic Senate faculty members (at least one, and preferably both, CSE faculty). Submission of GRE scores with the application is recommended but not required. Matriculation into the combined program occurs in the Fall term following senior year, provided: (a) the M.S. application is accepted, (b) throughout senior year, the student is a Computer Science or Computer Engineering B.S. major with cumulative GPA 3.4 or higher, (c) by the end of senior year, the student completes the Computer Science or Computer Engineering B.S. degree requirements.

Incoming students who are applying to the Computer Science or Computer Engineering B.S. programs may simultaneously apply for preliminary admission into the combined program provided their high school GPA is at least 3.6, their SAT-I combined score is at least 1950, they satisfy the Entry Level Writing requirement before matriculation, and they have sufficient math preparation to enroll in calculus upon arrival. Preliminary admission status is maintained as long as the student is a Computer Science or Computer Engineering B.S. student in good standing with a cumulative

GPA of at least 3.4. Preliminarily admitted students still need to apply for full admission in their senior year as described above.

Five-year programs leading to M.S. degrees in other programs (including Computer Engineering) are also available. They are described separately in the catalog sections for those programs.

Doctoral Degree

The Department of Computer Science and Engineering offers the Ph.D. degree in Computer Science, after completion of the following degree requirements. It provides a research-oriented education in preparation for a career in research, industry, or academia and exploring both the fundamental aspects of computer science and engineering as well as their applications.

Satisfactory completion of CS 287 (Colloquium in Computer Science) each quarter of enrollment for full-time in-residence graduate students.

Course Work The course requirements for the Ph.D. degree ensure that Ph.D. students are exposed to fundamental concepts and tools (core requirement), a deep up-to-date view of their research specialty area (depth requirement), and an advanced, up-to-date view of the same topics outside their area (breadth requirement). Students are expected to complete all of these course requirements in the first two years of the program. These requirements consist of 44 quarter units of approved graduate or upper-division undergraduate courses, satisfying all four of the following course work categories. All of these courses must be taken for a letter grade, and no course can be counted towards more than one category. Students who have completed similar courses elsewhere may petition for a waiver of a required course or for substitution of an alternative course.

Units obtained in CS 270, CS 287, CS 290, CS 297, CS 298, CS 299, CS 301, and CS 302 cannot be counted in any course work category.

- 1. Core Requirement (12 units).** Choose three courses from at least two of the three Core Areas described above, with no grade lower than B- and an overall core course GPA of at least 3.2.
- 2. Depth Requirement (8 units).** Choose two courses listed above under the same Major Area (A to G). This requirement ensures that Ph.D. students, early on in their careers, acquire some depth of knowledge in a particular research area.
- 3. Breadth Requirement (12 units).** Choose three courses from at least two different Major Areas (A to G) outside the student's depth area. No course that is listed in the student's depth area can be used to fulfill the breadth requirement, even if it is cross-listed in another area. Students, with the consent of the major professor, may petition for a non-CSE course to be counted towards the breadth requirement.
- 4. Electives (12 units).** The remaining courses can be selected from additional

CS graduate lecture courses, up to 8 units of graduate seminars in CS 260-269, and up to 8 units of approved undergraduate technical electives. Students, with the consent of the major professor, may petition for a non-CSE course to be counted as an elective.

Milestones The Department has established three milestones to mark progress towards the Ph.D. degree in Computer Science: advancement to candidacy, presentation of the dissertation proposal, and final oral examination. A Ph.D. student must also satisfy all applicable Graduate Division requirements for each milestone.

Milestone I: Advancement to Candidacy. A student advances to candidacy after he/she has completed all of the Ph.D. course requirements described above, and passed the combined written and oral qualifying examinations, as described below. These two exams are intended to verify three components of the student's preparation for Ph.D. research: (1) breadth of comprehension sufficient to enable Computer Science research in areas beyond the topic(s) of the research exam and dissertation; (2) ability to perform critical study, analysis and writing in a focused area; and (3) demonstrated research experience or ability to do research.

Written Qualifying Examination The written qualifying examination consists of a written report summarizing the oral presentation to be given at the oral qualifying examination. This report must be written in proper technical English and in the style of a typical Computer Science conference or journal publication, and must be submitted to the Qualifying Committee for approval at least one week prior to the oral qualifying examination.

Oral Qualifying Examination The student is expected to demonstrate research aptitude by undertaking a research study on some topic (typically a problem from student's chosen research specialty that may be a promising area in which to conduct the dissertation research), under the guidance of his or her faculty major professor. The research must be presented orally to a Qualifying Committee, which is appointed by the Graduate Division based on nominations from the department. The committee will consist of at least four Senate faculty members, with at least three members whose home department is CSE. The committee evaluates the merits of the work and the student's aptitude for research. The work must represent significant progress towards original and publishable research. The student must complete this requirement in no more than two attempts. The normative time for taking the Oral Qualifying Exam is by the end of the second year.

Dissertation Committee After advancing to candidacy, the student must form a Doctoral Examination Committee chaired by his or her major professor. The committee will consist of at least four senate faculty members with at least three members belonging to the CSE department (their home department is CSE).

Milestone II: Dissertation Proposal Examination After advancement to candidacy, the student prepares a dissertation proposal that describes the dissertation topic, summarizes the

202 / Programs and Courses

relevant background literature, and presents a comprehensive research plan for the doctoral dissertation. The Dissertation Proposal Examination evaluates appropriateness of the research topic and the feasibility of the research plan. It also establishes a realistic timeline for the completion of the Dissertation. The Dissertation Committee administers this exam. The normative time for the Dissertation Proposal Exam is by the end of the third year. The Dissertation Proposal exam must be taken at least six months prior to the Final Doctoral Examination.

Milestone III: Final Doctoral Examination The student is required to write a dissertation in accordance with the Graduate Division requirements and may be required to defend it in a public oral final doctoral examination to the Dissertation Committee. After a satisfactory performance on the final doctoral examination, the Dissertation Committee recommends granting the Ph.D. degree. The student's research and the dissertation must both meet the highest standards of originality and scholarship.

The normative time for the completion of a Ph.D. in Computer Science is five years.

Professional Development Requirement All incoming M.S. and Ph.D. students must enroll in the Fall, Winter, and Spring offerings of CS 287, Colloquium in Computer Science.

Lower-Division Courses

CS 005 Introduction to Computer Programming (4) Lecture, 3 hours; laboratory, 3 hours. An introduction to computer programming for nonengineering and nonscience majors and for students considering taking CS 010 or CS 010V but needing additional preparation. Topics include the history of computing, basic computer operation, the notion of an algorithm, and programming constructs such as variables, expressions, input/output, branches, loops, functions, parameters, arrays, and strings. Credit is not awarded for CS 005 if it has already been awarded for CS 010 or CS 010V.

CS 006 Effective Use of the World Wide Web (4) Lecture, 3 hours; laboratory, 3 hours. A detailed introduction to the Internet. Covers Web tools, e-communities, e-commerce, power searching, and verification of information, privacy, and other legal and societal issues.

CS 008 Introduction to Computing (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): none. Includes operating system basics (Windows and Unix), word processing, spreadsheets, databases (e.g., Access), e-mail, the Internet, and the World Wide Web. Designed for students not majoring in computer science, engineering, mathematics, or science. Credit is not awarded for CS 008 if it has already been awarded for CS 010 or CS 010V.

CS 010 Introduction to Computer Science for Science, Mathematics, and Engineering I (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): a college mathematics course (may be taken concurrently) or credit for MATH 009A from the Advanced Placement Examination or the Mathematics Advisory Examination. Covers problem solving through structured programming of algorithms on computers using the C++ object-oriented language. Includes variables, expressions, input/output (I/O), branches, loops, functions, parameters, arrays, strings, file I/O, and classes. Also covers software design, testing, and debugging. Credit is not awarded for CS 010 if it has already been awarded for CS 010V or CS 030.

CS 010V Introduction to Computer Science for Science, Mathematics, and Engineering I (4) Lecture, 1 hour; discussion, 2 hours; written work, 6 hours. Prerequisite(s): a college mathematics course (may be taken concurrently) or credit for Math 009A from the Advanced Placement Examination or the Mathematics Advisory Examination. Covers problem solving through structured programming of algorithms on computers using the C++ object-oriented language. Includes variables, expressions, input/output (I/O), branches, loops, functions, parameters, arrays, strings, file I/O, and classes. Also covers software design, testing, and debugging. Uses an online instruction approach through a weekly webcast lecture and online forum discussion sessions. Credit is not awarded for CS 010V if it has already been awarded for CS 010 or CS 030.

CS 011 Introduction to Discrete Structures (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 009A (or MATH 09HA); CS 010 or CS 010V or MATH 009B (or MATH 09HB). Introduction to basic concepts of discrete mathematics emphasizing applications to computer science. Topics include propositional and predicate calculi, elementary set theory, functions, relations, proof techniques, elements of number theory, enumeration, and discrete probability. Cross-listed with MATH 011.

CS 012 Introduction to Computer Science for Science, Mathematics, and Engineering II (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): CS 010 or CS 010V with a grade of "C" or better; familiarity with C or C++ language. Covers structured and object-oriented programming in C++. Emphasizes good programming principles and development of substantial programs. Topics include recursion, pointers, linked lists, abstract data types, and libraries. Also covers software engineering principles. Credit is awarded for only one of CS 012 or CS 012V or CS 013.

CS 012V Introduction to Computer Science for Science, Mathematics, and Engineering II (4) Lecture, 1 hour; discussion, 2 hours; written work, 6 hours. Prerequisite(s): CS 010 or CS 010V with a grade of "C" or better; familiarity with the C or C++ language. Covers structured and object-oriented programming in C++. Emphasizes good programming principles and development of substantial programs. Topics include recursion, pointers, linked lists, abstract data types, and libraries. Also covers software engineering principles. Uses an online instruction approach through a weekly webcast lecture and online forum discussion sessions. Credit is awarded for only one of CS 012V or CS 012 or CS 013.

CS 013 Introductory Computer Science for Engineering Majors (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): CS 010 or CS 010V with a grade of "C" or better; familiarity with C or C++ language. Covers structured and object-oriented programming in C++. Emphasizes good programming principles and development of substantial programs. Topics include recursion, pointers, linked lists, abstract data types, and libraries. Covers software engineering principles. Utilizes examples and assignments specific to engineering disciplines such as numerical data analysis, matrix computations, and dynamic systems. Credit is awarded for only one of CS 012 or CS 012V or CS 013.

CS 014 Introduction to Data Structures and Algorithms (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): CS 012 or CS 012V with a grade of "C" or better or CS 013 with a grade of "C" or better; proficiency in C++. Topics include basic data structures such as arrays, lists, stacks, and queues. Covers dictionaries (including binary search trees and hashing) and priority queues (heaps). Offers an introductory analysis of algorithms, sorting algorithms, and object-oriented programming including abstract data types, inheritance, and polymorphism. Explores solving complex problems through structured software development.

CS 030 Introduction to Computational Science and Engineering (4) Lecture, 3 hours; laboratory, 3

hours. Prerequisite(s): MATH 009C (may be taken concurrently); consent of instructor if credit has been awarded for CS 010 or CS 010V. Examines fundamental programming concepts using the Matlab language including problem decomposition, control structures, elementary data structures, file input/output, graphics, and code libraries. Focuses on applications problems in engineering and science such as numerical equation solvers; matrix operations; searching and sorting; and data analysis. Emphasizes good programming style and computational efficiency.

CS 049 (E-Z) Language Laboratory (2) For hours and prerequisites, see segment descriptions. Hands-on, directed exposure to a specific programming language and associated development tools in a laboratory setting. Focus is on exercises and practical applications Graded Satisfactory (S) or No Credit (NC). Each segment is repeatable as topics change to a maximum of 12 units.

CS 049E Introductory C and C++ (2) Lecture, 1 hour; laboratory, 3 hours. Prerequisite(s): CS 005 or CS 010 or CS 010V or knowledge of programming or consent of instructor. A practical introduction to software development using C and C++ in a laboratory setting. Focuses on syntax, concepts, selections from the standard library, and development tool-chain use. Graded Satisfactory (S) or No Credit (NC). Segment is repeatable as topics change to a maximum of 12 units.

CS 049M Matlab (2) Lecture, 1 hour; laboratory, 3 hours. Prerequisite(s): CS 005 or CS 010 or CS 010V or knowledge of programming or consent of instructor. A practical exploration of problem solving using Matlab in a laboratory setting. Focuses on syntax, concepts, and development tool-chain use. Graded Satisfactory (S) or No Credit (NC). Segment is repeatable as topics change to a maximum of 12 units.

CS 049Y Python (2) Lecture, 1 hour; laboratory, 3 hours. Prerequisite(s): CS 005 or CS 010 or CS 010V or knowledge of programming or consent of instructor. A practical exploration of problem solving and software development using Python in a laboratory setting. Focuses on syntax, concepts, standard library, and development tool-chain use. Graded Satisfactory (S) or No Credit (NC). Segment is repeatable as topics change to a maximum of 12 units.

CS 061 Machine Organization and Assembly Language Programming (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): CS 010 or CS 010V with a grade of "C" or better. An introduction to computer organization. Topics include number representation, combinatorial and sequential logic, computer instructions, memory organization, addressing modes, interrupt, input/output (I/O), assembly language programming, assemblers, and linkers.

CS 066 Introduction to Three-Dimensional Digital Modeling (4) Lecture, 3 hours; laboratory, 3 hours; individual study, 2 hours. Covers basic skills necessary to create three-dimensional digital images and models. Emphasizes techniques for polygon and curved-surface modeling and photorealistic image creation through material shading, texturing, and lighting. Introduces basic scripting methods to create complex models and images with Autodesk Maya or equivalent. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination. Cross-listed with ART 066.

CS 067 Three-Dimensional Digital Modeling and Animation (4) Lecture, 3 hours; laboratory, 3 hours; individual study, 2 hours. Prerequisite(s): ART 066/CS 066. Builds advanced skills for three-dimensional modeling. Introduces basic computer animation techniques within framework of existing software. Techniques include rigging skeletons for character models, keyframing, and special effects animation using Autodesk Maya software or equivalent. Teaches proficiency in analogous scripting operations.

Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination. Course is repeatable to a maximum of 8 units. Cross-listed with ART 067.

Upper-Division Courses

CS 100 Software Construction (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): CS 014 with a grade of "C-" or better. Emphasizes development of software systems. Topics include design and implementation strategies; selection and mastery of programming languages, environment tools, and development processes. Develops skill in programming, testing, debugging, performance evaluation, component integration, maintenance, and documentation. Covers professional and ethical responsibilities and the need to stay current with technology.

CS 111 Discrete Structures (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CS 010 or CS 010V; CS 011/MATH 011; MATH 009C (or MATH 09HC). A study of discrete mathematical structures emphasizing applications to computer science. Topics include asymptotic notation, generating functions, recurrence equations, elements of graph theory, trees, algebraic structures, and number theory.

CS 120A Logic Design (5) Lecture, 3 hours; laboratory, 3 hours; individual study, 3 hours. Prerequisite(s): CS 061 with a grade of "C-" or better. Covers design of digital systems. Includes Boolean algebra; combinational and sequential logic design; design and use of arithmetic logic units, carry-lookahead adders, multiplexors, decoders, comparators, multipliers, flip-flops, registers, and simple memories; state-machine design; and basic register-transfer level design. Uses hardware description languages, synthesis tools, programmable logic, and significant hardware prototyping. Cross-listed with EE 120A.

CS 120B Introduction to Embedded Systems (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): CS 120A/EE 120A. Introduction to hardware and software design of digital computing systems embedded in electronic devices (e.g., digital cameras or portable video games). Includes embedded processor programming, custom processor design, standard peripherals, memories, interfacing, and hardware/software tradeoffs. Involves use of synthesis tools, programmable logic, microcontrollers, and developing working embedded systems. Cross-listed with EE 120B. Credit is awarded for only one of CS 121 or CS 120B/EE 120B.

CS 121 Programming Embedded Systems (4) Discussion, 2 hours; written work, 6 hours. Prerequisite(s): CS 010 or CS 010V and CS 061; or consent of instructor. An online study of the programming of embedded computing systems involving C language and microcontrollers. Includes an introduction to embedded systems; overview of C programming; bit-level manipulation; and capturing time-oriented behavior using synchronous state machines. Covers input/output; concurrency; creating a simple task scheduler; task communication; utilization and scheduling; and coding issues. Credit is awarded for only one of CS 121 or CS 120B/EE 120B.

CS 121L Laboratory in Programming Embedded Systems (2) Discussion, 1 hour; laboratory, 3 hours; written work, 6 hours. Prerequisite(s): CS 121 (may be taken concurrently), or consent of instructor. An online hands-on embedded systems programming training using microcontrollers and simple input/output devices. Covers bit-level manipulation, time-oriented programming using timers, input/output, concurrency, creating a simple task scheduler, task communication, utilization and scheduling, and coding issues. Credit is awarded for only one of CS 121L or CS 120B/EE 120B.

CS 122A Intermediate Embedded and Real-Time Systems (5) Lecture, 3 hours; laboratory, 6 hours. Prerequisite(s): CS 012 or CS 012V or CS 013; CS 120B/EE 120B. Covers software and hardware design of embedded computing systems. Includes hardware and software codesign, advanced programming paradigms (including state machines and concurrent processes), real-time programming and operating systems, basic control systems, and modern chip and design technologies. Laboratories involve use of microcontrollers, embedded microprocessors, programmable logic and advanced simulation, and debug environments.

CS 122B Advanced Embedded and Real-Time Systems (5) Lecture, 3 hours; laboratory, 6 hours. Prerequisite(s): CS 122A. Explores state-of-the-art aspects of building embedded computer systems. Topics include real-time programming, synthesis of coprocessor cores, application-specific processors, hardware and software cosimulation and codesign, low-power design, reconfigurable computing, core-based design, and platform-based methodology.

CS 130 Computer Graphics (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): CS 100, MATH 031 (MATH 031 may be taken concurrently); or consent of instructor. A study of the fundamentals of computer graphics necessary to design and build graphics applications. Examines raster graphics algorithms including scan-converting graphics primitives, anti-aliasing, and clipping. Also covers geometric transformations, viewing, solid modeling techniques, hidden-surface removal algorithms, color models, illumination, and shading.

CS 133 Computational Geometry (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): CS 100, CS 111, MATH 031, or equivalents. An introduction to the design of geometry algorithms. Covers the basic computational geometry concepts and techniques used in graphics, robotics, and engineering design. Topics include polygons and polytopes, convex hulls, and voronoi diagrams.

CS 134 Video Game Creation and Design (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): CS 130. Covers academic, theoretical, and practical aspects of video games by exploring common algorithms, data structures, and software design for different genres. Topics include game interface, character movement, intelligent behaviors, and networked or multiplayer games. Requires in-depth, applied programming and a term project, including the design, implementation, and analysis of a computer game.

CS 141 Intermediate Data Structures and Algorithms (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CS 014 with a grade of "C-" or better; CS 111; MATH 009C or MATH 09HC; proficiency in C++. Explores basic algorithm analysis using asymptotic notations, summation and recurrence relations, and algorithms and data structures for discrete structures including trees, strings, and graphs. Also covers general algorithm design techniques including "divide-and-conquer," the greedy method, and dynamic programming. Integrates knowledge of data structures, algorithms, and programming.

CS 145 Combinatorial Optimization Algorithms (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CS 141; MATH 031 or MATH 131. The study of efficient algorithm design techniques for combinatorial optimization problems. Topics include shortest paths, minimum spanning trees, network flows, maximum matchings, stable matchings, linear programming, duality, two-person games, algorithmic techniques for integer programming problems, NP-completeness, and approximation algorithms.

CS 150 Automata and Formal Languages (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CS 014 with a grade of "C-" or better; CS 111; MATH 009C (or MATH 09HC). A study of formal languages. Includes regular and context-free languages; computational models for generating these languages such as finite-state automata, pushdown automata, regular expressions, and context-free grammars; mathematical properties of the languages and models; and

equivalence between the models. Also introduces Turing machines and decidability.

CS 151 Introduction to Theory of Computation (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CS 141, CS 150. The study of fundamental questions about the nature of computing. Topics include Turing machines, computability, reductions, complexity theory, complexity classes P and NP, the P=NP problem, NP-completeness, and other time and space complexity classes.

CS 152 Compiler Design (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): CS 061, CS 100, CS 111, CS 150. Covers the fundamentals of compiler design. Includes lexical analysis, parsing, semantic analysis, compile-time memory organization, run-time memory organization, code generation, and compiler portability issues.

CS 153 Design of Operating Systems (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): CS 061, CS 100, CS 111, C++ programming proficiency. Covers the principles and practice of operating system design. Includes concurrency, memory management, file systems, protection, security, command languages, scheduling, and system performance.

CS 160 Concurrent Programming and Parallel Systems (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): CS 061, CS 100, CS 111. A study of concurrent and parallel systems. Topics include modular structure and design, interprocess communication, synchronization, failures, persistence, and concurrency control. Also covers atomic transactions, recovery, language support, distributed interprocess communication, and implementation mechanisms. Provides preparation for the study of operating systems, databases, and computer networking.

CS 161 Design and Architecture of Computer Systems (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CS 120A/EE 120A; concurrent enrollment in CS 161L. A study of the fundamentals of computer design. Topics include the performance evaluation of microprocessors; instruction set design and measurements of use; microprocessor implementation techniques including multicycle and pipelined implementations; computer arithmetic; memory hierarchy; and input/output (I/O) systems.

CS 161L Laboratory in Design and Architecture of Computer Systems (2) Lecture, 1 hour; laboratory, 3 hours. Prerequisite(s): CS 120A/EE 120A; concurrent enrollment in CS 161. Covers the design and simulation of a complete computer system using hardware description language and simulator. Topics include instruction set architecture design; assemblers; datapath and control unit design; arithmetic and logic unit; memory and input/output (I/O) systems; and integration of all parts into a working computer system.

CS 162 Computer Architecture (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): CS 161 and CS 161L with grades of "C-" or better. The study of advanced processor design. Topics include CPU pipelining, data and control hazards, instruction-level parallelism, branch prediction, and dynamic scheduling of instructions. Also covers Very Long Instruction Word (VLIW) processing, multimedia support, design of network and embedded processors, basic multiprocessor design, shared memory and message passing, and network topologies.

CS 164 Computer Networks (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): CS 100, CS 111, CS 153. Covers the fundamentals of computer networks. Topics include layered network architecture, communication protocols, local area networks, UNIX network programming, verification, network security, and performance studies.

CS 165 Computer Security (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): CS 141, CS 153. Examines the ways in which information systems

204 / Programs and Courses

are vulnerable to security breaches. Topics include attacks; security labels, lattices, and policies; safeguards and countermeasures; intrusion detection; authorization and encryption techniques; networks; digital signatures, certificates, and passwords; privacy issues, firewalls, and spoofing; Trojan horses and computer viruses; CERT Coordination Center; and electronic commerce.

CS 166 Database Management Systems (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): CS 100, CS 111. Covers architecture of database management systems; relational, network, and hierarchical models; distributed database concepts; query languages; implementation issues; and privacy and security of the database.

CS 168 Introduction to Very Large Scale Integration (VLSI) Design (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): CS 120A/EE 120A or consent of instructor. Studies integrated circuit fabrication, device characterization, and circuit simulation. Introduces basic device physics and physical design rules, MOS logic design, and timing and clock schemes. Covers layout generation, subsystem designs, and circuits for alternative logic styles. Also covers design and simulation using hardware description language and CAD tools. Cross-listed with EE 168.

CS 169 Mobile Wireless Networks (4) Lecture, 3 hours; laboratory, 2 hours; extra reading, 1 hour. Prerequisite(s): CS 153 or consent of instructor. Introduces the fundamentals of wireless and mobile networks. Covers wireless channel models, MAC protocols, and wireless network architectures. Also covers cellular, WLAN and ad hoc networks, and routing in multi-hop wireless networks. Includes wireless security and the impact of wireless links on TCP and other transport layer solutions.

CS 170 Introduction to Artificial Intelligence (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CS 100 with a grade of "C-" or better, CS 111. An introduction to the field of artificial intelligence. Focuses on discrete-valued problems. Covers heuristic search, problem representation, and classical planning. Also covers constraint satisfaction and logical inference.

CS 171 Introduction to Machine Learning and Data Mining (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CS 100, CS 111. Introduces formalisms and methods in data mining and machine learning. Topics include data representation, supervised learning, and classification. Covers regression and clustering. Also covers rule learning, function approximation, and margin-based methods.

CS 172 Introduction to Information Retrieval (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CS 100; CS 111; EE 114 or STAT 155. Introduces information retrieval (IR) principles and techniques for indexing and searching document collections. Topics include Web search, text processing, ranking algorithms, search in social networks, and search evaluation. Also studies scalability issues in search engines. Satisfactory (S) or No Credit (NC) grading is not available.

CS 177 Modeling and Simulation (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): CS 100, CS 111, C++ programming proficiency. Covers validation of random number sequences; concepts in modeling and systems analysis; and conceptual models and their mathematical and computer realizations. Examines simulation modeling techniques, including object-oriented modeling and discrete-event modeling. Emphasizes the use of simulation libraries used with programming languages such as C++.

CS 179 (E-Z) Project in Computer Science (4) For hours and prerequisites, see segment descriptions. Under the direction of a faculty member, student teams propose, design, build, test, and document software and/or hardware devices or systems. Emphasizes professional and ethical responsibilities and

the need to stay current on technology and its global impact on economics, society, and the environment.

CS 179E Compilers (4) Discussion, 1 hour; laboratory, 9 hours. Prerequisite(s): CS 100 and CS 152 with grades of "C-" or better; ENGR 180W; 8 additional upper-division units in Computer Science. Covers the planning, design, implementation, testing, and documentation of a compiler-related system. Incorporates techniques from previous related courses. Emphasizes professional and ethical responsibilities; the need to stay current on technology; and its global impact on economics, society, and the environment.

CS 179F Operating Systems (4) Discussion, 1 hour; laboratory, 9 hours. Prerequisite(s): CS 153 with a grade of "C-" or better; ENGR 180W; 8 additional upper-division units in Computer Science. CS 160 is recommended. Covers the planning, design, implementation, testing, and documentation of an operating systems-related system. Incorporates techniques from previous related courses. Emphasizes professional and ethical responsibilities; the need to stay current on technology; and its global impact on economics, society, and the environment.

CS 179G Database Systems (4) Discussion, 1 hour; laboratory, 9 hours. Prerequisite(s): CS 100 and CS 166 with grades of "C-" or better; ENGR 180W; 8 additional upper-division units in Computer Science. Covers the planning, design, implementation, testing, and documentation of a database-related system. Incorporates techniques from previous related courses. Emphasizes professional and ethical responsibilities; the need to stay current on technology; and its global impact on economics, society, and the environment.

CS 179-I Networks (4) Discussion, 1 hour; laboratory, 9 hours. Prerequisite(s): CS 100 and CS 164 with grades of "C-" or better; ENGR 180W; 8 additional upper-division units in Computer Science. Covers the planning, design, implementation, testing, and documentation of a network-related system. Incorporates techniques from previous related courses. Emphasizes professional and ethical responsibilities; the need to stay current on technology; and its global impact on economics, society, and the environment.

CS 179J Computer Architecture and Embedded Systems (4) Discussion, 1 hour; laboratory, 9 hours. Prerequisite(s): CS 100, CS 111, CS 122A, and CS 161 with grades of "C-" or better or consent of instructor; ENGR 180W; 3 additional upper-division units in Computer Science. Covers the planning, design, implementation, testing, and documentation of a computer architecture and embedded systems-related system. Incorporates using techniques presented in previous related courses. Emphasizes professional and ethical responsibilities; the need to stay current on technology; and its global impact on economics, society, and the environment.

CS 179K Software Engineering (4) Discussion, 1 hour; laboratory, 9 hours. Prerequisite(s): CS 180; ENGR 180W; 8 additional upper-division units in Computer Science. Covers the planning, design, implementation, testing, and documentation of a software engineering-related system. Incorporates techniques presented in previous related courses. Emphasizes professional and ethical responsibilities; the need to stay current on technology; and its global impact on economics, society, and the environment.

CS 179M Artificial Intelligence (4) Discussion, 1 hour; laboratory, 9 hours. Prerequisite(s): CS 100, CS 111, and CS 170 with grades of "C-" or better; ENGR 180W; 8 additional upper-division units in Computer Science. Covers the planning, design, implementation, testing, and documentation of an artificial intelligence-related system. Incorporates techniques presented in previous related courses. Emphasizes professional and ethical responsibilities; the need to stay current on technology; and its global impact on economics, society, and the environment.

CS 179N Graphics and Electronic Games (4) Discussion, 1 hour; laboratory, 9 hours. Prerequisite(s): CS 130 with a grade of "C-" or better; ENGR 180W; 8 additional upper-division units in Computer Science. Covers the planning, design, implementation, testing, and documentation of a graphics- or electronic game-related system. Incorporates using techniques presented in previous related courses. Emphasizes professional and ethical responsibilities; the need to stay current on technology; and its global impact on economics, society, and the environment.

CS 180 Introduction to Software Engineering (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): CS 100. A study of software engineering techniques for the development, maintenance, and evolution of large software systems. Topics include requirements and specification; system design and implementation; debugging, testing, and quality assurance; reengineering; project management; software process; tools; and environments.

CS 181 Principles of Programming Languages (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): CS 061, CS 100, CS 111, CS 150. Covers the principles of programming language design. Includes the study and comparison of several programming languages, their features, and their implementations.

CS 182 Software Testing and Verification (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CS 100. A study of modern techniques to assess the quality of software artifacts through functional, performance, and reliability testing. Introduces black box and white box testing techniques. Covers the application of modern testing tools to software units, components, subsystems, and entire systems. Also covers verification as a complementary technique to testing.

CS 183 UNIX System Administration (4) Seminar, 3 hours; laboratory, 3 hours. Prerequisite(s): CS 100. Explores the technical aspects of system administration on a Unix system, including advanced Unix. Includes managing system devices, operating system installation, communications, and networking.

CS 190 Special Studies (1-5) Individual study, 3-15 hours. Prerequisite(s): consent of instructor and department chair. Individual study to meet special curricular needs. Course is repeatable to a maximum of 9 units.

CS 191 Seminar in Research Topics in Computer Science and Engineering (1) Seminar, 1 hour. Prerequisite(s): upper division or graduate standing or consent of instructor. An introduction to the range of research topics and methods in Computer Science and Engineering and to the research opportunities available within the department. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 3 units.

CS 193 Design Project (1-4) laboratory, 1-6 hours; scheduled research, 1-3 hours; individual study, 1-3 hours. Prerequisite(s): CS 141; consent of instructor. Individual hardware or software design project to include establishment of objectives and criteria, synthesis, analysis, implementation, testing, and documentation. Course is repeatable to a maximum of 8 units.

CS 194 Independent Reading (1-4) Prerequisite(s): consent of instructor. Independent reading in material not covered in course work. Normally taken in senior year. Total credit for CS 194 may not exceed 8 units.

CS 198-I Individual Internship in Computer Science (1-4) Internship, 3-12 hours. Prerequisite(s): upper-division standing; at least 12 units in Computer Science courses. An academic internship to provide the student with career experience as a computer scientist in a governmental, industrial, or research unit under the joint supervision of an off-campus sponsor and a faculty member in Computer Science. Each individual program must have the prior approval of

both supervisors and the Department chair. A final written report is required. Course is repeatable to a maximum of 8 units.

Graduate Courses

CS 201 Compiler Construction (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): CS 152. Covers theory of parsing and translation. Also addresses compiler construction including lexical analysis, syntax analysis, code generation, and optimization. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 202 Advanced Operating Systems (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): CS 153. Examines recent developments in operating systems. Also covers multiprogramming, parallel programming, time sharing, scheduling and resource allocation, and selected topics. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 203 Advanced Computer Architecture (4) Lecture, 3 hours; research, 3 hours. Prerequisite(s): CS 161. Covers contemporary computer systems architecture including stack computers, parallel computers, pipeline processing, database machines, and multiprocessor architecture. Includes evaluation of computer performance. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 204 Advanced Computer Networks (4) Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): CS 014 with a grade of "C-" or better, CS 164. Covers advanced topics in computer networks, layering, Integrated Services Digital Networks (ISDN), and high-speed networks. Also covers performance models and analysis, distributed systems and databases, and case studies. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 205 Artificial Intelligence (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CS 170 or equivalent. Examines knowledge representation and automated reasoning and their use in capturing common sense and expert knowledge. Also addresses predicate and nonmonotonic logics; resolution and term rewriting; reasoning under uncertainty; theorem provers; planning systems; and belief networks. Includes special topics in natural language processing, perception, logic programming, expert systems, and deductive databases. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 206 Testing and Verification Techniques in Software Engineering (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): CS 141, CS 150, or equivalents; graduate standing. Introduces techniques to verify that software runtime behavior meets its specifications. Topics include model checking (safety, liveness, temporal logics, and abstraction); static and dynamic analysis (data flow analysis, concept analysis, program slicing, and invariant detection); testing (test generation, prioritization, suite reduction, and regression); and automated debugging (fault location and visualization). May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 207 Advanced Programming Languages (4) Lecture, 3 hours; outside research, 1.5 hours; written work, 1.5 hours. Prerequisite(s): CS 152, CS 181, or equivalents. Introduces the techniques for analyzing program semantics and correctness. Covers simply-typed lambda calculus as well as basic and advanced type systems. Presents axiomatic, operational, and denotational semantics. Explores programming-language constructs and tools for specifying, reasoning, and verifying correctness properties. Includes safe memory accesses and safe concurrent programming or security. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 210 Scientific Computing (4) Lecture, 4 hours. Prerequisite(s): CS 012 or CS 012V; MATH 010A; MATH 031 or equivalent; or consent of instructor. Utilizes scientific computing in a specific computer science research area. Provides a foundation for pursuit of further studies of special topics in scientific computing. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 211 High Performance Computing (4) Lecture, 3 hours; research, 3 hours. Prerequisite(s): CS 161 or consent of instructor. Introduces performance optimization for sequential computer programs. Covers high performance computing on multicore shared memory computers and on distributed memory computing clusters. Also covers high performance scientific libraries and computing application development using pthreads, OpenMP, and Message Passing Interface (MPI) parallel file systems. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 213 Multiprocessor Architecture and Programming (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CS 203 or consent of instructor. Introduces multi-processing, multicore architectures, and CC-NUMA multiprocessors. Also covers heterogeneous multiprocessors and interconnection networks. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 215 Theory of Computation (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): CS 150. Covers phrase structure grammars and languages; turing machines; relation of languages to automata; solvable and unsolvable problems; and theoretical limitations of computers. Also examines algorithmic complexity theory; polynomial reducibility; the classes P and NP; and correctness proofs. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 217 GPU Architecture and Parallel Programming (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): CS 160 with a grade of "C-" or better or consent of instructor. Introduces the popular CUDA based parallel programming environments based on Nvidia GPUs. Covers the basic CUDA memory/threading models. Also covers the common data-parallel programming patterns needed to develop a high-performance parallel computing applications. Examines computational thinking; a broader range of parallel execution models; and parallel programming principles. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. May be taken Satisfactory (S) or No Credit (NC) by students advanced to candidacy for the Ph.D. Cross-listed with EE 217.

CS 218 Design and Analysis of Algorithms (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): CS 141. A study of efficient data structures and algorithms for solving problems from a variety of areas such as sorting, searching, selection, linear algebra, graph theory, and computational geometry. Also covers worst-case and average-case analysis using recurrence relations, generating functions, upper and lower bounds, and other methods. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 220 Synthesis of Digital Systems (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): CS 141, CS 161. Covers the synthesis and simulation of digital systems. Topics include synthesis at the system, behavioral, register-transfer, and logic levels; application-specific processors; simulation; and emerging system-on-a-chip design methodologies. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 223 Reconfigurable Computing (4) Lecture, 3 hours; written work, 3 hours. Prerequisite(s): CS 202 or CS 203; consent of instructor. Covers reconfigurable computing, a novel computational model that is fast becoming part of the mainstream in high-performance computing. Addresses architectures, software

tools and compilers, programming models, and applications. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 229 Machine Learning (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): CS 141, STAT 160A. A study of supervised machine learning that emphasizes discriminative methods. Covers the areas of regression and classification. Topics include linear methods, instance-based learning, neural networks, kernel machines, and additive models. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 230 Computer Graphics (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): CS 141 or CS 218; MATH 031 or MATH 131; graduate standing or consent of instructor. Covers advanced topics related to graphics and necessary fundamentals. Includes geometry representations; affine and perspective transforms; rendering with global illumination and other light models; shading and texture mapping; rasterization and anti-aliasing techniques; and hierarchical and keyframe animation. Also includes projects and/or in-depth programming assignments. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 231 Computer Animation (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): CS 130 or CS 230. Covers topics in computer animation including motion capture, inverse kinematics, and dynamic simulation. Also examines deformable systems and other natural phenomena, facial animation, high-level behavior control, creature evolution, and procedural techniques. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 233 Pen-Based Computing (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor; computer programming experience. Introduces computational techniques for pen-based user interfaces. Covers fundamental issues such as ink segmentation, sketch parsing, and shape recognition. Explores the topic of sketch understanding, including reasoning about context and correcting errors. Also addresses issues related to building practical pen-based systems. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with ME 231.

CS 234 Computational Methods for Biomolecular Data (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): CS 111; CS 141 or CS 218; STAT 155 or STAT 160A. A study of computational and statistical methods aimed at automatically analyzing, clustering, and classifying biomolecular data. Includes combinatorial algorithms for pattern discovery; hidden Markov models for sequence analysis; analysis of expression data; and prediction of the three-dimensional structure of RNA and proteins. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 235 Data Mining Techniques (4) Lecture, 3 hours; term paper, 1.5 hours; project, 1.5 hours. Prerequisite(s): CS 141, CS 166; CS 170 is recommended. Provides students with a broad background in the design and use of data mining algorithms and tools. Includes clustering, classification, association rules mining, time series clustering, and Web mining. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 236 Database Management Systems (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): CS 141; CS 153 or equivalent; CS 166; or consent of instructor. Covers principles of file systems; architecture of database management systems; data models; and relational databases. Also examines logical and physical design of databases; hardware and software implementation of database systems; and distributed databases (e.g., query processing, concurrences, recovery). May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 237 Advanced Topics in Modeling and Simulation

(4) Lecture, 3 hours; research, 3 hours. Prerequisite(s): CS 177. Covers formal computer simulation models such as Discrete Event Specified Models and differential equation models. Examines current developments in simulation languages. Also addresses integrated model development and its applications to complex, large-scale problems. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 238 Algorithmic Techniques in Computational Biology

(4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): CS 141 or CS 218. A study of fundamental algorithms for solving combinatorial or computational problems in molecular biology and genomics. Includes sequence alignment and multiple alignment; bio-database search; gene and regulatory signal recognition; DNA sequence assembly; physical mapping; and reconstruction of evolutionary trees. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 239 Performance Evaluation of Computer Networks

(4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): CS 164. Offers models and analytical techniques for evaluating the performance of computer networks. Covers basic and intermediate queuing theory and queuing networks and their application to practical systems. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 240 Network Routing

(4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): CS 141 or CS 204; CS 164. An in-depth study of routing in computer networks. Examines general principles and specific routing protocols and technologies. Topics include Internet, Asynchronous Transfer Mode (ATM), optical, wireless, and ad hoc networks. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 241 Advanced Topics in Network Measurements and Security

(4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): CS 164 or equivalent. Introduces measuring and building real network systems. Includes hands-on measurement studies and tools. Covers fundamental mathematical and statistical tools; exposure to implementation studies and techniques; principles of network architectures; and challenges in building testbeds and conducting measurements. Explores measurements and modeling of wireline, ad hoc, sensor, and cellular networks. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as content changes to a maximum of 8 units.

CS 242 Information Retrieval and Web Search

(4) Lecture, 3 hours; term paper, 1.5 hours; project, 1.5 hours per week. Prerequisite(s): CS 141, CS 166. Introduces Information Retrieval (IR) principles and techniques for indexing and searching document collections with special emphasis on Web search. Includes text processing, ranking algorithms, search in social networks, search evaluation, and search engines scalability. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 245 Software Evolution

(4) Lecture, 3 hours; research, 3 hours. Prerequisite(s): CS 180 or equivalent; graduate standing. Covers the principles, tools, and techniques for disciplined software evolution. Includes migration strategies, change patterns, software maintenance, legacy system reengineering, reverse engineering for program understanding, middleware, source code analysis, software visualization, and program transformation tools. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 246 Advanced Verification Techniques in Software Engineering

(4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): CS 111, CS 141, CS 150,

or equivalents or consent of instructor. A study of advanced techniques to specify and examine the correctness of complex systems and software. Focuses on concurrent and distributed behavior, formal description languages, temporal logics, model checking and symbolic model checking, partial order reduction, and the use of verification tools. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 253 Distributed Systems

(4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): CS 153. Integrates the theory and practice of distributed systems with a focus on recent developments in distributed systems. Includes middleware architectures; distributed process management and real-time scheduling; dependability; and group communication protocols. Also covers distributed process management; replication; large-scale peer-to-peer systems; Internet content delivery; and Web caching. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 255 Computer Security

(4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): CS 153 or CS 164 or CS 165. Discusses the theoretical and practical issues arising in the context of computer systems security and the principles underlying the design of secure computing environments. Topics include cryptography, security models, authentication protocols, network security, intrusion detection, attacks and their countermeasures, and secure systems design. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 257 Wireless Networks and Mobile Computing

(4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): CS 141; CS 164 or CS 204. Introduces basic and advanced concepts of wireless networks and mobile computing. Covers both wireless cellular and ad hoc networks. Includes protocols for medium access control, resource allocation, and routing, as well as transport layer optimizations for the wireless environment. Also covers standards, Bluetooth, and the IEEE 802.11 for wireless local area networks. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 260 Seminar in Computer Science

(4) Seminar, 4 hours. Prerequisite(s): consent of instructor. Covers current research topics in computer science. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable to a maximum of 8 units.

CS 261 Seminar in Artificial Intelligence and the Design of Expert Systems

(4) Seminar, 4 hours. Prerequisite(s): graduate standing or consent of instructor. A review of recent research topics in the fields of artificial intelligence and logic programming. Emphasizes expert systems, automated reasoning, and knowledge representation. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable to a maximum of 8 units.

CS 262 Algorithms and Data Structures

(4) Seminar, 4 hours. Prerequisite(s): CS 215, CS 218; or consent of instructor. Selected topics in theoretical computer science. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable to a maximum of 8 units.

CS 263 Seminar in Distributed Systems

(4) Seminar, 4 hours. Prerequisite(s): graduate standing; CS 153 or previous operating systems course. Introduces the fundamental topics in distributed computer systems. Topics include distributed file systems, replicated data, load management, and distributed shared memory. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable to a maximum of 8 units.

CS 267 Seminar in Databases

(4) Seminar, 4 hours. Prerequisite(s): CS 236 or consent of instructor. Focuses on recent research and development issues

in the database area. Includes object-oriented databases, heterogeneous databases, parallel databases, benchmarks, transaction processing, query optimization, and performance evaluation. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable to a maximum of 8 units.

CS 269 Software and Hardware Engineering of Embedded Systems

(4) Seminar, 4 hours. Prerequisite(s): CS 120A/EE 120A; consent of instructor. Presents state-of-the-art software and hardware design techniques for embedded computing systems. Topics include specification models, languages, simulation, partitioning algorithms, estimation methods, model refinement, and design methodology. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable to a maximum of 8 units.

CS 270 Special Topics in Advanced Computer Science

(2) Seminar, 2 hours. Prerequisite(s): consent of instructor. Involves presentations and discussions by faculty and students that focus on new research in computer science. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CS 272 Probabilistic Models for Artificial Intelligence

(4) Lecture, 3 hours; written work, 3 hours. Prerequisite(s): CS 141, STAT 160A. Covers methods for representing and reasoning about probability distributions in complex domains. Focuses on graphical models and their extensions such as Bayesian networks, Markov networks, hidden Markov models, and dynamic Bayesian networks. Topics include algorithms for probabilistic inference, learning models from data, and decision making. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CS 287 Colloquium in Computer Science

(1) Colloquium, 1 hour. Prerequisite(s): graduate standing. Lecture on current research topics in computer science and topics relating to professional development presented by faculty members and visitors. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CS 290 Directed Studies

(1-6) Individual study, 3-18 hours. Prerequisite(s): consent of instructor. Special studies in computer science. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.

CS 297 Directed Research

(1-6) Outside research, 3-18 hours. Prerequisite(s): graduate standing; consent of instructor. Directed research on selected projects in computer science under the sponsorship of assigned faculty members. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 72 units.

CS 298-I Individual Internship

(1-12) Written work, 1-12 hours; internship, 2-24 hours. Prerequisite(s): graduate standing; consent of instructor. Individual apprenticeship in computer science. Includes fieldwork with an approved professional individual or organization and academic work under the direction of a faculty member. A final written report is required. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 16 units.

CS 299 Research for Thesis or Dissertation

(1-12) Outside research, 3-36 hours. Prerequisite(s): graduate standing and consent of instructor. Research in computer science under the direction of a faculty member. To be included as part of the thesis or dissertation. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Courses

CS 302 Apprentice Teaching

(1) Activity, 3 hours. Prerequisite(s): enrollment limited to teaching assistants and associates in Computer Science.

Supervised teaching in upper- and lower-division Computer Science courses. Aids in the learning of effective teaching methods such as the handling of Computer Science discussion sections, preparation and grading of examinations, and student relations. Required each quarter of all Computer Science teaching assistants and associates. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 15 units.

Conservation Biology

Subject abbreviation: BLCN

College of Natural and Agricultural Sciences

Program Office, 1223 Pierce Hall
(951) 827-7294; ccb.ucr.edu

The major in Conservation Biology is not currently accepting new students. Students who are interested in this field should see the academic advisors at the CNAS Undergraduate Academic Advising Office, (951) 827-7294.

Upper-Division Courses

BLCN 190 Special Studies (1-4) Individual study, 3-12 hours. Prerequisite(s): consent of instructor and Program Chair. To be taken as a means of meeting special curricular needs. Course content, style, requirements, and grading basis is selected in consultation with the instructor and Program Chair. Course is repeatable to a maximum of 12 units.

BLCN 197 Research for Undergraduates (1-2) Outside research, 3-6 hours. Prerequisite(s): sophomore, junior, or senior standing in Conservation Biology; consent of instructor and Program Chair. An introduction to research providing the opportunity, through reading and preliminary laboratory work, to develop a research project suitable for BLCN 199. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 4 units.

BLCN 198-I Individual Internship in Conservation Biology (2-4) Internship, 6-12 hours; consultation, 1 hour; outside reading, 2-4 hours. Prerequisite(s): upper-division standing in Conservation Biology. An off-campus practical experience in the public or private sector related to conservation biology that is conducted under the joint supervision of an off-campus sponsor and a faculty mentor from the Conservation Biology Program. A written report on the internship is required. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.

BLCN 199 Senior Research (1-4) Laboratory, 3-12 hours. Prerequisite(s): junior or senior standing in Conservation Biology; consent of instructor and Program Chair. BLCN 197 is recommended. Research in conservation biology performed under the supervision of a faculty member in the Conservation Biology Program. A written research report is required. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.

Creative Writing

Subject abbreviation: CRWT

College of Humanities, Arts, and Social Sciences

Andrew Winer, M.F.A., Chair
Department Office, ARTS 129
(951) 827-5424; creativewriting.ucr.edu

Professors

Reza Aslan, Ph.D.
Mike Davis, C.Phil.
Juan Felipe Herrera, M.F.A.
Nalo Hopkinson, M.A.

Tom Lutz, Ph.D.
Jane Smiley, Ph.D.
Susan C. Straight, M.F.A.

Professors Emeriti

Steve Minot, Ph.D.
Eliud Martínez, Ph.D.
Maurya Simon, M.F.A.
D. Chuck Whitney, Ph.D.

Associate Professors

Katie Ford, M.F.A.
Michael Jayme, M.F.A.
Laila Lalami, Ph.D.
Andrew Winer, M.F.A.

Assistant Professors

Allison Benis White, M.F.A.
Charmaine Craig, M.F.A.
Josh Emmons, M.F.A.
Steve Erickson, M.A.
Goldberry Long, M.F.A.

Major

The Creative Writing major offers a series of workshop courses in poetry, fiction, playwriting, screenwriting, and nonfiction as well as reading courses in poetry and fiction presented from a writer's point of view. They are taught for the most part by poets, fiction writers, and playwrights.

The writing courses are taught as workshops, so that the subject matter (the students' stories, poems, and plays) is different each time the course is offered.

Incoming freshmen and transfer students can apply for a Chancellor's Performance Award, for up to \$4,500. Contact the department office for more information.

University Requirements

See Undergraduate Studies section.

College Requirements

See College of Humanities, Arts, and Social Sciences, Colleges and Programs section.

Major Requirements

The major requirements for the B.A. degree in Creative Writing are as follows:

Prerequisite courses: CRWT 056 or equivalent, and ENGL 001A or equivalent.

1. Lower-division requirements (20 units; five courses)

Two Creative Writing survey courses from CRWT 046A, CRWT 046B, or CRWT 046C

and

Two Creative Writing introductory courses from CRWT 057A, CRWT 057B, or CRWT 057C

and

One literature survey course from CRWT 012/ CPLT 012, CRWT 040, CRWT 041, CRWT 042, CRWT 043, CRWT 044, CRWT 045, CRWT 076, ENGL 014, ENGL 015, ENGL 017, CRWT 097H

2. Upper-division requirements (60 units)

- a) Three workshop courses in primary genre: **Creative Nonfiction**
CRWT 130, CRWT 132, CRWT 134

or

Poetry

CRWT 150, CRWT 160, CRWT 170

or

Fiction

CRWT 152, CRWT 162, CRWT 172

- b) One workshop in second genre: CRWT 130, CRWT 132, CRWT 134, CRWT 150, CRWT 152, CRWT 160, CRWT 162*, CRWT 164A/THEA 164A, CRWT 164B/THEA 164B, CRWT 164C/THEA 164C, CRWT 166A/MCS 166A/THEA 166A, CRWT 166B/MCS 166B/THEA 166B, CRWT 166C/MCS 166C/THEA 166C series, CRWT 170*, CRWT 172*

*These workshops may be repeated; however, only 4 units total can be applied to the major.

- c) One workshop in third genre: CRWT 130, CRWT 132, CRWT 134, CRWT 150, CRWT 152, CRWT 160, CRWT 162*, CRWT 164A/THEA 164A, CRWT 164B/THEA 164B, CRWT 164C/THEA 164C, CRWT 166A/MCS 166A/THEA 166A, CRWT 166B/MCS 166B/THEA 166B, CRWT 166C/MCS 166C/THEA 166C series, CRWT 170*, CRWT 172*

*These workshops may be repeated; however, only 4 units total can be applied to the major.

- d) Three upper-division courses in Creative Writing: CRWT 136, CRWT 143, CRWT 146 (E-Z), CRWT 151, CRWT 155, CRWT 165, CRWT 171, CRWT 173, CRWT 174, CRWT 175, CRWT 176 (E-Z), CRWT 180, CRWT 182, CRWT 185 (E-Z), CRWT 187/ CPLT 187, CRWT 191 (may be taken twice but used only once for major credit), CRWT 198I (may be taken only once, for 4 units)

- e) One upper-division course in Art, Art History, Music, Dance, or Theatre (must be a 4-unit course)
- f) Four (4) units of CRWT 195 or CRWT 195H (Senior Honors Thesis) or any upper division course with term paper
- g) Four upper-division courses of concentration in another discipline or set of disciplines approved by advisor

Minor

1. Lower-division requirements (9 units)

- a) One introductory writing workshop: CRWT 056
- b) One introductory reading course: CRWT 040, CRWT 043, CRWT 046A, CRWT 046B, or CRWT 046C.
- c) One introductory workshop course: CRWT 057, CRWT 057B, CRWT 057C.

2. Upper-division requirements (20 units)

- a) Four (4) units from
 - (1) CRWT 176 (E-Z)
 - (2) Any upper-division course in English, Comparative Literature and Foreign Languages, or Theatre (except ENGL

101, ENGL 103; FREN 100, FREN 101A, FREN 101B, FREN 101C; GER 101, GER 103A, GER 103B; RUSN 103; SPN 101A, SPN 101B, SPN 101C, SPN 105, SPN 106A, SPN 106B)

- b) Sixteen (16) units in one of the following emphases:

Nonfiction Emphasis

- (1) CRWT 130, CRWT 132, CRWT 134
- (2) Four (4) units from CRWT 150, CRWT 152, CRWT 164A/THEA 164A, CRWT 165, CRWT 166A/MCS 166A/THEA 166A, CRWT 171, CRWT 187/CPLT 187

Poetry Emphasis

- (1) CRWT 150, CRWT 160, CRWT 170
- (2) Four (4) units from CRWT 130, CRWT 152, CRWT 164A/THEA 164A, CRWT 165, CRWT 166A/MCS 166A/THEA 166A, CRWT 171, CRWT 187/CPLT 187

Fiction Emphasis

- (1) CRWT 152, CRWT 162, CRWT 172
- (2) Four (4) units from CRWT 130, CRWT 150, CRWT 164A/THEA 164A, CRWT 165, CRWT 166A/MCS 166A/THEA 166A, CRWT 187/CPLT 187

Drama Emphasis

- (1) CRWT 164A/THEA 164A, CRWT 164B/THEA 164B, CRWT 164C/THEA 164C
- (2) Four (4) units from CRWT 130, CRWT 150, CRWT 152, CRWT 165, CRWT 166A/MCS 166A/THEA 166A, CRWT 166B/MCS 166B/THEA 166B, CRWT 166C/MCS 166C/THEA 166C, CRWT 187/CPLT 187, THEA 121

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors. See also Journalism minor.

Education Abroad Program

The EAP is an excellent opportunity to travel and learn more about another country and its culture while taking courses to earn units toward graduation. Students should plan study abroad well in advance to ensure that the courses taken fit with their overall program at UCR. Consult the departmental student affairs officer for assistance. For further details, visit UCR's Off Campus Academic Experiences at eapop.ucr.edu or call (951) 827-2508.

See Education Abroad Program in the Educational Opportunities section of this catalog. A list of participating countries is found under Education Abroad Program in the Programs and Courses section. Search for programs by specific areas at eap.ucop.edu/ourprograms.

Graduate Program

See Creative Writing and Writing for the Performing Arts in this catalog for more information on the M.F.A. in this area.

Lower-Division Courses

CRWT 012 The Writer in Writing (4) Lecture, 3 hours; written work, 2 hours; outside research, 1 hour. Prerequisite(s): none. Targeted at the fledgling creative writer and apprentice literary critic, surveys the complex legacy surrounding the figure of the writer in world literature. Discussion and weekly writing exercises demonstrate the use of brainstorming in creating and critiquing literature. Cross-listed with CPLT 012.

CRWT 014 The German Big Ten: German-Speaking Authors That Writers Should Know (4) Lecture, 3 hours; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): none. An introduction to ten key authors in German literature. Covers from the Brothers Grimm to contemporary writers such as Elfriede Jelinek and Patrick Susskind. Course conducted in English. Cross-listed with GER 014.

CRWT 040 Fiction and Film (4) Lecture, 3 hours; screening, 3 hours; practice writing, 1 hour. Prerequisite(s): none. A study of twentieth-century fiction and film from the writer's point of view. Emphasizes narrative elements and literary techniques found in both forms. Explores how novels are translated into film.

CRWT 041 Poetry and Fiction: A Reading Course for Writers (4) Lecture, 3 hours; creative imitation practice, 3 hours. Prerequisite(s): none. Active, analytical reading of contemporary poetry and fiction in order to broaden and deepen students' understanding of the craft of writing. Students analyze and practice poetic and fictional techniques.

CRWT 042 Poetry and Drama: A Reading Course for Writers (4) Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): none. Examines poetic and dramatic techniques in both poetry and drama, including narrative verse, verse novels, and verse drama. Students compose imitations and may also write analytical essays based on the models studied.

CRWT 043 Creative Writing and Ancestry (4) Lecture, 3 hours; outside writing, 3 hours. Prerequisite(s): none. A study of creative writing that explores personal experience and ancestry. Genres studied may include nonfiction, autobiography, fiction, and visual media. Students are required to write in one or more of these genres.

CRWT 044 Ghosts, Gods, and Monsters: Children's Literature for Writers (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): none. A survey of children's literature, with emphasis on how the craft of tales and fables contributes to their meaning. Explores techniques the beginning writer can learn from children's literature.

CRWT 045 The Prose Poem and "Short-Short" Story (4) Lecture, 3 hours; extra reading, 1.5 hours; written work, 1.5 hours. Prerequisite(s): none. Explores what distinguishes prose poems from "sudden" or "short-short" fiction. Investigates the use of narrative and figurative language and the tapping of the unconscious mind.

CRWT 046 Craft of Writing: Survey in Contemporary Fiction (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): none. A survey of selected works of contemporary fiction and related texts. Emphasizes the craft of fiction and how craft contributes to meaning. Course is repeatable as content changes to a maximum of 8 units. Credit is awarded for only one of CRWT 046 or CRWT 046S.

CRWT 046S Craft of Writing: Survey in Contemporary Fiction (4) Lecture, 3 hours; discussion, 1 hour.

Prerequisite(s): none. A survey of selected works of contemporary fiction and related texts. Emphasizes on the craft of fiction and how craft contributes to meaning. Course is repeatable as content changes to a maximum of 8 units. Credit is awarded for only one of CRWT 046 or CRWT 046S.

CRWT 047 Craft of Writing: Survey in Contemporary Poetry (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): none. A survey of selected works of contemporary fiction and related texts. Emphasizes on the craft of fiction and how craft contributes to meaning. Course is repeatable as content changes to a maximum of 8 units. Credits is awarded for only one of CRWT 047 or CRWT 047S.

CRWT 047S Craft of Writing: Survey in Contemporary Poetry (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. A survey of selected works of contemporary fiction and related texts. Emphasizes on the craft of fiction and how craft contributes to meaning. Course is repeatable as content changes to a maximum of 8 units. Credit is awarded for only one of CRWT 047 or CRWT 047S.

CRWT 048 Craft of Writing: Survey in Contemporary Nonfiction (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): none. A survey of selected works of contemporary fiction and related texts. Emphasizes on the craft of fiction and how craft contributes to meaning. Course is repeatable as content changes to a maximum of 8 units. Credit is awarded for only one of CRWT 048 or CRWT 048S.

CRWT 048S Craft of Writing: Survey in Contemporary Nonfiction (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. A survey of selected works of contemporary fiction and related texts. Emphasizes on the craft of fiction and how craft contributes to meaning. Course is repeatable as content changes for a maximum of 8 units. Credit is awarded for only one of CRWT 048 or CRWT 048S.

CRWT 056 Introduction to Creative Writing (4) Lecture, 3 hours; discussion, 1 hour. An introduction to the craft of creative writing. Focuses on the elements of a number of genres, including poetry, fiction, nonfiction, journalism, drama, and the graphic novel.

CRWT 057A Introduction to Fiction (4) Workshop, 3 hours; written work, 3 hours. Prerequisite(s): CRWT 056, ENGL 001A. Introduction to the elements and the craft of fiction.

CRWT 057B Introduction to Poetry (4) Workshop, 3 hours; written work, 3 hours. Prerequisite(s): CRWT 056, ENGL 001A. Introduction to the elements and craft of poetry.

CRWT 057C Introduction to Creative Nonfiction (4) Workshop, 3 hours; written work, 3 hours. Prerequisite(s): CRWT 056, ENGL 001A. Introduction to the elements and craft of nonfiction.

CRWT 066 Screenwriting: How Movies Work (4) Lecture, 3 hours; discussion, 1 hour; screening, 8 hours per quarter. Prerequisite(s): none. An introduction to writing for stage and screen. Addresses structure, character, dialogue, theme, and story. Cross-listed with MCS 066 and THEA 066.

CRWT 076 The Verbal Coliseum: Spoken Word Workshop (5) Workshop, 3 hours; discussion, 1 hour; written work, 1 hour; extra reading, 2 hours. Explores forms and issues in contemporary spoken word poetics, including performance and writing, multimedia and audience, community relations, media culture and power, music and art, and cultural production. Course is repeatable to a maximum of 8 units.

CRWT 097H Freshman Honors Project: Poetry, Fiction, or Nonfiction (4) Seminar, 3 hours; individual study, 1 hour; extra reading, 1 hour; creative projects, 2 hours. Prerequisite(s): admission to the University Honors Program or consent of instructor. An

introduction to poetry, fiction, or nonfiction. Utilizes reading, commentary, and criticism in one of these three genres. Fosters exploration of the diversity of literary styles. Promotes awareness of the aesthetic, cultural, and personal resonances of artistic choices. Satisfactory (S) or No Credit (NC) grading is not available.

Upper-Division Courses

CRWT 130 Beginning Creative Nonfiction (4) Workshop, 3 hours; extra reading, 3 hours. Prerequisite(s): two of the following courses: CRWT 057A, CRWT 057B, CRWT 057C. Introduction to creative nonfiction. Covers its history and strategies for writing and critically evaluating creative nonfiction essays. Focuses on writing creative nonfiction essays based on personal experience. Includes readings in current nonfiction. Course is repeatable to a maximum of 8 units.

CRWT 132 Intermediate Creative Nonfiction (4) Workshop, 3 hours; written work, 3 hours. Prerequisite(s): CRWT 056, CRWT 130; or consent of instructor. Reviews the essential strategies for writing and critically evaluating creative nonfiction essays. Focuses primarily on memoir, personal experience, and nature and science writing. Course is repeatable to a maximum of 8 units.

CRWT 134 Advanced Creative Nonfiction (4) Workshop, 3 hours; written work, 3 hours. Prerequisite(s): CRWT 056, CRWT 130, CRWT 132; or consent of instructor. Explores strategies for writing and critical evaluating creative nonfiction essays. Focuses primarily on memoir, autobiography, history, and interview writing and how to work toward a sequence of longer work of nonfiction in that mode, as well as the "fact" or "immersion" essay. Course is repeatable to a maximum of 8 units.

CRWT 136 Professional Creative Nonfiction Workshop (5) Workshop, 3 hours; outside research, 3 hours; extra reading, 3 hours. Prerequisite(s): CRWT 056, CRWT 130, CRWT 132, CRWT 134; or consent of instructor. A workshop in creative nonfiction writing for students who want to study creative nonfiction at the graduate and professional level. Focuses on producing and polishing work and discusses the professional aspect of writing, such as submitting and publishing.

CRWT 143 Generational Texts: A Survey of Immigration and Identity in Contemporary Literature (4) Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): CRWT 043. Examines the influence of dominant cultures on twentieth-century literature. Topics include the experience of immigration and the notion of legitimacy and ethnic identity. Covers writers such as Ralph Ellison, Sherman Alexie, Jhumpa Lahiri, and Upton Sinclair. Course is repeatable as content changes to a maximum of 8 units.

CRWT 146 Special Topics: Fiction (4) Seminar, 3 hours; workshop, 3 hours; extra reading, 3 hours. Prerequisite(s): CRWT 056 or consent of instructor. Explores specific topics of style and craft in fiction. Course is repeatable as content changes to a maximum of 8 units.

CRWT 150 Beginning Poetry Workshop (4) Workshop, 3 hours; outside research, 3 hours. Prerequisite(s): two of the following courses: CRWT 057A, CRWT 057B, CRWT 057C. Students write poetry which is analyzed by the class. Requires substantial original work and outside reading.

CRWT 151 Sports Journalism (4) Lecture, 3 hours; interviewing and writing, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Focuses on writing articles, features, and editorials and provides the student with the tools to interview sports figures. Provides a well-rounded view of the print media.

CRWT 152 Beginning Fiction Workshop (4) Workshop, 3 hours; outside research, 3 hours. Prerequisite(s): two of the following courses: CRWT 057A, CRWT 057B, CRWT 057C. Students discuss and analyze outside texts and original work from the class. Requires substantial original work.

CRWT 155 The Graphic Novel (4) Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): CRWT 046 (or CRWT 046S) or CRWT 047 (or CRWT 047S) or CRWT 048 (or CRWT 048S); CRWT 056; or consent of instructor. Explores the chronological development of the graphic novel. Focuses on theme, style, and artistic presentation. Course is repeatable as content changes to a maximum of 8 units.

CRWT 160 Intermediate Poetry Workshop (4) Workshop, 3 hours; outside research, 3 hours. Prerequisite(s): CRWT 056, CRWT 150; or consent of instructor. Students produce and bring to class for analysis and commentary, a large quantity of original work in poetry. Course is repeatable to a maximum of 8 units.

CRWT 162 Intermediate Fiction Workshop (4) Workshop, 3 hours; outside research, 3 hours. Prerequisite(s): CRWT 056, CRWT 152; or consent of instructor. Class work consists of intensive analysis of students' work. Course is repeatable to a maximum of 8 units.

CRWT 164A Beginning Playwriting (4) Seminar, 3 hours; discussion, 1 hour. Prerequisite(s): THEA 100 or CRWT 056 or consent of instructor. Seminar in the practice of playwriting centering on the construction of a plot. Cross-listed with THEA 164A.

CRWT 164B Intermediate Playwriting (4) Seminar, 3 hours; discussion, 1 hour. Prerequisite(s): CRWT 164A/THEA 164A. Seminar in the practice of playwriting. Revisions of works in progress with emphasis on character development and techniques for writing dialogue. Cross-listed with THEA 164B.

CRWT 164C Advanced Playwriting (4) Seminar, 3 hours; discussion, 1 hour. Prerequisite(s): CRWT 164B/THEA 164B. Seminar in the practice of playwriting. Playwrights' participation in staged readings of their work. With consent of instructor, course is repeatable to a maximum of 8 units. Cross-listed with THEA 164C.

CRWT 165 Fundamentals and Concepts of Journalism (5) Lecture, 3 hours; laboratory, 3 hours; outside research, 3 hours. Prerequisite(s): CRWT 056, CRWT 057C. An introduction to the journalistic writing process. Includes history, the role of journalism in modern society, function and form, editing principles, ethics, and legalities. Provides exposure to interviewing, story construction and organization, format options, and variations in style.

CRWT 167A Plays in Production (4) Workshop, 8 hours. Prerequisite(s): CRWT 164A/THEA 164A or THEA 166A or consent of instructor. Examines the development and preproduction of half-hour or one-hour plays written specifically for stage, soundstage, radio, television, or Web-based broadcasting. Explores the basics of sound and video production to enhance the writing and rewriting process. Course is repeatable to a maximum of 8 units. Cross-listed with THEA 165A.

CRWT 167B Plays in Production (4) Workshop, 8 hours. Prerequisite(s): CRWT 167A/THEA 165A or consent of instructor. Advanced production and postproduction of half-hour and one-hour drama (including comedy) for radio, video, or webcasting. Postproduction of previously taped shows. Course is repeatable to a maximum of 8 units. Cross-listed with THEA 165B.

CRWT 170 Advanced Poetry Workshop (4) Workshop, 3 hours; outside research, 3 hours. Prerequisite(s): CRWT 056, CRWT 150, CRWT 160; or consent of instructor. A workshop in poetry writing for students who

wish to attempt, with criticism from class members, to fashion a significant long poem or group of poems. Course is repeatable.

CRWT 171 Anatomy of Poetry (4) Lecture, 3 hours; creative writing, 3 hours. Prerequisite(s): CRWT 160 or consent of instructor. An introductory study of poetics, including traditional and contemporary forms. Students write in the various poetic forms studied.

CRWT 172 Advanced Fiction Workshop (4) Workshop, 3 hours; outside research, 3 hours. Prerequisite(s): CRWT 056, CRWT 152, CRWT 162; or consent of instructor. A workshop in fiction writing for students who wish to attempt, with criticism from class members, to fashion a collection of stories or a novel. Course is repeatable.

CRWT 173 Prose Poem Workshop (4) Workshop, 3 hours; written work, 2 hours; extra reading, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Explores contemporary prose poetry. Studies the history of contemporary essays that define the mechanics and parameters of the prose poem. Requires substantial writing and critiquing. Course is repeatable as content changes to a maximum of 8 units.

CRWT 174 Issues in Journalism (4) Lecture, 3 hours; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Explores issues in contemporary news media, including credibility and bias, press freedom and responsibility, press-government relations, media coverage of politics, news media economics and influence on content, and race, gender, class, and news media. Course is repeatable to a maximum of 8 units.

CRWT 175 Advanced Writing for Journalists (5) Lecture, 3 hours; laboratory, 2 hours; outside research, 3 hours; extra reading, 1 hour. Prerequisite(s): CRWT 165 or consent of instructor. An examination of the techniques and styles representative of modern feature journalism. Writing assignments incorporate advanced reporting skills.

CRWT 176 Topics in Craft of Writing (4) Lecture, 3 hours; extra reading, 1 hour; practice writing, 2-3 hours. Prerequisite(s): upper-division standing or consent of instructor. Covers the formal study and practice of the craft of writing, its technical aspects, and development through the contemporary period in the genres of poetry, fiction, and non-fiction. Course is repeatable as content changes to a maximum of 12 units.

CRWT 180 Professional Poetry Workshop (5) Workshop, 3 hours; outside research, 3 hours; extra reading, 3 hours. Prerequisite(s): CRWT 056, CRWT 150, CRWT 160, CRWT 170; or consent of instructor. A workshop in poetry writing for students who want to study poetry at the graduate and professional level. Focuses on producing and polishing work, and discusses the professional aspect of writing, such as submitting and publishing.

CRWT 182 Professional Fiction Workshop (5) Workshop, 3 hours; outside research, 3 hours; extra reading, 3 hours. Prerequisite(s): CRWT 056, CRWT 152, CRWT 162, CRWT 172; or consent of instructor. A workshop in fiction writing for students who want to study fiction at the graduate and professional level. Focuses on producing and polishing work and discusses the professional aspect of writing, such as submitting and publishing.

CRWT 185 Special Topics in Nonfiction (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores specific topics in non-fiction. Course is repeatable as content changes to a maximum of 8 units.

CRWT 186A Beginning Book Arts (4) Lecture, 1 hour; laboratory, 6 hours; consultation, 1 hour. Prerequisite(s): upper-division standing or consent of

instructor. An introduction to the elements of press operation. Using traditional letterpresses, students learn hands-on typesetting, design, material and text selection, editing, printing, and binding skills, as well as the history of the book and book design.

CRWT 186B Intermediate Book Arts (4) Workshop, 1 hour; laboratory, 6 hours; consultation, 1 hour. Prerequisite(s): CRWT 186A; upper-division standing or consent of instructor. An expanded discussion of the techniques and styles in press operation. Students build on the techniques acquired in CRWT 186A and demonstrate finished projects.

CRWT 187 Metafiction (4) Lecture, 3 hours; creative writing, take-home midterm, or term paper, 30 hours per quarter. Prerequisite(s): upper-division standing or consent of instructor. Covers postmodernism, metafiction, and the new novel in Europe and America. Creative writers submit fiction in lieu of a term paper or midterm. Cross-listed with CPLT 187.

CRWT 190 Special Studies (1-5) To be taken with the consent of the chair of the department as a means of meeting special curricular problems. Course is repeatable to a maximum of 16 units.

CRWT 191 Seminar in Creative Writing (4) Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): consent of instructor; upper-division standing. Intense study of the work of a visiting writer and poet. Students prepare individual papers for discussion. Course is repeatable to a maximum of 8 units. **Minot**

CRWT 195 Senior Thesis (4) Consultation, 1 hour; thesis, 3 hours; outside research, 3 hours; extra reading, 3 hours. Prerequisite(s): consent of department chair. Creation of a significant piece of work under faculty supervision. Project composed in the genres of poetry, fiction, or nonfiction.

CRWT 195H Senior Honors Thesis (4) Consultation, 1 hour; outside research, 4 hours; extra reading, 3 hours; thesis, 4 hours. Prerequisite(s): consent of Department Chair. The student works independently with a faculty member to prepare a project. For the Creative Writing major, the project may be a group of poems, a long poem, a group of short stories, a novel, or a part of a novel. For the Journalism minor, the project may be a news feature, an investigative article, or a similar story requiring significant endeavor in reporting and writing and demonstrating an understanding of sound journalistic technique.

CRWT 198-I Individual Internship (1-12) field, 2 hours per unit. Prerequisite(s): consent of instructor; upper-division standing. Work with an appropriate professional individual or organization to gain experience and skills in any form of writing which meets with the approval of the Creative Writing Chair (e.g., journalism, radio journalism). Letter grading or Satisfactory (S)/No Credit (NC). Course is repeatable to a maximum of 16 units.

Creative Writing and Writing for the Performing Arts

Graduate Program

Master of Fine Arts

The Master of Fine Arts (M.F.A.) degree in Creative Writing and Writing for the Performing Arts (CWPA) offers writers the ability to move fluidly within various arenas of creative writing, including the genres of poetry, fiction, nonfiction, playwriting, and screenwriting, as well as in multimedia studies. The program integrates scholarly studies of narrative, style, voice, structure, and history of these writing disciplines with traditional workshop formats, forming writers who can actively direct the literature of the 21st century.

For students in the Main Campus Traditional M.F.A. program, financial assistance

may include teaching assistantships and fellowships, as well as fellowships for community projects through the Gluck Fellows Program of the Arts.

UCR Palm Desert Center (PDC) An M.F.A. in Creative Writing and Writing for the Performing Arts is offered at UCR's Palm Desert Center, in the Low Residency program. Students in the Low Residency program can receive limited financial assistance through editorial positions on *The Coachella Review*, the student run literary journal of the program.

Palm Desert Low Residency Program Students enroll in a prescribed number of units each term. Requirements are similar to the full-time program at UC Riverside, but courses are modified to fit low residency requirements. Low Residency MFA students come to Rancho Mirage, California for two ten-day sessions in the Fall and Spring quarters that include lectures, seminars, workshops and readings (please refer to website palmdesertmfa.ucr.edu for specific dates). Students also attend a final thesis residency their last quarter to file. Students also enroll in a one unit Professional Development Course during this quarter. During the rest of the academic year, students participate in online workshops and seminars and work individually with faculty. Cross-enrollment between programs is not allowed. Full time enrollment in this program is 8 units per quarter for 7 quarters, and students pay a per unit fee.

Admission Applicants to either program should demonstrate significant professional skill by submitting in manuscript form one of the following: 10-15 pages of poetry, a maximum of 25 pages of fiction or nonfiction, or the first act or a maximum of 25 pages of a screen play or play. Applicants must have a B.A. or B.S. degree from an accredited institution and submit 3 letters of recommendation, a self-statement, and original transcripts. Applications for the Main Campus Traditional Program are accepted for Fall quarter only; applications for the Palm Desert Low Residency program are accepted for the Fall and Spring quarters.

Plan I (Thesis) Both M.F.A. programs (Main Campus and PDGC Low Residency) require completion of a thesis.

Main Campus Traditional Program

Consists of workshops in chosen genres, culminating in a final project (the master's thesis) that showcases the writer's cultivated talents, in the form of a poetry collection, novel, memoir, screenplay, or full-length play. The M.F.A. requires students to major in one genre but encourages them to explore the other genres as well, allowing for creative movement within disciplines. Structure and focus in screenwriting and playwriting can also be applied to fiction and nonfiction, and lyricism and metaphor in poetry can also enhance description and dialogue in the other genres, for example. Students can also engage in course work in varied areas of directing and acting, in film history and literature, in literary

criticism and translation, with supplemental courses selected from departments such as Comparative Literature and Foreign Languages, English, Hispanic Studies, and Media and Cultural Studies. Students can gain practical aspects of filmmaking from courses in Studio Art and Theatre.

Course Requirements Minimum requirements consist of 56 units of course work (12 courses) and 8 units of master's thesis project. The core curriculum includes the following:

1. Four workshop courses in chosen genre (16 units total).
2. CWPA 201 (4 units)
3. Two graduate seminars from Creative Writing and Writing for the Performing Arts (8 units).
4. Two graduate seminars from any department(s) outside of Theatre and Creative Writing. Seminar subject matter should be relevant to student's thesis project. Requirement can be met with upper-division courses, with instructor and graduate advisor approval, as an appropriate 292 course (8 units).
5. Three electives in workshop, graduate seminar or thesis, with the following limitations: Students may take a maximum of six workshops (24 units) within their chosen genre, and a maximum of 16 thesis units within the normative time to degree (six terms). Students are encouraged to take seminars or cross-genre workshops, as available; elective thesis units beyond the 8 required units must be approved by the student's thesis advisor and graduate advisor (12 units).
6. Thesis (8 units) In the areas of playwriting and screenwriting, the final written project is a full-length play of two or three acts (90-130 pages) or screenplay or teleplay (approximately 130 pages). In the areas of poetry, fiction, and nonfiction, the final written project is a poetry collection, novel, short story collection, or essay collection. Each student is paired with one or two faculty members who serve as thesis advisor(s). Two faculty readers, in addition to the advisor(s), evaluate the thesis work.

The length of the final project breaks down as follows: Poetry 50 – 100 pages, Fiction 100 – 150 pages, Creative Non-fiction 100 – 150 pages, screenplay, teleplay or play 90 – 130 pages.

Normative Time to Degree Main campus: 6 quarters;

Palm Desert Low Residency Program Consists of workshops in chosen genres and course work culminating in a final project (the master's thesis) which showcases the writer's cultivated talents, in the form of a poetry collection, novel, short story collection, essay collection, memoir, full-length work of nonfiction, screenplay, or full-length play. The M.F.A. requires students to write in two genres, allowing for creative movement within disciplines. Structure and focus in screenwriting and playwriting can also be applied to fiction and nonfiction, and

lyricism and metaphor in poetry can also enhance description and dialogue in the other genres, for example. Students engage in course work in varied areas of directing and acting, in film history and literature, in literary criticism and translation. Requirements consist of 56 units of course work.

Course Requirements

1. Six low residency genre workshop courses.
2. Six low residency literature, poetry, and film seminars.
3. Six low residency cross genre workshops.
4. Thesis. In the areas of playwriting and screenwriting, the final written project is a full-length play of two or three acts (90–120 pages) or screenplay or teleplay (approximately 120 pages). In the areas of poetry, fiction, and nonfiction, the final written project is a poetry collection (approximately 60 pages), novel, short story collection, essay collection, memoir or full-length nonfiction work (between 100-200 pages). Each student is paired with three faculty members who serve as the thesis advisor(s).
5. One unit Professional Fundamentals Course.

Normative Time to Degree 7 quarters

Creative Writing Program Graduate Courses

CWPA 200 Advanced Play Analysis (4) Seminar, 4 hours. Prerequisite(s): graduate standing or consent of instructor. An analysis of dramatic structure from a sophisticated perspective. Covers strategies for dealing with openness, ambiguity, and metatheatricality. Also discusses tied versus gratuitous elements, archetypes, motifs, and symbolism.

CWPA 201 The Writer's Life: Literary Strategies and Structures (4) Seminar, 3 hours; extra reading, 1 hour; outside research, 1 hour; written work, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Explores the artistic, practical, and professional aspects of life as a working novelist, poet, playwright, screenwriter, or essayist. Topics include publishing, literary journals, commercial magazines, the film industry, the theatre industry, agents, and overviews of genre and art.

CWPA 210 Literature and Improvisation: The Intersection of Culture and Performance (4) Lecture, 3 hours; studio, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines the literary and performative tools needed to construct original, language-based plays. Combines improvisational performance with storytelling to challenge students to develop and explore the connectivity between cultural history, oral tradition passed on through personal narratives, and public discourse.

CWPA 214 Acting for Writers (4) Lecture, 2 hours; discussion, 2 hours; outside research, 2 hours. Prerequisite(s): CWPA 264 or CWPA 266. Examines the theory and practice of acting to enable writers to better understand how language reflects character, as well as how actors turn the written word into spoken language. Includes text work and improvisation. Credit is awarded for only one of CWPA 214 or THEA 114.

Barr

CWPA 227 Theories of the Modern Theatre (4)

Seminar, 4 hours. Prerequisite(s): graduate standing or consent of instructor. Examines the major theories underlying twentieth-century theatre practice. Emphasizes the wide range of styles in modern theatre, including realism, symbolism, expressionism, surrealism, absurdism, Epic Theatre, and Theatre of Cruelty.

CWPA 230 Creative Nonfiction (4) Workshop, 3 hours; extra writing and reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor; consent of program chair is required for students with credit for CWLR 211N, CWLR 212N, CWLR 221N, or CWLR 222N. A formal study of contemporary creative nonfiction. Emphasizes style, structure, and form. Focuses on the production of original work. Course is repeatable to a maximum of 20 units.

CWPA 231 Directing for Writers (4) Seminar, 3 hours; extra reading, 1 hour; outside research, 1 hour; written work, 1 hour. Prerequisite(s): graduate standing or consent of instructor. An examination of the theory and practice of directing for the stage. Enables writers to better understand how to produce their own work and to interact more effectively with directors.

CWPA 246 Special Topics in Fiction (4) Seminar, 3 hours; extra reading, 3 hours; term paper, 1 hour. Prerequisite(s): graduate standing. Explores various movements and themes in literature. Course is repeatable as content changes to a maximum of 8 units.

CWPA 250 Theory for Writers (4) Workshop, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. A survey of literary theory designed especially for creative writers. Focuses on aspects of various theories that might be useful for creative work. Involves a close reading of theoretical texts with a strong emphasis on issues of form.

CWPA 251 Hollywood and the Novel: The Transformation of Fiction into Film (4) Lecture, 2 hours; screening, 1 hour; extra reading, 2 hours; outside research, 2 hours; written work, 1 hour. Prerequisite(s): graduate standing. Explores the transformation of novels into screenplays and films. Examines four novels and their corresponding screenplays and films. Focuses on differences in style, content, and format. Course is repeatable as content changes to a maximum of 8 units.

CWPA 252 (E-Z) Theory and Craft of Writing (4)

Seminar, 3 hours; outside research, 2 hours; extra reading, 1-2 hours. Prerequisite(s): graduate standing; consent of program chair is required for students with credit for a segment of CWLR 201 (E-Z) or a segment of CWLR 202 (E-Z). Analyzes writing techniques, structures, and approaches to the craft in traditional, contemporary, and avant-garde literary works. E. Fiction; F. Poetry; G. Nonfiction; I. Playwriting; J. Screenwriting; K. First Person. Each segment is repeatable to a maximum of 8 units.

CWPA 253 Stories as Collections (4) Seminar, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing in Creative Writing and Writing for the Performing Arts. An analysis of the order, shape, and structure of story collections to aid in an appreciation of characters, conflicts, and themes. Course is repeatable as content changes to a maximum of 8 units.

CWPA 255 The Graphic Novel (4) Seminar, 2 hours; studio, 2 hours; extra reading, 1.5 hours; outside research, 1.5 hours. Prerequisite(s): graduate standing. An in-depth consideration of the historical development and craft of graphic novels. Examines the intellectual, literary, and artistic evolution of this narrative form.

CWPA 256 Contemporary Literature of the Middle East (4) Seminar, 3 hours; extra reading, 3 hours; term paper, 1 hour. Prerequisite(s): graduate standing. An overview of contemporary literature from the Middle East. Proposes some of the ways in which the histori-

212 / Programs and Courses

cal and cultural aspects of Islamic literature differ from that of Western culture. Includes English translations of works in Arabic, Persian, Turkish, Dari, and Urdu. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CWPA 257 The Sufis (4) Seminar, 3 hours; term paper, 2 hours; extra reading, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An introduction to sufism through an in-depth reading of the great Sufi poets. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with RLST 257.

CWPA 260 Shakespeare and Film (4) Seminar, 3 hours; outside research, 1 hour; screening, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines the influence of Shakespeare on film from faithful adaptations to broad reinventions of his works. Compares Shakespeare in his period and the present; the wide range of movies that Shakespeare inspired; and how modern filmmakers deal with issues of language and structure.

CWPA 262 Fiction (4) Workshop, 3 hours; extra writing and reading, 4 hours. Prerequisite(s): graduate standing or consent of instructor; consent of program chair is required for students with credit for CWLR 211F, CWLR 212F, CWLR 221F, or CWLR 222F. A formal study of contemporary fiction. Emphasizes style, structure, and form. Focuses on production of original work. Course is repeatable to a maximum of 20 units.

CWPA 263 Fiction Workshop (4) Workshop, 3 hours; extra reading, 1.5 hours; written work, 1.5 hours. Prerequisite(s): graduate standing. A comprehensive introduction to the craft of fiction writing. Develops fiction writing abilities and critiquing skills of the genre. Intended for students whose primary emphasis is not fiction. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CWPA 264 Playwriting (4) Workshop, 3 hours; consultation, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Intensive formal study of playwriting with emphasis on plot, character, theme, dialogue, and style. Course is repeatable.

CWPA 265A Four Forms (4) Workshop, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing. Explores similarities and differences of three kinds of creative writing: fiction, playwriting, and screenwriting. Includes participation in live stagings and video shoots, translating stories from one form to another to highlight the unique qualities of each form as well as areas of commonality. Course is repeatable.

CWPA 265B Four Forms (4) Workshop, 3 hours; outside research, 3 hours. Prerequisite(s): CWPA 265A; graduate standing. Includes adaption of a one-act play into a screenplay not longer than 15 pages. Demonstrates how to develop work dependent on dialogue into work dependent on visuals and action. Covers shooting, editing, and screening of short films. Course is repeatable.

CWPA 266 Screenwriting (4) Workshop, 3 hours; consultation, 1 hour; screening, 2 hours. Prerequisite(s): graduate standing or consent of instructor. Involves outline and completion of an initial draft of a feature-length screenplay. Also includes a comparison study of two movies in the same genre. Course is repeatable.

CWPA 267 Writing for Television (4) Workshop, 3 hours; consultation, 1 hour. Prerequisite(s): graduate standing or consent of instructor; consent of program chair is required for students with credit for CWLR 211S, CWLR 212S, CWLR 221S, or CWLR 222S. Provides intensive formal study of writing for television. Emphasizes creating guidelines for a one-hour pilot and a 13-episode series. Course is repeatable to a maximum of 24 units.

CWPA 268 Writing the Half-Hour Television Comedy (4) Workshop, 3 hours; written work, 3 hours. Prerequisite(s): graduate or professional standing or written consent of instructor. Introduction to the style, form, content, and creation of a half-hour television comedy series. Course is repeatable to a maximum of 8 units.

CWPA 269 Rewriting the Script (4) Workshop, 4 hours. Prerequisite(s): CWPA 264 or CWPA 266 or consent of instructor; consent of instructor is required for students repeating the course. Addresses the processes involved in rewriting a full-length script (screenplay or play). Course is repeatable to a maximum of 8 units. Credit is awarded for only one of CWPA 269 or THEA 169.

CWPA 270 Poetry Workshop (4) Consultation, 1 hour; workshop, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Intensive formal study of contemporary poetry with emphasis on style, structure, and form. Focuses on production of original work. Course is repeatable.

CWPA 275 Modern American Poetry (4) Lecture, 3 hours; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): graduate standing. Focuses on various modern poets. Explores their contributions to the evolution of an American poetic tradition and aesthetic. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as content changes to a maximum of 8 units. **Simon**

CWPA 276 Poetry and Translation (4) Workshop, 3 hours; extra reading, 1.5 hours; outside research, 1.5 hours. Prerequisite(s): graduate standing; reading proficiency in Spanish. Discusses the efficacy and difficulty of translating poetry from the Spanish language into English. Explores the works of twentieth- and twenty-first century major Spanish language poets. Provides a forum to render and compare translations. Cross-listed with SPN 277.

CWPA 277 Poetry and the Sacred (4) Seminar, 2 hours; extra reading, 2 hours; outside research, 2 hours; written work, 2 hours. Prerequisite(s): graduate standing. An in-depth introduction to sacred poetic texts from antiquity to the present. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CWPA 278 Contemporary American Poetry (4) Workshop, 3 hours; extra reading, 3 hours; written work, 1 hour. Prerequisite(s): graduate standing. Focuses on influential contemporary American poets. Discusses their styles and the evolution of poetry over the last fifty years. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as content changes to a maximum of 8 units.

CWPA 279 The Fire This Time: Twentieth-Century Poetry of Witness (4) Seminar, 3 hours; extra reading, 1 hour; outside research, 1 hour; written work, 1 hour. Prerequisite(s): graduate standing. Examines the poetry of crises and witness written by poets in the twentieth and twenty-first centuries from America and around the world. Topics may include war; genocide; religious, ethnic, and political persecution; exile; imprisonment; ecological degradation; and domestic and urban violence in the United States.

CWPA 280 Writers' Colloquium (1) Colloquium, 1 hour. Prerequisite(s): graduate standing. Colloquia featuring writers in fiction, nonfiction, poetry, playwriting, and screenwriting. Students who present a seminar receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable to a maximum of 6 units.

CWPA 281 Oscar Wilde and Late Victorian Theatre (4) Seminar, 4 hours. Prerequisite(s): graduate standing or consent of instructor. A study of late Victorian theatre and culture through the works of Oscar Wilde

(1854-1900), an Irish, feminist, aesthete, socialist, homosexual Victorian author. Includes readings of Wilde's plays and nondramatic writings as well as plays by contemporaries such as Ibsen and Shaw.

CWPA 282 Film Noir: Stories and Cinema from the Shadows (4) Seminar, 3 hours; screening, 2 hours; outside research, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Examines the genre of fiction and cinema known as "film noir." Looks at films, writing, and art to understand how "film noir" reshapes the way America looks at itself. Each week examines a different aspect of the genre, combining readings and films to understand its roots and rules.

CWPA 283 Multigenre Workshop (4) Workshop, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. A peer-review workshop for students with ongoing projects in any and all genres. Focuses on student work that can profit from exposure to readings by people working in a number of different genres. Course is repeatable to a maximum of 16 units.

CWPA 284 Intensive Workshop (1-2) Workshop, 10-12 hours per quarter; discussion, 10-12 hours per quarter. Prerequisite(s): graduate standing or consent of instructor. Explores the work of contemporary writers and provides an opportunity for those same writers to respond to the students' work. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 8 units.

CWPA 285 The Literary Memoir (4) Workshop, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing. An in-depth survey of the literary memoir. Explores how memoirists employ craft and memory to create meaning. Addresses what obligation memoirists have to drama and to real lives and places. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

CWPA 288 Thesis Workshop (4) Workshop, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Designed for M.F.A. students working on their thesis, usually in the last two quarters of the program. Open to any and all genres. Focuses on student work, emphasizing the completion of thesis projects.

CWPA 290 Directed Studies (1-6) Outside research, 3-18 hours. Prerequisite(s): graduate standing; consent of instructor and graduate advisor. Literature studies directed by a faculty member on special topics. Course is repeatable.

CWPA 292 Concurrent Analytical Studies in Creative Writing and Writing for the Performing Arts (1-4) Outside research, 3-12 hours. Prerequisite(s): graduate standing; consent of instructor and graduate advisor. Taken concurrently with a 100-series course but on an individual basis. Devoted to research, criticism, and written work related to the 100-series course. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

CWPA 297 Directed Research (1-6) Outside research, 3-18 hours. Prerequisite(s): Graduate standing; consent of instructor and graduate advisor. Develops a creative writing project with possibility of publication or production, and not specifically intended for thesis or dissertation. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 8 units.

CWPA 299 Research for the Thesis (1-12) Thesis, 3-36 hours. Prerequisite(s): consent of thesis director. Research and preparation for the Master of Fine Arts thesis. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Courses

CWPA 301 Directed Studies in the Teaching of Creative Writing and Writing for the Performing Arts (4) Lecture, 2 hours; practicum, 1 hour; outside research, 2 hours; written work, 3 hours. Prerequisite(s): enrollment in the M.F.A. program in Creative Writing and Writing for the Performing Arts. Prepares for teaching introductory undergraduate Creative Writing courses by offering a flexible curriculum of meetings and conferences on effective pedagogical methodology. Includes creating course syllabi and lesson plans and discussing a range of practical teaching issues. Required of all TAs for at least one quarter. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 8 units.

CWPA 302 Teaching Practicum (1-4) Consultation, 1-4 hours; practicum, 2-8 hours. Prerequisite(s): graduate standing. Supervised teaching in undergraduate Creative Writing courses. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Palm Desert Low Residency Program

Graduate Courses

See also graduate courses in the Theatre section of this catalog.

CWLR 200 Professional Fundamentals (1) Colloquium, .5 hours; consultation, .5 hours; practicum, .5 hours. Prerequisite(s): graduate standing. Focuses on professional development. Involves mechanics of industry queries, book proposals, contracts, rights, and agent interviews. Culminates in craft lecture during residency. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 2 units.

CWLR 201 (E-Z) Low Residency Seminar in Literature, Theatre, and Film (4-6) Seminar, 21-31.5 hours per quarter; consultation, 1-1.5 hours; extra reading, 3-4.5 hours. Prerequisite(s): graduate standing. A study of a period, style, author, or issue in relation to literary, theatrical, or film history. F. Fiction; N. Nonfiction; P. Poetry; S. Screenwriting; T. Playwriting. Each segment is repeatable as its content changes to a maximum of 16 units.

CWLR 202 (E-Z) Low Residency Seminar in Literature, Theatre, and Film (2-4) Seminar, 1-2 hours; extra reading, 3-6 hours. Prerequisite(s): graduate standing. A study of a period, style, author, or issue in relation to literary, theatrical, or film history. F. Fiction; N. Nonfiction; P. Poetry; S. Screenwriting; T. Playwriting. Each segment is repeatable as its content changes to a maximum of 4 units.

CWLR 211 (E-Z) Low Residency Genre Workshop (2-4) Workshop, 10-20 hours per quarter; consultation, 1-2 hours. Prerequisite(s): graduate standing. Focuses on the production of original work. Involves study of chosen genre(s), emphasizing technique, structure, style and form. F. Fiction; N. Nonfiction; P. Poetry; S. Screenwriting; T. Playwriting. Each segment is repeatable as its content changes to a maximum of 8 units. If credit has already been awarded for a segment of CWLR 221 (E-Z) or CWLR 222 (E-Z), it is not awarded for the corresponding lettered segment of CWLR 211 (E-Z) or CWLR 212 (E-Z).

CWLR 212 (E-Z) Low Residency Genre Workshop (4-6) Workshop, 3-4.5 hours; extra reading, 3-4.5 hours. Prerequisite(s): graduate standing. Focuses on the production of original work. Involves study of chosen genre(s), emphasizing techniques, structure, style, and form. F. Fiction; N. Nonfiction; P. Poetry; S. Screenwriting; T. Playwriting. Each segment is repeatable as its content changes to a maximum of 8 units. If credit has already been awarded for a segment of CWLR 221 (E-Z) or CWLR 222 (E-Z), it is not awarded for the corresponding lettered segment of CWLR 211 (E-Z) or CWLR 212 (E-Z).

CWLR 221 (E-Z) Low Residency Cross-Genre Workshop (2-4) Workshop, 10-20 hours per quarter; consultation, 1-2 hours. Prerequisite(s): graduate standing. Focuses on the production of original work. Includes introductory study of chosen cross-genres. Emphasizes technique, structure, style, and form. F. Fiction; N. Nonfiction; P. Poetry; S. Screenwriting; T. Playwriting. Each segment is repeatable as its content changes to a maximum of 8 units. If credit has already been awarded for a segment of CWLR 211 (E-Z) or CWLR 212 (E-Z), it is not awarded for the corresponding lettered segment of CWLR 221 (E-Z) or CWLR 222 (E-Z).

CWLR 222 (E-Z) Low Residency Cross-Genre Workshop (2-4) Workshop, 10-20 hours per quarter; consultation, 1-2 hours; extra reading, 3-6 hours. Prerequisite(s): graduate standing. Focuses on the production of original work. Includes introductory study of chosen cross-genres. Emphasizes technique, structure, style, and form. F. Fiction; N. Nonfiction; P. Poetry; S. Screenwriting; T. Playwriting. Each segment is repeatable as its content changes to a maximum of 4 units. If credit has already been awarded for a segment of CWLR 211 (E-Z) or CWLR 212 (E-Z), it is not awarded for the corresponding lettered segment of CWLR 221 (E-Z) or CWLR 222 (E-Z).

Lecturers

Brandon Aiken
 Kelli King, M.F.A.

Major

The Dance major is distinctive for its outstanding faculty of nationally recognized scholars and artists who draw from a variety of academic and creative backgrounds, including choreography, history, literature, performance studies, and cultural studies.

The B.A. degree in Dance focuses on choreography and cultivation of cultural and historical perspectives on dance. Movement practices, dance composition, performance, and cultural and historical studies, courses are required. Elective courses are also required. Movement practice courses are offered in dance/movement forms as they are practiced in various cultures of the world. Dance majors must participate in at least one production season of "UCR is Dancing," the department's annual concert series featuring original choreography and performance projects by students. This concert series also includes historical dance reconstructions by department faculty as well as original repertory created by professional guest artists.

In addition, visiting professional dancers, choreographers, and scholars come to UCR frequently to give special workshops, master classes, and lectures.

Opportunities to perform include "UCR is Dancing," the Faculty Dance Concert, the Graduate Dance Concert, and the Gluck Fellows Arts Outreach Touring programs.

New majors are eligible to audition for the Chancellor's Performance Award, a scholarship of up to \$3,000. Student assistantships and other forms of financial aid are also available. Undergraduate majors may apply for research grants and stipends for summer dance studies. Selected students receive \$1,000 Maxwell H. Gluck Fellowships.

University Requirements

See Undergraduate Studies section.

College Requirements

See College of Humanities, Arts, and Social Sciences, Colleges and Programs section.

Major Requirements

The major requirements for the B.A. degree in Dance are as follows: A minimum of 74 units of course work in Dance, 38 of which are upper division.

1. Lower-division requirements (8 units): DNCE 014, DNCE 019
2. Choreographies (12 units): DNCE 114A, DNCE 114B, DNCE 114C
3. Histories/Cultures (8 units), 2 courses from: DNCE 131/WMST 127, DNCE 132, DNCE 133, DNCE 134, DNCE 135
4. Performance/Productions (10 units): DNCE 167, DNCE 180G, and one quarter of DNCE 180J
5. Movement Practice (up to 24 units)

Dance majors must enroll in at least one movement practice course per quarter, and must pursue a concentration in two different dance genres of at least 6 units each. Up to 24 units may be counted towards the major from:

- a) DNCE 067A, DNCE 067B, DNCE 067C (Modern Technique)
 - b) DNCE 071A, DNCE 071B (Ballet)
 DNCE 073A/LNST 073A, DNCE 073B/LNST 073B (Dance of Mexico)
 DNCE 075A, DNCE 075B (World Dance Forms)
 DNCE 081A, DNCE 081B, DNCE 081C (Dance Cultures, Culture in Dance)
6. Electives (12 units) 12 units of additional coursework as follows:
 - a) At least 8 units must be drawn from the following upper division courses: DNCE 131/WMST 127, DNCE 132, DNCE 133, DNCE 134, DNCE 135, DNCE 155 (E-Z), DNCE 161/MCS 162, DNCE 162/MCS 162, DNCE 171 (E-Z), DNCE 172 (E-Z), DNCE 173 (E-Z), DNCE 180R
 - b) No more than 4 units may be drawn from the following movement practice and dance practicum courses:

DNCE 067A, DNCE 067B, DNCE 067C, DNCE 071A, DNCE 071B, DNCE 073A/LNST 073A, DNCE 073B/LNST 073B, DNCE 075A, DNCE 075B, DNCE 081A, DNCE 081B, DNCE 081C, DNCE 168, DNCE 180J, DNCE 180K

Minor

Students who minor in Dance receive an introduction to choreography, movement practice, and cultural and historical studies of dance that enable them to pursue upper-division courses germane to a particular focus in dance.

1. Lower-division preparation (14 units)

a) DNCE 014, DNCE 019

b) Six (6) units from movement practice courses: DNCE 067A, DNCE 067B, DNCE 067C, DNCE 071A, DNCE 071B, DNCE 072A, DNCE 072B, DNCE 072C, DNCE 073A/LNST 073A, DNCE 073B/LNST 073B, DNCE 075A, DNCE 075B, DNCE 081A, DNCE 081B, DNCE 081C

2. Upper-division requirements (16 units): 4 courses from DNCE 114A, DNCE 114B, DNCE 114C, DNCE 131/WMST 127, DNCE 132, DNCE 133, DNCE 134, DNCE 135, DNCE 155 (E-Z)/MUS 155 (E-Z), DNCE 161/MCS 161, DNCE 162/MCS 162, DNCE 171 (E-Z), DNCE 172 (E-Z), DNCE 173 (E-Z), DNCE 180 (E-Z)

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Graduate Program

The Department of Dance offers a Master of Arts (M.A.) in Critical Dance Studies, a Master of Fine Arts (M.F.A.) in Experimental Choreography, and a Ph.D. in Critical Dance Studies.

Master's Degrees

M.A. in Critical Dance Studies

Admission Students gaining admission to the Ph.D. program in Critical Dance Studies may, after advisement and with the approval of the faculty committee, elect to pursue an M.A. degree in Critical Dance Studies.

Plan I (Thesis) Students must complete a minimum of 36 quarter units of undergraduate (100 series) and graduate (200 series) courses. At least 24 of these units must be in graduate courses and must include the following UCR courses:

DNCE 254 (Political Approaches to Dance Studies)

DNCE 255 (Historical Approaches to Dance Studies)

DNCE 257 (Rhetorical Approaches to Dance Studies)

DNCE 258 (Cultural Approaches to Dance Studies)

A maximum of 12 units of DNCE 299 (thesis research) can be counted towards the 36-unit minimum. Other courses (to fulfill the 36-unit requirement) should be selected, with the consent of the program graduate advisor, from relevant upper-division and graduate courses.

Candidates for the degree must prepare and present an acceptable thesis to the Department of Dance.

M.F.A. in Experimental Choreography

The Master of Fine Arts (M.F.A.) program in Experimental Choreography constructs opportunities for highly motivated choreographers to conduct both research in dance and an assessment of contemporary issues in dance aesthetics, history, and culture.

The focus of this program is the development of experimental choreography that challenges cultural assumptions and is informed by a critical and reflective perspective. Core courses focus on what constitutes an experiment in contemporary dance, improvising choreography, systems of representation used to create choreographic meaning, and the collaborative process. Through close cooperation with the Ph.D. program in Critical Dance Studies, students explore the dynamic relationships between theory, method, and object of study. A final project demonstrates a thorough investigation and committed execution of a defined choreographic problem. Financial assistance includes teaching assistantships and fellowships for community projects through the Gluck Fellows Program of the Arts.

Admission Applicants to the program should demonstrate significant professional experience as an active choreographer making and producing work, must have a B.A. or B.F.A. degree from an accredited institution. It is recommended that applicants take the GRE if their GPA is below a 3.0. A video sample of choreography is required. Contact the department for specific details. The program is especially designed for the practicing artist who desires to return to an institutional context for advanced study.

The program seeks applicants who desire to contextualize their aesthetic inquiry through the study of historical, cultural, and political perspectives on dance. Students will be asked to examine their own artistic production from these various perspectives, as they produce new work. They will be involved in a rigorous investigation of contemporary aesthetic issues as formulated in their own research projects.

Course Work Requirements consist of 40 units of course work (10 courses) and 12 units of independent research for a final project. The core curriculum, normally to be completed in the first two years of residency, shall comprise the following 16 units:

DNCE 240 (Improvising Choreography: Scores, Structures, and Strategies)

DNCE 241 (Creating the Experiment: Identifying the New)

DNCE 242 (Dancing Representation: Figures, Forms, and Frames)

DNCE 243 (Collaborating in Dance Making: Materials, Methods, and Interactions)

In addition, students must complete 16 units from the following Critical Dance Studies courses:

DNCE 254 (Political Approaches to Dance Studies)

DNCE 255 (Historical Approaches to Dance Studies)

DNCE 257 (Rhetorical Approaches to Dance Studies)

DNCE 258 (Cultural Approaches to Dance Studies)

One 4-unit DNCE 200-level seminar course in history and theory, excluding DNCE 280 and DNCE 290 to DNCE 299.

Students must also take Dance 301, as well as 4 graduate-level units of electives, to be determined in consultation with their chair, that are relevant to their specific research project. These 4 additional units should be taken for a letter grade and can include a graduate-level seminar within or outside of the department, Dance 280 (the Colloquium), or the bundling of an upper-division undergraduate-level course with 2 units of Dance 292 (Concurrent Analysis).

An additional 12 units are taken through DNCE 297 or DNCE 299 for work on phases of the final project. During the second year, students form a committee consisting of three faculty members, one of whom may be outside the department. The committee approves the project proposal and supervises the final project. The student's progress through the program culminates in the final project, which reflects a serious investigation of a specific choreographic problem.

Foreign Language Requirement None

Written and/or Oral Qualifying Examination

During the second year, the student writes a 5–15-page proposal for the final project to be approved by the committee.

Final Project The final project could take the form of a concert of dances or some other performance event in which the student's research is made evident. Because of the experimental nature of the program, it is difficult to specify the exact form the project may take. For example, students may 1) undertake to create site-specific dances occurring in different locales over several months, 2) organize opportunities for interactive choreography with distinct groups of performers, or 3) choreograph a dance to be viewed on CD-ROM. Whatever its final form, the project must demonstrate a thorough investigation and committed execution of a defined aesthetic concern. The final project includes a written requirement to be completed within one quarter following the performance event. This document, 20–40 pages long, outlines the aesthetic focus of the student's research and provides a historical and philosophical contextualization for the project.

Normative Time to Degree 9 quarters

Doctoral Program

Ph.D. in Critical Dance Studies

The Ph.D. program in Critical Dance Studies provides an advanced interdisciplinary base for innovative research in the field of cultural, political, and historical studies of dance. The program of study embraces a theoretical consideration of all dimensions of the practice of dance. These dimensions include, but are not limited to, body politics; media and digital cultures; globalization and cultural translation; race, ethnicity, sexuality, and gender; mobilization and class; and corporeal knowledges and choreography. In addition to theoretical and historical concerns, the program promotes the articulation of a variety of methodological approaches to the analysis of bodily performance.

UCR faculty put into motion various modes of production: performance studies, history, ethnography, critical race theory, feminist studies/masculinities & queer studies, Marxism or post-Marxism, and other specific area studies related to, for example, South Asian, Asian Diaspora and Asian American studies, African Diaspora studies, Indigenous studies, Latina/Latin American studies, and Global South studies. The program provides a provocative environment for investigating cutting-edge strategies for original scholarly work in dance.

Admission Students must meet the general requirements for admission to the Graduate Division as shown in the Graduate Studies section of this catalog. Students may submit a statement of background about experience in dance history and theory, a previously prepared research paper, or the equivalent, demonstrating analytical and interpretive skills, and GRE scores.

Prerequisites include the following:

1. A working knowledge of movement
2. An acquaintance with some system of movement observation and analysis
3. Preparation in general historical and cultural studies

Deficiencies may be corrected with appropriate course work.

Course Work Core curriculum normally to be completed in the first two years of residency includes the following:

DNCE 254 (Political Approaches to Dance Studies)

DNCE 255 (Historical Approaches to Dance Studies)

DNCE 257 (Rhetorical Approaches to Dance Studies)

DNCE 258 (Cultural Approaches to Dance Studies)

DNCE 301 (Seminar in Dance Studies Pedagogy and Professional Development)

Six additional graduate-level courses are required. Two from other disciplines related to the student's research interest, and four from Dance. A maximum of one Dance M.F.A. core course may be included as one of the four additional graduate-level dance courses required.

Language Requirement All students must show competence in at least one language other than English. Further requirements in specific forms of dance or music notation or ancient or contemporary languages may be determined for each student in consultation with relevant faculty and the graduate advisor of the program.

Written Qualifying Examination Students must prepare one field for examination with each of four members of the committee in whose courses the student has completed degree requirements. The committee is composed of two Dance faculty members, one of whom is chair, and two other members who may be Dance faculty or "outside members" (not a

UCR Dance faculty member or cooperating faculty member). The written qualifying examination may be completed as a “take-home” format (seven-day, open-book) or a “sit-in” format (two-hour exam periods for each field, conducted on site in the department, and completed in one five-day work week).

Qualifying Essay One quarter after successfully completing the written examination, students complete a rough draft of the qualifying essay, under the direction of the same group of faculty members who monitored the written examination. Students finalize the qualifying essay and sit for the oral examination before the end of the following quarter. The qualifying essay is generally 25 pages in length and demonstrates the student’s ability to articulate a viable dissertation research project. It must consist of written work but may include other forms of video or film productions with the approval of the relevant committee and the graduate advisor.

Oral Qualifying Examination Students must prepare qualifying essay and be examined by a five-person oral qualifying examination committee. The committee, nominated by the department and appointed by the dean of the Graduate Division, consists of all four written examination committee members, plus a fifth member chosen so that the five-person committee would be comprised of no more than two “outside faculty members,” and no fewer than one “outside faculty member.” All members of the committee must be physically present for the exam. The committee examines the adequacy of the student’s preparation to conduct the research proposed in the qualifying essay. Advancement to candidacy for the doctoral degree depends on completing required course work, fulfilling language requirements, and passing the written examination, qualifying essay, and the oral examination.

The Dance department expects students to complete the entire examination process by the end of their tenth quarter in the program (end of the first quarter of their fourth year) to make satisfactory progress toward completing the degree.

Dissertation and Final Oral Examination A dissertation committee is composed of three members: a chair from Dance, a Dance faculty member, and either a Dance faculty member, or an outside faculty member. The committee directs and approves the research and writing of the dissertation. The dissertation must consist of written work but may include other forms of video or film productions with the approval of the relevant committee and the graduate advisor. It must present original scholarly work and be approved by the dissertation committee before the student takes the final oral examination. Students must have satisfactory performance on a final oral examination, conducted by the dissertation committee and open to all members of the faculty. The examination emphasizes the dissertation and related topics.

Normative Time to Degree 18 quarters

Lower-Division Courses

DNCE 005 Introduction to Dance (4) Seminar, 3 hours; individual study, 1 hour; extra reading, 1 hour; several short essays. As a survey of approaches to dancing and dance making, this course introduces students to dance technique, performance, and composition as fundamental components in the art of dance. Students will cultivate the ability to enact and remember patterns of rhythm, effort, and visual design in movement and will become acquainted with various procedures for organizing movement. Especially designed for students with no experience in dance.

DNCE 007 Dance: Cultures and Contexts (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Provides historical and cultural context for selected dance forms and practices. Students study dance as an art form, cultural practice, and meaning-making activity, with particular attention to histories of race, gender, sexuality, class, and nation. Intended for non-majors. Credit will be awarded for only one of DNCE 007, DNCE 007V or DNCE 007W.

DNCE 007V Dance: Cultures and Contexts (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Provides historical and cultural context for selected dance forms and practices. Students study dance as an art form, cultural practice, and meaning-making activity, with particular attention to histories of race, gender, sexuality, class, and nation. Intended for non-majors. Credit is awarded for only one of DNCE 007, DNCE 007V or DNCE 007W.

DNCE 007W Dance: Cultures and Contexts (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ENGL 001B with a grade of “C” or better or consent of instructor. Provides historical and cultural context for selected dance forms and practices. Students study dance as an art form, cultural practice, and meaning-making activity, with particular attention to histories of race, gender, sexuality, class, and nation. Intended for non-majors. Fulfills the third-quarter writing requirement for students who earn a grade of “C” or better for courses that the Academic Senate designates, and that the student’s college permits as alternatives to English 001C. Credit is awarded for only one of DNCE 007, DNCE 007V or DNCE 007W.

DNCE 014 Introduction to Choreography (4) Lecture, 4.5 hours; individual study, 1.5 hours. Prerequisite(s): a major or minor in Dance or consent of instructor. Analysis of basic problems and issues of choreography. Emphasis is on improvisational methods as an approach to the investigation of space, time, and energy in motion as the fundamental elements of a dance. Course is repeatable to a maximum of 8 units.

DNCE 019 Introduction to Dance Studies (4) Lecture, 3 hours; outside research, 1 hour; term paper, 1 hour; written work, 1 hour. Prerequisite(s): none. Introduces major concepts, approaches, and issues in the study of dance as a cultural, historical, and artistic practice. Uses text, video, studio, demonstration, and performance to expose students to ways of writing, speaking, researching, and thinking clearly and critically about dance.

DNCE 066A Beginning West African Dance (2) Studio, 2 hours; screening, 1 hour; extra reading, 1 hour; individual study, 1 hour. West African dance technique at beginning level. Vigorous class with focus on rhythm, songs, and culture as well as dance choreographies traditionally performed for rites of passage, courtship, coming of age, and storytelling. Emphasizes community building and individual potential. Course is repeatable.

DNCE 066B Intermediate West African Dance (2) Studio, 2 hours; screening, 1 hour; extra reading, 1 hour; individual study, 1 hour. West African dance technique at intermediate level. Vigorous class with focus on rhythm, songs, and culture as well as dance choreographies traditionally performed for rites of

passage, courtship, coming of age, and storytelling. Emphasizes community building and individual potential. Course is repeatable.

DNCE 067A Beginning Modern Dance Technique (2) Studio, 3 hours; individual study, 1 hour; extra reading, 1 hour. Prerequisite(s): none. Modern dance technique at the beginning level. Outside-of-class assignments include attending dance concerts, viewing dance videos, and regular individual practice sessions. Recommended for nondancers and dancers. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination. Course is repeatable.

DNCE 067B Intermediate Modern Dance Technique (2) Studio, 4.5 hours; individual study, 1.5 hours. Prerequisite(s): DNCE 067A recommended. Modern dance technique at the intermediate level. Outside-of-class assignments include attending dance concerts, viewing dance videos, and regular individual practice sessions. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination. Course is repeatable.

DNCE 067C Advanced Modern Dance Technique (2) Studio, 4.5 hours; individual study, 1.5 hours. Prerequisite(s): DNCE 067B recommended. Modern dance technique at the advanced level. Outside-of-class assignments include attending dance concerts, viewing dance videos, and regular individual practice sessions. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination. Course is repeatable.

DNCE 068 Somatic Techniques and Experiential Anatomy (2) Studio, 3 hours; extra reading, 1 hour; individual studio, 2 hours. Introduces physical practices and concepts from a variety of somatic techniques. Explores how the body functions through actions and interactions of its structures. Utilizes a possibilities-in-the-field approach to study and embody some of the varied interpretations that can arise from the same set of anatomical facts. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 16 units. **Greenberg**

DNCE 069A Beginning Eighteenth-Century Dance (2) Studio, 2 hours; extra reading, 1 hour; individual study, 1 hour; screening, 1 hour. Eighteenth-century dance technique at the beginning level. Focuses on movement practices, corporeality, spatial navigation, and relationships with music. Dances are situated in historical, cultural, and political frameworks. Outside-of-class assignments include attending dance concerts, viewing dance videos, and regular individual practice sessions. Recommended for non-dancers and dancers. Course is repeatable.

DNCE 069B Intermediate Eighteenth-Century Dance (2) Studio, 2 hours; extra reading, 1 hour; individual study, 1 hour; screening, 1 hour. Eighteenth-century dance technique at intermediate level. Focuses on movement practices, corporeality, spatial navigation, and relationships with music. Dances are situated in historical, cultural, and political frameworks. Outside-of-class assignments include attending dance concerts, viewing dance videos, and regular individual practice sessions. Recommended for non-dancers and dancers. Course is repeatable.

DNCE 070A Beginning Hip Hop Dance (2) Studio, 2 hours; extra reading, 1 hour; individual study, 1 hour; screening, 1 hour. Hip Hop dance technique at beginning level. High-energy class with focus on dance steps, isolation techniques, rhythm, confidence, and bringing style and personality to movements. Stresses Hip Hop dance as fun, diverse, self-expressive, innovative, and transformative. Grounded in histories of Hip Hop as a cultural movement. Course is repeatable.

DNCE 070B Intermediate Hip Hop Dance (2) Studio, 2 hours; extra reading, 1 hour; individual study, 1 hour; screening, 1 hour. Hip Hop dance technique at intermediate level. Outside-of-class assignments include attending dance concerts, viewing dance videos, and regular individual practice sessions. Recommended for non-dancers and dancers. Course is repeatable.

DNCE 071A Beginning Ballet Technique (2) Studio, 3 hours; screening, 1 hour; individual study, 1 hour; extra reading, 1 hour. Prerequisite(s): none. Ballet technique at the beginning level. Outside-of-class assignments include attending dance concerts, viewing dance videos, and regular individual practice sessions. Recommended for nondancers and dancers. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination. Course is repeatable.

DNCE 071B Intermediate Ballet Technique (2) Studio, 3 hours; screening, 1 hour; individual study, 1 hour; extra reading, 1 hour. Prerequisite(s): DNCE 071A recommended. Ballet technique at the intermediate level. Outside-of-class assignments include attending dance concerts, viewing dance videos, and regular individual practice sessions. Normally graded Satisfactory (S) or No Credit (NC), but students may petition the instructor for a letter grade on the basis of assigned extra work or examination. Course is repeatable.

DNCE 073A Beginning Jazz Dance (2) Studio, 2 hours; extra reading, 1 hour; individual study, 1 hour; screening, 1 hour. Jazz dance technique at beginning level. Focuses on rhythms, isolations, syncopation, and performance quality. Students learn a variety of jazz styles from lyrical to funk and classical to musical theater. Outside-of-class assignments include readings, video viewings, and written assignments in historical, cultural, and aesthetic issues pertaining to jazz dancing. Course is repeatable.

DNCE 073B Intermediate Jazz Dance (2) Studio, 2 hours; extra reading, 1 hour; individual study, 1 hour; screening, 1 hour. Jazz dance technique at intermediate level. Focuses on rhythms, isolations, syncopation, and performance quality. Students learn a variety of jazz styles from lyrical to funk and classical to musical theater. Outside-of-class assignments include readings, video viewings, and written assignments in historical, cultural, and aesthetic issues pertaining to jazz dancing. Course is repeatable.

DNCE 074A Beginning Yoga for Dancers (2) Studio, 2 hours; extra reading, 1 hour; individual study, 1 hour; screening, 1 hour. Yoga for dancers at beginning level. Focuses on alignment; understanding how to practice safely; increasing strength, flexibility, and balance; developing focus and bodily awareness; and exploring yoga's relation to dance. Coursework includes reading and discussion of yoga texts, concepts, and philosophy. Recommended for non-dancers and dancers. Course is repeatable.

DNCE 074B Intermediate Yoga for Dancers (2) Studio, 2 hours; extra reading, 1 hour; individual study, 1 hour; screening, 1 hour. Yoga for dancers at intermediate level. Focuses on alignment; understanding how to practice safely; increasing strength, flexibility, and balance; developing focus and bodily awareness; and exploring yoga's relation to dance. Coursework includes reading and discussion of yoga texts, concepts, and philosophy. Recommended for non-dancers and dancers. Course is repeatable.

DNCE 075A Beginning Dance Techniques and Practices (2) Studio, 3 hours; screening, 1 hour; individual study, 1 hour; extra reading, 1 hour. Prerequisite(s): none. Dance Techniques and Practices at beginning level. Focus varies each quarter. Outside-of-class assignments may include attending dance concerts, viewing dance videos, writing assignments in historical, cultural and aesthetic issues relating to the quarter's dance form, and regular individual practice-sessions. Course is repeatable.

DNCE 075B Intermediate Dance Techniques and Practices (2) Studio, 3 hours; screening, 1 hour; individual study, 1 hour; extra reading, 1 hour. Prerequisite(s): DNCE 075A recommended. Dance Techniques and Practices at intermediate level. Focus varies each quarter. Outside-of-class assignments may include attending dance concerts, viewing dance videos, writing assignments in historical, cultural and aesthetic issues relating to the quarter's dance form, and regular individual practice sessions. Course is repeatable.

DNCE 081 Dance Cultures, Culture in Dance (4) Lecture, 2 hours; studio, 6 hours. Explores non-presentational dance forms that are intricately woven into the culture of a particular society. Focuses on performance integrity and cultural memory. Incorporates videos, books, field trips, and guest lectures in addition to studio time. Course is repeatable to a maximum of 8 units.

Upper-Division Courses

DNCE 114A Dance Composition I (4) Lecture, 3 hours; studio, 3 hours. Prerequisite(s): DNCE 007 or DNCE 007V or DNCE 007W or DNCE 014 and two quarters of dance technique, or equivalent. Analyzes dance as an art form. Emphasizes space, time, and energy in motion as elements in choreographic style. Course content presented at the beginner's level.

DNCE 114B Dance Composition II (4) Lecture, 3 hours; studio, 3 hours. Prerequisite(s): DNCE 114A. The continuing analysis of dance as an art form with emphasis on space, time and energy in motion as elements in choreographic style. In DNCE 114B, this is done on the intermediate level.

DNCE 114C Dance Composition III (4) Lecture, 3 hours; studio, 3 hours. Prerequisite(s): DNCE 114B. The continuing analysis of dance as an art form with emphasis on space, time and energy in motion as elements in choreographic style. In 114C, this is done on the advanced level.

DNCE 123 Southeast Asian Performance (4) Lecture, 3 hours; screening, 2 hours; extra reading, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Introduction to the roles and genres of expressive culture in Southeast Asia, including dance, music, theater, film, and digital culture. Performance is discussed both as a time-honored and as a contemporary medium for cultural production, from the courts to everyday experience. Material will be drawn from the Philippines, Malaysia, Indonesia, Thailand, Laos, Cambodia, Vietnam, Burma, Singapore, and the Southeast Asian diaspora. Cross-listed with ANTH 126, AST 123, and MUS 123.

DNCE 127 Music Cultures of Southeast Asia (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A survey of music, dance, theatre, and ritual in the Philippines, Indonesia, Malaysia, Thailand, Myanmar (Burma), Laos, Cambodia, and Vietnam. Designed for the student interested in the performing arts and cultures of mainland and insular Southeast Asia. No Western music background is required. Cross-listed with ANTH 176, AST 127, ETST 172, and MUS 127.

DNCE 128 Performing Arts of Asia (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A survey of music, dance, theatre, and ritual in four major geocultural regions of Asia: Central, East, South, and Southeast. No Western music training is required. Course is repeatable to a maximum of 8 units. Cross-listed with ANTH 128, AST 128, MUS 128, and THEA 176.

DNCE 131 Dance, Gender, Sexuality (4) Lecture, 3 hours; outside research, 1 hour; term paper, 1 hour; written work, 1 hour. Prerequisite(s): DNCE 019 (may be taken concurrently) or consent of instructor. Explores some of the ways that studying dance, an art form whose medium is the body, illuminates feminist,

gender, and sexuality studies --- and vice versa. Includes weekly video screenings and readings. No previous dance experience required. Cross-listed with WMST 127.

DNCE 132 Dance, Citizenship, Location (4) Lecture, 3 hours; outside research, 1 hour; term paper, 1 hour; written work, 1 hour. Prerequisite(s): DNCE 019 (may be taken concurrently) or consent of instructor. Explores interconnections between dancing bodies, their geographical, political, cultural locations, and the ways in which they negotiate inclusion or exclusion within state apparatuses of power such as citizenship.

DNCE 133 Dance, Space, Time (4) Lecture, 3 hours; outside research, 1 hour; term paper, 1 hour; written work, 1 hour. Prerequisite(s): DNCE 019 (may be taken concurrently) or consent of instructor. Explores the flow among non-presentational and presentational dance forms, state productions and treaties, and design factors that are meant to enable our daily lives such as buildings, parks, and roadways. Students take advantage of video, books, field trips, guest lectures and studio lab time.

DNCE 134 Dance, Genre, Institutions (4) Lecture, 3 hours; outside research, 1 hour; term paper, 1 hour; written work, 1 hour. Prerequisite(s): DNCE 019 (may be taken concurrently) or consent of instructor. Explores how dance and movement genres interact with and articulate, but also query and contest, structures, institutions, and traditions such as theatrical performance and touring shows, rites of passage, political contests, educational enterprises, and territorial campaigns through which societies frame experience.

DNCE 135 Dance, Race, Property (4) Lecture, 3 hours; outside research, 1 hour; term paper, 1 hour; written work, 1 hour. Prerequisite(s): DNCE 019 (may be taken concurrently) or consent of instructor. Explores intersections between dancing bodies, questions of race, and notions of cultural property. Investigates issues of embodied identity and racialization, cultural appropriation and cultural exchange, purity and hybridity, and ownership and copyright.

DNCE 155 (E-Z) Seminar in Dance and Music (4) Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introduces relationships and representations between music and dance. Explores musical and choreographic form, compositional strategies, hybridization of style, cultural meanings and registers in which these were made, the agencies such representations enabled, interpretive communities, and cross-cultural interactions. Cross-listed with MUS 155 (E-Z).

DNCE 155F The Ballets Russes (4) Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores how the Diaghilev Ballets Russes' repertoire and collaborative practices challenged the nature of artistic labor; negotiated traditional patronage and new commercial modes; engaged with cultural nationalism, gender role contention, and emerging models of sexuality; and deployed representational strategies that played into period debates about power and social organization. Cross-listed with MUS 155F.

DNCE 161 Choreographing the Screen (4) Lecture, 3 hours; screening, 2 hours; term paper, 1 hour. Prerequisite(s): DNCE 019 (may be taken concurrently) or consent of instructor. Focuses on choreographing for the camera and the screen. Topics include video art, classic film choreography, music video, and digital dance technologies. Students prepare a choreographic piece for the camera as a final project. Cross-listed with MCS 161.

DNCE 162 Tool, Technology, Technique (4) Lecture, 1 hour; practicum, 3 hours; screening, 3 hours; laboratory, 3 hours. Prerequisite(s): DNCE 019 (may be taken concurrently) or consent of instructor. Practicum in video and digital production, with an emphasis on capturing and editing the moving body. Students

bring their own video or digital recording device. Editing equipment will be available. Cross-listed with MCS 162.

DNCE 167 Dance Production (2) Studio, 6 hours. Prerequisite(s): by audition. Study, production, and performance of dances. Course may be repeated for credit.

DNCE 168 Dance Touring Ensemble (4) Studio, 6 hours; outside research, 3 hours. Prerequisite(s): consent of instructor. Dance Touring Ensemble members work with the instructor to create a lecture-demonstration and create and learn repertory which is performed at various sites within the community. Course is repeatable to a maximum of 16 units.

DNCE 171 (E-Z) Filmic Bodies (4) For hours and prerequisites, see segment descriptions. Assesses a multiplicity of filmic genres through the portals of the dancing and mobilized body as related to race, gender, class, and other identifiers. Explores the politics of movement on film, the mechanics of making film work, and the political economy of dance on film. Dance experience is usually not required. Segments are repeatable. Cross-listed with MCS 151 (E-Z).

DNCE 171F Ethnographic Representation of Dance on Film: "... and then they danced" (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Analyzes the juncture between representation and presentation in everyday dance genres on film. Explores race, class, tropes of authenticity, and ownership of cultural production through screenings, lectures, and theoretical writings. No previous dance experience required. Course is repeatable. Cross-listed with MCS 151F.

DNCE 171G Gender, Mechanization, and Shape (4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Utilizes film, video, and texts to examine the relationship among gender, mechanization, and shape during the twentieth century. Focuses on the performing arts, industrial and technological design, and the relationship of visual culture to changing notions of gender. Course is repeatable. Cross-listed with MCS 151G.

DNCE 171J Spectatorship (4) Lecture, 3 hours; screening, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores the nature of film studies through the eyes of the audience. Uses film, videos, and texts (in addition to outside viewing of films in cinematic locales) to formulate how viewing film constructs the viewer's subjectivity and a film's cultural context. Course is repeatable. Cross-listed with MCS 151J.

DNCE 171K Interruptions as Narration: Fight Scenes, Dance Sequences, and Music Videos (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Analyzes the deconstruction and reconstruction of the narrative arc. Utilizes selected films to explore performance practices such as fight scenes and dance sequences. Includes screenings both in class and outside of class. Course is repeatable. Cross-listed with MCS 151K.

DNCE 171M Bollywood (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. A study of the vast corpus of films that constitute the genre called Bollywood. Focuses on the genre's music and dance styles. Includes weekly film screenings. No previous dance experience required. Course is repeatable. Cross-listed with MCS 151M.

DNCE 172 (E-Z) Televisual Bodies (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Analyzes choreographic practices within television broadcast and marketing and their relation to popular culture. Also examines situational or tactical use and misuse of satellite, cablecast, and broadcast television by unintentional audiences that subsequently reconstitute

themselves as communities via the programming. Focuses on video as an archival and/or choreographic tool. J. Corporations and Corporealities: Commercial, Culture, and Choreography; K. Television as Location: The Satellite Feed; M. Music Television (MTV) and Popular Culture. Segments are repeatable. Cross-listed with MCS 152 (E-Z).

DNCE 173 (E-Z) Digitized Bodies (4) Lecture, 3 hours; screening, 2 hours; laboratory, 1 hour. Prerequisite(s): MCS 020; upper-division standing or consent of instructor. Provides a theoretical approach to digital subjectivities, bodies in motion, products, and realities. Addresses issues of liveness, new media, mediated cultural identities, speed, transfer, telepresence, and coded and encoded sexuality within programming. Focuses primarily on the body-computer interface. J. Digital Games, Violence, and the Body; K. Virtual Subjectivity: Persona, Identity, and Body. Segments are repeatable. Cross-listed with MCS 153 (E-Z).

DNCE 180 (E-Z) Dance Practicum (4) Studio, 8 hours. Prerequisite(s): upper-division courses in choreography or consent of instructor in unusual situations. An investigation of dance production theories and practices. Each practicum is directed experience in a limited topic, announced in advance of the quarter given, with the name of the guest instructor if it is not taught by the staff. E. Cine Dance; F. Folk Forms; G. Advanced Choreography; H. Intermedia Movement; I. Video Dance; J. Repertory; K. Reconstruction of Dances; L. Theory of Individual Choreographers; M. Dance for Children; N. Dance in Therapy; O. Improvisation; P. Role Preparation; Q. Dance Notation; R. Pedagogy; S-Z to be announced. Each segment is repeatable to a maximum of 12 units.

DNCE 187 Improvisation Studies (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Presents the emergent field of improvisation studies, moving beyond traditional genre boundaries to explore improvisation as a cultural phenomenon and social practice. Draws from jazz studies, ethnomusicology, music theory, musicology, American studies, and the histories of dance, theatre, and the visual arts. Cross-listed with MUS 187.

DNCE 190 Special Studies (1-5) To be taken with the consent of the Chair of the Department of Dance to meet special curricular problems. Course is repeatable to a maximum of 12 units.

DNCE 198-I Individual Internship in Dance (1-12) Prerequisite(s): 1) upper-division standing; 2) evidence of prior arrangement with the professional(s) involved; and 3) approval of the UCR dance faculty sponsor. Work with an appropriate professional individual or organization to gain experience and skill in the student's chosen dance-related specialty. May be repeated to a total of 16 units.

Graduate Courses

DNCE 240 Improvising Choreography: Scores, Structures, and Strategies (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An evaluation of the use of the score or structure as a predetermining guide to the production of choreography. Students create choreography in ensemble, co-choreographing dances in the moment of performance and assessing immediately the efficacy of a given approach. Course is repeatable to a maximum of 8 units.

DNCE 241 Creating the Experiment: Identifying the New (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An inquiry into what constitutes an experiment in contemporary dance, critically examining how artists bring new dance into existence. Questions the working process in originating movement, sequencing, and images for dance and assesses this process with respect to larger historical and cultural frameworks. Course is repeatable to a maximum of 8 units.

DNCE 242 Dancing Representation: Figures, Forms, and Frames (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An examination of the systems of representation used to create choreographic meaning. Considers the bodily codes and the cultural associations attached to distinct qualities of movement and the conventions of space, time, and narrative through which a dance achieves its meaning. Course is repeatable to a maximum of 8 units.

DNCE 243 Collaborating in Dance Making: Materials, Methods, and Interactions (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An examination of the function of the choreographer as principal director of the dance project. Analysis of various approaches to the making of dance works that involve distinctive forms of collaboration with artists working in allied media. Course is repeatable to a maximum of 8 units.

DNCE 244 Special Topics in Dance Making (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Study of emerging issues in embodied practice, dance creation, and/or dance production. Focus varies by quarter. Topics may include intersections between theoretical and practical approaches to dance; dance and digital technologies; cultural specificity and dance making; curatorial practices; concepts or models of dance production; and embodying dances past. Letter Grade or Satisfactory/No Credit (SN/C); no petition required. Course is repeatable as content changes.

DNCE 254 Political Approaches to Dance Studies (4) Seminar, 3 hours; consultation, 1 hour. Prerequisite(s): reading knowledge of a language other than English; working knowledge of notation; graduate standing or consent of instructor. The study of power relations reflected in and enacted by dance practice and performance. Topics include nation formation, imperialism, race, commodification, globalization, economic and class relations, gender, and political affiliation and resistance.

DNCE 255 Historical Approaches to Dance Studies (4) Seminar, 3 hours; studio, 2-3 hours. Prerequisite(s): reading knowledge of a language other than English; working knowledge of notation; graduate standing or consent of instructor. The study of dances past and how dance practices have changed over time. May include study of changing modes for production and reception of dance, shifting constructions of bodies and movement, theories of dance reconstruction, and conceptualizations of historical evidence.

DNCE 257 Rhetorical Approaches to Dance Studies (4) Seminar, 3 hours; consultation, 1 hour. Prerequisite(s): reading knowledge of a language other than English; graduate standing or consent of instructor. The study of dance structure and of the structure of dance study. May include the analysis of narrative or representational structures in dance; narrative structures in dance writing; dance semiotics; dance philosophy; and the accuracy, reliability, and value of critical studies of dance.

DNCE 258 Cultural Approaches to Dance Studies (4) Seminar, 3 hours; consultation, 1 hour. Prerequisite(s): reading knowledge of a language other than English; graduate standing or consent of instructor. The study of dance in and across cultures including cross-cultural studies of dance; multicultural approaches to dance history; ethnological, ethnographic, and cultural studies approaches to dance analysis; and analysis of the different roles and functions dance plays in cultural systems.

DNCE 260 (E-Z) Seminar in Dance History (4) Seminar, 3 hours; written work, 3 hours. Prerequisite(s): graduate standing; consent of instructor. Studies in E. Periods; F. Styles; G. National Forms; H. Individual Artists; I. Choreographies; J. Aesthetics; K. Dance Literature; L. Notation. Each segment is repeatable as its content changes.

DNCE 264 Oral History (4) Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Theory and practice of oral history as a research technique. Ethnographic, social history, and gender perspectives on oral history; methods for research preparation, interview procedures, transcription, editing, and legal responsibilities. Interview project and analytical paper required.

DNCE 267 Choreographies of Writing (4) Seminar, 3 hours; discussion, 1 hour. Prerequisite(s): graduate standing or consent of instructor. An analysis of the types of relationships that may exist between dance and text. Examines the methods and strategies for translating choreographed action into a written description of that action. Students' writing is a major focus of discussions.

DNCE 280 Colloquium in Current Topics in Dance Research (2) Colloquium, 2 hours. Prerequisite(s): graduate standing or consent of instructor. Presents current research topics in dance, including selected professional development workshops. Conducted by students, faculty, visiting scholars, and artists. Students attend all colloquium sessions and complete an additional written component. Course is repeatable to a maximum of 4 units.

DNCE 290 Directed Studies (1-6) Outside research, 3-18 hours. Prerequisite(s): graduate standing; consent of instructor and Department Chair. To be taken to meet special curricular problems. Normally graded Satisfactory (S) or No Credit (NC) only, but students may petition the instructor for a letter grade for specialized topics pursued with close faculty supervision. Course is repeatable.

DNCE 291 Individual Study in Coordinated Areas (1-12) Outside research, 3-36 hours. Prerequisite(s): graduate standing; consent of instructor and graduate advisor. A program of study designed to advise and assist graduate students who are preparing for written and oral qualifying examinations. Does not count toward the unit requirement for the Ph.D. degree. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

DNCE 292 Concurrent Analytical Studies in Dance (1-4) Outside research, 3-12 hours. Prerequisite(s): graduate standing; consent of instructor and Graduate Advisor. To be taken concurrently with some 100-series course, but on an individual basis. Limited to research, criticism, and written work of a graduate order commensurate with the number of units elected. Normally graded Satisfactory (S) or No Credit (NC) only, but students may petition the instructor for a letter grade for specialized topics pursued with close faculty supervision. Course is repeatable.

DNCE 297 Directed Research (1-6) Outside research, 3-18 hours. Prerequisite(s): consent of instructor and graduate advisor. Individualized studies in specially selected topics in Dance under the direction of a faculty member. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

DNCE 298-I Individual Internship (1-4) Internship, 3-12 hours; term paper, 3 hours; written work, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Individual study or apprenticeship with an appropriate professional individual or organization to gain experience and skill in activities related to dance studies. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.

DNCE 299 Research for the Thesis or Dissertation (1-12) Outside research, 3-36 hours. Prerequisite(s): consent of thesis or dissertation director. Research for and preparation of the thesis or dissertation. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Courses

DNCE 301 Seminar in Dance Studies Pedagogy and Professional Development (4) Seminar, 3 hours; consultation, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Prepares for the teaching of dance studies in an academic setting and for participating in the dance studies profession. Includes creating course syllabi, discussing a range of practical teaching and professionalization issues, and developing skills necessary to succeed in the academic field of dance. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 8 units.

DNCE 302 Teaching Practicum (1-4) Lecture, 1-4 hours. Prerequisite(s): graduate standing. Supervised teaching in upper-division Dance History and lower-division Dance courses. Must be taken at least once by all teaching assistants. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professors

Mary L. Droser, Ph.D.
Nigel C. Hughes, Ph.D.
Gordon Love, Ph.D.
Timothy W. Lyons, Ph.D.
Richard A. Minnich, Ph.D.
David D. Oglesby, Ph.D.
Peter M. Sadler, Ph.D.

Professors Emeriti

Shawn Biehler, Ph.D.
Lewis H. Cohen, Ph.D.
James H. Dieterich, Ph.D.
Wilfred A. Elders, Ph.D.
Harry W. Green, II, Ph.D.
Tien-Chang Lee, Ph.D.
Michael A. Murphy, Ph.D.
Stephen K. Park, Ph.D.
Michael O. Woodburne, Ph.D.

Associate Professors

Gareth Funning, Ph.D.
Michael A. McKibben, Ph.D.

Assistant Professors

Robert J. Allen, Ph.D.
Nicolas Barth, Ph.D.
Andrey Bekker, Ph.D.
Abhijit Ghosh, Ph.D.

**

Adjunct Professors

Larissa F. Dobrzinetskaya, Ph.D.
Douglas M. Morton, Ph.D.

Adjunct Assistant Professors

Elizabeth Cochran, Ph.D.
Katherine J. Kendrick, Ph.D.
Thomas A. Scott, Ph.D.

Lecturer

Marilyn A. Kooser, Ph.D.

Majors

The Department of Earth Sciences offers B.S. degrees in Geology and Geophysics, and a B.A. degree in Geoscience Education. These

degree programs are designed for students with a strong interest in various aspects of the Earth Sciences, and for students interested in secondary teaching with a science emphasis. The B.S. programs place substantial emphasis on fieldwork with field courses, field trips in all appropriate courses, and excursions between quarters. The B.A. degree places emphasis on the fundamentals of geoscience, with additional coursework in education.

Academic Advising

Undergraduate advising in the Department of Earth Sciences is designed to allow close professional contact with faculty and staff. Counseling on graduation, departmental requirements and enrollment is handled by the major's professional academic advisors housed in the CNAS Undergraduate Academic Advising Center and the faculty undergraduate advisor for each major.

Each student selects a faculty mentor who counsels the student on career goals and research opportunities. The department recommends that students meet with their faculty mentor at least once each quarter to clarify career objectives and revise the program of study so it is commensurate with the developing interests and objectives of the student.

Teaching Credential and B.A. in Geoscience Education

Teachers in the public schools in California must have a credential approved by the State Commission on Teacher Credentialing. The credential requires an undergraduate major, baccalaureate degree, and completion of a graduate credential program such as that offered by the Graduate School of Education at UCR.

Before admission and student teaching in a graduate credential program, the candidate must pass the California Basic Education Skills Test (CBEST) and demonstrate subject-matter proficiency by passing an examination. All candidates for a multiple subject credential to teach in the elementary grades must pass the Multiple Subjects, California Subject Exam for Teachers (CSET). Students are urged to start early, preferably as freshmen, selecting courses most helpful for this career. Details and counseling on the Prepare to Teach Program, a program for the multiple subject credential, are available in the Office of Interdisciplinary Programs, 2417 Humanities and Social Sciences, (951) 827-2743. Details and counseling on other programs are available in the Department of Earth Sciences or the Graduate School of Education.

UCR does not yet have a state-approved subject matter undergraduate program for earth science majors who wish to teach at the secondary level. The Teaching Credential in Science, geoscience authorization, is required for teachers who want to teach earth science/geoscience in middle school and high school. Students who plan to get this credential must take the CSET exams in Geosciences and should make certain their academic program includes preparatory course work. The

examination includes geoscience in depth and general science with introductory, college-level biology, chemistry, physics, and geoscience (geology, meteorology, oceanography, astronomy). CSET test guides are available at cset.nesinc.com.

Further information about courses, requirements, and examinations can be obtained in orientation meetings, the CalTEACH-SMI Office (1104 Pierce Hall) and the Graduate School of Education (1124 Sprout Hall).

Earth Science students interested in a secondary school science teaching career, who intend to obtain a Teaching Credential in Science, geoscience authorization, are encouraged to pursue the B.A. degree in Geoscience Education. This degree will best prepare such students for the state credentialing examinations, but is not intended for those students who wish to become professional geologists. Students who want to have the option to become either a professional geoscientist or to teach earth science in secondary schools should pursue both the B.S. in General Geology as well as the teaching credential from the Graduate School of Education.

Students in CNAS who intend to pursue a Teaching Credential in Science, with authorization in another science, should consider pursuing a Minor in Earth Sciences.

Geology Major

The department offers four options for the Geology major: General Geology, Geobiology, Geophysics, and Global Climate Change. Students who choose the Geology major study the structure, composition, processes, and history of the earth. In particular, the Geology major stresses features of the Earth's surface and interactions between its atmosphere, hydrosphere, biosphere, rocky crust, and interior.

General Geology Option Students entering the General Geology option study the nature, distribution, age, and origin of minerals, rocks, and their contained fossils, placed within a global framework of the Earth as an evolving geologic system. The option entails a broad range of geologic training including geology, geophysics, geochemistry, and paleontology. An emphasis is also placed on fieldwork (mapping, sampling) and thoughtful analysis of geologic data (including statistical and graphical analysis with computers). Though broadly based, the option provides the student some flexibility to pursue specific geologic areas of interest at the upper-division level. Graduates of the General Geology option are qualified to pursue almost any professional career in the Earth Sciences and are well-suited to tackle graduate research at the M.S. or Ph.D. level.

Global Climate Change Option The Global Climate Change option offers earth science training with an emphasis on modern and ancient evidence for global climate change and the effects of such processes on the planet. Links between human activities, organismal evolution, weathering, volcanism,

plate tectonics, extraterrestrial events and the history of the atmosphere and oceans are examined. Ancient earth climate trends are studied as proxies for predicting future climate change. Students in this option receive training in climatology, oceanography, paleoecology, stratigraphy, earth resources and the global carbon cycle.

Geobiology Option The Geobiology option offers broad-based geological training combined with a special emphasis on paleontology and organism–time interactions. Students take the geology core but at the undergraduate upper-division level focus on courses related to the fossil record, evolution and biodiversity, sedimentology, stratigraphy, and biogeography. The graduate leaves with a marketable geology degree coupled with special insight into historical aspects of life's place and role on this planet.

Geophysics Option The Geophysics option allows a student to combine general geological training with geophysical techniques to image the Earth's interior. Students take the geology core but complete additional courses in physics, mathematics, geophysics, and geohydrology. Emphasis is placed on applications of geophysics to hydrological, environmental, and natural resource problems. Graduates are especially suited to enter professional employment in environmental geology and resource exploration or graduate programs in Earth Sciences. Students seeking to enter graduate programs in Geophysics should pursue the Geophysics major.

Geophysics Major

Students who choose the Geophysics major apply the principles and concepts of physics, mathematics, geology, and engineering to the study of the physical characteristics of the earth and other planets. They make measurements of gravity and magnetic fields, seismic waves, temperatures, and natural electric current. Geophysicists study these topics from the standpoint of the physics of solid bodies, gases, and fluids. Some geophysicists are field oriented, some laboratory oriented, some theoretical, and some combine these areas.

Geoscience Education Major

Students who chose the B.A. degree in Geoscience Education intend to teach earth science and general science at the secondary school level. Students receive Freshman- and Sophomore-level training in General Geology, training in introductory Biology, and Freshman-level training in Chemistry, Calculus, and Physics. They also take courses in Education that are required for state examinations and teacher credentialing in California. The B.A. in Geoscience Education degree is designed for prospective secondary science teachers; it will not lead to a career as a professional geologist.

Students who want to have the option to become either a professional geoscientist or to teach earth science in secondary school should pursue both the B.S. in General Geology as well as the teaching credential from the Graduate School of Education.

Change of Major and Continuation Criteria

Students wishing to change into or continue in the Geology major must be in good academic standing and show potential to graduate without exceeding 216 units.

Freshmen (2nd and 3rd quarter) must demonstrate progress in basic sciences and aptitude for geology by satisfying the following three criteria by Spring Quarter or Summer Session:

- MATH 009B eligible (e.g. completion of MATH 9A or MATH 8B with grades of C- or better)
- CHEM 001B eligible (e.g. completion of CHEM 1A with a grade of C- or better)
- One of GEO 001, GEO 002, and GEO 003 completed with a grade of C- or better

Sophomores (up to 89.9 cumulative units) must demonstrate sustained progress in basic sciences and aptitude for geology by satisfying the following three criteria by Spring Quarter or Summer Session:

- CHEM 001C completed with passing grades
- MATH 009C eligible (e.g. MATH 9B with grade of C- or better)
- Two of GEO 001, GEO 002, and GEO 003 completed with no grade below C- after repeats

Juniors (90 – 134.9 units) must demonstrate near completion of basic sciences and aptitude for upper-division geology by satisfying the following three criteria by Spring Quarter or Summer Session:

- CHEM 001C and MATH 009C completed with passing grades
- PHYS 040B or PHYS 002B and PHYS 002LB eligible (i.e. completion of one quarter of college physics with C- or better)
- GEO 002, GEO 003, and GEO 115 or GEO 122 (and all prerequisites) completed with no grade below C- after repeats

Seniors (135+ units): must have completed all but 1 course of the geology core requirements by Spring Quarter or Summer Session, as follows:

- CHEM 001C, MATH 009C, and PHYS 040C or PHYS 002C and PHYS 02LC completed with passing grades.
- BIOL 002 or BIOL 005A and BIOL 05LA, and STAT 100A or STAT 155 completed with passing grades.
- GEO 001, GEO 003, GEO 115, and GEO 122 or GEO 101 (and all prerequisites) completed with no grade below C- after repeats.

Transfer Selection Criteria

Applicants to majors in the College of Natural and Agricultural Sciences are selected on the basis of academic preparation, as assessed by their GPA and the strength of preparation for the intended major. A GPA of at least 2.70 is

required. (This is a baseline GPA for consideration and not a guarantee of admission.)

In addition, applicants will need to complete college courses comparable to at least two of the following UCR year-long sequences in order to meet selection criteria for this major. Courses must be completed with "C" grades or better:

MATH 009A, MATH 009B, and MATH 009C (mandatory)

And at least one sequence from:

1. BIOL 005A/BIOL 05LA and BIOL 005B (and BIOL 005C, if articulated)
2. CHEM 001A, CHEM 01LA, CHEM 001B, CHEM 01LB, CHEM 001C, and CHEM 01LC
3. PHYS 040A, PHYS 040B, and PHYS 040C
4. MATH 010A, MATH 010B, and MATH 046

Courses must be completed with a letter grade, with no grade lower than a "C." Students should visit assist.org for updated and comprehensive major preparation requirements.

University Requirements

See Undergraduate Studies section.

College Requirements

See College of Natural and Agricultural Sciences, Colleges and Programs section.

Some of the following requirements for the major may also fulfill some of the college's breadth requirements. Consult with a department advisor for course planning.

Major Requirements

Geology Major

All courses in Geosciences that are prerequisites for other courses in the major must be passed with a grade of "C-" or better before proceeding in the sequence. For example, GEO 001 is a prerequisite for GEO 122.

The department offers four options to majors in Geology: General Geology, Geobiology, Geophysics, and Global Climate Change. All students majoring in Geology are normally required to take the core curriculum.

General Geology, Geobiology, Geophysics, and Global Climate Change Options

Core Requirements (77-79 units)

1. Lower-division requirements (58-59 units)
 - a) GEO 001, GEO 002, GEO 003/BIOL 010
 - b) BIOL 002 or both BIOL 005A and BIOL 05LA
 - c) Either CHEM 001A and CHEM 01LA or CHEM 01HA and CHEM 1HLA, either CHEM 001B and CHEM 01LB or CHEM 01HB and CHEM 01HLB, either CHEM 001C and CHEM 01LC or CHEM 01HC and CHEM 1HLC
 - d) MATH 008B or MATH 009A, MATH 009B, MATH 009C

e) PHYS 040A, PHYS 040B, PHYS 040C

2. Upper-division requirements (19-20 units)

- a) GEO 101, GEO 115, GEO 122
- b) STAT 100A or STAT 155

Global Climate Change Option (59 units)

1. Lower-division requirements (20 units)

- a) BIOL 005B, BIOL 005C
- b) GEO 009, GEO 010 and GEO 011

2. Upper-division requirements (39 units)

- a) GEO 118, GEO 136 or GEO 137, GEO 152 or GEO 153, GEO 157, GEO 160, GEO 169
- b) Fourteen (14) units of related upper-division course approved by the undergraduate advisor

General Geology Option (58 units)

1. GEO 100, GEO 116, GEO 118, GEO 123

2. GEO 102A (14 units in one quarter), or GEO 102A and GEO 102B (14 units in two quarters), or GEO 102A, GEO 102B, and GEO 102C (14 units in three quarters).

3. One course from GEO 157, GEO 160, GEO 161, GEO 162, GEO 169

4. One course from GEO 124, GEO 132, GEO 136, GEO 137

5. One course from GEO 140, GEO 144, GEO 145, GEO 147.

6. GEO 151 or GEO 152/BIOL 152

7. Eight (8) additional units of related upper-division courses approved by the undergraduate advisor

Geobiology Option (58 units)

1. BIOL 005B, BIOL 005C

2. GEO 100, GEO 116, GEO 118, GEO 123

3. GEO 102A (14 units in one quarter), or GEO 102A and GEO 102B (14 units in two quarters), or GEO 102A, GEO 102B, and GEO 102C (14 units in three quarters).

4. Three courses from GEO 151, GEO 152/BIOL 152, GEO 160, GEO 169

5. Four (4) additional units of related upper-division courses approved by the undergraduate advisor

Geophysics Option (55 units)

1. MATH 046

2. PHYS 040D, PHYS 040E

3. GEO 116, GEO 118, GEO 132, GEO 140, GEO 144, and GEO 145 or GEO 147

4. Two additional 4-unit upper-division courses in Geosciences

5. Two upper-division physical science courses approved by the undergraduate advisor

Geophysics Major

The following are major requirements for the B.S. in Geophysics. All students majoring in Geophysics are normally required to take this core curriculum.

1. Lower-division requirements (67-68 units)

a) Either CHEM 001A and CHEM 01LA or CHEM 01HA and CHEM 1HLA, either CHEM 001B and CHEM 01LB or CHEM 01HB and CHEM 01HLB, either CHEM 001C and CHEM 01LC or CHEM 01HC and CHEM 1HLC

b) GEO 001

c) MATH 008B or MATH 009A, MATH 009B, MATH 009C, MATH 010A, MATH 010B, MATH 046

d) PHYS 040A, PHYS 040B, PHYS 040C, PHYS 040D

e) CS 010

2. Upper-division requirements (61-66)

a) GEO 115, GEO 116, GEO 140, GEO 145

b) Two of GEO 100, GEO 122, GEO 123, GEO 132, GEO 137, GEO 144, GEO 147, GEO 157

c) Five of PHYS 130A, PHYS 130B, PHYS 134, PHYS 135A, PHYS 135B, PHYS 136, PHYS 139L, PHYS 142L, PHYS 177, MATH 113, MATH 131, MATH 132, MATH 135A, MATH 135B, MATH 146A, MATH 146B, MATH 147

d) Sixteen (16) units of upper-division physical science courses, which may include up to 9 units of Senior Thesis (GEO 195A, GEO 195B, GEO 195C) or up to 4 units of independent internship (GEO 198-I).

Geoscience Education Major

The following are major requirements for the B.A. in Geoscience Education. All students majoring in Geoscience Education are normally required to take this core curriculum.

1. Lower-division Geoscience requirements (20 units)

a) GEO 001, GEO 002, GEO 003/BIOL 010, GEO 004, GEO 010

2. Upper-division Geoscience requirements (26-30 units)

a) GEO 115, GEO 122

b) Four courses from: GEO 100, GEO 101, GEO 116, GEO 118, GEO 123, GEO 124, GEO 132, GEO 136, GEO 137, GEO 140, GEO 147, GEO 151, GEO 152/BIOL 152, GEO 157, GEO 160, GEO 168, GEO 169.

3. Mathematics requirements (12 units)

a) MATH 009A, MATH 009B, MATH 009C

4. Natural Sciences requirements (28-31 units)

a) BIOL 002, or BIOL 005A and BIOL 05LA

b) CHEM 001A and CHEM 01LA, CHEM 001B and CHEM 01LB, CHEM 001C and CHEM 01LC

c) PHYS 002A and PHYS 002B and PHYS 002C, or PHYS 040A and PHYS 040B and PHYS 040C

5. Humanities requirements (to count towards College requirement of 20 units for the B.A.)

a) LING 020 or LING 021

6. Education requirements (41 units):

- a. EDUC 003, EDUC 004, EDUC 100B or equivalent, EDUC 104/MATH 104, EDUC 109, EDUC 110, EDUC 116, EDUC 139, EDUC 174, EDUC 177A

Minor

Students who wish to Minor in Geology, Geophysics or Global Climate Change must complete 20-28 units of organized upper division courses in Geosciences. A minimum of 16 of these units must be unique to the minor and cannot be used to satisfy major requirements. To satisfy prerequisites, additional preparatory coursework in Earth Sciences and other sciences (Biology, Chemistry, Mathematics, Physics) may be required.

Minor in Geology: GEO 001, GEO 115; plus 15-23 additional upper division Geosciences units.

Minor in Geophysics: GEO 001; GEO 140; plus 16-24 additional units taken from GEO 115, GEO 116, GEO 132, GEO 144, GEO 145, GEO 190, and GEO 199.

Minor in Global Climate Change: GEO 001 or GEO 002; GEO 011; GEO 160; plus 16-24 additional upper division Geoscience units.

Before submitting a petition for a Minor to the college, students interested in pursuing a Minor in Geology or Geophysics or Global Climate Change must consult with the undergraduate faculty advisor in Earth Sciences.

Graduate Programs

The department of Earth Sciences offers the M.S. and Ph.D. in Geological Sciences.

Graduate education in the Geological Sciences emphasizes general geology combined with specialization in fields such as evolutionary paleobiology, invertebrate and vertebrate paleontology, Quaternary geology, neotectonics, applied geophysics, geotectonics, crustal processes, geochemistry, groundwater, mineral deposits, stratigraphy, sedimentology, sedimentary geochemistry, basin analysis, landscape ecology, fire ecology, and natural resource conservation. Integrated field and laboratory studies are encouraged.

Admission An undergraduate degree in geology or geophysics is the normal preparation for graduate work; however, a degree from a related field of science or engineering is often appropriate. Applicants to graduate status must supply GRE General Test (verbal, quantitative, analytical) scores before admission.

Master's Degree

In addition to the general requirements listed under the Graduate Studies section of this catalog, the requirements for the M.S. degree in Geological Sciences, under the Plan 1 (Thesis), are as follows.

Admission Students must make up any deficiency in preparation. The background required is course preparation equivalent to the bachelor's degree in Geology or Geophysics at UCR. Courses taken to remedy background deficiencies are not applicable to the graduate

degree. Such courses are designated in the letter of admission to the program sent by the dean of the Graduate Division to the student.

Biannual Reviews All students must undergo biannual reviews by the departmental Graduate Progress Committee. A student's progress is assessed in these reviews, and the committee may recommend changes in a student's plans after these reviews.

Course Work All students must enroll each quarter in the Graduate Seminar in Geosciences (GEO 250). Students must attend the weekly Hewett Club lecture series.

Students must complete a minimum of 36 units of course work in the major and related subjects and obtain advance approval of a coherent plan of study from the graduate advisor.

A maximum of 12 upper-division units beyond the requirements for the bachelor's degree may be applied to the 36-unit requirement. Students must complete a minimum of 12 units of graduate courses, which must include at least four graduate-level instructional courses taught by four different faculty members as approved by the graduate advisor.

Subject to the approval of the graduate advisor, a limited number of upper-division courses in the major and related sciences, if not required for the bachelor's degree and not taken previously, may be accepted for graduate credit.

Thesis and Final Oral Examination Before the end of the third quarter of study and before embarking on research, the student must submit a written thesis proposal to the graduate progress committee. After approval of the proposal, the student must submit a thesis based on original work for approval by a thesis committee. A maximum of 12 units of thesis research may be counted toward the 36-unit minimum.

Students present an open research seminar as a final oral examination, which is advertised to all the students and faculty in the Earth Sciences Department.

Normative Time to Degree 7 quarters

Global Climate and Environmental Change (GCEC) The GCEC MS track is a field and laboratory based multidisciplinary program focused on the evidence for and controls of past and present climate change. Candidates must complete the following:

Course Work Students must complete a minimum of 36 quarter units of graduate and upper-division undergraduate courses, and research credit from 1 and 2 (below). Other upper-division undergraduate and graduate classes outside may be substituted with consent of the Graduate Advisor. 24 of 36 credits must be graduate level.

- 1) Required Core courses: GEO 224 upon entry into the program, GEO 260 and BIOL 212/ ENTM 212/GEO 212.
- 2) At least two additional disciplinary courses: GEO 221, GEO 226, GEO 239, GEO 249, GEO 251, GEO 255, GEO 264, GEO 265, GEO 268, GEO 301, OR ENSC 200, ENSC 218, ENSC 224, ENSC 225, ENSC 232.

Thesis Work Before the end of the third quarter students must nominate a faculty advisor and identify a thesis topic. Before embarking on research the student must submit a thesis proposal based on original work for approval by a thesis committee. A maximum of 8 units of research credit can be counted toward the 36 unit minimum. Students present an open research seminar as a final oral examination.

Doctoral Degree

The Department of Earth Sciences offers the Ph.D. in Geological Sciences. In addition to the general university requirements of the Graduate Division as found in the Graduate Studies section of this catalog, the Ph.D. in Geological Sciences normally requires the following.

Biannual Reviews All students meet with the Graduate Progress Committee during their first week at UCR to discuss general interests, goals, and plans. The committee recommends courses designed to prepare a student for research and to correct deficiencies in background. This committee also reviews a student's progress biannually and may recommend transfer to the master's program if normal progress is not maintained.

Course Work Students must complete at least four graduate-level instructional courses taught by four different faculty members as approved by the graduate advisor. Course work used in satisfaction of the M.S. degree may be accepted with the graduate advisor's approval. All students must enroll each quarter in the Graduate Seminar in Geosciences (GEO 250). Students are also required to attend the weekly Hewett Club lecture series.

Written and Oral Qualifying Examinations

Students must write two research proposals. The proposal topics must be approved by an examination committee to ensure breadth. The committee reviews the proposals and, if acceptable, recommends proceeding to the oral qualifying examination. An oral examination committee appointed by the dean of the Graduate Division examines the adequacy of the student's preparation to conduct the proposed research. Advancement to candidacy in the Ph.D. program follows successful completion of the oral examination.

Dissertation and Final Oral Examination A dissertation normally evolves from one of the research proposals. The dissertation must present original scholarly work and be approved by a dissertation committee before the student may take the final oral examination. Students must have satisfactory performance on the final oral examination given by the dissertation committee. Major emphasis in this examination is on the dissertation and related topics.

Normative Time to Degree from the B.S. 17 quarters

Lower-Division Courses

GEO 001 The Earth's Crust and Interior (4) Lecture, 3 hours; laboratory, 3 hours; one 1-day field trip. An introduction to the physical development of the Earth. Emphasis will be on Earth materials (rocks and minerals), processes (weathering, erosion, mountain building), structures (folds and faults), and current theories regarding the Earth's crust and interior.

GEO 002 Earth's Climate through Time (4) Lecture, 3 hours; laboratory, 3 hours; one 2-day field trip. Prerequisite(s): none. An introduction to the history of Earth's changing climate and its relationship to the evolution of life on human to geologic time scales. Topics include the interrelationships among short- and long-term carbon cycling; plate tectonics; ocean and atmosphere circulation; and greenhouse gases through time.

GEO 003 Headlines in the History of Life (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): none. Evolution of life beginning with precellular life. Topics include the origin of sex, multicellularity, vertebrate classes, morphological specializations, adaptive radiations, extinction dynamics, and the biology of dinosaurs. Cross-listed with BIOL 010.

GEO 004 Natural Hazards and Disasters (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ENGL 001A or equivalent (may be taken concurrently). Application of basic principles of climate and geology to recognition of natural hazards and their mitigation. Topics include fires, freezes, floods, winds, landslides, volcanic eruptions, earthquakes and tsunamis. Emphasis is on confronting hazards of concern to home-buyers, planners, and conservationists in the western United States, especially southern California.

GEO 005 Our Family of Planets (4) Lecture, 3 hours; discussion, 1 hour. An introduction to the comparative study of planets, moons and other solar system objects. Explores the physical, chemical and nuclear evolution of the cosmos, stars and solar systems. Addresses similarities and differences in appearances, orbital motions, compositions, conditions and histories of global change on planets and moons, including extra solar planets and life.

GEO 006 The Violent Universe (4) Lecture, 3 hours; discussion, 1 hour. An introduction to violent phenomena that power the universe, specifically phenomena that illustrate basic astrophysical principles. Topics include impacts in our planetary system: explosions of stars, bursts of star formation, galaxy collisions, black holes, quasars, cosmic jets, and the "Big Bang." Cross-listed with PHYS 006.

GEO 007 Minerals and Human Health (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. An introductory overview of the role of minerals in human life and industrial activities. Topics include the impact of minerals on human health, the role of minerals in modern technologies, asbestos and silica problems, occupational diseases caused by inhalation of mineral dust, and environmental protection in California. May include a field trip.

GEO 008 Earthquake Country (4) Lecture, 3 hours; discussion, 1 hour. An introduction to the study of earthquakes and the problems of living in earthquake country. Why earthquakes occur, how they are recorded, and what the effects are on man and his structures. The scientific and social consequences of earthquake prediction.

GEO 009 Oceanography (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. A general introduction to the geological, physical, chemical, and biological processes related to the characteristics and evolution of the ocean system. Explores the role oceans play in regulating climate and the cycling of elements on the Earth's surface. Illustrates how the ocean system has been, and continues to be, one of the most important influences on life. Credit is awarded for only one of GEO 009 or GEO 009H.

GEO 009H Honors Oceanography (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): admission to the University Honors Program or consent of instructor. Honors course corresponding to GEO 009. A general introduction to the geological, physical, chemical, and biological processes related to the characteristics and evolution of the ocean system. Explores the role oceans play in regulating climate and the cycling of

elements on the Earth's surface. Illustrates how the ocean system has been, and continues to be, one of the most important influences on life. Satisfactory (S) or No Credit (NC) grading is not available. Credit is awarded for only one of GEO 009 or GEO 009H.

GEO 010 Earth Resources and Sustainability (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. An introduction to the occurrence, availability, marketing, and usage of metals, minerals, fossil fuels, nuclear fuels and other geologic resources, including both historic and recent trends. Addresses conflicts between modern society's need for increasingly scarce resources and mounting environmental problems. Also covers achieving sustainability through conservation, recycling, and substitution.

GEO 011 Global Climate Change (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Application of the scientific method to the global climate change debate. Provides an understanding of Earth's feedback systems that regulate the climate over long- and short-term time scales. Includes oceanic and atmospheric circulation patterns, the major reservoirs and global carbon cycle, and the influence and origin of greenhouse gases. Credit is awarded for only one of GEO 011 or GEO 011H.

GEO 011H Honors Global Climate Change (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): admission to the University Honors Program or consent of instructor. Honors course corresponding to GEO 011. Application of the scientific method to the global climate change debate. Provides an understanding of Earth's feedback systems that regulate the climate over long- and short-term time scales. Includes oceanic and atmospheric circulation patterns, the major reservoirs and global carbon cycle, and the influence and origin of greenhouse gases. Satisfactory (S) or No Credit (NC) grading is not available. Credit is awarded for only one of GEO 011 or GEO 011H.

GEO 012 At Home in the Universe (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): none. Considers the place of humans in space and time and the means by which this is discerned. Presents a synopsis of the history of the cosmos, Earth, life, and humanity from a science-based perspective. Discuss the implications of such knowledge for how responsible individuals choose to conduct themselves.

Upper-Division Courses

GEO 100 Igneous and Metamorphic Petrology (5) Lecture, 3 hours; laboratory, 6 hours; four field trips. Prerequisite(s): GEO 115 and GEO 123 with grades of "C-" or better. An introduction to the nomenclature and classification of igneous and metamorphic rocks. Includes identification of the major rock-forming minerals and common rocks in hand samples and thin sections, as well as interpretation of rock fabrics and textures. Explores tectonic setting and the origins of major rock types.

GEO 101 Field Geology (5) Lecture, 2 hours; weekly 1-day field trips. Prerequisite(s): GEO 115 with a grade of "C-" or better or consent of instructor for concurrent enrollment. Introductory course in field geology. Covers methods of mapping igneous, metamorphic, and sedimentary rocks. Includes construction of planimetric and topographic maps, use of aerial photographs, and instruction in basic surveying techniques.

GEO 102A Summer Field Geology (1-14) field, 30-420 hours per quarter. Prerequisite(s): GEO 100 and GEO 118 with grades of "C-" or better or consent of instructor. Covers geological mapping and interpretation, as well as writing of geological reports. May be undertaken as a one-, two-, or three-quarter course (GEO 102A, GEO 102B, GEO 102C). Total credit awarded for GEO 102A plus GEO 102B plus GEO 102C may not exceed 14 units. Graded In Progress (IP) until the last quarter is completed, at which time a final grade is assigned.

GEO 102B Summer Field Geology (1-14) field, 30-420 hours per quarter. Prerequisite(s): GEO 102A. Covers geological mapping and interpretation, as well as writing of geological reports. May be undertaken as a one-, two-, or three-quarter course (GEO 102A, GEO 102B, GEO 102C). Total credit awarded for GEO 102A plus GEO 102B plus GEO 102C may not exceed 14 units. Graded In Progress (IP) until the last quarter is completed, at which time a final grade is assigned.

GEO 102C Summer Field Geology (1-14) field, 30-420 hours per quarter. Prerequisite(s): GEO 102B. Covers geological mapping and interpretation, as well as writing of geological reports. May be undertaken as a one-, two-, or three-quarter course (GEO 102A, GEO 102B, GEO 102C). Total credit awarded for GEO 102A plus GEO 102B plus GEO 102C may not exceed 14 units. Graded In Progress (IP) until the last quarter is completed, at which time a final grade is assigned.

GEO 115 Geologic Maps and Landforms (5) Lecture, 2 hours; laboratory, 6 hours; field, 30 hours per quarter. Prerequisite(s): GEO 001 (may be taken concurrently); MATH 004 or MATH 005, or MATH 008A. Examines characteristic patterns of bedrock outcrops, surficial deposits, the related landforms, and their representation on maps. Covers unconformities, folds, faults, intrusions, alluvial fans, river terraces, and landforms indicative of glaciers, volcanoes, landslides, and earthquakes. Applies map information to resource and hazard evaluation.

GEO 116 Structural Geology (5) Lecture, 2 hours; laboratory, 6 hours; three half-day and two 1-day field trips. Prerequisite(s): GEO 115 with a grade of "C-" or better; PHYS 040A; or consent of instructor. Examines geological structures in the field. Covers the graphical solution of structural problems and laboratory map study, the genesis of rock structures, the physics of rock deformation, and Mohr diagrams and elementary stress analysis.

GEO 118 Sedimentology and Stratigraphy (5) Lecture, 2 hours; laboratory, 6 hours; two 1-day and one 2-day field trips. Prerequisite(s): GEO 115 with a grade of "C-" or better. A study of the principles of sedimentology and the comparative study of the origins of sediments and sedimentary rocks from various modern and ancient clastic, carbonate, and mixed siliciclastic-carbonate depositional environments. Emphasizes field and stratigraphic relationships, as well as petrographic and hand specimen identification.

GEO 122 Introductory Mineralogy (5) Lecture, 3 hours; laboratory, 5 hours; two half-day and one 1-day field trips. Prerequisite(s): both CHEM 001B and CHEM 01LB or both CHEM 01HB and CHEM 1HLB (CHEM 001B, CHEM 01LB, CHEM 01HB, and CHEM 1HLB may be taken concurrently); GEO 001 with a grade of "C-" or better. A study of common and important minerals and their identification using structural and crystallographic methods. Stresses distinctive structural and chemical features, diagnostic physical and optical properties, and the growth and development of minerals in various geologic environments.

GEO 123 Analytical Mineralogy (5) Lecture, 3 hours; laboratory, 6 hours. Prerequisite(s): both CHEM 001C and CHEM 01LC or both CHEM 01HC and CHEM 1HLC; GEO 122 with a grade of "C-" or better. Advanced techniques in mineralogy. Covers optical crystallography, with an introduction to X-ray diffraction, electron microscopy, and other analytical techniques.

GEO 124 Advanced Petrogenesis (4) Lecture, 2 hours; laboratory, 6 hours; two 1-day field trips. Prerequisite(s): GEO 100 with a grade of "C-" or better. Explores advanced topics in the petrogenesis of igneous and metamorphic rocks in the Earth's crust and mantle. Examines field and structural relationships of crystalline rocks and how thermodynamics, experimental phase equilibria, and computer modeling are used to study petrogenesis. Each student completes a field and laboratory research project and prepares a written and oral report on the project.

GEO 132 Groundwater Geology (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): both CHEM 001B and CHEM 01LB or both CHEM 01HB and CHEM 1HLB; MATH 009B or MATH 09HB; PHYS 040A. Covers the nature and behavior of waters in geologic media; including the chemical nature of groundwaters and geothermal fluids; principles of fluid flow in sediments and rocks; chemical reactions between solutes and geologic media; geologic aspects of contaminant migration in groundwaters; behavior of geothermal fluids; elementary computer modeling of groundwater and geothermal fluid flow in geologic media.

GEO 136 Introduction to Molecular and Petroleum Geochemistry (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): both CHEM 001C and CHEM 01LC or both CHEM 01HC and CHEM 1HLC or equivalents; GEO 001 with a grade of "C-" or better or GEO 002 with a grade of "C-" or better. Explores the global carbon cycle and the origin and fate of organic carbon molecules throughout Earth's history. Covers production and composition of biogenic matter and microbial, chemical and thermal processing of sedimentary organic matter, leading to oil, gas and coal formation. Addresses important applications to the petroleum and environmental sectors.

GEO 137 Geochemistry of Natural Waters (4) Lecture, 3 hours; laboratory, 30 hours per quarter. Prerequisite(s): both CHEM 001C and CHEM 01LC or both CHEM 01HC and CHEM 1HLC or equivalents; GEO 001 with a grade of "C-" or better or GEO 002 with a grade of "C-" or better. Examines the chemical principles of natural geologic processes occurring at and near Earth's surface. Topics include biogeochemical cycles of the elements; water-rock interactions; applications of thermodynamics and kinetics to the study of low-temperature processes and their rates; and proxy records of Earth history examined in the field and lab.

GEO 138 Soils of Natural Ecosystems and Landforms (4) Lecture, 3 hours; laboratory, 4 hours per quarter; one half-day field trip and three 1-day field trips. Prerequisite(s): ENSC 100; GEO 001 or GEO 002; or consent of instructor. The study of soils in diverse natural environments. Examines how soils form and their roles in ecosystem function and landscape processes. Includes causes of soil variability, fundamentals of soil classification, and indicators of current and past environmental conditions. Field trips emphasize the description and interpretation of soils. Cross-listed with ENSC 138.

GEO 140 Global Geophysics (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): GEO 001 with a grade of "C-" or better; MATH 009C or MATH 09HC; PHYS 040C; or consent of instructor. Introduces central concepts of solid earth geophysics as applied at the global or planetary scale. Includes plate tectonics and dynamics of the lithosphere; seismology and earth structure; geothermal behavior and heat flow; and geodynamics and planetary geophysics.

GEO 144 Earthquake Seismology (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): MATH 010A, MATH 010B, MATH 046, PHYS 040A, PHYS 040B, PHYS 040C; or consent of instructor. Introduction to the theories and observations of earthquake seismology. Students use physical principles and mathematical techniques to study the earthquake process, wave propagation, and ground motion. The laboratory emphasizes computer-assisted analysis of various types of seismic data, as well as simple modeling techniques.

GEO 145 Applied and Exploration Geophysics (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): GEO 001 with a grade of "C-" or better; MATH 009B or MATH 09HB; PHYS 002C or PHYS 040C; or consent of instructor. Introduces applied geophysical methods used to explore and characterize the shallow subsurface. Topics include gravity, magnetism, seismic reflection and refraction, electrical resistivity, electromagnetism, and ground penetrating radar.

Explores techniques to solve problems related to groundwater, as well as environmental, mineral, and petroleum exploration and engineering issues. Requires a weekend field trip.

GEO 147 Active Tectonics and Remote Sensing (4) Lecture, 2 hours; discussion, 1 hour; laboratory, 3 hours. Prerequisite(s): GEO 001, GEO 115; or consent of instructor. A computer-based course that introduces active tectonics and the earthquake cycle and how they are studied using remote sensing data. Explores examples of actively deforming areas from around the world using computer visualization software and freely available data sources (satellite imagery, digital topography, GPS and earthquake data).

GEO 151 Principles of Paleontology (4) Lecture, 3 hours; laboratory, 3 hours; one 1-day field trip. Prerequisite(s): BIOL 010/GEO 003 with a grade of "C-" or better or BIOL 005C. Emphasis is on understanding fossils as living organisms. Topics include fundamentals of evolution and the fossil record, introductory morphometrics and biosystemic theory, functional morphology, and metazoan organization and classification.

GEO 152 Principles of Invertebrate Paleobiology and Paleocology (4) Lecture, 2 hours; laboratory, 3 hours; three 1-day field trips. Prerequisite(s): BIOL 005C with a grade of "C-" or better or BIOL 010/GEO 003 with a grade of "C-" or better. Topics include evolution and the fossil record, paleoecology, classification theory; the nature of adaptive radiations, and extinctions. Cross-listed with BIOL 152.

GEO 153 Biodiversity through Time (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BIOL 010/GEO 003 with a grade of "C-" or better or BIOL 005C. Focuses on the history of biodiversity and the responses of organisms to episodes of profound environmental change. Outlines the major features of evolutionary history chronicled by fossils, the dynamics of evolutionary radiations and extinctions, and the implications of paleontological data for current issues in biodiversity.

GEO 157 Introduction to Geographical Information Science (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): upper-division standing. Introduces the fundamental theory and application of geographical information science. Topics include geographic information systems, data structures, databases, and spatial data models. Explores various spatial data, including their coordinate systems, data acquisition, and associated errors. Introduces data analysis methods within geographical information systems.

GEO 158 Advanced Geographic Information System (GIS) (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): GEO 157 or consent of instructor. Multidisciplinary applications of GIS analysis techniques including vector, grid, image, surface, and network systems. Covers photogrammetry and processing of remotely sensed imagery emphasizing data quality and error assessment. Introduction to graphical programming tool, ModelBuilder, and Python scripting language for automation and customization of tasks. No previous programming experience assumed.

GEO 160 Global Climate Change (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): upper-division standing or consent of instructor; PHYS 002B or PHYS 040B recommended. Surveys historical and paleoclimate change using basic principles on gas laws, radiant energy exchange, atmospheric circulation and oceanography, and proxy data. Topics include variability in modern climate, greenhouse gases, global warming, El Nino, Pacific decadal oscillation, ozone hole, volcanism, ice age climate, and Milankovitch cycles. Also covers stable isotope profiles, plate tectonics, greenhouse climates, paleovegetation, modern species diversity, and snowball Earth.

GEO 161 Quaternary Paleoenvironmental Change (4) Lecture, 2 hours; laboratory, 2 hours; two 2-day field

trips. Prerequisite(s): GEO 001 with a grade of "C-" or better or GEO 002 with a grade of "C-" or better. Examines geological evidence of environmental change throughout Quaternary times ("Ice Age") to provide a framework for understanding natural environmental change and for predicting future change.

GEO 162 Geomorphology (4) Lecture, 2 hours; laboratory, 6 hours; one 2-day field trip. Prerequisite(s): upper-division standing or consent of instructor. A study of surficial processes related to the development and evolution of landforms and landscapes at the Earth's surface. Emphasis is on weathering regimes, mass wasting and hillslope development, river process, and form. Examines erosional and depositional processes in tectonic, volcanic, arid, karst, glacial, and coastal landscapes.

GEO 167 Conservation Biogeography (4) Lecture, 3 hours; laboratory and field, 3 hours. Prerequisite(s): BIOL 005C with a grade of "C-" or better or BIOL 010/GEO 003 with a grade of "C-" or better. Application of biogeographic and ecological theories in the conservation of plants, animals, and wildlands. Topics include biological preserve design, ecological consequences of land development, and wildlife-habitat relationships.

GEO 169 California Vegetation (4) Lecture, 3 hours; laboratory, 3 hours; two 1-day field trips. Prerequisite(s): BIOL 005C with a grade of "C-" or better or BIOL 010/GEO 003 with a grade of "C-" or better. Survey of the flora, distribution, and ecology of California ecosystems, including Mediterranean shrubland, conifer forests, desert scrub, valley forbfields, and exotic grasslands. Discusses vegetation in relation to climate, physiography, fire, landscape steady states, biological invasions, paleobotany, and broad-scale change due to land development, invasive species, grazing, and fire suppression.

GEO 190 Special Studies (1-5) Individual study, 3-15 hours. Prerequisite(s): upper-division standing; consent of instructor and department chair. Individual study to meet special curricular needs. Course is repeatable to a maximum of 9 units.

GEO 191 Undergraduate Seminar in Geological Sciences (1) Seminar, 1 hour. Prerequisite(s): open to upper division Geological Sciences majors only. For undergraduate students who desire formal participation in the weekly departmental seminar. In addition to attending the seminar, students must write abstracts describing two of the presentations. Graded Satisfactory (S) or No Credit (NC). May be repeated to a total of 6 units.

GEO 195A Senior Thesis (3-5) hours per week to be established by supervisor. Prerequisite(s): senior status; consent of instructor. Preparation of a thesis based upon supervised field and/or laboratory research and literature review in the geological sciences. The thesis may be undertaken as a one-, two-, or three-quarter sequence. In the case of a two- or three-quarter sequence, the final grade will be deferred until completion of the last quarter. Total credits for GEO 195A, GEO 195B, and GEO 195C may not exceed 9 units.

GEO 195B Senior Thesis (3-5) hours per week to be established by supervisor. Prerequisite(s): senior status; consent of instructor. Preparation of a thesis based upon supervised field and/or laboratory research and literature review in the geological sciences. The thesis may be undertaken as a one-, two-, or three-quarter sequence. In the case of a two- or three-quarter sequence, the final grade will be deferred until completion of the last quarter. Total credits for GEO 195A, GEO 195B, and GEO 195C may not exceed 9 units.

GEO 195C Senior Thesis (3-5) Prerequisite(s): senior status; consent of instructor. Preparation of a thesis based upon supervised field and/or laboratory research and literature review in the geological sciences. The thesis may be undertaken as a one-,

two-, or three-quarter sequence. In the case of a two- or three-quarter sequence, the final grade will be deferred until completion of the last quarter. Total credits for GEO 195A, GEO 195B, and GEO 195C may not exceed 9 units.

GEO 198-I Independent Internship (1-12) Field, 3-36 hours. Prerequisite(s): consent of instructor, undergraduate advisor, and department chairman. Independent study in a surrogate job condition under non-university supervision. Internships are normally in public or private institutions such as planning departments, research labs, or industry. Position, task, method of reporting completion and accomplishments, and units must have prior agreement among student, instructor, and supervisor. One unit for every three hours per week spent in internship. Graded Satisfactory (S) or No Credit (NC).

Graduate Courses

GEO 201A Research and Proposal Design (2) Seminar, 1 hour; written work, 3 hours. Prerequisite(s): graduate standing. Teaches the fundamentals of research topic selection and development of hypotheses. Addresses presentation techniques and design of research projects, experiments, and field campaigns. Includes preparation and discussion of small grant proposals, as well as short oral presentations related to applicable areas of study. Graded Satisfactory (S) or No Credit (NC).

GEO 201B Proposal Writing and Review (2) Seminar, 1 hour; written work, 3 hours. Prerequisite(s): graduate standing, GEO 201A; or consent of instructor. Covers the writing and review processes for major grant proposals. Includes the preparation, review, ranking, and summarizing of full-length federal grant proposals in accordance with federal panel guidelines. Graded Satisfactory (S) or No Credit (NC).

GEO 203 Mineral Equilibria (4) Lecture, 4 hours. Prerequisite(s): GEO 137 or consent of instructor. Applications of thermodynamics and kinetics to evaluating equilibria among minerals and fluids in geological environments. Emphasis placed on equilibria in geothermal systems, ore deposits, metamorphic and igneous rock, and groundwater.

GEO 205 Geohydrology (4) Lecture, 3 hours; laboratory, 3 hours; one 1-day field trip. Prerequisite(s): GEO 132 or ENSC 163. Fluid flow in geologic media; resource evaluation; and relevant geologic hazards and geotechnical problems.

GEO 206A Stratigraphy (4) Lecture, 2 hours; laboratory, 6 hours. Prerequisite(s): GEO 118; consent of instructor. Covers rock stratigraphy and time stratigraphy with an emphasis on their principles, history, and methods. Includes reading and analysis of pertinent literature and field trips.

GEO 206B Stratigraphy (4) Lecture, 2 hours; laboratory, 6 hours. Prerequisite(s): GEO 118; consent of instructor. Covers time stratigraphy and biostratigraphy with an emphasis on their principles, history, and methods. Includes reading and analysis of pertinent literature and field trips.

GEO 212 Ecological Systems in Space and Time (4) Lecture, 3 hours; field, 30 hours per quarter. Prerequisite(s): One upper-division undergraduate course in population or community ecology or paleoecology; or consent of instructor. Focuses on how ecological systems are interpreted and reconciled at the community, landscape, and paleontological scales. Addresses the role of extrinsic factors operating at each of these scales. Also examines the historical development of our understanding of ecological systems at various scales. Cross-listed with EEOB 212 and ENTM 212.

GEO 219 Theory of Systematics (4) Lecture, 4 hours. Prerequisite(s): BIOL 112/BPSC 112/ENTM 112 or equivalent or consent of instructor. Examines topics developed around a series of classical and recent papers on the principles, philosophy, and

methodology of modern systematics and phylogenetic methods. Cross-listed with EEOB 219 and ENTM 219.

GEO 221 Electron Microscopy and Microanalysis (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Introduction to electron microscopy and microanalysis of inorganic solids including minerals and synthetic materials. Students learn the physical principles, strengths, and limitations of the method. Laboratory provides hands-on experience with scanning and transmission electron microscopes and interpretation of images and data.

GEO 223 Seminar in Geobiology (1) Seminar, 2 hours. Prerequisite(s): graduate standing or consent of instructor. Lectures, discussions and demonstrations by students, faculty and invited scholars on current research topics in Geobiology. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

GEO 224 Sierran Studies: The Paleoclimate Record of the Sierra (4) Field, 90 hours per quarter; term paper, 3 hours. Prerequisite(s): graduate standing. A study of climate change in the Sierra Nevada Mountains, extending from Precambrian glacialic sediments to modern glaciers. Utilizes field evidence to access the controls of climate and determine the resolution and limitations of the physical record. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable as topics change to a maximum of 8 units.

GEO 225A Geology of Carbonate Rocks (4) Lecture, 2 hours; laboratory, 6 hours. Prerequisite(s): GEO 118; consent of instructor. Covers characterization, recognition, and interpretation of carbonate rocks. Laboratory work includes study of polished and thin sections of selected suites of rocks.

GEO 225B Geology of Detrital Rocks (4) Lecture, 2 hours; laboratory, 6 hours. Prerequisite(s): GEO 118; consent of instructor. Covers characterization, recognition, and interpretation of detrital rocks. Laboratory work includes study of polished and thin sections of selected suites of rocks.

GEO 226 Soil Geomorphology (4) Lecture, 2 hours; laboratory, 6 hours; two Saturday field trips per quarter. Prerequisite(s): ENSC 138/GEO 138, GEO 162, or equivalents. Examines the interaction of pedogenic and geomorphic processes during the Quaternary with an emphasis on the rate of these processes. Group research includes field data collection and analysis. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Cross-listed with SWSC 226.

GEO 240 Seminar in Earthquake Processes and Geophysics (1) Seminar, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Explores selected contemporary topics in the areas of earthquake and fault processes, geophysics, active tectonics, and seismology. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.

GEO 241 Advanced Field Geophysics (14) Lecture, 10 hours; laboratory, 16 hours; field, 14 hours. Prerequisite(s): GEO 140; proficiency in a word processing, spread sheet, or programming language. Advanced applications of modern geophysical field techniques to the solution of complex geological problems, using seismic refraction and reflection, electrical and electromagnetic, potential field, and well-logging methods.

GEO 242 Numerical Methods and Modeling in the Geosciences (4) Lecture, 3 hours; laboratory, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Covers numerical computing methods and their application to problems of geological and geophysical interest. Methods include linear least-squares, matrix factorization, decomposition and inversion, nonlinear optimization, and Monte Carlo analysis and data visualization and their implementation in the MATLAB language. Applications include time series analysis, seismic tomography, and geodetic data inversion. May be

taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

GEO 243A Earthquake Physics (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): GEO 144, MATH 010B, PHYS 40C, basic computer programming experience; or consent of instructor. MATH 046 is recommended. An exploration of the physics of the earthquake process. Focuses on processes controlling fault slip and friction mechanics, as well as modeling the space/time characteristics of earthquake occurrence. Utilizes theoretical/analytical tools and numerical models. Includes an independent project in computer modeling.

GEO 243B Earthquake Physics (4) Lecture, 3 hours; laboratory, 3 hours. Prerequisite(s): GEO 144, MATH 010B, PHYS 040C, basic computer programming experience; or consent of instructor. MATH 046 is recommended. An exploration of the physics of the earthquake process. Focuses on fault dynamics during the earthquake rupture and slip processes and its relationship to ground motion. Utilizes theoretical/analytical tools and numerical models. Includes an independent project in computer modeling.

GEO 244 Space Geodesy (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Covers the study of the shape and deformation of the Earth's surface using satellite data (InSAR and GPS). Includes measuring topography and surface deformation; processing, visualization and interpretation of data; simple analytical and numerical deformation models; and applications of techniques to tectonic, volcanic, and non-tectonic problems. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

GEO 249 Tectonic Geomorphology and Quaternary Field Techniques (4) Lecture, 2 hours; discussion, 1 hour; four half-day and two 1-day field trips. Prerequisite(s): GEO 101 or GEO 162 or consent of instructor. Examines topics in tectonic geomorphology. Includes paleoseismology, geodesy, geochronology, landscape response, numerical modeling, and terrain analysis. Covers field techniques such as relative and calibrated dating analysis, section measurements, morpho- and lithostratigraphic analysis, and reconstruction of Quaternary events from landforms. Also addresses map constructions in fluvial, lacustrine, glacial, coastal, and eolian environments.

GEO 250 Graduate Seminar in Geological Sciences (1) Seminar, 1 hour. Prerequisite(s): graduate student status. Oral reports by graduate students, faculty, and visiting scholars on current research topics in geological sciences. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

GEO 251 (E-Z) Advanced Topics in Paleontology (3-5) Seminar, 3 hours; laboratory, 0-6 hours. Prerequisite(s): consent of instructor. Selected advanced topics in paleontology. Content varies from quarter to quarter. After consultation with the instructor, students enroll in only the seminar (3 units) or in both the seminar and laboratory (4-5 units). May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor. Course is repeatable.

GEO 252 Marine Paleoecology (3) Lecture, 1 hour; discussion, 1 hour; two 1-day field trips. Prerequisite(s): graduate standing. Examines fundamental principles of paleoecology and the measurement of biodiversity, abundance, and biomass from the fossil record. Covers the significance of mass extinctions, diversification events, and environments on the Earth's changing marine ecosystem. Includes taphonomy, ichnology, and field studies. Course is repeatable to a maximum of 6 units.

GEO 253 Advanced Topics in Petrology and Geochemistry (3-5) Seminar, 3 hours; laboratory, 0-6 hours. Prerequisite(s): consent of instructor. Selected advanced topics from petrology and geochemistry of igneous, metamorphic, and sedimentary rocks. Course content varies from year to year. Course is repeatable to a maximum of 6 to 10 units.

GEO 254 Topics in Paleobiology (1) Seminar, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Explores selected contemporary topics in the area of paleobiology including evolutionary radiations, mass extinctions, paleoecology, biotic response to climate change, and the evolution of animals on planet Earth. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.

GEO 255 Advanced Topics in Sedimentary Petrology (4) Seminar, 2 hours; laboratory, 6 hours. Prerequisite(s): GEO 225A, GEO 225B. Selected advanced topics from sedimentary petrology and physical stratigraphy. Course content varies from year to year. Course is repeatable.

GEO 257 (E-Z) Advanced Topics in Geophysics (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): consent of instructor. Selected advanced topics from geophysics. Course content varies from quarter to quarter. Each segment is repeatable to a maximum of 12 units.

GEO 259 Tectonics of California (4) Lecture, 2 hours; seminar, 2 hours. Prerequisite(s): consent of instructor. Geological, geophysical, and paleontological bases of interpreting tectonic development of California, with special emphasis on southern California. Interdisciplinary approach will be emphasized. Weekly reading assignments, active participation in discussions, and appropriate field and library research will be required. Participants will prepare two papers and give presentations.

GEO 260 Global Climate Change (4) Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): PHYS 002C or PHYS 040C or consent of instructor. Explores global climate change in historic and geologic time scales. Topics include ocean-atmosphere feedbacks, El Niño, Pacific decadal oscillation, anthropogenic CO₂, volcanism, cosmic rays, polar ozone depletion, global climate modeling, stable isotopes, "ice house" Pleistocene climates, "greenhouse" climates of the Mesozoic and Tertiary, plate tectonics, and the "snowball" Earth.

GEO 261 Atmosphere, Ocean and Climate Dynamics Seminar (1) Discussion, 1 hour; extra reading, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Explores selected contemporary topics in the areas of atmospheric science, oceanography, climate dynamics, aerosol physics, and climate change through the twentieth and twenty-first centuries. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.

GEO 263 Organic and Petroleum Geochemistry (4) Lecture, 3 hours; seminar, 1 hour. Prerequisite(s): graduate standing; BIOL 010/GEO 003; CHEM 001C or equivalent; or consent of instructor. Explores the geologic fate of organic molecules in the sedimentary record, from fossil DNA to lipids. Addresses current analytical techniques used for detecting molecular fossils and for characterizing sedimentary organic matter. Covers topical applications of organic geochemical tools to archaeology, geobiology, paleoclimatic and paleoenvironmental reconstruction, petroleum exploration, and cosmochemistry research. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

GEO 264 Biogeochemical Cycles through Time (3) Lecture, 3 hours; two to three 2-day field trips. Prerequisite(s): BIOL 010/GEO 003; CHEM 001C or equivalent; GEO 001; GEO 002; or consent of instructor. A comprehensive exploration of the major biogeochemical cycles at and near Earth's surface. Emphasis is on microbially mediated cycling of elements and isotopes within diverse sedimentary environments and the cause-and-effect relationships with the ocean and atmosphere. Explores 4 billion years of biospheric evolution in light of these cycles. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

GEO 265 Special Topics in Earth and Environmental Sciences (1-3) Seminar, 1-3 hours. Prerequisite(s): graduate standing. Involves oral presentations and small-group discussions of selected topics in the areas of biogeochemistry, global climate change, geomicrobiology, earth surface processes, and interplanetary life. Graded Satisfactory (S) or No Credit (NC). Course is repeatable as content changes to a maximum of 10 units. Cross-listed with ENSC 265.

GEO 268 Seminar in Biogeography (4) Seminar, 2 hours; research, 6 hours. Prerequisite(s): graduate standing. Topics include Mediterranean ecosystems, fire ecology, naturalization of exotic species, succession and ecosystem steady state theory, and mapping of vegetation. Course is repeatable to a maximum of 8 units.

GEO 290 Directed Studies (1-6) Prerequisite(s): consent of instructor. Research and special studies in the geological sciences. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

GEO 297 Directed Research (1-6) Prerequisite(s): consent of instructor. Research for individual graduate students in geological sciences. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

GEO 299M Research for Master's Thesis (1-12) research, 3 hours per unit. Prerequisite(s): consent of instructor. Thesis research. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

GEO 299P Research for Dissertation (1-12) research, 3 hours per unit. Prerequisite(s): consent of instructor. Research for dissertation, arranged in consultation with the staff. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Courses

GEO 301 Teaching of Geosciences at the College Level (1) Seminar, 1 hour. Prerequisite(s): graduate standing in Geological Sciences. A program of weekly meetings and individual formative evaluation required of new Teaching Assistants for Geosciences courses. Covers instructional methods and classroom/section activities most suitable for teaching Geosciences. Conducted by the Teaching Assistant Development Program. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

GEO 302 Teaching Practicum (1-4) Seminar, 1-4 hours; practicum, 2-8 hours. Prerequisite(s): restricted to those graduate students appointed as Teaching Assistants. Supervised teaching of upper and lower-division courses in Geosciences. Required of all Teaching Assistants. Graded Satisfactory (S) or No Credit (NC). Course is repeatable for credit, but units not applicable toward degree unit requirements.

Majors

Economics studies the production and distribution of goods and services, as well as the way in which productive activity helps shape social existence. Economists are concerned with the factors determining national income, inflation, unemployment, output, growth and inequality (macroeconomics), as well as the behavior of individual decision-making units like households and firms (microeconomics). Economists are also concerned with the role of markets, money and interest rates, the forces affecting international trade, and many other problems of production and distribution.

Economics is the basis for many careers, some of which require only a B.A. degree while others require more advanced work. Possible careers include business, government, education and law.

The B.A. is the most general degree offered in economics. It is appropriate background for a wide variety of purposes, including graduate study and professional schools. However, those planning to attend a graduate program in economics may need more quantitative training than the B.A. requires. Students who are considering attending a graduate program in economics should consult with their undergraduate advisor. The Business Economics B.A. degree provides more specific preparation for careers in business administration or management or for graduate work in business.

University Requirements

See Undergraduate Studies section.

College Requirements

See College of Humanities, Arts, and Social Sciences, Colleges and Programs section.

MATH 009A and MATH 009B may also be used to meet breadth requirements.

Major Requirements

The Economics Department offers B.A. degrees in Economics, Business Economics, Economics/Administrative Studies, and Economics/Law and Society.

Economics Major

The major requirements for the B.A. degree in Economics are as follows:

- Lower-division requirements (4 courses [at least 16 units])
 - ECON 002, ECON 003
 - MATH 008B or MATH 009A or MATH 09HA, MATH 009B
- Upper-division requirements (12 courses [at least 48 units])
 - ECON 104A, ECON 104B
 - ECON 105A, ECON 105B
 - ECON 101, ECON 107
 - One four or five unit course with ECON 104B or ECON 105B or ECON 107 as a prerequisite.
 - Five additional upper-division courses in Economics worth 4 or 5 units each, including at least three that have either ECON 104A or ECON 105A or ECON 107 as a prerequisite. Two 2-unit courses can satisfy one 4- or 5-unit course.

Note Up to 4 units of internship credit may be counted toward the upper-division electives in Economics.

Business Economics Major

The major requirements for a B.A. degree in Business Economics are as follows:

- Lower-division requirements (five courses [at least 20 units])
 - ECON 002, ECON 003
 - BUS 020
 - MATH 008B or MATH 009A or MATH 09HA, MATH 009B
- Upper-division requirements (12 courses [at least 48 units])
 - ECON 104A, ECON 104B
 - ECON 105A, ECON 105B
 - ECON 101, ECON 107
 - Five additional upper-division courses in Economics worth 4 or 5 units each, including at least two courses from ECON 108, ECON 130, ECON 135, BUS 153/ECON 153, BUS 160/ECON 160, BUS 162/ECON 162, ECON 163. Two 2-unit courses can satisfy one 4- or 5-unit elective course.
 - One course chosen from POSC 182, PSYC 142, SOC 151

Note Up to 4 units of internship credit may be counted toward the upper-division electives in Business Economics.

Economics/Administrative Studies Major

In order to receive a B.A. degree in Economics/Administrative Studies students must fulfill the following requirements:

Economics requirements (12 courses, 48 units)

- ECON 002, ECON 003
- ECON 104A, ECON 104B, ECON 105A
- Four additional upper-division courses in Economics worth 4 or 5 units each, including at least two that have either ECON 104A or ECON 105A or ECON 107 as a prerequisite. Two 2-unit courses can satisfy one 4-unit course.
- ECON 101, ECON 107
- One of MATH 008B, MATH 009A, MATH 009HA, or equivalent

Note Up to 4 units of internship credit may be counted toward the upper-division electives in Economics.

Administrative Studies requirements (37 units)

- Lower-division courses (17 units)
 - BUS 010, BUS 020
 - STAT 048 or equivalent (may be used to satisfy breadth requirements)
 - CS 008 (may be used to satisfy breadth requirements)
- Upper-division requirements (20 units)
 - Two courses (8 units) from the list below:
 - ECON 102 or ECON 104A or ECON 162/BUS 162
 - PSYC 140 or PSYC 142
 - SOC 150 or SOC 151 or SOC 171
 - POSC 181 or POSC 182 or POSC 183
 - ANTH 127 or ANTH 131

These two courses must be outside the discipline of Economics and cannot be courses included as part of the three-course Business Administration track or their cross-listed equivalents.
 - A three-course track (12 units) in Business Administration courses from one of the following:
 - Organizations (General): BUS 100, BUS 107, BUS 176/SOC 176, BUS 158/ANTH 105, SOC 150, SOC 151
 - Human Resources Management/Labor Relations: BUS 100, BUS 107, ECON 152, BUS 153/ECON 153, BUS 155, BUS 157, PSYC 142
 - Business and Society: BUS 100, BUS 102, BUS 107, PHIL 116, POSC 182, POSC 186
 - Marketing: BUS 103, and two from BUS 112, BUS 113, BUS 114, BUS 117
 - Managerial Accounting/Taxation: BUS 108, and two from BUS 166, BUS 168A, BUS 168B

- Financial Accounting: BUS 108, BUS 165A, BUS 165B
- Finance: BUS 106/ECON 134 and two from BUS 134, BUS 136, BUS 137, BUS 138, BUS 139
- Management Information Systems: BUS 101, BUS 171, BUS 173
- Production Management: BUS 104/STAT 104, and two from BUS 105, BUS 122, BUS 127/STAT 127

Note In filling the dual requirements of the major students may not count more than two courses toward both parts of their total requirements. (This limitation applies to specified Economics requirements and specified Administrative Studies requirements, but does not apply to the required Mathematics and Statistics courses.)

Economics/Law and Society Major

The Law and Society major is open to undergraduate students with junior standing who have completed LWSO 100 with a grade of "C" or higher. The major requirements for the B.A. degree in Economics/Law and Society are as follows:

1. Economics requirements (11 courses [at least 44 units])

- ECON 002, ECON 003
- ECON 119
- ECON 104A, ECON 104B, ECON 105A
- Five additional upper-division courses in Economics worth 4 or 5 units each, including at least two that have either ECON 104A or ECON 105A or ECON 107 as a prerequisite. ECON 107 may be chosen as an advanced elective. Two 2-unit courses can replace one 4- or 5-unit elective course.

Note Up to 4 units of internship credit may be counted toward the upper-division elective courses in Economics.

2. Law and Society requirements (36 units)

- PHIL 007 or PHIL 007H
- LWSO 100 (with a grade of "C" or better)
- One course chosen from ECON 111, POSC 114, PSYC 012, SOC 004 (or equivalent course in research methods)
- Three courses chosen from ANTH 127, ECON 119, HISE 153, PHIL 165, POSC 167, PSYC 175, SOC 159
- Two courses chosen from ENSC 174, HISA 120A, HISA 120B, HISE 123, LWSO 175 (E-Z), PHIL 164, POSC 111, POSC 166, POSC 168, POSC 186, SOC 147, SOC 149, SOC 180
- LWSO 193, Senior Seminar

Note For sections 2.d) and 2.e) combined, not more than two courses may be taken from the same department. In filling the dual requirements of the major, students may not count more than two courses toward both parts of their total requirements. (This limitation applies to specified Economics requirements and Law and Society requirements.)

Minor

The minor in Economics provides a background in this discipline. Students take basic microeconomic and macroeconomic theory courses, and then are given freedom of choice in pursuing upper-division courses of great interest.

All candidates for the minor in Economics must take

1. Lower-division requirements (5-10 units): ECON 004 or ECON 002, and ECON 003
2. Upper-division requirements (at least 26 units):
 - a) ECON 102 or ECON 104A, ECON 103 or ECON 105A
 - b) Four additional upper-division courses (at least 16 units) in Economics

See Minors under the College of Humanities, Arts, and Social Sciences in the Colleges and Programs section of this catalog for additional information on minors.

Graduate Program

The Department of Economics offers the M.A. and Ph.D. degrees in Economics.

The graduate Economics program is designed to prepare students for research and teaching in academic institutions as well as for positions in government, international agencies, and the private sector.

Admission Students are normally admitted only in the fall quarter. Applicants should apply electronically, at graduate.ucr.edu. Students submit the completed application, GRE scores, three letters of recommendation (from persons familiar with the student's academic work), and transcripts in duplicate of previous academic work.

Master's Program Students should have first-year calculus, a course in statistics, and some background in economics before beginning course work. Students who do not meet these requirements may still be admitted but normally must take these courses as prerequisites to the required courses. Applicants to the M.A. program must have the same academic potential as Ph.D. applicants, as reflected by GPA and GRE scores. Admission to the M.A. program does not guarantee later admission to the Ph.D. program.

Doctoral Program The department encourages applicants from a variety of backgrounds, but a good understanding of intermediate microeconomics, intermediate macroeconomics, multivariate calculus, and elementary linear algebra is necessary to begin taking the core requirements, described below. In addition, two courses in basic probability and statistics or econometrics are required before beginning the core econometrics sequence. Students who do not satisfy the requirements, or who have been out of school for several years, should consider enrolling in the one-year M.A. program.

Master's Degree

The M.A. degree is designed as a preparatory program for those students interested in pursuing the Ph.D. but who are not adequately prepared to enter the Ph.D. program directly (e.g., students who lack the necessary prerequisites in economics or mathematics or students who have been out of school for some time).

Doctoral Degree

The Ph.D. is the primary degree objective of the graduate program. Students first complete a core curriculum in economic theory and quantitative methods. These courses provide training in the fundamental concepts and research methods of the discipline. Following demonstration of professional competence in the core areas, students specialize in theoretical or applied areas of economics. This leads to the development of independent research and the writing of the Ph.D. dissertation.

Core Requirements

1. Economic Theory

Students must complete the following:

- a) ECON 200A, ECON 200B, ECON 200C (Microeconomic Theory)
- b) ECON 201A, ECON 201B, ECON 201C (Macroeconomic Theory)

All students must pass two cumulative examinations: one in microeconomic theory (covering topics encompassed in the course sequence ECON 200A, ECON 200B, and ECON 200C) and one in macroeconomic theory (covering the topics covered in ECON 201A, ECON 201B, ECON 201C). Both examinations are given at the end of the first year, and at the beginning of the fall quarter. After completing the sequence of courses, students must sit for each examination at each offering until they have passed the requirement. An unexcused failure to sit for a required examination will be regarded as a failure. All students can have two attempts. Only students who pass at least one of the exams in the first or second attempts can have a third attempt in the other failed exam. No student will be given more than three attempts to achieve a satisfactory grade on each one of the two examinations.

2. Quantitative Methods

Students must complete the following: ECON 205A, ECON 205B, ECON 205C (Econometric Methods I, II, III)

To satisfy these course requirements, students must attain a "B" average in the sequences ECON 200A, ECON 200B, and ECON 200C; ECON 201A, ECON 201B, and ECON 201C; and ECON 205A, ECON 205B, and ECON 205C. Core courses may be waived, based on equivalent graduate work completed elsewhere. The comprehensive examinations, however, may not be waived.

Colloquium and Paper Requirement

Students must enroll in at least one offering of ECON 289A (Colloquium in Economics) each quarter of their first year and at least one

offering of ECON 289B each quarter of their formal residence from the second year on. In addition, students must write a well-rounded research paper by the fall term of the fourth year. The research paper will be evaluated by members of the oral qualifying examination committee or members of the dissertation committee, if already formed. Students must give a presentation on their thesis research by the fall term of their fifth year.

Field Requirement

All students must:

- i. complete course work in a major field consisting of three courses.
- and
- ii. take five additional field courses. Students must pass a comprehensive examination in their major field.

Comprehensive examinations in each major field are given twice a year.

1. Advanced Econometrics

Students must complete the courses a) and b) and one of the courses from c), d), e), or f) listed below.

- a) ECON 285E (Advanced Econometric Methods)
- b) ECON 285F (Topics in Econometrics)
- c) ECON 285G (Applied Econometrics)
- d) ECON 285-I (Macroeconometrics)
- e) ECON 285J (Nonparametric Econometrics)
- f) ECON 285K (Microeconometrics)

2. Advanced Macroeconomic Theory

Students must complete the following:

- ECON 282E (Foundations of Macroeconomics)
- ECON 282F (Advanced Monetary Theory)
- ECON 282G (Special Topics in Macroeconomic Theory)

3. Advanced Microeconomic Theory

Students must complete three of the following:

- ECON 283E (Rational Choice Theory)
- ECON 283F (Measurement and Aggregation in Economics)
- ECON 283G (General Equilibrium)
- ECON 283I (Social Choice and Welfare)
- ECON 283J (Uncertainty and Information)
- ECON 283K (Special Topics in Microeconomic Theory)

4. Advanced Political Economy

ECON 202A (Topics in Economic Theory: Critiques and Alternative Approaches) is recommended.

Students must complete three of the following:

- ECON 272A (Political Economy: Marxian Economics)

ECON 272B (Political Economy: Efficiency, Justice, and Power)

ECON 272C (Political Economy: Comparative Political Economy)

ECON 271 (Radical Political Economy)

ECON 279 (Political Economy: Advanced Topics)

5. Development Economics

Students must complete three of the following:

ECON 260 (Theories of Economic Development)

ECON 261 (Contemporary Development Strategies)

ECON 262 (Project Evaluation in Developing Countries)

ECON 265 (Agricultural and Rural Development)

ECON 266 (The Political Economy of Imperialism)

6. Economic History

Students must complete three of the following:

ECON 212 (History of Economic Theory and Methodology)

ECON 213 (Methods and Themes in Economic History)

ECON 223 (American Economic History)

ECON 224 (Economic History of the World Economy in the Twentieth Century)

7. International Trade Theory/International Finance

Students must complete the following:

ECON 234 (International Trade Theory)

ECON 235 (Topics in International Trade Theory)

ECON 236/POSC 215 (Political Economy of International Finance)

ECON 237 Topics in International Finance)

8. Labor Economics

Students must complete three of the following:

ECON 240 (Labor Supply, Labor Demand, and the Structure of Wages)

ECON 241 (Labor Institutions and Macro Labor Outcomes)

ECON 243 (Topics in Labor)

ECON 244 (Empirical Research Methods)

9. Money, Credit, and Business Cycles

Students must complete three of the following:

ECON 250 (Money, Credit, and the Macroeconomy)

ECON 251 (Business Cycle Theory)

ECON 254 (Topics in Money, Credit, and Business Cycles)

10. Resource and Environmental Economics

Students must complete three of the following:

ECON 207 (Environmental Economics)

ECON 208 (Models of Nonrenewable Resource Management)

ECON 209 (Models of Renewable Resource Management)

ECON 210 (Topics in Environmental Economics)

11. Public Economics

Students must complete the following:

ECON 246 (Introduction to Public Economics)

ECON 247 (Recent Advances in Public Economics)

Not all of these fields and courses are offered every year; offerings depend primarily on student demand.

As the department faculty is expanding, we expect to add additional fields in the near future. These may include International Economics and Health Economics.

Oral Qualifying Examination Students must pass an oral qualifying examination, which covers a dissertation prospectus and subject matter related to the student's major field and other field courses. It is given by a committee of five faculty members, at least one of whom is not a Department of Economics faculty member. Students who enter the program fully prepared normally take the examination before the beginning of the third year.

Dissertation and Final Examination The final requirement is the completion of a dissertation, under the direction of a dissertation committee, and passing a final examination defending the dissertation. The dissertation committee is normally composed of three Department of Economics faculty members (including cooperating faculty), usually chosen from the oral qualifying examination committee. Students who enter the program fully prepared normally complete the dissertation by the end of the fifth year. Students are encouraged to present a dissertation prospectus to a meeting of ECON 289 in their third year.

Master's Degree

Plan II (Comprehensive Examination) Students must complete a total of 36 units, 24 of which must be at the graduate level. Students must complete the following:

1. ECON 200A (Microeconomic Theory) or ECON 206 (Mathematics for Economists)

2. ECON 204A (Microeconomic Theory for Master's Students) or ECON 200A ECON 200B (Microeconomic Theory)

3. ECON 204B (Macroeconomic Theory for Master's Students) or ECON 201A ECON 201B (Macroeconomic Theory)

4. ECON 205A (Econometric Methods I) and ECON 205B (Econometric Methods II)

Examination Requirements

Students must pass one of the following examinations:

1. Master's examination covering the topics in ECON 204A, ECON 204B

2. Doctoral cumulative examination in either microeconomic theory or macroeconomic theory (graded at the master's level)

3. Doctoral Comprehensive Examination in any of the ten fields described above (graded at the master's level)

Lower-Division Courses

ECON 001 Introduction to Economics (4) Lecture, 3 hours; discussion, 1 hour. Examines the history of economic institutions, the ideas of the great economists, and selected contemporary issues.

ECON 002 Introduction to Macroeconomics (5) Lecture, 3 hours; discussion, 1 hour; written work, 30 hours per quarter. Prerequisite(s): none. An introduction to the study of the economic system from a macro, or aggregate, perspective. Includes analysis of unemployment, inflation, and the impact of government policies on the level of economic activity. Credit is awarded for only one of ECON 002, ECON 002H, or ECON 004.

ECON 002H Honors Introduction to Macroeconomics (5) Lecture, 3 hours; discussion, 1 hour; term paper, 3-3.5 hours. Prerequisite(s): admission to the University Honors Program or consent of instructor. Honors course corresponding to ECON 002. An introduction to the study of the economic system from a macro, or aggregate, perspective. Includes analysis of unemployment, inflation, and the impact of government policies on the level of economic activity. Satisfactory (S) or No Credit (NC) grading is not available. Credit is awarded for only one of ECON 002, ECON 002H, or ECON 004.

ECON 003 Introduction to Microeconomics (5) Lecture, 3 hours; discussion, 1 hour; written work, 3 hours. An introduction to the study of the economic system from the micro, or individual decision-maker's, perspective. Includes analysis of competition, monopoly, and the distribution of income. Credit is awarded for only one of ECON 003 or ECON 004.

ECON 004 Principles of Economics (5) Lecture, 4 hours; discussion, 1 hour. Prerequisite(s): a status in pre-Business or Business Preparatory or a major in Business Administration. Studies the economic system from both the micro, or individual decision-maker's perspective, and macro, or aggregate perspective. Includes analysis of competition, monopoly, distribution of income, unemployment, inflation, and the impact of government policies on economic activity. Credit is awarded for only one of ECON 002, ECON 002H, or ECON 004 and for only one of ECON 003 or ECON 004.

ECON 005 Data Analysis for Economics and Business (5) Lecture, 3 hours; outside research, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 002 (or ECON 002H), ECON 003; or ECON 004; or consent of instructor. Introduction to the sources of economic and business data and data analysis using graphs, plots, computers, and descriptive statistics. Also covers index numbers, measures of inequality, and simple regression analysis.

ECON 006 Introduction to Environmental Economics (4) Lecture, 3 hours; discussion, 1 hour. An introduction to the basic principles of economics and their application to problems of environmental quality and natural resource utilization. Emphasis is on the failure of markets as a cause of environmental degradation and the role of government in resolving problems of

230 / Programs and Courses

resource scarcity. Does not satisfy the Natural Science breadth requirement for the College of Humanities, Arts, and Social Sciences. Cross-listed with ENSC 006. *Does not satisfy the Natural Science breadth requirement for the College of Humanities, Arts, and Social Sciences.*

ECON 060 Engineering Economics (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): MATH 009A. Covers economic decisions involving engineering alternatives. Topics include time value of money, annual cost, present worth, rate of return, and benefit-to-cost. Addresses before and after tax replacement economy, organizational financing, break-even analysis, risk analysis, and capital budgeting. Cross-listed with ENGR 060.

Upper-Division Courses

ECON 101 Statistics for Economics (5) Lecture, 3 hours; discussion, 1 hour; laboratory, 1 hour; individual laboratory, 2 hours. Prerequisite(s): MATH 008B or MATH 009A or MATH 09HA or MATH 022 or equivalent. An introduction to the basic statistical methods for economics. Topics include economic data analysis, index numbers, univariate and bivariate probability distributions, correlation and regression, sampling distributions, properties of estimators, and hypothesis testing.

ECON 102 Intermediate Microeconomics (5) Lecture, 3 hours; discussion, 1 hour; written work, 3 hours. Prerequisite(s): ECON 003 or ECON 004; MATH 008B or MATH 009A or MATH 09HA or MATH 022. A comprehensive overview of the competitive market system. Includes the modern utility theory of consumer behavior, firm behavior in product and factor markets, and monopoly. Emphasizes theoretical applications to business enterprises. Intended for students planning to major in Business Administration. Credit is awarded for only one of ECON 102 or ECON 104A.

ECON 103 Intermediate Macroeconomics (5) Lecture, 3 hours; discussion, 1 hour; written work, 3 hours. Prerequisite(s): ECON 002 or ECON 002H or ECON 004. Covers the theory of income, employment, price level and the role of the international economy. Includes fiscal and monetary policy. Intended for students planning to major in Business Administration. Credit is awarded for only one of ECON 103 or ECON 105A.

ECON 104A Intermediate Microeconomic Theory (5) Lecture, 3 hours; discussion, 1 hour; written work, 3 hours. Prerequisite(s): ECON 003 with a grade of "C-" or better; MATH 008B or MATH 009A (or MATH 09HA). A calculus-based course that addresses developing theories of consumers and firms. Provides the foundation for partial equilibrium study of competitive and monopoly markets. Explores derived welfare properties of competitive markets as benchmarks for evaluating monopolies. Develops theories of monopoly pricing and strategy. Evaluates alternative policies as related to monopoly. Credit is awarded for only one of ECON 102 or ECON 104A.

ECON 104B Intermediate Microeconomic Theory (5) Lecture, 3 hours; discussion, 1 hour; written work, 3 hours. Prerequisite(s): ECON 102 with a grade of "C-" or better or ECON 104A or consent of instructor. A continuation of ECON 102 or ECON 104A. Covers imperfect competition, general equilibrium, and welfare economics. Also addresses intertemporal decision making, uncertainty, and related information.

ECON 105A Intermediate Macroeconomic Theory (5) Lecture, 3 hours; discussion, 1 hour; written work, 3 hours. Prerequisite(s): ECON 002 (or ECON 002H) with a grade of "C-" or better. Examines the determination of the equilibrium level of national income and its allocation among consumers, investors, and government. Develops theoretical models that describe how employment, production, and inflation are determined. Focuses on the impact of government policies, as well as the current developments on these

issues. Credit is awarded for only one of ECON 103 or ECON 105A.

ECON 105B Intermediate Macroeconomic Theory (5) Lecture, 3 hours; discussion, 1 hour; written work, 3 hours. Prerequisite(s): ECON 103 with a grade of "C" or better or ECON 105A. ECON 104A is recommended. A continuation of ECON 103 or ECON 105A. Investigates developments in macroeconomic theory and events. Presents models that explain economic growth and business cycle fluctuations. Explores their empirical relevance and policy implications.

ECON 107 Introductory Econometrics (5) Lecture, 3 hours; discussion, 1 hour; laboratory, 1 hour; outside research, 1 hour; written work, 1 hour. Prerequisite(s): ECON 002 or ECON 002H or ECON 003 or ECON 004; ECON 101; or consent of instructor. An introduction to the basic tools of econometrics. Focuses on the issues relating to the linear regression model, including heteroskedasticity, serial correlation, and multicollinearity.

ECON 108 Introductory Econometrics (5) Lecture, 3 hours; discussion, 1 hour; laboratory, 1 hour; written work, 1 hour; outside research, 1 hour. Prerequisite(s): ECON 107 or consent of instructor. A continuation of ECON 107. Covers, at an introductory level, the basic concepts related to logit and probit models, simultaneous equations models, dynamic time series models, unit roots and auto-regressive conditional heteroskedasticity (ARCH), and forecasting.

ECON 110 Mathematical Economics (5) Lecture, 3 hours; discussion, 1 hour; written work, 3 hours. Prerequisite(s): ECON 104B, MATH 010A, MATH 131. Covers mathematical concepts and techniques used in advanced economic analysis. Explores applications to selected aspects of economic theory.

ECON 111 Research Methods in Business and Economics (5) Lecture, 3 hours; discussion, 1 hour; term paper, 3 hours. Prerequisite(s): ECON 002 or ECON 002H or ECON 003 or ECON 004. Introduction to research methods in business and economics. Topics include the scientific method and notions of progress in science, problems of research design, data sources and data gathering techniques, the case study method, and measurement and interpretation of business and economic data.

ECON 112 Forecasting in Business and Economics (5) Lecture, 3 hours; discussion, 1 hour; laboratory, 1 hour; written work, 2 hours. Prerequisite(s): ECON 002 or ECON 002H or ECON 003 or ECON 004 or equivalent; ECON 107; or consent of instructor. Provides a basic knowledge of forecasting and its applications, particularly by using business and economic data. Covers basic methods of forecasting, such as regression methods, exponential smoothing, algorithms, and autoregressive integrated moving average (ARIMA) methods. Also explores how to combine and evaluate various forecasts. Uses computer analysis extensively.

ECON 115 Marxian Political Economy (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Fundamental concepts of Marxian political economy, including historical materialism, surplus value, exploitation, class analysis, economic crises, the state, socialism, and Marxian methodological foundations.

ECON 116 Foundations of Political Economy (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Explores ways of thinking about economic and social issues precluded by conventional approaches to economic analysis. Topics include the class relations between labor and capital, discrimination, market socialism, and alternative perspectives on development, macroeconomic instability, and the environment.

ECON 117 Economics and Philosophy (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s):

ECON 104B or consent of instructor. Examines issues on the boundary of economics and philosophy. Topics include social choice theory and economic justice; foundations of utility theory, rational choice, and economic welfare; and epistemology and the philosophies of science of Popper, Kuhn, and others. Cross-listed with PHIL 119.

ECON 118 The Contemporary United States Economy (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 105B. Provides an in-depth analysis of the U.S. economy with an emphasis on its contemporary structure. Incorporates issues related to macroeconomics. Focuses on questions that are relevant to current policy.

ECON 119 Law and Economics (4) Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): ECON 002 or ECON 002H or ECON 003 or ECON 004 or consent of instructor. An economic analysis of legal institutions and their evolution, including the areas of property laws, contract law, tort law, and criminal law.

ECON 121 (E-Z) Readings in Economics (2) for hours and prerequisites, see segment descriptions. In-depth discussion of a book that is not a textbook that offers important insights into economic issues.

ECON 121E The Wizard of Oz (2) Lecture, 15 hours per quarter; written work, 15 hours per quarter. Prerequisite(s): ECON 002 or ECON 002H, ECON 003; or ECON 004. Focuses on the Populist Movement, the rise of William Jennings Bryan's third-party presidential bid, and the contemporary political struggle regarding management of the U.S. money supply.

ECON 121F The Revolutions in Agricultural Biology (2) Lecture, 15 hours per quarter; individual study, 15 hours per quarter. Prerequisite(s): ECON 002 (or ECON 002H), ECON 003; or ECON 004; or consent of instructor. Explores the history of biotechnology. Covers the impact on standards of living, the distribution of welfare, and the pace and pattern of economic growth. Topics include the origin of agriculture, the Columbian Exchange, the dwarfing of wheat and rice, hybrid corn, and the adoption of genetically modified crops.

ECON 121G The Great Crash and the Great Depression (2) Lecture, 15 hours per quarter; individual study, 15 hours per quarter. Prerequisite(s): ECON 002 (or ECON 002H), ECON 003; or ECON 004; or consent of the instructor. What caused the great stock market crash of 1929? Did the market crash cause the Great Depression of the 1930s? What were some of the economic and social consequences? Can it happen again? Explores these and related questions from the most significant economic disruption in American economic history.

ECON 122 (E-Z) Economic Issues in the News (2) for hours and prerequisites, see segment descriptions. An in-depth examination of a current economic issue.

ECON 122E Economic Aspects of Contemporary Mexican Immigration to the United States (2) Lecture, 15 hours per quarter; written work, 15 hours per quarter. Prerequisite(s): ECON 002 or ECON 002H, ECON 003; or ECON 004. Examines the origin and nature of migrant flows, their implications for the economic development of Mexico, and impacts on U.S. labor markets, income and wage inequality, provision of social services, and the evolution of government policy.

ECON 122F The Federal Deficit and the National Debt (2) Lecture, 15 hours per quarter; individual study, 15 hours per quarter. Prerequisite(s): ECON 002 (or ECON 002H), ECON 003; or ECON 004; or consent of instructor. Studies revenues, expenditures, and tax policies of the federal government, focusing on causes and consequences of federal deficit spending. Topics include discretionary and mandatory spending (social security benefits, Medicare, etc.), tax credits and loopholes, debt finance, the life-cycle hypothesis of saving, and the burden of the national debt.

ECON 123 American Economic History (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 002 (or ECON 002H), ECON 003; or ECON 004. Covers the economic history of the United States from colonial times to the present. Cross-listed with HISA 123.

ECON 124 World Economic History (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 002 or ECON 002H, ECON 003; or ECON 004. Covers the economic history of the world from Paleolithic times to the present.

ECON 125 History of Economic Thought (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 002 or ECON 002H, ECON 003; or ECON 004. Study of the development of major economic theories, including those of Adam Smith, Karl Marx, and John Maynard Keynes. Focus is on how alternative theories define and address economic problems differently and the policy implications that follow.

ECON 129 Health Economics (4) Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): ECON 102 or ECON 104A. An economic analysis of health and medical care, medical technology, and the functioning of insurance markets. Emphasizes the dynamics of insurance companies, physicians, and the pharmaceutical industry. Issues addressed include the rising cost of health care, government involvement, and health care reform.

ECON 130 Introduction to Money, Banking, and Credit (5) Lecture, 3 hours; discussion, 1 hour; term paper, 3 hours. Prerequisite(s): ECON 103 or ECON 105A. Covers the basic theories of modern monetary systems. Explores money, credit, and interest rate behavior; financial intermediation and central banking; and methods and objectives of monetary and regulatory policy.

ECON 132 Public Finance (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 102 or ECON 104A; ECON 103 or ECON 105A; BUS 106/ ECON 134 or ECON 130 is recommended. Covers functions of government in a market economy. Includes distributive equity, taxation, spending, borrowing, and debt management. Examines promotion of capital formation, full employment, stability, and efficient resource use. Also addresses intergovernmental relations.

ECON 134 Introduction to Financial Management (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): BUS 020; ECON 002 (or ECON 002H); ECON 003; ECON 101 or STAT 048; upper-division standing. An introduction to financial management and financial institutions. Includes time value of money, stock and bond valuation, risk and return, portfolio theory, capital budgeting, capital structure, dividend policy, and financial databases. Cross-listed with BUS 106.

ECON 135 The Stock Market (5) Lecture, 3 hours; discussion, 1 hour; written work, 3 hours. Prerequisite(s): ECON 002 (or ECON 002H), ECON 003; or ECON 004. ECON 103 or ECON 105A is strongly recommended. An analysis of the history of the stock market and its role in the macroeconomy. Topics include factors governing stock prices, fundamental and technical analysis, the impact of inflation and interest rates, international investing, and the role of social institutions in the determination of stock prices.

ECON 136 Empirical Financial Economics (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 107 or consent of instructor. Discusses various empirical aspects of financial economics and financial risk management. Addresses both theoretical and applied issues in finance, risk management, and econometrics. Also discusses quantitative analysis, simulation methods, and case studies.

ECON 143A Environmental Economics (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ECON 003 or ECON 004 or equivalent, MATH 009A or MATH

008B or equivalent; or consent of instructor. An introduction to economic analysis of natural resources and the environment emphasizing environmental quality. Topics include environment-economy interactions and social choice theory; source control costs, damage valuation, and efficient pollution control; and design of efficient and equitable environmental policy. Cross-listed with ENSC 143A.

ECON 143B Natural Resource Economics (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ECON 143A/ENSC 143A or consent of instructor. Considers the extraction and use of natural resources. Topics include land use and natural capital economics and valuation; economics of mineral and nonrenewable resources including recycling; and managing biological and renewable resources, including common property, efficient usage, and regulation. Cross-listed with ENSC 143B.

ECON 143C Ecological Economics and Environmental Valuation (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ECON 143A/ENSC 143A or consent of instructor. Survey of environmental valuation and economy-wide, long time-scale issues. Valuation methods covered include hedonic pricing, weak complements, contingent valuation, and ecosystem services. Environmental macroeconomic topics include population growth, biophysical constraints to economic growth, intertemporal welfare and sustainability, and sustainable development. Cross-listed with ENSC 143C.

ECON 146 Urban Economic Problems (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 102 or ECON 104A. Applies economic principles to the major problems of the modern urban community, such as poverty, discrimination, deterioration of the environment, and housing problems. Explores programs for alleviation of or solution to these issues. Cross-listed with URST 146.

ECON 148 Land and Resource Economics (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 102 or ECON 104A. Explores distinctive qualities of land and its rent, as well as valuation of land as an investment. Addresses assembly, division, and development of land, efficiency of the land market and the effects of taxation. Covers concentrated ownership, separation of ownership and management, rent and taxable surplus, and origins and kinds of tenure.

ECON 152 Economics of Labor Relations (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 002 (or ECON 002H), ECON 003; or ECON 004. An analysis of the history of labor and industrial relations in the United States. Emphasizes problems of collective action, long-swings of economic growth, income inequality, and the role of government.

ECON 153 Labor Economics (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 102 or ECON 104A. An analysis of labor demand, labor supply, and the structure of wages. Emphasizes neoclassical, institutional, and radical perspectives. Cross-listed with BUS 153.

ECON 155 Women's Labor and the Economy (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 003 or ECON 004. Focuses on economic analyses of four topics: women's work in and out of the paid labor force; gender differences in occupation, earnings, and income; marriage, divorce, and childbearing; and public policy regarding women's work and standard of living. Explores differences among women by race, ethnicity, class, marital status, and parental responsibilities. Cross-listed with WMST 155.

ECON 156 Population Dynamics and Economic Well-being (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 002 (or ECON 002H), ECON 003; or ECON 004. Examines the causes and consequences of population dynamics. Analyzes economic

models of such demographic behavior as fertility, mortality, marriage, and migration. Also explores the consequences of population change for economic growth, the environment, and overall well-being.

ECON 159 Economics of Art, Entertainment, and Culture (4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): ECON 002 or ECON 002H or ECON 003 or ECON 004 or consent of instructor. An overview of the economic aspects of art, entertainment, and culture. Includes consumer demand for culture, economic models of nonprofit organizations, and competition and market structure in the arts and entertainment industries. Addresses copyright issues, public support of the arts, and the role and impact of public and private subsidies.

ECON 160 Industrial Organization (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 104B. A study of the organization and structure of the American industrial system. Emphasizes production and pricing behavior and policies. Also addresses market structure and public policies regulating or influencing market behavior. Cross-listed with BUS 160.

ECON 162 Managerial Economics (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ECON 102 or ECON 104A. Examines applications of economic analysis to problems of management, especially of capital. Emphasis is on production economics and cost analysis. Cross-listed with BUS 162.

ECON 163 Economics and Business Strategy (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 101, ECON 104B. Provides an understanding of the basic concepts of game theory, as well as many strategic interactions. Includes price wars, cooperation, commitment, bargaining, and the strategic use of information.

ECON 170 (E-Z) Case Studies in Economic Development (2) for hours and prerequisites, see segment descriptions. A detailed study of the history, problems and prospects of economic development in a selected geographical region.

ECON 170E Economic Development in India (2) Lecture, 15 hours per quarter; written work, 15 hours per quarter. Prerequisite(s): ECON 102 or ECON 104A or consent of instructor. A detailed study of the history, problems, and prospects of economic development in India.

ECON 170F Economic Development in Australia (2) Lecture, 15 hours per quarter; individual study, 15 hours per quarter. Prerequisite(s): ECON 002 or ECON 002H, ECON 003; or ECON 004. Discusses Australian economic development from the first European settlements to the present day. Focus is on Australia as a settler economy, created through a process of large-scale migration from well-established states to a land-abundant, previously unorganized region and involving the marginalization of the indigenous population.

ECON 171 International Finance (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 103 or ECON 105A. Covers international monetary theory and its applications. Topics include balance of payments, exchange rates, open-economy macroeconomics, and international monetary institutions. Addresses selected policy issues.

ECON 175 Comparative Analysis of Economic Systems (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Examines the varieties of capitalism as well as its characteristic features and systematic problems. Topics also include the search for an alternative; central planning; and market socialism.

ECON 178 International Trade (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 102 or ECON 104A. A study of the pure theory of trade, trade policy, and international factor movements.

Includes illustrative applications to current issues and problems. Cross-listed with BUS 178.

ECON 180 Transition from Socialism to Capitalism

(4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 002 (or ECON 002H), ECON 003; or ECON 004; or consent of instructor. Examines the transition from central planning to a more market-oriented economic system in Central and Eastern Europe, the countries of the former Soviet Union, China, Mongolia, and Vietnam. Evaluates alternative transition strategies using Russia and China as the key examples.

ECON 181 Economic Development: Theory and Policy

(4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 002 or ECON 002H, ECON 003; or ECON 004. A survey of the main theories of economic development and an analysis of the major development strategies and policies.

ECON 182 Trade, Globalization, and Development

(4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 102 or ECON 104A. Explores the theory of comparative advantage as a guide to development policy. Discusses trade regimes and their effects on development. Analyzes the nature and consequences of the globalization of the world economy.

ECON 183 Population and Development

(4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 102 or ECON 104A; ECON 107; or consent of instructor. A study of interactions between population growth and economic development. Covers the history of demographic thought, models for developing countries based on the demographic experience of currently developed countries. Explores household production models, demand for children, mortality, health and nutrition, migration, and human capital. Traces macroeconomic economic-demographic linkages in developing countries.

ECON 184 Economic Development in Africa

(4) Lecture, 3 hours; extra reading, 1 hour; written work, 1 hour; term paper, 1 hour. Prerequisite(s): ECON 102 or ECON 103 or ECON 104A or ECON 105A; ECON 107; or consent of instructor. Examines major current issues in development economics. Focuses on Sub-Saharan Africa.

ECON 185 Economic Development in Latin America

(4) Lecture, 3 hours; discussion, 1 hour; individual study, 3 hours. Prerequisite(s): ECON 102 or ECON 103 or ECON 104A or ECON 105A. A comparative analysis of the major trends in Latin American economies in the twentieth century. Includes historical legacies, primary export economies, the theory and practice of import substitution industrialization, and the debt crisis. Also covers stabilization and structural adjustment, poverty and income distribution, the informal and agricultural sectors, and the environment. Cross-listed with LNST 185.

ECON 187 Contemporary Public Policy Challenges in Latin America

(4) Lecture, 3 hours; discussion, 1 hour; individual study, 3 hours. Prerequisite(s): ECON 002 or ECON 002H or ECON 003 or ECON 004 or consent of instructor. A survey of the wide-sweeping policy reforms since the 1980s and of contemporary public policy challenges in Latin America. Challenges discussed include extremely high levels of poverty and inequality; inadequate educational and healthcare systems; pressures for land reform; problems of trade competitiveness; and recurring currency crises. Cross-listed with LNST 187.

ECON 189 Economic Development in Brazil

(4) Lecture, 3 hours; discussion, 1 hour; individual study, 3 hours. Prerequisite(s): ECON 102 or ECON 104A; ECON 103 or ECON 105A. An analysis of the successes and failures of economic development in the largest country in Latin America. Reviews current issues facing Brazilian policy makers. Topics include historical legacies, import substitution and industrialization, poverty and inequality, agriculture and land reform, and the

environmental impact of development. Cross-listed with LNST 189.

ECON 190 Special Studies (1-5) Course is repeatable to a maximum of 12 units.

ECON 193A Senior Seminar (4) Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 104B, ECON 105B; or consent of instructor. Advanced research in various fields of faculty interest. Includes completion of a research paper and presentation. Topics vary from year to year. Graded In Progress (IP) until ECON 193A and ECON 193B are completed, at which time a final grade is assigned.

ECON 193B Senior Seminar (4) Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): senior standing; ECON 193A. Advanced research in various fields of faculty interest. Students complete a research paper and present their results in the seminar. Topics vary from year to year.

ECON 198-1 Individual Internships in Economics

(1-12) Prerequisite(s): junior standing with major in Economics and consent of instructor (to be obtained before pre-enrollment). Active participation in the work of a public or quasi-public agency or business concern in matters relating to general or business economics. The student spends approximately 10 hours each week with such an employer. A summary paper is required. One unit for every three hours spent in internship. Open to majors on a Satisfactory (S) or No Credit (NC) basis.

ECON 199H Senior Honors Research (1-4) Outside research, 3-12 hours. Prerequisite(s): upper-division standing in Economics; admission to the University Honors Program or consent of instructor. Offers the opportunity for directed research at an honors level. Satisfactory (S) or No Credit (NC) grading is not available. Course is repeatable to a maximum of 12 units.

Graduate Courses

ECON 200A Microeconomic Theory (6) Lecture, 4.5 hours; discussion, 1.5 hours. Prerequisite(s): ECON 104B or equivalent. Focuses on consumer and producer theory under conditions of certainty. Covers required mathematics, including real analysis and static optimization theory. May be taken Satisfactory (S) or No Credit (NC) with consent of instructor and graduate advisor.

ECON 200B Microeconomic Theory (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ECON 200A or equivalent. Focuses on decision making under uncertainty, economics of information, applications of game theory, and models of imperfect competition.

ECON 200C Microeconomic Theory (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ECON 200B or equivalent. Focuses on general equilibrium theory, including existence and stability, and on welfare economics and social choice.

ECON 201A Macroeconomic Theory (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ECON 105B or equivalent; ECON 200A (may be taken concurrently). Examines the basic issues and models of macroeconomics.

ECON 201B Macroeconomic Theory (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ECON 201A or equivalent. Covers, but is not limited to, investment and consumption, labor and monetary economics, tax and debt policy, and mathematics for macroeconomists.

ECON 201C Macroeconomic Theory (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ECON 201B or equivalent. Focuses on the phenomena of business cycles, both the empirical characteristics and the theoretical models.

ECON 202A Topics in Economic Theory: Critiques and Alternative Approaches (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing. Critiques of conventional economic theories and consideration of alternative theories and approaches to issues of aggregate economic growth and instability from Marx to the present.

ECON 202B Topics in Economic Theory: Applications

(4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 200A, ECON 200B, ECON 200C; ECON 201A, ECON 201B, ECON 201C; ECON 205A, ECON 205B, ECON 205C. Applies the theories and methods covered in the ECON 200A, ECON 200B, ECON 200C and ECON 201A, ECON 201B, ECON 201C sequences to real-world problems, including (1) the specification of functional form and the estimation of supply and demand systems, (2) index number theory and the measurement of inflation, the cost of living, output, and other macroeconomic phenomena, (3) computable general equilibrium models, (4) programming methods, (5) problems of aggregating over agents and commodities, and (6) the measurement of economic phenomena like productivity, poverty, income and wealth distribution, technical and allocative inefficiency, and input substitutability.

ECON 205A Econometric Methods I (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ECON 104A; ECON 105A; MATH 009A; MATH 009B; STAT 100B; or equivalents. Examines econometric methods for the analysis of economic data and the construction of econometric models with applications to microeconomics and macroeconomics. Covers the linear regression model and related techniques of matrix algebra. Also addresses statistical estimation and inference.

ECON 205B Econometric Methods II (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ECON 205A or equivalent. Examines econometric methods covering extensions of the basic regression model, nonlinear models, and limited dependent variable models.

ECON 205C Econometric Methods III (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): ECON 205B or equivalent. Examines econometric methods for the analysis of economic data and the construction of econometric models with applications to time-series macroeconomics. Covers univariate time-series models, volatility models, simultaneous equation models, and dynamic econometric models.

ECON 207 Environmental Economics (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 200A or equivalent. Covers the theory and methods of environmental economics. Topics include externality theory, bargaining solutions, property rights, and resource allocation mechanisms. Also covers environmental policy under uncertainty and asymmetric information, as well as dynamic and general equilibrium models of environmental quality. Cross-listed with ENSC 211.

ECON 208 Natural Resource Economics (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 200A or equivalent. Covers dynamic models of nonrenewable resources. Topics include uncertainty, game theory, and the measurement of resource scarcity. Examines empirical models of nonrenewable and renewable resources. Cross-listed with ENSC 212.

ECON 209 Nonmarket Valuation and Environmental Policy (4) Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 200A; ECON 205A or equivalent. A study of economic valuation of natural resources and the environment. Includes environmental demand theory, travel cost models, random utility models, discrete choice models, the contingent valuation technique, and hedonic wage and pricing models. Also covers theory, empirical methods, and applications. Cross-listed with ENSC 209.

ECON 210 (E-Z) Topics in Environmental Economics (4)

Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 207/ENSC 211 or consent of instructor. An in-depth study in selected areas of environmental and natural resource economics. E. Transportation and Environmental Quality. F. Political Economy of Environmental Policy. ECON 210E/ENSC 210E are repeatable to a maximum of 8 units. Cross-listed with ENSC 210 (E-Z).

ECON 212 History of Economic Theory and Methodology (4)

Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. The origins and contemporary development of alternative economic theories. Methodological and philosophical debates in economics.

ECON 213 Methods and Themes in Economic History (4)

Lecture, 3 hours; term paper, 1.5 hours; extra reading, 1.5 hours. Prerequisite(s): graduate standing or consent of instructor. Surveys central themes in world economic history to introduce the subject and methodology of economic history. Topics illustrate a wide variety of historical experiences and illuminate the process of economic growth. Economics graduate students receive a letter grade; other students receive a letter grade or Satisfactory (S) or No Credit (NC) grade.

ECON 223 American Economic History (4) Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An introduction to economic history as an approach to economics. Surveys major issues pertaining to the historical and institutional bases for the distinctive performance of the American economy. Economics graduate students receive a letter grade; other students receive a letter grade or Satisfactory (S) or No Credit (NC) grade.

Carter, Sutch

ECON 224 Economic History of the World Economy in the Twentieth Century (4)

Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An introduction to world economic history as an approach to economics. Surveys major issues pertaining to the historical and institutional bases for the performance of the world economy during the twentieth century. Economics graduate students receive a letter grade; other students receive a letter grade or Satisfactory (S) or No Credit (NC) grade. **Sutch**

ECON 234 International Trade Theory (4)

Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): ECON 200A, ECON 200B, ECON 200C; or consent of instructor. Examines the determinants of trade in goods and services, international flow of labor and capital, and the effects of trade policy on welfare and income distribution.

ECON 235 Topics in International Trade Theory (4)

Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): Prerequisite(s) ECON 234 or consent of instructor. An in-depth study in selected areas of international trade theory. Topics include, but are not limited to, trading blocks, trade agreements and strategic interactions, trade and the environment, and the political economy of international trade. Course is repeatable to a maximum of 8 units.

ECON 236 Political Economy of International Finance (4)

Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Conducts a broad theoretical and historical survey of the politics and economics of international money and finance. Topics include monetary and exchange rate regimes, foreign direct investment, capital flows, sovereign debt, financial regulation and international macroeconomic coordination, the role of finance in economic development, and international financial crises. Cross-listed with POSC 215.

ECON 237 Topics in International Finance (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Explores

key topics in international finance and open economy macroeconomics using both theoretical and empirical analysis tools. Topics include the understanding of exchange rate determination, current account, international capital flows, currency crisis, foreign exchange intervention, and sovereign debt/risk.

ECON 240 Labor Supply, Labor Demand, and the Structure of Wages (4)

Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. This course introduces students to the theoretical and empirical literature on labor supply and demand and on the structure of wages. The contributions of neoclassical, institutional, and radical economists will be discussed.

ECON 241 Labor Institutions and Macro Labor Outcomes (4)

Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. A historical perspective on industrial structure, personnel management systems, labor unions, and government, and their relation to macro labor outcomes such as income distribution, productivity growth, and unemployment.

ECON 243 Topics in Labor (4)

Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. In-depth study in selected areas of labor economics. Topics include, but are not limited to, economic demography and race and gender issues. Course is repeatable as topics change.

ECON 244 Empirical Research Methods (4)

Lecture, 3 hours; tutorial, 1 hour; written work, 2 hours. Prerequisite(s): ECON 205B or equivalent. Introduction to empirical techniques used in modern applied economics, with a focus on identification strategies. Topics include natural experiments, instrumental variables, regression discontinuity, and panel data. Emphasis is on practical application of techniques and solutions to problems empirical researchers encounter.

ECON 246 Introduction to Public Economics (4)

Lecture, 3 hours; written work, 2 hours; extra reading, 1 hour. Prerequisite(s): ECON 200C. An introduction to public economic theory and its applications: Topics include the theory of economic justice, welfare economics, the theory of market failure, the positive theory of taxation, and cost-benefit analysis.

ECON 247 Recent Advances in Public Economics (4)

Lecture, 3 hours; extra reading, 1 hour; term paper, 1 hour; written work, 1 hour. Prerequisite(s): ECON 200C. Focuses on the use of controlled and natural experiments, analysis of panel data, and the cross-country study of the role of social, cultural, and economic institutions in economic growth. Also covers theory of the second best; auction theory; theory of government contracting, procurement, and regulation; fiscal federalism theory; and the political economy.

ECON 250 Money, Credit, and the Macroeconomy (4)

Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Investigation of the role of money, credit, and financial institutions in influencing growth, distribution, employment, prices, and business cycles in capitalist economies. Fiscal policy, monetary policy, and public investments are addressed from alternative theoretical perspectives.

ECON 251 Business Cycle Theory (4)

Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. An in-depth treatment of theories of the cycle and empirical data on relations of variables over the cycle.

ECON 254 Topics in Money, Credit, and Business Cycles (4)

Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Selected topics in the performance of the macroeconomy, monetary and fiscal theory, and monetary and fiscal policy.

ECON 260 Theories of Economic Development (4)

Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. A survey of the major theories of development and underdevelopment beginning with the classical model, theories of surplus, and including the models of Lewis, Nurkse, Hirschman, neoclassical schools, structuralist models, and dependency theory.

ECON 261 Contemporary Development Strategies (4)

Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. A review of the performance of the major strategies of development implemented in the recent past or currently under implementation.

ECON 262 Project Evaluation in Developing Countries (4)

Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. The rationale for social benefit-cost analysis of projects in developing countries. Estimation of shadow prices to replace the distorted market prices in evaluating project profitability. The role of income distribution, externality, and uncertainty in project evaluation.

ECON 264 Topics in Economic Development (4)

Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Selected themes for advanced study in economic development. Course is repeatable to a maximum of 8 units.

ECON 265 Agricultural and Rural Development (4)

Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. This course is concerned with the economics of agricultural and rural development in developing countries. Topics examined include technical change, sharecropping and interlinked factor markets, migration, poverty and famine, land reform, environmental aspects of rural development, and structural adjustment within agriculture.

ECON 266 The Political Economy of Imperialism (4)

Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examination of traditional and contemporary theories of imperialism, with attention to the origins and evolution of principal ideas and a critical assessment of their influence on developmental literature.

ECON 268 Economics of Biotechnology (4)

Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing in Economics or in one of the biological sciences or consent of instructor. Covers the economic causes and consequences of revolutions in biotechnology. Topics may include the agricultural revolution, the Columbian exchange, and biotechnological advances in mechanization, brewing, and plant and animal breeding. Focuses on the implications of adopting genetically modified crops such as *Bacillus thuringiensis* corn and herbicide-resistant crops. Students who submit a term paper receive a letter grade; other students receive a Satisfactory (S) or No Credit (NC) grade. Course is repeatable as content changes.

ECON 271 Radical Political Economy (4)

Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. A survey of the methodology of radical political economy and an examination of its logical, empirical, and normative bases.

ECON 272A Political Economy: Marxian Economics (4)

Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. A study of Marxian economic theory, including historical materialism, the role of value, class, exploitation, and accumulation in Marxian economics, and a survey of current debates on these issues.

ECON 272B Political Economy: Efficiency, Justice, and Power (4)

Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Covers the various notions of efficiency

used in political economic analysis, as well as their application in historical and comparative institutional contexts. Theories of justice in the distribution of rewards and the extent to which efficiency is separable from justice. Different notions of how power influences economic outcomes.

ECON 272C Political Economy: Comparative Political Economy (4) Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Explores economic institutions and various methodological approaches to economics from a comparative perspective. Topics include types of capitalism (market-oriented, welfare-state, and the East Asian model), transitional economies, and market socialism. Institutional, socioeconomic, and radical political economy approaches to economic analysis are also discussed.

ECON 279 Political Economy: Advanced Topics (4) Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Topics in the methodology and theory of political economy. Course is repeatable to a maximum of 8 units.

ECON 282 (E-Z) Advanced Macroeconomic Theory (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): passing grade on the Macroeconomic Cumulative Examination or consent of instructor. Covers advanced topics in macroeconomic theory. Students read state-of-the-art research papers and books. Includes presentations by students and faculty. E. Foundations of Macroeconomics; F. Advanced Monetary Theory; G. Special Topics in Macroeconomic Theory. ECON 282G is repeatable to a maximum of 8 units.

ECON 283 (E-Z) Advanced Microeconomic Theory (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): passing grade on the Microeconomics Cumulative Examination or consent of instructor; for ECON 283M, ECON 283N, ECON 283P, ECON 283Q, ECON 283R: ECON 200C. Covers advanced topics in microeconomic theory. Involves reading current research papers and books, and presentations by students and faculty. E. Rational Choice Theory; F. Measurement and Aggregation in Economics; G. General Equilibrium; I. Social Choice and Welfare; J. Uncertainty and Information; K. Special Topics in Microeconomic Theory; M. The Microtheoretic Bases of Development Economics; N. Applications of Games and Information Economics; O. Measurement of Productivity and Efficiency; P. Public Economic Theory; Q. Economics of Contract: Theory and Applications; R. Measurement of the Standard of Living, Inequality, and Deprivation. ECON 283K is repeatable to a maximum of 8 units.

ECON 285 (E-Z) Advanced Econometrics (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): ECON 205A, ECON 205B, ECON 205C; or consent of instructor. Advanced topics and recent developments in econometrics. State-of-the-art research papers and books are read, and presentations are made by students as well as faculty. E. Advanced Econometric Methods; F. Topics in Econometrics; G. Applied Econometrics; I. Macroeconometrics; J. Nonparametric Econometrics; K. Microeconometrics. ECON 285F is repeatable to a maximum of 8 units.

ECON 289A Colloquium in Economics (2) Seminar, 1.5 hours; written work, 1.5 hours, individual study 3 hours. Prerequisite(s): graduate standing. Lectures and discussion by students, faculty and invited scholars on specially selected topics. Course is repeatable as content changes; up to 8 units.

ECON 289B Colloquium in Economics (2) Seminar, 1.5 hours; written work, 1.5 hours. Prerequisite(s): graduate standing. Lectures and discussion by students, faculty and invited scholars on specially selected topics. Graded Satisfactory (S) or No Credit (NC). Course is repeatable as content changes.

ECON 290 Directed Studies (1-6) Prerequisite(s): graduate standing and consent of instructor. Directed

studies of selected problems of economic analysis. Open to graduate students who desire to do special work in a particular field. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

ECON 291 Individual Study in Coordinated Areas (1-12) Outside research, 3-36 hours. A program of study designed to advise and assist candidates who are preparing for examination. Graded Satisfactory (S) or No Credit (NC). Repeatable as follows: (1) a student may take up to 12 units prior to the award of the M.A. (these 12 units do not count toward the required M.A. units); (2) a student may take up to 18 additional units after award of the M.A. but prior to successful completion of the Ph.D. qualifying examination.

ECON 292 Concurrent Analytical Studies (2-4) Lecture, 1-3 hours; outside research, 6-12 hours. Prerequisite(s): consent of instructor. Each 292 course will be taken concurrently with some 100-series course, but on an individual basis. It will be devoted to completion of a graduate paper based on research or criticism related to the 100-series course. Faculty guidance and evaluation will be provided through the quarter. Graded Satisfactory (S) or No Credit (NC). May be repeated for credit.

ECON 297 Directed Research (1-6) Prerequisite(s): graduate standing and consent of instructor. Directed research on selected problems in economics. Designed for graduate students who have not yet passed their qualifying examinations. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

ECON 299 Research for Thesis or Dissertation (1-12) Prerequisite(s): graduate standing and consent of instructor. Research in economics under the direction of a staff member to be included as part of the doctoral dissertation. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

Professional Course

ECON 302 Teaching Practicum (1-4) Practicum, 3-11 hours; seminar, 1 hour. Prerequisite(s): limited to department TAs; graduate standing. Supervised teaching in upper- and lower-division courses. Required of all economics teaching assistants. Graded Satisfactory (S) or No Credit (NC). May be repeated for credit.

Education Minor

Subject abbreviation: EDUC
Graduate School of Education

Program Office, Sproul 1124
(951) 827-5850; education.ucr.edu

The Education minor offers to any undergraduate student an introduction to issues and practices of education and research in public schools. Students from any major are invited to pursue a minor in Education.

Students in the Education minor may select from a variety of courses that may focus on a particular interest or may sample across aspects of the curriculum. Specific areas of interest that are reflected in the course offerings include: Special education, literacy and language, curriculum and teaching strategies, and educational research.

The Education minor does not lead to a teaching credential; however, some of the courses will satisfy UCR credential program requirements. Students who are interested in pursuing a teaching credential should contact GSOE student services at (951) 827-5225.

Admission Students apply to the Education minor by submitting a UC Riverside "Request to Declare/Drop a Minor" form.

Once approved by the Education Minor Committee, the application goes to the student's college for approval. Both approvals are required for admission.

The minimum qualifications are:

1. Present good academic standing with a minimum GPA of 2.0
2. Petitions must be filed at least two quarters before graduation, depending on major.

Program Requirements The Education minor consists of the satisfactory completion of 24 units in courses identified for the Education Minor Program. At least 16 units must be completed in upper division courses.

All courses that candidates may want to use to satisfy the teacher credential program requirements must be completed with a minimum grade of "C." Minor in Education candidates must maintain a minimum cumulative GPA of 2.0

Course Work The following courses will comprise the menu of electives for the Education minor:

EDUC 001, EDUC 002, EDUC 003, EDUC 004
EDUC 020, EDUC 020S, EDUC 030, EDUC 040, EDUC 040S, EDUC 044, EDUC 050, EDUC 050S, EDUC 100A, EDUC 100B, EDUC 109, EDUC 109S, EDUC 110, EDUC 110S, EDUC 112, EDUC 112S, EDUC 114, EDUC 116, EDUC 116S, EDUC 118, EDUC 120, EDUC 129, EDUC 130, EDUC 131, EDUC 139, EDUC 146/ETST 146, EDUC 172, EDUC 172S, EDUC 173, EDUC 174, EDUC 174S.

Additional courses may be added to this list by proposals of academic units, or by petitions of students to take a suitable alternative course. Student petitions require the approval of the program advisor in the Education minor. Students may not petition to take more than 8 units of courses outside of the identified courses for the Education minor.

Director of Teacher Education Services

Maritza Rodriguez, Ph.D.

Graduate Program

The Graduate School of Education offers three degree programs—Doctor of Philosophy, Master of Arts and Master of Education—as well as a variety of teacher credential programs. Each of these programs is described in detail below.

General university requirements, such as residence and unit requirements, are in the Graduate Studies section of this catalog. *Policies and Procedures for Graduate Degree Programs* may be obtained from the Graduate Degree Program Office.

Admission Admission is based upon GPA and letters of recommendation from writers knowledgeable about the candidate's ability to succeed in graduate study. In addition, M.A. and Ph.D. applicants must submit scores from the GRE General Test (verbal, quantitative, analytical), no more than five years old from the date of their matriculation. Ph.D. applicants must submit a writing sample. The GRE is not required of applicants seeking admission to credential programs or to the M.Ed. program. The Ph.D. program admits students in the Fall quarter only.

Master of Arts

Candidates enrolled in this program normally have completed an undergraduate major or its equivalent in a subject field other than

education. General areas of specialization include Education, Society, and Culture; Educational Psychology; Special Education; and School Psychology (for students working toward the Ph.D.). Only students matriculating in a Graduate School of Education Ph.D. program may earn an Education Masters degree in School Psychology (Plan I Thesis option only). Course requirements for the programs may be obtained from the Graduate Degree Program Office, 1207 Sproul Hall. Before the end of the first quarter, the student's advisor develops a program plan that specifies the courses the student will take. The M.A. program gives students (with the exception of School Psychology students) the option of completing a thesis or taking a comprehensive written examination.

Plan I (Thesis) Students complete a minimum of 36 upper-division and graduate units. At least 24 of these units are in graduate courses. A maximum of 12 units may be in graduate research for the thesis.

At the beginning of the second, and generally not later than the third quarter of full-time work, candidates submit a plan for the thesis to their committee. Candidates also list courses to be taken for developing competence in their area of specialization. The plan is reviewed and approved by a committee of three faculty members. Upon completion of the thesis, the candidate submits it to this committee for approval. Upon successful completion of the thesis, the student is recommended to the Graduate Division for the M.A. degree.

Plan II (Comprehensive Examination) Students must complete a minimum of 36 quarter units in upper-division and graduate courses in Education and related fields as defined in existing programs. At least 18 of the 36 units must be in graduate courses, and none in graduate research for the thesis.

A faculty member from the program area specialization is appointed by the graduate advisor to guide the candidate. A program plan must be filed with the graduate advisor by the end of the first quarter of residency.

Upon or near completion of course work, the student applies to take a comprehensive written examination. Upon successful completion of the examination, the candidate is recommended to the Graduate Division for the M.A. degree.

Normative Time to Degree 6 quarters from admission to the M.A. program

Master of Education

A Master of Education (M.Ed.) degree program is offered that allows students to select from six emphases. The GRE is not required for admission to the M.Ed. program. No thesis or comprehensive examination is required. Instead, students complete an analytical project that builds on course work and links educational theory and research with the dynamics of teaching, learning, and leadership.

General Education Teaching Emphasis

M.Ed. and California Teaching Credential in Multiple Subjects or Single Subject

This emphasis allows qualified students to complete requirements for a California teaching credential and a master's degree in one academic year and two summers.

Prospective students must submit an application to the Graduate Division.

Concurrent admission into the Multiple Subjects or Single Subject credential program is required for this emphasis. Students not admitted to the M.Ed. degree can be considered for credential only program. Those who already possess California teaching credentials are not eligible for this program but may apply for admission to the other graduate degree programs offered by the GSOE.

Admission The following are requirements:

1. A baccalaureate degree from an accredited institution
2. A minimum GPA of 3.2 based on the last 90 quarter units in the baccalaureate program
3. Passage of Basic Skills and Subject Matter Requirements
4. Three Letters of Recommendation
5. Official transcripts

Course Work This M.Ed. emphasis requires up to 72 units, 36 units are in upper division and graduate level courses; at least 18 of the 36 units must be completed in graduate level courses (Plan II). Students must successfully complete their credential requirements to earn the degree. This program requires courses that are taken during summer sessions.

Analytical Project The analytical project centers on comprehensive, critical self-analyses of instructional practice in K-12 classrooms. A final version of the analytical project is submitted to the Graduate School of Education in electronic form for faculty committee review.

Special Education Teaching Emphasis

M.Ed. and California Education Specialist Credential

This degree emphasis is designed to provide a pathway to earn a California Education Specialist Mild/Moderate and/or Moderate/Severe disabilities teaching credential and Master of Education degree. The program goes beyond best practice by preparing students to critically evaluate the literature on current and future practices and can be completed in less than two years. The first year of course work is designed to meet the requirements for the teaching credential(s) and includes some courses that are not applied to the degree requirements.

Admission The following are requirements:

1. A baccalaureate degree from an accredited institution
2. Admission to the Education Specialist Credential program in Mild/Moderate and/or Moderate/Severe Disabilities
3. Submission of letters of recommendation and transcripts

236 / Programs and Courses

Admission is based upon GPA and letters of recommendation from writers who are knowledgeable about the candidate's ability to succeed in graduate study.

Course Work The M.Ed. portion of the Special Education emphasis requires 36 units (at least 24 of which must be graduate level courses). Students must successfully complete their credential requirements to earn the degree.

1. Credential courses applicable to the M.Ed.
 - a) Three of the following courses, required for teaching certification, can be applied to the master's degree if the courses were not applied to a previous degree: EDUC 110 or EDUC 110S, EDUC 116 or EDUC 116S, EDUC 120, EDUC 129, EDUC 133, EDUC 172 or EDUC 172S, EDUC 175 or EDUC 175S

California Education Specialist Credential Options

Track 1 - Mild/Moderate and Moderate/Severe: Student Teaching Only

1. Prerequisite Courses
 - a) EDUC 109 or EDUC 109S, EDUC 110 or EDUC 110S, EDUC 116 or EDUC 116SPrerequisites must be taken during undergraduate study or summer prior to entering program.
2. Required Courses
 - a) EDUC 120, EDUC 129, EDUC 133, EDUC 172 or EDUC 172S, EDUC 282A, EDUC 295A, EDUC 295B, EDUC 295C, EDUC 295D, EDUC 335A, EDUC 342, EDUC 345A, EDUC 345B
3. Three Elective Courses from approved list
 - a) EDUC 212, EDUC 246E, EDUC 246I, EDUC 246J, EDUC 246K, EDUC 246L, EDUC 246M, EDUC 246N, EDUC 246R, EDUC 246S, EDUC 270
4. Analytical Project

Track 2.A. - Mild/Moderate: Student Teaching Only

1. Prerequisite Courses
 - a) EDUC 109 or EDUC 109S, EDUC 110 or EDUC 110S, EDUC 116 or EDUC 116SPrerequisites must be taken during undergraduate study or summer prior to entering program.
2. Required Courses
 - a) EDUC 120, EDUC 129, EDUC 133, EDUC 172 or EDUC 172S, EDUC 282A, EDUC 295A*, EDUC 295B, EDUC 335A, EDUC 335B, EDUC 342, EDUC 345A*EDUC 295A is only required if EDUC 175 or EDUC 175S has not previously been completed.
3. Three Elective Courses from approved list
 - a) EDUC 212, EDUC 246E, EDUC 246I, EDUC 246J, EDUC 246K, EDUC 246L, EDUC 246M, EDUC 246N, EDUC 246R, EDUC 246S, EDUC 270

4. Analytical Project

Track 2.B. - Mild/Moderate: Intern Teaching Only

1. Prerequisite Courses
 - a) EDUC 109 or EDUC 109S, EDUC 110 or EDUC 110S, EDUC 116 or EDUC 116S, EDUC 172 or EDUC 172S, EDUC 175 or EDUC 175SPrerequisites must be taken during undergraduate study or summer prior to entering program.
2. Required Courses
 - a) EDUC 120, EDUC 129, EDUC 133, EDUC 282A, EDUC 295B, EDUC 342, EDUC 346A, EDUC 346B, EDUC 346C
3. Three Elective Courses from approved list (12 units)
 - a) EDUC 212, EDUC 246E, EDUC 246I, EDUC 246J, EDUC 246K, EDUC 246L, EDUC 246M, EDUC 246N, EDUC 246R, EDUC 246S, EDUC 270
4. Analytical Project

Track 3.A. - Moderate/Severe: Student Teaching Only

1. Prerequisite Courses
 - a) EDUC 109 or EDUC 109S, EDUC 110 or EDUC 110S, EDUC 116 or EDUC 116SPrerequisites must be taken during undergraduate study or summer prior to entering program.
2. Required Courses
 - a) EDUC 120, EDUC 129, EDUC 133, EDUC 172 or EDUC 172S, EDUC 282A, EDUC 295C, EDUC 295D, EDUC 335A, EDUC 335B, EDUC 342, EDUC 345B
3. Three Elective Courses from approved list
 - a) EDUC 212, EDUC 246E, EDUC 246I, EDUC 246J, EDUC 246K, EDUC 246L, EDUC 246M, EDUC 246N, EDUC 246R, EDUC 246S, EDUC 270
4. Analytical Project

Track 3.B. - Moderate/Severe: Intern Teaching Only

1. Prerequisite Courses
 - a) EDUC 109 or EDUC 109S, EDUC 110 or EDUC 110S, EDUC 116 or EDUC 116S, EDUC 172 or EDUC 172S, EDUC 175 or EDUC 175SPrerequisites must be taken during undergraduate study or summer prior to entering program.
2. Required Courses
 - a) EDUC 120, EDUC 129, EDUC 133, EDUC 282A, EDUC 295C, EDUC 295D, EDUC 342, EDUC 347A, EDUC 347B, EDUC 347C
3. Three Elective Courses from approved list
 - a) EDUC 212, EDUC 246E, EDUC 246I, EDUC 246J, EDUC 246K, EDUC 246L, EDUC 246M, EDUC 246N, EDUC 246R, EDUC 246S, EDUC 270

4. Analytical Project

Analytical Project Students will complete a final written project that integrates the content of theory and teaching methods courses. A final version of the report will be submitted to the Graduate School of Education and evaluated by faculty in the Special Education area.

Autism Emphasis

This M.Ed. emphasis focuses on children with Autism Spectrum Disorder. A unique partnership between the Graduate School of Education and University Extension reflects a balance of research and theory from active researchers and relevant K-12 application knowledge from practitioners in the field.

Admission The following are requirements:

1. Teaching credential in general education or special education or admission to a UCR Specialist Level I Preliminary Credential program
2. Letters of Recommendation
3. Strong academic record

Course Work Required courses are offered in the Graduate School of Education, Summer Session, with up to 8 units of approved courses at University Extension allowed. For some course requirements, students may choose from courses with comparable content in GSOE and Extension or Summer Session. A minimum of 36 units are required.

Analytical Report Students will complete a final written project that integrates the content of theory and teaching methods courses. A final version of the project will be submitted to the Graduate School of Education and evaluated by faculty in the Special Education area.

Diversity and Equity Emphasis

This M.Ed. emphasis addresses the diversity in many K-12 student populations and supports teachers in achieving educational equity for all students through the translation of educational theory and empirical research findings into sound educational practice. This program consists of a minimum of 36 units of 200-series courses offered in the Graduate School of Education. The program can also be completed through a collaboration between the Graduate School of Education and University Extension by completing one of four Extension certificate programs that address issues of student diversity and equity: Reading; Reading with Bilingual Emphasis; CLAD through CTLE; or Education for the Gifted and Talented. Up to 9 units of 400-level Extension certificate courses can be used towards the minimum 36 unit total required for this degree for applicants who have completed one of the four Extension certificate programs prior to admission to this program.

Admission The following are requirements:

1. Teaching credential or equivalent teaching experience
2. Strong academic record
3. Letters of reference from writers knowledgeable about the applicant's ability to succeed in graduate study

Course Work This M.Ed. emphasis requires a minimum of 36 units. Applicants who have completed one of four approved Extension certificate programs relevant to equity and diversity prior to admission can receive credit for up to 9 units of 400-level certificate courses. For these applicants the remaining 28 units are in 200-series courses offered in the GSOE.

Analytical Report Students will complete a final written project that addresses a specific concern or issue regarding diversity and educational equity in classrooms, schools, districts, or at the state or federal level. A final version of the project will be submitted to the Graduate School of Education and evaluated by faculty in the Education, Society, and Culture area.

Higher Education Administration and Policy Emphasis

This M.Ed. emphasis examines scholarship and research on institutions, policy, systems, and demographic, historical, political, social, and economic contexts. It emphasizes reflective practice and prepares practitioners for careers in higher education institutions so that they can be knowledgeable scholars and expert professionals.

Admission The following are requirements:

1. A baccalaureate degree from an accredited institution
2. Career interests in a higher education setting
3. Three letters of recommendation from academic sources
4. Strong academic record, with an undergraduate GPA of at least 3.0

Course Work 36 units are required. The majority of courses are offered in the Graduate School of Education and focus on higher education, but program plans may also include relevant courses offered in other departments.

Analytical Report After students complete their course work they will complete a case study report that integrates content from higher education courses with practice.

A final version of the report is submitted to the Higher Education faculty committee in the Graduate School of Education for review and approval.

Reading Emphasis

This M.Ed. considers reading development, reading difficulties, and intervention in general and special education. Students study reading theory and empirical research and how each contributes to sound educational practice. This M.Ed. does not include a specialist credential; To be considered for this M.Ed. emphasis, prospective students must have a minimum of three years of K-12 teaching experience in general or special education.

Admission The following are requirements:

1. A teaching credential
2. Three years teaching experience
3. Submission of letters of recommendation and transcripts

Admission is based upon GPA and letters of recommendation from writers knowledgeable about the candidate's ability to succeed in graduate study.

Course Work This M.Ed. requires 36 units in 200-series courses. EDUC 290 is offered as an elective for students who want to pursue a particular component of reading/writing instruction.

1. Required courses: EDUC 212, EDUC 219, EDUC 270
2. Required to complete at least one of the following courses: EDUC 201A, EDUC 201B, EDUC 246S
3. Required to complete at least three of the following elective courses: EDUC 201A, EDUC 201B, EDUC 204, EDUC 230A, EDUC 232, EDUC 233, EDUC 246I, EDUC 246S EDUC 257, EDUC 262, EDUC 290

Analytical Report Students are given a case study to examine and develop a reading intervention and plan for implementation and assessment. A final version of the case study report is submitted to the Graduate School of Education for faculty committee review.

Teaching English to Speakers of Other Languages (TESOL)

This M.Ed. emphasis focuses on teaching the English language to speakers of other languages. It is a partnership between the Graduate School of Education and University Extension and reflects a balance of research, theory, and pedagogy from active researchers on the socio-cultural factors affecting language learning and TESOL specialists.

Admission The following are requirements:

1. A baccalaureate degree from an accredited institution
2. Concurrent enrollment in or completion of the UCR TESOL Certificate program. Applicants who have earned TESOL certification from other recognized university programs may be reviewed for admission to this M.Ed. program.
3. Three letters of recommendation, at least two of which must be academic references
4. Official transcripts

Course Work A total of 36-quarter units, including a minimum of 28 units of approved 200-level coursework in the Graduate School of Education, are required. Up to eight units of coursework from a UCR Extension TESOL certificate program, approved by the Graduate Advisor, may be applied to the M.Ed. The UCR TESOL certificate must be completed before the M.Ed. can be awarded. Courses for this program are offered throughout the academic year, including the summer.

Analytical Report Students will integrate the content of theory and teaching methods courses in a capstone course. An analytical report must be submitted to the Graduate School of Education and evaluated and approved by a faculty committee.

Doctoral Degree

The doctoral program in Education is designed to prepare scholars for teaching and research in the area of education. More information about graduate programs in Education, contact the graduate advisor, Graduate School of Education, (951) 827-6362, or visit education.ucr.edu.

Admission Admission is based on strong academic preparation at the baccalaureate level. A master's degree in education such as that offered at UCR or a master's degree in an ancillary field is desirable but not required. Doctoral students begin their programs in the fall quarter.

Specialization General areas of specialization include Education, Society, and Culture; Higher Education Administration and Policy; Special Education; Educational Psychology; and School Psychology. The School Psychology Program is accredited by the American Psychological Association (APA) and approved by the National Association of School Psychologists (NASP). School Psychology Ph.D. students can also obtain a Pupil Personnel Services Credential.

Following admission to the program, students are assigned a preliminary faculty advisor who guides them during the initial phase of their program. Students work closely with a faculty advisor during their doctoral program. In addition, three faculty committees — a program guidance committee, an oral qualifying examination committee, and a dissertation committee — are formed at various stages of the program.

Course Work In the first year of the program students in all areas except School Psychology take a year-long methodology sequence in which students examine the nature of inquiry and uses of qualitative and quantitative research methods in education. All students take specialized area seminars in the first year.

Students may take additional specialization courses during the first year.

During the next phase of the program, students pursue in-depth studies in at least two fields of concentration. Normally, the student and a three-member program guidance committee identify and document a program plan for the remaining course work in these areas. Preparation in each field consists of sufficient study to allow the students to grasp the essential concepts and inquiry methods of that field.

Qualifying Examination After or near completion of course work in the second phase and before being advanced to candidacy, the student must pass written and oral qualifying examinations. The student's faculty advisor, in consultation with faculty associated with the student's area of specialization, coordinates the construction of the written examination. Students must

1. Review critical literature in an assigned field
2. Demonstrate competence in research methodologies, and
3. Demonstrate competence over content in fields of specialization.

The faculty associated with the student's area of specialization evaluate the written qualifying examination. Following the written examination and before the oral qualifying examination, the Graduate Dean appoints an oral qualifying committee consisting of the student's faculty advisor, three additional faculty members from the Graduate School of Education, and one faculty member from outside the school.

Pre-proposal In preparation for the oral qualifying examination, students develop a pre-proposal, setting forth the direction of their dissertation. Once the faculty advisor determines that the pre-proposal is ready for the oral examination, it is distributed to the oral qualifying committee. The committee uses the pre-proposal as a focus for examining the student, but the questioning may go beyond the pre-proposal. Students pass the oral qualifying examination when the committee is satisfied that 1) the pre-proposal, as well as the student's grasp of the theoretical and empirical issues at its core, leads in a productive direction toward a competent dissertation, and 2) the student has demonstrated competence in areas covered by the written examination that are also addressed in the oral examination. Students in the School Psychology program must complete and pass the oral qualifying examination before starting the required 1500-hour internship.

Teaching Requirement Determined by the student's program guidance committee.

Foreign Language Requirement None

Dissertation Prior to commencing the dissertation research, students must have a dissertation proposal approved by the dissertation committee. Following completion of the dissertation, the chair of the candidate's committee schedules an oral defense. The dissertation must meet with the approval of the dissertation committee and the Graduate Council before the candidate is recommended for the degree.

Normative Time to Degree 15 quarters from admission to the Ph.D. program

Credential Programs

The Graduate School of Education offers teaching credential programs, and a credential for school psychologists. These programs are accredited by the California Teaching Commission.

Admission to GSOE credential programs is based upon GPA and letters of recommendation from individuals knowledgeable about the candidate's ability to succeed in professional study. Most programs also require an interview. Admission to the teaching credential programs also requires candidates to pass exams in basic skills and subject matter. Course prerequisites depend on the intended program. More information regarding the prerequisites is available on the Prepare to Teach flyer. Admission information and deadlines are available at education.ucr.edu. Contact GSOE at (951) 827-5225 or at creded@ucr.edu. Information can also be obtained at the GSOE Student Services Office, 1124 Sprout Hall.

Programs for the Preparation of Teachers

Post baccalaureate Teaching Credential Programs

The Graduate School of Education offers credential programs that result in teacher certification and do not require admission to a master degree program. The following programs are offered:

- **Multiple Subjects** Generally for the elementary setting. A bilingual emphasis in Spanish is available to qualified candidates who want to be authorized to deliver instruction in Spanish as well as English.
- **Single Subject** Generally for the middle school or high school setting. GSOE offers the following single subject areas: English, Languages Other than English, Mathematics, Sciences, and Social Science.
- **Education Specialist** For those who want to be special education teachers. GSOE offers the following specializations: Mild/Moderate and/or Moderate/Severe Disabilities.

All credential programs offer the option of student or intern teaching. The intern option requires candidates to have some teaching experience (ex: substitute teaching or instructional aides) and completion of pre-service requirements prior to admission.

Combined teacher credential programs with a Master of Education degree (M.Ed.) are described in the Master of Education section.

Lower-Division Courses

EDUC 001 Imagining Teaching (2) Lecture, 2 hours. Prerequisite(s): none. Considers images of teaching produced in popular culture, professional writing, and personal recollections, and how the images impact and reflect teaching in schools. Designed for lower-division students considering teaching as a career. Credit is awarded for only one of EDUC 001 or EDUC 003.

EDUC 002 Looking in Classrooms (3) Lecture, 2 hours; field, 3 hours. Prerequisite(s): EDUC 001 or EDUC 003. Involves observation in classrooms in local schools identified as having exemplary programs. Students record and interpret their observations and compare them to published studies of classrooms. Credit is awarded for only one of EDUC 002 or EDUC 004.

EDUC 003 Imagining Teaching: Science/Mathematics Emphasis (3) Lecture, 2 hours; field, 3 hours. Prerequisite(s): admission to the California Teach program; consent of instructor. Considers images of teaching produced in popular culture, professional writing, and personal recollections, and how the images impact and reflect teaching in schools. Addresses topics related to teaching mathematics and science in the K-12 classroom. Includes 3 hours per week of participation and observation in public school classrooms. Designed for lower-division students who plan to teach mathematics or science in the public schools. Credit is awarded for only one of EDUC 001 or EDUC 003.

EDUC 004 Looking in Classrooms: Science/Mathematics Emphasis (3) Lecture, 2 hours; field, 3 hours. Prerequisite(s): EDUC 003; admission to the California Teach program; consent of instructor. Involves observation in classrooms in local schools identified as having exemplary programs in mathematics and science.

Students record and interpret their observations and compare them to published studies of classrooms. Designed for lower-division students who plan to teach mathematics or science in the public schools. Credit is awarded for only one of EDUC 002 or EDUC 004.

EDUC 020 Introduction to Education Policy (4) Lecture, 3 hours; term paper, 3 hours. An overview of federal and state policy frameworks governing public education. Explores the political dynamics of policy making. Focuses on centralized policy making authority and on efforts to reform and improve public schools. Explores competing values guiding policy debates and dilemmas of centralized policy control. Credit is awarded for only one of EDUC 020 or EDUC 020S.

EDUC 020S Introduction to Education Policy (4) Lecture, 3 hours; discussion, 1 hour. An overview of federal and state policy frameworks governing public education. Explores the political dynamics of policy making. Focuses on centralized policy making authority and on efforts to reform and improve public schools. Explores competing values guiding policy debates and dilemmas of centralized policy control. Credit is awarded for only one of EDUC 020 or EDUC 020S.

EDUC 030 Racial Gaps in Educational Opportunity and Achievement (4) Lecture, 3 hours; outside research, 3 hours. Examines existing theories, research, and policies addressing disparities in educational opportunities and achievement among racial/ethnic, social class, and language groups—a problem now contentiously designated as the “achievement gap.” Explores the incidence, consequences, and causes of these gaps and society's interest in eliminating the gaps.

EDUC 040 Education, Society and Culture (4) Lecture, 3 hours; individual study, 3 hours. Introduces the history and philosophy of public education in the United States. Focuses on the political economy, dominant ideologies, and existing educational practices that have precedents in various historical eras. Explores the history of education of girls and women, people of color, minority groups, and people of varying socioeconomic classes. Credit is awarded for only one of EDUC 040 or EDUC 040S.

EDUC 040S Education, Society and Culture (4) Lecture, 3 hours; discussion, 1 hour. Introduces the history and philosophy of public education in the United States. Focuses on the political economy, dominant ideologies, and existing educational practices that have precedents in various historical eras. Explores the history of education of girls and women, people of color, minority groups, and people of varying socioeconomic classes. Credit is awarded for only one of EDUC 040 or EDUC 040S.

EDUC 044 Principles of Healthful Living (4) Lecture, 3 hours; outside research, 3 hours. Introduction to personal, family, and community health. Discusses the attitudes and behaviors associated with healthful living and the use of health-related scientific information. Explores the effects of alcohol, dangerous drugs, narcotics, degenerative and infectious diseases, and tobacco on the human body and the community resources available to assist in their treatment.

EDUC 050 Intercollegiate Athletics and American Higher Education (4) Lecture, 3 hours; written work, 3 hours. Introduces intercollegiate athletics as an organization including its structure and function. Explores the role of intercollegiate athletics in higher education from historical, sociological, economic, and administrative perspectives. Focuses on contemporary issues including student-athlete experience as well as the roles of faculty, students, coaches, and administrators and the various emerging challenges. Credit is awarded for only one of EDUC 050 or EDUC 050S.

EDUC 050S Intercollegiate Athletics and American Higher Education (4) Lecture, 3 hours; discussion, 1 hour. Introduces intercollegiate athletics as an organization including its structure and function.

Explores the role of intercollegiate athletics in higher education from historical, sociological, economic, and administrative perspectives. Focuses on contemporary issues including student-athlete experience as well as the roles of faculty, students, coaches, and administrators and the various emerging challenges. Credit is awarded for only one of EDUC 050 or EDUC 050S.

Upper-Division Courses

EDUC 100A Tutorial Teaching: Community Outreach (2)

Lecture, 5 hours per quarter; field, 3 hours; outside research, 15 hours per quarter. Prerequisite(s): upper-division standing. Motivation and teaching of children and adolescents in a tutorial setting in a school or other appropriate community educational center. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 6 units.

EDUC 100B Tutorial Teaching: Professional Development (2)

Lecture, 5 hours per quarter; field, 3 hours; outside research, 15 hours per quarter. Prerequisite(s): upper-division standing; consent of instructor. Guided and sequenced tutorial experiences with children and adolescents enrolled in local schools having cooperative arrangements with the University. Provides experience in one-on-one teaching and supports the professional development of students planning to teach. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 6 units.

EDUC 101 Academic Disciplines and Professional Education (1)

Lecture, 1 hour. Prerequisite(s): upper-division standing. An introductory study of how academic disciplines relate to pedagogy. Includes developing a personal educational philosophy, discovering ways to communicate knowledge, and reflecting on how a scholar becomes a teacher. Designed for undergraduates considering education as a professional career. Graded Satisfactory (S) or No Credit (NC).

EDUC 104 Mathematics Education (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): sophomore, junior, or senior standing. Examines contemporary instructional strategies relating to mathematics education. Includes thinking skills and problem solving strategies applicable to number theory, logic patterns and functions, statistics, probability, and geometry and algebra. Cross-listed with MATH 104.

EDUC 109 Education in a Diverse Society (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): professional or upper-division standing. An analysis of the classroom as a microcosm of society. Focuses on issues related to meeting the educational needs of students with diverse backgrounds and characteristics including gender, religion, ability, ethnicity, culture, socioeconomic status, class, and language. Credit is awarded for only one of EDUC 109 or EDUC 109S.

EDUC 109S Education in a Diverse Society (4)

Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): professional or upper-division standing. An analysis of the classroom as a microcosm of society. Focuses on issues related to meeting the educational needs of students with diverse backgrounds and characteristics including gender, religion, ability, ethnicity, culture, socioeconomic status, class, and language. Credit is awarded for only one of EDUC 109 or EDUC 109S.

EDUC 110 Learning Theory and Psychology in Education (4)

Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): professional or upper-division standing. Covers the study of stages of intellectual development; principles of learning; the dynamics of human behavior; learner and cultural differences as they relate to modern curricula and instruction; and the role of motivation and self-concept in the learning process. Credit is awarded for only one of EDUC 110 or EDUC 110S.

EDUC 110S Learning Theory and Psychology in Education (4)

Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): professional or upper-division

standing. Covers the study of stages of intellectual development; principles of learning; the dynamics of human behavior; learner and cultural differences as they relate to modern curricula and instruction; and the role of motivation and self-concept in the learning process. Credit is awarded for only one of EDUC 110 or EDUC 110S.

EDUC 112 Understanding Assessment in Education (4)

Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introduces principles of educational assessment including reliability and validity to help interpret test-based information in educational settings. Credit is awarded for only one of EDUC 112 or EDUC 112S.

EDUC 112S Understanding Assessment in Education (4)

Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): upper-division standing or consent of instructor. Introduces principles of educational assessment including reliability and validity to help interpret test-based information in educational settings. Credit is awarded for only one of EDUC 112 or EDUC 112S.

EDUC 114 Comparative International Education (4)

Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Identification, analysis, and comparison of the educational characteristics of selected developed and developing nations such as Japan, England, Mexico, and Egypt.

EDUC 116 The Exceptional Child (4)

Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): professional or upper-division standing. Explores characteristics of individuals with physical and mental disabilities. Includes emotional disturbance, visual or hearing impairments, gifted and talented students, and children with characteristics of autism. Emphasizes educational programs and considers the effect of gender, socioeconomic, ethnic, and linguistic factors. Credit is awarded for only one of EDUC 116 or EDUC 116S.

EDUC 116S The Exceptional Child (4)

Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): professional or upper-division standing. Explores characteristics of individuals with physical and mental disabilities. Includes emotional disturbance, visual or hearing impairments, gifted and talented students, and children with characteristics of autism. Emphasizes educational programs and considers the effect of gender, socioeconomic, ethnic, and linguistic factors. Credit is awarded for only one of EDUC 116 or EDUC 116S.

EDUC 118 Educational Research Methods (4)

Lecture, 3 hours; individual study, 3 hours. Prerequisite(s): upper-division standing or consent of instructor. Introduces the basics of research methods as applied to inquiry in the field of education. Explores methods of data collection and analysis of student assessment data.

EDUC 120 Guidance in Special Education (4)

Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): EDUC 116 or EDUC 116S or consent of instructor. Application of principles and techniques of counseling children with disabilities and their families or guardians. Emphasizes the role of the teacher in educational, personal, and vocational (transition) guidance for exceptional children. Includes materials for working with families from diverse cultural and linguistic backgrounds.

EDUC 129 Educational Assessment of Individuals with Disabilities (4)

Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): EDUC 116 or EDUC 116S or consent of instructor. Principles and techniques of assessment and educational planning for children with disabilities. Includes examination of a broad range of assessment tools for general and special education.

EDUC 130 Mild and Moderate Disabilities (4)

Lecture, 3 hours; written work, 3 hours. Prerequisite(s): EDUC 116 or EDUC 116S or consent of instructor. Explores characteristics, etiology, and identification of individuals with mild and moderate disabilities, history and

laws influencing their treatment and education, and current education and transition issues. Includes mild and moderate retardation, learning disabilities, and emotional and behavioral disorders.

EDUC 131 Moderate and Severe Disabilities (4)

Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): EDUC 116 or EDUC 116S or consent of instructor. Explores characteristics, etiology, and identification of individuals with moderate and severe disabilities, history and laws influencing their treatment and education, and current education and transition issues. Includes mental retardation, serious emotional disturbance, and autism.

EDUC 133 Issues and Trends in Special Education (4)

Lecture, 3 hours; written work, 3 hours. Prerequisite(s): EDUC 116 or EDUC 116S. Covers characteristics, etiology, and identification of students with disabilities. Includes history and laws influencing treatment, education, and transition to adulthood; issues related to labeling, eligibility, and program placement; changes in educational interventions based on research and law; services to pre-school age children and their families; and trends in instructional approaches. Satisfactory (S) or No Credit (NC) grading is not available.

EDUC 139 Curriculum and Instruction (4)

Lecture, 3 hours; laboratory, 2 hours; outside research, 1 hour. Prerequisite(s): upper-division standing. The study of modern curricula in the elementary and secondary schools, including the effects of performance objectives, diagnostic-prescriptive teaching, individualized instruction, lesson planning, and performance assessment. Content analysis of curriculum areas will be emphasized.

EDUC 146 Educational Perspectives on the Chicano (4)

Lecture, 3 hours; term paper, 3 hours. Prerequisite(s): consent of instructor. An examination of educational policy issues concerning Chicano students, such as testing and testing procedures, learning styles, socialization, and language acquisition. Other topics will deal with the impact of significant legislative acts related to the education of Chicanos. Cross-listed with ETST 146.

EDUC 172 Reading and Language Development (4)

Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): professional or upper-division standing. An introduction to reading and language development. Addresses theoretical models of reading; linguistics and language development; methods and materials; children's and adolescents' literature; reading in the content areas; individual differences; and measurement and evaluation in reading. Includes observation and participation in assigned schools. Credit is awarded for only one of EDUC 172 or EDUC 172S.

EDUC 172S Reading and Language Development (4)

Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): professional or upper-division standing. An introduction to reading and language development. Addresses theoretical models of reading; linguistics and language development; methods and materials; children's and adolescents' literature; reading in the content areas; individual differences; and measurement and evaluation in reading. Includes observation and participation in assigned schools. Credit is awarded for only one of EDUC 172 or EDUC 172S.

EDUC 173 Teaching Literature to Children and Adolescents (4)

Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): upper-division standing. Explores developmental methods appropriate for teaching literature to children and adolescents. Topics include story telling, story reading, pictorialization, dramatics and body movement, and narrative, poetic, and dramatic writing. Examines literature written for children and adolescents and adult fiction appropriate for children and adolescents.

EDUC 174 Reading and Writing in the Content Areas (4)

Lecture, 3 hours; outside research, 3 hours. Prereq-

240 / Programs and Courses

uisite(s): professional or upper-division standing. An examination of reading, writing, academic language, and English language development strategies for teaching at the middle and high school levels. Covers all areas of the curriculum. Includes observation and participation in public schools. Credit is awarded for only one of EDUC 174 or EDUC 174S.

EDUC 174S Reading and Writing in the Content Areas (4) Lecture, 3 hours; discussion, 1-1.5 hours. Prerequisite(s): professional or upper-division standing. An examination of reading, writing, academic language, and English language development strategies for teaching at the middle and high school levels. Covers all areas of the curriculum. Includes observation and participation in public schools. Credit is awarded for only one of EDUC 174 or EDUC 174S.

EDUC 175 Language Development in Content Areas (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): professional or upper-division standing. A study of second language acquisition and models of teaching strategies for English language development in content area instruction. Credit is awarded for only one of EDUC 175 OR EDUC 175S.

EDUC 175S Language Development in Content Areas (4) Lecture, 3 hours; discussion, 1 hour. Prerequisite(s): professional or upper-division standing. A study of second language acquisition and models of teaching strategies for English language development in content area instruction. Credit is awarded for only one of EDUC 175 or EDUC 175S.

EDUC 176 Language Development in Content Areas (3) Lecture, 2 hours; field, 2 hours; outside research, 1 hour. Prerequisite(s): EDUC 175 or EDUC 175S. Analysis, planning, execution, and evaluation of empirical and theoretical foundations of programs and strategies for English-as-a-second-language instruction and English language development in content area instruction. Includes observation and participation in assigned schools. Satisfactory (S) or No Credit (NC) grading is not available.

EDUC 190 Special Studies (1-5) Outside research, 3-15 hours. Prerequisite(s): upper-division standing; consent of the Dean of the Graduate School of Education. Independent study and research in education. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.

Graduate Courses

EDUC 200 Human Differences (4) Lecture, 3 hours; research, 3 hours. Prerequisite(s): EDUC 212 or equivalent. Covers dimensions of individual differences, varieties of group differences, and factors producing differences in development.

EDUC 201A Research in Reading and Writing (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. A critical evaluation of linguistic, cognitive, social, and cultural aspects of reading and writing, as gleaned from research, and reading and writing research methods.

EDUC 201B Theories and Issues in Literacy (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): EDUC 201A or consent of instructor. Examination of literacy development in individuals and in society; definitions of literacy; development of structural knowledge; development of communication skills; role of language differences in the problems of learning to read and write; oral language arts; emergent literacy; and writing development.

EDUC 202 Theories of Education (4) Lecture, 3 hours. Prerequisite(s): consent of instructor. An analysis of the principal contemporary theories affecting the development of educational policy.

EDUC 203 History of American Education (4) Lecture, 3 hours. Prerequisite(s): consent of instructor. A study of American educational history from 1830 to the present.

EDUC 204 The School as a Social System (4) Lecture, 3 hours. A study of intra-school relationships; administration, professional bureaucracy, faculty and student relations. The classroom itself will be examined as a social-psychological system.

EDUC 206A Politics of Education: Local School District (4) Lecture, 3 hours. Examination of political power, representation, influence, decision-making and inter-governmental relations in the public schools.

EDUC 206B Advanced Seminar on Federal and State Policy (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): EDUC 207 or EDUC 209A or EDUC 209B or consent of instructor. Examines state and federal roles in education policy in K-12 education. Focuses on the role of federal and state policy in defining governance and teaching and learning in schools.

EDUC 207 Educational Policy (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines twentieth-century American educational policy covering major issues underlying school reform and the social, political, and economic forces that shape these issues. Also examines state and local strategies to enhance school performance.

EDUC 208 Legislative Action and Educational Policy (4) Lecture, 4 hours. Examination of the legal processes governing educational policy, including significant laws, legal principles, recent litigation, controlling relationships of schools to student and teacher rights and duties, administrative behavior, etc. Focuses on connections between legislative and judicial action and the social, political and economic forces affecting education.

EDUC 209A Education Policy Analysis (4) Lecture, 3 hours. Prerequisite(s): consent of instructor. Theoretical and methodological foundations for education policy analysis. Focuses on theory building—utilizing frameworks from political science, sociology, social psychology, and history.

EDUC 209B Education Policy Analysis (4) Lecture, 3 hours. Prerequisite(s): consent of instructor. Theoretical and methodological foundations for education policy analysis. Examines conceptualization of variables and the formulation and testing of hypotheses regarding policy formation and effects.

EDUC 211A Cognitive Development (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Survey course on children's cognitive development and the application of cognitive-developmental theory (Vygotsky, Piaget, information processing) and research to children's learning and academic achievement.

EDUC 211B Social Development (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Surveys social development during childhood and adolescence. Topics include individuality and self, peer relations, adult-child relations, self-system beliefs and attitudes, and achievement motivation. Special attention is paid to issues as they relate to socialization at school.

EDUC 212 Research Methods (4) Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): graduate standing or consent of instructor. Covers principles of scientific research including historical, survey, descriptive, correlational, experimental, and quasi-experimental methods, as well as internal and external threats to validity. Credit is awarded for only one of EDUC 212 or EDUC 248T.

EDUC 213 Factor Analysis (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): EDUC 242A or consent of instructor. Covers theory and practice of factor analysis in educational and psychological measurement. Addresses exploratory and confirmatory factor analytic strategies. Includes application of computers to computation in factor analysis.

EDUC 214 Educational Research: Statistical Inference and Hypothesis Testing (5) Lecture, 3 hours; laboratory, 3 hours; outside research, 3 hours. Prerequisite(s): EDUC 241C or consent of instructor. Covers sampling distributions and their use in tests of significance; ANOVA; planned multiple comparisons; fixed, random, and mixed-effects models; and simple and multiple regression. Examples are from education.

EDUC 215 Educational Research: Experimental Design (5) Lecture, 3 hours; laboratory, 3 hours; outside research, 3 hours. Prerequisite(s): EDUC 214. Focus is on common designs used in education, including higher order factorials, hierarchical designs, and repeated measures. Emphasis is on design application and appropriate statistical analysis for education. Covers ANCOVA.

EDUC 216 Educational Research: Advanced Statistics (5) Lecture, 3 hours; laboratory, 3 hours; outside research, 3 hours. Prerequisite(s): EDUC 214, EDUC 215. Study of advanced statistical procedures frequently used in educational research. Topics vary. Covers MANOVA, simple and multiple regression, discriminant function analysis, and factor analysis.

EDUC 217 Single-Case Experimental Design (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): admission to the M.A. or Ph.D. program in School Psychology or Special Education; or consent of instructor. Covers the logic, applications, and analytic techniques for single-case experimental designs in naturalistic settings. Specific designs include withdrawal, multiple baseline, alternating treatments, changing criterion, and multielement experimental designs. Emphasizes problems of using and changing single-case experimental designs in applied settings.

EDUC 218 Problems in Evaluation (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing. A study of policies and procedures that define program evaluations in education. Topics include evaluation models, formative and summative strategies, evaluation designs and analyses, and ethical issues.

EDUC 219 Classroom and School Assessment (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Survey course in classroom and school assessment. Covers basic principles of measurement including test administration, construction, scaling, norming, reliability, validity, and interpretation of individual and group tests.

EDUC 220A Sociocultural Theory and Education (4) Seminar, 3 hours; term paper, 1 hour; extra reading, 2 hours. Prerequisite(s): graduate standing or consent of instructor. Explores sociocultural perspectives in relation to teaching, learning, students, teachers, and others in schools and other learning environments. Considers issues of knowledge, skills, values, power, and privilege as seen through sociocultural theory and research.

EDUC 220B Sociocultural Theory and Education (4) Seminar, 3 hours; term paper, 1 hour; extra reading, 2 hours. Prerequisite(s): EDUC 220A or consent of instructor. Continues the exploration of sociocultural perspectives in relation to teaching, learning, students, teachers, and others in schools and other learning environments. Considers issues of knowledge, skills, values, power, and privilege as seen through sociocultural theory and research.

EDUC 222 Role Formation in Educational Organizations

(4) Lecture, 3 hours. Prerequisite(s): consent of instructor. An analysis of adult roles and their formation in schools, e.g., teacher, counselor, principal and central office administrators. Emphasis will center on the individual's early socialization to the school's professional work and related professional ideologies.

EDUC 223A Qualitative Research Methodologies in Education

(5) Seminar, 3 hours; outside research, 6 hours. Prerequisite(s): graduate standing or consent of instructor. Focuses on the theoretical underpinnings of qualitative research methodologies and their use in designing, conducting, and representing research.

EDUC 223B Qualitative Research Methodologies in Education

(5) Seminar, 3 hours; outside research, 6 hours. Prerequisite(s): graduate standing or consent of instructor; EDUC 223A. Focuses on the collection, analysis, and representation of data in interpretive research.

EDUC 224 Organization and Administration of the School

(4) Lecture, 3 hours. The study of school systems and administrative roles in the light of organizational and administrative theory.

EDUC 225 School Finance

(4) Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): consent of instructor. Explores methods of financing public education. Identifies budgeting and accounting techniques used by school districts in support of the instructional process and considers legal requirements and public reactions to the financing of education.

EDUC 227 Educational Change and Innovation

(4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. The study of change and innovation in the public school. Emphasis is placed on (a) the organizational environment of the school which must accommodate the innovation, (b) specific strategies of change, and (c) contemporary educational innovations.

EDUC 228 Human Resources Administration in Education

(4) Lecture, 3 hours; consultation, 1 hour. Prerequisite(s): consent of instructor. Examines theory, research, and practices associated with the human resources function in schools. Topics include goals, policies, and outcomes related to planning, recruitment, selection, appraisal, compensation, development, collective bargaining, and the use of management information systems as tools for informed decision making.

EDUC 229 Leadership in School Organizations

(4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing. Examines theories of leadership in school organizations. Emphasis given to rational and institutional perspectives and their implications for management in educational settings.

EDUC 230A Curriculum Theory and Praxis in Education

(4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): consent of instructor. Covers analysis of curriculum theories, trends, innovations, and instructional strategies.

EDUC 230B Curriculum Theory and Praxis in Education

(4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): EDUC 230A recommended. Covers analysis of curriculum organization, design, and implementation.

EDUC 232 Teaching Strategies

(4) Lecture, 3 hours. Prerequisite(s): teaching credential, teaching experience. Development of varied instructional strategies and skills, such as inquiry and questioning, that are compatible with new and evolving curricula. Emphasis will be on classroom applications.

EDUC 233 Differential Achievement and the School Learning Environment

(4) Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing. Explores how racial, ethnic, linguistic, cultural, and

socioeconomic differences in educational achievement are a product of the learning environments experienced in schools and classrooms.

EDUC 234 Multilevel Modeling

(4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): EDUC 216 or consent of instructor. Covers the processes involved in conceptualizing, conducting, interpreting, and composing multilevel analyses. Includes ANOVA and ANCOVA with random effects, means-as-outcomes, random-coefficients, intercepts and slopes as outcomes, and growth models. Also addresses model building and assessment, centering, estimation, hypothesis testing, contextual and compositional effects, and other related topics.

EDUC 237 Research on Teaching

(4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing. Examines approaches to research on teaching. Considers the process-product, classroom ecology, ethnographic, and teacher cognition paradigms.

EDUC 238 Education and Gender

(4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines the multiple and complex relationships of gender and education in U.S. society. Analyzes theoretical perspectives on gender and schooling. Topics include cultural constructions of identity, male and female experiences of schooling, and concepts of gender neutrality in the curriculum.

EDUC 239 Developmental Psychopathology

(4) Lecture, 3 hours; extra reading, 3 hours. Prerequisite(s): graduate standing in Education or Psychology or consent of instructor. Examines the origins of psychopathology from multiple theoretical perspectives with a specific focus on childhood disorders. Topics include biological and environmental contributions to disorder development and treatment paradigms.

EDUC 240 Educational Psychology

(4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): EDUC 110 (or EDUC 110S) or equivalent or consent of instructor. Overview of the major empirical and theoretical bases of educational psychology, followed by detailed analysis of the following topics: (a) cognition and metacognition as applied to school learning and instruction; (b) motivation, student perceptions, teacher perceptions, classroom processes; (c) effective teaching; and (d) evaluation.

EDUC 241A Inquiry and Research Methods

(4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): first-year standing in the Ph.D. program in Education. Examines the nature of inquiry and research in educational studies, including the formation of questions.

EDUC 241B Introduction to Qualitative Methods

(4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): EDUC 241A; first-year standing in the Ph.D. program in Education. Introduces qualitative research studies. Covers the design, collection, analysis, and interpretation of qualitative data in educational research.

EDUC 241C Introduction to Quantitative Methods

(4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): EDUC 241A; first-year standing in the Ph.D. program in Education. Introduces quantitative research studies. Covers the design, collection, analysis, and interpretation of quantitative data in educational research.

EDUC 242A Educational and Psychological Measurement and Evaluation

(4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): EDUC 214; consent of instructor. Examines topics in measurement and evaluation including classical test theory and program evaluation design. Focus is on application in educational and psychological settings and critical examination of norm-referenced and criterion-referenced testing.

EDUC 242B Advanced Educational and Psychological Measurement and Evaluation

(4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): EDUC 242A or equivalent or consent of instructor. Examines advanced topics in measurement and evaluation including generalizability theory and item response theory. Emphasis is on the statistical basis of these theories and their application in educational and psychological settings.

EDUC 242C Applied Measurement in Education

(4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): EDUC 242B or equivalent or consent of instructor. Examines applications of advanced topics in measurement and evaluation including generalizability theory and item response theory. Emphasizes qualitative and quantitative approaches to examine measurement properties that should be considered when designing instruments for use in educational and psychological settings.

EDUC 243 Student Metacognition and Self-Regulated Learning

(4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines theoretical perspectives and research approaches for studying students' metacognition and self-regulation and instructional interventions that can foster and support metacognition and self-regulation in children and adults in the areas of mathematics, reading and writing, and science.

EDUC 245 (E-Z) Review of Research Literature in Education

(4) for hours and prerequisites, see segment descriptions. Critical analyses of research in the various areas of education.

EDUC 245E History of Church, State, and Schooling

(4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Overview of the historical roles of religion in the origins and development of public schooling in the United States and the establishment of private religious schooling. Examines the historical roots of contemporary issues of schooling, church, and state, including school prayer, creationism and evolution debates, and censorship.

EDUC 245G The Opportunity/Achievement Gap

(4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines theoretical and empirical research on the "achievement gap" from a variety of social science disciplines. Explores causes and consequences of racial or ethnic, linguistic, cultural, and socioeconomic differences in educational achievement.

EDUC 246 (E-Z) Research on Education of Exceptional Children

(4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): EDUC 116 (or EDUC 116S) or equivalent; graduate standing or consent of instructor. Intensive study of current research on the education of exceptional children. E. Asperger Syndrome; F. Emotional and Behavior Disorders; G. Mild Mental Retardation; I. Learning Disabilities; J. Contemporary Issues and Trends; K. Autism Spectrum Disorders; L. Behavioral Phenotypes; M. Multicultural Special Education; N. Early Intervention; O. Family Influences on Development; P. Law, Policy, and Administration; R. History of Special Education; S. Sources and Treatments of the Reading Difficulties of Students with Disabilities.

EDUC 247 Theoretical Perspectives on Learning

(4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Focuses on how learning occurs according to various theories and what factors may facilitate or impede learning. Theories include behaviorism, social learning theory, constructivism, information processing, social constructivism, sociocultural perspectives, and cultural and linguistic theories.

EDUC 248 (E-Z) Higher Education

(4) For hours and prerequisites, see segment descriptions. A selection of courses for studies on higher education.

EDUC 248E Demographics and Diversity in Higher Education (4) Seminar, 3 hours; extra reading, 2 hours; written work, 1 hour. Prerequisite(s): graduate standing or consent of instructor. An introduction to theoretical perspectives of diversity in U.S. higher education. Explores the implications of demographic shifts on U.S. postsecondary educational practice and policy. Reviews the research literature on the impact of diversity on educational outcomes for college students, faculty, and administrators.

EDUC 248F Financing Higher Education (4) Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Provides an overview of finance and economics of higher education in the United States. Examines economic theories as they apply to higher education finance and the distributive implications of various financing strategies. Covers main trends and current debates and how to identify political-economic rationales behind financing policy choices in higher education.

EDUC 248G Higher Education Governance (4) Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Introduces students to the organization and governance of higher education. Covers diverse forms of organization and governance in contemporary public and private higher education in the United States. Also addresses alternative theoretical frames through which to view postsecondary governance structures (both internal and external to institutions).

EDUC 248-I Critical Issues in Higher Education (4) Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines internal and external issues that face higher education institutions.

EDUC 248J Higher Education Policy (4) Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Introduces a range of contemporary higher education policy issues and the conceptual and theoretical frameworks used to understand these issues. Develops fluency in using public policy language in the higher education setting. Addresses critical understanding of policy analysis, economics, and political science papers in higher education.

EDUC 248K The Dissertation and the Proposal in Higher Education (4) Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Enhances skills in evaluating and critiquing research through written and oral communication. Includes completion of dissertation proposal in the field of higher education.

EDUC 248M The Community College (4) Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Analyzes current literature on community colleges.

EDUC 248N Higher Education Scholarship and Literature Review (4) Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Utilizes scholarship in higher education to review literature on specific topics in the field, as well as develop these topics for research.

EDUC 248-O Organization and Administration in Higher Education (4) Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines theory, research, and literature on higher education organizations and their management.

EDUC 248P Historical Perspectives on Campus Life (4) Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines historical perspectives on campus life in the United States from the view of the students, faculty, administrators, and employees. May address the general environment, curriculum, student activities

and clubs, athletics, town-gown relationships, or other aspects.

EDUC 248Q Foundations of Student Services (4) Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines the field of student services and student affairs in higher education institutions. Focuses on the historical and philosophical foundations of the field, as well as guiding theories and models of practice. Addresses contemporary challenges for student services practitioners.

EDUC 248R College Student Development (4) Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Addresses student development in higher education institutions. Focuses on developmental theories applicable to college students. Examines institutional behaviors and actions (including policy) related to student development.

EDUC 248S The College Student (4) Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Analysis of current literature on diverse populations of students in colleges and universities. Examines contextual and personal factors shaping the college experience. Focuses on students' multiple identities and challenges.

EDUC 248T Understanding Research in Higher Education (4) Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines the strengths and limitations of research methods used in higher education research. Explores data collection and research design. Also evaluates scholarly research publications. Credit is awarded for only one of EDUC 212 or EDUC 248T.

EDUC 248U History of Higher Education in the United States (4) Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Overview of the growth and development of institutions of higher learning in the United States, from the colonial colleges to the multipurpose research institutions of today, including academies, community colleges, and professional schools.

EDUC 249 Discourse Analysis for Education (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent instructor. Analysis of spoken discourse in classrooms and other learning contexts to study social, cognitive, political, and historical aspects of teaching and learning; teacher-student relationships; schooling; and literacy acquisition. Topics include speaker-listener relationships, the social construction of educational roles, and discourse indicators of student development.

EDUC 251 Seminar in Cognitive Development (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): EDUC 211A or equivalent or consent of instructor. Seminar on current issues in cognitive development. Topics include metacognition, Vygotskian theory, and cultural factors in cognitive development. Special attention will be paid to issues as they relate to the learning and teaching of school subjects.

EDUC 252 (E-Z) Seminar in Educational Psychology (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): for EDUC 252N: EDUC 211A; consent of instructor. Reviews various topics in educational psychology at the theoretical and empirical levels. E. History of Educational Psychology; G. Advances in Mental Measurement; N. Children's Mathematical Cognition.

EDUC 253 Advanced Doctoral Seminar in School Psychology (1 or 2) Seminar, 10-20 hours per quarter. Prerequisite(s): second-year standing in the Ph.D. program in School Psychology or consent of instructor. Covers current topics relevant to research and practice in school psychology. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 12 units.

EDUC 254A Cognitive Assessment for School Psychologists (4) Seminar, 3 hours; practicum, 3 hours. Prerequisite(s): admission to the M.A. or Ph.D. program in School Psychology or consent of instructor. Covers the administration, scoring, and interpretation of individual measures of intelligence and academic aptitude. Emphasizes the use of these measures for screening and classification decisions, as well as psychological report writing.

EDUC 254B Academic Assessment (4) Seminar, 3 hours; practicum, 3 hours. Prerequisite(s): admission to the M.A. or Ph.D. program in School Psychology or Special Education; or consent of instructor. Covers the administration, scoring, and interpretation of individual norm-referenced measures of academic achievement, perceptual-motor skills, and adaptive behavior. Emphasizes the use of these instruments for screening and classification decisions, as well as psychological report writing.

EDUC 254C Social, Emotional, and/or Behavioral Assessment (4) Seminar, 3 hours; practicum, 3 hours. Prerequisite(s): admission to the M.A. or Ph.D. program in School Psychology or Special Education; or consent of instructor. Covers procedures and techniques of behavioral assessment, including systematic behavioral observations, curriculum-based assessment, behavior rating scales, behavioral interviews, and self-monitoring. Includes conceptual issues in applying traditional psychometric theories to behavioral assessment data, as well as methods for integrating multimodal behavioral assessment information.

EDUC 255A Principles of Social Behavior Intervention (4) Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): admission to the M.A. or Ph.D. program in School Psychology or Special Education; or consent of instructor. Covers the principles and procedures for developing social competencies in school-age children and youth. Topics include social skills assessment, sociometric assessment, and strategies for promoting acquisition, performance, and maintenance of social skills.

EDUC 255B Principles of Academic Behavior Intervention (4) Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): admission to the M.A. or Ph.D. program in School Psychology or Special Education; or consent of instructor. Covers the principles and procedures for prevention and remediation of academic learning problems and performance. Topics include functional analysis, stimulus control, generalization, and methods for summarizing trends in academic performance.

EDUC 255C Child Behavior Therapy (4) Seminar, 3 hours; practicum, 3 hours. Prerequisite(s): admission to the M.A. or Ph.D. program in School Psychology or Special Education; or consent of instructor. Covers principles derived from neobehavioristic and social learning theories applied to treat children's problems. Discusses professional ethics, practice, and responsibility in clinical child behavior therapy.

EDUC 256 Advanced Seminar in Learning Disabilities (4) Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): EDUC 212 or equivalent or consent of instructor. Critical evaluation of theory and research in the field of learning disabilities. Requires a data-based project reflecting original research.

EDUC 257 Language, Culture, and Education (4) Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Examines how culture and language influence educational processes and outcomes, by focusing on issues such as testing, gendered pedagogies, cultural adaptations of minority groups, social uses of literacy, Ebonics, bilingual education, and cultural capital.

EDUC 258 (E-Z) Higher Education (4) Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Additional prerequisites may be required for segments of this course.

Courses for graduate studies on higher education. See individual segments for course information.

EDUC 258R Qualitative Data Analysis in Education (4)

Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): EDUC 223A or equivalent; graduate standing or consent of instructor. Prepares students for the conduct of qualitative data analysis in major research projects and dissertation research. Includes the use of students' collected data or data set.

EDUC 259 Research Seminar (2)

Seminar, 2 hours. Prerequisite(s): EDUC 212 or EDUC 214 or consent of instructor. Introduces opportunities and requirements for successful graduate study. Emphasizes effective strategies for developing and implementing a program of professional development and graduate research. Involves research reports on topics in educational psychology, special education, curriculum and instruction, and/or educational administration. Graded Satisfactory (S) or No Credit (NC). Course is repeatable.

EDUC 260 History of Curriculum (4)

Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): consent of instructor. Investigates the historical construction of schooling in general and specifically the curriculum -- formal, informal, and hidden. Explores the purposes of schooling, the relation between schooling and U.S. culture, and the sociocultural contexts for changes and continuities in curriculum.

EDUC 261 School Psychological Consultation (4)

Seminar, 3 hours; practicum, 3 hours. Prerequisite(s): admission to Ph.D. program in School Psychology or Special Education; or consent of instructor. Theoretical and applied issues of consultative problem solving conducted in school settings. Principles derived from behavioral systems and organizational theories and how these principles are used in an indirect service-delivery model to facilitate changes in students' behavior.

EDUC 262 Achievement Motivation (4)

Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): EDUC 110 (or EDUC 110S) or equivalent or consent of instructor. Covers the major approaches to achievement motivation emphasizing on the cognitive approach. Topics include development and individual differences in achievement motivation, achievement-related attitudes and beliefs (e.g., self-concept, attributions, perceived control), and relations between motivation and school performance.

EDUC 264 Professional School Psychology (4)

Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): admission to Ph.D. program in School Psychology or Special Education; or consent of instructor. Roles and functions of psychologists working in school settings with particular emphasis upon ethical standards for psychologists. Historical and legal evolution of school psychology is discussed along with issues in professional identity as school psychologists.

EDUC 265A Practicum in School Psychology: Introductory (2)

Seminar, 2 hours; practicum, 4 hours. Prerequisite(s): admission to the Ph.D. program in School Psychology. An introduction to school psychology practice. Topics include the roles and functions of school psychologists, ethical standards, historical and legal evolution of school psychology, licensing, professional organizations, and issues of professional identity. Includes hands-on experience in supervised, school-based settings. Graded Satisfactory (S) or No Credit (NC).

EDUC 265B Practicum in School Psychology: Basic (1)

Seminar, 10 hours per quarter; practicum, 8 hours. Prerequisite(s): EDUC 265A. An application of basic principles in school psychology. Includes special education (SPED) law, California Education Code, and American Psychological Association diagnoses. Covers SPED eligibility, cultural sensitivity, diversity, and applied skills in cognitive and academic assessment. Addresses consultation, observation, and interviewing.

Offers supervised experience in school-based settings. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 2 units.

EDUC 265C Practicum in School Psychology: Advanced (1-2)

Seminar, 10 hours per quarter; practicum, 8-16 hours. Prerequisite(s): 2 units of EDUC 265B; consent of instructor is required for students enrolling in 2 units. An application of advanced principles in school psychology. Topics include behavioral, social, and emotional assessment, psychopharmacological intervention, group/crisis intervention, and psycho-educational evaluations. Addresses teacher/parent consultation, systems change, legal issues related to services, and National Credential in School Psychology licensure procedures. Offers hands-on experience in supervised, school-based settings. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 6 units.

EDUC 265D Practicum in School Psychology: Clinical (1-2)

Seminar, 10 hours per quarter; practicum, 8-16 hours. Prerequisite(s): consent of instructor. An application of school psychology skills in clinical settings. Topics include alternative professional settings, current research, and best practice assessment and treatment of psychopathologic, neurologic, and genetic disorders. Addresses wrap-around services, residential and nonresidential treatment, and cultural sensitivity with families of children with disorders. Includes placement in supervised clinical settings. Graded Satisfactory (S) or No Credit (NC). Course is repeatable to a maximum of 4 units.

EDUC 265E Practicum in School Psychology: Supervision (1)

Seminar, 20 hours per quarter. Prerequisite(s): admission to the Ph.D. program in School Psychology. Development of knowledge and skills in supervision of school psychologists. Topics include the historical evolution and various theoretical orientations of supervision, as well as best practice in supervision in diverse settings. Also covers process of applying and interviewing for internship and preparation for the National Credential in School Psychology (NCSP) exam. Graded Satisfactory (S) or No Credit (NC).

EDUC 266 Language, Schooling, and Identity (4)

Seminar, 3 hours; individual study, 3 hours. Prerequisite(s): admission to the M.A. or Ph.D. program or consent of instructor. Examines how formal and informal educative institutions use language for identity formation and how students/novices respond to those institutional practices.

EDUC 267 Culture of School Organizations (4)

Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Explores the social scientific notion of culture, its use in organizational theory, and its application to the study of schools and school leadership.

EDUC 268 Diversity in Educational Administration (4)

Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Provides an understanding of school administrative and management issues related to the increasing diversity in schools. Theories about underrepresentation, diversity, legislation, harassment, and institutional participation reviewed. Cultural background, communication patterns, social networks, leadership, and administrative styles are considered.

EDUC 269 (E-Z) Topics in Education (2 or 4)

Seminar, 2-3 hours; outside research, 0-3 hours. Prerequisite(s): graduate standing or consent of instructor. A critical analysis of current theory and research in special areas of education. Covers a single topic not contained in a regular course. Announcement of each topic will be made when the course is offered and designated as either a 2- or 4-unit course. E. Educational Psychology; I. Curriculum and Instruction; M. Institutional Leadership and Policy Studies; P. School Psychology; S. Special Education. Each segment is repeatable as topics change to a maximum of 16 units.

EDUC 270 Reading Development and Intervention (4)

Seminar, 3 hours; term paper, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Introduces the findings from national panels on reading development, instruction, and intervention. Topics include practical application of these findings to the development of reading intervention programs for students across grades.

EDUC 271 The School Principal: Tools for Managerial Problems (4)

Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): consent of instructor. Review of the literature on the principal's role as leader and manager of the school site. Topics include practices and problems of the school principal, interpersonal relations, political issues, communication techniques, and technology.

EDUC 272 Sociolinguistics and Educational Processes (4)

Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): admission to Ph.D. program in Education or consent of instructor. Introduces sociolinguistic concepts (language maintenance and shift, diglossia, code-switching, standard versus dialect) as they relate to schooling. Examines issues such as diversity (linguistics, ethnic, class) and educational inequality, gender and language, minority languages, language attitudes, cultural mismatch, and language socialization.

EDUC 274 Text Analysis (4)

Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate standing or consent of instructor. Analysis of written texts to study social and cognitive aspects of literacy. Topics include the writer-reader relationship, social construction of genre, text readability, teaching and learning, and textual indicators of student development.

EDUC 276 Diversity and Curriculum (4)

Seminar, 3 hours; outside research, 3 hours. Prerequisite(s): graduate or professional standing. Describes and analyzes the controversy surrounding efforts to develop curriculum that addresses diversity in U.S. society. Examines changing theoretical perspectives on multicultural education and key concepts such as race, identity, and culture. Reviews research on multicultural education.

EDUC 277 Theoretical Perspectives on the Practice of Teaching (4)

Lecture, 3 hours; outside research, 3 hours. Prerequisite(s): admission to the Ph.D. program in Education or consent of instructor. Examines a range of theoretical perspectives used in studying the practice of teaching. Covers psychological, historical, anthropological, sociological, and philosophical perspectives.
